41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 1.

TELEGRAPH BETWEEN UNITED STATES AND FOREIGN COUNTRIES.

[To accompany bill H. R. No. 2591.]

DECEMBER 21, 1870.—Ordered to be printed.

Mr. WOOD, from the Committee on Foreign Affairs, made the following

REPORT.

The Committee on Foreign Affairs, to which was referred that portion of the President's message relating to the French Atlantic cable, and also a resolution passed by the House on the 10th December, 1869, directing the committee to inquire into and report the conditions by which the so-called French Atlantic Cable Company holds the concession of the government of France to connect their cable with the French shore, and whether there are any restrictions or reservations in said concession which are prejudicial to the rights of the Government of the United States, or to the people thereof, and also any further information relating thereto, and which affect ocean telegraphing, together with such recommendations in the premises as, in the judgment of the committee, may be required, have had the same under consideration, and beg leave to report:

That the question of interoceanic connection by telegraph has become one of vast importance, not only as an agency designed to effect extraordinary changes in the commercial relations of maritime countries, but as establishing new and more liberal rules of international intercourse between governments themselves, in times of peace as well as of war. The progress made by the world within the past thirty years, in the increased facilities afforded for the greater exchange of commodities, and the more rapid interchange of intelligence through the instrumentality of the inland telegraph, the rail, and the press, has accomplished more for the elevation of humanity and the security of individual freedom than the previous five hundred years had done. As between the people of the same nation the change for the better from these causes has been wonderful, and when extended to the people and governments of different, but connected nations, the effect has been equally beneficial. The rapid progress in Europe to a more enlightened policy in dealing with each other, and an enlargement of commercial relations, may be mainly attributed to these influences. But when the same great principle is extended so as to bring nations which are separated by thousands of miles of ocean into intermediate intercourse, an equally surprising result is effected. Thus may we confidently predict that through this means, within a short period, the whole Christian world will be brought within the influence of a universal family circle, comprehending all forms of government, and all religions and creeds, making up a vast community—one in everything that concerns political action, tariff regulations, coinage, currency, commerce, interchange of literature and the arts, material improvements, and in all the other agencies by which the

world is moving onward to a higher destiny, and a more catholic spirit of fraternal accord. It is with this view of the magnitude of the importance of ocean cables, not only as to the United States, but the world, that the committee approach the consideration of the subject immediately referred to it.

Ocean marine cables are of comparatively recent construction. Within the last decade the first was laid between America and England, under American enterprise and with American supervision. Though this remarkable attempt was for a time frustrated by physical difficulties, yet the energy and mental power of our own countrymen, aided by foreign capital, surmounted them, and accomplished a result destined to be considered in history as the pioneer in this new agency of progress. Since then many other cables have been projected, and several have been laid.

Besides the French cable there are others of less extent, and some of equal extent, in the course of construction. The China Submarine Telegraph Company of England, in connection with other like companies, with European East India cables, have just undertaken an extension of connected cable to the empire of China. An even greater enterprise has just been accomplished by the laying of a cable between Suez and Bombay, a distance of thirty-six hundred nautical miles. This line connects with the present Alexandria and Malta line, which again connects with the continent, and forms a united link of telegraphic connection between England and her East India possessions. The first dispatch by this line was received in London on the 28th day of February last. Still another project is being industriously prosecuted, of connecting the north of Europe across to Eastern Russia, through European Russia to the east, overland from that point. This is under the direction of a Danish company, operating under the subsidy and protection of the government of Russia. Several other companies are being formed which, if successful, will, with those already existing and projected, lay cables which will engirdle the globe, so that no obstruction of "hill or dale, ocean or mountain," will intervene to prevent the free and regular connection of the people of the world with each other, from the nearest to the most distant parts. The history of the French cable is briefly as follows: On the 23d June, 1868, the government of France, through the director general, approved by the minister of the interior, issued *cahier des charges* for the establishment of a submarine line of telegraph between France and the United States. As the conditions and reservations of this paper form the basis and conditions of the concession of the government of France to the present company, it is sufficiently important to state it entire:

"Cahier des charges" for the establishment of a submarine line of telegraph between France and the United States of North America.

The concession of a sub-marine line of telegraph between France and the United States of America will be made at the office of the director general of telegraph lines on the 6th July, 1868, at 2 o'clock in the afternoon, to the persons whose tender shall offer the greatest reduction on the term of twenty years, mentioned in the second article of the present "*cahier des charges*," and upon the tariff of 100 francs mentioned in the fourth article. The line will commence at Brest, and terminate at some point of the coast of the United States of America between Boston and New York. It will not touch, on its course, the territory of any foreign state, but may pass by St. Pierre, (Newfoundland,) French territory. It must be completed and in working order by the 1st of September, 1869.

2. The government engages not to grant other concessions for lines between France and North America during a maximum period of twenty years from the 1st of September, 1869.

3. The rules of the Telegraphic Convention of Paris, or of any other international conventions, which may be hereafter substituted for it, shall be adopted on this line.

4. The tariff for messages of twenty words, through the length of the cable, shall not exceed 100 francs.

5. This tariff shall be reduced by one-half for government dispatches, which shall have precedence.

6. The government reserves to itself the right of establishing, at the expense of the concessionaires, such control over the service of the line as it may judge convenient. For this purpose the service of the line shall have its office in one of the rooms belonging to the telegraph office of Brest, the rent of which room shall be repaid to the state by the concessionaires. The clerks of the telegraph office of the state shall be the indispensable intermediaries between the public and the agents of the concessionaires in the transmission of messages. The messages received by the cable shall be immediately handed to them, and be delivered through their agency. The messages to be transmitted by the cable shall in like manner be lodged with them, and handed by them to the agents of the concessionaires.

7. The company which will be formed by the concessionaires cannot amalgamate with any other company, whether French or foreign, having a concession for a transatlantic cable, nor transfer or lease its line, without permission from the government.

8. If during the duration of the concession one cable shall become insufficient, by reason of the traffic, or from any other cause, the concessionaires shall be bound to lay down a second within eighteen months after notice given to them by the administration, unless they prefer to renounce the privilege belonging to them according to article two, of the present "*cahier des charges.*" In this latter case they shall make known their decision within three months from the above-mentioned notice. The course above stated will be followed with reference to all other supplementary cables which may have to be laid.

9. If during the duration of the concession, telegraphic communication shall be interrupted for a consecutive period of eighteen months, the privilege granted in favor of the concessionaires shall, *ipso facto*, cease, and the government shall resume the right of granting such other concessions as it may desire.

10. No one shall be admitted to tender without being previously approved by the minister of the interior, and unless he has paid at the "*caisse des dépôts et consignations*" at Paris, caution money to the amount of 500,000 francs. The parties tendering shall prove the payment of this caution money by annexing to their tender a certificate issued by the "*caisse des dépôts et consignations.*"

11. The concessionaires shall be bound to prove, between this date and the 15th of September next, the legal constitution of their company, with a capital of 27,500,000 francs, and also the subscription for the whole of the shares, amounting to this capital. In default of their fulfilling this condition, their caution money shall belong to the state, and the concession annulled. In case the concessionaires, after having made *studiés*, should find this sum insufficient, they will be allowed to increase the capital to the sum of 40,000,000 francs.

12. An agent of the administration of telegraph lines shall be admitted to the factory where the transatlantic cable will be made, as often as the administration may demand it of the concessionaires. The administration may also commission one of its agents to examine, when finished and put on board, the cable. The cost of this inspection shall be borne by the concessionaires.

13. The caution money paid by the concessionaires shall be repaid when the cable is complete and put on board ready to be submerged, and shall be acknowledged to be in good condition by the administration.

14. The non-compliance by the concessionaires with any of the articles of the *cahier des charges*, involves, *ipso facto*, withdrawal of concession.

15. The tenders, which must be written on stamped paper and in accordance with the form below, must not contain any restriction or reserve on pain of nullity. They shall contain an election by the concessionaires of a domicile at Paris for all acts relative to the concession. The tenders, inclosed under envelope sealed with wax, shall be put in the hands of the director general of telegraph lines at the time of adjudication. In case any tender is signed by procuration, the person signing shall annex a notarial copy of his power of attorney. Tenders made by telegraph will not be accepted. If none of the offers are below the figures fixed in articles two and four, the competitors may be admitted then and there to make fresh offers: these fresh offers shall be written at the foot of their tenders, and set forth in the *procès verbal.*

16. Reductions on the maximum tariff of messages can only be of five francs, or multiples of five francs. Reduction in the duration of the concession can only be for one or more years, without fraction. A reduction of one year will be considered equivalent to a reduction of five francs.

17. Any dispute which may arise between the concessionaires and the government on the subject of the execution or of the interpretation of the present *cahier des charges*,

shall be decided administratively by the council of the prefect of the department of the Seine, with appeal to the council of state.

18. The stamp duty and the fixed registration duty shall be borne by the concessionaires.

PARIS, 23*d June*, 1868.

Approved:

The Director General,
VISCOUNT H. de VOUGY.
Minister of the Interior,
PINARD.

The following official announcement gives the result of bidding and the awarding of the concession:

PROCÈS VERBAL—MINISTRY OF THE INTERIOR—GENERAL DIRECTOR OF TELEGRAPHS.

Procès verbal of the concession of a transatlantic cable between France and the United States of North America.

THE 6TH OF JULY, 1868, *at 2 o'clock p. m.*

In conformity with the decision of his excellency the minister of the interior, dated 23d June, 1868, the director general of telegraphs, assisted by MM. Baron Amiot, inspector general, Raymond, inspector, and G. Saubussire, sub-inspector secretary, proceeded to the concession of a submarine telegraph line between France and the United States of North America. The proceedings were opened at two o'clock; one tender only was placed in the hands of the director general, and opened at five minutes past two. The Baron Erlanger and Mr. Julius Reuter, the parties tendering, engaged to complete the submarine communication on condition of obtaining an exclusive privilege for twenty years, and fixing the maximum tariff applicable to messages of twenty words at 100 francs. They further engage to fulfill all the clauses and conditions of the *cahier des charges* drawn up on the 23d June, by his excellency the minister of the interior. Annexed to their tender was a receipt from the "*caisse des dépôts et consignations*," showing the payment made by them of the caution money of 500,000 francs, required by the tenth article of the "*cahier des charges*." The Baron Emile d' Erlanger and Mr. Julius Reuter, having complied with all the conditions fixed by the "*cahier des charges*," are declared concessionaires. Their tender remains annexed to the present "*procès verbal*," which will be submitted for approval to his excellency the minister of the interior.

Done at Paris the day, month, and year above stated.

The Director General,
VISCOUNT H. de VOUGY.
The Inspector General,
BARON AMIOT.
The Inspector General,
RAYMOND.

On the 31st of July, 1868, Messrs. Erlanger and Reuter purchased of Charles Harvard and Charles Christian Leigh, of the city of New York, certain authority, derived by act of the legislature of the State of New York, granting to William Orton, C. C. Leigh, and Charles Harvard an exclusive right to lay telegraphic cables from that State to the empire of France. For this privilege $30,000 were paid in gold. It appears that Messrs. Orton & Co. had effected the passage of the acts through the legislature of New York under a promise to lay a submarine cable, and the legislature not doubting the good faith of those parties the franchise was granted without hesitation. It seems, however, that this was not done, and the privileges so obtained were put into the market for sale, and the grant was sold to the concessionaires of the French cable, who, attaching importance to the supposed privileges of these acts, actually paid for them the enormous sum stated. Subsequently it was discovered that another point of connection in the United States afforded better facilities, and Massachusetts and the present terminus was selected. The next step was the formation of the French company, under the title of the "Societe du Cable Transatlantique Française,"

with a capital of £1,200,000, its principal place of business, London, its first president being Robert Lowe, M. P., the present chancellor of the exchequer of England. The concession from the French government, under which this company was formed, bears date of the 6th July, 1868, and the company was incorporated on the 10th of August of the same year. It is of some importance, in this connection, to state that at that time the only law on the statute-books of the United States for the regulation of telegraphic intercourse was the general act of 1866, which provides that telegraphic communication may be established freely in and over the waters of the United States by any company organized under the laws of any State in the Union. Indeed, down to the present moment, there is no other law of a general bearing on the subject in existence in this country. The rumor, however, of the enterprise upon which the French Cable Company was about to embark caused the introduction into Congress of various measures, framed with a view to the establishment of a special code of regulations affecting ocean cables. These propositions finally assumed the form of a bill, presented to the Senate on the 3d February, 1869. This bill was called up the 2d March, when, in the press of business incidental to the impending dissolution of Congress, it passed the Senate hurriedly, and without any discussion whatever, but it failed to be reached in the House of Representatives before adjournment. On the 11th of March it was reintroduced, and, although called up on more than one occasion, it failed, after discussion, to pass the Senate previous to the adjournment of Congress in April last. In the meantime, assuming that this bill represented the feelings of Congress on the subject, the Secretary of State, on the 10th of July, 1869, addressed a letter to the British minister and the French *chargé d'affaires*, inclosing a copy of the bill, and intimating that the Government of the United States considered that this bill announced the probable policy and purpose of Congress in the premises. This had the effect of drawing from the agent of the French Company in the United States a letter agreeing, on behalf of the company, to abide by whatever enactment Congress should see fit to pass. This is the present position of the matter.

The grounds upon which the concession of the government of France to the French Cable Company is opposed in the United States are—

First. That it imparts an exclusive privilege for twenty years.

Second. That that government reserves the right to exercise a supervision over all messages that may be transmitted. With these objections it is difficult to be reconciled. The United States exercises a spirit of equal and exact justice in its intercourse with nations. It asks nothing but what is right, and will consent to nothing that is wrong. It is quite willing to concede, but must have concession in return. There must be entire and cordial reciprocity. Of the right to lay an Atlantic cable to connect France and the United States, by an American citizen, we cannot be denied. If a French or English company is allowed to connect a French or English cable with our shores, so do we *insist* that the same privilege shall be extended to our citizens, if any such desire to connect any American cable to their shores. On this ground of reciprocity we shall stand with firmness and unyielding determination. With reference to the reserved rights of the government of France to inspect the dispatches which pass over the French cables, there is much to be said on both sides. It has been stated that this right extends to the absolute censorship of all matter, and that the government holds under surveillance, for purposes of examination, every dispatch that passes over the cable from this country. To this charge

the French government has caused the following explanation to be given:

OFFICE OF THE DIRECTOR GENERAL OF TELEGRAPH LINES,
Paris, December 31, 1869.

The message of the President of the United States to Congress contains a part relative to the French transatlantic cable, which this administration considers it a duty to correct. It states, in substance, that according to the terms of concession, dispatches from America transmitted by that route are subject to control and examination of the French government. This administration exercises no control of that nature from America, or from any other quarter, but it is their duty to see that messages are transmitted over the cable in the order of their reception at Brest, and that there is no favoritism in this respect. It must also, on account of the telegraphic monopoly held by the government, see that no dispatches are clandestinely introduced upon the line, and so avoid a tax which legitimately accrues to the state. Its aim is at once to protect the interests of the public and the treasury. Finally, the conditions under which this department exercises control over the business of the line are without political intention. Its subordinate employés are charged with the task, and their duty is restricted to the verification of ciphers, such as the signals of time and place of filing and of re-forwarding, and the number of words which form the basis for the application of the government tax. Again, most of the dispatches, particularly those destined for Nantes, Bordeaux, Tours, and Toulouse, arrive at their destination without passing through Paris, and the same is true with correspondence addressed to England and Spain, such messages being transmitted direct from Brest to London.

According to this, the object of the government, in exercising its control, is for the benefit of the public, in preventing favoritism in the order of sending messages, and to secure the payment of the tax. These are proper motives, and if confined to them, would not be objected to. But the spirit and letter of the official conditions, on which the concession to the company was granted, still remain, and go much further than this. How far the government may exercise its reserved right is another question. We take exception to the fact that any such authority should rest anywhere, especially in the hands of those who may in time of war, or at any other moment, choose to place, not only the dispatches of our Government, but of all others, under official inspection. The director general in this note confines himself simply to the declaration that he does not exercise a "control of that nature." This may be true as far as the present time is concerned, but the power to do so exists, and we have no security that it may not be exercised hereafter, either by him or some successor. The people of the United States will tolerate no such right, whether in its own Government or of any other. Official curiosity or interference in the affairs of private life is in violation of the fundamental principle on which rests our political fabric. It may be proper to state that in France, as well as throughout Europe, all telegraphing is under the exclusive control and direction of officials. All the lines have become government property, and are worked by government agents. England has at last come into this system, that government having recently purchased the lines which were established by private capital. So important has become this means of intercommunication, international conventions have been recently held, in which all the continental nations have been represented. It was found that obstructions and difficulties were constantly arising, and that some general rules should be agreed on. A convention for this purpose was held at Paris, 17th May, 1865, and another, which was organized more thoroughly, at Vienna, 21st July, 1868. The objects accomplished by these conventions have been to settle, internationally, all the various questions which naturally arise in the management and conduct of telegraphy. Therefore, in considering this question with reference to the European connections of American ocean cables, we must bear in mind that throughout Europe all commu-

nication by telegraph is under the government eye. It is not in France alone that this is the case. It is equally so now in England. No cable can be laid between our own coast and that of France by which we could avoid or be exempt from like difficulties. Our messages may reach the shore, but on their way to the interior they would, of necessity, pass through the official lines, and be subjected to their rules and authority. Thus, though we had twenty American lines, our control over the dispatches forwarded by them would cease when reaching the foreign shore. All dispatches sent to the continent by the English Atlantic cable are liable to the same objection. When they reach England they must be transmitted by other lines, and when leaving England and entering France they are at once subjected to the same constraint as other dispatches. Thus, the two existing Atlantic cables are precisely on the same footing, so far as their official inspectorship is concerned. Throughout Europe the telegraph is as much a matter of official regulation as is the post office or any other department of government. The government owns and works it. Nor can we complain of this. Every nation has a right to regulate its own internal affairs. It is a well-settled principle of international law, that these are matters with which other nations have no right to interfere. They are internal regulations over which each people have sole and entire authority. It is under this rule that the United States can and should stand, with reference to the same question as affecting ocean cables.

While we cannot exercise the same supervision over intelligence conveyed to our shores by cables of foreign construction and ownership that France assumes in this case, because it would be inconsistent with our institutions, nevertheless we have a right, and should exercise it, of asking that all cable companies connecting with the American coast shall secure to the Government, as well as to the persons of the United States, similar exemption from inspection or interference with messages transmitted from this end, until reaching the place of destination. The Secretary of State is entitled to much credit for having already taken steps toward the removal of difficulties which have arisen from these causes. The recent breaking of the Cuban cables, and the pending difficulty with the French cable, has probably suggested the necessity of establishing, by convention, some general regulations on principles of reciprocity and neutrality. On the 18th November, 1869, the Secretary of State addressed to our ministers and consuls abroad instructions looking to the formation of conventions for these objects. It cannot be doubted that the principal nations of Europe will see the necessity and propriety of meeting in a friendly spirit this intelligent proposition. There is reason to believe that France and England will speedily accept and ratify conventions looking to this end; meanwhile no short-sighted policy should be adopted to affect, injuriously, existing cables. It is the duty of Congress and the Executive to foster and facilitate all enterprises of this character. We have too much at stake to allow any matter of mere pride or prejudice to interfere with public enterprises of such vast commercial and political importance to ourselves. It is our duty, in view of the interests involved, to extend liberal encouragement to ocean telegraphing. While we should adopt a general law governing the conduct of all cables, in which the interests of the people and the Government should be alike protected, we should also impose no conditions which will impair their efficacy or render unprofitable the capital which such daring enterprise has invested. Of all species of speculation, that of laying ocean cables is the most insecure. It is subjected to more hazards than any other, and should be made to yield a speedier

and larger return in consequence. The success of the French Cable Company is a rare accomplishment of energy, capital, and intelligence. It is the work of individuals, without any governmental aid whatever. Starting with the opposition of a powerful rival in the other Atlantic cable, it reached a successful accomplishment without delay or accident. It is in the enjoyment of no subsidy or governmental favors, and has no property or advantage not the result of purchases by the money contributed altogether and entirely by its stockholders. The Atlantic Telegraph Company, on the other hand, has received immense favors. From Newfoundland their company acquired money and lands of great value. The privileges granted constitute a monopoly of telegraphic rights in Newfoundland, the value of which was enhanced afterward by similar concessions from the State of Maine, Nova Scotia, Prince Edward Island, and liberal encouragement from Canada.

By their chartered rights the company obtained the exclusive privilege for fifty years of landing cables on Newfoundland and Labrador, which embraces a coast, extending southward to Prince Edward Island, Cape Breton, Nova Scotia, and the State of Maine, and their respective dependencies, and westwardly to the very entrance of Hudson's Straits. The company also secured a grant of fifty square miles of land, on the completion of telegraph to Cape Breton; a similar concession of additional fifty square miles, when the cable shall have been laid between Ireland and Newfoundland; a guarantee of interest for twenty years, at five per cent., on £50,000; a grant of £5,000 in money, toward building a road along the line of telegraph; and the remission of duties on the importation of all wires and materials for the use of the company. The company also obtained from the legislature of Prince Edward Island, in May 1854, the exclusive privilege for fifty years of landing cables on the coast, a free grant of one thousand acres of land, and a grant of £300 currency, per annum, for ten years. From Canada the company obtained an act authorizing the building of telegraphic lines throughout the provinces, accompanied by the remission of duties on all wires and materials imported for its use. Nova Scotia, in 1859, gave the company a grant of exclusive privilege, for twenty-five years, of landing telegraphic cables from Europe on the shore of the province. The State of Maine accorded the company a grant of exclusive privilege for twenty-five years of landing European telegraphic cables on the seaboard. From Great Britain, eventually, the company obtained an annual subsidy of £14,000 sterling, until the net profits of the company should reach six per cent. per annum on the whole capital of £350,000 sterling, the grant to be then reduced to £10,000 sterling per annum for a period of twenty-five years; two of the largest steamships in the navy to lay the cable, and two steamers to aid them, and a careful examination of the soundings by vessels of the royal navy. From the United States the company obtained an annual subsidy of $70,000 until the net profits yielded six per cent. per annum, then to be reduced to $50,000 per annum for a period of twenty-five years, subject to termination of contract by Congress, after ten years, on giving one year's notice. The United States Government also granted the steamship Arctic to make soundings, and steamships Niagara and Susquehanna to assist in laying the cable. A Government steamer was also ordered to make further soundings on the coast of Newfoundland.

We do not refer to these various favors bestowed upon this company in disparagement of that great work, but as showing how high was estimated the advantages to result from the success of the enterprise. The French company has accomplished the same results with no outside

aid. It has gone on successfully, without a minute's delay, from the hour it was first opened to the public. It has improved the method and increased the efficiency of ocean telegraphing, and, what is of much interest to the people, it has compelled a reduction of one-half in the cost of transmission. Adopting a tariff of prices just fifty per cent. below that which was at that time charged by the other company, it forced that company to reduce its rates accordingly, where it now remains. There can be, therefore, no just grounds for the threatened discrimination against the French company, which is proposed, by legislation in the Senate. While a general law should be speedily adopted which shall affect all companies alike, it would be unwise and unjust to go back so as to reach injuriously either of the existing Atlantic or any other cables. Before completing, however, any legislation on the subject, Congress should consider fully the terms of the Vienna convention, containing regulations, as before stated, agreed upon by the European governments for the management of international telegraphing. It is desirable that any rules or provisions of law which Congress may adopt with reference to ocean cables connecting with Europe may be made with reference to the rules agreed on in those conventions; otherwise, a different system of administration would exist at either end, which would cause inconvenience and embarrassment to both. The ground urged for legislative enactment against the French cable, because France denies to the United States or its citizens the right to lay a cable to connect with the coast of France, is not tenable. That difficulty is likely to be of temporary existence. It is now quite well settled that France will reconsider the exclusive grant made to the concessionaires of the Franco-American cable. Besides the probabilities of the ratification of a convention between the two governments, by which neutrality and reciprocity will form the general basis, it is understood that the company itself is in negotiation with the French government for the relinquishment of the monopoly which their concession guarantees. So certain is the latter of these probabilities to be accomplished, that Congress would be quite safe in adopting a general bill, universally applicable, establishing the principles and rules by which all ocean cables shall hereafter be governed which has origin or terminus on our shores. The bill reported is universal in its application. It protects the Government of the United States as well as the people, and settles certain conditions upon which all privileges of this character shall be granted and by which the cables shall be conducted. It is altogether prospective in its character, thus avoiding not only the vicious system of retroactive legislation, but advertising in advance the rules under which all shall come hereafter. It has no provision inconsistent with the safety or security of the rights of the United States, nor with the regulations established by the Vienna convention, which will necessarily govern all dispatches from this country, transmitted by cable, when reaching the continent of Europe.

The bill reported by the committee, which accompanies this report, is designed to establish general regulations for the government of ocean cables, as well as to save time and trouble to those who desire the privilege of connecting them with the shores of the United States, by obtaining from Congress special permission. At present there are no provisions of law on the subject. The power of the States as to their rights in the premises is undetermined, whether by judicial construction or legislation. The committee have avoided in the bill presented any assumption upon the part of the federal Government of exclusive authority, granting only that which it indisputably possessed. The existing cable company has obtained State charters, and also federal

permission, either by Congress or from the Executive, but it is obvious that there should be established by Congress some general provisions of law which shall not only grant the privilege of laying cables, but which shall also regulate and declare the conditions and obligations upon which such permission is granted. An interest so great should be under central control, and the capital invested in cables should be under a protection sufficiently powerful to accomplish the object. Each of these ends is secured by the bill. The interests of the Government, of the people, and of the companies who lay the cables, are alike protected and secured. The committee have endeavored to accomplish these objects in the bill offered. All of which is respectfully submitted.

O

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 2.

APPORTIONMENT OF REPRESENTATIVES TO CONGRESS.

[To accompany bill H. R. No. 2587.]

JANUARY 10, 1871.—Ordered to be printed.

Mr. MERCUR, from the Committee on the Judiciary, made the following

REPORT.

The Committee on the Judiciary, to whom was referred H. R. 1823, *entitled "An act to provide for the apportionment of Representatives to Congress among the several States," with the Senate amendments thereto, having considered the same, respectfully report:*

That inasmuch as said bill was acted upon by each House of Congress prior to the taking of the ninth census, and with the object of having Representatives elected under it in the year eighteen hundred and seventy, many of its provisions have become useless and impracticable; yet the House of Representatives thereby indicated two hundred and seventy-five Representatives, and the Senate three hundred Representatives, as the number of which the House should be composed. Your committee have given due consideration to that fact. Believing, however, that three hundred Representatives (to be increased by the admission of new States) is a greater number than public policy now requires, we have concluded to report in favor of two hundred and eighty members, commencing with the Forty-third Congress. This number is arrived at by fixing upon 137,800 persons as the ratio, and also by giving an additional Representative to each State that has a fraction greater than one moiety of the said ratio.

Upon this basis, the only States whose representation will be lessened are New Hampshire and Vermont; each will lose one Representative. The States of Maine, Rhode Island, Connecticut, Delaware, Louisiana, Ohio, Florida, Oregon, West Virginia, Nevada, and Nebraska will each retain their present representation. The States of Massachusetts, New York, Maryland, Virginia, North Carolina, South Carolina, Alabama, Mississippi, Kentucky, Tennessee, Indiana, Arkansas, California, and Minnesota will each gain one over their present representation; the States of New Jersey, Pennsylvania, Georgia, Texas, Wisconsin, and Kansas, will each gain two; the States of Missouri, Michigan, and Iowa will each gain three; and the State of Illinois will gain four.

The number of Representatives to which each State will be entitled is shown by the bill which the committee herewith report as a substitute for the bill referred to them.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 3.

SHEAFE vs. TILLMAN.

JANUARY 10, 1871.—Laid on the table and ordered to be printed.

Mr. G. M. BROOKS, from the Committee of Elections, made the following

REPORT.

The Committee of Elections, to whom was referred the contested election case of C. A. Sheafe vs. Lewis Tillman, from the fourth congressional district of the State of Tennessee, submit the following report:

Before proceeding to a consideration of the merits of this case, a question, preliminary in its nature, first should be disposed of. The contestee in his answer claims that contestant did not serve notice of his intention to contest his seat within the time required by statute, and his specification is as follows:

First. Because contestant did not file his notice or deliver a copy of the same in time. Respondent's certificate is dated and was issued on the 31st of December, 1868; and contestant's notice, or a copy of it, was not served on or delivered to respondent until the 19th of February, 1869; more than thirty days after the date and issuance of the certificate to respondent.

The United States statute of February 19th, 1851, provides that—

"Whenever any person shall intend to contest an election he shall, within *thirty days* after the result of such election shall have been determined by the officer or board of canvassers authorized by law to determine the same, give notice in writing to the member whose seat he designs to contest," &c. (9 Stat. at Large, 568.)

To decide the question raised, it becomes necessary to ascertain at what time the result of the election in the fourth congressional district was determined by the officers "authorized by law to determine the same."

Section 880 of the Code of Tennessee, page 232, provides that—

The governor and secretary of state shall, as soon as the returns are received, in the presence of such electors as choose to attend, compare the vote in these several cases, (among others for members of Congress,) and declare the person receiving the highest number of votes duly elected.

From this provision it would seem that it was the intention of the law that the governor and the secretary of state should personally meet and, in the presence of such electors as choose to attend, make a comparison of the votes. From the evidence introduced, it does not appear that this requirement of the statute was ever complied with by a comparison of the votes by the governor and the secretary of state being personally present together and performing this duty. The secretary of state in October, 1869, testified that he had not seen the governor for nearly two years; that this provision of the code had been treated as only directory by the State officers, and was understood only to require a comparison of the duplicates which ought to be in each office, and that even this had never been done by the governor and secretary of state together to his knowledge. Without deciding the question

whether the above officers should personally compare the returns, unquestionably the governor and the secretary of state, by the code of Tennessee, constitute the officers referred to in the United States statute of February 19, 1851, above cited, and until they have made a comparison of the votes, and definitely and finally acted upon the matter, the result of the election cannot be determined in such manner as to bring a contestant within the provisions of the United States statute last above cited.

The testimony introduced, and upon which the contestee relies to show that the result of the election was determined on December 26, 1868, is embraced in the following correspondence:

SECRETARY OF STATE'S OFFICE,
Nashville, Tenn., December 21, 1868.

To his Excellency Gov. W. G. BROWNLOW, *Knoxville, Tenn.:*

DEAR SIR: At the request of Dr. Boynton, I herewith inclose to you the returns of the fourth congressional district, except Bedford county, which Mr. Tillman tells me is correct. The result from that county is, Tillman, 1,448; Sheafe, 1,046. After examining the returns, please return them to this office for future reference.

I am, very respectfully, &c.,

JESSE FRENCH, *Clerk.*

[Indorsed.]

KNOXVILLE, TENN., *December* 26, 1868.

Respectfully returned to the office of the secretary of state. I would throw out the vote of Lincoln county, as the election was held by order of the county court, and the returns made by the coroner; the law requiring elections to be held and returns made by the commissioner of registration. I would also throw out the vote in the civil districts of the counties of Coffee and Marshall, in which it appears that the judges of election had not taken the necessary oath, &c.

W. G. BROWNLOW.

The following is the reply of the secretary of state to the above letter of the governor:

SECRETARY OF STATE'S OFFICE,
Nashville, Tenn., January 6, 1869.

After a careful consideration of the law bearing upon the duty of the secretary of state, in the matter of election returns, I am satisfied that the officer has no voice in the settlement of such questions as are raised by the above indorsement of his excellency the governor.

The secretary of state being the proper custodian of one set of election returns, under section 879 of the code, and the governor being the custodian of another set, it is the duty of these two officers to compare these two sets of returns as soon as the returns are received. The only duty of the secretary is to produce the triplicate returns in his office when the governor produces his, and compare them with each other. This comparing determines who is elected.

By section 885, the governor shall "issue" and "deliver" the commission or certificate of election. The only business of the secretary is to countersign and seal this commission or certifiate, without regard to his own opinion in the case. It is not the intention of the law that the governor and secretary should constitute a board of canvassers to correct election returns. If there is any authority of this kind it is in the governor alone. These papers are, therefore, returned to the executive office for the official action of the governor.

A. J. FLETCHER,
Secretary of State.

It was in evidence that there appeared in the Knoxville Whig of the date of February 11, 1869, a paper purporting to be a proclamation of the governor, also dated February 11, 1869, in which he stated that he awarded the certificate of election to Lewis Tillman as the member to Congress from the fourth district in Tennessee. The secretary of state testified that some time after the date of the proclamation he countersigned the commission to Mr. Tillman, and that until then he did not know who would get the commission.

The committee is of the opinion that if the provisions of section 880 of the Code ever had been complied with, according to the construction given to the section by the secretary of state, yet there had been no such determination of result of the election as required by the United States statute of February 19, 1851, until after the issuance of the commission to the contestee after February 11, 1869, and therefore the notice, being given on February 15, 1869, was within the time required by statute. The committee also find that the commission was antedated.

The following counties constitute the fourth congressional district of the State of Tennessee, *i. e.*, Lincoln, Giles, Marshall, Cannon, Rutherford, Coffee, Franklin, and Bedford.

The returns from the several counties, as made by the commissioners of registration, and in the county of Lincoln by the coroner, are as follows:

	Tillman.	Sheafe.
Lincoln	5	554
Giles	561	609
Marshall	167	856
Cannon	313	171
Rutherford	957	839
Coffee	156	406
Franklin	248	110
Bedford	1,448	1,046
	3,855	4,591
It also appears that in the county of Franklin the following vote was cast, but rejected by the commissioners of registration as illegal	43	463
Making a total vote of	3,898	5,054
Deducting Tillman's from Sheafe's vote		3,898
Gives a majority to contestant of		1,156

REVISION BY THE GOVERNOR.

Upon a revision of the vote of the congressional district, made by the governor of Tennessee, as appears by a copy of his proclamation hereto annexed and marked A, the votes of a county and parts of other counties were thrown out, as follows:

	Tillman.	Sheafe.
The entire vote of the county of Lincoln—		
The whole vote of which was	5	554
The votes of districts numbered 1, 3, 7, and 10 of the county of Coffee	45	114
The votes of districts numbered 1, 4, 7, 13, and 15 in the county of Marshall	9	509
	59	1,227
Which being deducted from the vote as returned by the election officers or those acting as such	3,855	4,591
	59	1,227
	3,796	3,364
	3,364	
Gives a majority to contestee of	432	

And upon this revision of the governor the certificate of election was awarded to contestee.

There is no law of the State of Tennessee that gives authority to the governor to reject the vote of any county or part of a county; his duty is only to compare the returns received by him with those returned to the office of the secretary of state, and upon such comparison being

made to "deliver to the candidate receiving the highest number of votes in his district the certificate of his election as Representative to Congress." (Code of Tennessee, sec. 935, page 239.) If illegal votes have been cast, if irregularities have existed in the elections in any of the counties or precincts, if intimidation or violence has been used to deter legal or peaceable citizens from exercising their rights as voters, to this House must the party deeming himself aggrieved look for redress. This great power of determining the question of the right of a person to a seat in Congress is not vested in the executive of any State, but belongs solely to the House of Representatives. (Constitution United States, art. 1, sec. 5.)

The action of the governor, so far as he has thrown out the votes of counties or parts of counties, is to be disregarded, and the matters in dispute are to be settled upon the actual returns and the evidence introduced, independent of the doings of the executive. We will therefore proceed to an examination of the returns, and the evidence relating to the counties and parts of counties in controversy, and to the points in dispute in this case.

LINCOLN COUNTY.

The election laws of Tennessee require—

"That the governor of the State shall appoint a commissioner of registration for each and every county in the State," (act February 25, 1867, chap. 26, sec. 2,) by whom "the judges and clerks of all elections shall be selected and appointed in each county," (*ib.*, sec. 10,) and whose duty it is "to hold all elections." (Act February 26, 1868, chap. 51, sec. 1.)

The statute of the State of Tennessee passed February 26, 1868, sections 1 and 2, provides as follows:

SECTION 1. *Be it enacted by the general assembly of the State of Tennessee*, That the governor of the State be authorized, and he is hereby fully empowered, to set aside the registration of any county in this State, or any part thereof of said registration, when it shall be made to appear to the satisfaction of the governor that frauds and irregularities have intervened in the registration of voters in such county. The governor shall make known such fact, and set aside said part or whole of said registration, when frauds are shown to have been committed, by proclamation.

SEC. 2. *Be it further enacted*, That all acts of the governor declaring registrations in the different counties of this State by proclamation null and void, and removing the registers of said counties and appointing others, are hereby legalized, and full power given the governor to remove county commissioners of registration for dereliction of duty, frauds or irregularities; and the appointment of other commissioners of registration is hereby confirmed, together with all other acts done by him under the registration law, passed March 8, 1867, whether said act, known as "An act to amend section 2114, article 2, chapter 4, of the Code of Tennessee, and for other purposes," justified the governor in his action or not.

Some time prior to the November election, 1868, the following proclamation was published in the papers circulating in the county of Lincoln:

PROCLAMATION.

EXECUTIVE OFFICE,
Nashville, Tennessee, October 19, 1868.

Whereas by an act of the general assembly of the State of Tennessee, entitled "An act to legalize the acts of the governor," passed February 26, 1868, it is made the duty of the governor, when frauds and irregularities have intervened to the registration of any county, to set aside part or whole of said registration by proclamation; and whereas it has been made known to me that frauds and irregularities have occurred in the registration of the county of Lincoln: Now, therefore, I, William G. Brownlow, governor of the State of Tennessee, by virtue of the authority in me vested, and in the discharge of the duty imposed upon me by the first section of the aforesaid act of the general assembly, do hereby set aside and declare null and void all that part of the registration of our county of Lincoln made by A. H. Russell, late registration commissioner.

In testimony whereof I, William G. Brownlow, governor as aforesaid, have here-

unto set my hand and caused the great seal of the State to be affixed, at the department in Nashville, on this 19th day of October, 1868.

[SEAL.] W. G. BROWNLOW.

By the governor:

A. J. FLETCHER, *Secretary of State.*

Upon the promulgation of the above, the evidence discloses that there was a general belief in the county that the governor, by this proclamation, removed the commissioner of registration for Lincoln County from his office, and no appointment of any commissioner having been made up to the time of the election, many voters did not attend the polls, not considering that any legal election could be held until such appointment had been made.

On the second day of November, 1868, the day preceding the presidential election, the county court for the county of Lincoln appointed one "C. S. Wilson to open and hold the election in Lincoln County, for President of the United States and member of Congress, as the sheriff, F. W. Keith, refused, in open court, to hold said election for want of time." Said Wilson, acting under this appointment, selected deputies, judges, and clerks in seven of the twenty-five districts in this county, and in those districts only were elections held, and the returns were made by said Wilson, and signed by him as coroner, by which it appears that Tillman received 5, and Sheafe 554 votes. Contestant claims that the act of the governor in setting aside the registration of Lincoln County was unconstitutional and void, and that by virtue of the provisions of the Code of Tennessee, section 839, page 226, which is as follows:

> The sheriff, or, if he is a candidate, the coroner, or, if there be no coroner, some person appointed by the county court, shall hold all popular elections; and said officer or person shall appoint a sufficient number of deputies to hold said elections.

There being a vacancy in the office of commissioner of registration, the appointment of Wilson to open and hold the election was legal and binding.

It is not necessary to discuss the question of the constitutional powers of the governor to set aside a registration, for if this act of his was unconstitutional, and he had no power to set aside a registration and remove a commissioner, then there was no vacancy ;the commissioner had not been deprived of his office, and he was the only person by law authorized to hold the election. But if this act of the governor did have the effect of removing the commissioner, the county court had no right under the statute to appoint an election officer; the act of February 26, 1867, ch. 26, sec. 2, above referred to, vested the appointing power of these officers wholly in the executive, and repealed all laws in conflict therewith. Wilson, therefore, held his office under no color of legal authority; was not even an officer *de facto*, but was a mere usurper, and all acts done by him as such officer were illegal and void; and when it appears that Wilson was appointed by the court only the day prior to the election, so that it would have been impossible that due notice of his appointment or of the election could have been given; that elections were held in only seven of the twenty-five districts of the county; that it was generally understood that there was no officer legally appointed to hold the elections, and that voters did not attend the polls on that account; and when it is further found that there existed in the county organizations of men, mounted, armed and disguised, and known by the name of the Ku-Klux Klan, banded together for political purposes, who, by their threats and violence, intimidated and deterred voters from attending the polls, there could not have been, and was not such a full

and free expression of the will of the voters as is deemed necessary to constitute a fair election. The committee, therefore, is of the opinion that this election had no semblance of legality, and that the entire vote of Lincoln County should be rejected.

MARSHALL COUNTY.

The commissioner of registration of this county in his return states, that in the districts numbered 1, 4, 7, 13, and 15, which gave Tillman 9 and Sheafe 559 votes, "no oath accompanied the poll-box, but all certified to be held according to law." And the evidence introduced does not disclose that the oath required by statute was taken and subscribed in the above districts in conformity to law.

The committee adheres to the principle enunciated in the contested election case of Barnes *vs.* Adams, second session of this Congress, viz, that it is not essential to the validity of an election that the officers should be sworn, or should in all things be held to the strict requirements of the law, so far as their qualifications for the office which they hold are concerned. If it appears that there was no fraud in the election, that it had been fairly conducted, and that there was an opportunity for a full expression of the will of the voters at the ballot-box, the mere fact of the omission of an officer to take the oath prescribed by law will not vitiate an election. But if, on the other hand, the election was not fairly conducted, if there was fraud in the ballot, if it should appear that there was an organized attempt of a class of persons in the county to prevent citizens of one particular political belief from depositing their votes freely and peaceably, if intimidation was used to control the voters, and by these means there was not a full, fair, and free expression of the will of the voters at the ballot-box, then, in such voting precincts where the requirements of law were not complied with, the vote should be rejected.

In the county of Marshall the evidence declares the existence of the Ku-klux Klan in the community. A colored man testified that for about two months prior to the election disguised men were often at his house in the night; that his house was fired into, and once he was struck by a ball; that he went into another district and voted the republican ticket; that after the election his house was surrounded, and while attempting to escape he was fired at; was told by these men that he was thus treated because he voted against them. Others testified to the existence of this band of disguised men in the county; that the organization was of a political character, and that its effect was to intimidate and deter the republican voters from the polls. From the evidence introduced the committee is of the opinion that the state of affairs existing in this county precluded a free expression of public sentiment at the polls, and rejects the vote of the above districts.

COFFEE COUNTY.

In the districts numbered 3 and 7, of this county, which gave Tillman 24 and Sheafe 87 votes, the requirements of the law in subscribing the oath by the election officers were not complied with.

The evidence shows that great fear and dread of the Ku-Klux prevailed among the republicans in this county; that through fear many republicans did not vote; that white and black republicans were whipped. One colored man stated that about one month after the election he was tied over a log and struck on the skin two hundred lashes, and was so

whipped for voting the radical ticket. Another colored man testified that the night before the election his house was visited by the Ku-Klux, his windows smashed and his floor torn up, and that he voted for Sheafe through fear; others testified that the effect of the existence and lawless acts of this disguised band of men in the county was to keep republicans from attending the elections and to cause some of them to vote the democratic ticket; the requirements of the law not being strictly complied with in the above districts, and this taken in connection with the intimidation and lawless violence that pervaded the county some time before and after the election, should exclude the vote of the 3d and 7th districts of Coffee County.

FRANKLIN COUNTY.

In making his return the commissioner of registration for this county did not include the votes of districts numbered 1, 4, 10, 12, and 15, which gave for Tillman 43 and for Sheafe 463 votes, on the ground "that the votes were illegal, inasmuch as neither judges and clerks were sworn according to law, and many voted without certificates." In the first district, in which Tillman received 3 and Sheafe 293 votes, the poll-book was among the papers in evidence; no oath accompanied the same, and no statement or certificate appeared that any of the officers were sworn; testimony was introduced showing that all the officers were sworn except the one who held the election. It also appeared in evidence that some persons voted without proper certificates, and that the frauds perpetrated at the election were so flagrant that the crowd about the ballot-box regarded it as a huge joke and seemed to enjoy it as such. It also appeared that the Ku-Klux visited this district at times during the spring and summer of 1868, in various numbers, at one time from ten to fifteen, at another time from thirty to forty, and the night before the election they were present in Winchester to about the number of thirty-five; that some colored persons, through their dread of the Ku-Klux, slept in barns and out-houses away from their homes for some days before and immediately after the November election, 1868; that at first the presence of the Ku-Klux seemed only to affect the negro, but by and before the said November election, the public mind of both white and colored became more excited; that the result of their visit the night before the election was to intimidate the republicans, and that on this account voters did not come to the polls. For the above reasons the committee reject the vote of this district. In the remaining districts of this county not allowed by the commissioner, no satisfactory evidence has been introduced to justify his action in rejecting the vote.

IMPORTED VOTES.

The contestant alleges that "many persons not residents of the county where they were permitted to vote, voted at said election for contestee. The evidence upon this point relates to the 7th or Rock Creek district of Franklin County. Witnesses for contestant (most of them were not residents of the district but present there at the election) testify that a large number of negroes were present at the polls of this district; that they were not known to the witnesses, many of whom were old residents of the county, and well knew the inhabitants; that several of the negroes said they did not live in the county; that certificates of registration were handed to them with the Grant and Tillman tickets folded in them, and that from forty to sixty of these votes were polled illegally.

The commissioner of registration and one of the judges of election were witnesses for the contestee, and from their testimony it appeared that there were some forty negroes who lived in Franklin County at work on a railroad in another county, who came to this district, it being the nearest place for them to vote in Franklin County; that some of contestant's friends were at the polls and challenged such voters as they deemed had no right to vote, and that some ten to fifteen colored votes were thrown out, and that no illegal votes were polled. It was also in testimony that some fifty raiders were present at the polls with guns and with pistols drawn, and by reason of the intimidation created by the presence and actions of these men some thirty of the negroes were debarred from voting. The whole testimony is conflicting and unsatisfactory. It may have been that some persons voted for the contestee who were not qualified, and that some of the friends of contestee were, by intimidation at the polls, prevented from voting, but as neither the returns show, nor does it appear in evidence, how many votes were given for each of the two candidates, (it only appearing that the whole vote was eighty-one,) the committee do not feel justified in disturbing the vote of this district.

REFUSAL OF COMMISSIONER TO ISSUE CERTIFICATES.

Contestant, in his 5th and 6th specifications, claims that the commissioners "refused certificates to those entitled to them who differed from them politically, and gave certificates to those not entitled who were their political friends," and that "the commissioner signed blank certificates to other parties, who filled them with names and delivered them to parties not entitled to them." The evidence of the unlawful issuance of certificates is mostly confined to those issued and used at the election in the 7th district of Franklin County, and the determination of the committee upon the vote of that district as above will preclude the necessity of any further allusion to the evidence upon this point.

The testimony introduced tending to show that the commissioner unlawfully withheld certificates from those entitled to them is not made out to the satisfaction of the committee.

The committee have passed upon all the specifications of the contestant and counter allegations of the contestee that they deem material to the determination of this contest, and make the following

SUMMARY:

			Tillman.	Sheafe.
Total vote as returned by the commissioners of registration, by the coroner of Lincoln County, and the vote of the districts in Franklin County returned by the commissioners as illegal			3,898	5,054
From which deduct the vote of Lincoln County	5	534		
The vote of districts Nos. 1, 4, 7, 13, and 15 of Marshall County	9	539		
The vote of districts Nos. 3 and 7 of Coffee County	24	87		
The vote of district No. 1 of Franklin County	3	293		
	—	—	41	1,493
Leaves vote as follows			3,857	3,561
Deduct Sheafe's vote from Tillman's			3,561	
Gives Tillman a majority of			296	

The committee therefore submit the following resolutions, and recommend their passage:

Resolved, That C. A. Sheafe was not duly elected, and is not entitled

to a seat in this House as a Representative in the forty-first Congress from the fourth congressional district of the State of Tennessee.

Resolved, That Lewis Tillman was duly elected as Representative in the forty-first Congress from the fourth congressional district of the State of Tennessee, and is entitled to retain his seat as such.

Resolved, That C. A. Sheafe having contested the seat of the Hon. Lewis Tillman as a Representative in this House from the fourth congressional district of the State of Tennessee, in good faith and with probable cause, there shall be paid to him out of the contingent fund of the House of Representatives the sum of ——— dollars, in full for his expenses in such contest.

A.

TENNESSEE CONGRESSMEN.

Proclamation by the governor—Votes thrown out and radicals elected.

Whereas an election was held on the 3d of November for eight members of Congress for the eight congressional districts in the State of Tennessee; and also for one for the State at large; and whereas R. R. Butler, Horace Maynard, William B. Stokes, William F. Prosser, Samuel M. Arnell, and Isaac R. Hawkins were respectively elected from the first, second, third, fifth, sixth, and seventh districts, as members of the forty-first Congress, by a majority ranging at from two to ten thousand, as also was John B. Rogers for the State at large; and whereas there exists no controversy in regard to the election of these gentlemen, I have this day caused certificates of election to be made out, in due form, for each of the gentlemen aboved named; and whereas in the fourth and eighth districts contests exist between rival candidates:

Now, therefore, I, William G. Brownlow, governor of Tennessee, do submit the following statements, and the conclusions at which I have arrived, after considering all the facts in the case:

From the returns in the office of the secretary of state, it seems that, in the fourth district, Sheafe received 666 votes more than Tillman. But, correcting the returns by the law governing in such cases, by throwing out the vote of Lincoln County, as the election was held by order of the county court, and the returns were made by the coroner—the law requiring elections to be held and returns made by the commissioner of registration; and by throwing out the vote in the civil districts of the counties of Coffee and Marshall, in which it appears that the judges of election had not taken the necessary oath, the vote for that district would stand as follows: For Sheafe, 3,363, and for Tillman, 3,795; leaving Tillman's majority 432. I therefore award the certificate to Lewis Tillman.

The returns from the eighth district show that John W. Leftwich received 6,532 votes, W. J. Smith 5,543 votes, and David A. Nunn 4,026 votes, giving Leftwich 989 majority over Smith.

I utterly repudiate the vote of Tipton County, as an exhibition of the most stupendous fraud perpetrated in the State during the late election. I also cast out the vote of Fayette County, as held in open violation of the franchise law. Besides these, a suplemental return by the commissioner of registration for Shelby County gives, for that county alone, an addition of about 700 votes in favor of W. J. Smith over Leftwich, all of which gives Smith a clear majority of over a thousand above Leftwich. I therefore award the certificate of election to W. J. Smith.

If there had been no other law to be regarded in the issuance of commissions or certificates to the members of Congress but the Code, (sec. 935,) my duty would have been quite plain. But the "act to limit the elective franchise" has been since passed. It proposes a great change—I may say revolution—in our elective system. It announces that a large portion of our people have made war upon the Government, and are unsafe depositaries of the elective franchise. It provides, moreover, for a registration of voters, and declares that no one is a legal voter unless he shall have a certificate of registration, and that certificate must be obtained in a legal way. A valid registration becomes indispensable to a valid election. With official information before me that the votes cast for a candidate are illegal, and his election void, and that the Ku-Klux Klans have used violence and other means of intimidation to deter legal voters from exercising the franchise, I cannot, and will not, certify that he is "regularly elected according to the laws of the State." Whatever others may think of my duty, I will not declare, in a certificate or otherwise, that the election was regular in counties or districts, when I officially know that it was not regular.

In these conclusions I am happily relieved of much responsibility by the fact that my decision is not conclusive. The question is still open for the decision of Congress.

In testimony whereof I have signed the foregoing in the executive department, and affix the great seal of the State, this 11th day of February, A. D. 1869.

W. G. BROWNLOW.

VIEWS OF THE MINORITY.

Mr. Dox, from the Committee of Elections, submitted the following as the views of the minority:

Resolved, That C. A. Sheafe was duly elected, and is entitled to his seat in the forty-first Congress, as the Representative of the fourth congressional district of the State of Tennessee.

Resolved, That Lewis Tillman was not elected, and is not entitled to a seat in the forty-first Congress, as the Representative of the fourth congressional district of the State of Tennessee.

○

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 3, Part 2.

SHEAFE vs. TILLMAN.

JANUARY 30, 1871.—Laid on the table and ordered to be printed.

Mr. DOX, of the Sub-committee of Elections, made the following

MINORITY REPORT.

The Sub-committee of Elections, to whom this case was referred, by permission of the House, respectfully submits the following report, which expresses the reasons for his dissent from the conclusions of the majority.

Although dissenting from the majority of the committee in the conclusion which they have reached in this case, the undersigned is gratified in finding so much in the report of the majority to which he can give his assent.

He concurs with the majority of the committee in the opinion that the notice given by the contestant (Sheafe) was sufficient.

He concurs with the majority of the committee that contestant received 1,156 more votes than the contestee, Mr. Tillman, for Representative in Congress at said election.

He also concurs with the majority of the committee in regarding the action of the then governor of Tennessee, (W. G. Brownlow,) in throwing out the entire vote of Lincoln County; the votes of districts numbered 1, 3, 7, and 10 of Coffee County; the votes of districts numbered 1, 4, 7, 13, and 15 in the county of Marshall, and certain districts in the county of Franklin, whereby contestant loses 1,690 votes, and contestee 102 votes, as an unlawful and arbitrary exercise of executive power, and to be disregarded by the committee. In the language of the report of the majority of the committee—

> There is no law of the State of Tennessee that gives authority to the governor to reject the vote of any county or part of a county; his duty is only to compare the returns received by him with those returned to the office of the secretary of state, and upon such comparison being made, to "deliver to the candidate receiving the highest number of votes in his district the certificate of his election as Representative to Congress." (Code of Tennessee, sec. 935, page 239.) If illegal votes have been cast, if irregularities have existed in the elections in any of the counties or precincts, if intimidation or violence has been used to deter legal or peaceable citizens from exercising their rights as voters, to this House must the party deeming himself aggrieved look for redress. This great power of determining the question of the right of a person to a seat in Congress is not vested in the executive of any State, but belongs solely to the House of Representatives. (Constitution United States, art 1, sec. 5.)
>
> The action of the governor, so far as he has thrown out the votes of counties or parts of counties, is to be disregarded, and the matters in dispute are to be settled upon the actual returns and the evidence introduced, independent of the doings of the executive.

The denial of the certificate of election to Mr. Sheafe, the contestant in this case, by the governor of Tennessee, was an act of usurpation committed, and a wrong done to the prejudice of that gentleman, without a shadow of authority by the laws of either the State of Tennessee or of the United States.

Had the law been respected by the governor, Mr. Sheafe, who was elected by the people, and whose *prima facie* right to the certificate cannot be questioned, would have been returned to this House, (which alone has the right and power to determine the questions involved in this case,) and not Mr. Tillman, who comes here elected and accredited alone by the governor of Tennessee, after being defeated by a large majority at the polls.

But while all of the members of the committee agree in the sufficiency of the notice of contest given by the contestant, and that contestant had a majority of the votes polled, and also in the unauthorized action of the governor in "setting aside" the vote of the county and parts of other counties at his pleasure, yet a majority of the committee have found reasons which escaped even the vigilance and scrutiny of the then governor of Tennessee for denying to Mr. Sheafe the seat in this House, to which he was, in the opinion of the undersigned, most clearly and lawfully elected.

It was certainly not through inadvertence that Governor Brownlow, in determining who was elected to represent the fourth congressional district of Tennessee in the Forty-first Congress, in his proclamation omitted to notice the causes, to wit, intimidation of voters by Ku-Klux and other lawless bodies, which the majority of the committee have regarded as sufficiently established by the testimony taken in the case to warrant them in taking from the contestant 1,493 votes, and enough to elect his competitor (from whom but 41 votes are taken) by a majority of 296 votes.

An examination of Governor Brownlow's proclamation, dated the 11th day of February, 1869, more than three months after the election, will show that as ardent a republican as Governor Brownlow, who certainly cannot be charged with any lack of zeal in the service of his party, had not then learned that the intimidation of voters was sufficient to justify him in electing Tillman, who had been defeated by 1,156 majority of the popular vote in favor of Mr. Sheafe.

In order to effect that object he was compelled to resort to a revision of the returns made by his own appointees, (not one of whom has anything to say about intimidation in his return,) and to a general expurgation of the votes, rejecting the vote of one entire county (Lincoln) and of parts of divers other counties throughout the district.

That it was not through inadvertence that intimidation was not assigned by the governor as a cause for defeating the choice of the people in the election of their Representative in Congress, is evident from the fact that in the same proclamation intimidation is charged to have prevailed in another district, (the 8th,) yet it is not mentioned as a cause for disregarding the will of the people, as expressed through the ballot box in this, the 4th district.

(See proclamation of Governor Brownlow, Exhibit A, at the conclusion of majority report.)

The undersigned therefore concludes that the charge of intimidation of voters, and of Ku-Klux outrages, affecting the election in this case, was not thought of by the governor of Tennessee, nor by Mr. Tillman, the contestee, as sufficiently sustained to warrant its use for the purposes of this contest until many months after the election in November, 1868.

The undersigned would respectfully call the attention of the House to the following propositions, which will not be controverted, and which make it impossible for him to assent to the conclusions reached by a majority of the committee in this cause:

1. No person could vote at the election in question unless authorized

to do so by an officer called a commissioner of registration, who could only be appointed by the governor, W. G. Brownlow.

2. All of the officers, judges, and clerks (except in the county of Lincoln) who held this election, were either appointed by the same governor or by his said appointees, the said commissioners of registration.

3. The governor claimed and exercised the power of setting aside and annulling the registration of voters made by his own appointees as aforesaid, at his mere option and pleasure.

4. In no case did a commissioner of registration (all of whom were republicans and appointed as aforesaid by the governor) assign as a reason for the rejection of the vote of certain civil districts which gave contestant large majorities, that force or intimidation had been used to obtain said majorities.

5. The whole congressional district was occupied by Federal troops, at the request and subject to the direction and control of the said governor.

6. In Marshall County, where the majority of the committee reject five hundred and fifty-nine votes given for contestant to nine votes given to the contestee, Captain E. L. Huntington, commanding the post, with his company stationed at the county seat, (Lewisburg,) certifies as follows:

LEWISBURG, MARSHALL COUNTY, TENNESSEE,
November 21, 1868.

To all whom it may concern:

Company A of the Twenty-ninth United States Infantry came to Lewisburg on or about the 6th day of October, 1868, and remained until to-day. We were in Lewisburg on the 3d day of November, and witnessed the election for President and member of Congress from this the fourth district of Tennessee. The election was very quiet; every one voted his sentiments, without disturbance or threats, both white and colored; and no one in the county, so far as we are advised and believe, voted except those who had certificates to vote under the franchise law of Tennessee. The citizens of the county are quiet and law-abiding, and treated my command with kindness and due respect.

E. L. HUNTINGTON,
Captain Twenty-ninth Infantry, Commanding Post and Company.

(See evidence, page 70.)

In the opinion of the undersigned, Captain Huntington is sustained by the weight of testimony in the cause.

7. That in Coffee County, where the majority take 87 votes from contestant to 24 from contestee, it does not appear from the testimony that there had ever been a Ku-Klux, or that a single outrage had ever been committed, or that there had ever been the least intimidation of any voter in either of the two civil districts rejected, but the proof is directly to the reverse. (See depositions of P. C. Cunningham, page 5; W. P. Ford, pages 5, 6, and 7; H. S. Emerson, pages 9 and 10; and D. E. Mead, pages 13 and 14, evidence.)

8. That at Winchester, in Franklin County, where the majority of the committee reject 293 votes given for contestant to 3 votes given for contestee, for the alleged reason that "some persons voted without proper certificates, and that the frauds perpetrated at the election were so flagrant that the crowd about the ballot-box regarded it as a huge joke, and seemed to enjoy it as such," when contestee's own witness, who was one of the judges of the election and an officer in the Federal Army during the rebellion, in his deposition, denies each and every one of the above reasons for rejecting said vote as given by the majority;

(see the deposition of N. W. Wilcox, page 156 of the evidence; and he is sustained by Albert Ringle, page 77, and Nathan Frizzell, pages 82, 83, and 84;) while the majority is not sustained by any witness in the cause, and can only be based upon the testimony of one witness, who had but little opportunity of knowing the facts, as he himself swore. (See deposition of J. G. McCutcheon, pages 141, 142, and 143, evidence.)

THE ELECTION IN LINCOLN COUNTY.

But it is claimed that in Lincoln County the election was held by the coroner, and that it could have been lawfully held only by a commissioner of registration. Upon this point the majority of the committee report as follows:

It is not necessary to discuss the question of the constitutional powers of the governor to set aside a registration, for if this act of his was unconstitutional, and he had no power to set aside a registration and remove a commissioner, then there was no vacancy; the commissioner had not been deprived of his office, and he was the only person by law authorized to hold the election. But if this act of the governor did have the effect of removing the commissioner, the county court had no right under the statute to appoint an election officer; the act of February 26, 1867, (ch. 26, sec. 2,) above referred to, vested the appointing power of these officers wholly in the executive, and repealed all laws in conflict therewith. Wilson, therefore, held his office under no color of legal authority; was not even an officer *de facto*, but was a mere usurper, and all acts done by him as such officer were illegal and void.

But the commissioner of registration for that county was removed by the governor, W. G. Brownlow, who neglected and refused to appoint a successor for that office, the governor alone having the power to make such removal and appointment, as has been more than once decided by the supreme court of Tennessee, the judges composing the bench having been appointed by the same governor. The power of the governor to annul a registration is another question, and will be hereafter considered.

Under the laws of Tennessee, as they stood at the time of the election in question, could the people of Lincoln County be deprived of all opportunity to vote for a representative in Congress, in the way above indicated?

It was provided by the code of Tennessee, page 226, section 839—

The sheriff, or, if he is a candidate, the coroner, or, if there be no coroner, some person appointed by the county court, shall hold all popular elections; and said officer or person thall appoint a sufficient number of deputies to hold said elections.

This section of the code was modified by an act of the general assembly passed February 26, 1868, page 67, acts of 1867–'68, without, however, any reference to the code in said act, and the same provision is contained in the last franchise act, which is as follows:

That it shall be the duty of the commissioner of registration of voters to hold all elections, now required by law to be held by sheriffs, and that, for that purpose, he shall have all of the powers and rights that sheriffs now possess, and be subject to like responsibilities and liabilities, and have fifty dollars per annum for his compensation, as is now allowed by law to sheriffs for similar services; all to be paid out of the county treasury.

Section 841 of the same code provides that—

The county court, at the session next preceding the day of election, shall appoint three inspectors or judges for each voting place, to superintend the election.

SEC. 842. If the county court fail to make the appointment, or any person appointed refuse to serve, the sheriff, with the advice of three justices, or, if none be present, three respectable freeholders, shall, before the beginning of the election, appoint said inspectors or judges.

SEC. 843. If the sheriff or other officer whose duty it is to attend at a particular place of voting under the foregoing provisions fail to attend, any justice of the peace present, or, if no justice of the peace be present, any three freeholders may perform the duties prescribed by the preceding sections, or, in case of necessity, may act as officers or inspectors.

It will be observed that neither the act of February 26, 1868, nor the franchise act repeals said section 839, or any other of the above sections of the code of Tennessee. Those acts simply provide that it shall be the duty of the commissioner of registration to hold the elections, have the powers and rights, be subject to the same responsibilities and liabilities, and receive the same compensation as sheriffs in discharging that duty. But if the sheriff was a candidate, or there was no sheriff, or if he refused to hold the election, then the coroner was the proper officer to hold it; and, as the commissioner of registration was, by the terms of the acts above referred to, simply substituted to the place, powers, and duties which had formerly devolved upon sheriffs, it follows that, as the office of commissioner of registration was vacant, that the coroner was the proper officer to hold said election, and that the same was properly held by him.

KU-KLUX.

But it is claimed that there were in some of the counties of this district organized bands of men, who sometimes made their appearance in disguise, calling themselves Ku-Klux, and that the effect of this organization, and of certain outrages perpetrated by them, was to deter many of the legally qualified voters from voting, and to cause others to vote contrary to their inclinations; and this alone is assigned by the majority of the committee as a reason for rejecting the vote of certain civil districts of the counties of Marshall and Coffee.

It is submitted that, upon the evidence in this case, it is a matter of doubt which party was most benefited or injured by the operations of these men; but, yielding the benefit of this doubt to the majority, how many votes is it claimed were thus intimidated? What proof is there in the record that, if there had been none of this intimidation, the majority of 1,156 for contestant could have been overcome?

Again, it does not appear from the proof that these disguised men ever attempted to influence any voter to vote for contestant and against contestee, except in one solitary instance, and that instance ought not to be an exception, because it is more than doubtful that any good was intended to contestant by the parties perpetrating this outrage, and it is certain that if it was thus intended it had a contrary effect.

But the proof does show very conclusively that contestant was an officer in the Federal Army during more than three years of the rebellion, while contestee was in neither army, and that contestant, both before and after the election, both publicly and privately, denounced and condemned this organization. This being so, why should they desire his election? And it is admitted by contestee that there was no intimidation in the election of his successor; and yet it will appear, from the abstract of the secretary of state of Tennessee of that election, which I have appended to this report, marked "Exhibit A," that Bright, the democratic candidate, received 11,827 votes, while Mr. Mullins, the republican candidate, received but 1,843 votes. It is true that many of the citizens of Tennessee have been enfranchised since the election in controversy, but all can vote now who could vote then, and yet Mullins's vote in 1870 is 2,055 less than the vote for Mr. Tillman in 1868.

"SETTING ASIDE" THE REGISTRATION.

Furthermore, the proof shows that in one county alone (Lincoln) there were between 1,500 and 2,000 voters excluded from the polls by the action of the governor in "setting aside" the registration of voters

by proclamation; and that many more were prevented from voting in two other counties, (Franklin and Coffee,) by the same cause. It is admitted by the contestee in his answer, that these voters thus excluded from the polls, if they had been allowed to vote, would have voted for contestant. *Was the governor authorized thus to "set aside" the registrations and exclude these voters from the polls?* The supreme court of Tennessee—each of the three judges who composed the bench having been appointed to his high office by Governor Brownlow—each in a separate opinion, and all concurring, decided in the case of the *State of Tennessee* vs. *William Staten*,(6th Caldwell's Reports, page 234,) that—

The statute which empowers the governor in his discretion practically and effectually to abrogate the right to vote of any and every qualified citizen of the State, and at any time, and for all time, and in any and all elections, is repugnant to that portion of the constitution which is expressly ordained to secure to the people the right to elect the officers of their government.

The statute which practically and effectually empowers the governor to determine who of the qualified citizens shall vote and who shall not vote, and who shall elect and who shall not elect the officers of the government, himself included, is repugnant to that portion of the organic frame of the government which was ordained to establish and maintain a republican form of government.

The statute which empowers the governor practically and effectually to divest out of any and every qualified voter his right to vote, not only once, but from time to time and without end, is repugnant to those provisions of the organic law which are ordained to invest the courts with judicial power, and to exclude the executive head of the government from the exercise of such power.

For these reasons the court is constrained to hold that the statute which confers on the governor the power to set aside and annul the registration of a county, in whole or in part, is unconstitutional and void.

In this determination are included the act of March 8, 1867, chapter 36, sections 4 and 5, and that part of the act of February 26, 1868, chapter 52, so far as it authorizes the governor to set aside registration, and undertakes to confirm his acts of this kind done before the passage of the act; and to punish persons who vote or who attempt to vote "by virtue of certificates issued from a registration declared null and void" by the governor.

Again: the contestee admits (see his "Reply to Contestant's Argument," page 9) that if the supreme court decided that the governor had no power to "set aside" these registrations, that "not only the contestee in this case *is not entitled to a seat*, but perhaps only a few of the sitting members from Tennessee of the present or any preceding Congress since the rebellion are or were entitled to seats."

That the court so decided does not admit of debate. Now, which does the majority of the committee propose to overrule, the unanimous opinion of the supreme court of the State, thus solemnly pronounced by a bench thus appointed, or the equally deliberate and solemn conviction and admission of the sitting member? Indeed, to sustain the resolutions recommended by the majority is to ignore both the court and the contestee.

From the report of the majority of the committee in thus overruling the decision of the supreme court of Tennessee, and the confession of judgment thereupon by contestee, the undersigned, for the reasons hereinbefore given, makes his appeal to the Representatives of the nation, and submits for their determination the following resolutions:

Resolved, That C. A. Sheafe was duly elected, and is entitled to his seat in the Forty-first Congress as the Representative of the fourth congressional district of the State of Tennessee.

Resolved, That Lewis Tillman was not elected, and is not entitled to a seat in the Forty-first Congress as the Representative of the fourth congressional district of the State of Tennessee.

P. M. DOX.

EXHIBIT A.

SECRETARY OF STATE'S OFFICE,
Nashville, Tennessee, January 12, 1871.

Official vote for member of Congress from the fourth congressional district of Tennessee:

Counties.	John M. Bright.	Jas. Mullins.
Rutherford	2,099	610
Cannon	833	83
Coffee	693	35
Franklin	1,392	27
Lincoln	2,364	48
Bedford	1,449	634
Marshall	1,208	163
Giles	1,789	243
Total	11,827	1,843
	1,843	
Bright's majority	9,984	

STATE OF TENNESSEE:

I, Thomas H. Butler, secretary of state of said State, hereby certify that the foregoing is a true statement of the election for member of Congress in the fourth congressional district of said State, at an election held on the 8th day of November, 1870, as the same appears of record in my office.

In testimony whereof I hereunto set my official signature, and, by order of his excellency the governor, affix the great seal of the State of Tennessee, at the executive department in Nashville, on this 12th day of January, 1871.

[GREAT SEAL OF TENNESSEE.]

T. H. BUTLER,
Secretary of State.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 4.

RESERVATION AT POINT SAN JOSÉ, SAN FRANCISCO.

[To accompany bill H. R. No. 2688.]

JANUARY 10, 1871.—Ordered to be printed and recommitted to the Committee on Military Affairs.

Mr. ASPER, from the Committee on Military Affairs, made the following

REPORT.

The Committee on Military Affairs, to whom was referred the memorial of Rudolph Steinbach, Theodore LeRoy, Emil Grisar, and George and Mary Ann Eggleton, praying to have lands and improvements taken for public use by military authority restored to them severally, or that they be allowed compensation therefor, having fully considered the same, beg leave to report:

That in 1865 General McDowell, then in command of the Department of California, with headquarters at San Francisco, took military possession of the whole of Black Point, or Point San José, being an elevated point of land extending into the bay of San Francisco, under authority of what was believed to have been a reservation made by the President of the United States, Mr. Fillmore, in 1850 and 1851, but which was first known of by the citizens in San Francisco on the 31st of October, 1864. The portion claimed as reserved was within a radius of 800 yards from the extreme northern point of the promontory of San José.

Valuable improvements existed upon this tract of land. The city water-works, the Pioneer woolen mills, a large smelting works, and Stevens' meat-packing works were all on this reservation; but the proprietors of the establishments were at no time disturbed in the enjoyment and occupancy of their property after the orders of General McDowell were made public.

By an act passed at the last session of Congress, being public act 128, (acts and resolutions of the 2d session of the 41st Congress, pp. 147 and 148,) all this alleged reservation, except that portion described as follows, viz:

> Commencing at a point in the mean low-water shore line of the bay, or entrance to the bay, of San Francisco, east of the promontory of Point San José, where the same is intersected by the westerly line of Van Ness avenue; running thence southerly along the said westerly line of Van Ness avenue to its intersection with the northern line of Bay street; thence westerly along the north side of Bay street to its intersection with the eastern line of Laguna street; thence northerly along the said eastern line of Laguna street to the westerly shore; thence in a northeasterly, easterly, southeasterly, and southerly direction, following the said shore line, and including the entire water front between Laguna street and Van Ness avenue, to the point or place of beginning—

was relinquished to the city of San Francisco, which covered all the title, claim, or interest of the United States therein. This relieved the city water-works, the aforesaid industrial establishments, and a number of private parties from the effects of the orders of General McDowell. The portion still retained covers an area of about fifty-five acres, and comprises all the northernmost portion of the point or promontory.

Previous to the appropriation of this promontory by the United States, through her military officers, the memorialists and others, among them Mrs. Jessie Benton Frémont, had made valuable improvements thereon, having erected dwelling-houses, stables, barns, outbuildings, water-reservoirs, and laid out grounds, planted shrubbery and flowers, and made such other adornments as to make beautiful, tasteful, and elegant homes, all of which having been taken possession of under military orders and despoiled or put to use for officers' quarters and other purposes of the Government, they now demand the restoration of their property, or that reasonable compensation be made therefor.

Your committee have examined documents, papers, volumes of reports, and such data as were within their reach, and have no difficulty in coming at a conclusion upon the subject; and they have no doubt that if the memorialists have not a perfect legal title to the lands reserved or taken for public use, they at least have such strong and prevailing equitable title thereto as to entitle them to such relief as will make them good for the property taken; and that as against the memorialists the United States have no title whatever to the property claimed, except such as she derived by taking possession for public use, and by the act of Congress of July 1, 1870, above referred to, and the act of March 8, 1866, reference to which will herein be made.

The facts upon which the rights and equities of the memorialists rest and are derivable, are as follows:

Previous to the acquisition of the territory of California a pueblo or town had been laid out under authority from the Mexican government, where the city of San Francisco now is, and San Francisco succeeded to the rights, privileges, franchises, and immunities of the ancient pueblo. (See Hart *vs.* Burnett, 15 Cal., 616; and Payne *vs.* Treadwell, 16 Cal., 224.) Among the rights of such towns was the right to four square leagues of land. This right is thus described by the Supreme Court of the United States in the case of Townsend *vs.* Greeley, 5 Wallace, 336:

> By the laws of Mexico in force at the date of the acquisition of the country, (California,) pueblos or towns were entitled, for their benefit and the benefit of their inhabitants, to the use of lands constituting the site of such pueblos or towns, and of adjoining lands within certain prescribed limits. This right appears to have been common to the cities and towns of Spain from an early period in her history, and was recognized in the laws or ordinances for the settlement and government of her colonies on this continent. These laws and ordinances provided for the assignment to the pueblos or towns, when once established and officially recognized, for their use and the use of their inhabitants, of four square leagues of land.

The lands within the present limits of the reservation of the act of July 1, 1870, aforesaid, at Point San José, were a part of and within the four leagues belonging to the city of San Francisco, and were wholly unoccupied and unimproved up to the year 1852. By the new charter of the city of San Francisco of 1851 the limits of the city proper extended beyond the exterior lines of this reservation. In 1852 these lands were first settled upon by private citizens and were improved. The United States had no possession whatever of them, nor did she claim title or right thereto. The large reservation extending from Fort Point, and consisting of about 1,540 acres, was at that time fenced up by the Government, occupied, and guarded by sentinels, and was in plain sight of the tract known as Point San José, which was under daily observation of the officers and men on duty at the fort and the barracks of the presidio. The citizens who occupied Point San José and possessed the same had the only title then known—the possessory right given by the city. This right and the title of the city were secured to them by the city of San Francisco in 1855 by the passage of the ordinance entitled

"An ordinance for the settling and quieting of the land titles in the city of San Francisco," by which the city released and quit-claimed to the parties in actual possession all the lands within the city limits. On the 11th day of March, 1858, the legislature of the State passed a law to ratify and confirm this ordinance.

This was the title of the parties in possession when, in 1863, the Government took possession of the extreme point and erected thereon defensive works, and when, in June, 1865, the order of General McDowell was carried out, and the memorialists were forcibly ejected from their homes and possessions by the military.

The supreme court of California, in the case of Hart *vs.* Burnett, 15 Cal., 616, and in numerous other cases, had decided that this title, acquired through the pueblo franchise under the Mexican laws, confirmed by the city ordinance and act of 1858 aforesaid, was "*a perfect title;*" and in every instance sustained the right of the city to her lands, and all the rights acquired under the city by the inhabitants of San Francisco.

On the 31st day of October, 1864, *is the first time* the United States claimed title to this point or any portion of San José reservation, and until that day neither the law officers of the Government nor the military authorities had any knowledge of any claim of the United States to these lands. In 1863 the military authorities took possession of the extremity of the point, but no claim of right was made to it, it being taken under what was believed to be military necessity, in order to build a defensive work to prepare for the feared approach of the Alabama—the title was to be settled thereafter. This was more than ten years after its settlement under right derived from the city, and the order of General McDowell was executed more than twelve years after the occupancy and improvement of these lands by the memorialists, or those under whom they claim.

Under the act of Congress of March 3, 1851, a board of land commissioners was created to ascertain and settle private land claims in California. By the 14th section of this act Congress declared that the fact of the existence of any city, town, or village, on the 7th of July, 1846, being duly proved, should be *prima facie* evidence of a grant to such corporation. The city of San Francisco, on the 2d of July, 1852, presented her claim for the four square leagues to the said board, and asked its confirmation. The United States contested this claim, denying the title of the city, but did not make any claim of reserves, nor of any right to make reserves. The city made proof of the existence of the pueblo or town of San Francisco prior to July 7, 1846.

In 1854 the board of land commissioners confirmed the claim to a portion of the four square leagues, and rejected it for the balance. *The portion confirmed embraced the lands at Point San José.*

Both the United States and the city appealed from this decision to the United States district court; the United States because they denied the entire claim of the city, and the city because dissatisfied with the quantity confirmed. Subsequently the United States withdrew their appeal and consented that the city have leave to proceed upon the decree of the board rendered in its favor, *as under final decree.* The United States district court dismissed this appeal accordingly, and the court ordered that the suit proceed in behalf of the city of San Francisco. The city prosecuted her appeal to final decree, which was entered in that case on the 18th of May, 1865.

The withdrawal by the Government of the appeal from the decree of the board of United States land commissioners was necessarily regarded

as an admission and recognition on the part of the United States of the facts upon which the claim of the city rested, and as closing the controversy between the city and the Government as to the land to which the city claim was confirmed. The title to property within the limits of the city to the value of many millions rested upon this recognition.

The supreme court of the State of California unanimously declared that the United States had no title to the land within the limits confirmed. (Norton *vs.* Hyatt, 8 Cal., 539.) When the common council of the city, in 1855, by ordinance which was in 1858 confirmed by the State legislature, had released and granted the city title to the parties in actual possession of the land within the corporate limits of 1851, the supreme court of the State declared that this release had the effect of "*a perfect title.*" (Hart *vs.* Burnett, 15 Cal., 614.) This decision was affirmed in numerous subsequent decisions, and now rests as the settled law of California on this question.

Encouraged by the action of the General Government, the city council, the State legislature, and the decisions of the highest tribunal of their State, citizens purchased lands at Point San José, the same as in other parts within the city limits; taxes for city, county, and State purposes were levied and collected, and extensive and permanent improvements were erected on them.

In September, 1864, ten years after the decision of the United States board of land commissioners, the case, on appeal from that decision, was transferred from the district court to the circuit court of the United States. In October, 1864, it was heard by the circuit court, and *then* by stipulation filed October 31, 1864, *for the first time in that case*, the evidence of a reservation at Point San José, made by an order of President Fillmore in 1850, modified by an order in 1851, and on file in the Land Office at Washington, was produced. The decree of the circuit court, read October 31, 1864, affirmed the validity of the claim of the four square leagues of land, excepting, however, certain reservations.

On the 18th May, 1865, the final decree of the circuit court was entered, and is, after the formal part, as follows:

> The land of which confirmation is made is a tract situated within the county of San Francisco, and embracing so much of the extreme upper portion of the peninsula upon which the city of San Francisco is situated as will contain an area of four square leagues, as described in the petition. From this confirmation are excepted such parcels of land as have been *heretofore reserved for public uses by the United States*, and also such parcels of land as have been, by grant from lawful authority, vested in private proprietorship, and finally confirmed to claimants under the same by the respective tribunals of the United States. All of which excepted parcels are to be included in the area of the four square leagues when computed, and excluded from the tract hereby confirmed, as finally surveyed, either by fixed boundaries or other precise description. This confirmation is in trust for the benefit of lot holders under grants from the pueblo, town, or city of San Francisco, or from other lawful authority in that behalf, and as to any residue for the use and benefit of the inhabitants of the city.—(See the printed record of the case of The City of San Francisco *vs.* The United States, in the supreme court, p. 395.)

The United States attorney appealed to the supreme court. On behalf of the United States the case was brought up only after mandate issued out of the Supreme Court of the United States. Pending the proceedings in this case Congress passed the act of July 1, 1864, being an "Act to expedite the settlement of land titles in the State of California;" and in the 5th section all the claim of the United States to lands within the corporate limits of 1851 was relinquished to the city of San Francisco, except "all sites or other parcels of land which have been or now are occupied by the United States for military, naval, or other public uses, or such sites or parcels as may hereafter be designated by the

President of the United States within one year after the rendition to the General Land Office by the surveyor general of an approved plat of the exterior limits of San Francisco, as recognized in this section, in connection with the lines of the public surveys."

At the date of the passage of this act the United States was in possession of the extreme point of San José only, taken for the erection of a battery; nor did the President, within the time limited, designate any portion of this San José reservation, or any other parcel of land, and the act spent its force without any change in the limits of the reservation by act of the President.

Pending the appeal in the Supreme Court of the United States, Congress passed the act of March 8, 1866, 14 Stat., p. 4. This act relinquishes to the city all lands within the city of San Francisco, and all the lands confirmed by the decree of the circuit court of the United States entered May 18, 1865, "and the claim of the city is hereby confirmed, subject, however, to the reservations and exceptions designated in said decree." Upon the passage of this act a decree dismissing the appeal was entered in the case in the Supreme Court of the United States on motion of the Attorney General.

The United States claimed the land comprised in this controversy, on the ground that the same was a portion of the public domain, and having become the proprietor by reason of the transfer of California from Mexico by treaty of Guadalupe Hidalgo in 1848. On the other hand, this land was claimed as private property, belonging to the city of San Francisco, in trust for the inhabitants, made such by the laws of Mexico, dating back long before the cession to the United States, and that this right was recognized by the United States in the act passed March 3, 1851, creating a board of land commissioners to ascertain and settle private land claims in the State of California. Under this act the claim of the city was presented to the board, and was finally confirmed to the city, subject to the reservation aforesaid. In order to secure this reservation the act of March 8, 1866, was passed, otherwise the Supreme Court of the United States presumably would have held that no reservation could have been made within the limits of the four square leagues belonging to the city; certainly if the great case of New Orleans *vs.* The United States, 10 Peters, 662, had been followed, where the same question was raised, based upon similar circumstances, and upon the same precedents and authorities.

The forms of making reservations prescribed by the laws of Congress were not pursued. The authority to make reservations of the *public* lands is first found in the act of May 29, 1830, being an "Act to grant preëmption rights to settlers on the public lands." By the first section it was provided "that no entry or sale of any land shall be made under the provisions of this act which shall have been reserved for the use of the United States, or either of the several States in which any part of the public lands may be situated." In the 4th section the manner of making the reservation was prescribed, and was as follows: "Nor shall the right of preëmption contemplated by this act extend to any land which is reserved from sale by act of Congress or by the order of the President." By this act the reservation *from sale* is made by act of Congress or *order* of the President. By the act of June 19, 1834, this act was extended two years, then again continued in force two years longer by the act of June 22, 1838, and by the act of June 1, 1840, the act of 1830 was continued in force until June 22, 1842.

The practice under these acts was, for all reservations desired to be made, by an *order* signed by the President, and filed in the office of the

Commissioner of the General Land Office, and by him was transmitted by copy to the surveyor general of the State or Territory where the reservation was situated.

On the 4th of September, 1841, Congress passed the preëmption law which is now in force, and in which the manner of making reservations is changed. This act is entitled "An act to appropriate the proceeds of the sales of the public lands, and to grant preëmption rights." (5 Statutes, p. 435.) The 4th section is as follows:

SEC. 4. *And be it further enacted*, That there shall be granted to each State specified in the first section of this act, five hundred thousand acres of land for the purposes of internal improvement: *Provided*, That to each of the said States which has already received grants for said purposes, there is hereby granted no more than a quantity of land which shall, together with the amount such State has already received, as aforesaid, make five hundred thousand acres, the selections in all of the said States to be made within their limits respectively, in such manner as the legislature shall direct, and located in parcels conformably to sectional divisions, of not less than three hundred and twenty acres in any one location, on any public land except such as is or may be reserved from sale *by any law of Congress*, or *proclamation of the President of the United States*, which said locations may be made at any time after the lands of the United States in said States respectively shall have been surveyed according to existing laws; and there shall be, and hereby is, granted to each new State that shall be hereafter admitted to the Union, upon such admission, so much land as, including such quantity as may have been granted to such State before its admission, and while under a territorial government, for purposes of internal improvement as aforesaid, shall make five hundred thousand acres of land, to be selected and located as aforesaid.

This act was in force in 1850 and 1851, when President Fillmore made the *orders* of reservations. The order of November 6, 1850, made several reservations in the bay of San Francisco. The first was as follows:

1st. From a point 800 yards south of Point San José to the southern boundary of the presidio, along the southern boundary to its western extremity, and thence in a straight line to the Pacific Ocean, passing by the southern extremity of a pond that has its outlet into the channel between Fort Point and Point Lobos.

This order was filed in the General Land Office, and on the 24th June, 1851, was by Commissioner Butterfield transmitted to Samuel D. King, surveyor general for California.

It being found impossible to locate and survey the reservation aforesaid, from its indefinite description, and being represented through the Engineer Department and the Secretary of War to the President that a change of boundaries was desirable, he did, on the 31st December, 1851, make a change in the reservation so as to embrace the following two tracts:

1st. The promontory of Point José within boundaries not less than eight hundred yards from its northern extremity.

2d. The Presidio tract and Fort Point, embracing all the land north of a line running in a westerly direction from the southeastern corner of the presidio tract, to the southern extremity of a pond lying between Fort Point and Point Lobos, and passing through the middle of said pond and its outlet to the channel of entrance from the ocean.

This was again, by *order* of the President, filed in the General Land Office, and by the Commissioner transmitted to the surveyor general for California, where it was placed in a pigeon-hole, and not again brought out until October 31, 1864. The first order included nothing, nor could anything be defined under it. The second order was made *after the act of* 1851 *was passed*, whereby the claim of the city to her land was recognized, and indeed set up before the Commissioner. Before this order reached California the lands at Point San José were settled upon under possessory rights recognized by the city, some time in the year 1852, by Leonidas Haskell, esq., and were in his possession and control. He afterward acquired the title of the city under the city ordinance and act

of the legislature before mentioned, and the memorialists claim title under him.

In the year 1859, W. H. J. Brooks, esq., a searcher of land titles in San Francisco, of long experience in the business, was employed to search the title to lands at Point San José, and having made diligent search among the city records, the records in the surveyor general's office and in the United States engineer's office at San Francisco, reported that he could find nothing whatever showing that the United States had any title, or in any way made claim to the lands at this point, and gave his opinion that the title of those who claimed under the city was perfect. His affidavit to the facts of his search and report are on file among the papers filed by the memorialists. Upon the strength of his report, and by the advice of lawyers employed for the purpose of examining the title, purchases of land at this point were freely made, houses and factories were built, money was loaned on mortgage.

In 1863 the General-in-chief of the Army sent a dispatch to the commanding general at San Francisco, of which the following is a copy:

WASHINGTON, D. C., *October* 2, 1863.

The Secretary of War directs that you take military possession of Point San José, and erect the battery proposed for its defense; the question of ownership will be determined hereafter.

H. W. HALLECK, *General-in-Chief.*

Brigadier General S. WRIGHT.

Under this order General Wright did, on the 10th October, 1863, take military possession of the extreme point only of San José, and erected a battery. This appropriated the residence of Mrs. Frémont and the dwelling-house then occupied by Obed Palmer. In 1865 General McDowell took possession of the lands of LeRoy, Eggleton, and Grisar, and forcibly ejected the owners and occupants.

It does not appear that any legal appropriation has been made of these lands to public use, nor any known mode of making such appropriation been pursued. The order of General Halleck was no appropriation for public use of the property of the citizen as the law permits or authorizes. It was only a taking of property for public use on account of military necessity, supposed or real. The orders of the President were no appropriation, but only a reservation from sale of the lands of the United States. If the Government had no land there, then certainly there was no reservation.

California was ceded to the United States by the treaty of Guadalupe Hidalgo, made February 2, 1848, proclaimed at Washington July 4, 1848, whereby all Mexicans and citizens transferred were to be protected in the "enjoyment of their liberty and property." And this right of property was to be adjudged by the laws of Mexico in force at the time of the transfer, and would so continue until changed by the United States.

On the 9th day of September, 1850, California was admitted as a sovereign State of the Union, with all the rights and privileges of any of the States of the Union. By this act the right of eminent domain was wholly extinguished in the United States, and thenceforth resided in the State of California. The United States could not after this date take private property for public use without such mode and under such laws as were provided by the State of California, nor without making compensation therefor. (New Orleans *vs.* The United States, 10 Peters, 662; Pollard *vs.* Hazen, 3 Howard, 212.)

The mere orders of the President could not reserve public lands, because the act of 1841 changed the law on the subject. It seems in this

case the President pursued the old practice set up under the act of 1830. But this was not sufficient under the act of 1841. Under this act it could only be done by act of Congress or by "*proclamation of the President.*" This would make the act a public matter of which all citizens were bound to take notice, and upon such reservation no one could acquire title. But when the orders were sent, as in this case, to the Commissioner of the General Land Office, who was bound to know them or respect them? Congress did not intend that citizens should be entrapped into making improvements upon lands, and when made that some secret order be exhumed, and the labor and money of the private citizen turned into the possession of the United States to make places of luxurious enjoyment and use for the military officers of the Government. The words "by proclamation" were intended to prevent such a contingency, and were full of meaning; they were intended to give the acts of the Executive, in respect to the public lands, as high a sanction and as public a character as the laws of Congress. Besides, the act of 1841 was passed for the benefit of the settler, to encourage the settlement, occupancy, and improvement of the public lands, and not to retard and hinder, as would have been the case if secret reservations were to be permitted and continued. Hence the act of 1841 wisely changed the law upon the subject, and the Executive could only make reservations as therein directed.

Your committee are satisfied that if this were a new question, they would be bound to hold that the memorialists had a perfect legal title to that portion of Point San José covered by their several title deeds, and that the United States was an intruder and trespasser upon their properties. There has been much litigation in the State courts; at different times injunctions were granted and judgments rendered, but were disobeyed by the military. An injunction was applied for to the United States circuit court, but was denied on the ground that the title was in dispute. To test this title, in January, 1866, an ejectment suit was brought in the United States circuit court by one of the memorialists, Emil Grisar, against General McDowell, then military commander at San Francisco, who claimed to hold the property of the memorialists under the reservation of President Fillmore, and who with his family occupied the property of said Grisar. The case of Grisar *vs.* McDowell came up to the Supreme Court of the United States, and was argued and decided at the December term, 1867. Mr. Justice Field delivered the opinion of the court. He had delivered the opinion below, as also the opinion in the case of San Francisco *vs.* The United States, in the United States circuit court for California. The court held that the United States has such title in consequence of the acts of Congress of 1864 and 1866, and the decision of the circuit court in the case of San Francisco *vs.* The United States, made final by the act of 1866, and the decree dismissing the appeal entered in pursuance thereof, that the plaintiff could not recover in ejectment. The court did not decide that the city had no title, but that the boundaries of the city's pueblo rights of four leagues were not well defined when the reservation of 1850 and 1851 was made, and hence the same was subject to the control of the Government; nor did the court decide that the reservation was made in pursuance of law, but that, as the decision of 1864 and decree of 1865 in the United States circuit court were made excepting this reservation, the court held that ejectment could not be maintained. (See the case of Grisar *vs.* McDowell, 6 Wallace, 379.)

Therefore with this decision and the acts of Congress of 1864, 1866, and 1870, it would seem that the memorialists have acted wisely in

appealing to Congress for relief, and that these facts and circumstances make a strong appeal both to the justice and magnanimity of Congress.

Although the Supreme Court has heretofore held that acts of Congress passed to control land appropriated by the laws and usage of France and Spain to the city of New Orleans for the public use of the city and her inhabitants were of none effect, nor could they change the title to land thus appropriated, (10 Peters, 663,) here a tract of land held under the title of the city of San Francisco, and owned by several parties, has been taken, fifty acres of it still held and occupied by the Government, with the valuable improvements upon it. If the United States require this for military purposes, compensation should, as a matter of right and common justice, be made to the owners. Fair dealing and ordinary justice require this.

The Presidio reservation rests upon an entirely different footing. It was known under the Mexican government, and was commenced with the town or pueblo. With the pueblos founded in California there was the Mission, the Presidio, and the four square leagues of land. The Government acquired the right to the Presidio as a public reservation from Mexico, and from the time of the cession to the present time the United States have occupied this reserve. Its lines have been well defined; it has been under fence ever since California came into our possession, and has been securely guarded by the military.

But from the time of the acquisition of California to 1863, when the extreme northern point of San José was taken possession of, and to the 31st day of October, 1864, no claim was ever made to this point by any one representing the Government. Citizens commenced its improvement in 1852; from that time to 1863 and later, their occupancy was open and notorious, and in plain view of the United States officers and men at the Presidio. No one making improvements at Point San José was ever notified of any claim on the part of the Government. Those who erected their homes here were suffered to believe that they owned their lands and houses. These houses all remain, except the dwelling of Mrs. Frémont, which was torn down to make room for the battery, and some barns and stables, which, after military occupation was taken, were accidentally burnt. These dwellings were the homesteads of the owners—were their all. In some cases the parties are now only holding on to their property by means of an equity of redemption under the foreclosure of mortgages.

By the act passed at the last session of Congress, relief was granted to the owners of the larger part of the land within the original lines of the reservation; their lands were restored to them, but the memorialists find themselves specially excluded from that relief.

It is for Congress to say whether this relief shall be granted by restoring the property to the owners, or so much of it as can be dispensed with, or whether they shall be paid a compensation therefor. It is believed by apparently well-informed persons that the Government will not require all the land now retained for the successful use and working of the batteries and military works on this point, and that therefore a portion can be restored; but your committee believe that this matter should be left to the discretion of the Secretary of War. The dwelling-houses left standing have been used for officers' quarters; the house of one of the memorialists, Mr. Grisar, is used by General Ord for his headquarters and residence, and all the improvements have been useful to the Government. On this subject General Ord, in a letter of the date of November 9, 1868, says of the improvements, that "they are important and useful now as quarters for officers and men, which, if

they had not existed when the Government took possession of the point, would have had to have been erected at considerable expense."

The equitable character of the claim of the memorialists, it seems to your committee, is strong and of pressing urgency. A great and just government cannot shut its eyes to injury thus brought upon its citizens, and will not.

Mr. Justice Field, of the Supreme Court, who has had the claim to the land at Point St. José before him several times for adjudication, and who has personal knowledge of the circumstances, in a letter dated May 8, 1868, addressed to Senators Williams and Stewart, on file with the papers in this case, says: "It presents a case of much hardship to Mr. Steinbach, Mrs. Frémont, and others who were naturally misled by the action of the Government in withdrawing its appeal from the decree of the board of land commissioners. They had, from this proceeding, some reason to expect that in the ultimate determination of the city claim (if found valid for any purpose) it would embrace at least such quantity as had been confirmed by that decree. The Government has seldom refused relief in such cases, when it could be granted consistently with the public interests."

And your committee coincide in opinion with Mr. Justice Field, and believe that relief can be granted without detriment to the public interests. The question is then presented to your committee as to what relief shall be granted, and how. This can be done, of course, by an assessment of the value of the land and improvements, and payment therefor in money; or the Government can, at the discretion of the Secretary of War, relinquish the whole of the property, or such portion of it as may not be required for military purposes. This property being within the city limits, with streets laid out over and through it, and being valuable for residence and other lots, it would seem best to relinquish to the owners the greater part of it; but your committee do not propose to interfere with the sound discretion of the military authorities in that behalf.

Your committee herewith present a bill, as part of their report, which proposes to restore the property, if found that the military service can dispense with it; but if not, its value is to be ascertained by a board of officers or commissioners, to be convened by the Secretary of War, who shall hear testimony, decide, and report their award with all the testimony, subject to review of the Secretary of War. In this mode of arriving at the proper value, your committee believe the advantage, if any, will be on the side of the Government, and no more than the true amount of damages will be likely to be awarded.

The proposition for the sale of a portion of the Presidio tract is a matter not essential to the relief to be granted, as the Government should pay its just obligations, whether it can or cannot make sale of its public lands. It, however, is a mode of making the adjustment that will at once enable the parties to secure other homesteads in an adjacent portion of the city in which they earn their living in lieu of those they were deprived of, and at the same time turns a useless and barren tract of land into the means not only to discharge these obligations, but also to put money into the Treasury.

The military reservation at the Presidio of San Francisco, to which the title of the United States is unquestionable, contains fifteen hundred and forty-one acres, an extent of territory far beyond the requirements of the Government for military or other purposes. The existence of a similar tract of land, occupied solely by a few companies of soldiers, and as a pasture for a few horses, if situate within the limits of the cities

of New York or Boston, would constitute an intolerable nuisance. We must suppose that this one is so considered by the people of San Francisco, for whose protection military posts in that harbor are maintained. While all the military reservations in the harbor of New York contain less than four hundred acres, the Government now holds military reservations in the harbor of San Francisco containing in the aggregate more than three thousand acres.

The sale at the present time of at least a portion of the reservation at the Presidio, adjoining the city limits, is by your committee considered desirable and useful, and therefore recommended.

The mode of sale provided for in the bill herewith submitted will most effectually insure the realization of the highest obtainable prices for these lands, and is in harmony with established precedent. The proceeds of the sale are to be paid into the Treasury of the United States, after a proper compensation shall have been paid to the persons who have suffered losses by the taking of their lands at Point San José, for public use, if the Secretary of War shall deem it necessary to retain possession thereof for military purposes. Thus their homesteads will either be restored to these persons, or an opportunity be offered to them to secure other ones in lieu thereof.

The reservation at the Presidio of San Francisco, after the disposal of the larger quantity of land which the Secretary of War is by this bill authorized to sell, will still contain more than one thousand acres; it is left for future legislation to still further reduce this amount.

Your committee, having carefully weighed every circumstance, having sought to arrive at just and proper conclusions, with due regard to the interests of the Government on the one hand, and the rights and claims of her citizens on the other, do respectfully recommend the passage of the accompanying bill.

○

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 5.

CHEROKEE NEUTRAL LANDS.

[To accompany bill H. R. No. 1074.]

JANUARY 11, 1871.—Ordered to be printed and recommitted to the Committee on Indian Affairs.

Mr. ARMSTRONG, from the Committee on Indian Affairs, made the following

REPORT.

The Committee on Indian Affairs, to which was referred bill (H. R. No. 1074 "To dispose of the Cherokee neutral lands in Kansas to actual settlers only," submitted the following report:

The "Cherokee neutral lands" is a tract of about 800,000 acres, (the exact quantity is 799,615,18 acres,) lying in the southeast corner of the State of Kansas, extending fifty miles north and south, and twenty-five miles east and west. It is part of the "Louisiana purchase," the title to which the United States derived from France by the treaty of April 30, 1803. It has been uniformly held to be perfect and indefeasible. The United States has, however, recognized in the Indians a "right of occupancy," which has been so far respected that the lands occupied by them have never been opened to settlement until this right, commonly known as the "Indian title," has been extinguished. This has always been with the consent of the tribes in occupancy, and with few, if any exceptions, in the form of a treaty. These treaties, with even the weakest of the tribes, have been recognized by every department of the Government, and have been rigidly and uniformly enforced against them.

The Indian title to the land in controversy was extinguished by the treaty of June 2, 1825, (7 Stat. L., page 240,) with the Osage Indians, who then occupied it, and who, pursuant to the treaty, relinquished the possession, and removed from the lands.

Thus the United States were in position to give both title and possession to whomsoever, and upon such consideration as, they chose to convey.

Two parties assert title: James F. Joy, representing the Fort Scott and Gulf Railroad, who claims that the United States conveyed the lands to the Cherokees by treaty of 1835, and by patent pursuant thereto in 1838. That the Cherokees, by the treaty of 1866, reconveyed the same to the United States, as trustee, to make sale thereof; and that the United States, in execution of the trust, sold the same to him by agreement, dated the 9th day of October, 1867; that having purchased the land, he has paid the purchase money in full; has entered into possession of the land, and has, at a cost of over $5,000,000 constructed through its entire length a railroad, part of a through line from Kansas to the Gulf.

He does not assert title to such part of the land as was occupied by actual settlers prior to August 11, 1866, the date of the ratification of

he treaty by which the Cherokees conveyed the land to the United States in trust to sell. This land was reserved from the contract, and patents are being issued to the settlers as fast as they make payment.

The sale thus made to Joy was modified as to the terms of payment by supplementary treaty between the United States and the Cherokees, of April 27, 1868, duly ratified by the Senate, and accepted by Joy, and under it patents have been issued to him for all the land embraced in the contract.

He further claims that the "settlers" who entered subsequently to August 11, 1866, are mere intruders, who entered without right and with full notice of the Cherokee title, and who have acquired no rights which they can maintain against the title vested in him by the patents of the United States.

The counter-claim is on behalf of the "settlers," who it is alleged entered upon the lands in good faith as preëmptors, and who, by virtue of their settlement, have acquired the right to purchase from the United States, and receive title under the preëmption laws, at the rate of $1 25 per acre.

It is also claimed that all the Cherokee neutral lands not occupied by actual settlers are subject to selection under the general preëmption laws.

Such claims on behalf of the settlers have been persistently pressed upon the Land Office ever since the treaty of 1866, and have been uniformly rejected.

The bill now under consideration (H. R. 1074) proposes to leap over all questions of title and vested rights under the treaties and patents of the United States, and by legislative construction and by authority of law, to declare the patents of the United States, duly executed and delivered to James F. Joy, to be null and void. It proposes to withdraw from the courts the consideration of the conflicting rights of the contesting parties, and to compel the officers of the Government to execute and deliver other conveyances of title to the same land to persons who claim adversely, and who will set up the second deed to defeat the first, thereby subjecting the Government to claims for damages from one party or the other, and placing the Government in the discreditable position of accepting, with full notice, purchase-money from two adverse claimants of the same land, and delivering a deed to both.

In the view of your committee the title is vested in James F. Joy, and the settlers who entered after August 11, 1866, are trespassers who have no title which they can maintain against him. But be this as it may, the question is *now pending* in Kansas, in both the federal and State courts, in several actions which have been there instituted for the purpose of trying the title, and in which the whole question will be judicially considered and determined. In the judgment of your committee it is not only inexpedient to pass the proposed bill, by reason of its great injustice, but because the question is preëminently one for judicial determination, and because, whatever title is vested in Joy, is a vested right which no subsequent legislation can impair, and the determination of which cannot be withdrawn from the courts.

A brief review of the facts, it is believed, will fully justify these conclusions.

The Cherokees, a very numerous and warlike tribe of Indians, were originally located in Georgia. Part of the tribe, from time to time, removed west of the Mississippi, and were scattered over a large extent of territory, but were finally gathered within the limits of Arkansas, upon reservations secured to them by the treaties of January 8, 1817,

and February 27, 1819, and now known as the "Cherokee country," as distinguished from the "Cherokee neutral lands." A large part of the tribe, however, remained in Georgia.

The progress of civilization in that State, and the constantly recurring conflicts between the Indians and the settlers, resulting frequently in armed collisions, rendered it a matter of national importance that the Indians should be removed. To effect this object the treaty of May 6, 1828, (7 Stat. L., 310,) was entered into, the preamble of which recites that—

Whereas it being the anxious desire of the Government of the United States to secure to the Cherokee Nation of Indians a permanent home, and which shall, under the most solemn guarantee of the United States, be and remain theirs forever—a home that shall never in all future time be embarrassed by having extended around its lines, or placed over it, the jurisdiction of a State or Territory, nor be pressed upon by the extension over it in any way of the limits of any existing State or Territory—the parties hereto do conclude the following articles, viz:

By this treaty it was provided—

ARTICLE 2. The United States agrees to possess the Cherokees, and to guarantee it to them forever, and that guarantee is hereby solemnly pledged, seven millions of acres of lands, to be bounded as follows: (The boundary then follows; not necessary to insert here.)

The article then goes on as follows:

In addition to the seven millions of acres thus provided for and bounded, the United States further guarantees to the Cherokees a perpetual outlet west, and free and unmolested use of all the country lying west of the western boundary of the above-described limits.

By article three of the treaty the United States agrees to remove all white persons, and all others not acceptable to the Cherokees, from said tract of land.

ARTICLE 7. The chiefs and head-men of the Cherokee Nation aforesaid, for and in consideration of the stipulution and agreements, do hereby agree, in the name and in behalf of their nation, to give up and surrender to the United States, and to leave the same within fourteen months, all the lands they are entitled to in Arkansas, and which were secured to them by the treaty of January 8, 1817, and the convention of the 27th of February, 1817.

Article eight recites that the Cherokee Nation west of the Mississippi, having by this agreement secured themselves from the harassing and ruinous effects consequent upon a location amid a white population, and secured to themselves and their posterity, under the solemn sanction of the guarantee of the United States, as contained in this agreement, a large extent of unembarrassed country, &c.

The supplementary treaty of February 14, 1833, (7 Stat. L., 414,) modified the boundaries of the "Cherokee country," but reaffirmed the grant, as follows:

ARTICLE 1. The United States agree to possess the Cherokees, and guarantee to them forever, and that guarantee is hereby pledged, of seven million acres of land, to be bounded as follows, viz:

(Here follow the boundaries, not important in this connection.)

The Cherokees west of the Mississippi were gathered within this territory; but those in Georgia, for the most part, remained within that State. The conflicts with the settlers increased in frequency and violence until, in President Jackson's administration, they were finally, and with force, removed, under the treaty of December, 1835, (7 Stat. L., 478.) By this treaty—

ARTICLE 1. The Cherokee Nation hereby cede, relinquish, and *convey to the United States all the lands* owned, claimed, or possessed by them east of the Mississippi River,

and hereby *release all their claims* upon the United States for spoilations of every kind, for and in consideration of the sum of *five millions of dollars*, to be expended, paid, and invested in the manner stipulated and agreed upon in the following articles:

Article two refers to and reaffirms the treaties of May, 1828, and February, 1833, whereby *seven millions* of acres of land, with a perpetual outlet west, is conveyed and guaranteed to the Cherokees, and then provides conveyance of eight hundred thousand acres more, being the land embraced within the bill, (H. R. 1074,) and now known as the "Cherokee neutral lands," in the following terms:

And whereas it is apprehended by the Cherokees that in the above cession there is not contained a sufficient quantity of land for the accommodation of the whole nation, on their removal west of the Mississippi, the United States, in consideration of the sum of five hundred thousand dollars therefor, hereby covenant and agree to convey to the said Indians and their descendants, *by patent in fee simple*, the following additional tract of land, situated between the west line of the State of Missouri and the Osage reservations, beginning at the southeast corner of the same, and running north along the east line of the Osage lands fifty miles to the northeast corner thereof, and thence east to the west line of the State of Missouri, thence with the said line south fifty miles, thence west to the place of beginning; estimated to contain eight hundred thousand acres.

Article two provides—

The United States also agree that the lands above ceded by the treaty of February 14, 1833, including the outlet and those ceded by this treaty, shall all be *included in one patent executed to the Cherokee Nation of Indians by the President of the United States, according to the provisions of the act of May* 28, 1830.

By the act of Congress of 1830 it was provided—

SECTION 3. *And be it further enacted*, That in the making of any such exchange or exchanges, it shall and may be lawful for the President solemnly to assure the tribe or nation with which the exchange is made, that the United States will forever secure and guarantee to them and their heirs or successors the country so exchanged with them; and if they prefer it, that the United States will cause a patent or grant to be made and executed to them for the same: *Provided always*, That such lands shall revert to the United States if the Indians become extinct or abandon the same.

By the act of July 2, 1836, "making appropriations for carrying into effect certain Indian treaties," there was appropriated—

For the amount stipulated to be paid for the lands ceded in the first article of the treaty with the Cherokees of December 29, 1835, *deducting* the cost of the land to be provided for them west of the Mississippi, under the second article of said treaty, *four* million five hundred thousand dollars.

Thus the transaction was complete. It was a valid contract between competent parties, and upon sufficient consideration. The Cherokees received $500,000 less in money, and 800,000 acres more in land. The titles and possession of the land were reciprocally exchanged, and from that time down to the present controversy both parties to the contract have been mutually satisfied, and neither has questioned the title of the other, and both do now insist that the titles thus passed were and are perfect and indefeasible.

To this, the alleged "settlers," who have no priority of title with either, and are repudiated by both, set up an *inchoate* title by virtue of a plain trespass upon lands on which they entered by force or by stealth, against the well-known prohibition of all the parties in whom there could be the slightest pretense of title.

The title of the Cherokees was as perfect by virtue of the treaty alone as that of the United States to the "Louisiana purchase," of which it is a part, and which rested upon treaty only; but so anxious were the United States to satisfy the Indians beyond the possibility of a doubt, that upon the exchange of lands their title should be perfect, that it was provided in the act of Congress of 1830, and paramount to this act embodied in the treaty of 1835, that "if they (the Indians) prefer it,

that the United States will cause a *patent or grant* to be made and executed to them for the same." This was not necessary to the perfecting of their title, but it was done. The patent of the United States, dated December 31, 1838, and recorded in the Land Office at Washington, was duly executed and delivered to the Cherokees, the granting clause of which is as follows:

> Therefore, in execution of the agreements and stipulations contained in the said several treaties, the United States *have given and granted, and by these presents do give and grant*, unto the said Cherokee Nation the two tracts of land so surveyed and hereinbefore described, containing in the whole 13,374,135$\frac{14}{100}$ acres, to have and to hold the same, together with all the rights, privileges, and appurtenances thereunto belonging, *to the said Cherokee Nation forever*, subject, however, to the right of the United States to permit other tribes of red men to get salt on the salt plain on the Western Prairie, referred to in the second article of the treaty of the twenty-ninth of December, one thousand eight hundred and thirty-five, which salt plain has been ascertained to be within the limits prescribed for the outlet agreed to be granted by said article, and subject also to all the other rights reserved to the United States in and by the articles hereinbefore recited, to the extent and in the manner in which the said rights are so reserved, and subject also to the condition provided by the act of Congress of the 28th of May, 1830, and which condition is, "that the lands hereby granted shall revert to the United States if the said Cherokees become extinct or abandon the same."

Thus the title to the Cherokee neutral lands became vested in the Cherokee Nation. It is, as already stated, a compact body of 800,000 acres of land in the extreme southeast corner of the State of Kansas, fifty miles long from north to south, and twenty-five wide. It lies in the direct course of the most available railroad route from Kansas City to the Gulf, and by which Kansas is eight hundred miles nearer to tidewater than by any other possible route. The road is already built through its entire length, at a cost of more than $5,000,000. The lands of the company upon which this money was raised, are secured by a first mortgage of both the railroad and the lands, and are held, as such lands usually are, by thousands who are dependent upon them for their means of support. The company has also, in full reliance upon their title, sold many thousands of acres to probably not less than a thousand settlers, who have paid their money and taken title from the company. To destroy their title would be an act of the grossest injustice; and to cloud it with suspicion, a wrong wholly without justification, tending to retard the development of the country, and working extensive injury to the material interest of that portion of the State.

Nor have the trespassing settlers any just cause for complaint. The company has offered to them titles at less than the current rates of sale and less than the real value of the land; and many who have accepted these terms have resold their land, enhanced as it is by the railroad, at large advance upon their purchase price. Neither are they entitled to either sympathy or favor. It seems to your committee like a scheme for getting farms for $1 25 per acre, which, by reason of the labor and capital of others, they know to be of much greater value. There is probably not a settler on the land but knew of the Cherokee title, and the provision of the treaty which required the United States to keep her citizens off the land, under the sixth article of the treaty of 1835, which requires "the United States to protect the Cherokee Nation against interruption and intrusion from citizens of the United States, who may attempt to settle in the country without their consent."

This provision was rigidly enforced, and the fact nowhere better known than on the neutral lands and its vicinity, until, on the breaking out of the rebellion in 1861, the Government was compelled by the exigencies of the times to relax its supervision. Up to that time no settlers entered upon the territory but with the consent of the Cherokees.

And the committee is not informed that any settlers who were located prior to August 11, 1866, are asking the intervention of Congress.

During the unsettled condition of the country consequent upon the rebellion, many settlers entered upon the lands without consent of the Cherokees, and with no acknowledged rights from any source. Those, however, who entered prior to August 11, 1866, are fully protected and make no complaint.

The treaty of 1835 was proclaimed on the 23d May, 1836, and was not only legal and constructive notice to all the world, but as matter of fact the exclusive title and possession of the Cherokees was well known to all who entered upon the premises, and had been for more than thirty years not only claimed by them, but defended by the United States by the garrisons of troops sent there for the express purpose, as required by treaty, of keeping off unauthorized settlers. When the troops were necessarily withdrawn to serve elsewhere, these rich and valuable lands presented temptations to unscrupulous men too strong to be resisted. As the number of intruding settlers increased it became manifest to the Cherokees, who were unable to resist them, that their treaty rights therein would no longer be respected, and could only be maintained by the armed intervention of the Government. Under these circumstances they wisely determined to sell this portion of their territory, and made with the United States the treaty of July 19, 1866; (14 Stat. L., 799.)

Through every part of this treaty, the stipulations of all previous treaties, and the exclusive ownership of all the land conveyed to them by patent is everywhere recognized and admitted; nor does the United States in this treaty, nor have they at any time since the granting of the patent claimed or exercised any right of property over the same except the small parcels reserved in the treaty for Government use over the same, but only such governmental jurisdiction as they exercise in common over all the States and Territories. In the 26th article the express guarantee of former treaties is again reiterated, and "The United States guarantee to the people of the Cherokee Nation the quiet and peaceable possession of their country," * * * and that "they shall also be protected against interruptions or intrusion from all unauthorized citizens of the United States who may attempt to settle on their lands or reside in their territory." This provision is in full force, as all the territory conveyed to the Cherokees by the patent of 1838, except the 800,000 acres which by the terms of the treaty of 1866 they reconveyed to the United States in trust, as follows:

ARTICLE 17. The Cherokee Nation hereby cedes, in trust, to the United States the tract of land in the State of Kansas, which was sold to the Cherokees by the United States under the provisions of the second article of the treaty of 1835, and also that strip of land ceded to the nation by the fourth article of said treaty which is included in the State of Kansas; and the Cherokees consent that said lands may be included in the limits and jurisdiction of the said State.

The lands herein ceded shall be surveyed as the public lands of the United States are surveyed, under the direction of the Commissioner of the General Land Office, and shall be appraised by two disinterested persons, one to be designated by the Cherokee national council, and one by the Secretary of the Interior; and in case of a disagreement, by a third person, to be mutually selected by the aforesaid appraisers; the appraisement to be not less than an average of one dollar and a quarter per acre, exclusive of improvements.

And the Secretary of the Interior shall, from time to time, as such surveys and appraisements are approved by him, after due advertisements for sealed bids, sell such lands to the highest bidders, for cash, in parcels not exceeding one hundred and sixty acres, and at not less than the appraised value: *Provided*, That whenever there are improvements of the value of fifty dollars made on the lands, not being mineral, and owned and personally occupied by any person for agricultural purposes at the date of the signing hereof, such person so owning and in person residing on such improve-

ments shall, after due proof, made under such regulations as the Secretary of the Interior may prescribe, be intitled to buy, at the appraised value, the smallest quantity of land in legal subdivisions, which will include his improvements, not exceeding in the aggregate one hundred and sixty acres; the expenses of survey and appraisement to be paid by the Secretary out of the proceeds of sale of said land:

Provided, That nothing in this article shall prevent the Secretary of the Interior from selling the whole of said lands not occupied by actual settlers at the date of the ratification of this treaty, not exceeding one hundred and sixty acres to each person entitled to preëmption under the preëmption laws of the United States, in a body, to any responsible party, for cash, for a sum not less than one dollar per acre.

This treaty was proclaimed August 11, 1866, and was a full acceptance by the United States of the trust upon the conditions expressed. By every principle of equity they must execute it according to its terms, or surrender the trust unimpaired to their grantor. They have no discretionary power to change its conditions, or for any reasons of real or supposed expediency to dispose of it otherwise than the treaty directs.

Any attempt on the part of Congress to declare this title void and grant another title to other and adverse parties would be a flagrant breach of trust, in direct violation of its plighted faith.

The United States having thus on the 11th of August, 1866, accepted the trust proceeded to sell the lands.

On the 30th of the same month, Mr. Harlan, then Secretary of the Interior, made an agreement of sale of the land to the American Emigrant Company. But the validity of this sale was always doubted, and on October 4, 1866, Attorney General Stanbery held it to be null and void for non-compliance with the provisions of the treaty of 1866.

The land was then again offered for sale by Secretary Browning, who states (see Ex. Doc. No. 85, second session fortieth Congress) as follows:

I suggested and urged, at the last session of Congress, that the United States should become the purchaser at one dollar per acre, and issue bonds in payment thereof. Such a proposition was, I believe, submitted to Congress, but not accepted.

After the adjournment of Congress I authorized an unofficial statement to be made in newspapers that the proposals for the purchase of said lands in a body would be received at the Department until the 1st of October.

Early in October Mr. James F. Joy, of Detroit, Michigan, proposed to take the lands in a body at $1 per acre, and pay the cash for them.

No other offer was made. I accepted Mr. Joy's, and concluded a contract with him, from which all lands occupied by actual settlers at the date of the ratification of the treaty were excluded. A copy of the contract is herewith furnished.

There being no other bids, the Secretary, October 9, 1867, made with him the following contract:

This agreement, made and entered into this ninth day of October, in the year of our Lord one thousand eight hundred and sixty-seven, by and between Orville H. Browning, Secretary of the Interior, and James F. Joy, of the city of Detroit, in the State of Michigan, witnesseth: Whereas, by the seventeenth article of a treaty between the United States of America and the Cherokee Nation of Indians, made and concluded on the nineteenth day of July, A. D. 1866, and proclaimed on the eleventh day of August in said year, and the two several provisos to the said section annexed, there were ceded in trust to the United States certain parcels of land therein mentioned, with power to the Secretary of the Interior to sell all of the said ceded lands, with the exception of such parts thereof as are embraced within the tenor and effect of the said two provisions to the seventeenth article of said treaty, for cash, for the sum of not less than one dollar per acre; and whereas the said James F. Joy has proposed to become the purchaser of said lands, and has for that purpose offered to pay therefor the sum of one dollar per acre in cash, which is, in the opinion of the Secretary of the Interior, an eligible and satisfactory price for the same; and whereas the quantity of land embraced within the exception as aforesaid is as yet unascertained, by reason whereof the number of acres of said ceded lands which the Secretary of the Interior is authorized to sell in the manner and at the price aforesaid remains for the present unknown:

Now, therefore, I, Orville H. Browning, Secretary of the Interior, acting for and on behalf of the United States, and by virtue of the power upon me by the said treaty in that behalf conferred, do hereby agree to and with the said James F. Joy, to sell unto

him, his heirs and assigns, all of the hereinbefore-mentioned lands, which were by the seventeenth section of said treaty ceded in trust to the United States, with the exception of such parts thereof as are embraced within the tenor and effect of the said two provisos to the seventeenth section of said treaty, and which parts of said ceded lands are not included in this contract, at and for the sum of one dollar per acre in cash, payable and to be paid as soon as the number of acres hereby contracted to be sold is ascertained, and that on the full payment of the said purchase-money a patent or patents shall be in due form issued granting the same unto the said James F. Joy, his heirs and assigns: *Provided, however*, That this contract is made subject to the rights reserved by the nineteenth article of said treaty to such of the Cherokees as, being heads of families, resided, at the date of the ratification of said treaty, on any of the said ceded lands.

And the said James F. Joy hereby, on his part, agrees to pay unto the Secretary of the Interior, or to such other officer of the Government of the United States as may be authorized to receive the same, the sum of one dollar in cash for each acre of land by this instrument contracted to be sold, as soon as the number of said acres shall be ascertained, and also to pay, for the benefit of such of the Cherokees as, being heads of families, resided on any of the said ceded lands at the date of the ratification of said treaty, and desire to remove from the same, the value of their improvements thereon reserved to them by the nineteenth article of said treaty, as soon as such value is ascertained in the manner provided in said article.

In witness whereof I, Orville H. Browning, Secretary of the Interior, have subscribed my name and caused the seal of said Department to be affixed hereunto; and the said James F. Joy has hereto on his part, subscribed his name. All done in duplicate the day and year first above written.

[SEAL.]

O. H. BROWNING,
Secretary of the Interior.
JAMES F. JOY,
By N. BUSHNELL, *his Agent.*

The Emigrant Society then came forward and asserted title under their contract of August 30, 1866. Mr. Joy immediately offered to surrender his contract, but Secretary Browning refused to accept it, and notified him that he would be held to its fulfillment.

Subsequently Mr. Joy and the Emigrant Company, with the consent of the United States and of the Cherokees, compromised their dispute and the Emigrant Company transferred, June 6, 1868, all their right, title, and interest, whatsoever, to Mr. Joy. The arrangement was fully and formally ratified by the supplemental treaty of April 27, 1868, in which it is expressly provided that said Joy shall "assume and perform all obligations of the said American Emigrant Company, under said first-named contract, as hereinafter modified."

The contract and assignment referred to are as follows:

This agreement, made this 30th day of August, A. D. 1866, by and between James Harlan, Secretary of the Interior, on behalf of the United States, of the one part, and the American Emigrant Company, a corporation chartered and existing under the laws of the State of Connecticut, of the other part—

Witnesseth: That the said Harlan agrees to sell, and hereby doth sell, to the said company all that tract of land known as the "Cherokee neutral lands," in the State of Kansas, containing (800,000) eight hundred thousand acres, more or less, with the limitations and restrictions set forth in the seventeenth article of a treaty between the United States and said Cherokee Indians, ratified on the 11th day of August, A. D. 1866, as amended by the United States Senate, with all the beneficial interest therein, at the rate of one dollar per acre in lawful money of the United States, to be paid to the Secretary of the Interior in trust for said Indians as hereinafter set forth, viz: Twenty-five thousand dollars on the execution hereof, twenty-five thousand dollars on the approval of the surveys of said lands by the Commissioner of the General Land Office, and twenty-five thousand dollars on the 30th day of August, 1867; seventy-five thousand dollars on the 30th day of August, 1868, and seventy-five thousand dollars on the 30th day of August, 1869; seventy-five thousand dollars on the 30th day of August, A. D. 1870, and one hundred thousand dollars per annum thence afterward until the whole shall be paid; each of said several sums to draw interest at the rate of five per cent. per annum from the date of the approval of the surveys aforesaid.

The said American Emigrant Company agree to pay the said several sums of money, with interest thereon as aforesaid, to the said Secretary in Washington in lawful money of the United States as the same shall become due; the said interest on each and all deferred payments to be paid annually on the first day of July. The United States agree to cause said lands to be surveyed as public lands are usually surveyed in one

year from the date hereof, and on the payment of fifty thousand dollars to set apart for said company a quantity of said lands in one body in as compact form as practicable, extending directly across said tract of land from east to west and containing a number of acres equal to the number of dollars then paid, and from time to time to convey the same by patent to said company, or its assigns, whenever afterward requested so to do, in such quantities by legal subdivisions as said company shall indicate; and on the payment of each additional installment, with interest as herein stipulated, to set apart for said company an additional tract of land in compact form, where said company may request, but extending directly across the said neutral lands from east to west, containing a number of acres equal to the number of dollars of principal thus paid, and to convey the same to said company or its assigns as hereinbefore described; and so on from time to time until the whole shall be paid; and no conveyance of any part of said lands shall be made until the same shall be paid for as provided in this agreement; but said company may make payments at earlier periods than those indicated, or pay the whole, principal and interest, and receive titles of tracts of land accordingly, if they shall so elect.

In witness whereof said Harlan has hereto affixed his name and the seal of the Department of the Interior of the United States, and the said Emigrant Company has also, by Franklin Chamberlin, a director of said company, thereto lawfully authorized by vote of said company, (copy whereof is hereto annexed,) and affixed the name and seal of said company the day and year first above written.

Executed in presence of—

W. PENN CLARKE.

JAMES HARLAN,
Secretary of the Interior.

[SEAL.]

AMERICAN EMIGRANT COMPANY,
By F. CHAMBERLIN,
Director and Attorney in fact.

HARTFORD, CONNECTICUT, *June* 6, *A. D.* 1868.

For value received, the American Emigrant Company, a corporation chartered and existing under the laws of the State of Connecticut, do hereby assign and transfer unto James F. Joy, of the city of Detroit, Michigan, all the right, title, claim, or interests which the said American Emigrant Company has in or to a certain contract made and entered into on the 30th day of August, eighteen hundred and sixty-six, with James Harlan, Secretary of the Interior, on behalf of the United States, for the sale of the Cherokee neutral lands, and do transfer to said James F. Joy the credit and benefit of the twenty-five thousand dollars which was paid to the Secretary of the Interior in trust for said Indians at the execution of said contract on the 30th day of August, eighteen hundred and sixty-six, and to be applied as a portion of the seventy-five thousand dollars named in article first of the modifications in the supplemental article to a treaty dated April 27, eighteen hundred and sixty-eight, signed by N. G. Taylor, commissioner, and others.

In witness whereof the American Emigrant Company has hereto, by the hand of George M. Bartholomew, president of said company, thereto duly authorized, duly affixed its name and seal the date and year first above written.

[SEAL.]

THE AMERICAN EMIGRANT COMPANY,
By GEO. M. BARTHOLOMEW,
President.

Witness:

J. B. GRINNELL.

[U. S. revenue five-cent stamp.]

The modifications made by the treaty of 1868 are

1st. That within ten days from the ratification of this supplemental article the sum of $75,000 shall be paid to the Secretary of the Interior as trustee for the Cherokee Nation of Indians.

2d. That the other deferred payments specified in said contract shall be paid when they respectively fall due, with interest only from the date of the ratification thereof.

This treaty was ratified by the Senate on the 6th day of June, 1868.

The "neutral lands" have been ascertained by the final and corrected statement to contain, exclusive of certain reservations, 794,053.71.

	Acres.
Of this there were awarded to settlers,	154, 395. 12

To James F. Joy, under his contract, by—

	Acres.
Patent dated October 31, 1868	108, 169. 71
Patent dated January 6, 1869	3, 491. 48

	Acres.	Acres.
Patent dated February 19, 1869.....	113,478.32	
Patent dated November 2, 1870.....	414,519.08	
		639,658.59
		794,053.71

Of the amount awarded to settlers 149,644.68 acres have been paid for and patented to them, realizing the aggregate sum of $286,948 19¼, leaving on the 1st November, 1870, 4,750.44 acres, appraised at $9,938 82, for which the Government is ready to issue patents to the settlers entitled when the purchase-money is paid.

For the part patented under the Joy contract he has paid to the Department in *full payment for the land*.....	$638,893 68
With interest on deferred payments amounting to.....	47,627 27
Total.....	586,520 95

The whole number of settlers on the 11th August, 1866, was ascertained to be 1,031. At the present time it is supposed there are about 2,500. Deducting the 1,031 who are provided for by the treaty of 1866, there remains about 1,500 who seek title from some source to their respective settlements. Of these, as stated by Mr. Joy, about 900 have taken title, or contracted for title from him. The balance, numbering about 600, are represented here by an agent who denies, on their behalf, the validity of all the action of the United States respecting these lands, for more than half a century, not only in its treaties, but in its contracts and patents, and asks Congress to declare them all to be null and void and of no effect.

It is respectfully submitted that this extraordinary position is wholly untenable. It is in direct conflict with the policy and practice of the Government from its earliest history. It contravenes the clearest decisions of the courts, and the fixed principles of equity and common justice, and would involve the Government in the most flagrant repudiation of its contracts and the violation of its plighted faith.

The title of the Cherokees, whether regarded as a treaty or patent title, or both, rests essentially upon the treaty of 1835, and either is amply sufficient. Both parties were fully competent to contract, and they did contract. As a treaty title it is precisely similar to that by which the United States holds the "Louisiana purchase," Florida, California, and Alaska. The patent title was merely cumulative, the title was perfect without it. The Indian tribes have been treated by the Government as distinct nationalities, and it is too late, as respects any past transaction, to reverse the action. It is for Congress, in the exercise of its political sovereignty, to say when they will cease to recognize the tribes as distinct powers and absorb them into the general mass of citizens. But until it is done, all departments must respect and abide by the contracts which have been made with them. The Government having realized the advantages of the contract, cannot repudiate its obligations. Such new policy for the future is reasonable and proper, but as applied to the past is full of repudiation and dishonor.

In Cherokee Nation *vs.* The State of Georgia, 5 Peters, 1, decided in 1831, the court say:

The Cherokees are a State. They have been uniformly treated as a State since the settlement of the country. The *numerous treaties* made with them by the United States recognize them as a people capable of maintaining the relations of peace and war, of

being responsible in their political character for any violation of their engagements or for any aggression committed on the citizens of the United States by any individual of their number. Laws have been enacted in the spirit of these treaties. *The acts of our Government plainly recognize the Cherokee Nation as a State,* and the courts are bound by those acts.

Treaties have been made with the Cherokees on November 28, 1785, October 2, 1790, July 22, 1791, November 17, 1792, October 24, 1804, October 25, 1805, October 27, 1805, January 7, 1806, July 8, 1807, September 11, 1807, March 22, 1816, July 8, 1817, September 27, 1819, May 6, 1828, February 14, 1833, December 29, 1835, September 19, 1846, August 11, 1866, June 10, 1868; and there are doubtless others which I have not cited. These with the Cherokees alone. There are innumerable treaties with other tribes, involving *the conveyance of land* and all the important and intricate questions of title, possession, and government which have arisen in the intercourse of the tribes with the people and Government of the United States.

To deny the power of the Government, and treat with the Indian tribes, and reciprocally to grant and receive conveyances of title, would be to unsettle the titles of whole provinces and states. If the Cherokee title be not valid, the same reasoning would invalidate the title of millions of acres in sections of the country now densely populated, and covered with towns and cities, and would be in the face of the whole current of judicial decisions.

In "Cherokee Nation *vs.* Georgia," before cited, it is expressly held that—

> The Indians are acknowledged to have an unquestionable and, heretofore, an unquestioned right to the lands they occupy, until that right shall be extinguished by a voluntary cession to our Government.

In the case of the Kansas Indians, (5 Wallace, 737,) it is held that "rules of interpretation favorable to the Indian tribes are to be adopted in construing our treaties with them."

In the same case, speaking of the Shawnees who *ceded their very valuable lands in Ohio to the United States* by the treaty of 1825, (7 Stat. L., 284,) and removed from them to the Shawnee reservation in Kansas, the court says:

> The well-defined policy of the Government demanded the removal of the Indians from organized States, and it was supposed at the time the country selected for them was so remote as never to be needed for settlement.

The court enforces the covenants of this treaty, and (p. 757) says:

> Their situation can only be changed by *treaty stipulation,* or a voluntary abandonment of their tribal organization. As long as the United States recognize their natural character they are under the protection of treaties and the laws of Congress.

A case not yet reported, but an abstract of which has been furnished, has been recently decided in Kansas, arising under the Kickapoo treaty made in 1862. This is a *small and insignificant band* of Indians.

The court says:

> It may seem to border very closely upon the ludicrous, if not the ridiculous, to see the Government of the United States gravely making a treaty with a few half-naked, half-starved savages, as though these savages were a great nation, and then have it claimed that the treaty thus made is a part of the supreme law of the land, paramount to any act of Congress and to any constitution or law of any of the States, and *yet no one at this day will question the power of the Government or validity of the treaty.*

But if it can be supposed that the action of Congress was necessary to the validity of the treaty, there is superabundant evidence of its legislative recognition. By the act of March 3, 1835, money was appropriated to defray the expenses which had been or might be incurred in any negotiations with the Cherokees. The treaty of 1835 was recog-

nized by Congress in 1836 by the act which appropriated $4,500,000—deducting $500,000 for the "neutral lands"—to carry out the treaty.

In 1845 appropriations were made to carry into effect the provisions of the treaty.

In 1845 appropriations were made of money to pay for valuations ascertained and reported by Upton and Sumney and other official assessors, as ordered by the commissioners under the treaty of 1835, (Stat. L., 673.)

In 1856 (Stat. L., 80) an act was passed appropriating $5,724 35 for payment of reservations, preëmptions, and rents, under the treaty of 1835.

From the making of the treaty down to the time of the breaking out of the civil war the Government maintained troops upon the land for the express and avowed purpose of fulfilling the treaty obligations of the United States to keep "settlers" off the land; and in almost every Congress acts have been passed to provide for expenses incurred in fulfilling the obligations of the treaty. No allegation is made that the Cherokees have not fulfilled their part of the contract.

Your committee believes that there is no sound distinction can be taken between the right of the Government to conclude treaties with Indian tribes, touching questions of internal policy and government, that does not equally include the right, both to receive and to convey parts of the public domain. It is difficult to see why, if the tribes ard nationalities at all, and if they are treaty powers, having rights ane possessions, which it is important the nation should possess, why other rights and other possessions, which the Government may advantageously exchange or sell, may not be the subject of reciprocal exchange or sale. No such distinction has yet been recognized by the courts, nor does any good reason appear to your committee why any should made.

But assuming for the argument that the Cherokee title, and those derived under it, are all void and of no effect, and that the lands are "public lands" of the United States, and subject to preëmption settlement, it would be equally unavailing to the intruding settlers.

Under the act of July 15, 1866, (p. 236,) every odd section for ten miles on each side of the railroad *would have become the property of the railroad company.*

The act provides, "that in case it shall appear that the United States, when the line of the road is definitely located, have sold any section or any part thereof granted under this act, or that the *preëmption or homestead settlement* has attached to the same, then it shall be the duty of the Secretary of the Interior to cause to be selected, for the purpose of filling up the grant from the public lands of the United States nearest to the sections granted, so much land as shall be equal to the amount of such lands so sold, reserved, or otherwise appropriated."

The road runs as near as may be through the center of the "neutral lands," which is only twenty-five miles wide. If the alternate sections along the line of the road were disposed of the Government would be bound to make up the quantity granted to the company out of the lands nearest to the road. North of the neutral lands there are no Government lands remaining; and the nearest sections of the neutral lands would be necessary to fill the grant. *All the sections* not confined to odd or even sections would be subject to the grant and pass by the act. It would follow that, if the Cherokee title be void, and the lands are Government lands, that the whole, or nearly so, of the "neutral lands" would pass to the railroad company, under the terms of the act granting it lands to aid in constructing the road.

Your committee, therefore, without further elaboration of the argument, conclude:

1. That the title to that portion of the "neutral lands" conveyed by the United States, by the several patents hereinbefore referred to under the contract with James F. Joy, is valid and indefeasible.

2. That the "settlers" who entered upon the neutral lands after the ratification of the treaty of 1866 are trespassers, who have no title which they can maintain against the patents issued pursuant to the contract with said James F. Foy.

All of which is respectfully submitted.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 6.

ENTRIES UNDER HOMESTEAD LAW.

[To accompany bill H. R. No. 2702.]

JANUARY 11, 1871.—Ordered to be printed.

Mr. JULIAN, from the Committee on Public Lands, made the following

REPORT.

The Committee on the Public Lands, to whom was referred the resolution offered by Mr. Ferry, directing said committee to inquire into the expediency of allowing every honorably discharged soldier who served ninety days in the late war for the Union to select one hundred and sixty acres of the public lands, and to receive a patent therefor at the end of five years without requiring an occupancy of the same, have had the subject under consideration, and now submit the following report:

That it is the duty of the Government to make its lands as productive as practicable, by devoting them to actual settlement and tillage, is a proposition which needs no argument. The humanity of this policy, in supplying homes for the greatest number of those who need them, is equally manifest. The Government is false to its trust, and makes itself the enemy of the people, when it sanctions or permits the monopoly of great bodies of the public domain, which its own landless citizens need for homesteads, and are anxious to make tributary to the public wealth. In the light of these obvious considerations, the proposition before the committee may readily be judged.

The history of military land bounties is instructive. More than seventy-three millions of acres in all have been appropriated for military and naval purposes, the effect of which has been far more ruinous to the country than beneficial to the soldier and seaman. The warrants issued for the lands granted were to be located only by the soldier. It was soon provided, however, that he might locate them by an agent, and, finally, they were made assignable. The Commissioner of the General Land Office says, that of the Mexican war bounty land warrants, the records of his office show that not one in five hundred of those issued and placed in the hands of the soldiers, or their heirs, has been located by them or for their use; and he estimates that not to exceed ten per cent. of them have been used by preëmptors, as assignees in payment for actual settlement, the remainder having gone into the clutches of the speculator. While the soldier was cheated out of his warrant, or sold it at a very low rate, the public domain, which should have been free to him and to all other poor men, has been absorbed by monopolists, who have fixed upon it such tariff as they could exact from those in search of homes. In none of our legislation on the subject of military bounties has there been any precaution taken against the monopoly of the soil, or in favor of the rights of settlers; and while the soldier has received little or no

benefit, the settlement and development of the country have been greatly retarded.

Is the proposition before the committee less objectionable than the legislation to which we have referred? The official estimate of the number of soldiers to be provided for, saying nothing of the heirs of those who have died, is two million two hundred and forty-five thousand six hundred and fifty-nine. Multiplying this by one hundred and sixty will give, as the aggregate of lands called for, three hundred and sixty-nine million three hundred and five thousand four hundred and forty acres. As the land is to be had simply for the asking, we may fairly suppose that all, or nearly all, would make their selections, so far as the extent and situation of the public domain would permit, and receive their patents at the end of five years. If one-half only should avail themselves of the privilege, it would require every acre of land which the Government could survey within the next twenty-nine years, at the rate our surveys are now progressing, thus fatally blocking up the grand march of civilization and settlement now in progress, and consigning the public domain to solitude, while the soldier, on receiving his patent, would be under no obligation to settle on his land, and might sell it to the sharks who would be lying in wait to take advantage of his poverty in driving a bargain. The sale of the public lands would cease, because the lands subject to sale would be absorbed. The homestead law would be nullified, under which, during the past year, three million six hundred and ninety-eight thousand nine hundred and ten acres were disposed of, thus adding twenty-three thousand one hundred and eighteen farms, of one hundred and sixty acres each, to the column of productive wealth. The preëmption law would become a dead letter, through the pressure for surveyed lands, and the check which would be given to railway extension, foreign emigration, and the progress of settlement in the most desirable portions of our frontiers. In a word, our land policy, which is working out such grand results, would be radically revolutionized in the interest of monopolists, who would lavish curses innumerable upon coming generations. In his late message the President well says, that "The remarkable growth and prosperity of our new States and Territories attest the wisdom of the legislation which invites the tiller of the soil to secure a permanent home on terms within the reach of all. The pioneer who incurs the dangers and privations of a frontier life, and thus aids in laying the foundation of new commonwealths, renders a signal service to his country, and is entitled to its special favor and protection. These laws secure that object, and largely promote the general welfare. They should, therefore, be cherished as a permanent feature of our land system." Fully agreeing with these views, we must decidedly protest against the policy proposed. The principle of settlement should be adhered to as a vital one. The measure before us is wanting also in equity, in giving to all soldiers, irrespective of the service rendered, the same bounty. This equity could only be properly provided for by a bounty in money, graded in amount according to the time of service, as prescribed in the bill which has repeatedly passed the House of Representatives, and as repeatedly been ignored in the Senate. We are in favor of such equalization of bounties. If land is what the soldier wants, he can have it now, on the easy terms of the homestead law. The committee, however, would gladly favor him by a just bounty in land in any manner that shall not surrender the wholesome policy of the Government in requiring the actual occupancy and tillage of the land appropriated. They are willing, therefore, to shorten the time of occupancy, and to discriminate in

his favor according to the term of his service, by allowing that term, whether long or short, to be counted as a part of the five years' settlement now prescribed by law. This advantage to the soldier over the civilian, while it would not abandon the existing policy of our laws, we believe would be just and well deserved; and the committee, therefore, respectfully report the following bill, being substitute for H. R. No. 2681, and for the various propositions which have been referred to them on the subject.

O

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 7.

CHARLES POMEROY.

[To accompany bill H. R., No. 2706.]

JANUARY 13, 1871.—Ordered to be printed.

Mr. W. B. WASHBURN, from the Committee of Claims, made the following

REPORT.

The Committee of Claims, to whom was referred the memorial of Hon. Charles Pomeroy, praying for the passage of a special act for the adjustment of his accounts with the Government, as late receiver of public moneys at Fort Dodge, in the State of Iowa, having considered the same, make the following report:

It appears, from a direct communication from the First Comptroller of the Treasury, dated December 15, 1870, that on a settlement of the accounts of the claimant for the 4th quarter of 1869, a balance was found due the United States of seven hundred and fifty-one dollars and ninety-three cents; and that by a further settlement made at the General Land Office, under date of 30th April, 1870, the claimant was credited with a warrant for eight hundred and eighty-six dollars and sixty-eight cents, thus overpaying his indebtedness in the sum of *one hundred and thirty-four dollars and seventy-five cents.*

There is no provision of law by which this balance, overpaid by the claimant and covered into the Treasury after his official term had expired and his accounts were closed, could be repaid, and without a special act the same must remain to the credit of the claimant, but locked up in the Treasury.

To correct this error, and to properly adjust the claimant's accounts, the committee report the accompanying bill, and recommend its passage.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 8.

HENRY A. MESSENGER.

[To accompany bill H. R. No. 2493.]

JANUARY 13, 1871.—Ordered to be printed.

Mr. W. B. WASHBURN, from the Committee of Claims, made the following

REPORT.

The Committee of Claims, to whom was referred the bill (H. R. No. 2493) for the relief of Henry A. Messenger, of Shelbina, Missouri, having considered the same, make the following report:

The bill provides that the Secretary of the Treasury shall issue to the claimant a duplicate of coupon bond No. 14033 for $1,000, payable in 1881, issued under the act of March 3, 1863, upon satisfactory proof being made to the Secretary of the destruction of the original bond, and upon satisfactory bond with sufficient surety being given by the claimant, indemnifying the United States against any loss resulting therefrom.

The claimant has submitted evidence of the purchase, ownership, and destruction of said bond by fire, through an accident to which any person might be subject. Additional evidence is submitted through his Representative in Congress, that the claimant is "of the highest respectability," and that "full reliance can be placed on his statements."

With the bill thus guarded by provisions which challenge the scrutiny of the officers of the Treasury to examine into all the facts of the loss and destruction of the bond, and to take ample security to indemnify the Government from loss, the committee are of opinion that it is but just and safe to provide the claimant with the relief, and therefore recommend the passage of the bill.

O

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 9.

JOHN C. McQUISTON AND JEREMIAH D. SKEEN.

[To accompany bill H. R. No. 2707.]

JANUARY 13, 1871.—Ordered to be printed.

Mr. HOLMES, from the Committee of Claims, made the following

REPORT.

The Committee of Claims, to whom was referred House bill (No. 235,) for the relief of John C. McQuiston and Jeremiah D. Skeen, of Indiana, beg leave to report:

That it appears from the evidence before the committee that John C. McQuiston was the provost marshal of the fourth district of Indiana in the years 1863 and 1864, and that Jeremiah D. Skeen was his deputy; that under an order from General Baker, provost marshal of the State of Indiana, and of General Wilcox, commanding in that department, Jeremiah D. Skeen, as the deputy provost marshal, on the 30th day of July, 1863, arrested one Jerome Huntington for attempting to appropriate to his own use a horse belonging to the United States, left in the county of Ripley, Indiana, by the forces of General Hobson, when in pursuit of Morgan's forces through the State of Indiana. Huntington sued McQuiston and Skeen in the Ripley circuit court for false imprisonment, and on the request of General Baker, the War Department assumed the defense of the action, and on application being made by the attorney defending the case to transfer the case to the circuit court of the United States, and overruled, the attorney, relying on the sufficiency of the application for the transfer of the case, declined to make any further defense, and a judgment was rendered against McQuiston and Skeen for $2,000, and they have been compelled to satisfy the judgment.

It is very clear that the acts on which this judgment was founded were performed under the orders of General Baker and General Wilcox, which McQuiston and Skeen were bound to obey; that the Government assumed the defense of the case, and that McQuiston and Skeen ought to be indemnified for the loss sustained.

The committee, therefore, recommend the passage of the accompanying bill.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 10.

HENRY CLAY WILLIAMS.

JANUARY 13, 1871.—Ordered to be printed.

Mr. A. COBB, from the Committee of Claims, made the following

REPORT.

[To accompany bill H. R. No. 2666.]

The Committee of Claims, to whom was referred the bill (H. R. No. 2666) for the relief of Henry Clay Williams, late receiver of public moneys at Eau Claire, Wisconsin, having considered the same, report:

This bill appropriates the sum of three hundred and twenty-eight dollars and ninety-nine cents, an amount due the claimant as receiver, being the balance of a deposit made by him to the credit of the United States Treasurer, and covered into the Treasury over and above the amount which was due from, and which should have been paid by, said receiver to the United States. This was an error on the part of the receiver and remains to his credit in the Treasury, as appears from a letter from the First Comptroller of the Treasury, dated 4th January, 1871; but having been covered into the Treasury, the same cannot now be restored without the authority of a special act of Congress.

The committee therefore report back the bill and recommend its passage.

O

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 11.

WILLIAM M. HENRY.

[To accompany bill H. R. No. 2711.]

JANUARY 13, 1871.—Ordered to be printed.

Mr. J. H. MOORE, from the Committee of Claims, made the following

REPORT.

The Committee of Claims, to whom were referred the memorial and evidence of William M. Henry, of Hawkins County, Tennessee, late second lieutenant of Company E, First regiment of Tennessee volunteer cavalry, having considered the same, make the following report:

The claimant enlisted as a private soldier of his company and regiment on the 2d March, 1862, and was made first sergeant on the 2d June following, doing duty as such until the 6th August, 1863, when he claims to have been promoted to second lieutenant, and to have performed military service without being mustered in as an officer to 11th April, 1865, when he was regularly mustered out and paid as a private soldier.

The claimant shows that he made application and efforts on two occasions to be mustered in as an officer, but that it was delayed and postponed, through no fault of his, until his duties precluded him from so doing, and now asks, in view of his actual services, the passage of a special act providing for his pay as an officer.

The committee find, on thorough examination of the circumstances of this claim, that Lieutenant Henry performed military services as stated, that he was never mustered as an officer, probably through his own ignorance of his rights and the gross neglect of other officers of their duties, and that he was commissioned by the governor of Tennessee on the 13th of August, 1864, a year after he claims to have been promoted. This is the date at which he should have been mustered. He could only become an officer by virtue of the commission, and it was not competent to antedate the legal effect of either the commission or muster, so as to change the regulations and expenditures of the volunteer forces of the Army. This view is in conformity to the spirit of the general act of July 11, 1870, "for the relief of certain officers of the Army," and which provides that "the person to whom the commission shall have issued shall be considered as commissioned to the grade named therein, from the date when the commission was issued by competent authority, and entitled to all pay and emoluments as if actually mustered at that date."

While it does not appear that the claimant was at any time a prisoner in the hands of the enemy, or in hospital from wounds received in battle, or that he performed any extraordinary act of bravery, the committee can only recommend that he be paid as an officer from the date of his commission, the date at which the State authorities of Tennessee thought proper to promote him, deducting therefrom his pay as a soldier, and for that purpose report the accompanying bill, and recommend its passage.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 12.

CHEROKEE NEUTRAL LANDS IN KANSAS.

[To accompany bill H. R. No. 1074.]

JANUARY 13, 1871.—Ordered to be printed and recommitted to the Committee on Indian Affairs.

Mr. SHANKS, from the minority of the Committee on Indian Affairs, submitted the following report:

MINORITY REPORT

OF

The Committee on Indian Affairs, to whom was referred bill (H. R. No. 1074) "*to dispose of the Cherokee neutral lands in Kansas to actual settlers only,*" *submitted the following report:*

That what is known as the "Cherokee Neutral Lands" is a tract of near 800,000 acres, (the exact area of the Cherokee neutral lands is $799{,}615\frac{18}{100}$ acres,) situated in the southeast corner of the State of Kansas, lying in an oblong shape, bordering on the State of Missouri, and near to the Indian Territory, extending in length north and south fifty miles, and in width twenty-five miles. It is a desirable tract, having a good soil and being well watered. It was originally occupied by the Osage Indians, as was all that country lying west of the Mississippi, north of the Red, and south of the Kansas Rivers, and extending westwardly.

This tract of 800,000 acres was purchased by the United States from the Osages by treaty of June 2, 1825. It was designated as a neutral ground, on which neither whites nor Indians should settle or remain. It was intended as a barrier between the white people of the State of Missouri on the one hand and the Osage Indians on the other, and took its name, "Neutral Lands," from the character of this guarantee. Its proper cognomen was Osage Neutral Lands, but, having been, under the treaty of 1835, included in the patent of 1838 to the Cherokees, with the land they now hold in the Indian Territory, it is now called the "Cherokee Neutral Lands," and is so denominated in this bill.

This tract of 800,000 acres forms two counties and part of a third county in the State of Kansas, and has for a number of years been settled by white people. The first white settlement was made on it about the year 1857.

As early as November 29, 1859, the attention of the Interior Department was directed to these settlements. The records of the office of the Commissioner of Indian Affairs show that there were one thousand and thirty-one families settled on this land on the 11th of August, 1866, and who were recognized by the Government as actual settlers. Many have made settlements there since.

Your committee believe, from the best information they have, that there are now three thousand five hundred families, or nearly eighteen thousand persons, settled there, improving the land and desiring to make it their permanent home.

These settlers claim their right to take a title to their several homes on this land under the preëmption laws of the United States. They

are, however, prevented from so doing by an illegal and unjust transfer of this entire tract of 800,000 acres, (excepting that occupied by the above-named one thousand and thirty-one families of white settlers,) recognized as such on August 11, 1866, to one James F. Joy, by O. H. Browning, then Secretary of the Interior.

Your committee cannot characterize this transaction, by which these lands were nominally sold to this man Joy, by any term less emphatic than "illegal and unjustifiable." This transaction will be fully discussed in the subsequent pages of this report, and its duplex character brought to the attention of the House. Your committee now call particular attention to the following history of the title to this land, and ask a careful consideration of this entire report by each member of the House.

This land is a part of what is known as the Louisiana purchase, which was ceded to the United States Government by France, by treaty of April 30, 1803, the first article of which reads as follows:

ARTICLE 1. Whereas by the third article of the treaty concluded at St. Ildefonso, the 9th Vendemiaire, an. 9, (1st October, 1800,) between the First Consul of the French Republic and his Catholic Majesty, it was agreed as follows: "His Catholic Majesty promises and engages, on his part, to cede to the French Republic, six months after the full and entire execution of the conditions and stipulations herein relative to his Royal Highness the Duke of Parma, the colony or province of Louisiana, with the same extent that it now has in the hands of Spain, and that it had when France possessed it, and such as it should be after the treaties subsequently entered into between Spain and the other States; and whereas, in pursuance of the treaty, and particularly of the third article, the French Republic has an incontrovertible title to the domain and to the possession of the territory, the First Consul of the French Republic, desiring to give to the United States a strong proof of his friendship, doth hereby cede to the said United States, in the name of the French Republic, forever, and in full sovereignty, the said territory, with all its rights and appurtenances, as fully, and in the same manner, as they have been acquired by the French Republic in virtue of the above-mentioned treaty, concluded with his Catholic Majesty."

Of which possession was taken by the President, by authority of special act of Congress of October 31, 1803, (U. S. Statutes, vol. 2, p. 245;) it being the custom to await action touching new territory purchased by the Government until Congress directed by law that possession should be taken, thus showing its assent to the terms of the treaty.

Such was the title received by the United States from France to the "Louisiana Territory," which Territory comprised the present States of Minnesota, Iowa, Nebraska, Kansas, Missouri, Arkansas, and Louisiana, with the present Territories of Dakota, Indian Territory, &c.

Our title to all lands in these States and Territories has, for its foundation, this cession by France to the United States, and on which the Indians have only been recognized as holding title by occupancy, subject to removal at the pleasure of the Government. The United States found a large area of this Louisiana purchase occupied by the Osage Indians, a part of which was the tract of land now under consideration.

The Indian right of occupancy to this tract of near 800,000 acres, and other lands, as above stated, was extinguished by treaty with the Osage Indians, of June 2, 1825. (See treaty, art. 1, U. S. Statutes, vol. 7, p. 240.)

On the 28th day of May, 1830, Congress passed "An act to provide for an *exchange* of lands with the Indians residing in any of the States or Territories, and for their removal west of the river Mississippi."

SECTION 1. *Be it enacted, &c.*, That it shall and may be lawful for the President of the United States to cause as much of any territory belonging to the United States west of the river Mississippi, not included in any State or organized Territory, and to which the Indian title has been extinguished, as he may judge necessary, to be divided into a suitable number of districts, for the reception of such tribes or nations of Indians as may choose to exchange the lands where they now reside, and remove there;

and to cause each of said districts to be so described by natural or artificial marks as to be easily distinguished from every other.

Section 3 is as follows:

And be it further enacted, That in the making of any such exchange or exchanges, it shall and may be lawful for the President solemnly to assure the tribe or nation with which the exchange is made, that the United States will forever secure and guarantee to them, and their heirs or successors, the country so exchanged with them; and if they prefer it, that the United States will cause a patent or grant to be made and executed to them for the same: *Provided always*, That such lands shall revert to the United States if the Indians become extinct or abandon the same.

By the treaty with the Cherokees west of the Mississippi, of May 6, 1828, and the supplemental treaty of February 14, 1833, correcting the boundaries of the grant of 1828, (see U. S. Statutes, vol. 7, pp. 311 and 414,) the United States guaranteed and secured, to be conveyed by patent to the Cherokee Nation of Indians, 7,000,000 acres of land now mainly included in the Indian Territory; both of which treaties, however, were made without authority of law, but which were afterward, by treaty of December 29, 1835, corrected and adapted to the provisions of the law of Congress of May 28, 1830, above quoted, "To provide for an *exchange* of lands with the Indians residing in any of the States or Territories, and for their removal west of the river Mississippi." By the terms and provisions of the treaty of the 29th day of December, 1835, concluded at New Echota, in the State of Georgia, between the United States and the chiefs and headmen and people of the Cherokee tribe of Indians, it is stipulated that the grant of 7,000,000 acres of land made to the Cherokee Nation, by treaty of May 6, 1828, and of February 14, 1833, shall conform to the very restrictive limitations of that statute, to which this treaty subjects and conforms these two former treaties, and, in addition, guarantees, (see article 2:)

A perpetual outlet west, and a free and unmolested use of all the country west of the western boundary of said seven million acres, as far west as the sovereignty of the United States and their right of soil extends. * * And whereas it is apprehended by the Cherokees that in the above cession there is not contained a sufficient quantity of land for the accommodation of the whole nation on their removal west of the Mississippi, the United States, in consideration of the sum of five hundred thousand dollars, therefore, hereby covenant and agree to convey to the said Indians and their descendants, by patent in fee-simple, the following additional tract of land situated between the west line of the State of Missouri and the Osage reservation, beginning at the southeast corner of the same, and runs north along the east line of the Osage lands, fifty miles, to the northeast corner thereof; and thence east to the west line of the State of Missouri; thence, with said line, south fifty miles; thence west to the place of beginning—estimated to contain eight hundred thousand acres of land.

Article 3 reads:

The United States also agree that the lands above ceded by the treaty of February 14, 1833, including the outlet and those ceded by this treaty, shall all be *included in one patent executed to the Cherokee Nation of Indians by the President of the United States, according to the provisions of the act of May 28*, 1830. (U. S. Statutes, vol. 7, p. 478.)

On the 31st day of December, 1838, a patent was issued to the Cherokees under the above treaty and law, the granting clause of which is in the following words:

Therefore, in execution of the agreements and stipulations contained in the said several treaties, the United States have given and granted, and by these presents do give and grant, unto the said Cherokee Nation the two tracts of land so surveyed and hereinbefore described, containing in the whole 13,374,135$\frac{14}{100}$ acres, to have and to hold the same, together with all the rights, privileges, and appurtenances thereunto belonging, to the said Cherokee Nation forever, subject, however, to the right of the United States to permit other tribes of red men to get salt on the salt plain on the Western Prairie, referred to in the second article of the treaty of the twenty-ninth of December, one thousand eight hundred and thirty-five, which salt plain has been ascertained to be within the limits prescribed for the outlet agreed to be granted by said article, and subject

also to all the other rights reserved to the United States in and by the articles hereinbefore recited, to the extent and in the manner in which the said rights are so reserved, and subject also to the condition provided by the act of Congress of the 28th of May, 1830, and which condition is, "that the lands hereby granted shall revert to the United States if the said Cherokees become extinct or abandon the same."

The tract of 800,000 acres, described in article second of the above-cited treaty of December 29, 1835, is the particular land under consideration in this report, and intended to be covered by this bill, and is, for the first time, mentioned in this treaty of 1835.

The Indian title to this land is only that of occupancy. The treaty of May 6, 1828, and supplemental treaty of February 14, 1833, are much broader in their terms to the grant of 7,000,000 acres, and to the outlet, than is this one of December 29, 1835, to this tract. The title which the Cherokee Indians held to their lands in Georgia, which were, under the law of Congress of May 28, 1830, put in force by this treaty of December 29, 1835, *exchanged* for this 7,000,000 acres, and the outlet and this tract, was only a title of occupancy. This was decided by the Supreme Court of the United States in three several cases, Johnson *vs.* McIntosh, (8 Wheaton, pp. 574, 578, 579, 580, 583, 584, 585, 586, 587, and 588,) in the year 1823, when the Cherokee title to lands in Georgia, and the character of the Indian title to lands in the United States, was ably discussed and settled, Chief Justice Marshall rendering the decision; in the cases of Cherokee Nation *vs.* State of Georgia, (5 Peters, p. 48, A. D. 1831,) and Worcester *vs.* State of Georgia, (6 Peters, p. 580, A. D. 1832.)

We may consider the law as definitely settled, that no *tribe* of Indians has held or does hold a title in fee, or absolute title, in any land within the jurisdiction of the United States.

The law of Congress of May 28, 1830, which stands unrepealed, and limits the reversion of all titles to lands ceded to or exchanged with *Indian tribes* to the United States, conditioned upon the abandonment of the land, or the extinction of the Indians, and thus prohibiting the transfer (as that would work an abandonment) by them of their right to any other persons, is in strict accordance with these decisions of the Supreme Court.

The law-making power and the judiciary have both passed upon and settled this question; and when we consider that the treaty of December 29, 1835, by which this tract of eight hundred thousand acres was ceded to the Cherokees, specially provides that "the provisions of the act of May 28, 1830," shall control the cessions made and those confirmed by this treaty, it leaves no room for a doubt that the Cherokee Indians held only a right of occupancy, with reversion to the United States, and without power to sell or authorize the sale to any other person.

The proviso in section 3 of the law of Congress of May 28, 1830, is as follows:

Provided always, That such lands shall revert to the United States if the Indians become extinct or abandon the same.

If by their title the Cherokees were to hold this land until they became "extinct," they could sell the life estate of their tribe, determinable when they became extinct. But the provision is much closer. It is, "or abandon the same." Their disposition of the title abandons the land and works a reversion to the United States; and it makes no difference to whom their right of possession is sought to be conveyed, whether to the United States, which makes perfect its title, or to another, which would simply divest the Indians of their title; for in

either case the abandonment surrenders their title to the Government, and the title becomes absolute and unencumbered in the United States, subject to all the laws of the United States, including the laws of pre-emption.

Your committee are of the opinion that any voluntary disposition of the right of occupancy by the Cherokee Nation of Indians works an abandonment, and, if with an enemy at war with the Government of the United States, a forfeiture of all right to any interest in the land under consideration. Your committee further believe that the title having been merged in or forfeited to the United States, the Executive, with the advice and consent of the Senate, without special power from Congress, cannot by treaty restore that right to the Cherokee Indians, or pass it to any other person; and that any act of the Cherokee Nation of Indians subsequently had with or without conjunction with the treaty-making power of the United States is futile; that there is no power in the Government, aside from Congress, that can dispose of the public lands; and hence the title to these neutral lands is in the Government, for the reason that the Cherokee Nation of Indians voluntarily, by treaty made October 7, 1861, at Talequa, their capital, with the Confederate States of America, represented by Albert Pike, its commissioner, with plenary powers, entered into "an alliance offensive and defensive," by which the Cherokee Nation of Indians acknowledged itself "to be under the protection of the Confederate States of America," then at war with the United States, in which the Cherokee Nation gives its "full, free, and unqualified assent" to the acts of the confederate congress "approved the 24th day of May, 1861, whereby it was declared that all reversionary and other interest, right, title, and proprietorship of the United States in, unto, and over the Indian country in which that of the Cherokee Nation is included, should pass to and vest in the Confederate States," &c. (Section 5, treaty.)

And in the forty-seventh article of the same treaty it is agreed that, if this tract of 800,000 acres should be lost to the Cherokees by the fortunes of war, "the Confederate States of America do assure and guarantee to the Cherokee Nation the payment therefor of the sum of five hundred thousand dollars, with interest thereon, at the rate of five per cent. per annum, from the said 29th day of December, A. D. 1835."

And in the forty-eighth article of the same treaty "the Confederate States do hereby agree to advance to the said Cherokee Nation, immediately after the ratification of this treaty, on account of the said sum to be paid for the said land mentioned in the preceding article, the sum of one hundred and fifty thousand dollars, to be paid to the treasurer of the Cherokee Nation;" and to hold other funds invested for said Cherokees for the same purposes. This was an abandonment of the land, and no act of the President or Senate could restore it to the Cherokee Nation of Indians; and, in fact, they did not attempt to do so in affirmative words.

Your committee further believe that if for any *cause or excuse* the title of occupancy still remained in the Cherokee Nation after their treaty with the Confederate States of America, even in that case the treaty with the United States of August 11, 1866, worked the voluntary surrender to the Government under the proviso of the act of May 28, 1830, and the conformatory provision of the treaty of 1835; and that no assumed conveyance in trust can avail to retain the title or controlling interests in the land in the Indians, as against the claim to perfect title in the United States, and the settlers on these lands who hold

under the several acts of Congress extending the preëmption laws over them.

Your committee are of the opinion that if the preëmption laws of the United States operated to the protection of one thousand and thirty-one families settled on this tract, they must have necessarily extended over the remainder of the tract, and, being an act of Congress, could not be removed by a treaty, which is only an executive contract, having the advice and consent of the Senate.

The *rights* of American citizens, *vested under law*, cannot be *divested* by *executive contract* without their consent. It is at least doubtful whether a treaty could be made under the provisions of our Constitution and become binding as such between the Government and the mere occupants of its soil situated within its territorial limits, and subject to its laws; and most certainly not as against a law of Congress in force, or of rights acquired under such law.

"The Congress shall have the power to dispose of the territory and other property of the United States." Congress "shall consist of a Senate and House of Representatives." Treaties, to give them binding force, can only be made "under the authority of the United States."

The President has power, "by and with the advice and consent of the Senate, to make treaties;" but they only become law when made "under the authority of the United States."

There was no law for this treaty of 1866, or the supplemental treaty of June 10, 1868; and they are not valid only so far as they indicate the intention of the parties to surrender to the Government their occupancy of the land. The power to dispose of the public lands cannot rest in two powers at the same time.

The treaty of December 29, 1835, was made under the authority of the law of May 28, 1830; and, in so far as it conformed to that law, is binding and valid. Neither the treaty made under the law, nor the patent executed in conformity to the treaty, can transcend the terms, scope, and purpose of the law.

Congress alone has power to "dispose of," and no strength is given the treaty-making power, by conjunction with the Indians, to "dispose of the territory or other property of the United States," and thus do, by a joint action between the Executive and an Indian tribe, what the Executive could not, with the advice and consent of the Senate, do without the tribe.

It is a dangerous precedent to set, that the treaty-making power and Indian tribes may dispose of our territories to corporations or to individuals. An exercise of the same power could sell our domain to foreign nations.

To acknowledge the power in the treaty-making power of the Government, without law of Congress, to sell the public domain, would authorize the President, by and with the advice and consent of the Senate, by treaty, to sell Alaska, or any territory we own, to the Indians residing there; and, with or without their conjunction, dispose of the whole territory to an individual or corporation, and the people effectually denied the right to be heard through their Representatives.

By treaty of August 11, 1866, the Cherokee Indians undertook to cede these neutral lands back again to the United States. Article 1 of this treaty declares the treaty between the Cherokee Indians and the Confederate States of October 7, 1861, "to be void;" but the treaty contains no express stipulation that the forfeited right to these lands should be restored, and it was not.

Article 17 of that treaty is as follows, (U. S. Statutes, vol. 14, p. 804:)

The Cherokee Nation hereby cedes, in trust, to the United States the tract of land in the State of Kansas which was sold to the Cherokees by the United States under the provisions of the second article of the treaty of 1835, and also that strip of land ceded to the nation by the fourth article of said treaty which is included in the State of Kansas; and the Cherokees consent that said lands may be included in the limits and jurisdiction of the said State.

The lands herein ceded shall be surveyed as the public lands of the United States are surveyed, under the direction of the Commissioner of the General Land Office, and shall be appraised by two disinterested persons, one to be designated by the Cherokee national council, and one by the Secretary of the Interior, and, in case of a disagreement, by a third person, to be mutually selected by the aforesaid appraisers; the appraisement to be not less than an average of one dollar and a quarter per acre, exclusive of improvements.

And the Secretary of the Interior shall, from time to time, as such surveys and appraisements are approved by him, after due advertisements for sealed bids, sell such lands to the highest bidders, for cash, in parcels not exceeding one hundred and sixty acres, and at not less than the appraised value: *Provided*, That whenever there are improvements of the value of fifty dollars made on the lands, not being mineral, and owned and personally occupied by any person for agricultural purposes at the date of the signing hereof, such person so owning and in person residing on such improvements shall, after due proof, made under such regulations as the Secretary of the Interior may prescribe, be entitled to buy, at the appraised value, the smallest quantity of land in legal subdivisions, which will include his improvements, not exceeding in the aggregate one hundred and sixty acres; the expenses of survey and appraisement to be paid by the Secretary out of the proceeds of sale of said land: *Provided*, That nothing in this article shall prevent the Secretary of the Interior from selling the whole of said neutral lands in a body to any responsible party, for cash, for a sum not less than eight hundred thousand dollars.

The above was amended as follows:

Amendment 2. Strike out the last proviso in article 17, and insert in lieu thereof the following: "*Provided*, That nothing in this article shall prevent the Secretary of the Interior from selling the whole of said lands not occupied by actual settlers at the date of the ratification of this treaty, not exceeding one hundred and sixty acres to each person entitled to preëmption under the preëmption laws of the United States, in a body, to any responsible party, for cash, for a sum not less than one dollar per acre.

Your committee would submit that the Secretary of the Interior is an officer of the United States; that his duties are defined and imposed upon him by acts of Congress; and that the treaty-making power is not competent to add to or to take from his duties; that it was not possible for the treaty-making power to confer on him the duplex character of an officer "for and in behalf of the United States" and of "trustee for the said Cherokee Nation of Indians;" that if a trustee was to be appointed to dispose of these lands, such an appointment could only be made by Congress, as the only possible source of the power to do the thing which the trustee purports to have been appointed to do.

Assuming to act under this treaty of August 11, 1866, but in violation of one of its important provisions, which was to sell "in a body" "the whole of said lands not occupied by actual settlers," without "due notice" having been previously given, a contract was made and entered into, on the 30th day of August, 1866, by James Harlan, then Secretary of the Interior, on the one part, and H. Chamberlain, director and attorney-in-fact for the American Emigrant Company, on the other part, (a corporation said to have been chartered and existing under the laws of the State of Connecticut,) "for the sale of the so-called 'Cherokee Neutral Lands,' in the State of Kansas, containing eight hundred thousand acres, more or less." These were only *a part of the lands ceded* by said treaty of August 30, 1866.

James Harlan passed out of office within forty-eight hours after this attempted sale, a fact worth remembering in this investigation. On the opinion and advice of Attorney General Stanbery, of October 4, 1866, Harlan's attempted sale of these lands to the American Emigrant Com-

pany was, on the 20th of October, 1866, held to be null and void, and Mr. Chamberlain duly notified thereof by Harlan's successor in office, Orville H. Browning; and on the 9th day of October, 1867, Secretary Browning, without official notice or authority of law, entered into a contract for the sale of these same lands to James F. Joy, of Detroit, Michigan. There was no official notice given of an intention to make a sale of these lands by Secretary Browning.

These are most remarkable transactions. They were followed to their consummation with whatever lasting effect the official relation of their actors to the Government at the time of their commission gave them. It becomes our duty to carefully and faithfully examine and present the facts to Congress for its consideration and correction.

The attempt by treaty of 1866 to restore the forfeited rights of the Cherokees to the neutral lands was as unjust in pupose as it was impossible by the parties that undertook it, and proved its fallacy in its total want of a positive provision in the treaty to that effect; the parties to that treaty seem to have avoided raising the question of power by simply assuming what they did not declare in words. The novel and ill-advised provision in the seventeenth article of the treaty of 1866, authorizing the sale of "the whole of said lands in a body to any responsible party," which was this neutral land, 779,615$\frac{18}{100}$ acres, and the Cherokee strip of ——— acres, making ——— acres, carries on its face a lack of official good faith that becomes evident and ripens into positive proof when we learn that these lands were then, and had been for years, diligently sought, and even claimed, by the people for actual settlements. Thousands of settlers were then on and claimed them under the preëmption laws of Congress. It was well known to the Interior Department that this was one of the sources of trouble to the perpetrators of this fraud. This provision in the treaty of 1866 was evidently made in the interest of speculation, and to defeat the settlement of these valuable lands by the people under the preëmption laws. It is one of a series of transactions of this kind running from May 30, 1860, to this of August 11, 1866, and marks that period as an exception in the management of Indian affairs, and in which the same operators are found with singular uniformity. This treaty was proclaimed August 11, 1866, and Mr. Harlan sold this tract, near 800,000 acres, on the 30th of the same month to the Emigrant Company, and surrendered his office on the 1st of September, two days after. The sale was made within nineteen days after the confirmation of the treaty, and without public notice, while the treaty required "due advertisement" to be given by the Secretary of the Interior, which Harlan then was. Four other treaties, equally bad in their character, have been made since, but the present administration does not ask their confirmation, and has prevented it. Under the provisions of that treaty the lands should have been sold, after due advertisement for sealed bids, at not less than $1 per acre of the entire land ceded, or an average of $1 25, if sold in parcels. The sale of part of the lands ceded was an error, and violates the treaty conditions, because the minimum price was put at $1 per acre if sold in a body, or not less than an average of $1 25 if sold in parcels, for the reason that a portion of the Cherokee strip runs into the sand plains, and is comparatively valueless, and that fact entered into the considerations and stipulations of the treaty.

Mr. Harlan sold the neutral lands to the Emigrant Company on a long credit, while the treaty provided a sale for cash. And for this informality the Attorney General, on application of Harlan's successor for his opinion, decided the contract to be null and void, and the Department, in conformity with his instructions, declined to carry out the contract made

by Harlan, and so advised the company's agent. Evidently, for these among other reasons, the sale to the Emigrant Company was void and of no effect or validity from the beginning.

It is difficult to see the virtues of this transaction. The sale of August 30, 1866, by Harlan, to the Emigrant Company was, by Attorney General Stanbery, on October 4, 1866, held to be null and void, for non-compliance with the provision of the treaty of August 11, 1866, under which it was professedly made, in that it was a sale on long credit, while the treaty provided only for sales for cash.

Secretary Browning, who submitted this question, accepted the Attorney General's opinion and acted under its advice, and in his official capacity, on the 20th day of August, 1866, declared Harlan's sale to the Emigrant Company to be null and void, and for the time at least saved near 800,000 acres of public land, including many homes of laboring men, from private speculation.

There are many other as cogent reasons why the sale was void, which were not submitted to the Attorney General, and hence never passed upon.

How long Secretary Browning retained this opinion does not appear of record, and cannot be deduced from the facts; but on the 9th day of October 1867, something over eleven months after he declared the sale by Harland void, he undertook to make one of the same lands to James F. Joy, of Detroit, Michigan. But he, too, violated the provisions of the treaty of 1866. He gave no official or "due advertisement" of an intention to sell. He did not sell "all of said lands in a body," as the Cherokee strip was not included. He did not sell under "sealed bids," as the treaty contemplates. The best explanation of what he did do may be ascertained from the official statement that he himself made to the House, (see Ex. Doc. No. 85, second session fortieth Congress,) as follows:

> I suggested and urged, at the last session of Congress, that the United States should become the purchaser at one dollar per acre, and issue bonds in payment thereof. Such a proposition was, I believe, submitted to Congress, but not accepted.
>
> After the adjournment of Congress I authorized an unofficial statement to be made in newspapers that the proposals for the purchase of said lands in a body would be received at the Department until the 1st of October.
>
> Early in October Mr. James F. Foy, of Detroit, Michigan, proposed to take the lands in a body at $1 per acre, and pay the cash for them.
>
> No other offer was made. I accepted Mr. Joy's, and concluded a contract with him, from which all lands occupied by actual settlers at the date of the ratification of the treaty were excluded. A copy of the contract is herewith furnished.

There were no bids under this "unofficial statement in newspapers." But he further says that "early in October, J. F. Joy, of Detroit, Michigan, proposed to take the lands at $1 per acre and pay the cash for them." There was no attempt by either Harlan or Browning to sell in parcels to settlers, or purchase under sealed bids, as provided by the treaty, or official notice for competition in bids for the whole in a body.

Mr. Browning in this letter says that he suggested and urged at the last session of Congress that the United States should become the purchaser, and to issue bonds in payment thereof. Now, if there was any virtue in the treaty, it demanded cash for the lands. And Secretary Browning did not officially recommend to Congress such purchase, as stated in his letter. The United States was then a trustee, and the trust with Browning as a public officer; and the first condition of the trust was to sell the land in parcels, after survey, appraisement, and due advertisement; and it was so notorious that the lands were desired by the people that it became necessary to acknowledge the actual settlement on the lands of one thousand and thirty-one families. If Secretary

Browning had desired to do so, the door was open to sell these lands to the people, and not encumber the Government with the "issue of its bonds," as the people were anxious to pay the cash for the land.

It is difficult to see with what propriety the United States can first voluntarily become a trustee by the terms of a treaty for the sale of real estate for the Cherokees, and then become the purchaser of the lands held by it in trust. There is no court responsible for its decisions that would allow a trustee to become a purchaser of the trust estate; and if the treaty of 1866, by which this trust was attempted to be created, was good, the advice which Mr. Browning *says* he gave the Government, to purchase these *trust* lands by the issue of its bonds, was certainly bad.

The following is the contract between Secretary Browning and J. F. Joy:

This agreement, made and entered into this ninth day of October, in the year of our Lord one thousand eight hundred and sixty-seven, by and between Orville H. Browning, Secretary of the Interior, and James F. Joy, of the city of Detroit, in the State of Michigan, witnesseth: Whereas, by the seventeenth article of a treaty between the United States of America and the Cherokee Nation of Indians, made and concluded on the nineteenth day of July, A. D. 1866, and proclaimed on the eleventh day of August in said year, and the two several provisos to the said section annexed, there were ceded in trust to the United States certain parcels of land therein mentioned, with power to the Secretary of the Interior to sell all of the said ceded lands, with the exception of such parts thereof as are embraced within the tenor and effect of the said two provisos to the seventeenth article of said treaty, for cash, for the sum of not less than one dollar per acre; and whereas the said James F. Joy has proposed to become the purchaser of said lands, and has for that purpose offered to pay therefor the sum of one dollar per acre in cash, which is, in the opinion of the Secretary of the Interior, an eligible and satisfactory price for the same; and whereas the quantity of land embraced within the exception as aforesaid is as yet unascertained, by reason whereof the number of acres of said ceded lands which the Secretary of the Interior is authorized to sell in the manner and at the price aforesaid remains for the present unknown:

Now, therefore, I, Orville H. Browning, Secretary of the Interior, acting for and on behalf of the United States, and by virtue of the power upon me by the said treaty in that behalf conferred, do hereby agree, to and with the said James F. Joy, to sell unto him, his heirs and assigns, all of the hereinbefore-mentioned lands, which were by the seventeenth section of said treaty ceded in trust to the United States, with the exception of such parts thereof as are embraced within the tenor and effect of the said two provisos to the seventeenth section of said treaty, and which parts of said ceded lands are not included in this contract, at and for the sum of one dollar per acre in cash, payable and to be paid as soon as the number of acres hereby contracted to be sold is ascertained; and that on the full payment of the said purchase-money a patent or patents shall be in due form issued, granting the same unto the said James F. Joy, his heirs and assigns: *Provided, however*, That this contract is made subject to the rights reserved by the nineteenth article of said treaty to such of the Cherokees as, being heads of families, resided, at the date of the ratification of said treaty, on any of the said ceded lands.

And the said James F. Joy hereby, on his part, agrees to pay unto the Secretary of the Interior, or to such other officer of the Government of the United States as may be authorized to receive the same, the sum of one dollar in cash for each acre of land by this instrument contracted to be sold, as soon as the number of said acres shall be ascertained, and also to pay, for the benefit of such of the Cherokees as, being heads of families, resided on any of the said ceded lands at the date of the ratification of said treaty, and desire to remove from the same, the value of their improvements thereon reserved to them by the nineteenth article of said treaty, as soon as such value is ascertained in the manner provided in said article.

In witness whereof I, Orville H. Browning, Secretary of the Interior, have subscribed my name and caused the seal of said Department to be affixed hereunto; and the said James F. Joy has hereto, on his part, subscribed his name. All done in duplicate the day and year first above written.

[SEAL.]

O. H. BROWNING,
Secretary of the Interior.
JAMES F. JOY,
By N. BUSHNELL, *his Agent.*

Your committee cannot escape the conclusion that there was no inten-

tion upon the part of Harlan or Browning to give the people an opportunity to occupy these lands, a purpose to which these men were not strangers.

A dispute arose between the American Emigrant Company and Joy relative to their titles to said lands under their respective purchases, to settle which the device of a "supplemental treaty" was resorted to, which was made at Washington, concluded April 27, ratified June 6, and "proclaimed June 10, 1868." The contract made between Secretary Browning and James F. Joy, October 9, 1867, was by this new arrangement of June 10, 1868, canceled; and in the language of the supplemental treaty, "for the purpose of harmonizing the conflicting interests of the said American Emigrant Company and the said James F. Joy, it is the desire of all the parties in interest that the said American Emigrant Company shall assign their said contract, and all their right, title, claim, and interest in and to the said 'Cherokee neutral lands' to the said James F. Joy, and that the said Joy shall assume and conform to all the obligations of said company under their said contract, as hereinafter modified."

If the sale of Harlan to the Emigrant Company was null and void, its transfer to Joy was also a nullity; and why Browning, on June 10, 1868, then Secretary of the Interior, as he was when he officially, on October 20, 1866, declared the sale of Harlan null and void, acting with the responsibilities both of trustee for the Cherokee Indians, under this treaty of 1866, with regard to this neutral land, as well as filling the responsible office of Secretary of the Interior under the Government, would sanction this transfer of the Emigrant Company to Joy of rights and interests which he had officially declared did not exist, and why he should cause Joy to surrender the rights and interests which he by his sale to him officially declared did exist, and that he had attempted with official sanction to make good to him, thus throwing Joy back from the title which he had given him upon a bare and declared void agreement with Harlan, cannot be explained by the facts in the light of a straightforward transaction, and must look for its vindication in that reasoning which prompted the supplemental treaty of 1868. The Emigrant Company could readily see that the sale to Joy by Secretary Browning was as worthless and inexcusable as theirs from Harlan, and which facts they were forcing upon Secretary Browning, thus jeopardizing the sale he had made to Joy.

Your committee would call attention to the fact that this remarkable "supplemental treaty" cannot be found in the statute-book of the United States. Why it was excluded from the statutes is not known to your committee, for upon it alone Mr. Joy's title depends, as it offers the only attempt at confirmation of it. The sale to the Emigrant Company by Harlan having been declared null, and Joy having surrendered his purchase of Browning, the agreement and assignment named in the supplemental treaty is the only evidence of title Joy holds.

It appears that in all the successive stages of these remarkable negotiations, the first clause of article 17 of the treaty of 1866, which provides for the sale of these lands under sealed bids, "in parcels not exceeding 160 acres," &c., was entirely ignored, and that no official notice of any character was given of the intention to sell the whole of the lands in a body. The $1 per acre is not a fixed price in the treaty, but is a fixed minimum price.

It seems to your committee that, supposing the proceedings to be valid, a proper regard for justice to two thousand settlers who were upon these lands, and not at all protected by the treaty of 1866, would have dictated the carrying out of that clause in such a manner that

those settlers should at least have had an even chance with speculators to bid for their homes.

It has not, until within a few years at least, been the practice of such officers of the United States as were connected with the sales of our public lands to discriminate against actual settlers, and in favor of men or companies wishing to purchase such lands in large bodies.

Before the war a number of white families settled on this tract, and your committee cannot learn that any objection was made to their settlement, either by the Government or the Indians, until November 29, 1859. These settlers paid taxes and voted as early as 1859, and continually since. In October, 1860, one Cowan, a pro-slavery secessionist, acting in the interests of the rebellion, then agent for the Cherokees, came upon the tract, sustained by a company of United States troops, under command of Captain Sturges, of the United States Army. Your committee learn that fourteen cabins were burned, and at that stage of the affair an arrangement was made between the people and the miitary by which further ejectment of settlers was staid. It appears that the settlers sent a committee of two, accompanied by two other persons, to see President Buchanan, and that the President and Secretary of the Interior told the committee to go home and say to the settlers to stay on their claims, and they should never be moved from them; and that the Secretary of the Interior, Jacob Thompson, assured them he never had ordered them to be removed from those lands, and that they never would be ordered to leave them.

The interference of the military at that time was in the interest of slavery in that particular locality, and had no other significance or purpose. During the rebellion most of the settlers on these lands were compelled to temporarily abandon their homes; many entered the United States Army, leaving their families at Fort Scott and other places of security, and those who survived, and the families of those who did not survive, returned again at the close of the war. A great many soldiers and others have settled on these lands since the war.

It is declared by the settlers on this land that in March, 1866, President Johnson wrote to them to "go on and settle it up," and assured them of protection under the preëmption laws of the United States. Letters of similar purport were sent them by Senator Pomeroy, and letters of encouragement were sent them by others in official station at Washington.

It appears from the records of the Indian Office, and from the statement of citizens, that white settlers were encouraged to occupy these lands by the Indians themselves. As early as August 11, 1866, it appears that the recognized actual settlers on the neutral lands, being heads of families, numbered one thousand and thirty-one. At the date of the supplemental treaty (June 10, 1868) the number of families so occupying claims was more than three thousand, which will be fully sustained by reference to the voting lists.

It appears that these settlers claim right to titles under the homestead and preëmption laws of the United States by virtue of their having settled upon lands which, by laws of the United States, were subject to settlement, "and not otherwise appropriated;" and of having performed, as far as the Government has given them opportunity, all the conditions required by such laws, *and standing ready to perform all the conditions* as soon as the opportunity shall be afforded.

Mr. Joy, on the other hand, claims title to those lands by virtue of the sale made to him by authority of a treaty with the Cherokee Indians, as hereinbefore stated.

The case is one of great magnitude on account of the value of the land in contest; but of even much more importance because of the issues involved in its decision. The whole question of title in the neutral lands up to the present time is necessarily to be considered. The question of the right of the treaty-making power to dispose of lands in the condition in which this tract shall be proved to have been must form another branch of this investigation.

If the action of the treaty-making power shall be found to conflict with laws of Congress, the question must arise as to the proper jurisdiction in the premises; and if both shall be found to have taken action on the same ground, the question of supremacy, as between the treaty-making power and the law-making power, will hardly need argument to show that the law must prevail, especially when it is empowered by the very words of the Constitution; and, lastly, the rights of the people on the public lands must be defined and protected.

CHARTERED TITLES.

The title assumed by European nations to the soil of America, by virtue of discovery, was held and allowed to be an absolute, ultimate fee-simple. In all the dealings of the European discoverers with each other, this title was held to confer both political jurisdiction over the territory and the disposal of the property in the soil, regarding the Indian title as one of occupancy only. Your committee ask to be allowed to quote from the highest authorities to be found on this subject, the charters granted by the Crown to the colonists:

The charter granted by their Majesties King William and Queen Mary, to the inhabitants of the province of Massachusetts Bay, in New England, provides that all that part of America lying and being in breadth from forty degrees of northerly latitude from the equinoctial line, to the forty-eighth degree of the said northerly latitude, inclusively, and in length of and within all the breadth aforesaid throughout all the main lands from sea to sea, together also with all the firm lands, soils, grounds, havens, ports, rivers, waters, fishings, mines, and minerals, as well royal mines of gold and silver as other mines and minerals, precious stones, quarries, and all and singular other commodities, jurisdictions, royalties, privileges, franchises, and preheminences, both within the said tract of land upon the main, and also within the islands and seas adjoining: *Provided always*, That the said lands, islands, or any the premises by the said letters-patent intended and meant to be granted, were *not then actually possessed or inhabited by any other Christian prince or state*, or within the bounds, limits, or territories of the southern colony, then before granted by the said late King James the First, to be planted by divers of his subjects in the south parts: To have and to hold, possess and enjoy, all and singular the aforesaid continent, lands, territories, islands, hereditaments, and precincts, seas, waters, fishings, with all and all manner of their commodities, royalties, liberties, preheminences, and profits, that should from thenceforth arise from thence, with all and singular their appurtenances, and every part and parcel thereof, unto the said council, and their successors and assigns forever, to the sole and proper use and benefit of the said council and their successors and assigns forever, unto the said Sir Henry Roswell and George Foxcraft, their heirs and assigns forevermore: *Provided also*, That it shall and may be lawful for the said governor and general assembly to make or pass any grant of lands lying within the bounds of the colonies formerly called the colonies of the *Massachusetts Bay* and *New Plymouth* and province of *Maine*, in such manner as heretofore they might have done by virtue of any former charter or letters-patent; which grants of lands, within the bounds aforesaid, we do hereby will and ordain to be and continue forever of full force and effect without our further approbation and consent.

The charter to Rhode Island is "for the use and benefit of themselves and their associates, freemen of the said colony, their heirs and assigns."

The first charter of Virginia did, "by letters-patent under the great seal of England, give and grant unto such persons, their heirs and assigns."

The second charter of Virginia granted "to their heirs, successors, and assigns forever."

The Pennsylvania charter did "give and grant unto the said William Penn, his heirs and assigns, full and absolute power, license, and authority, that he, the said William Penn, his heirs and assigns, from time to time, hereafter, forever, at his and their will and pleasure, may assign, alien, grant, demise, or enfeoff of the premises, so many and such part or parcels to him or them that shall be willing to purchase the same, as they shall think fit: To have and to hold to them, the person or persons willing to take or purchase, their heirs and assigns, in fee-simple, or in fee-tail, or for the term of life or lives, or years."

The Maryland charter conferred the right "to have, hold, possess, and enjoy the said country, isles, inlets, and other premises, unto the said now Lord Baltimore, his heirs and assigns, to the sole and proper use and behoof of him, the said now Lord Baltimore, his heirs and assigns forever. * * * * The said now Lord Baltimore, his heirs and assigns, from time to time, hereafter, forever, at his and their will and pleasure, may assign, alien, grant, demise, or enfeoff of the premises, so many or such part or parcels to him or them that shall be willing to purchase the same as they think fit: To have and to hold to them, the said person or persons willing to take or purchase the same, their heirs and assigns, in fee-simple, or in fee-tail, or for the term of life or lives, or years."

ABSOLUTE, ULTIMATE FEE-SIMPLE TITLE IN THE UNITED STATES—THE INDIAN TITLE ONE OF OCCUPANCY ONLY.

As under the European governments the public domain, including all newly-discovered countries, was held to be the property of the Crown, so, under our form of government, all public and unoccupied lands are held to be the property of the United States; and the relation between the Indian tribes and the Government of the United States is held to be the same that existed between them and the European discoverers, the universal rule having been to consider the Indians as occupants of the soil merely, and subject to removal at the will of the Government. In support of these views your committee presents the following valuable authorities :

The ambition of Henry the Seventh was roused by the communications of Columbus, and in 1495 he granted a commission to John Cabot, an enterprising Venetian, then settled in England, to proceed on a voyage of discovery, and to subdue and take possession of any lands unoccupied by any Christian power, in the name and for the benefit of the British Crown. (Story on the Constitution, vol. 1, p. 3.)

Such is the origin of the British title to the territory composing these United States. That title was founded on the right of discovery, a right which was held among the European nations a just and sufficient foundation on which to rest their respective claims to the American Continent. It became the basis of European polity, and regulated the exercise of the rights of sovereignty and settlement in all the cisatlantic plantations. (Story on the Constitution, vol. 1, p. 2.)

The Papal authority, too, was brought in aid of these great designs; and for the purpose of overthrowing heathenism and propagating the Catholic religion, Alexander the Sixth, by a bull issued in 1493, granted to the Crown of Castile the whole of the immense territory then discovered, or to be discovered, between the poles, so far as it was not then possessed by any Christian prince. (Story on the Constitution, vol. 1, p. 5.)

The latter (the Indians) were admitted to possess a present right of occupancy or use in the soil, which was subordinate to the ultimate dominion of the discoverer. They were admitted to be the rightful occupants of the soil, with a legal as well as a just claim to retain possession of it and use it according to their own discretion. In a certain sense, they were permitted to exercise rights of sovereignty over it. They might sell or transfer it to the sovereign who discovered it; but they were denied the authority to dispose of it to any other persons; and, until such a sale or transfer, they were generally permitted to occupy it as sovereigns *de facto*.

But notwithstanding this occupancy, the European discoverers claimed and exercised the right to grant the soil while yet in possession of the natives, subject, however, to their right of occupancy; and the title so granted was universally admitted to convey a sufficient title in the soil to the grantees, in perfect dominion, or, as it is sometimes expressed in treaties of public law, it was a transfer of *plenum et utile dominium*. (Story on the Constitution, vol. 1, p. 6.)

We have also seen that the title of the Indians was not treated as a right of propriety and dominion, but as a mere right of occupancy; there is not a single grant from the British Crown, from the earliest of Elizabeth down to the latest of George the Second, that affects to look to any title except that founded on discovery. Conquest or cession is not once alluded to. (Story on the Constitution, vol. 1, p. 101.)

These facts have been taken for granted in the transactions of our Government with the Indians, and with our own citizens.

By the charters from the British Crown the title to the land passed to the several colonies, and when the treaty of peace was ratified between the government of Great Britain and the United States of America, (treaty of Ghent,) the British Crown surrendered all ultimate right to the soil of these colonies, as well as all political power over the territory. This, however, left the title to the soil in the several colonial governments within their charter limits.

In the formation of our Government it became necessary to hold the title to the public domain in the General Government; and, to promote the public weal, the several (colonies) States conveyed the soil of, and jurisdiction over, their unoccupied lands to the General Government, as follows: Virginia, in 1784; Massachusetts, 1785; Connecticut, 1800; South Carolina, 1787, and Georgia, in 1802. It will be seen that by these cessions of the several States, and by treaties with other nations, the United States became possessed of the same title formerly held by these colonies and formerly by the Crown.

In the case of the Cherokee Nation *vs.* State of Georgia, the opinion of the court was delivered by Chief Justice Marshall. (5 Peters, p. 48; 9 Curtis, (4 and 5 Peters,) p. 181.) In speaking of the Cherokee Indians, the court said:

Though the Indians are acknowledged to have an unquestionable and heretofore unquestioned right to the lands they occupy, until that right shall be extinguished by a voluntary cession to our Government, they occupy a territory to which we assert a title independent of their will, which must take effect in point of possession when their right of possession ceases.

In Worcester *vs.* State of Georgia, (6 Peters, p. 580,) in speaking of the Indian tribes, Mr. Justice McLean, delivering the opinion of the court, said:

Their right of occupancy has never been questioned; but the fee in the soil has been considered in the Government. This may be called the right to the ultimate domain, but the Indians have a present right of possession.

In Johnson *vs.* McIntosh, (8 Wheaton, p. 574,) Chief Justice Marshall, in delivering the opinion of the court, said:

Their power to dispose of the soil, at their own will, to whomsoever they pleased, was denied by the original fundamental principle that discovery gave exclusive title to those who made it. While the different nations of Europe respected the right of the natives as occupants, they asserted the ultimate dominion to be in themselves, and claimed and exercised, as a consequence of this ultimate dominion, a power to grant the soil while yet in possession of the natives. These grants have been understood by all to convey a title to the grantees subject only to the Indian right of occupancy.

Page 579 of the same:

Thus has our whole country been granted by the Crown while in the occupancy of the Indians. These grants purport to convey the soil as well as the right of dominion to the grantees. In all of them the soil, at the time the grants were made, was occupied by the Indians; yet almost every title within these governments is dependent on these grants. In some instances the soil was conveyed by the Crown, unaccompanied by the powers of government, as in the case of the Northern Neck of Virginia.

Page 587 of the same:

The power now possessed by the Government of the United States to grant lands resided, while we were colonies, in the Crown, or its grantees. The validity of the title given by either has never been questioned in our courts. It has been exercised uniformly over territory in possession of the Indians. The existence of this power must negative the existence of any right which may conflict with and control it. An absolute title to lands cannot exist at the same time in different persons or in different governments. An absolute title must be an exclusive title, or at least a title which excludes all others not compatible with it. All our institutions recognize the absolute title of the Crown, subject only to the Indian right of occupancy, and recognize the absolute title of the Crown to extinguish that right. This is incompatible with an absolute and complete title in the Indians.

December 26, 1854, McClelland, Secretary of the Interior, decided that the Oneida Indians "have no right to cut timber upon the lands of the tribe" except for their own use; and says he will "enforce the laws to prevent trespasses upon public lands," if they do not desist.

Cushing, Attorney General, said, (Opinions of Attorneys General, vol. 8, page 255:)

Lands may be granted in fee to private persons as well before as after the extinguishment of the Indian title.

In Mitchell *et al. vs.* The United States, (9 Peters, p. 745,) the Supreme Court said:

Subject to this right of possession, the ultimate fee was in the Crown and its grantees, which could be granted by the Crown or colonial legislatures while the lands remained in possession of the Indians, though possession could not be taken without their consent.

In Lattimer and others *vs.* Poteet, (14 Peters, p. 14,) the land in contest lay in North Carolina, and was held by the State under the old charter, (2 Laws United States, 85,) and was granted by the State, on the 20th of July, 1796, to William Cathcart, though at the time of the granting it was occupied by the Cherokee Indians. The Supreme Court said:

The Indian title being only a right of occupancy, the State of North Carolina had the power to grant the fee in the lands subject to this right.

The United States Supreme Court, in case of United States *vs.* Hernandez, (10 Peters, p. 303,) said:

Under the British government, then, the governor of East Florida had express power to make grants of lands in the possession of the Indians. Nor does there appear to have been any restriction on the powers of the governor (the Spanish governor) to make grants of lands under Spain other than those imposed on the governors under Great Britain; both made grants without regard to the land being in the possession of the Indians; they were valid to pass the right of the Crown, subject to their right of occupancy; when that ceased, either by grant to individuals with the consent of the local governors, by cession to the Crown, or the abandonment by the Indians, the title of the grantee became complete.

Mr. Cushing said, (Opinions of Attorneys General, vol. 8, p. 262:)

When the United States made this grant to the State of Wisconsin, *the fee of all the land was in the United States*, subject, in respect to a part, to the *occupancy* of the Menomonees; that *usufructuary occupation* was capable of being extinguished by the United States, *and by them alone;* and, until its extinction, the entire original title remained between them and the Indians. What rule of law stood in the way to forbid the United States to convey to the State of Wisconsin such title as they had? I know of none. By what rule of law is it that the United States, as proprietors, are deprived of this common right of all proprietors? And by what rule of law is it that the benefit of this common right is taken away from the grantees of the United States?

Your committee submit the statements of Mr. Harlan, chairman of the Committee on Indian Affairs of the Senate of the United States, made on the floor of the Senate, on Senate bill No. 529, May 24, 1870, relative to Osage Indian lands in Kansas. Mr. Harlan said:

But, Mr. President, is it true in point of fact that this language is so very objectionable? What other phraseology would be more apt? These Indians are not the absolute

owners of these lands. By the terms of the treaty of 1825, this tract of country was reserved for the use of the Indians, just "so long as they may choose to occupy the same."

They had, therefore, no other title than this. Under the provisions of that treaty, they have the right to the use and the enjoyment of these lands. The fee is in the United States. The fee, it is supposed, was purchased of France, and paid for when the territory was acquired from that government. As construed by the highest courts of the country, the fee to the public domain occupied by Indians is in the United States. The Indian tribes found in occupancy are held to own only the right to the use and enjoyment of the land; nothing more. When they abandon these lands voluntarily, the United States obtained perfect title without the formality of the negotiation of a treaty. The mere abandonment of the lands by the savage tribes gives the United States a perfect title in fee, not only the reversionary right, but also the right to the immediate use and enjoyment. These Indians acquired no title of any kind from the United States. The United States did not, in that or any other treaty, grant to the Indians title to these lands. The Indians reserved the lands, and held them under whatever right of title they derived from their ancestors. They therefore hold by the ordinary Indian title; nothing more.

If, then, the title to these lands is divided, the right to the use and enjoyment being in the Indians, and the right to the reversion, by the fee, being in the United States, is there any inaptness in the phraseology proposed by the committee, "that the United States shall assume the absolute control and ownership," after buying out the Indian title, after paying full compensation for these lands according to agreement? The object of this clause of the proposed law is to merge both titles, the Indian title to the possession and the right to the fee, in the Government of the United States, so as to enable the United States to make a complete title to its grantee.

SOLE POWER OF CONGRESS TO DISPOSE OF THE PUBLIC LANDS.

Under monarchical governments concerned in discoveries in America such tracts of the country as the different nations laid claim to were held as the "property of the Crown." Grants or sales made by the Crown to other nations or to individuals passed the absolute title to the soil. In some cases, however, the title was retained in the Crown, and large tracts were leased by the Crown to companies or to private persons, as in the case of Georgia and some others.

But under our republican form of government "the territory and other *property* belonging to the *United States*" is practically the property of *the people*. The Congress has, from the foundation of our Government, been regarded by the people as the guardian of the political and personal rights of the people, and as the custodian of the material interests of the nation. The framers of the Constitution and the conventions, whose votes made it the fundamental law of the land, carefully provided (article 1, section 9) that "no money shall be drawn from the Treasury but in consequence of appropriations made by law;" and (article 1, section 7) that "all bills for raising revenues shall originate in the House of Representatives."

Thus not only was the control of the purse of the nation placed in the hands of "Congress," but the *people*, jealous of the branch of *that body* least directly responsible to the *people*, placed that control very much more in the hands of *their most direct agents*, the members of the House of Representatives.

No proposition to remove money from the *pockets of the citizens*, directly or indirectly, and place it in the public treasury, can be constitutionally originated except by the lower house; and no money can constitutionally be removed from the *public Treasury*, for any purpose whatever, without the concurrence of both houses of Congress. Your committee insist that the power of "Congress" over the "territory," to which the United States hold the absolute, ultimate fee-simple title, and which has been shown, by quotations from the highest possible authorities on the subject, to include lands occupied by Indians, as well

as public lands not so occupied, is a power vested *solely* and *exclusively* in that department of our Government which is composed of the "*Senate and House of Representatives;*" and that *neither branch of Congress, acting separately, or in conjunction with any other department or officer of our Government, can, by any process, direct or indirect, "dispose of" any portion of such "territory," in any way or manner whatever, without the express concurrence of the other branch of "Congress.*"

The language of the Constitution of the United States is very plain on this subject. The Constitution itself (article 1, section 1) says: Congress "shall consist of a Senate and House of Representatives;" and article 4, section 3, "The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States."

The language, "shall have power," used to place the disposition of the public domain in the hands of Congress, is precisely the same as that used in the same instrument to give power to Congress (article 1, section 8) to "lay and collect taxes, duties, imposts, and excises; to pay the debts, and provide for the common defense and general welfare of the United States; to borrow money on the credit of the United States; to regulate commerce with foreign nations, and among the several States, and with the Indian tribes; to establish an uniform rule of naturalization, and uniform laws on the subject of bankruptcies throughout the United States; to coin money, regulate the value thereof and of foreign coin; and fix the standard of weights and measures; to provide for the punishment of counterfeiting the securities and current coin of the United States: to establish post offices and post roads; to promote the progress of science and useful arts; * * * * * to constitute tribunals inferior to the Supreme Court; to define and punish piracies and felonies committed on the high seas, and offenses against the law of nations; to declare war, grant letters of marque and reprisal, and make rules concerning captures on land and water; to raise and support armies; * * * * * to provide and maintain a navy; to make rules for the government and regulation of the land and naval forces; to provide for calling forth the militia to execute the laws of the Union, suppress insurrections, and repel invasions; to provide for organizing, arming, and disciplining the militia, and for governing such part of them as may be employed in the service of the United States; * * * to exercise exclusive legislation in all cases whatsoever over such district," &c.; * * "to make all laws which shall be necessary and proper for carrying into execution the foregoing powers, and all other powers vested by this Constitution in the Government of the United States, or in any department or officer thereof."

To grant to the treaty-making power the disposition of the public lands, the absolute title to which is in the United States, is to grant it the power by treaty to do all the other acts that the Constitution declares "Congress shall have power" to do.

But your committee are not left to determine the nature and extent of this power of Congress by these plain words alone. Repeated decisions of the highest judicial tribunal of the land, as well as many official opinions of Attorneys General, and also of heads of Departments, have defined the character of that power beyond a possible doubt.

In Bagnell *et al. vs.* 2 Broderick, 13 Peters, p. 450, (13 C. R., 235,) the Supreme court said:

> Congress has the sole power to declare the effect and dignity of titles emanating from the United States.

In Wilcox *vs.* Jackson, (13 Peters, p. 517,) the Supreme Court said:

We hold the true principle to be this, that whenever the question in any court, State or federal, is whether a title to land which had once been the property of the United States has passed, *that question must be resolved by the laws of the United States.*

In United States *vs.* Fitzgerald, (15 Peters, p. 421,) the Supreme Court said:

No appropriation of land can be made for any purpose but by authority of Congress.

In United States *vs.* Gratiot *et al.*, 14 Peters, p. 537, (Indiana Lead Mine Case,) the President, by authority given to him by act of Congress of March 3, 1807, had "leased" certain lead mines to J. P. B. Gratiot and Robert Burton. Gratiot & Burton had given to the United States a bond, with a penalty of ten thousand dollars. The United States pleaded certain breaches of the bond, and brought an action of debt, founded on the bond. In giving its decision the court said:

That the mines now in question lie within the territory referred to in the act of Congress, and are the property of the United States, is not denied. And the Constitution of the United States (article 4, section 3) provides "that Congress shall have power to dispose of, and make all needful rules and regulations respecting, the territory or other property belonging to the United States." The term territory, as here used, is merely descriptive of one kind of property, and is equivalent to the word lands. And Congress has the same power over it as over any other property belonging to the United States; and this power is vested in Congress without limitations, and has been considered the foundation upon which the territorial governments rest. In the case of McCulloch *vs.* The State of Maryland, (4 Wheaton, 422,) the Chief Justice, in giving the opinion of the court, speaking of this article and the powers growing out of it, applies it to the territorial governments, and says all admit their constitutionality.

On the 21st of March, 1870, in the case of Whitney *vs.* Frisbie, the Supreme Court of the United States again decided the power of Congress over the public lands to be supreme.

The President, under authority conferred upon him by act of Congress of June 14, 1809, had selected Rock Island for a military reservation. The question arose as to whether Rock Island was subject to preëmption under the laws of the United States. Bates, Attorney General, said, (Opinions of Attorneys General, vol. 10, p. 361:)

This selection of Rock Island for military purposes was not, as we have seen, the unauthorized act of the President, but was made in the exercise of a discretion vested in him by Congress. The Constitution vests in Congress the power to dispose of, and make all needful rules and regulations respecting, the territory or other property of the United States. The word "territory," as here used, is held to be equivalent to the word lands, (United States *vs.* Gratiot, 14 Peters, 537;) *and the power to dispose of the public lands under this clause, whether by sale or by appropriation to other uses, belongs to Congress*, and not to the President. It will be conceded, I suppose, that without the authority of *Congress* the President could not have selected a portion of the public lands, and, by the erection and occupancy of a fort, devoted it to military purposes. In every instance where this has been done sufficient legislative authority will be found for the act either in the form of a general statute, such as the act of 1809, or of special enactment. The withdrawal of the land from the uses to which, under the authority of an act of Congress, it had been appropriated, and its appropriation to other and different uses, would be simply an attempt to *dispose of* it, the power to do which, as we have seen, *resides only in Congress.* The appropriation of the public domain, *either to public or private use, is eminently an act of sovereign power.* It is the *exercise of ownership*, and implies the right of control over the title. *It is a conversion of the property of the nation equal in responsibility and gravity with the appropriation of the public money, and derives its authority from the same high source.* Under our system, this extreme power resides *only in Congress.* As the Executive can draw no *money* from the *Treasury* but in consequence of an *appropriation made by law*, so he cannot *divest the title* to a foot of the public lands without the *same legislative sanction.*

Story (On the Constitution, vol. 1, p. 312) said:

Every power given to Congress is, by the Constitution, necessarily supreme.

Again, page 374:

There are many reasons which may be assigned for the engrossing influence of the legislative department. In the first place, its constitutional powers are more exten-

sive and less capable of being brought within precise limits than those of either of the other departments. The bounds of the executive authority are easily marked out and defined. It reaches few objects, and those are known. It cannot transcend them without being brought in contact with the other departments. Laws may check and restrain and bound its exercise. The same remarks apply with still greater force to the judiciary. The jurisdiction is, or may be, bounded to a few objects or persons; or, however general and unlimited, its operations are necessarily confined to the mere administration of private and public justice. It cannot punish without law. It cannot create controversies to act upon. It can decide only upon rights and cases as they are brought by others before it. It can do nothing for itself. It must do everything for others. It must obey the laws, and if it corruptly administers them it is subjected to the power of impeachment. On the other hand, the legislative power, except in the few cases of constitutional prohibition, is unlimited. It is forever varying its means and its ends. It governs the institutions and laws and public policy of the country. It regulates all its vast interests. *It disposes of all its property.* Look but at the exercise of two or three branches of its ordinary powers. It levies all taxes; it directs and appropriates all supplies; it gives the rules for the descent, distribution, and devises of all property held by individuals. It controls the sources and the resources of wealth. It changes at its will the whole fabric of the laws. It molds at its pleasure almost all the institutions which give strength and comfort and dignity to society.

Clifford, Attorney General, said, (Opinions Attorneys General, vol. 4, p. 696:)

Congress has the exclusive power, under the Constitution, to dispose of and make all needful rules and regulations respecting the territory and other property belonging to the United States.

Again, page 706:

The power over the public lands is vested by the Constitution *exclusively in Congress,* and the President has no authority over the subject, except what may be inferred from the general power to see that the *laws* are faithfully executed, unless it be conferred upon him by an *act of Congress;* nor can the power, when conferred, be *exercised in any other form or mode of proceeding than that which the law prescribes.* This view is too firmly established by the Constitution, as a primary principle in the distribution of its powers, to need any confirmation, and the proposition is too palpable to require any illustration to enforce it.

An officer of the United States Army had sold a quantity of lead belonging to the Government. The court (Thompson, J.) said, (1 Paine, p. 649, circuit court of the United States for the second circuit, comprising the districts of New York, Connecticut, and Vermont, October term, 1826:)

The Constitution declares that Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property of the United States. No public property can therefore be disposed of without the authority of law, either by an express act of Congress for the purpose, or by giving the authority to some department or subordinate agent. No law has been shown authorizing the sale of this lead. Our Government being a government of laws, it speaks to its agents *through its laws; and it is to them only that we are to look for the authority of such agents.* And no *law* having been shown, authorizing the sale of the lead in question, or *vesting in any department* of the Government any general authority to sell public property, no such sale can be inferred from any of the circumstances appearing in this case.

Attorney General Mason said, (Opinions of Attorneys General, vol. 4, p. 86:)

The third section of the fourth article of the Constitution declares that the Congress shall have power to dispose of and make all needful rules and regulations respecting the territory and other property of the United States. The term employed was adopted from the ordinance of 1785, and *comprehends every mode* by which the *lands* and other property of the United States could be parted with by the Government, whether by *sale, gift, or for any limited interest. This power has been invariably exercised by Congress. The sales of the public lands—the territorial property of the United States—have been in all cases directed and regulated by law.*

The subject of this disposition of the "territory" belonging to the United States has been several times acted upon by the House of Representatives; and its denial of the right of the treaty-making power to "dispose of" Indian lands has been uniform and persistent.

PROCEEDINGS IN THE HOUSE.

JUNE 1, 1868.

By Mr. JULIAN:

Whereas the Indian tribes of the United States have no power by treaty to dispose of their lands, except the power of cession to the United States; and whereas a treaty is now being negotiated between the Great and Little Osage Indians and a special Indian commission acting on the part of the United States, by which 8,000,000 acres of land belonging to those Indians are to be transferred to the Leavenworth, Lawrence, and Galveston Railroad Company, in contravention of the laws and policy of the United States affecting the public domain: Therefore,

Resolved, That the President of the United States be requested to inform this House by what authority and for what reason the said lands are to be disposed of as above recited, and not ceded to the United States and made subject to their disposition.

Passed unanimously.

In reference to the same treaty then pending before the Senate Committee on Indian Affairs, June 18, 1868, the following resolution was offered by Mr. Clarke, of Kansas:

Resolved, (as the sense of this House,) That the objects, terms, conditions, and stipulations of the aforesaid pretended treaty are not within the treaty-making power, nor are they authorized either by the Constitution or laws of the United States; and therefore this House does hereby solemnly condemn the same, and does also earnestly but respectfully express the hope and expectation that the Senate will not ratify the said pretended treaty.

Passed unanimously.

June 27, 1868.—By Mr. Julian, resolution denying the right of treaty-making power to dispose of Indian lands. Passed.

Joint resolution (H. R. 286) relative to the lands of the Cherokee and Great and Little Osage Indians.

Be it resolved by the Senate and House of Representatives of the United States of America in Congress assembled: That the President of the United States be, and he is hereby, directed to withhold the issuing of patents to the purchasers of lands heretofore sold, or which may hereafter be sold, under and by virtue of the treaty between the United States and the Cherokee Indians, concluded on the nineteenth day of July, in the year eighteen hundred and sixty-six, and the treaty between the United States and the Great and Little Osage Indians, concluded on the twenty-ninth day of September, in the year eighteen hundred and sixty-five, or under any Indian treaty which may hereafter be concluded, until otherwise provided for by law.

Passed the House of Representatives June 3, 1868.

Attest: EDWARD McPHERSON, *Clerk.*

[H. R. 335.]

JOINT RESOLUTION for the protection of settlers on the Cherokee neutral lands in Kansas.

Whereas in the treaty between the United States and the Cherokee Nation of Indians, made July nineteenth, eighteen hundred and sixty-six, proclaimed August eleventh, eighteen hundred and sixty-six, there is a provision purporting to authorize a sale by the Secretary of the Interior of Cherokee neutral lands in Kansas, but which reserves from sale lands having improvements of the value of fifty dollars, not being mineral, and occupied by any person for agricultural purposes, and which gives to occupants the right to purchase one hundred and sixty acres each of said lands, under and by virtue of which about eight hundred families are provided for; and whereas, between August eleventh, eighteen hundred and sixty-six, and June sixth, eighteen hundred and sixty-eight, about two thousand seven hundred additional families have settled on said Cherokee neutral lands, each family occupying one hundred and sixty acres, on which improvements have been made at an average cost of about five hundred and ten dollars, besides expenditures for living of four hundred and fifty dollars for each family, said settlements and improvements being made without objection from any source, and on the faith that the settlers would be protected in the right to acquire title to said lands as other settlers on the public lands; and whereas, on the thirtieth day of August, eighteen hundred and sixty-six, a contract was made by and between James Harlan, Secretary of the Interior, and the American Emigrant Company for the sale of certain portions of said lands, which contract has been assigned by said company to James F. Joy, said contract and assignment being on file in the Department of the Interior; and whereas a supplementary treaty between the United States and said Cherokee Nation was made April twenty-seventh, eighteen hundred

and sixty-eight, ratified June sixth, and proclaimed June tenth, eighteen hundred and sixty-eight, all without any knowledge thereof by any of the persons occupying said lands, and which ratifies said contract with the American Emigrant Company, and the assignment thereof to said Joy, with certain modifications provided in said supplemental treaty, but which makes no provision for the protection of the persons or families who have settled upon and improved said lands, but purports to ratify a sale of said lands, including the improvements thereon: Therefore,

Be it resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That in all cases where any person, prior to June tenth, eighteen hundred and sixty-eight, shall have settled on any tract of land of one hundred and sixty acres, or less, in the body of lands known as the Cherokee neutral lands, and shall have made improvements thereon of the value of fifty dollars, and occupied such tract for agricultural purposes, such person, his heirs or assigns, so occupying any such tract of land, shall, after due proof made in such manner as may be prescribed by the Secretary of the Interior, be entitled to enter and receive a patent for the lands so occupied, on paying one dollar and twenty-five cents an acre within one year, in such manner as the Secretary of the Interior may prescribe; and the money so to be paid for said lands shall be paid over to said Cherokee Indians.

Passed the House of Representatives July 13, 1868.

Attest: EDWARD McPHERSON, *Clerk.*

[H. R. 73.]

JOINT RESOLUTION relative to the Cherokee neutral lands in the State of Kansas, and the late treaties respecting the same.

Be it resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That so much of the treaties between the United States and the Cherokee Nation of Indians, proclaimed August eleventh, eighteen hundred and sixty-six, and June tenth, eighteen hundred and sixty-eight, as profess to authorize a sale of the lands described in the seventeenth article of said first-mentioned treaty, and all contracts and grants purporting to be made thereunder, be, and are hereby, annulled and declared void; and said lands shall be, and are hereby, made subject to settlement, entry, and sale at one dollar and twenty-five cents per acre, under the laws of the United States regulating preëmptions, which laws are hereby extended over and made applicable to said lands; and the proceeds of the sales of said lands shall be from time to time paid over to said nation of Indians, until the sum paid shall be equal to one dollar and twenty-five cents per acre for all said lands; and the Secretary of the Treasury shall refund all moneys paid to the United States under any sale made by virtue of said treaty: *Provided*, That the purchasers of said lands shall pay the fees and expenses of their several purchases from the Government as required of other preemptors: *And provided further*, That when bona fide settlers are found on the sixteenth and thirty-sixth sections of said land, the same shall not be reserved for school purposes, but other lands of like amount in said tract, as contiguous thereto as may be, not occupied by settlers, shall be substituted therefor, and designated by the State of Kansas.

Passed the House of Representatives April 5, 1869.

Attest: EDWARD McPHERSON, *Clerk.*

CONFLICT BETWEEN LAW AND TREATY-MAKING POWER.

Every attempt to "dispose of" any part of the Cherokee neutral lands by virtue of the treaty of August 11, 1866, or the supplemental treaty of June 10, 1868, or both of them, *conflicts directly* with the acts of Congress of May 28, 1830, September 4, 1841, July 22, 1854, and June 2, 1862.

It is, in brief, an attempt by the act of the Executive, by and with the advice and consent of the Senate, by a contract entered into in the name of a treaty, but executed with persons within our own domain, and subject to our laws, to annul the laws of Congress, reserving the ultimate title to the public domain in the Government as against Indian tribes: to defeat the laws granting and extending rights to preëmptors and actual settlers on the public lands, and absolutely to sell the public lands by the act of the President and Senate, without law.

The supremacy of the law-making power over every other branch of our Government, in every instance where the subject-matter is within

the province of Congress, is a necessary and inevitable consequence of our democratic republican ideas, and our practical political institutions.

> This Constitution, and the laws of the United States which shall be made in pursuance thereof, and all treaties made or which shall be made under the authority of the United States, shall be the *supreme law of the land.* (Constitution, article 6.)

The Constitution is recognized as the fundamental and supreme law of the land, to which all acts of Congress, all treaties, all decisions of United States courts, and every official act of every United States officer, must conform.

"Laws made in pursuance thereof" can only mean laws made by Congress. The Constitution (article 1, section 1) said:

> All legislative powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.

"Treaties made or which shall be made under the authority of the United States." What is this authority?

The instrumentality through which the authority of the United States is to be primarily exercised is stated in words which cannot possibly be mistaken in the Constitution itself, (article 1, section 8): "Congress shall have power to make all laws which shall be necessary and proper for carrying into execution the foregoing powers, and all other powers vested by this Constitution in the Goverment of the United States or in any department or office thereof."

By the plain English of the Constitution *every power of the National Government*, and of *any department or officer* of that Government, is to be *exercised in accordance with*, and to be *regulated by, laws made by Congress*.

The dominating power of Congress over the treaty-making power has often been asserted by our greatest statesmen and best lawyers. It has been used by Congress to abrogate treaties with *foreign powers.* (See act of July 7, 1798, U. S. Statutes at Large, vol. 1, page 578; also Barclay's Digest for 1867, page 135; also, see American Law Register, January, 1868, vol. 7, No. 3, N. S., page 149, case of Gray *vs.* The Clinton Bridge.)

Attorney General Legare, in the case of certain "Missouri land claims," (Op., vol 3, page 721,) held that though a treaty with France had stipulated that certain individuals were to receive from the United States titles to parcels of the territory ceded by that treaty to the United States, still Congress had the power to refuse such titles; and that the executive branch of the Government was "bound by the will of Congress in the premises."

In the case of Maison-Rouge grant, (Op., vol. 3, p. 737,) Mr. Legare, Attorney General, Congress having refused to confirm certain claims guaranteed by treaty with France, said:

> The legislature, for reasons satisfactory to itself, and according to principles which I had the honor to develop more fully in a recent communication to you on the subject of the Missouri land titles, chose to acknowledge those claims only *sub modo* and to a limited extent. *Its will is our law.*

General Eli S. Parker, our present Commissioner of Indian Affairs, and himself an Indian, in his last report, said:

> A treaty involves the idea of a compact between two sovereign powers, each possessing sufficient authority and force to compel a compliance with the obligations incurred. The Indian tribes of the United States are not sovereign nations capable of making treaties, as none of them have an organized government of such inherent strength as would secure the faithful obedience of its people in the observance of compacts of this character.

TREATY SALES.

Your committee find that the practice of disposing of large tracts of "Indian lands" to railroad companies, and other speculators, by virtue

of Indian treaties, was commenced on the 30th day of May, 1860, by treaty with the Delaware Indians, of that State, which treaty undertook to pass to the Leavenworth, Pawnee and Western Railroad Company 223,966.78 acres of land.

The treaty with the Cherokees of August 11, 1866, attempting to dispose of the Cherokee neutral lands, (800,000 acres,) and the Cherokee strip containing —— acres, was the last of these iniquitous transactions that has been confirmed by the Senate.

During the war these seem to have passed unnoticed; but in the spring of 1868 public attention was arrested by this neutral land case, and by what has been known as the "Osage treaty."

The latter was a proposition to transfer to *one man*, Sturges, of Chicago, 8,000,000 acres of Osage Indian lands, at nineteen cents per acre, to be paid for in annual installments during a period of fifteen years; and even these stipulated payments were insufficiently guaranteed; no provision was made for the settlement of the country, or for the lands to which the State of Kansas was entitled for school purposes; a tract of land, two hundred and fifty miles long and fifty miles in width, out of the territory of the United States, to be transferred to one man for speculative purposes.

Such an attempt could only have been the result of past success on the part of the operators under this "treaty sale" system; and it is no wonder that it challenged and received the attention of the nation. (This attempted sale of the Cherokee neutral lands, by treaty of August 11, 1866, was the last of the treaty sales.)

On the 14th of March, 1870, on motion of Mr. Drake, the Senate of the United States "ordered that the injunction of secrecy be removed from all pending Indian treaties." This formally places the business, which has for so long a time been transacted by means of these so-called Indian treaties, upon the calendar of the Senate as "legislation;" and accordingly we find that there are now (May 16) before the Senate of the United States five *bills* for the disposition of lands now occupied by as many tribes of Indians.

The withdrawal by the President, during the present session of Congress, of the Osage, Kaw, Sac and Fox, and Otoe treaties, renders assurance doubly sure that no more Indian lands will be disposed of by these so-called "treaty sales."

These four treaties were negotiated during the time O. H. Browning was Secretary of the Interior, and comport with the proceedings in the Joy purchase, having for their purpose private speculations at the public expense. They were withdrawn before action by the Senate, on the recommendation of Secretary Cox.

INDIAN TITLE TO NEUTRAL LANDS NOT A FEE-SIMPLE.

It is shown that the title to the tract known as the "Cherokee Neutral Lands," was vested in the United States by the treaty with France, April 30, 1803. The United States could only be divested of that title by act of Congress; and no person or company could hold any valid title except by virtue of positive law. It follows, necessarily, that if no such act has been passed by Congress, the title yet remains in the United States.

Your committee have searched in vain for any such act of Congress.

The law of May 28, 1830, confers no power on the President and Senate to "sell" one foot of public land. The power given was only to "exchange" land west for land east of the Mississippi with Indian

tribes, reserving the power of reversion of title to the Government in case of abandonment or extinction of the tribe.

In section 1 of that law the word *exchange* occurs once; in section 2, once; in section 3, three times; in section 4, once; and in section 5, twice; but there is not the slightest allusion to any power of *sale*, or to any other power but the power to *exchange*, and that for other lands.

Section 2 of this law defines the character of the lands east of the Mississippi for which the treaty-making power was authorized to exchange lands west of that river, as territory "claimed and occupied by such tribe or nation, within the bounds of any one or more of the States or Territories where the land claimed and occupied by the Indians is owned by the United States."

SEC. 3. *And be it further enacted*, That in the making of any such exchange or exchanges, it shall and may be lawful for the President solemnly to assure the tribe or nation with which the exchange is made, that the United States will forever secure and guarantee to them and their heirs or successors the country so exchanged with them; and if they prefer it, that the United States will cause a patent or grant to be made and executed to them for the same: *Provided always*, That such lands shall revert to the United States if the Indians become extinct or abandon the same.

It is contended by Mr. Joy that the treaty with the Cherokees of December 29, 1835, guaranteed to them a "fee-simple title." Your committee admit that that treaty undertook to do so, but assert that it did not and could not, for want of power in the premises. The treaty of 1835 ceding this land was made with the Cherokees under the law of May 28, 1830, and in itself specially referred to that law and could not transcend that statute. Your committee further assert that the patent provided for in that treaty and given to the Cherokees for this and the other lands ceded by it, executed in 1838, cannot be held to confer anything more than a right to occupy the lands until certain specified conditions should be fulfilled; at which time, by the express wording of the patent itself, the lands reverted to the United States.

Article 3 of the treaty of 1835 says:

The United States also agree that the lands above ceded by treaty of February 14, 1833, including the outlet, and those ceded by this treaty, shall all be included in one patent executed to the Cherokee Nation of Indians by the President of the United States, according to the provisions of the act of May 28, 1830.

Thus the treaty itself stipulates for *one patent*, in which is to be placed the reversionary clause of the law of 1830.

The following is a copy of the granting clause of the patent of 1838, by which the Cherokees held *all the lands ever claimed by them west of the Mississippi.* This patent is recorded in full in the General Land Office at Washington, District of Columbia.

Therefore, in execution of the agreements and stipulations contained in the said several treaties, the United States have given and granted, and by these presents do give and grant, unto the said Cherokee Nation the two tracts of land so surveyed and hereinbefore described, containing in the whole 13,374,135$\frac{14}{100}$ acres; to have and to hold the same, together with all the rights, privileges, and appurtenances thereunto belonging, to the said Cherokee Nation forever, subject, however, to the right of the United States to permit other tribes of red men to get salt on the salt plain on the Western Prairie, referred to in the second article of the treaty of the twenty-ninth of December, one thousand eight hundred and thirty-five, which salt plain has been ascertained to be within the limits prescribed for the outlet agreed to be granted by said article, and subject also to all the other rights reserved to the United States in and by the articles hereinbefore recited, to the extent and in the manner in which the said rights are so reserved, and subject also to the condition provided by the act of Congress of the 28th of May, 1830, and which condition is, "that the lands hereby granted shall revert to the United States if the said Cherokees become extinct or abandon the same."

This was not a fee-simple title; it was not a life estate; it was occupancy only.

FEE-SIMPLE TITLE.

Wharton's Law Dictionary, p. 297:

Fee-simple. A freehold estate of inheritance, absolute and unqualified, stands at the head of estates as the highest in dignity, and the most ample in extent, since every other kind of estate is derivable thereout and mergeable therein. * * * * A fee-simple generally is pure, without condition and unrestrained, except by the laws of escheat, and the canons of real property descent. * * * A person who holds "in fee-simple" is he which hath lands or tenements to hold to him and his heirs forever; for if a man would purchase lands or tenements in fee-simple, it behooveth him to have these words in his purchase: to have and to hold to him and to his heirs; for these words (to his heirs) make the estate of inheritance.

In practice the phrase universally adopted in the designation clause of deeds, in order to transfer a fee-simple absolute, is: to A, his heirs and assigns forever, * * an uncontrollable power of alienation, whether by deed, gift, or will.

Lands, the title to which had passed out of the United States, and that lie within the limits of a State of this Union, would, in the absence of heirs to inherit, escheat to the State in which they were situated; but lands, the title to which had not passed from the Government, but which were occupied by Indians, would, on the extinction of the Indians, or on their abandonment of the lands, escheat to the United States, even though they lie within a State, and this without any special legislation, the lands always being held by the Indians in occupancy only.

Wharton's Law Lexicon, p. 359:

Fee-simple, a freehold estate of inheritance, *absolute* and *unqualified*. * * * An *uncontrollable* power of *alienation*, whether by *deed*, *gift*, or *will*.

Kent's Commentaries, vol. 4, page 4:

Fee-simple is a pure inheritance, clear of any qualification or condition, and it gives a right of succession to all the heirs generally. * * * It is an estate of perpetuity, and confers an unlimited power of alienation, and no person is capable of having a greater estate or interest in land. Every restraint upon alienation is inconsistent with the nature of a fee-simple; and if a partial restraint be annexed to a fee, as a condition not to alien for a limited time, or not to a particular person, it ceases to be a fee-simple.

In Blackstone's Commentaries (vol. 1, book 2, p. 104) it is said:

A fee, therefore, in general signifies an estate of inheritance, being the highest and most extensive interest that a man can have in a feud; and when the term is used simply, without any adjunct, or has the adjunct of *simple* annexed to it, (as a fee-simple,) it is used in contradistinction to a fee-conditional at the common law, or a fee-tail by the statute, importing an absolute inheritance clear of any *condition*, limitation, or restriction to particular heirs, but descendable to the heirs general, whether male or female, *lineal* or *collateral*.

Webster's Dictionary:

Fee-simple. *An absolute fee or fee-simple* is land which a man holds to himself and his heirs forever. In America, where lands are not generally held of a superior, a fee or *fee-simple* is an estate in which the owner has the whole property *without any condition* annexed to the tenure.

Ohio State Reports, vol. 17, p. 439: It was held by the court that the words "to the said James Pollock, the heirs of his body, and assigns, forever," did not convey a *fee-simple* but a *fee-tail*; and did not confer on the grantees any power to convey to anybody more than they themselves had—a life estate.

As to the construction to be put upon the grant of these lands, the committee refer to the opinion of Attorney General J. S. Black, given November 22, 1858. He said:

It is well settled that all public grants of property, money, or privileges are to be construed most strictly against the grantee. Whatever is not given expressly, or very clearly implied from the words of the grant, is withheld. * * * If you let the grantees have the advantage of the ambiguity, * * * acts which were supposed to have very little in them when they passed, will expand into very large dimensions afterward. An ingenious construction will make that mischievous which was intended

to be harmless. The remedy for these evils—and they are evils to the public morals as well as to the treasury—is to let all men know that they can get nothing from the United States except what *Congress* has chosen to give them in words so plain that their sense cannot be mistaken.

REVERSION TO THE UNITED STATES.

The law of May 28, 1830, under which this "exchange" was made, (section 3, last clause,) reads:

Provided always, That such lands shall revert to the United States if the Indians become extinct or abandon the same.

The treaty of 1835 stipulates, (article 3:)

That the lands above ceded by the treaties of May 6, 1828, and February 14, 1833, including the outlet and those ceded by this treaty, meaning the neutral lands, *shall all be included in one patent executed to the Cherokee Nation of Indians by the President of the United States, according to the provisions of the act of May* 28, 1830.

The patent of 1838 contained the condition in these words:

And subject also to the condition provided by the act of Congress of the 28th of May, 1830, and which condition is, "that the lands hereby granted shall revert to the United States if the said Cherokees become extinct or abandon the same."

The conditions of reversion so carefully retained by the United States are two, to wit: *extinction* and *abandonment*.

Your committee would call particular attention to the following authorities as to what constitutes *abandonment* in such cases as the one under consideration.

Felix Grundy, Attorney General, opinion in case of Creek Indians. (Opinions, vol. 8, p. 390:)

Nothing more is necessary than to ascertain that the reservee left and removed from the land without an intention of returning and occupying it as his place of residence. My opinion is, that so soon as a voluntary abandonment and removal from the premises actually took place, from that time the right of the United States accrued and was perfect and complete; and although the register and receiver could not act until they had a knowledge of such abandonment, still the *rights of individuals might well* and *legally have their origin* to different *portions of said land, according* to *then existing laws*, or *laws which might be passed by Congress.*

Attorney General Butler (Opinions, vol. 3, p. 230) defines abandonment as "ceasing to have any direct personal connection with the use and enjoyment of the land. No judicial proceedings or actual entry on the part of the United States will be necessary to vest the estate in the United States. Whenever the estate of the Indian reservee shall have determined, the land becomes a part of the public domain. * * * * *Its liability to entry for floating claims, or for other purposes, will from that time be the same as if it had then for the first time been ceded to the United States.*"

Your committee find that on the 7th day of October, 1861, a "treaty of friendship and alliance was concluded between the Confederate States and the Cherokee Nation of Indians," and that that treaty was authorized by a "general convention of the Cherokee people."

The articles of this treaty having special application to this case are as follows:

ARTICLE 1. There shall be perpetual peace and friendship, and an alliance offensive and defensive, between the Confederate States of America and all of their States and people, and the Cherokee Nation and all the people thereof.

ART. 2. The Cherokee Nation of Indians acknowledges itself to be under the protection of the Confederate States of America, *and of no other power or sovereign whatever;* and does hereby stipulate and agree with them that it will not hereafter contract any alliance, or enter into any compact, treaty, or agreement with any individual, State, or with a foreign power; and the said Confederate States do hereby assume and accept the said protectorate, *and recognize the said Cherokee Nation as their ward;* and by the consent of said nation now here freely given, the country whereof it is proprietor in fee, as the same is hereinafter described, is annexed to the Confederate States in the same

manner and to the same extent as it was annexed to the *United States of America before that Government was dissolved*, with such modifications, however, of the terms of annexation, and upon such conditions as are hereinafter expressed, in addition to all the rights, privileges, immunities, titles, and guarantees with or in favor of the said nation under treaties made with it, and under the statutes of the United States of America.

ART. 3. The Confederate States of America, having accepted the said protectorate, hereby solemnly promise the said Cherokee Nation never to desert or to abandon it, and that under no circumstances will they permit the Northern States, or any other enemy, to overcome them and sever the Cherokees from the confederacy; but that they will, at any cost and all hazards, protect and defend them and maintain unbroken the ties created by identity of interests and institutions, and strengthened and made perpetual by this treaty.

ART. 4. The boundaries of the Cherokee country shall forever continue and remain the same as they are defined by letters patent therefor given by the United States to the Cherokee Nation on the thirty-first day of December, in the year of our Lord one thousand eight hundred and thirty-eight.

ART. 5. The Cherokee Nation hereby gives its full, free, and unqualified assent to those provisions of the act of congress of the Confederate States of America entitled "An act for the protection of certain Indian tribes," approved the 24th day of May, in the year of our Lord one thousand eight hundred and sixty-one, whereby it was declared that all *reversionary and other interest, right, title, and proprietorship* of the United States in, unto, and over the Indian country, in which that of the said Cherokee Nation is included, should pass to and vest in the Confederate States; and whereby the president of the Confederate States was authorized to take military possession and occupation of all said country.

ART. 7. None of the lands hereby guaranteed to the Cherokee Nation shall be sold, ceded, or otherwise disposed of, to any foreign nation, or to any State or government whatever; and in case any such sale, cession, or disposition should be made without the consent of the Confederate States, all the lands shall thereupon revert to the Confederate States.

ART. 40. In consideration of the common interest of the Cherokee Nation and the Confederate States, and of the protection and rights guaranteed to the said nation by this treaty, the Cherokee Nation hereby agrees that it will raise and furnish a regiment of ten companies of mounted men, with two reserve companies, if allowed, to serve in the armies of the Confederate States for twelve months; the men shall be armed by the Confederate States, receive the same pay and allowance as other mounted troops in the service, and not be moved beyond the limits of the Indian country west of Arkansas without their consent.

ART. 41. The Cherokee Nation hereby agrees to raise and furnish, at any future time, upon the requisition of the president, such number of troops for the defense of the Indian country, and of the frontier of the Confederate States, as he may fix, not out of fair proportion to the number of its population, to be employed for such terms of service as the president may determine; and such troops shall receive the same pay and allowance as the other troops of the same class in the service of the Confederate States.

ART. 47. Whereas by the treaty of the 29th day of December, A. D. 1835, the United States of America, in consideration of the sum of $500,000, part of the sum of $5,000,000 agreed by that treaty to be paid to the Cherokee Nation for the cession of their lands and possessions east of the Mississippi River, did covenant and agree to convey to the Cherokees and their descendants, by patent in fee-simple, the certain tract of land between the State of Missouri and the Osage reservation, the boundary line whereof it was provided should begin at the southeast corner of said Osage reservation and run north along the east line of the Osage lands fifty miles to the northeast corner thereof; thence east to the west line of the State of Missouri; thence with that line south fifty miles; and thence west to the place of beginning; which tract of country was estimated to contain eight hundred thousand acres of land; and whereas the same has been seized and settled upon by lawless intruders from the Northern States, and may be totally lost to the Cherokees: now, therefore, it is further hereby agreed between the parties to this treaty, that in case the said tract of country should be ultimately lost to the Cherokees by the chances of war, or the terms *of a treaty of peace or otherwise*, the Confederate States of America do assure and guarantee to the Cherokee Nation the payment therefor of the said sum of $500,000, with interest thereon, at the rate of five per cent. per annum, from the said 29th day of December, A. D. 1835; and will either procure the payment of the same by the United States, or pay the same out of their own treasury, after the restoration of peace.

ART. 48. At the request of the authorities of the Cherokee Nation, and in consideration of the *unanimity and promptness of their people in responding to the call of the Confederate States for troops*, and of their want of means to engage in any works of public utility and general benefit, or to maintain in successful operation their male and female seminaries of learning, the Confederate States do hereby agree to advance to the said Cherokee Nation, immediately after the ratification of this treaty, on account of the said sum to

be paid for the said lands mentioned in the preceding article, the sum of $150,000, to be paid to the treasurer of the nation, and appropriated in such manner as the legislature may direct; and to hold in their hands as invested for the benefit of said nation the further sum of $50,000, and to pay to the treasurer of said nation interest thereon, annually, on the first day of July in each year, at the rate of six per cent. per annum.

It will be seen by articles 47 and 48 that a sale of the Cherokee neutral lands was attempted to the Confederate States, and $150,000 agreed to be advanced as a part of the price, "on account of the said sum to be paid for said lands mentioned in the preceding article."

Your committee are clearly of the opinion that the mere voluntary cession to our public enemy would have worked a forfeiture of all the rights of the Cherokees to these lands, and that when that cession was accompanied by a *sale*, on which a large payment was to be made immediately, and when these acts were actually followed by the raising of Cherokee troops, in pursuance of stipulations in the same treaty, for the enemy, and their joining the confederate army in actual war against the United States, the last shadow of their legal rights to these lands vanished, and that all just claim by the Cherokees to the tract was forfeited, and that in every particular the abandonment was complete. And further, that the Cherokees, having by their own voluntary act *reverted* this tract, it became *unencumbered property* of the United States, subject only to the action of Congress, and that until Congress does dispose of it by law, no person can possibly acquire any right or title to any part of it, except such as has been or may be acquired under existing laws by virtue of *actual settlement*.

But if no previous abandonment had worked a reversion of these lands to the United States, such reversion would have been complete by the cession of August 11, 1866. That act of cession exhausted the power of the Cherokees in the premises, if any had remained till that date, and merged any right of occupancy the Indians might have held in the United States as the reversioner.

The title to this 800,000 acres of land has reverted to the United States, among others, for the following reasons:

1. It was given in exchange for other Indian lands in Georgia, to which the Indians held the title by occupancy only.

2. It was exchanged by treaty in accordance with the law of Congress of May 28, 1830, which only authorized exchanges.

3. The $500,000 named in the treaty was a part of the valuation of the Cherokee title to the Georgia lands, which was occupancy only.

4. The Cherokees "abandoned" the neutral lands in the treaty with the Confederate States of America, as shown above, October 7, 1861.

5. They reaffirmed that abandonment of the lands by treaty of August 11, 1866, with the United States.

6. By the treaty of August 11, 1866, article 19, it is provided that those Cherokees who choose to remain on the lands after that date will cease to belong to the nation. So their remaining on the land after that date would be no bar to the reversion.

CLAIMS OF SETTLERS UNDER PREËMPTION LAW.

Your committee will next proceed to examine the legal claims of the settlers who have located upon the Cherokee neutral lands.

The act known as the "preëmption law," which was passed by Congress on the 4th of September, 1841, gave to actual settlers possessed of the proper qualifications a right to locate upon certain lands, comprising the larger share of our public domain unencumbered by the Indian possession; and to purchase one hundred and sixty acres, or less,

within one year from the date of settlement, at $1 25 per acre. The doctrine of the monarchies had been that the "Crown" owned the public territory of a nation, and that it was to be granted or sold by the monarch, in dukedoms or principalities, to his favorites. The United States advanced to the higher position taken in the pre-emption law of 1841. For nearly thirty years that law has stood on the statute-books, entirely satisfactory to our people. Millions of American homes have been built under it. Pecuniary independence, naturally accompanied by development of patriotism and of individual character, has been the result, as a rule, of its beneficent operation. From preëmption homes went out a very large and a very important share of the brains and the muscle that saved the nation from being destroyed by the great rebellion. The people are satisfied with that law; the speculators may not be.

On the 22d day of July, 1854, Congress passed a law to organize the Territories of Kansas and Nebraska, section 12 of which reads as follows:

And be it further enacted, That all the lands to which the Indian title has been or shall be extinguished within said Territories of Kansas and Nebraska shall be subject to the operations of the preëmption act of 4th September, 1841.

On the 2d day of June, 1862, Congress passed "An act to establish a land office in Colorado, and for other purposes." The words "*and for other purposes*" are held by the custom of Congress, and also by decisions of the Supreme Court, to include all possible subjects of legislation. The first section is, in the broadest language, a general enactment, that "*all the lands belonging to the United States, to which the Indian title has been or shall be extinguished, shall be subject to the operation of the pre-emption act of 4th September*, 1841."

Section 2 of the act proceeds to establish a *local office*, under this act, *in Colorado*.

The supreme court of the District of Columbia has twice declared the first section of this law to apply all over the nation. (See decisions of that court in case of Whitney *vs.* Frisbie, August 16, 1866; and again, decision in same case, and decree entered thereon at the general term of same court, May, 1868.)

These laws stand unrepealed; their language is plain and unmistakable.

The act of July 22, 1854, is neither more nor less than a guarantee of the pre-emption right to settlers within the then Territories of Kansas and Nebraska. It is the promise of Congress to the people that such settlers should be allowed to buy their homes from the government at $1 25 per acre; and that, too, not only on the lands to which the Indian title *had been* extinguished at the date of the law; but that when the Indian title *should be* extinguished to tracts then occupied by the Indians, such lands should come under the same conditions.

The act of June 2, 1862, *extended these same provisions and conditions to all the "territory" of the nation;* and though ignored for nearly eight years by the Interior Department, its proper and universal character has been formally recognized by that Department on the 22d of March last, as evidenced by the following circular of that date, issued from the General Land Office:

[CIRCULAR.]

Instructions respecting rights of preëmption settlers on public lands.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
March 22, 1870.

Whereas by act of Congress approved 27th of March, 1854, entitled "An act for the

relief of settlers on lands reserved for railroad purposes," every settler on lands which have been, or may be, withdrawn from market in consequence of proposed railroads, and who had settled thereon prior to such withdrawal, shall be entitled to preëmption at the ordinary minimum to the lands settled on and cultivated by them; provided they shall prove up their rights according to such rules and regulations as may be prescribed by the Secretary of the Interior. And whereas the first section of the act approved June 2, 1862, (12 Stat., 413,) provides, "That all the lands belonging to the United States to which the Indian title has been or shall be extinguished, shall be subject to the operations of the preëmption act of the fourth of September, eighteen hundred and forty-one, and under the conditions, restrictions, and stipulations therein mentioned: provided, however, that when unsurveyed lands are claimed by preëmption, notice of the specific tracts claimed shall be filed within six months after the survey has been made in the field; and on failure to file such notice, or to pay for the tract claimed within twelve months from the filing of such notice, the parties claiming such land shall forfeit all right thereto: provided said notices may be filed with the surveyor general, and to be noted by him on the township plats, until other arrangements have been made for that purpose."

Therefore, in accordance with instructions from the Secretary of the Interior, it is ordered that all settlers on lands *surveyed at date of settlement*, and within the lateral limits of withdrawals for railroad purposes, where settlement was made *prior* to date of withdrawal, shall be required to file their declaratory statements within three months from the first day of June, 1870, and thereafter make proof and payment as required by law. And in all cases hereafter settlers claiming preëmption rights upon *surveyed* lands under the act of March 27, 1854, aforesaid, shall be required to file their declaratory statements and make proof and payment in like manner as other preëmptors, in conformity with the requirements of the preëmption laws of 1841 and 1843.

2d. That settlers upon *unsurveyed* lands, including those within the lateral limits of withdrawals for railroad purposes settled upon prior to withdrawal, will be required, within six months after survey in the field, (or, if surveyed before the publication of this circular, within six months from the 1st day of June, 1870, aforesaid,) to file their declaratory statements with the register of the proper land office, or with the surveyor general, where the plat of survey has not been filed with such register, and thereafter to make proof and payment for the tract within twelve months from the date of filing, as required by the act of June 2, 1862, aforesaid. And where settlers on lands *unsurveyed at date of settlement* have already filed their declaratory statements with the register of the proper land office, they will be required to make proof and payment within twelve months from the 1st day of June next, as aforesaid.

Settlers failing to comply with the requirements of this circular will be held to have forfeited their claims as preëmptors under the law.

JOS. S. WILSON, *Commissioner.*

To REGISTERS and RECEIVERS *United States Land Offices* and
SURVEYORS GENERAL *of the United States.*

WHAT IS THE LEGAL NATURE OF THE PREËMPTION RIGHT?

In Lytle *vs.* The State of Arkansas (9 Howard, 333) the court said:

The claim of preëmption is not that shadowy right which by some it is considered to be. Until sanctioned by law it has no existence as a substantive right; but when covered by law it becomes a legal right, subject to be defeated only by a failure to perform the conditions annexed to it.

It is founded in an enlightened public policy, rendered necessary by the enterprise of our citizens. The adventurous pioneer who is found in advance of our settlements encounters many hardships, and not unfrequently dangers, from savage incursions. He is generally poor, and it is fit that his enterprise should be rewarded by the privilege of purchasing the favorite spot selected by him, not to exceed one hundred and sixty acres. That this is the national feeling is shown by the course of legislation for many years.

In Delassus *vs.* The United States (9 Peters, 133) Chief Justice Marshall said:

No principle is better settled in this country than that an inchoate title to lands is property. * * * The inquiry then is whether this concession was legally made by the proper authorities, and might have been perfected into a complete title.

In Smith *vs.* The United States (10 Peters, 330) the court said:

It was never doubted by this court that property of every description in Louisiana was protected by the law of nations, the terms of the treaty, and the act of Congress, nor that in the term "property" was comprehended every species of title, inchoate or

perfect, embracing those rights which lie in contract, those which are executory, as well as those which are executed.

The supreme court of the District of Columbia, August 16, 1866, said:

The Government has granted him the option in the bargain either to go on and fulfill it until his title is perfected by the patent, *or to quit the land at his pleasure.* In the latter event the Government can suffer no damage, for it has parted with no value, and retains the title to the land. It is like a contract for the sale of land, in which the owner retains the title as security for the purchase-money.

The purchaser, unless he has given his personal contract to the contrary, may at any time abandon his improvements, and leave the property to its owner without further liability. And yet had he remained, and complied with the terms of his agreement, the owner would have been bound to him for the title, and in the meantime the purchaser had an equitable interest of which no power could deprive him without his own consent, unless taken for public use by the Government on paying of its value. * * * Under it the settler who enters upon public land, and complies with its terms, has the right by law, to demand his title from the Government, by the strict terms of a contract, and not as bounty which the Government is at liberty to grant or to withhold at its pleasure.

Its own want of either power or of disposition to take away the rights of preëmption claimants has been constantly recognized by Congress itself in its acts granting lands to railroad companies, &c.

Also, in support of positions above taken, see Fletcher *vs.* Peck, 6 Cranch; New Jersey *vs.* Wilson, 7 Cranch; United States *vs.* Fitzgerald, 15 Peters, 419; Garland *vs.* Winn, 20 How., 8; Rice *vs.* R. R. Co., 1 Black, 358; Lytle *vs.* Arkansas, 9 How., 333; Finley *vs.* Williams, 9 Cranch; McAfee *vs.* Kim, 7 S. and M. Miss. Rep., 780; Worn *vs.* Marshall, 20 How., 565; Wilcox *vs.* Jackson, 13 Peters, 498; O'Brien *vs.* Perry, 1 Black, 132; Brown *vs.* Griswold, 11 Illinois, 520; Tennett *vs.* Taylor, 9 Cranch, 43; Paulett *vs.* Clark, 9 Cranch, 292; Willot *vs.* Sanford, 10 How., 79; State of Minnesota *vs.* Batchelder, 1 Wallace, 115; Minter *vs.* Crommelin, 18 How., 87.

Also, decision of Secretary of Interior, Lester's Land Laws, page 550, December 23, 1851:

Subsequent entries, however, which have been made by preëmption, in virtue of settlements made prior to the grants, will be valid, because in those cases the right of preëmption attached from the date of the settlement, and bacame a vested right, which can be divested only by abandonment or a failure in the performance of its conditions.

SENATOR HARLAN, MAY 24, 1870, *vs.* SECRETARY HARLAN, AUGUST 30, 1866.

In support of the claims of actual settlers on the public lands, your committee feel justified in contrasting the official action of James Harlan while Secretary of the Interior, in the sale by him to the American Emigrant Company, (a corporation said to be organized under the laws of the State of Connecticut) of this 800,000 acres of land known as the Cherokee neutral lands, which was originally a part of the Osage lands, and the right of occupancy to which was purchased of them by treaty of 1825, with his opinions as stated on the floor of the Senate, on May 24, 1870, when Senate bill No. 529, providing "that the United States shall assume the absolute control and ownership of all the lands known as the Great and Little Osage reservation," in Kansas, was under consideration in that body. In reply to the speech of the Senator from Maine, (Mr. Morrill,) Mr. Harlan said:

But the honorable Senator from Maine informed the Senate that with his consent these settlers on these lands should not be permitted to purchase without competition with others one acre of land the possession of which they had acquired by wrong. He thought they were not settlers. "Settlers!" said he; "there is not a settler on these lands; they are robbers; they are trespassers; there can be no settlers until the lands are formally opened under the law for settlement and occupation!" How strangely

that must have sounded to honorable senators representing the new States here! How strangely it must have read when it met the eye of the Delegates from the Territories! How will it be understood by the inhabitants of Oregon and California? The Indian title to the land there has never been extinguished by treaty. Are there no settlers in either of those States? Are those people all land-thieves, marauders, who deserve no consideration by the Senate of the United States? You have no treaties with those Indians. Not an acre of their land has been purchased of them by the Government of the United States. How is it in New Mexico, where there are said to be over one hundred thousand white people residing to-day? Not one acre of land in that Territory has ever been purchased of the Indians by the United States, nor an acre in Arizona, nor, I believe, in Utah, and, I believe, until very recently, not an acre in Colorado, Montana, or Dakota.

Are there no settlers in these great and growing States and Territories? Are they, too, all land-thieves, who deserve no consideration? And yet you have given them consideration. You have organized for them civil governments; you have sent to them, in their territorial condition, governors and judges; you have established courts of justice, and organized, or directed them to organize, legislative assemblies. In advance of the purchase of the title to a single acre of the land from the Indians, you have authorized them to apply for admission as sovereign States of this Union. And yet they are in precisely the same condition to-day as these settlers on the Osage Indian lands, who went on in advance of the technical extinguishment of the Indian title. Are they to receive from this time forward no consideration here? Are they to be driven from their homes? Do you propose to put up their farms, their houses, humble though they may be, that shelter them and their families from the inclemency of the seasons, for sale at public outcry? Sir, you cannot find men bad enough to compete with them for title to their homes.

The proposition is totally impracticable. If the price, however, proposed in the bill, $1 25 an acre, is not enough; if you wish to charge these frontier settlers more money for their homes, to punish them for pushing on the car of civilization, amend the bill; strike out $1 25; put in two dollars, or more; but in God's name, do not put them at the mercy of land-sharks and speculators, who might be bad enough to be willing to rob the settler of the proceeds of his labor and toil. If they are trespassers, it is in a technical sense merely; morally, they are not. They have done just as their neighbors have done; just as the inhabitants of all the new States have done. They are probably no worse and no better than the average of the people found elsewhere. Ordinarily, as soon as the Indian title is extinguished, the lands are subject to settlement by preemptors, in advance of the survey, and you in your wisdom have solemnly enacted laws providing that the citizen who does so under ordinary circumstances shall have the prior right to buy his home at $1 25 an acre. This is the solemn judgment of the nation proclaimed in its statute-book, read and known of all men. But if there is any thing peculiar about these people, if they have committed any unusual oversight, make them pay smart money in an increased price for their homes; but I would not place them at the mercy of land speculators.

The proposition of the honorable Senator from Maine is incapable of execution. These people will not submit to competition in the purchase of their homes. Emigrants to the frontier will not compete with them, and outsiders will not be permitted to bid. You can provide by law for the sale at such just price as you may determine, and require them to conform to your judgment.

JOY'S PATENTS.

Your committee find that Mr. Joy has received patents for 235,139.50 acres of these lands. These patents, as has been shown, are based on an assumed conveyance by virtue of *treaties;* and being without the sanction of *law*, are simply *nullities*, and do not stand in the way of the issuing to the proper persons of *valid patents* by virtue of *act of Congress.*

In support of this position we submit the following authorities. (Opinions of Attorneys General, vol. 5, p. 7:)

It is evidently, therefore, the view of the Supreme Court that a patent issued without authority of law, or against law, is not voidable merely, but void, and being, therefore, a nullity as though it did not exist, it leaves the duty unimpaired to convey the title to the rightful owner. * * * It is an undoubted proposition that if a patent be issued without authority of law it is utterly void. Not being an act done in a court of record, there is no difficulty in the way of treating it as merely void.

2 Howard, p. 284, the court held that * * * the title of the

confirmee was made perfect by the act of confirmation, and without any patent as against the prior patent, which was simply void; and that if two patents be issued by the United States for the same land, and the first in date be obtained fraudulently, or against law, it does not carry the legal title. (See Lester's Land Laws, p. 660.)

Ross *vs.* Borland, 1 Peters, p. 656, the court held that "the second patent issued upon legal authority; the first did not; and therefore the second must prevail."

Brown *vs.* Clements, 3 Howard, p. 650, it was directly adjudged by the Supreme Court that "the second patent prevailed over the first, where the first was not legally issued."

See letter of Secretary of the Interior to the Commissioner of the General Land Office, September 29, 1859. Same to same, March 31, 1859. (Lester's Land Laws, pp. 394, 451.) See also Opinions, vol. 4, p. 558, and 14 Missouri, p. 585.

JOY'S CLAIM TO TITLE.

Mr. Joy, in his argument before the committee, February 18, 1870, (page 3, House Report 53, 2d session 41st Congress,) claims title in the Cherokees under the treaty of May 6, 1828, and amendatory treaty of February 14, 1833, and speaks of another treaty of December, 1835. This is special pleading. The facts are that the treaties of 1828 and 1833 did not mention this 800,000 acres of land at all. It does not enter the treaties until that of 1835.

Again, he should have referred the committee to the law of Congress of 1830 authorizing the exchange of lands east with the Indian tribes for land west of the Mississippi River, being the law under which the treaty of 1835 was made, and which law is specially referred to in that treaty as forming the title; and he should have informed the committee that the law of 1830 specially provides that these lands shall revert to the United States if the Indians become extinct or abandon the same, and that the patents for this land contain the same limitations, in accordance with the treaty of 1835 and the law of 1830.

The Indians could not dispose of more than they received, nor could they, under the provisions of this title, dispose of this to any other than the United States, as a disposition of their right of occupancy would work an abandonment, which, by the terms of the law of 1830, the treaty of 1835, and their patent to the land of 1838, would revert this land at once to the United States. In other words, the Indians could only occupy the lands themselves, or return the possession to the Government by a release or by default; and if they had not irretrievably defaulted it by their treaty of October 7, 1861, with the Confederate States, then our public enemy, they assuredly voluntarily released it by their treaty with the United States of August 11, 1866, and at once lost all control over it and all interest in it. The stipulated price for the release is their only claim, and that must await the action of Congress to validate it and to appropriate money for its payment. The Indians did not hold the fee, and hence could not sell it. The treaty-making power did not hold the fee, and hence could not sell it. As neither of these parties owned the land, and as neither was authorized to sell it, it is clear that they could not jointly dispose of the title, or determine the price to be paid. The United States, by its law-making power, as recognized and designated by the Constitution, alone may authorize a sale of the public domain.

The last possible shadow of title of the Cherokees had passed to the

United States by the treaty of 1866, and this treaty of 1868 was a nullity, and whatever right Joy claims from that treaty as confirmatory of his title is wholly valueless.

Let us more closely examine the duplex transaction by which this man Joy claims title to 800,000 acres of valuable public land lying in a body in a great State, and which is occupied by near eighteen thousand industrious poor people, who have settled there under the protection of the homestead and preëmption laws of Congress, to make their homes by their own industry and in which to eat their bread in the sweat of their brows. It is worth while that the American people should know who has attempted to displace them and to fasten the great wrong of capitalizing a tract of fine lands, twenty-five by fifty miles in extent, without regard to the interests of education or justice to the frontiersman, and have attempted to pass a title to this land without law, in the interest of speculators who are leeches upon the industry and prosperity of the early settlers of the country. This transaction demands both the scrutiny and the condemnation of the people of this country.

Having demonstrated that the conveyance of this tract to the Cherokees by the patent of 1838 did not confer on them a fee-simple title, it follows that all contracts and conveyances based on the assumption that they held such a title are simply *null and void.*

Their only right and power over the land was to occupy it, or relinquish the possession of it to the United States, and then it must inevitably come under the exclusive control of "Congress," and when "disposed of" must be "disposed of" by "Congress," either in accordance with laws already existing or by special acts.

The Indians could not cede to the United States in trust, as they assumed to do by article seventeen of the treaty of August 11, 1866, *title* to a tract of land to which they had only a right of *occupancy*, which was necessarily terminated by the act of cession.

They could not, as they assumed by treaty to do, appoint an officer of the United States a trustee to hold or to sell lands belonging to the United States. And the Indians and the treaty-making power of our Government together were not competent to "dispose of" this property of the United States to an individual without congressional enactment, or to cure by the second treaty, 1868, a first contract, which was itself defective for the same reasons.

The ONLY ACT *of Congress* quoted by Mr. Joy in his argument before your committee, *on which to base his title*, is found on page 73 of volume 5, United States Statutes. It is an item in an appropriation act, and reads thus:

> For the amount stipulated to be paid for the lands ceded in the first article of the treaty with the Cherokees of 29th December 1835, *deducting* the cost of the land to be provided for them west of the Mississippi, under the second article of said treaty, *four* million five hundred thousand dollars.

By no contortion of logic or proper interpretations of law could that sentence be held to do anything more than to give an implied assent to the Indian possession of the Cherokee neutral lands. It made no contract, and its provisions could as well have applied to a lease as to a *fee.*

The treaty had based its own power on the law of May 28, 1830, and provided for a patent in accordance therewith, with special reference to its proviso of limitation of title.

Congressional sanction to *such a title as these would give* had already been obtained, and it is idle to plead that a clause providing for the retention by the United States of $500,000, part of the value of a title

of occupancy in Georgia, could or did *fix or in any way affect* the character of the title of the Indians or the Government to these lands, and especially that it should have expanded the title to a fee-simple, despite the restriction of the law, treaty, and patent.

Mr. Joy quotes another law, that of July 25, 1856. (U. S. Stat., vol. 14, page 236.

By reference to this it will be seen that all settlers on any lands to be affected by it are protected under the preëmption and homestead laws up to the date of the "*withdrawal*" of such lands from market; but as no such "withdrawal" of any part of this tract has yet taken place, no railroad company could disturb any settler on this tract up to the present date.

Mr. Joy quotes section 10 as follows:

> Section 10 provides that the said Kansas and Neosho Valley Railroad Company shall have the right to negotiate with, and acquire from, any Indian nation or tribe authorized by the United States to dispose of lands for railroad purposes, and from any other nation or tribe of Indians through whose lands the said road may pass, subject to the approval of the President of the United States, &c.

The pretended purchase of the Cherokee neutral lands *was not made by any "railroad company," but by James F. Joy;* and in the supplemental treaty of June 10, 1868, *not the slightest intimation can be found that the purchase was made by, or for the benefit of, a "railroad company."* A sale to "James F. Joy" is not a sale to a "railroad company;" the contract, which is contained in the supplemental treaty, is the only evidence that would be admitted in a court as to who the purchaser was; and no assumed conveyance of the land from Joy to a railroad company can bring the original sale *to* him within the scope of that law. *If* the sale *to* Joy was *valid*, he might at any time between the date of his purchase and that of his attempt to convey it to the railroad company, (nearly or quite a year,) have made any other disposition of it he saw fit, and no person or no *company* could have hindered him.

The claim of Mr. Joy then is found to be without any other support than the assumption that a treaty can "dispose of" the landed property of the United States.

To concede this would be to take out of the hands of the House of Representatives all legislative power over the immense extent of our territory still occupied by Indians, and, in fact, over all the public domain; as treaties with foreign powers could work the same results with public territory, if sustained in this case, and would be restricted to a disposition of national limits by treaty stipulations, as France did Louisiana to us in 1803.

To hold that an Indian occupancy gives the treaty-making power a right to dispose of the public lands, while the Constitution reserves to Congress the power to dispose of them, is to say that the constitutional power of Congress operates or not, according as Indians are or are not present on lands. If this be so, then while Congress might be enacting a law their power might be interrupted by an Indian raid on lands, which is absurd.

CONTRACT OFFERED TO SETTLERS BY JOY.

Your committee are satisfied that these settlers would have no certainty of obtaining titles to their homes, if they were to accept the terms and the contracts proposed by Mr: Joy, for the following reasons:

Mr. Joy, it appears, has attempted to convey these lands to the Mis-

souri River, Fort Scott and Gulf Railroad Company, and this company has given a mortgage, or trust deed, on the lands to three capitalists.

This mortgage, or trust deed, Mr. Joy, in his plea before your committee, stated had conveyed a title. He also says:

> Having become involved in this matter in this way, and finding it necessary to raise the money to build the road, in order to save myself, if I can do it at all, this land and the road were included in an ordinary railway mortgage to secure such bonds as might be issued to be sold for the construction of the road, with a provision in the mortgage that whenever the land should be sold the trustees should realize that. Thus we could raise money on the credit of the land for the purpose of building the road. Bonds to the amount of $5,000,000 are scattered all over the United States, bought by gentlemen who knew the lands, and knowing the right and title.

CONTRACT.

Land department of the Missouri River, Fort Scott and Gulf Railroad Company.

No. ——

This agreement, made this ——— day of ———, in the year 18—, between the Missouri River, Fort Scott and Gulf Railroad Company, of the first part, and ——— ———, of the county of ——— State of ———, of the second part, witnesseth, that in consideration of the stipulations herein contained and the payments to be made, as is hereinafter specified, the first party hereby agrees to sell unto the second party the ——— of section No. ——— in township No. ——— south, of range No. ——— east of the sixth principal meridian, in the county of ———, and State of Kansas, containing, according to the United States survey, ———$_{000}$ acres, be the same more or less, for the sum of ———$_{000}$ dollars, and the said second party hath paid the sum of ———$_{000}$ dollars, being one year's interest, in advance, at seven per cent. per annum, on the purchase-money. And the said second party, in consideration of the premises, hereby agrees to pay to the first party at the land department of the Missouri River, Fort Scott and Gulf Railroad Company, at Fort Scott, Kansas, the following sums of principal and interest, at the several times named below:

When due.	Interest.		Principal.		Evidence of payment.
	Dollars.	Cts.	Dollars.	Cts.	
Due .....18..					
Due .....18..					
Due .....18..					
Due .....18..					
Due .....18..					
Due .....18..					
Due .....18..					

And it being mutually understood that the above premises are sold to said second party for improvement and cultivation, the said second party hereby further agrees and obligates ———, ——— heirs and assigns, that all improvements placed upon said premises shall remain thereon, and shall not be removed or destroyed until final payment for said land; and further that —— will punctually pay said sums of money above specified, as each of the same becomes due; and that —— will regularly and seasonably pay such taxes and assessments as may be lawfully imposed upon said premises.

In case the said second party, ——— legal representatives, or ——— assigns, shall pay the several sums of money aforesaid punctually, and at the several times above limited, and shall strictly and literally perform all and singular ——— agreements and

stipulations aforesaid, after their true tenor and intent, then the first party shall make unto the said second party, ——— heirs or assigns, (upon request at the land office of the first party, at Fort Scott, and the surrender of this contract,) a deed, conveying said premises in fee-simple, with the ordinary covenants of warranty; reserving, however, a strip of land, ONE HUNDRED AND FIFTY FEET WIDE, to be used by the first party for a right of way or other railroad purposes, where the line of the Missouri River, Fort Scott and Gulf Railroad is laid over the premises.

But in case the second party shall fail to make the payments aforesaid, or any of them, punctually and upon the strict times and terms above limited, and likewise to perform and complete all and each of ——— agreements and stipulations aforesaid, strictly and literally, without any failure and default, the times of payment being of the essence of this contract, then the party of the first part shall have the right to declare the contract null and void, and all rights and interests hereby created or then existing in favor of the said second party, or derived under this contract, shall utterly cease and determine, and the premises hereby contracted shall revert to and revest in said first party, (without any declaration of forfeiture, or act of reëntry, or without any other act by the said first party to be performed, and without any right of said second party of reclamation or compensation for moneys paid or improvements made,) as absolutely, fully, and perfectly as if this contract had never been made.

And it is further stipulated that no assignment of the premises shall be valid unless the same shall be indorsed hereon, or permanently attached hereto, and countersigned by the commissioner of the land department, (for which purpose this contract must be sent to this Department, by mail or otherwise,) and that no agreement or conditions or relations between the second party and ——— assignee, or any other person acquiring title or interest from or through ———, shall preclude the first party from the right to convey the premises to said second party, or ——— assigns, on the surrender of this agreement and the papment of the unpaid portion of the purchase-money which may be due to the first party.

In witness of which the Missouri River, Fort Scott and Gulf Railroad Company hath caused these presents, in duplicate, to be signed by the commissioner and the secretary, and countersigned by the cashier of the land department, and the second party hath hereunto set ——— name on the day and year first above written.

Countersigned.

——— ———,
Cashier.

——— ———,
Commissioner.

——— ———,
Secretary.

——— ———,
Purchaser.

Witness:

——— ———.

ASSIGNMENT.

I, ———, the within-named purchaser, for and in consideration of ——— dollars, do hereby assign and transfer all my right, title, interest, and claim in and to the ——— within described, unto ———, his heirs and assigns, forever. And I do hereby authorize the land department of the Missouri River, Fort Scott and Gulf Railroad Company to receive from him, the said ———, all unpaid balances due to said company, in part consideration for said land, and upon the final payment of all the purchase-money and a full compliance with all the requirements contained in the within agreement, to execute, or cause to be executed, to him, the said ———, his heirs and assigns, a deed for said land, instead of to me.

It is expressly understood that, in consenting to recognize this assignment, the officers of this department do not exempt the original purchaser from any of his liabilities under the contract, but to protect the rights of the assignee, provided he complies with its obligations.

No assignment is valid unless a five-cent revenue stamp is affixed.

Given under my hand and seal this ——— day of ———, A. D. 18—.

——— ———. [SEAL.]

Countersigned:

——— ———, *Commissioner.*

STATE OF ———, ——— *County, ss:*

Before me, ——— ———, in and for said county, this day personally came ——— ———, who is known to be the identical person who is described in the within agreement, and who executed the foregoing assignment, and acknowledged that he signed

sealed, and delivered the same as his free and voluntary act and deed for the use and purposes therein set forth.

Given under my hand this ——— day of ———, A. D. 18—.

——— ———

And on such an arrangement as this it is that these settlers are asked to purchase of the Missouri River, Fort Scott and Gulf Railroad Company. Not to pay cash down and receive warranty deeds, for this has been repeatedly refused them, but to enter into a contract, drawn in the most stringent style, with the most perilous conditions of forfeiture, all against the settler, and stipulating for a series of payments with interest running through a period of seven years; at the end of which time the railroad company agrees, if there has been no forfeiture, to give the purchasers deeds for their homes. If Mr. Joy had had a good title, and if the Missouri River, Fort Scott and Gulf Railroad Company was an institution that could neither change nor cease to exist, and if capitalists could do no wrong, and if all parties concerned were not human beings but angels, still this arrangement would be open to the objection of being complicated and tedious.

Your committee can only account for the fact of this contract having been entered into by any of these settlers by calling attention to the presence on these lands of a part of the Army of the United States, and that these people were induced to believe that the Government would force them to accept Mr. Joy's terms or eject them from their homes.

Certainly so miserable a contract would never be signed by sane men, except under compulsion.

CONCLUSIONS.

Your committee concludes—

1. That the Cherokee Indians held a title by occupancy only in their Georgia lands; and, hence, could convey or exchange no more than this title.

2. Congress has the sole power to dispose of the public domain; and that the Executive, with the advice and consent of the Senate, by treaty cannot do this thing.

3. That Congress passed no law authorizing a treaty passing fee-simple title to any Indian tribe to any lands whatever, and especially this tract of 800,000 acres to the Cherokees.

4. That Congress did on the 28th day of May, 1830, pass a law, providing in section 3, p. 411, U. S. Statutes, vol. 4, for *exchanging* lands west for lands east of the Mississippi River with Indian tribes, specially providing for a reversion of title to the Government.

5. That by treaty of December 29, 1835, these 800,000 acres (neutral lands) were agreed to be ceded conditionally to the Cherokees for $500,000, which was a part of the valuation of the title of occupancy surrendered by the Cherokees by the same treaty to their Georgia lands.

6. That Congress, by an appropriation act of July 2, 1836, (see vol. 5 Statutes, p. 73,) took to the Government a credit for amounts due the Cherokees for the value of the Georgia release the sum of $500,000, in exchange for this neutral land. (This statute is published as obsolete, and was referred to by Joy.)

7. That there was no other or different consideration for the 800,000 acres now in controversy than the $500,000, part of the valuation of the purchase of the title of occupancy of the Cherokees to the Georgia lands as above stated.

8. That the treaty of 1835, for the transfer to the Cherokees, by the United States, of the neutral lands, 800,000 acres for the $500,000, and

for the transfer of the Georgia lands to the United States, by the Cherokees, for $5,000,000, of which the $500,000 was a part, was between the same identical parties, namely, the United States and the Cherokee tribe or nation of Indians.

9. That the treaty of 1835, for the transfer of this neutral land, expressly conforms to the law of 1830, and hence is subject to its restrictions, provisions as to title, and limits the fee.

10. The treaty of 1835 provides for issuing a patent for the lands exchanged, and, accordingly, a patent issued for the same, December 1, 1838, containing the proviso of the law of 1830, limiting the title to the conditions of this law.

11. On the 4th day of September, 1841, Congress passed a law granting the right of preëmption to actual settlers on the public lands, with the privilege to them to pay for their homes, not exceeding 160 acres each, in one year from the date of settlement.

12. On the 22d day of July, 1854, Congress specially extended this law over Kansas and Nebraska, and provided that it should extend to the lands in those Territories to which the Indian title "had been or shall be extinguished."

13. On the 2d of June, 1862, Congress, by general law, extended the law of preëmption to all lands belonging to the United States, carrying these same provisions touching Indian title with it.

14. On the 28th day of May, 1862, Congress passed the homestead laws, for the benefit of actual settlers on the public lands.

15. On the 7th day of October, 1861, the Cherokee Indians, in their tribal capacity, entered into an alliance, offensive and defensive, with the government of the so-called "Confederate States of America," then at war with the United States, in which they agreed to sell to that government this tract of 800,000 acres of land, and to receive a payment of $150,000 thereon immediately on the confirmation of that treaty, thus abandoning the land.

16. By a treaty of August 11, 1866, with the United States, the Cherokees undertook to cede this same land in trust to the United States, and to authorize its sale for their benefit, and to direct the manner of sale.

17. That the treaty-making power is not competent, without a law of Congress authorizing it, to revive by treaty the forfeited rights of the Cherokees to the neutral lands which they lost by their abandonment of the terms under which they received it from the United States, in the sale to the Confederate States of America, the public enemy of the United States; and therefore the attempt of the treaty of 1866, in so far as it attempts to pardon the Cherokees and restore them to their original rights, is a nullity.

18. That this treaty (article 17) also provided for the cession to the United States, with the same conditions, of a tract lying along the south side of the State of Kansas, and known as the Cherokee strip, containing about ——— acres, which should be subject to the preëmption laws.

19. The conditions were two-fold: 1st. The lands were to be sold after due advertisement for sealed bids, in tracts not exceeding 160 acres to one person, and for a sum not less than $1 25 per acre; and in the 17th amended article it was provided that the Secretary is not to be prohibited from selling all the land ceded by that treaty, in a body, for not less than $1 per acre; which, with the subsequent proceedings, gives it the appearance of a preparation for the purpose of a certain sale and purchase then desired, by which, perhaps, the Indians, the Government, and the settlers were not the persons intended to be benefited.

20. The sale of the neutral lands only, and $1 per acre to the American Emigrant Company, by Harlan, is not a compliance with the provision of the treaty permitting the Secretary to sell "all the lands herein ceded in a body" at that rate; and is certainly void, as the reduced price was evidently one condition of a sale of all qualities of the land, and prompt time, as the fund was to be placed on interest for the benefit of the Indians, after deducting expenses, and was without notice or competition.

21. The revocation of Harlan's sale to the American Emigrant Company by his successor, Mr. Browning, was correct, and should have been unconditionally carried out, as it was intended at the time, in accordance with Attorney General Stanbery's opinion.

22. The subsequent sale to Joy, without law, and without official notice, by Mr. Browning, October 9, 1867, was as much a violation of law and justice as the sale by Harlan to the American Emigrant Company; and is open to the same provision.

23. Treaties with Indian tribes within our territory and jurisdiction, and without a law of Congress directly authorizing them, are nullities, and not within the meaning of the sixth article of the Constitution of the United States.

24. The sale in trust to the United States, under treaty of 1866, and the confirmatory treaty of 1868, are for that purpose mere nullities; are simple proofs of abandonment.

25. The coöperation of the Indians in the treaties of 1866 and 1868, authorizing or confirming the sales of Harlan or Browning, adds nothing to the power of the Secretary of the Interior, who acted without law, and the sales are unconditionally void from the beginning, and should be so declared by opening those lands to settlement under the preëmption and homestead laws.

26. Those laws were in operation over this land so far that the treaty-making power admitted the lawful claims of one thousand and thirty-one familes as actual settlers on the land.

27. It being true that the preëmption laws covered that land prior to the treaty of 1866, it could not be displaced by a treaty which is less than the law. The law is still in force, and the treaty is invalid, and Joy takes nothing by his contract under it.

28. There was no public, civil, or military necessity for this extraordinary exercise of power. The treaty of August 11, 1866, under which this sale was made, attempts, by simply declaring the treaty with the Confederate States void, to restore to the Cherokees this land which it was properly assumed by both parties they, by their treaty with the Confederate States of America, had lost. The same treaty undertook to cede this, with other lands, to the United States in trust, to be sold for the benefit of the Cherokees, no debt to be incurred for the land in any event until sold. There was not only no necessity but there was no excuse for the sale. Its only purpose seems to have been to *capitalize* this land in the hands of speculators. It was done without authority and without necessity and is void.

29. The Cherokees and the United States both understood that the Cherokees had forfeited this land, and the treaty of 1866 first undertook to restore it, and then to cede it in trust to the United States. But meantime the preëmption laws extended over it, and the treaty was void and of no effect.

30. That the fact that laws on the statute of the nation guaranteed the right of preëmption when the Indian title should be extinguished was

sufficient to warrant settlers in locating on these lands as they did, not only with the *consent* of the Indians, but under their direct encouragement, and that the moral obligation of the Government to these settlers is strengthened by the fact that their location there was made under assurances from Presidents and Senators of the United States.

PETITION OF THE SETTLERS ON THE NEUTRAL LANDS.

We, the undersigned, residents of the "Cherokee neutral lands," in the State of Kansas, would respectfully represent that the settlement of these lands has been made under assurances from President Buchanan before the war, and President Johnson since the war, that the Indian title would be extinguished by the United States, and that we would get titles to our homes from the Government under the laws of Congress; that our own Senators have always written to us in such a manner as to encourage the settlement of this country, and to assure us of titles from the Government at Government rates; that the Cherokees had ever since the war earnestly encouraged settlers to locate here, and that the General Government has exercised complete jurisdiction here ever since the war, and the State of Kansas since the treaty with the Cherokees of August 11, 1866; and further, that there are now about thirty-five hundred families who have located here, expecting to make permanent homes for themselves; that most of us have expended all of our means in necessary expenses for living, and in improving our claims; that two-thirds of us have been soldiers in the Union Army; that our settlement of the neutral lands has been made under unusual difficulties, which we have borne, trusting the Government to protect us in the rights accorded to settlers of the new parts of our country by the preëmption and homestead laws; and further, that the title to this tract has never in any instance passed from the United States by any act of Congress.

We therefore respectfully petition the Congress of the United States to declare by law that all assumed sales or conveyances of this tract purporting to have been made by virtue of any treaty or treaties are null and void, and to declare the "Cherokee neutral land" public land of the United States, to be opened to settlement under preëmption and homestead laws.

Your committee find the above petition signed by about one thousand seven hundred of the settlers on these lands. A very large majority of them are shown to have been soldiers of the Union Army. The petition also shows that these people have been at a very heavy expense to maintain themselves during the most difficult periods of a pioneer settlement; and the labor and means invested by them in improving their claims, as well as the fact that the petition shows this population to consist of families, is sufficient proof that the occupants intended to make permanent homes upon them.

The appeal of so many American citizens is not, in any case, to be lightly regarded. When such a number of people, and more especially of the defenders of our country, feel themselves outraged, it is *prima facie* evidence of a wrong attempted upon them.

Mr. Story, in his work on the Constitution, (vol. 1, p. 341,) says:

> To establish justice, must forever become the great end of every wise government; and even in arbitrary governments it must be, to a great extent, practiced at least in respect to private persons, as the only security against rebellion, private vengeance, and popular cruelty. But in a free government it lies at the very basis of all its institutions. Without justice being freely, fully, and impartially administered, neither our persons, nor our rights, nor our property can be protected. And if these, or either of them, are regulated by no certain laws, and are subject to no certain tenure, and are redressed, when violated, by no certain remedies, society fails of all its value, and men may as well return to a state of savage and barbarous independence.

Neither the American people, the Government of the United States, nor either or any political party, can afford to refuse or to delay *justice* to these people.

That the Government of the United States is bound in law and by every consideration of justice, of good faith, and of sound policy, to see that every *bona fide* settler on the Cherokee neutral lands is allowed to obtain a perfect title to his home, under the laws of the United States;

and that it is the duty of the United States to see that the patents issued to James F. Joy be *canceled* without expense to the rightful claimants, and that the transactions between him and the Secretary of the Interior for the purchase of this land be delared void from the beginning.

Your committee have carefully considered the bill to dispose of the Cherokee neutral lands in Kansas to actual settlers only, (H. R. 1074,) and do not hesitate to pronounce it just to the Indians, just to the settlers, and just to Mr. Joy, and do earnestly recommend its passage at the earliest practicable day.

Your committee might have been pardoned for passing over in silence the fact that United States soldiers have been stationed on the neutral land for nearly a year, if it had not been mentioned by Mr, Joy, in his argument, and also thrust before the public, through the newspapers and otherwise.

The founders of our Government saw a great danger in a too free or an improper use of the military power, and provided for its restraint in the Constitution and by acts of Congress.

Constitution of the United States, article 4, section 4:

The United States shall guarantee to every State in this Union a republican form of government, and shall protect each of them against invasion, and on application of the legislature, or of the executive, (when the legislature cannot be convened,) against domestic violence.

United States Statutes at Large, volume 1, page 424, (act of February 28, 1798:)

SEC. 2. * * * * And in case of an insurrection in any State against the government thereof, it shall be lawful for the President of the United States, on application of the legislature of such State, or of the executive, (when the legislature cannot be convened,) to call forth such number of the militia of such State or States as may be necessary to suppress such combinations, and to cause the laws to be duly executed, and the use of the militia so called forth may be continued, if necessary, until the expiration of thirty days after the commencement of the then next session of Congress.

SEC. 3. *Provided always, and be it further enacted*, That whenever it may be necessary, in the judgment of the President, to use the military force hereby directed to be called forth, the President shall forthwith, by proclamation, command such insurgents to disperse and retire to their respective abodes within a limited time.

United States Statutes at Large, volume 2, page 443, (act of March 3, 1807 :)

Be it enacted, &c,, That in all cases of insurrection, or obstruction to the laws, either of the United States, or of any individual State or Territory, when it is lawful for the President of the United States to call forth the militia for the purpose of suppressing insurrection, or of causing the laws to be duly executed, it shall be lawful for him to employ for the same purposes such part of the land or naval forces of the United States as shall be judged necessary, *having first observed all the prerequisites of the law in that respect.*

Your committee learn from the sworn testimony taken by a committee of the Kansas legislature—the governor of the State being among the witnesses—that no attempt was made to convene the legislature of Kansas; that the governor made the request for troops *on his own responsibility* before even issuing a proclamation, or attempting in any way whatever to use the constitutional power of the State. In fact, your committee are assured, from the testimony above alluded to, that there has never been any necessity for the presence of troops to aid in the *services of process* or the *administration of law* on the neutral land; and it is a strange fact that these troops have remained—as may be seen from answer of the President, given a few days since, to resolution of inquiry on the subject by the House of Representatives—not *thirty days*, but *one hundred and seventy-five days* since the commencement of the present *session of Congress;* and that they have been *furnished* with *quarters* by the *Missouri River, Fort Scott and Gulf Railroad Company.*

The officer in command testifies before the committee of the Kansas legislature that the force he commands has not been called on to assist the civil officers or the courts in any way whatever.

Your committee need not suggest the danger of allowing *governors of States*, without observing a *single "prerequisite of the law,"* to call in the *moral support* of the Army of the United States to aid railroad companies in their contest with the people. (See opinion of Attorney General Cushing, on application of governor of California, given July 19, 1856.)

DEPARTMENT OF THE INTERIOR,
Washington, D. C., May 31, 1870.

SIR: In reply to your request of this date I have the honor to inclose herewith copies of the following papers now on file in this Department, viz:

First. Letters-patent to the Cherokee domain, dated 31st day of December, 1838.

Second. The agreement between Hon. James Harlan, former Secretary of the Interior, and the American Emigrant Company, for the sale of the Cherokee neutral lands in Kansas.

Third. The assignment of the American Emigrant Company to James F. Joy.

I am, sir, very respectfully, your obedient servant,

J. D. COX,
Secretary.

Hon. J. P. C. SHANKS,
Of the Committee on Indian Affairs,
House of Representatives.

Letters-patent to Cherokee domain.

THE UNITED STATES OF AMERICA.

To all whom these presents shall come, greeting:

Whereas by certain treaties made by the United States of America with the Cherokee nation of Indians, of the 6th of May, one thousand eight hundred and twenty-eight, the 14th of February, one thousand eight hundred and thirty-three, and the 29th of December, one thousand eight hundred and thirty-five, it was stipulated and agreed, on the part of the United States, that in consideration of the promises mentioned in the said treaties, respectively, the United States should guarantee, secure, and convey, by patent to the said Cherokee Nation, certain tracts of land; the descriptions of which tracts and the terms and conditions on which they were to be conveyed and set forth in the second and third articles of the treaty of the 29th of December, one thousand eight hundred and thirty-five, in the words following, that is to say:

"ART. 2. Whereas, by the treaty of May 6, one thousand eight hundred and twenty-eight, and the supplementary treaty thereto of February 14, one thousand eight hundred and thirty-three, with the Cherokees west of the Mississippi, the United States guaranteed and secured to be conveyed by patent to the Cherokee Nation of Indians the following tract of country: beginning at a point on the old western territorial line of Arkansas Territory, being twenty-five miles north from the point where the territorial line crosses the Arkansas River; thence running from said north point south on the said territorial line, where the said territorial line crosses Verdigris River; thence down said Verdigris River to the Arkansas; thence down said Arkansas to a point where a stone is placed, opposite the east or lower banks of Grand River, at its junction with the Arkansas; thence running south forty-four degrees west one mile; thence in a straight line to a point four miles northerly from the mouth of the North Fork of the Canadian; thence along the said four-mile line to the Canadian; thence down the the Canadian to the Arkansas; thence down the Arkansas to a point on the Arkansas where the eastern Choctaw boundary strikes said river, and running thence with the

western line of Arkansas Territory as now defined, to the southwest corner of Missouri; thence along the Western Missouri line to the land assigned the Senecas; thence on the south line of the Senecas to the Grand River; thence up said Grand River as far as the south line of the Osage reservation, extended if necessary; thence up and between said south Osage line, extended west if necessary, and a line drawn due west from the point of beginning to a certain distance west, at which a line running north and south from said Osage line to said due west line will make seven millions of acres within the whole described boundaries.

"In addition to the seven millions of acres of land thus provided for and bounded, the United States further guarantee to the Cherokee Nation a perpetual outlet west and a free and unmolested use of all the country west of the western boundary of said seven millions of acres as far west as the sovereignty of the United States and their right of soil extend: *Provided, however*, That if the saline or salt plain on the Western Prairie shall fall within said limits prescribed for said outlet, the right is reserved to the United States to permit other tribes of red men to get salt on said plain in common with the Cherokees, and letters-patent shall be issued by the United States as soon as practicable for the land hereby guaranteed. And whereas it is apprehended by the Cherokees that in the above cession there is not contained a sufficient quantity of land for the accommodation of the whole nation on their removal west of the Mississippi, the United States, in consideration of the sum of five hundred thousand dollars, therefore hereby covenant and agree to convey to the said Indians and their descendants, by patents in fee-simple, the following additional tract of land situated between the west line of the State of Missouri and the Osage reservation, beginning at the southeast corner of the same, and runs north along the east line of the Osage lands fifty miles to the northeast corner thereof; and thence east to the west line of the State of Missouri; thence with said line south fifty miles; thence west to the place of beginning; estimated to contain eight hundred thousand acres of land; but it is expressly understood that if any of the lands assigned the Quapaws shall fall within the aforesaid bounds, the same shall be reserved and excepted out of the lands above granted, and a pro rata reduction shall be made in the price to be allowed to the United States for the same by the Cherokees.

"ART. 3. The United States also agree that the lands above ceded by the treaty of February fourteen, one thousand eight hundred and thirty-three, including the outlet and those ceded by this treaty, shall all be included in one, executed to the Cherokee Nation of Indians by the President of the United States according to the provisions of the act of May twenty-eight, one thousand eight hundred and thirty.

"It is, however, agreed that the military reservation at Fort Gibson shall be held by the United States; but should the United States abandon said post, and have no further use for the same, it shall revert to the Cherokee Nation. The United States shall always have the right to make and establish such post and military roads and posts in any part of the Cherokee country as they may deem proper for the interest and protection of the same, and the free use of as much land, timber, fuel, and materials of all kinds for the construction and the support of the same as may be necessary; provided, that if the private rights of individuals are interfered with, a just compensation therefore shall be made."

And whereas the United States have caused the said tract of seven millions of acres, together with the said perpetual outlet, to be surveyed in one tract, the boundaries whereof are as follows: Beginning at a mound of rocks four feet square at base and four and a half feet high, from which another mound of rocks bears south one chain, and another mound of rocks bears west one chain, on what has been denominated the old western territorial line of Arkansas Territory, twenty-five miles north of Arkansas River; thence south twenty-one miles and twenty-eight chains to a post on the northeast bank of the Verdigris River, from which a hackberry, fifteen inches in diameter, bears south sixty-one degrees thirty-one minutes east forty-three links, marked C. H. L., and a cottonwood, forty-two inches diameter, bears south twenty-one degrees fifteen minutes east fifty links, marked C. R. K. L.; thence down the Verdigris River, on the northeast bank, with its meanders, to the junction of Verdigris and Arkansas Rivers; thence from the lower bank of Verdigris River on the north bank of Arkansas River, south forty-four degrees thirteen minutes east fifty-seven chains to a post on the south bank of the Arkansas River, opposite the eastern bank of Neosho or Grand River, at its junction with the Arkansas, from which a red oak, thirty-six inches diameter, bears south seventy-five degrees forty-five minutes west twenty-four links, and a hickory, twenty-four inches diameter, bears south eighty-nine degrees east four links; thence south fifty-three degrees west one mile, to a post, from which a rock bears north fifty-three degrees east fifty links, and a rock bears south eighteen degrees eighteen minutes west fifty links; thence south eighteen degrees eighteen minutes west thirty-three miles twenty-eight chains and eighty links to a rock, from which another rock bears north eighteen degrees eighteen minutes east fifty links, and another rock bears south fifty links; thence south four miles to a post on the lower bank of the

North Fork of Canadian River, at its junction with Canadian River, from which a cottonwood twenty-four inches diameter bears north eighteen degrees east forty links, and a cottonwood fifteen inches diameter bears south nine degrees east fourteen links; thence down the Canadian River, on its north bank to its junction with Arkansas River; thence down the main channel of Arkansas River to the western boundary of the State of Arkansas, at the northern extremity of the eastern boundary of the lands of the Choctaws, on the south bank of Arkansas River, four chains and fifty-four links east of Fort Smith; thence north seven degrees twenty-five minutes west, with the western boundary of the State of Arkansas, seventy-six miles sixty-four chains and fifty links to the southwest corner of the State of Missouri; thence north on the western boundary of the State of Missouri, eight miles forty-nine chains and fifty-links, to the north bank of Cowskin or Seneca River, at a mound six feet square at base and five feet high, in which is a post marked on the south side cor. N. Ch. Ld.; thence west on the southern boundary of the lands of the Senecas, eleven miles and forty-eight chains, to a post on the east bank of Neosho River, from which a maple eighteen inches in diameter bears south thirty-one degrees east seventy-two links; thence up Neosho River, with its meanders, on the east bank to the southern boundary of the Osage lands, thirty-six chains and fifty links west of the southeast corner of the lands of the Osages, witnessed by a mound of rocks on the west bank of Neosho River; thence west on the southern boundary of the Osage lands to the line dividing the territory of the United States from that of Mexico, two hundred and eighty-eight miles thirteen chains and sixty-six links to a mound of earth six feet square at base, and five and a half feet high, in which is deposited a cylinder of charcoal twelve inches long, four inches diameter; thence south along the line of the territory of the United States and of Mexico, sixty miles and twelve chains, to a mound of earth six feet square at base and five and a half feet high, in which is deposited a cylinder of charcoal eighteen inches long and three inches diameter; thence east along the northern boundary of the Creek lands, two hundred and seventy-three miles fifty-five chains and sixty-six links, to the beginning, containing within the survey thirteen million five hundred and seventy-four thousand one hundred and thirty-five acres and fourteen-hundredths of an acre:

And whereas the United States have also caused the said tract of eight hundred thousand acres to be surveyed, and have ascertained the boundaries thereof to be as follows: Beginning at the southeast corner of Osage lands, described by a rock, from which a red oak, thirty inches diameter, bears south twenty-seven degrees east seventy-six links, and a burr-oak, thirty inches diameter, bears south fifty-nine degrees west one chain; and another burr-oak, thirty inches diameter, bears north eight degrees west one chain and thirty-seven links; and another burr-oak, forty inches diameter, bears north thirty degrees west one chain and eighty-one links, and running east twenty-five miles, to a rock on the western line of the State of Missouri, from which a post-oak, ten inches diameter, bears north forty-eight degrees thirty minutes east four chains; and a post-oak, twelve inches diameter, bears south sixty-two degrees east five chains; thence north with the western boundary of the State of Missouri, fifty miles, to a mound of earth five feet square at base, and four and a half feet high; thence west twenty-five miles to the northeast corner of the lands of the Osages, described by a mound of earth six feet square at base, and five feet high; thence south along the eastern boundary of the Osage lands, fifty miles to the beginning, containing eight hundred thousand acres:

Therefore, in execution of the agreements and stipulation contained in the said several treaties, the United States have given and granted, and by these presents do give and grant, unto the said Cherokee Nation the two tracts of land so surveyed and hereinbefore described, containing in the whole fourteen millions three hundred and seventy-four thousand one hundred and thirty-five acres and fourteen-hundredths of an acre: To have and to hold the same, together with all the rights, privileges, and appurtenances thereunto belonging, to the said Cherokee Nation forever, subject, however, to the rights of the United States to permit other tribes of red men to get salt on the salt plain on the Western Prairie, referred [to] in the second article of the treaty of the twenty-ninth of December, one thousand eight hundred and thirty-five; which salt plain has been ascertained to be within the limits prescribed for the outlet agreed to be granted by said article, and subject, also, to all the other rights reserved to the United States, in and by the articles hereinbefore recited, to the extent and in the manner in which the said rights are so reserved, and subject also to the condition provided by the act of Congress of the twenty-eighth of May, one thousand eight hundred and thirty, referred to in the above-recited third article, and which condition is that the lands hereby granted shall revert to the United States if the said Cherokee Nation becomes extinct or abandon the same.

In testimony whereof I, Martin Van Buren, President of the United States of America, have caused these letters to be made patent, and the seal of the General Land Office to be hereunto affixed.

Given under my hand, at the city of Washington, the thirty-first day of December,

in the year of our Lord one thousand eight hundred and thirty-eight, and of the independence of the United States the sixty-third.

[L. S.] M. VAN BUREN.

By the President:

H. M. GARLAND,

Recorder of the General Land Office.

This agreement, made this 30th day of August, A. D. 1866, by and between James Harlan, Secretary of the Interior, on behalf of the United States, of the one part, and the American Emigrant Company, a corporation chartered and existing under the laws of the State of Connecticut, of the other part—

Witnesseth: That the said Harlan agrees to sell, and hereby doth sell, to the said company all that tract of land known as the "Cherokee neutral lands," in the State of Kansas, containing (800,000) eight hundred thousand acres, more or less, with the limitations and restrictions set forth in the seventeenth article of a treaty between the United States and said Cherokee Indians, ratified on the 11th day of August, A. D. 1866, as amended by the United States Senate, with all the beneficial interest therein, at the rate of one dollar per acre in lawful money of the United States, to be paid to the Secretary of the Interior in trust for said Indians as hereinafter set forth, viz: Twenty-five thousand dollars on the execution hereof, twenty-five thousand dollars on the approval of the surveys of said lands by the Commissioner of the General Land Office, and twenty-five thousand dollars on the 30th day of August, 1867; seventy-five thousand dollars on the 30th day of August, 1868, and seventy-five thousand dollars on the 30th day of August, 1869; seventy-five thousand dollars on the 30th day of August, A. D. 1870, and one hundred thousand dollars per annum thence afterward until the whole shall be paid; each of said several sums to draw interest at the rate of five per cent. per annum from the date of the approval of the surveys aforesaid.

The said American Emigrant Company agree to pay the said several sums of money, with interest thereon as aforesaid, to the said Secretary in Washington, in lawful money of the United States as the same shall become due; the said interest on each and all deferred payments to be paid annually on the first day of July. The United States agree to cause said lands to be surveyed as public lands are usually surveyed in one year from the date hereof, and on the payment of fifty thousand dollars to set apart for said company a quantity of said lands in one body in as compact form as practicable, extending directly across said tract of land from east to west and containing a number of acres equal to the number of dollars then paid, and from time to time to convey the same by patent to said company, or its assigns, whenever afterward requested so to do, in such quantities by legal subdivisions as said company shall indicate; and on the payment of each additional installment, with interest as herein stipulated, to set apart for said company an additional tract of land in compact form, where said company may request, but extending directly across the said neutral lands from east to west, containing a number of acres equal to the number of dollars of principal thus paid, and to convey the same to said company or its assigns as hereinbefore described; and so on from time to time until the whole shall be paid; and no conveyance of any part of said lands shall be made until the same shall be paid for as provided in this agreement; but said company may make payments at earlier periods than those indicated, or pay the whole, principal and interest, and receive titles of tracts of land accordingly, if they shall so elect.

In witness whereof said Harlan has hereto affixed his name and the seal of the Department of the Interior of the United States, and the said Emigrant Company has also, by Franklin Chamberlin, a director of said company, thereto lawfully authorized by vote of said company, (copy whereof is hereto annexed,) and affixed the name and seal of said company the day and year first above written.

Executed in presence of—

W. PENN CLARKE.

JAMES HARLAN,

Secretary of the Interior.

[SEAL.]

AMERICAN EMIGRANT COMPANY,

By F. CHAMBERLIN,

Director and Attorney in fact.

HARTFORD, CONNECTICUT, *June* 6, *A. D.* 1868.

For value received, the American Emigrant Company, a corporation chartered and existing under the laws of the State of Connecticut, do hereby assign and transfer unto James F. Joy, of the city of Detroit, Michigan, all the right, title, claim, or interests which the said American Emigrant Company has in or to a certain contract made and entered into on the 30th day of August, eighteen hundred and sixty-six, with James Harlan, Secretary of the Interior, on behalf of the United States, for the sale of the Cherokee neutral lands, and do transfer to said James F. Joy the credit and benefit of

the twenty-five thousand dollars which was paid to the Secretary of the Interior in trust for said Indians at the execution of said contract on the 30th day of August, eighteen hundred and sixty-six, and to be applied as a portion of the seventy-five thousand dollars named in article first of the modifications in the supplemental article to a treaty dated April 27, eighteen hundred and sixty-eight, signed by N. G. Taylor, commissioner, and others.

In witness whereof the American Emigrant Company has hereto, by the hand of George M. Bartholomew, president of said company, thereto duly authorized, duly affixed its name and seal the date and year first above written.

[SEAL.] THE AMERICAN EMIGRANT COMPANY,
By GEO. M. BARTHOLOMEW,
President.

Witness:
J. B. GRINNELL.

[U. S. revenue five-cent stamp.]

RESOLVE incorporating the American Emigrant Company. [General Assembly, May session, A. D. 1863.]

Resolved by this assembly, SECTION 1, That Andrew G. Hammond, Francis Gillette, John Hooker, Franklin Chamberlin, and Henry K. W. Welch, all of the city of Hartford, in this State; Samuel P. Lyman, of the city and State of New York; and Ferdinand C. D. McKay, James C. Savery, and Tallmadge E. Brown, all of the city of Des Moines, in the State of Iowa; and their successors and assigns, be, and they are hereby, made a corporation, under the name of the American Emigrant Company, for the purpose of procuring and assisting emigrants from foreign countries to settle in the United States, and especially in the Western States and Territories of the same; with power to purchase lands and dispose of the same for actual settlement, where there is nothing in the laws of the States or Territories where such lands shall be situated that shall forbid such purchase and holding, or where license shall be obtained from any such States or Territories authorizing such purchase and holding; and with all the usual corporate powers necessary and proper to carry out the objects of the corporation.

SEC. 2. The capital stock of said company shall not exceed one million of dollars, and shall amount to one hundred and eighty thousand dollars before said company shall commence operations. The capital shall be divided into shares of one hundred dollars each, which shall be transferrable in writing in such mode as the by-laws of the company shall prescribe.

SEC. 3. The company shall have power to enact by-laws, not inconsistent with the provisions of this charter, nor with the laws of this State or the United States, prescribing the mode of electing its officers and their duties, the number of directors, the time and place of the annual meetings, the manner of calling special meetings, the mode of transferring the stock of the company, and generally with regard to the manner of conducting the business of the company.

SEC. 4. The officers of the company shall consist of a president, vice-president, treasurer, and secretary, and a board of directors, who shall have the usual powers of such officers.

SEC. 5. At all meetings of the company the stockholders shall vote by shares, and any stockholder not present may vote upon his stock by proxy, the authority in such case to be given in such manner as shall be prescribed by the by-laws.

SEC. 6. The first meeting of the company shall be holden at the Exchange Bank, in the city of Hartford, on the first Monday in July, 1863, at 2 o'clock in the afternoon, at which meeting the officers of the company shall be elected, who shall hold office until the next annual meeting.

SEC. 7. The directors of the company shall, within four months after the first day of January in each year, lodge in the office of the secretary of this State a certificate, signed and sworn to by the secretary of the company, or by two of the directors, stating, so nearly as can be ascertained, the amount and general character of the assets of the company and the amount of its liabilities; and in case such certificate shall not be so made and lodged, the directors of the company, for the time being, shall be personally liable for all debts of the company contracted during the time of such neglect.

SEC. 8. This act shall take effect from its passage, and may be altered, amended, or repealed at the pleasure of the general assembly.

RESOLUTION amending the charter of the American Emigrant Company. [General Assembly, May session, A. D. 1865.]

Resolved by this general assembly, SECTION 1. That the American Emigrant Company, incorporated by resolution of the general assembly, at its session in May, A. D. 1863, shall have power, in addition to the powers conferred by the original charter, to make contracts for the chartering of steamships and other vessels for the transportation of emigrants; to purchase, own, and run such vessels for such purpose; to deal in passenger tickets for the foreign and inland transportation of emigrants by land and water;

to buy and sell foreign bills of exchange; to take charge of, dispatch, and deliver goods transmitted between this and other countries; and to act as agent for the sale of lands in all parts of the country to emigrants, settlers, and others.

SEC. 2. Said company shall also have power to make contracts for improvements upon lands held by them for sale to emigrants, and to buy and hold sheep and other stock, for the purpose of selling or letting the same to emigrants and other settlers.

At a meeting of the directors of the American Emigrant Company, held at the office of the company in New York, on the 28th day of August, 1866—present, Messrs. Harris, Chamberlin, Williams, Savery, and Hooker—*voted*, That F. Chamberlin, esq., one of the directors of the American Emigrant Company, be, and he hereby is, authorized to negotiate and execute, in the name and behalf of the company, a contract with the United States Government for the purchase of the Cherokee neutral lands, in the State of Kansas, at such price per acre, and payable upon such terms, as may be agreed upon.

A true copy of the original vote. Attest:

JOHN HOOKER, *Secretary.*

[5-cent revenue stamp.]

We recommend that the bill do pass.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 13.

ARLINGTON PROPERTY AND NATIONAL CEMETERIES.

[To accompany bill H. R. No. 2715.]

JANUARY 13, 1871.—Ordered to be printed and recommitted to the Committee on Military Affairs.

Mr. STOUGHTON, from the Committee on Military Affairs, made the following

REPORT.

The Committee on Military Affairs, in pursuance of the resolution of the House of Representatives of March 17, 1870, relating to the title of the United States Government to the Arlington property, and other grounds occupied as cemeteries for Union soldiers who died during the war for the suppression of the rebellion, have the honor to submit the following report:

During the progress of actual hostilities but little attention could be paid to the graves of the soldiers of the republic. Great care was, however, taken to mark not only the graves of the Union dead, but also those of the enemy who died within our lines. Soon after the surrender of the confederate armies in the field a general system of military cemeteries was commenced, and placed, by the Secretary of War, under the supervision of the Quartermaster General. These cemeteries were located at convenient points throughout the United States. In the Eastern and Middle States the burials have been made in civil cemeteries, and the same course has generally been pursued in the Western States. In the Southern States the cemeteries are owned by the Government, and these, together with a limited number in the Western States, are under the immediate supervision of the War Department. It is believed that they have been arranged in a becoming and appropriate manner—the graves marked with headboards painted white and lettered in black, giving, whenever possible, the name, rank, and regiment of the soldier, and the date of his death.

From the records of the War Department it appears that the whole number of interments in all of the cemeteries is 307,225, and that the actual expenditures of the Government have been, up to March 12, 1870, $3,112,209. The following list comprises those cemeteries the title of which has become vested in the Government of the United States, as shown by the records of the Quartermaster General's office:

National Cemeteries in possession of the United States Government.

Running No.	Name of cemetery.	Name of prior owner.	Name of present owner.	Date of deed to United States.	Number of acres.	Remarks.

The cemeteries at Gettysburg, Pennsylvania, and Antietam, Maryland, do not appear in this list, for the reason that they are governed by boards of trustees, and have not yet been transferred to the General Government.

The national cemetery at Andersonville is also omitted. The Government has not yet been able to obtain the record title from the former owner upon reasonable terms. It embraces about forty-three acres of land, worth, in its original state, from three to five dollars per acre. Over twenty-five thousand dollars have been expended in improving and decorating the grounds. It was originally established by the rebel authorities for the burial of the Union prisoners confined in the prison pen near Andersonville. The interments at this place number 13,717 bodies, most of which were victims of a systematic barbarity without a parallel in the annals of civilized warfare.

The Arlington Cemetery, three miles from the city of Washington, is situated on what is known as the Arlington estate, the property for many years of the late George Washington Park Custis, who bequeathed it to Custis Lee, the oldest son of his daughter, the wife of General Robert E. Lee, of the rebel army. Custis Lee was also a rebel officer. The property was in the possession of the insurgents until our Army crossed the Potomac early in the war, when it was taken possession of by the Union troops. It was subsequently appropriated to the use of the Government as a cemetery for Union soldiers and the interments now number 15,207. It is estimated that the Government has expended $231,000 in its improvement. During the rebellion the estate was sold for arrearages of taxes, and the United States became the purchaser.

It is to be observed, however, that, like the cemeteries at Chattanooga and Knoxville, it was appropriated by the United States for the necessary purpose of the burial of the nation's dead during actual hostilities. Such an appropriation rests solidly, it is believed, upon the right of conquest; and even if no war had existed it would be an exercise of the right of eminent domain. From its very nature it is also permanent and lasting.

The title acquired at the tax sale of the Arlington estate is, perhaps, cumulative, but the ownership of the Government does not depend upon its validity. That the conqueror has a right to take so much of the conquered territory as may be necessary for cemeteries, forts, and arsenals is too clear to admit of controversy. This right is fully recognized by all writers on international law. (Grotius, book 3, chap. 6, sec. 1 and 11; Vattel, 364; Wheaton, 419.) The law of nations, indeed, recognizes the right of *postliminium*, or of the right of return, on the coming into power again of the nation to which the property originally belonged. Grotius, book 3, chap. 9, says: "Among things recoverable by postliminy the first to be considered are lands. It is true, (saith *Pomponeus*,) the enemy being beaten out of the lands which they had seized on, the right of them returns to the former owner; but the enemy must be understood then to be driven out from the time wherein it is plainly evident that they cannot return." The land may also revert to the original owner when it is no longer required for the use of the state; but in case of a cemetery, it is evident that such a time can never come. The object for which it was taken is as lasting as time, and utterly precludes any possibility of any reversion.

The act of Congress of February 22, 1867, entitled "An act to establish and protect national cemeteries," makes ample provisions for the maintenance and protection of national cemeteries, and also authorizes the Secretary of War to purchase and take any real estate that may, i

his judgment, be necessary for establishing cemeteries for the burial of the soldiers of the republic. The act also provides that the Secretary of War, or the owner or owners of the real estate so appropriated, may make application to any district or circuit court within any State or district where the same is situated, for an appraisement of the property so taken, and the interest of any claimant thereto.

It would, therefore, seem that no further legislation is necessary to enable the Government to perfect any questionable title. The committee, however, recommend the passage of the accompanying bill, in order that all questions concerning the future action of the Government may be settled and determined.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 14.

POLLY W. COTTON.

[To accompany bill H. R. No. 2718.]

JANUARY 14, 1871.—Ordered to be printed.

Mr. NEGLEY, from the Committee on Military Affairs, made the following

REPORT.

The Committee on Military Affairs, to whom was referred for investigation the claim of Mrs. Polly W. Cotton, widow of Wayne W. Cotton, captain Company G, Seventh regiment Tennessee volunteers, beg leave respectfully to submit the following report:

It appears upon examination that the petitioner is the widow of Wayne W. Cotton, who served as a captain in the Seventh Tennessee infantry, but was never commissioned, nor were other officers in like circumstances.

It further appears that said W. W. Cotton was taken prisoner by the enemy in 1862, and was afterwards exchanged as a captain and rejoined his command in December of the same year.

It further appears that he remained on duty as captain with his regiment until he was ordered to Scott County, Tennessee, to recruit the regiment, and two days afterwards was taken sick of small-pox and died.

It further appears that the petitioner is now drawing a pension as the widow of a private, but your committee are clearly of the opinion that she is entitled to a pension as the widow of a captain.

Your committee therefore, firmly believe that the claim is just in every particular, and earnestly recommend that the bill be at once passed for the full amount of said claim.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 15.

ROBERT P. CHOWDEN.

[To accompany bill H. R. No. 2719.]

JANUARY 14, 1871.—Ordered to be printed.

Mr. NEGLEY, from the Committee on Military Affairs, made the following

REPORT.

The Committee on Military Affairs, to whom was referred for investigation the claim of Robert P. Chowden, late assistant surgeon Third Tennessee mounted infantry, beg leave respectfully to submit the following report:

It appears, upon examination, that on or about August 5, 1864, Dr. R. P. Chowden was appointed assistant surgeon of said Third regiment Tennessee mounted infantry.

It further appears that the petitioner did faithfully and honestly perform his duties as such to the 20th day of December, 1864, when the said Third regiment Tennessee mounted infantry was mustered out of the service to the date November 30, 1864.

It further appears that the petitioner, owing to misunderstanding and great irregularities in the organization, had never been commissioned or mustered as assistant surgeon; and, therefore, the pay and allowances due him for his services as above stated have never been paid.

Your committee, therefore, believe that the petitioner, having rendered in good faith the services alleged, and having done nothing to forfeit his pay and allowances, recommend that a bill be passed at once for the full amount of said claim.

O

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 16.

A. V. RICHARDS.

[To accompany bill H. R. No. 2720.]

JANUARY 14, 1871.—Ordered to be printed.

Mr. NEGLEY, from the Committee on Military Affairs, made the following

REPORT.

The Committee on Military Affairs, to whom was referred for investigation the claim of A. V. Richards, late lieutenant and signal officer United States Army, beg leave respectfully to submit the following report:

It appears that A. V. Richards passed the board of examination, and on or about February, 1864, was recommended by said board to promotion as commissioned officer.

It further appears that the petitioner was assigned to duty as second lieutenant on or about March 22, 1864, and was commissioned as such on May 10, 1865.

It further appears that the petitioner has rendered distinguished services as second lieutenant from the 22d of March, 1864, to the 10th May 1865, without receiving any compensation but that of an enlisted man, and that this resulted from no fault or error of the petitioner, but from the clerical defect in the commission, that it was not dated from the day he was recommended and assigned for duty as lieutenant.

Your committee therefore believe that the claim is just, and recommend that the accompanying bill be at once passed for his relief.

C

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 17.

BOYDEN vs. SHOBER.

JANUARY 16, 1871.—Laid on the table and ordered to be printed.

Mr. MCCRARY, from the Committee of Elections, made the following

REPORT.

The Committee of Elections have had under consideration the case above mentioned, and have directed me to submit the following report:

The following are the grounds of contest alleged by contestant in his notice of contest:

"1. That the election for Representative in Congress held in said district on the 3d day of November, 1868, was void, for want of a compliance with the law of North Carolina. First, in this: that the said law required that at each election precinct in the said district, there should be furnished and opened boxes separate and distinct from the boxes furnished and opened for deposit of ballots for candidates for presidential electors, whereas no separate and distinct boxes for the deposit of votes for the election of members of the House of Representatives were furnished and opened at more than some five or six precincts in the said sixth congressional district of North Carolina, but, on the contrary, the ballots by which you are supposed to have been elected were written or printed on the same slip of paper as the names of the candidates for presidential electors, and were deposited in the boxes furnished and opened for the reception of the ballots for the election of presidential electors. And for the further reason, that the said supposed election, it is insisted, was illegal and void in this: that the law of North Carolina prescribing the mode of conducting and declaring the results of the said congressional election requires the sheriffs of the several counties composing the said sixth congressional district of North Carolina, after having canvassed and ascertained the number of legal votes polled in their several respective counties, to meet at the county seat of Iredell County on a day now past, and there to canvass and ascertain the number of ballots polled in their respective counties the several candidates had received, and who had received the highest number of said votes, (if any one candidate had received such number,) and to give such candidate a certificate of his election; but if no one candidate had received the highest number of votes, but that two or more candidates had received the same and the highest number of votes polled, that in that event the said sheriffs should select between those having the same and the highest number of votes, and to give such candidate a certificate of his election; whereas no such meeting of the sheriffs of several counties composing the said district has been had, nor has there been by the said sheriffs any comparison of the votes polled in their several respective counties composing the said sixth con-

gressional district, nor has any certificate of election been given by the said sheriffs to any one of the candidates voted for at the said election, and there is no person or officer in North Carolina now authorized to canvass and compare the said polls nor to give a certificate of election. And it is insisted that the said supposed election is void for the further reason that the law required that separate judges and inspectors of the said congressional election should have been appointed to hold the said congressional election for each precinct in the said district, which was not done."

2. Fraud in attempting to mislead voters by means of a forged circular, purporting to come from the chairman of the national republican executive committee, by means of which voters were misled.

3. Intimidation and threats by which many persons who would have voted for contestant were deterred from voting.

4. Fraud practiced upon voters who could not read, by cutting off of the republican ticket the names of the republican candidates, and pasting on the names of the democratic candidates, and thus fraudulently inducing illiterate voters to vote against contestant contrary to their wishes and intention.

5. That the contestee was, at the time of his election, ineligible, and unable to take the test oath, having held the office of member of the legislature of North Carolina under the so-called confederate government and thus given aid and comfort to the rebellion.

The sitting member admitted his inability to take the test oath, and did not offer to qualify until after Congress had passed an act to relieve him from disability. (See Private Laws, second session forty-first Congress, page 32.) The passage of this act, and the resolution of the House directing contestee to be sworn into office, disposes of the question of eligibility.

There is not sufficient proof to sustain either the second, third, or fourth grounds of contest. That a few persons were intimidated, and some others defrauded by spurious tickets and a forged circular, is more than probable; but there is no proof to connect contestee with any of these things, and, besides, the evidence wholly fails to show that a sufficient number of votes were affected by these means to change the result. We are left, therefore, to the consideration of the first ground of contest, viz: That the election was wholly void by reason of a failure to comply with the statutory provisions concerning the manner of conducting the election.

It is said that the law of North Carolina, rightly construed, required that two ballot-boxes should have been kept at each poll, and that all ballots for member of Congress should have been deposited in one, and all ballots for electors for President and Vice-President in the other.

There seems to be some doubt as to the true construction of the statute of North Carolina, but assuming that the construction contended for by contestant is correct, we are of opinion that the statute is directory only, and that the failure to provide two ballot-boxes, and the deposit of all the ballots in one box, did not render the election void in the absence of fraud. If the ballots were freely cast, if they were honestly and fairly counted, and correctly returned, we should be unwilling to hold that a mere mistake of the election officers as to whether the ballots should go into one box or two, should be allowed to defeat the will of the majority.

It is claimed that the certificate of election was not issued to contestee by competent authority; that it should have been issued by the sheriffs of the several counties comprising the district, and not by the governor. The law upon this subject is not cited in the record, and the point is not

pressed. Indeed, it has been rendered immaterial by the action of the House in accepting the credentials of contestee and ordering him to be sworn into office thereon. We may remark, however, that the failure or refusal of the proper officer to issue a certificate of election would only render it necessary for the House to go back to the returns and poll-books and ascertain, if possible, from these, or from any competent and sufficient evidence, who was actually elected, and award the seat accordingly.

We are of opinion, therefore, that the contestant has failed to sustain the points made by him in his notice of contest, with the exception of the fifth point, which was sustained by the proof, but which was rendered immaterial by the act of Congress relieving contestee from his disability.

Your committee are of opinion that the contestant has prosecuted this contest in good faith and with reasonable cause, and that under the practice of the House in similar cases he is entitled to compensation for the expenses incurred by him.

We therefore recommend the adoption of the accompanying resolutions:

Resolved, That Nathaniel Boyden is not entitled to a seat in this House as a Representative from the sixth district of North Carolina.

Resolved, That Francis E. Shober is entitled to retain his seat in this House as a Representative from said district.

Resolved, That there be paid to Nathaniel Boyden, out of the contingent fund of the House, the sum of one thousand dollars in full for his expenses in contesting the seat of Hon. Francis E. Shober as a Representative from the said sixth district of North Carolina.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 18.

MAIL STEAMSHIP SERVICE IN THE GULF OF MEXICO.

[To accompany bill H. R. No. 1955.]

JANUARY 17, 1871.—Ordered to be printed and recommitted to the Committee on the Causes of the Reduction of American Tonnage.

Mr. WELLS, from the Select Committee on the Causes of the Reduction of American Tonnage, made the following

REPORT:

The special committee of the House on the causes of the decline of American commerce and the remedies therefor, have recommended the granting of Government aid by way of postages on mails, and by subsidies, so as to insure the establishment of lines of American ocean steamers to foreign ports, thus securing to our people the profits of the trade so created.

In view of this general recommendation the committee believe that the proposed establishment of a line of steamers between the port of New Orleans and the Gulf ports of the Republic of Mexico must not only result in a vast increase of our commerce, but as a direct and necessary step to the cultivation of those friendly political relations that should subsist between ourselves and our sister republic, and necessary to the maintenance of our power and control on this continent.

The policy of Great Britain, and the results of a judicious system of aiding her lines of ocean steam communication, has been generally adverted to by the chairman of the committee in his report of last session. We now call the special attention of the House to the consequences of this aid in our intercourse with Mexico.

In 1868 [?] Señor Tejada, minister of the Mexican treasury, in his report estimated the foreign commerce of Mexico at $54,000,000, of which over three-fifths were with Great Britain and controlled by British steamers, while but about one-seventh of the amount was with the United States.

We have no reason to think that this proportion has changed, as the statistics of the two countries show about the same relative proportion of exports to Mexico, while her export trade is almost exclusively carried by foreign vessels.

In 1864 the exports from Vera Cruz, as reported by the American consul, amounted to nearly $11,000,000, of which only one-twentieth was to the United States; and in 1868, from the same port, they amounted to $6,300,000, of which only one-tenth was to the United States. All this trade is done principally by Great Britain, over four thousand miles distant from Mexico, and by steamers consuming fifty-six days in the round trip, while, at the same time, the port of New Orleans is within three and one-half days of Vera Cruz, and within thirteen days of Europe.

With the temporary aid of the Government your committee believe that in a short period the American ports could be made the distributing

points for Mexican commerce, and her specie and passengers destined for Europe would select the speedier route, via New Orleans and New York.

So important has become the South and Central American trade that France, imitating Great Britain, now maintains magnificent steamer lines to all their principal ports, and we witness the humiliating sight of a vast commerce passing through our waters and by our very doors to enrich foreign countries. As long as this policy of Government aid is pursued by Great Britain and France, no successful competition can be maintained here unless our Government, equally generous, will place our business interests on such a footing that we can combat for the supremacy, or at least a fair division. Mexico has in vain appealed to the United States to adopt a more liberal policy. In 1857 she passed a law giving, for ten years, a subsidy of $120,000 per annum for a similar project to the one now under consideration. No successful legislation here was accomplished, although the Senate of the United States, by a vote, gave similar aid; but the amendment to the bill then pending was lost in the House. In 1870 she again passed a law giving limited aid to a line from New Orleans, ($750 per trip,) unimportant in itself but manifesting her still good will to the United States. It is now within our power to respond to these friendly offers and thus cement the postal, commercial, and political relations of the two countries. Your committee also believe that the amount of postal aid will, during the first year, be more than fully returned by increased revenue, and that at the expiration of this contract the additional annual revenue will be equal to the entire amount expended upon the line.

No people on earth as well as those of the United States so fully understand the vast wealth developed and created by railroad lines. The analogy is perfect as to ocean routes. They are the railroads of the ocean, making the world pay tribute to us and creating vast markets for our products and manufactures. We give millions to the one; shall we hesitate at a few thousands to the latter? It is not the province of your committee to advert to the political relations of the two countries, but all will readily understand the increased power and control that more intimate communication will give us, hastening the time when Mexico, developed, will pour out her lavish tropical products, and the great Mississippi Valley and fertile Northwest find there, and in the countries further south, the reliable and certain markets for their cereals, and New England a steady demand for her manufactures.

The line under consideration will form a part of the merchant marine, upon which, in time of public danger, the country can draw to add to her naval strength. Your committee have only alluded in general terms to the result of this enterprise, but they trust have indicated enough to draw to it the serious consideration of the House. They avail themselves of the privilege of laying before the House the statistics of the amount of trade for the last twenty years with our West Indian and Spanish American neighbors, showing the vast wealth to be annually earned in freights alone, should we become able to establish our carrying supremacy. In no possible way can we reduce the annual balance of trade against us except by bringing these countries in close contact, and through quicker and cheap markets develop the natural advantage of our proximity, substituting our own steamers for the wealthy steam lines of European countries. Physical laws have determined this commerce whenever we think proper to use the advantages we possess. Our southern neighbors raise products almost exclusively tropical. Their tobacco, sugar, and coffee are as necessary to us as our manufac-

tures, machinery, and flour should be to them. These can be made so by a judicious application of aid, developing our natural commercial advantages. In fact, the whole of the American Archipelago, and the countries adjacent thereto, can be made as much our home markets as are the States for each other.

The commercial prize, for the possession of which we hold so many favorable conditions, is of a magnitude that will surprise those who have not carefully examined the subject. Taking the Gulf of Mexico as the geographical unit, and grouping together only the trade of the islands thereof and of the countries having a maritime front or outlet on it, we have the following results:

EXHIBIT A.

Tabular statement of the trade of the United States with the countries named, from 1850 *to* 1859.

Countries.	Imports.		Exports.		Totals.
	In American vessels.	In foreign vessels.	In American vessels.	In foreign vessels.	
Mexico	$25,571,834	$8,903,499	$23,972,002	$5,250,467	$63,697,802
Cuba and Porto Rico	248,689,714	16,367,019	100,169,956	3,247,489	368,474,178
British West Indies, Honduras, and Guiana	15,387,383	6,254,620	44,416,605	15,007,100	81,065,708
French West Indies	775,389	729,284	4,788,065	6,489,832	12,782,570
Danish West Indies	2,060,780	540,157	9,086,790	2,114,288	13,812,015
Hayti and San Domingo	19,825,834	2,067,226	18,906,241	2,697,938	43,497,239
Central America	4,955,600	319,089	3,282,362	281,989	8,839,040
New Granada and Venezuela	42,267,670	6,003,615	26,939,814	1,153,603	76,364,702
Total	359,124,093	41,184,769	231,561,855	36,913,433	668,784,148

EXHIBIT B.

Tabular statement of the trade of the United States with the countries named, from 1860 *to* 1869.

Countries.	Imports.		Exports.		Totals.
	American vessels.	Foreign vessels.	American vessels.	Foreign vessels.	
Mexico	$36,370,374	$20,121,820	$33,874,206	$37,556,550	$127,922,950
Cuba and Porto Rico	286,820,075	122,366,584	130,297,712	52,499,002	591,983,473
British West Indies, Honduras, and Guiana	15,586,767	23,376,990	38,478,198	54,844,683	132,286,738
French West Indies	1,169,167	2,060,457	6,612,615	6,419,084	16,261,423
Danish West Indies	2,115,146	2,221,728	6,152,669	6,870,963	19,360,606
Hayti and San Domingo	8,214,391	7,238,388	16,983,268	18,766,956	51,203,903
Central America	2,787,888	2,796,050	2,719,870	1,581,709	9,885,317
New Granada and Venezuela	42,308,606	16,836,202	36,882,978	13,210,571	109,238,357
Total	395,372,414	197,018,219	272,000,716	191,749,518	1,056,140,867

An examination of the foregoing tables shows not only the extent and growth of our inter-American commerce, but it also shows the rapid decline of our carrying trade. For example, it appears that from 1850 to 1859 American vessels carried goods to the value of—

Imports	$359,124,093
Exports	231,561,853
A total of	590,685,946

During the same period foreign vessels carried goods to the value of—

Imports	$41,184,769
Exports	36,913,433
A total of	78,098,202

This left for that decade a balance to our credit, so far as the carrying trade was concerned, of $512,587,744. Take the late decade, from 1860 to 1869, and the balance in transportation is heavy against us. The account stands as follows: American vessels carried goods to the value of—

Imports	$395,372,414
Exports	272,000,716
A total of	667,373,130

This gives for the American carrier an increase of only $66,687,204. During the same period foreign vessels carried goods to value of—

Imports	$197,018,219
Exports	191,749,518
A total of	388,767,737

The total increase of trade for the last decade has been $387,356,719, of which amount the foreign ship-owner has had the transportation of all but $1,411,018, thus showing an increased handling of values on their part of $309,258,517.

If we examine further we shall find that the balance of trade against us amounts, from 1850 to 1859, to	$132,643,576
In the next period, from 1860 to 1869, it is	128,640,399
Or an actual decrease in the last ten years	4,003,177

Taking the large increase of the total trade into consideration, and the proportion on the export side of the ledger is still more favorable. Yet, as hasbeen shown, all this increase furnishes profits to the foreign carrier, and not to that merchant marine of which we have heretofore been so proud.

Something more than the cost of ship-building, the changes in naval architecture, the rates of wages, or the depression in maritime interests caused by the rebellion are necessary to account for this rapid and astounding transfer of a business so profitable and lying so conveniently to our hands. That something is found, in the opinion of your committee, in the great development of the British and French steam commercial marine, more especially in American waters, a development which has been stimulated and is sustained by a liberal system of subsidy. The merest tyro in commercial affairs comprehends instantly how trade is created by the regular arrival of steamers at stated periods. It needs no elaborate inquiry to establish this, and one of the most potent causes of the transfer of our inter-American carrying trade to English, French, and German bottoms (principally the former) is seen in the fol-

lowing facts relative to the annual subsidies paid by Great Britain to her transatlantic lines:

To and from United States, (Inman,) weekly	$175,000
To and from United States, (Cunard,) semi-weekly	350,000
To and from Halifax, Bermuda, and St. Thomas, (Cunard,) monthly	95,000
To and from Great Britain and North America	620,000
To and from England and the West Indies, (royal mail)	$864,570
To and from St. Thomas, Porto Rico, and Havana	6,000
To and from St. Kitts, Nevis, and Mont Senat	2,450
Total	873,020
To and from Panama and west coast of South America, (Pacific Steam Navigation Company)	$91,250
To and from England to Brazil, (royal mail)	$167,500
Making a total of direct subsidies	$1,751,770

In addition to these eight subsidized lines, employing a fleet of about 75 vessels, with a burden of 150,000 at least, there is one other British line—West India and Pacific Steamship Company—entering the Mexican Gulf and making a monthly circuit of its principal points. It receives heavy postal rates, inland as well as sea. To and from South American Atlantic ports there are three other English lines, receiving similar postal rates as the second West Indian line. The lowest estimate of the amount paid the Transatlantic and other Anglo-American lines carrying English mails is set down at about $600,000, which gives a total of subsidy and aid to that branch of their commerce of at least $2,351,770.

France sustains an increasing transatlantic commerce in the same way. The French Transatlantic Company and the Messageries run lines to North, Central, and South America. The first company runs regularly two lines into the Gulf of Mexico, making a regular circuit and touching at the principal islands and the Mexican ports, in addition to the regular New York steamers. They receive a subsidy of $1,000,000, with all the postage on mails carried by them. The South American service, which is conducted by the Messageries Company, cost nearly or quite as much as the Transatlantic. It may be fairly estimated that European subsidies paid to their American steam lines will reach an aggregate of not less than $4,500,000. The effect of this policy, so far as Great Britain is concerned, is at once evident. Since 1850 her steam tonnage has increased 1,300 per cent., while her sailing tonnage has increased only 70 per cent. Her merchants and ship-owners are doing to-day six-tenths of that trade which by every natural law belongs to us. These facts and results are full of instruction. They point the road by which we can greatly aid the recovery of our commercial prestige. The passage of the bill now reported, the committee believe, would be a long step in that direction.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 19.

NORTHWESTERN BOUNDARY COMMISSION.

[To accompany H. Res. No. 464.]

JANUARY 14, 1871.—Ordered to be printed.

Mr. SWANN, from the Committee on Foreign Affairs, made the following

REPORT.

The Committee on Foreign Affairs, to whom was referred that portion of the President's message relating to the northwestern boundary, beg leave to report as follows:

During the spring of the past year a military commission; under Major General Sykes, United States Army, and Captain Head, was ordered by Major General Hancock to locate the line of the forty-ninth parallel by a series of solar and lunar observations, with a view to the new post and military reservation proposed to be established by the United States. This survey, fixing the international boundary, throws that line, if correct, upwards of 4,600 feet north of the one hitherto recognized, and the Hudson Bay post at Pembina within the territory of the United States.

So soon as this fact was discovered, the collector of the custom-house at Pembina addressed a communication to the Secretary of the Treasury, dated June 23, 1870, asking instructions as to which of these lines should be recognized by him in the discharge of his official duties.

On the 13th day of August, 1870, the acting Secretary of State addressed a communication to the Treasury Department, informing that Department that no joint action had been taken by the United States and Great Britain for marking upon the surface of the ground that portion of the boundary along the forty-ninth parallel, which extends from the Lake of the Woods to the Rocky Mountains, and suggesting that no proceedings be adopted by the custom-house authorities which would disturb the existing condition of things on the border until the British government could be informed of the discovery which had been made by the officers of the Engineer Corps.

On the 15th of August, 1870, the acting Secretary of State transmitted a copy of his letter to the Treasury Department to Mr. Motley, and requested him to inform the British government of the discovery which had been made by the engineer officers of the United States in regard to the true location of the boundary, as ascertained by the usual scientific method of determining such matters, which was accordingly done in a letter to Earl Granville, dated October 17, 1870.

On the 4th of November, 1870, Sir Edward Thornton, in a letter to the acting Secretary of State, says:

> Whether the post which was erected last spring is on the forty-ninth parallel or not can easily be verified; but in the meantime it would be very desirable that the small

force now in that neighborhood should remain there for the protection of persons and the security of the mails. The only shelter, however, which they can find is in the Hudson Bay Company's fort. The Governor General has therefore forwarded a request to the Canadian government that I would confer with the Secretary of State as to the expediency of allowing the boundary line which was run by Captain Pope to be considered as the boundary for the present, until the real boundary is ascertained and finally settled, so that the Hudson Bay post may be used as a shelter during the winter; for they consider that it is in the interest of the inhabitants on both sides of the line that order should be preserved on the frontier, which result can best be attained by a body of troops of both nations being stationed in its vicinity.

Such being the state of facts touching this recent discovery, the President of the United States deems it important that this part of the boundary line be definitely fixed by a joint commission of the two governments, in which this committee fully concur.

In order to facilitate the early action of Congress in disposing of this subject, a detailed estimate of the expense of a joint commission was prepared by the Bureau of Engineers, and submitted by the Secretary of War in a communication to Mr. Fish, dated November 25, 1870.

The committee recommend the adoption of the accompanying joint resolution.

O

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 20.

JOHN L. THOMAS, JR.

[To accompany H. Res. No. 471.]

JANUARY 27, 1871.—Ordered to be printed and recommitted to the Committee of Ways and Means.

Mr. MAYNARD, from the Committee of Ways and Means, made the following

REPORT.

The Committee of Ways and Means, to whom was referred the petition and accompanying papers of John L. Thomas, jr., collector of the port of Baltimore, for relief, beg leave to report:

On the 1st of May, 1869, John L. Thomas, jr., was appointed collector of customs for the port of Baltimore, and entered upon the duties of his office. On taking charge of his office he found one Richard N. Bowerman acting as special deputy collector, and who, as such, had general supervision of the custom-house. This man, Bowerman, had been appointed by Mr. Thomas's predecessor, and had held the office for some four years prior to Mr. Thomas coming into office.

As soon as the collector had opportunity to discover the workings of the system at that time prevailing at said port, (the collector acting in the duplex capacity of collector and designated depositary,) he became satisfied that it was defective and liable to great abuse, and, setting himself at work to correct the same, he addressed to the Secretary of the Treasury a letter, which is inclosed in the following communication:

TREASURY DEPARTMENT,
Office of the Secretary, March 26, 1870.

SIR: During the last year my attention has been frequently called to the fact that the business of Baltimore was rapidly increasing, and that the necessity existed for the establishment of the office of assistant treasurer there as an independent office. At present the public moneys are deposited with the collector, who holds and disburses the same.

I inclose a copy of a letter received from the collector of that port, in which he sets forth the reasons for establishing the office of assistant treasurer. Accompanying this is a statement of the receipts and payments by him during the fiscal year ending June 30, 1869.

I concur in the views presented by the collector, and respectfully recommend the establishment of the office of assistant treasurer at Baltimore. Should this recommendation meet the approval of the committee to which it may be referred, the Department will, if desired, furnish a draught of a bill.

I am, very respectfully, &c.,

GEO. S. BOUTWELL, *Secretary.*

Hon. JAMES G. BLAINE,
Speaker House of Representatives.

CUSTOM-HOUSE, BALTIMORE,
Collector's Office, March 9, 1870.

MY DEAR SIR: Soon after the assembling of Congress, in December last, I wrote you an official letter, calling your attention to the want of an assistant treasurer at this port, and requesting you to ask Congress for the establishment of such an office.

Nothing as yet has been done in the matter, and I again desire to call your attention to the same, in the hope that it may not be overlooked. I consider it of great importance that something should be done in this direction. It is utterly impossible for me to act in the double capacity of collector of customs and United States depositary, as both of them cannot receive my personal attention.

The business of this port has increased so rapidly that it is as much as one man can do to attend to the duties of collector faithfully, and I do not think it is right that the Government should compel me to act in a two-fold capacity.

The responsibility of being the United States depositary is a heavy one, and ought to have the undivided attention of one person as its chief. This cannot be done when, at the same time, you are compelled to watch the vast business of the custom-house.

Boston, New York, Philadelphia, New Orleans, San Francisco, and St. Louis, have each of them an assistant treasurer, and the collectors of these ports can give their undivided time to the legitimate business of their offices.

I think Baltimore ought not to be made an exception, and the increased duties on imports, together with the amount paid each year on interest of the public debt, show that she is entitled to this consideration.

I hope, therefore, my dear sir, you will ask Congress to pass a law authorizing you to appoint an assistant treasurer at this port.

I am, sir, very respectfully, your obedient servant,

JOHN L. THOMAS, JR., *Collector*.

HON. GEO. S. BOUTWELL,
Secretary of the Treasury.

The result of this was that, on the recommendation of the Secretary of the Treasury, an act was passed establishing the office of assistant treasurer for the port of Baltimore.

In transferring the accounts from the collector to the assistant treasurer, whose office was thus created, and while balancing the bank books of the late depositary with the check books at the collector's office, it was discovered that the deputy collector, Bowerman, had, for a series of years, extending back into the administration of Mr. Thomas's predecessor, purloined large sums of money, of which he had made no report, and which he had appropriated to his own uses. It was also discovered that Bowerman had used a great deal of the money thus purloined in covering up his illegal transactions under Mr. Thomas's predecessor.

Investigation was immediately set on foot by the collector, and also by the Treasury Department, and the matter was brought to the attention of the grand jury of the United States district court for the Maryland district, and these facts, in great length of detail, appeared upon these investigations.

The full amount purloined by Bowerman has been ascertained, and, as appears from the report of O. D. Madge, the chief of the special agent bureau of the Treasury Department, amounts to the sum of $27,540 25. Of this amount, $4,729 were received by Thomas J. Wilson, late deputy collector, and never deposited by him to the credit of the United States. By order of the Treasury Department suit has been brought to recover back about $10,000 of the moneys purloined by Bowerman, and which will, in all probability, be recovered. Both Bowerman and Wilson have been indicted by the grand jury of the United States court, and are now awaiting their trial.

The Secretary of the Treasury appeared before the committee, and expressed the opinion that the collector was not only not in complicity with these transactions, but that he was guilty of no dereliction of duty, or any want of due attention to have prevented them. Indeed, the committee are satisfied, from their very nature, and the opportunities the deputy collector had for perpetrating these offenses, and the excellent character he bore, and the degree of confidence universally reposed in him as an officer, it would have been impossible to have detected them for years had not the change in the system been effected by the passage of the act "to provide for the appointment of an assistant treasurer at Baltimore," approved June 15, 1870.

Mr. O. D. Madge says, in his report to the Secretary of the Treasury:

That in the investigations necessary to develop these fraudulent transactions there is nothing that in the slightest degree reflects on Collector Thomas, nor to show that it was the result of any neglect of duty on his part.

He also states:

That Mr. Thomas, in addition to his duties as collector, was at the time the designated United States depositary, and, so far as his divided attention between the two important offices would permit, established, from time to time, such regulations as seemed to be necessary to correct all irregularities and defects in the manner of conducting the custom-house business, and instituted many reforms materially benefiting the revenue.

He further states:

That the lack of a general system of proper checks upon the actions of all subordinates was wanting, and that it does not appear that such a system ever existed at that port.

Special Agent Morris says in his report:

That from the manner in which the books and accounts of the office had been kept for years it was almost impossible to have discovered the defalcation sooner. And that he knew of the efforts made by the collector from time to time to simplify the mode of keeping the accounts.

Archibald Stirling, jr., the United States district attorney of Maryland, says:

That from his official investigation he fully exonerates the collector from all blame; that Bowerman was regarded as a faithful officer, and that a strong public opinion was instrumental in his retention in office; and that his frauds were so disguised and concealed that time alone could have discovered them.

He further states:

That he traces the success of these frauds to a want of a proper system of checks, which the existing laws are to blame for, and not the collector.

The foreman of the grand jury which investigated these cases states:

That there was nothing to cast the least imputation upon the honor and integrity of the collector; that Bowerman was looked upon as a model officer; and that his retention by Mr. Thomas in office met with universal approbation.

The committee are of the opinion that officers charged with the custody of moneys are responsible, not merely for ordinary diligence as much as a careful man would give to his own business, but for extraordinary diligence, *diligentia strictissima*, and should only be relieved in case of loss which, in the nature of things, it would have been impossible for them to have prevented.

This class of cases has been before Congress on various occasions, resulting in the following acts of legislation; (see U. S. Stat. at Large):

An act for the relief of Brevet Major James Belger, approved February 3, 1857. (Vol. 11, p. 491.)

An act for the relief of James G. Benton, E. B. Babbitt, and James Longstreet, approved June 1, 1858. (Vol. 11, p. 537.)

An act for the relief of Enoch B. Talcott, late collector of customs at Oswego, approved March 3, 1859. (Vol. 11, p. 569.)

An act for the relief of J. B. Rittenhouse, fleet paymaster of the Pacific squadron, approved April 10, 1866. (Vol. 14, p. 578.)

An act for the relief of John Hastings, late surveyor and depositary at Pittsburg, approved July 27, 1866. (Vol. 14, p. 604.)

An act for the relief of James Fulton, paymaster United States Navy, approved March 2, 1867. (Vol. 14, p. 636.)

An act for the relief of John Sedgewick, collector of internal revenue of the third collection district of California, approved March 2, 1867. (Vol. 14, p. 644.)

An act for the relief of James J. Hudnall, approved March 2, 1867. (Vol. 14, p. 645.)

An act for the relief of Lieutenant Ulysses S. Grant, approved June 17, 1862. (Vol. 12, p. 905.)

An act for the relief of Gilbert E. Thornton, approved February 25, 1863. (Vol. 12, p. 924.)

Joint resolution for the relief of James L. Ridgely, collector of internal revenue, second district of Maryland, approved May 4, 1870. (Second session Forty-first Congress.)

The committee are satisfied, from the proofs in the case, written and oral, that the collector could not, from the circumstances of this case, acting under the system in operation when he entered the office, have discovered or prevented the defalcation in this instance. They therefore report the accompanying joint resolution and recommend its passage.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT. No. 21.

NAVIGATION OF THE MISSISSIPPI RIVER.

JANUARY 27, 1871.—Ordered to be printed.

Mr. E. M. WILSON, on leave, made the following

REPORT.

[To accompany bill H. R. No. 2499.]

The Committee on Public Lands, having had under consideration bill H. R. No. 2499, would report as follows:

That the act of July, 1868, was intended to secure construction of a free "lock and dam," to perfect the navigation of the Mississippi River over the rapids between Fort Snelling and St. Anthony's Falls, a proper subject for United States construction, either by money or by allotment of land; that Congress preferred to grant two hundred thousand acres for the accomplishment of said work, the State of Minnesota to be the trustee to raise from the sale thereof a fund to be expended under the supervision of the Engineer Department of the United States; that it was provided that the land should all be sold to settlers at $1 25 per acre; that while the committee are in favor of such restrictions upon agricultural land, in this instance, by reason of its generality, it operates against the interests of settlers, by compelling the State to select altogether agricultural land, because for that only can a settler be found as a purchaser. The modification proposed by the amendment allows pine land to be sold by the State as it is by the General Government to the highest bidder at public auction. Thus pine land, unfit for settlement, can be selected instead of agricultural land adapted to homesteads. The time of three years, proposed in the amendment, fixes definitely the time of construction, which, by existing law, is within two years from "*acceptance and disposition*," and which, not having yet commenced, would have an uncertain end.

The amendment does not, in any manner, enlarge the grant, and the Committee therefore recommend its passage, believing such to be both for the interest of this public work, and for the benefit of the homestead settlers.

o

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 22.

VICTORIA C. WOODHULL.

JANUARY 30, 1871.—Recommitted to the Committee on the Judiciary and ordered to be printed.

Mr. BINGHAM, from the Committee on the Judiciary, made the following

REPORT.

The Committee on the Judiciary, to whom was referred the memorial of Victoria C. Woodhull, having considered the same, make the following report:

The memorialist asks the enactment of a law by Congress which shall secure to citizens of the United States in the several States the right to vote "without regard to sex." Since the adoption of the fourteenth amendment of the Constitution, there is no longer any reason to doubt that all persons, born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside, for that is the express declaration of the amendment.

The clause of the fourteenth amendment, "No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States," does not, in the opinion of the committee, refer to privileges and immumities of citizens of the United States other than those privileges and immunities embraced in the original text of the Constitution, article 4, section 2. The fourteenth amendment, it is believed, did not add to the privileges or immunities before mentioned, but was deemed necessary for their enforcement as an express limitation upon the powers of the States. It had been judicially determined that the first eight articles of amendment of the Constitution were not limitations on the power of the States, and it was apprehended that the same might be held of the provision of the second section, fourth article.

To remedy this defect of the Constitution, the express limitations upon the States contained in the first section of the fourteenth amendment, together with the grant of power in Congress to enforce them by legislation, were incorporated in the Constitution. The words "citizens of the United States," and "citizens of the States," as employed in the fourteenth amendment, did not change or modify the relations of citizens of the State and nation as they existed under the original Constitution.

Attorney General Bates gave the opinion that the Constitution uses the word "citizen" only to express the political quality of the individual in his relation to the nation; to declare that he is a member of the body politic, and bound to it by the reciprocal obligation of allegiance on the one side and protection on the other. The phrase "a citizen of the United States, without addition or qualification, means neither more nor less than a member of the nation." (Opinion of Attorney General Bates on citizenship.)

The Supreme Court of the United States has ruled that, according to the express words and clear meaning of the second section, fourth article of the Constitution, no privileges are secured by it except those which belong to citizenship. (Conner et al. *vs.* Elliott et al., 18 Howard, 593.)

In Corfield *v.* Coryell, 4 Washington Circuit Court Reports, 380, the court say:

> The inquiry is, what are the privileges and immunities of citizens in the several States? We feel no hesitation in confining these expressions to those privileges and immunities which are in their nature *fundamental*; which belong of right to the citizens of all free governments; and which have at all times been enjoyed by the citizens of the several States which compose this Union, from the time of their becoming free, independent, and sovereign. What these fundamental principles are, would perhaps be more tedious than difficult to enumerate. They may, however, be all comprehended under the following general heads: Protection by the Government; the enjoyment of life and liberty, with the right to acquire and possess property of every kind, and to pursue and obtain happiness and safety, subject, nevertheless, to such restraints as the Government may justly prescribe for the general good of the whole; the right of a citizen of one State to pass through or to reside in any other State, for the purposes of trade, agriculture, professional pursuits, or otherwise; to claim the benefit of the writ of habeas corpus; to institute and maintain actions of any kind in the courts of the State; to take, hold, and dispose of property either real or personal; and an exemption from higher taxes or impositions than are paid by the other citizens of the State, may be mentioned as some of the particular privileges and immunities of citizens which are clearly embraced by the general description of privileges deemed to be fundamental; to which may be added the elective franchise, *as regulated and established* by the laws or Constitution of the State in which it is to be exercised. * * * But we cannot accede to the proposition which was insisted on by the counsel, that under this provision of the Constitution (sec. 2, art. 4) the citizens of the several States are permitted to participate in all *the rights* which belong exclusively to the citizens of any other particular State.

The learned Justice Story declared that the intention of the clause ("the citizens of each State shall be entitled to all the privileges and immunities of citizens in the several States,") was to confer on the citizens of each State a general citizenship, and communicated all the privileges and immunities which a citizen of the same State would be entitled to under the same circumstances. (Story on the Constitution, vol. 2, p. 605.)

In the case of the Bank of the United States *vs.* Primrose, in the Supreme Court of the United States, Mr. Webster said:

> That this article in the Constitution (art. 4., sec. 2) does not confer on the citizens of each State political rights in every other State, is admitted. A citizen of Pennsylvania cannot go into Virginia and vote at any election in that State, though when he has acquired a residence in Virginia, and is otherwise qualified as is required by the constitution (of Virginia,) he becomes, without formal adoption as a citizen of Virginia, a citizen of that State politically. (Webster's Works, vol. 6, p. 112.)

It must be obvious that Mr. Webster was of opinion that the privileges and immunities of citizens, guaranteed to them in the several States, did not include the privilege of the elective franchise otherwise than as secured by the State constitution. For, after making the statement above quoted, that a citizen of Pennsylvania cannot go into Virginia and vote, Mr. Webster adds, "but for the purposes of trade, commerce, buying and selling, it is evidently not in the power of any State to impose any hinderance or embarassment, &c., upon citizens of other States, or to place them, going there, upon a different footing from her own citizens." (*Ib.*)

The proposition is clear that no citizen of the United States can rightfully vote in any State of this Union who has not the qualifications required by the Constitution of the State in which the right is claimed to be exercised, except as to such conditions in the constitution of such States as deny the right to vote to citizens resident therein "on account of race, color, or previous condition of servitude."

The adoption of the fifteenth amendment of the Constitution imposing

these three limitations upon the power of the several States, was, by necessary implication, a declaration that the States had the power to regulate by a uniform rule the conditions upon which the elective franchise should be exercised by citizens of the United States resident therein. The limitations specified in the fifteenth amendment exclude the conclusion that a State of this Union, having a government republican in form, may not prescribe conditions upon which alone citizens may vote other than those prohibited. It can hardly be said that a State law which excludes from voting women citizens, minor citizens, and nonresident citizens of the United States, on account of sex, minority, or domicile, is a denial of the right to vote on account of race, color, or previous condition of servitude.

It may be further added that the second section of the fourteenth amendment, by the provision that "when the right to vote at any election for the choice of electors of President and Vice-President of the United States, Representatives in Congress, or executive and judicial officers of the State, or the members of the legislature thereof, is denied to any of the male inhabitants of such State, being twenty-one years of age, a citizen of the United States, or in any way abridged, except for participation in rebellion or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens twenty-one years of age in such State," implies that the several States may restrict the elective franchise as to other than male citizens. In disposing of this question effect must be given, if possible, to every provision of the Constitution. Article 1, section 2, of the Constitution provides:

> That the House of Representatives shall be composed of members chosen every second year by the people of the several States, and the electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislature.

This provision has always been construed to vest in the several States the exclusive right to prescribe the qualifications of electors for the most numerous branch of the State legislature, and therefore for members of Congress. And this interpretation is supported by section 4, article 1, of the Constitution, which provides:

> That the time, places, and manner of holding elections for Senators and Representatives shall be prescribed in each State by the legislature thereof; but the Congress may at any time by law make or alter such regulations except as to the place of choosing Senators.

Now it is submitted, if it had been intended that Congress should prescribe the qualification of electors, that the grant would have read: The Congress may at any time by law make or alter such regulations, and also prescribe the qualification of electors, &c. The power, on the contrary, is limited exclusively to the time, place, and manner, and does not extend to the qualification of the electors. This power to prescribe the qualification of electors in the several States has always been exercised, and is to-day, by the several States of the Union; and we apprehend, until the Constitution shall be changed, will continue to be so exercised, subject only to the express limitations imposed by the Constitution upon the several States, before noticed. We are of opinion, therefore, that it is not competent for the Congress of the United States to establish by law the right to vote without regard to sex in the several States of this Union, without the consent of the people of such States, and against their constitutions and laws; and that such legislation would be, in our judgment, a violation of the Constitution of the United States, and of the rights reserved to the States respectively by the Constitution. It is undoubtedly the right of the people of the several States so to reform

their constitutions and laws as to secure the equal exercise of the right of suffrage, at all elections held therein under the Constitution of the United States, to all citizens, without regard to sex; and as public opinion creates constitutions and governments in the several States, it is not to be doubted that whenever, in any State, the people are of opinion that such a reform is advisable, it will be made.

If, however, as is claimed in the memorial referred to, the right to vote "is vested by the Constitution in the citizens of the United States without regard to sex," that right can be established in the courts without further legislation.

The suggestion is made that Congress, by a mere declaratory act, shall say that the construction claimed in the memorial is the true construction of the Constitution, or, in other words, that by the Constitution of the United States the right to vote is vested in citizens of the United States "without regard to sex," anything in the constitution and laws of any State to the contrary notwithstanding. In the opinion of the committee, such declaratory act is not authorized by the Constitution nor within the legislative power of Congress. We therefore recommend the adoption of the following resolution:

Resolved, That the prayer of the petitioner be not granted, that the memorial be laid on the table, and that the Committee on the Judiciary be discharged from the further consideration of the subject.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 22, Part 2.

VICTORIA C. WOODHULL.

FEBRUARY 1, 1871.—Ordered to be printed.

Mr. LOUGHRIDGE, from the Committee on the Judiciary, submitted the following as the

VIEWS OF THE MINORITY.

In the matter of the memorial of Victoria C. Woodhull, referred by the House to the Committee on the Judiciary, the undersigned, members of the committee, being unable to agree to the report of the committee, present the following as their views upon the subject of the memorial:

The memorialist sets forth that she is a native born citizen of the United States, and a resident thereof; that she is of adult age, and has resided in the State of New York for three years past; that by the Constitution of the United States she is guaranteed the right of suffrage; but that she is, by the laws of the State of New York, denied the exercise of that right; and that by the laws of different States and Territories the privilege of voting is denied to all the female citizens of the United States; and petitions for relief by the enactment of some law to enforce the provisions of the Constitution, by which such right is guaranteed.

The question presented is one of exceeding interest and importance, involving as it does the constitutional rights not only of the memorialist but of more than one half of the citizens of the United States—a question of constitutional law in which the civil and the natural rights of the citizen are involved. Questions of propriety or of expediency have nothing to do with it. The question is not "Would it be expedient to extend the right of suffrage to women," but "Have women citizens that right by the Constitution as it is."

A question of this kind should be met fairly and investigated in that generous and liberal spirit characteristic of the age, and decided upon principles of justice, of right, and of law.

It is claimed by many that to concede to woman the right of suffrage would be an innovation upon the laws of nature, and upon the theory and practice of the world for ages in the past, and especially an innovation upon the common law of England, which was originally the law of this country, and which is the foundation of our legal fabric.

If we were to admit the truth of this, it is yet no argument against the proposition, if the right claimed exists, and is established by the Constitution of the United States. The question is to be decided by the Constitution and the fundamental principles of our Government, and not by the usage and dogmas of the past.

It is a gratifying fact that the world is advancing in political science, and gradually adopting more liberal and rational theories of government.

The establishment of this Government upon the principles of the Declaration of Independence was in itself a great innovation upon the

theories and practice of the world, and opened a new chapter in the history of the human race, and its progress toward perfect civil and political liberty.

But it is not admitted that the universal usage of the past has been in opposition to the exercise of political power by women. The highest positions of civil power have from time to time been filled by women in all ages of the world, and the question of the right of woman to a voice in government is not a new one by any means, but has been agitated, and the right acknowledged and exercised, in governments far less free and liberal than ours.

In the Roman Republic, during its long and glorious career, women occupied a higher position, as to political rights and privileges, than in any other contemporaneous government. In England unmarried women have, by the laws of that country, always been competent to vote and to hold civil offices, if qualified in other respects; at least such is the weight of authority. In "Callis upon Sewers," an old English work, will be found a discussion of the question as to the right of women to hold office in England.

The learned and distinguished author uses the following language:

> And for temporal governments I have observed women to have from time to time been admitted to the highest places; for in ancient Roman histories I find Eudocia and Theodora admitted at several times into the sole government of the empire; and here in England our late famous Queen Elizabeth, whose government was most renowned; and Semiramis governed Syria, and the Queen of the South, which came to visit Solomon, for anything that appears to the contrary, was a sole queen; and to fall a degree lower, we have precedents that King Richard the First and King Henry the Fifth appointed by commissions their mothers to be regents of this realm in their absence in France.
>
> But yet I will descend a step lower; and doth not our law temporal and spiritual admit of women to be executrixes and administratrixes? And thereby they have the rule or ordering of great estates, and many times they are guardianesses in chivalry, and have hereby also the government of many great heirs in the kingdom and of their own estates.
>
> So by these cases it appeareth that the common law of this kingdom submitted many things to their government; yet the statute of justices of the peace is like to Jethro's counsel to Moses, for there they speak of men to be justices, and thereby seemeth to exclude women; but our statute of sewers is, "Commission of sewers shall be granted by the King to such person and persons as the lords should appoint." So the word persons stands indifferently for either sex. I am of the opinion, for the authorities, reasons, and causes aforesaid, that this honorable countess being put into the commission of the sewers, the same is warrantable by the law; and the ordinances and decrees made by her and the other commissions of sewers are not to be impeached for that cause of her sex.

As it is said by a recent writer:

> Even at present in England the idea of women holding official station is not so strange as in the United States. The Countess of Pembroke had the office of sheriff of Westmoreland and exercised it in person. At the assizes she sat with the judges on the bench. In a reported case it is stated by counsel and assented to by the court that a woman is capable of serving in almost all the offices of the kingdom.

As to the right of women to vote by the common law of England, the authorities are clear. In the English Law Magazine for 1868–'69, vol. 26, p 120, will be found reported the case of the application of *Jane Allen*, who claimed to be entered upon the list of voters of the Parish of St. Giles, under the reform act of 1867, which act provides as follows: Every man shall, in and after the year 1868, be entitled to be registered as a voter, and when registered to vote for a member or members to serve in parliament, who is qualified as follows: 1st. Is of full age and not subject to any legal incapacity, &c., &c.

It was decided by the court that the claimant had the right to be registered and to a vote; that by the English law, the term man, as used in that statute, included women. In that case the common law

of England upon that question was fully and ably reviewed, and we may be excused for quoting at some length:

> And as to what has been said of there being no such adjudged cases, I must say that it is perfectly clear that not perhaps in either of three cases reported by Mr. Shaen, but in those of Catharine *vs.* Surry, Coates *vs.* Lyle, and Holt *vs.* Lyle, three cases of somewhat greater antiquity, the right of women freeholders was allowed by the courts. These three cases were decided by the judges in the reign of James I, (A. D. 1612.) Although no printed report of them exists, I find that in the case of Olive *vs.* Ingraham, they were repeatedly cited by the lord chief justice of the King's Bench in the course of four great arguments in that case, the case being reargued three times, (7 Mod., 264,) and the greatest respect was manifested by the whole court for those precedents. Their importance is all the greater when we consider what the matter was upon which King James's judges sitting in Westminster Hall had to decide. It was not simply the case of a mere occupier, inhabitant, or scot or lot voter. Therefore the question did not turn upon the purport of a special custom, or a charter, or a local act of Parliament, or even of the common right in this or that borough. But it was that very matter and question which has been mooted in the dictum of Lord Coke, the freeholder's franchise in the shire, and upon that the decision in each case expressly was, that a feme sole shall vote if she hath a freehold, and that if she be not a feme sole, but a feme covert having freehold, then her husband during her coverture shall vote in her right. These, then, are so many express decisions which at once displace Lord Coke's unsupported assertion and declare the law so as to constrain my judgment. It is sometimes said, when reference is made to precedents of this kind, that they have never been approved by the bar. But that cannot be said of these. Hakewell, the contemporary of Lord Coke and one of the greatest of all parliamentary lawyers then living—for even Selden and Granvil were not greater than Hakewell—left behind him the manuscript to which I have referred, with his comments on those cases.

Sir William Lee, chief justice, in his judgment in the case of Olive *vs.* Ingraham, expressly says that he had perused them, and that they contained the expression of Hakewell's entire approval of the principles upon which they were decided, and of the results deduced; and we have the statement of Lord Chief Justice Lee, who had carefully examined those cases, that in the case of Holt *vs.* Lyle, it was determined that a *feme sole* freeholder may claim a vote for Parliament men; but if married, her husband must vote for her.

In the case of Olive *vs.* Ingraham, Justice Probyn says:

> The case of Holt *vs.* Lyle, lately mentioned by my Lord Chief Justice, is a very strong case. "*They who pay ought to choose whom they shall pay.*" And the Lord Chief Justice seemed to have assented to that general proposition as authority for the correlative proposition, that "women, when *sole*, had a right to vote." At all events, there is here the strongest possible evidence that in the reign of James I, the *feme sole*, being a freeholder of a country, or what is the same thing, of a county, of a city, or town or borough, where, of custom, freeholders had the right to vote, not only had, but exercised the parliamentary franchise. If married, she could not vote in respect merely of her freehold, not because of the incapacities of coverture, but for this simple reason, that, by the act of marriage, which is an act of law, the title of the *feme sole* freeholder became vested for life in the husband. The qualification to vote was not personal, but real; consequently, her right to vote became suspended as soon and for as long as she was married. I am bound to consider that the question as to what weight is due to the dictum of my Lord Coke is entirely disposed of by those cases from the reign of James I and George II, and that the authority of the latter is unimpeached by any later authority, as the cases of Rex *vs.* Stubles, and Regina *vs.* Aberavon, abundantly show.

In Austey's Notes on the New Reform Act of 1867, the authorities and precedents upon the right of women to vote in England are examined and summed up, and the author concludes:

> It is submitted that the weight of authority is very greatly in favor of the female right of suffrage. Indeed the only authority against it is contained in the short and hasty dictum of Lord Coke, referred to above. It was set down by him in his last and least authoritative institute, and it is certain that he has been followed neither by the great lawyers of his time nor by the judicature. The principles of the law in relation to the suffrage of females will be found in Coates *vs.* Lyle, Holt *vs.* Lyle, Olive *vs.* Ingraham, and The King *vs.* Stubles, cases decided under the strict rules for the construction of statutes.

It cannot be questioned that from time whereof the memory of man

runneth not to the contrary, unmarried women have been by the laws of England competent voters, subject to the freehold qualification which applied alike to men and women. Married women could not vote because they were not freeholders; by the common law their property upon marriage became vested in the husband.

So that it appears that the admission of women to participation in the affairs of government would not be so much of an innovation upon the theories and usage of the past as is by some supposed.

In England the theory was that in property representation, all property should be represented. Here the theory is that of personal representation, which of course, if carried out fully, includes the representation of all property. In England, as we have seen, the owner of the property, whether male or female, was entitled to representation, no distinction being made on account of sex. If the doctrine contended for by the majority of the committee be correct, then this Government is less liberal upon this question than the government of England has been for hundreds of years, for there is in this country a large class of citizens of adult age, and owners in their own right of large amounts of property, and who pay a large proportion of the taxes to support the Government, who are denied any representation whatever, either for themselves or their property—unmarried women, of whom it cannot be said that their interests are represented by their husbands. In their case neither the English nor the American theory of representation is carried out, and this utter denial of representation is justified upon the ground alone that this class of citizens are women.

Surely we cannot be so much less liberal than our English ancestors! Surely the Constitution of this republic does not sanction an injustice so indefensible as that!

By the fourteenth amendment of the Constitution of the United States, what constitutes citizenship of the United States, is for the first time declared, and who are included by the term citizen. Upon this question, before that time, there had been much discussion, judicial, political and general, and no distinct and definite definition of qualification had been settled.

The people of the United States determined this question by the fourteenth amendment to the Constitution, which declares that—

> All persons born or naturalized in the United States and subject to the jurisdiction thereof, are citizens of the United States, and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the law.

This amendment, after declaring who are citizens of the United States, and thus fixing but one grade of citizenship, which insures to all citizens alike all the privileges, immunities and rights which accrue to that condition, goes on in the same section and prohibits these privileges and immunities from abridgment by the States.

Whatever these "privileges and immunities" are, they attach to the female citizen equally with the male. It is implied by this amendment that they are inherent, that they belong to citizenship as such, for they are not therein specified or enumerated.

The majority of the committee hold that the privileges guaranteed by the fourteenth amendment do not refer to any other than the privileges embraced in section 2, of article 4, of the original text.

The committee certainly did not duly consider this unjustified statement.

Section 2, of article 4, provides for the privileges of "citizens of the *States*," while the first section of the fourteenth amendment protects the privileges of "*citizens of the United States.*" The terms citizens of the *States* and citizens of the *United States* are by no means convertible.

A circuit court of the United States seems to hold a different view of this question from that stated by the committee.

In the case of The Live Stock Association *vs.* Crescent City, (1st Abbott, 396,) Justice Bradley, of the Supreme Court of the United States, delivering the opinion, uses the following language in relation to the 1st clause of the 14th amendment:

> The new prohibition that "no State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States" is not identical with the clause in the Constitution which declared that "the citizens of each State shall be entitled to all the privileges and immunities of citizens in the several States." It embraces much more.
>
> It is possible that those who framed the article were not themselves aware of the far-reaching character of its terms, yet if the amendment does in fact bear a broader meaning, and does extend its protecting shield over those who were never thought of when it was conceived and put in form, and does reach social evils which were never before prohibited by constitutional enactment, it is to be presumed that the American people, in giving it their *imprimatur*, understood what they were doing, and meant to decree what in fact they have decreed.
>
> The "privileges and immunities" secured by the original Constitution were only such as each State gave to its own citizens, * * * * * but the fourteenth amendment prohibits any State from abridging the privileges or immunities of citizens of the United States, whether its own citizens or any others. It not merely requires equality of privileges, but it demands that the privileges and immunities of all citizens shall be absolutely unabridged and unimpaired.

In the same opinion, after enumerating some of the "privileges" of the citizens, such as were pertinent to the case on trial, but declining to enumerate all, the court further says:

> These privileges cannot be invaded without sapping the very foundation of republican government. A republican government is not merely a government of the people, but it is a free government. * * * * * It was very ably contended on the part of the defendants that the fourteenth amendment was intended only to secure to all citizens equal capacities before the law. That was at first our view of it. But it does not so read. The language is, "No State shall abridge the privileges or immunities of citizens of the United States." What are the privileges and immunities of citizens of the United States? Are they capacities merely? Are they not also rights?

The court in this case seems to intimate very strongly that the amendment was intended to secure the natural rights of citizens, as well as their equal capacities before the law.

In a case in the supreme court of Georgia, in 1869, the question was before the court whether a negro was competent to hold office in the State of Georgia. The case was ably argued on both sides, Mr. Akerman, the present Attorney General of the United States, being of counsel for the petitioner. Although the point was made and argued fully, that the right to vote and hold office were both included in the privileges and immunities of citizens, and were thus guaranteed by the fourteenth amendment, yet that point was not directly passed upon by the court, the court holding that under the laws and constitution of Georgia the negro citizen had the right claimed. In delivering the opinion, Chief Justice Brown said:

> It is not necessary to the decision of this case to inquire what are the "privileges and immunities" of a citizen, which are guaranteed by the fourteenth amendment to the Constitution of the United States. Whatever they may be, they are protected against all abridgment by legislation. * * Whether the "privileges and immunities" of the citizen embrace political rights, including the right to hold office, I need not now inquire. If they do, that right is guaranteed alike by the Constitution of the United States and of Georgia, and is beyond the control of the legislature.

In the opinion of Justice McKay, among other propositions, he lays down the following:

2d. The rights of the people of this State, white and black, are not granted to them by the constitution thereof; the object and effect of that instrument is not to *give*, but to restrain, deny, regulate, and guarantee rights, and all persons recognized by that constitution as citizens of the State have *equal legal and political rights*, except as *otherwise expressly declared*.

3d. It is the settled and uniform sense of the word "citizen," when used in reference to the citizens of the separate States of the United States, and to their rights as such citizens, that it describes a person entitled to every right, *legal and political*, enjoyed by any person in that State, unless there be some express exception made by positive law covering the particular person or class of persons, whose rights are in question.

In the course of the argument of this case, Mr. Akerman used the following language upon the point, as to whether citizenship carried with it the right to hold office:

"It may be profitable to inquire how the term (citizen) has been understood in Georgia. * * * It will be seen that men whom Georgians have been accustomed to revere believed that citizenship in Georgia carried with it the right to hold office in the absence of positive restrictions."

The majority of the committee having started out with the erroneous hypothesis that the term "privileges of citizens of the United States," as used in the fourteenth amendment, means no more than the term "privileges of citizens," as used in section 2 of article 4, discuss the question thus.

"The right of suffrage was not included in the privileges of citizens as used in section 2, article 4, therefore that right is not included in the privileges of citizens of the United States, as used in the fourteenth amendment."

Their premise being erroneous their whole argument fails. But if they were correct in their premise, we yet claim that their second position is not sustained by the authorities, and is shown to be fallacious by a consideration of the principles of free government.

We claim that, from the very nature of our government, the right of suffrage is a fundamental right of citizenship, not only included in the term "privileges of citizens of the United States," as used in the fourteenth amendment, but also included in the term as used in section 2 of article 4, and in this we claim we are sustained both by the authorities and by reason.

In *Abbott* vs. *Bayley*, (6 *Pick.*, 92,) the supreme court of Massachusetts say:

"The privileges and immunities" secured to the people of each State, in every other State, can be applied only to the case of a removal from one State into another. By such removal they become citizens of the adopted State without naturalization, and have a right to sue and be sued as citizens; and yet this privilege is qualified and not absolute, for they cannot enjoy the right of suffrage or eligibility to office without such *term of residence* as shall be prescribed by the constitution and laws of the State into which they shall remove.

This case fully recognizes the right of suffrage as one of the "privileges of the citizen," subject to the right of the State to *regulate* as to the *term of residence*—the same principle was laid down in Corfield *vs.* Correll.

In the case of *Corfield* vs. *Correll* in the Supreme Court of the United States, Justice Washington, in delivering the opinion of the court, used the following language.

"The privileges and immunities conceded by the Constitution of the United States to citizens in the several States," are to be confined to those which are in their nature fundamental, and belong of right to the citizens of all free governments. Such are the rights of protection of life and liberty, and to acquire and enjoy property, and to pay no higher impositions than other citizens, and to pass through or reside in the State at

pleasure, and to enjoy the elective franchise as regulated and established by the laws or constitution of the State in which it is to be exercised.

And this is cited approvingly by Chancellor Kent. (2 Kent, sec. 72.)

This case is cited by the majority of the committee, as sustaining their view of the law, but we are unable so to understand it. It is for them an exceedingly unfortunate citation.

In that case the court enumerated some of the "privileges of citizens," such as are "*in their nature fundamental and belong of right to the citizens of all free governments*," (mark the language,) and among those rights, place the "right of the elective franchise" in the same category with those great rights of life, *liberty*, and *property*. And yet the committee cite this case to show that this right is *not* a fundamental right of the citizen!

But it is added by the court that the right of the elective franchise, "is to be enjoyed as regulated and established by the State in which it is to be exercised."

These words are supposed to qualify the right, or rather take it out of the list of fundamental rights, where the court had just placed it. The court is made to say by this attempt in the same sentence, "the elective franchise *is* a fundamental right of the citizen, and it is *not* a fundamental right." It is a "fundamental right," provided the State sees fit to grant the right. It is a "fundamental right of the citizen," but it does not exist, unless the laws of the State give it. A singular species of "fundamental rights!" Is there not a clear distinction between the regulation of a right and its destruction? The State may regulate the right, but it may not destroy it.

What is the meaning of "regulate" and "establish?" Webster says: Regulate—to put in good order. Establish—to make stable or firm.

This decision then is, that "the elective franchise is a fundamental right of the citizen of all free governments, to be enjoyed by the citizen, under such laws as the State may enact to regulate the right and make it stable or firm." Chancellor Kent, in the section referred to, in giving the *substance* of this opinion, leaves out the word establish, regarding the word regulate as sufficiently giving the meaning of the court.

This case is, in our opinion, a very strong one against the theory of the majority of the committee.

The committee cite the language of Mr. Webster, as counsel in United States *vs.* Primrose.

We indorse every word in that extract. We do not claim that a citizen of Pennsylvania can go into Virginia and vote in Virginia, being a citizen of Pennsylvania. No person has ever contended for such an absurdity. We claim that when the citizen of the United States becomes a citizen of Virginia, that the State of Virginia has neither right nor power to abridge the privileges of such citizen by denying him entirely the right of suffrage, and thus all political rights. The authorities cited by the majority of the commttee do not seem to meet the case—certainly do not sustain their theory.

The case of Cooper *vs.* The Mayor of Savannah, (4 Geo., 72,) involved the question whether a free negro was a citizen of the United States? The court, in the opinion, says:

> Free persons of color have never been recognized as citizens of Georgia; they are not entitled to bear arms, vote for members of the legislature, or hold any civil office; they have no political rights, but have personal rights, one of which is personal liberty.

That they could not vote, hold office, &c., was held evidence that they were not regarded as citizens.

In the Supreme Court of the United States, in the case of Scott *vs.*

Sanford, (19 Howard, p. 476,) Mr. Justice Daniel, in delivering his opinion, used the following language as to the rights and qualities of citizenship:

> For who it may be asked is a citizen? What do the character and status of citizens import? Without fear of contradiction, it does not import the condition of being private property, the subject of individual power and ownership. Upon a principle of etymology alone, the term citizen, as derived from *civitas*, conveys the idea of connection or identification with the State or government, and a participation in its functions. But beyond this there is not, it is believed, to be found, in the theories of writers on government, or in any actual experiment heretofore tried, an exposition of the term citizen which has not been understood as conferring the actual possession and enjoyment, or the perfect right of acquisition and enjoyment, of an entire equality of privileges, civil and political.

And in the same case Chief Justice Taney said: "The words 'people of the United States' and 'citizens' are synonymous terms, and mean the same thing; they both describe the political body, who, according to our republican institutions, form the sovereignty, and who hold the power, and conduct the Government through their representatives. They are what we familiarly call the sovereign people, and every citizen is one of this people, and a constituent member of this sovereignty. (19 Howard, 404.)

In an important case in the Supreme Court of the United States, Chief Justice Jay, in delivering the opinion of the court, said: "At the Revolution the sovereignty devolved on the people, and they are truly the sovereigns of the country, but they are sovereigns without subjects, (unless the African slaves may be so called,) and have none to govern but themselves. The citizens of America are equal as fellow-citizens, and joint tenants of the sovereignty." (Chishol *vs.* Georgia, 2 Dallas, 470.)

In Conner *vs.* Elliott, (18 Howard,) Justice Curtis, in declining to give an enumeration of all the "privileges" of the citizen, said "According to the express words and clear meaning of the clause, no privileges are secured except those that belong to citizenship."

The Supreme Court said, in Corfield *vs.* Coryell, that the elective franchise is such privilege; therefore, according to Justice Curtis, it belongs to citizenship. In a case in the supreme court of Kentucky, (1 Littell's Ky. Reports, p. 333,) the court say:

> No one can, therefore, in the correct sense of the term be a citizen of a State who is not entitled upon the terms prescribed by the institutions of the State to all the rights and privileges conferred by these institutions upon the highest class of society.

Mr. Wirt, when Attorney General of the United States, in an official opinion to be found on p. 508, 1st volume Opinions of Attorneys Generals, came to the conclusion that the negroes were not citizens of the United States, for the reason that they had very few of the "privileges" of citizens, and among the "privileges of citizens" of which they were deprived, that they could not vote at any election.

Webster defines a citizen to be a person, native or naturalized, who has the privilege of voting for public officers, and who is qualified to fill offices in the gift of the people.

Worcester defines the word thus: "An inhabitant of a republic who enjoys the rights of a citizen or freeman, and who has a right to vote for public officers as a citizen of the United States."

Bouvier, in his Law Dictionary, defines the term citizen thus: "One who, under the Constitution and laws of the United States, has a right to vote for Representatives in Congress and other public officers, and who is qualified to fill offices in the gift of the people."

Aristotle defines a "citizen" to be one who is a *partner in the legislative and judicial* power, and who shares in the honors of the state." (Aristotle de Repub., lib. 3, cap. 5, D.)

The essential properties of Athenian citizenship consisted in the share possessed by every citizen in the legislature, in the election of magistrates, and in the courts of justice. (See Smith's Dictionary of Greek Antiquities, p. 289.)

The possession of the *jus suffragii*, at least, if not also of the *jus honorum*, is the principle which governs at this day in defining citizenship in the countries deriving their jurisprudence from the civil law. (Wheaton's International Law, p. 892.)

The Dutch publicist, Thorbecke, says:

> What constitutes the distinctive character of our epoch is the development of the right of citizenship. In its most extended as well as its most restricted sense, it includes a great many properties.
>
> The right of citizenship is the right of voting in the government of the local, provincial, or national community of which one is a member. In this last sense the right of citizenship signifies a participation in the right of voting, in the general government as member of the State.

(Rev. & Fr. Etr., tom. v, p. 383.)

In a recent work of some research, written in opposition to female suffrage, the author takes the ground that women are not citizens, and urges that as a reason why they can properly be denied the elective franchise, his theory being that if full citizens they would be entitled to the ballot. He uses the following language:

> It is a question about which there may be some diversity of opinion what constitutes citizenship, or who are citizens. In a loose and improper sense the word citizen is sometimes used to denote any inhabitant of the country, but this is not a correct use of the word. Those, and no others, are properly citizens who were parties to the original compact by which the Government was formed, or their successors who are qualified to take part in the affairs of Government by their votes in the election of public officers.
>
> Women and children are represented by their domestic directors or heads in whose wills theirs is supposed to be included. They, as well as others not entitled to vote, are not properly citizens, but are members of the State, fully entitled to the protection of its laws. A citizen, then, is a person entitled to vote in the elections. He is one of those in whom the sovereign power of the State resides. (Jones on Suffrage, p. 48.)

But all such fallacious theories as this are swept away by the fourteenth amendment, which abolishes the theory of different grades of citizenship, or different grades of rights and privileges, and declares all persons born in the country or naturalized in it to be citizens, in the broadest and fullest sense of the term, leaving no room for cavil, and guaranteeing to all citizens the rights and privileges of citizens of the republic.

We think we are justified in saying that the weight of authority sustains us in the view we take of this question. But considering the nature of it, it is a question depending much for its solution upon a consideration of the government under which citizenship is claimed. Citizenship in Turkey or Russia is essentially different in its rights and privileges from citizenship in the United States. In the former, citizenship means no more than the right to the protection of his absolute rights, and the "citizen" is a subject; nothing more. Here, in the language of Chief Justice Jay, there are no subjects. All, native-born and naturalized, are citizens of the highest class; here *all citizens are sovereigns*, each citizen bearing a portion of the supreme sovereignty, and therefore it must necessarily be that the right to a voice in the Government is the right and privilege of a citizen as such, and that which is undefined in the Constitution is undefined because it is self-evident.

Could a State disfranchise and deprive of the right to a vote all citizens who have red hair; or all citizens under six feet in height? All will consent that the States could not make such arbitrary distinctions the ground for denial of political privileges; that it would be a violation of the first article of the fourteenth amendment; that it would

be abridging the privileges of citizens. And yet, the denial of the elective franchise to citizens on account of sex is equally as arbitrary as the distinction on account of stature, or color of hair, or any other physical distinction.

These privileges of the citizen exist independent of the Constitution. They are not derived from the Constitution or the laws, but are the means of asserting and protecting rights that existed before any civil governments were formed—the right of life, liberty, and property. Says Paine, in his Dissertation upon the Principles of Government:

> The right of voting for representatives is the primary right, by which other rights are protected. To take away this right is to reduce man to a state of slavery, for slavery consists in being subject to the will of another; and he that has not a vote in the election of representatives is, in this case. The proposal, therefore, to disfranchise any class of men is as criminal as the proposal to take away property.

In a state of nature, before governments were formed, each person possessed the natural right to defend his liberty, his life, and his property from the aggressions of his fellow-men. When he enters into the free government he does not surrender that right, but agrees to exercise it, not by brute force, but by the ballot, by his individual voice in making the laws that dispose of, control, an l regulate those rights.

The right to a voice in the government is but the natural right of protection of one's life, liberty, and property, by personal strength and brute force, so modified as to be exercised in the form of a vote, through the machinery of a free government.

The right of self-protection, it will not be denied, exists in all equally in a state of nature, and the substitute for it exists equally in all the citizens after a free government is formed, for the free government is by all and for all.

The people "ordained and established" the Constitution. Such is the language of the preamble. "We, the people." Can it be said that the people acquire their privileges from the instrument that they themselves establish? Does the creature extend rights, privileges, and immunities to the creator? No; the people retain all the rights which they have not surrendered; and if the people have not given to the Government the power to deprive them of their elective franchise, they possess it by virtue of citizenship.

The true theory of this Government, and of all free governments, was laid down by our fathers in the Declaration of Independence, and declared to be "self-evident." "All men are endowed by their Creator with certain inalienable rights; among these are life, liberty, and the pursuit of happinesss. That to secure these rights governments are instituted among men, deriving all their just powers from the consent of the governed."

Here is the great truth, the vital principle, upon which our Government is founded, and which demonstrates that the right of a voice in the conduct of the Government, and the selection of the rulers, is a right and privilege of all citizens.

Another of the self-evident truths laid down in that instrument is:

> That whenever any form of government becomes destructive of these ends, it is the right of the people to alter or abolish it, and to institute a new government, laying its foundations on such principles, and organizing its powers in such form, as to them shall seem most likely to effect their safety and happiness.

How can the people carry out this right without the exercise of the ballot; and is not the ballot then a fundamental right and a privilege of the citizen, not given to him by the Constitution, but inherent, as a necessity, from the very nature of government?

Benjamin Franklin wrote:

That every man of the commonalty, except infants, insane persons, and criminals, is, of common right, and by the laws of God, a freeman, and entitled to the free enjoyment of liberty. *That liberty or freedom consists in having an actual share in the appointment of those who frame the laws*, and who are to be the guardians of every man; life, property, and peace, for the all of one man is as dear to him as the all of another, and the poor man has an *equal* right but *more* need to have representatives in the legislature than the rich one. That they who have no voice nor vote in the electing of representatives *do not enjoy liberty, but are absolutely enslaved to those who have votes and to their representatives;* for to be enslaved is to have governors whom other men have set over us, and be subject to laws made by the representatives of others, without having had representatives of our own to give consent in our behalf.—*Franklin's Works*, vol. 2, p. 372.

James Madison said:

Under every view of the subject it seems indispensable that the mass of the citizens should not be without a voice in making the laws which they are to obey, and in choosing the magistrates who are to administer them.—*Madison Papers*, vol. 3, p. 14.

Taxation without representation is abhorrent to every principle of natural or civil liberty. It was this injustice that drove our fathers into revolution against the mother country.

The very act of taxing exercised over those who are not represented appears to me to be depriving them of one of their most essential rights as freemen, and if continued, seems to be, in effect, an entire disfranchisement of every civil right. For what one civil right is worth a rush after a man's property is subject to be taken from him at pleasure without his consent? If a man is not his *own assessor*, in person or by deputy, his liberty is gone, or he is entirely at the mercy of others.—*Otis's Rights of the Colonies*, p. 58.

Nor are these principles original with the people of this country. Long before they were ever uttered on this continent they were declared by Englishmen. Said Lord Summers, a truly great lawyer of England:

Amongst all the rights and privileges appertaining unto us, that of having a share in the legislation, and being governed by such laws as we ourselves shall cause, is the most fundamental and essential, as well as the most advantageous and beneficial.

Said the learned and profound Hooker:

By the natural law whereunto Almighty God hath made all subject, the lawful power of making laws to command whole politic societies of men, belongeth so properly unto the same entire societies, that for any prince or potentate of what kind soever upon earth to exercise the same of himself, (or themselves,) and not either by express commission immediately received from God, or else by authority derived at the first from their consent upon whose persons they impose laws, it is no better than mere tyranny! Agreeable to the same just privileges of *natural equity*, is that maxim for the English constitution, that "Law to bind all must be assented to by all;" and there can be no legal appearance of assent without some degree of representation.

The great champion of liberty, Granville Sharpe, declared that—

All British subjects, whether in Great Britain, Ireland, or the colonies, are equally *free* by the laws of nature; they certainly are equally entitled to the same natural rights that are essential for their own preservation, because this privilege of "having a share in the legislation" is not merely a *British right*, peculiar to this island, but it is also a natural right, which cannot without the most flagrant and stimulating injustice be withdrawn from any part of the British empire *by any worldly* authority whatsoever.

No tax can be levied without manifest robbery and injustice where this legal and constitutional representation is wanting, because the English law abhors the idea of taking the least property from freemen without their free consent.

It is iniquitous (*iniquum est*, says the maxim) that freemen should not have the *free* disposal of their own effect, and whatever is iniquitous can never be made lawful by any authority on earth, not even by the united authority of king, lords, and commons, for that would be contrary to the eternal laws of God, which are supreme.

In an essay upon the "first principles of government," by Priestly, an English writer of great ability, written over a century since, is the following definition of political liberty:

Political liberty, I would say, consists in power, which the members of the state

reserve to themselves, of arriving at the public offices, or at least of having votes in the nomination of those who fill them.

In countries where every member of the society enjoys an equal power of arriving at the supreme offices, and consequently of directing the strength and sentiments of the whole community, there is a state of the most perfect political liberty.

On the other hand, in countries where a man is excluded from these offices, or from the power of voting for proper persons to fill them, *that man*, whatever be the form of the government, has no share in the government and therefore has no political liberty at all. And since every man retains and can never be deprived of his natural right of relieving himself from all oppression, that is, from everything that has been imposed upon him without his own consent, this must be the only true and proper foundation of all the governments subsisting in the world, and that to which the people who compose them have an inalienable right to bring them back.

It was from these great champions of liberty in England that our forefathers received their inspiration and the principles which they adopted, incorporated into the Declaration of Independence, and made the foundation and framework of our Government. And yet it is claimed that we have a Government which tramples upon these elementary principles of political liberty, in denying to one-half its adult citizens all political liberty, and subjecting them to the tyranny of taxation without representation. It cannot be.

When we desire to construe the Constitution, or to ascertain the powers of the Government and the rights of the citizens, it is legitimate and necessary to recur to those principles and make them the guide in such investigation.

It is an oft-repeated maxim set forth in the bills of rights of many of the State constitutions that "the frequent recurrence to fundamental principles is necessary for the preservation of liberty and good government."

Recurring to those principles, so plain, so natural, so like political axioms, it would seem that to say that one-half the citizens of this republican Government, simply and only on account of their sex, can legally be denied the right to a voice in the Government, the laws of which they are held to obey, and which takes from them their property by taxation, is so flagrantly in opposition to the principles of free government, and the theory of political liberty, that no man could seriously advocate it.

But it is said in opposition to the "citizen's right" of suffrage that at the time of the establishment of the Constitution, women were in all the States denied the right of voting, and that no one claimed at the time that the Constitution of the United States would change their status; that if such a change was intended it would have been explicitly declared in the Constitution or at least carried into practice by those who framed the Constitution, and, therefore, such a construction of it is against what must have been the intention of the framers.

This is a very unsafe rule of construction. As has been said, the Constitution necessarily deals in general principles; these principles are to be carried out to their legitimate conclusion and result by legislation, and we are to judge of the intention of those who established the Constitution by what they say, guided by what they declare on the face of the instrument to be their object.

It is said by Judge Story, in Story on Constitution, "Contemporary construction is properly resorted to to illustrate and confirm the text. * * *It can never abrogate the text; it can never fritter away its obvious sense;* it can never narrow down its true limitations."

It is a well-settled rule that in the construction of the Constitution, the objects for which it was established, being expressed in the instrument, should have great influence; and when words and phrases are used which are capable of different constructions, that construction

should be given which is the most consonant with the declared objects of the instrument.

We go to the preamble to ascertain the objects and purpose of the instrument. Webster defines preamble thus: "The introductory part of a statute, which states the reason and intent of the law."

In the preamble, then, more certainly than in any other way, aside from the language of the instrument, we find the intent.

Judge Story says:

> The importance of examining the preamble for the purpose of expounding the language of a statute has been long felt and universally conceded in all juridical discussion. It is an admitted maxim * * that the preamble is a key to open the mind of the matters as to the mischiefs to be remedied and the objects to be accomplished by the statute. * * It is properly resorted to where doubts or ambiguities arise upon the words of the enacting part, for if they are clear and unambiguous, there seems little room for interpretation, except in cases leading to an obvious absurdity or to a direct overthrow of the intention expressed in the preamble. (Story on the Constitution, sec. 457.)

Try this question by a consideration of the objects for which the Constitution was established, as set forth in the preamble, "to establish justice." Does it establish justice to deprive of all representation or voice in the Government one-half of its adult citizens and compel them to pay taxes to and support a Government in which they have no representation? Is "taxation without representation" justice established?

"To insure domestic tranquillity." Does it insure domestic tranquillity to give all the political power to one class of citizens, and deprive another class of any participation in the government? No. The sure means of tranquillity is to give "equal political rights to all," that all may stand "equal before the law."

"To provide for the common defense." We have seen that the only defense the citizen has against oppression and wrong is by his voice and vote in the selection of the rulers and law-makers. Does it, then, "provide for the common defense," to deny to one-half the adult citizens of the republic that voice and vote?

"To secure the *blessings of liberty* to ourselves and our posterity." As has been already said, *there can be no political liberty* to any *citizen deprived of a voice in the government.* This is self-evident; it needs no demonstration. Does it, then, "secure the blessings of liberty to ourselves and our posterity," to deprive one-half the citizens of adult age of this right and privilege?

Tried by the expressed objects for which the Constitution was established, as declared by the people themselves, this denial to the women citizens of the country of the right and privilege of voting is directly in contravention of these objects, and must, therefore, be contrary to the spirit and letter of the entire instrument.

And according to rule of construction referred to, no "contemporaneous construction, however universal it may be, can be allowed to set aside the expressed objects of the makers, as declared in the instrument." The construction which we claim for the 1st section of the fourteenth amendment is in perfect accord with those expressed objects; and even if there were anything in the original text of the Constitution at variance with the true construction of that section, the amendment must control. Yet we believe that there is nothing in the original text at variance with what we claim to be the true construction of the amendment.

It is claimed by the majority of the committee that the adoption of the fifteenth amendment was by necessary implication a declaration that the States had the power to deny the right of suffrage to citizens for any other reasons than those of race, color, or previous condition of servitude.

We deny that the fundamental rights of the American citizen can be taken away by "implication."

There is no such law for the construction of the Constitution of our country. The law is the reverse—that the fundamental rights of citizens are not to be taken away by implication, and a constitutional provision for the protection of one class can certainly not be used to destroy or impair the same rights in another class.

It is too violent a construction of an amendment, which prohibits States from, or the United States from, abridging the right of a citizen to vote, by reason of race, color, or previous condition of servitude, to say that by implication it conceded to the States the power to deny that right for any other reason. On that theory the States could confine the right of suffrage to a small minority, and make the State government aristocratic, overthrowing their republican form.

The fifteenth article of amendment to the Constitution clearly recognizes the right to vote, as one of the rights of a citizen of the United States. This is the language:

"The right of citizens of the United States to vote shall not be denied or abridged by the United States, or by any State, on account of race, color, or previous condition of survitude."

Here is stated, first, the existence of a *right*. Second, its nature. Whose right is it? The right of citizens of the United States. What is the right? The right to vote. And this right of citizens of the United States, States are forbidden to abridge. Can there be a more direct recognition of a right? Can that be *abridged* which does not *exist?* The denial of the power to abridge the right, recognizes the existence of the right. Is it said that this right exists by virtue of State citizenship, and State laws and constitutions? Mark the language: "The right of citizens of the *United States* to vote;" not, citizens of *States*. The right is recognized as existing independent of State citizenship.

But it may be said, if the States had no power to abridge the right of suffrage, why the necessity of prohibiting them?

There may not have been a necessity; it may have been done through caution, and because the peculiar condition of the colored citizens at that time rendered it necessary to place their rights beyond doubt or cavil.

It is laid down as a rule of construction by Judge Story that the natural import of a single clause is not to be narrowed so as to exclude implied powers resulting from its character simply because there is another clause which enumerates certain powers which might otherwise be deemed implied powers within its scope, for in such cases we are not to assume that the affirmative specification excludes all other implications. (2d Story on Constitution, sec. 449.)

There are numerous instances in the Constitution where a general power is given to Congress, and afterward a particular power given, which was included in the former; yet the general power is not to be narrowed, because the particular power is given. On this same principle the fact that by the fifteenth amendment the States are specifically forbidden to deny the right of suffrage on account of race, color, or previous condition of servitude, does not narrow the general provision in the fourteenth amendment which guarantees the privileges of all the citizens against abridgment by the States on any account.

The rule of interpretation relied upon by the committee in their construction of the fifteenth amendment is, "that the expression of one thing is the exclusion of another," or the specification of particulars is the exclusion of generals.

Of these maxims Judge Story says:

> They are susceptible of being applied, and often are ingeniously applied, to the subversion of the text and the objects of the instrument. The truth is, in order to ascertain how far an affirmative or negative provision excludes or implies others, we must look to the nature of the provision, the subject-matter, the objects, and the scope of the instrument; these and these only can properly determine the rule of construction. (2 Story, 448)

It is claimed by the committee that the second section of the fourteenth amendment implies that the several States may restrict the right of suffrage as to other than male citizens. We may say of this as we have said of the theory of the committee upon the effect of the fifteenth amendment. It is a proposal to take away from the citizens guarantees of fundamental rights, by implication, which have been previously given in absolute terms.

The first section includes all citizens in its guarantees, and includes all the "privileges and immunities" of citizenship and guards them against abridgment, and under no recognized or reasonable rule of construction can it be claimed that by implication from the provisions of the second section the States may not only abridge but entirely destroy one of the highest privileges of the citizen to one-half of the citizens of the country. What we have said in relation to the committee's construction of the effect of the fifteenth amendment applies equally to this.

The object of the first section of this amendment was to secure all the rights, privileges, and immunities of all the citizens against invasion by the States. The object of the second section was to fix a rule or system of apportionment for Representatives and taxation; and the provision referred to, in relation to the exclusion of males from the right of suffrage, might be regarded as in the nature of a penalty in case of denial of that right to that class. While it, to a certain extent, protected that class of citizens, it left the others where the previous provisions of the Constitution placed them. To protect the colored man more fully than was done by that penalty was the object of the fifteenth amendment.

In no event can it be said to be more than the recognition of an existing fact, that only the male citizens were, by the State laws, allowed to vote, and that existing order of things was recognized in the rule of representation, just as the institution of slavery was recognized in the original Constitution, in the article fixing the basis of representation, by the provision that only three-fifths of all the slaves ("other persons") should be counted. There slavery was recognized as an existing fact, and yet the Constitution never sanctioned slavery, but, on the contrary, had it been carried out according to its true construction, slavery could not have existed under it; so that the recognition of facts in the Constitution must not be held to be a sanction of what is so recognized.

The majority of the committee say that this section implies that the States may deny suffrage to others than male citizens. If it implies anything it implies that the States may deny the franchise to all the citizens. It does not provide that they shall not deny the right to male citizens, but only provides that if they do so deny they shall not have representation for them.

So, according to that argument, by the second section of the fourteenth amendment the power of the States is conceded to entirely take away the right of suffrage, even from that privileged class, the male citizens. And thus this rule of "implication" goes too far, and fritters away all the guarantees of the Constitution of the right of suffrage, the highest of the privileges of the citizen; and herein is demonstrated the reason and safety of the rule that fundamental rights are not to be taken away by implication, but only by express provision.

When the advocates of a privileged class of citizens under the Constitution are driven to implication to sustain the theory of taxation without representation, and American citizenship without political liberty, the cause must be weak indeed.

It is claimed by the majority that by section 2, article 1, the Constitution recognizes the power in States to declare who shall and who shall not exercise the elective franchise. That section reads as follows:

> The House of Representatives shall be composed of members chosen every second year by the people of the several States, and the electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislature.

The first clause of this section declares *who* shall choose the Representatives—mark the language—"Representatives *shall be chosen by the people* of the States," not by the male people, not by certain classes of the people, but by the people; so that the construction sought to be given this section, by which it would recognize the power of the State to disfranchise one-half the citizens, as in direct contravention of the first clause of the section, and of its whole spirit, as well as of the objects of the instrument. The States clearly have no power to nullify the express provisions that the election shall be by the people, by any laws limiting the election to a moiety of the people.

It is true the section recognizes the power in the State to regulate the qualification of the electors; but as we have already said, the power to regulate is a very different thing from the power to destroy.

The two clauses must be taken together, and both considered in connection with the declared purpose and objects of the Constitution.

The Constitution is necessarily confined to the statement of general principles. There are regulations necessary to be made as to the qualifications of voters, as to their proper age, their domicile, the length of residence necessary to entitle the citizen to vote in a given State or place. These particulars could not be provided in the Constitution but are necessarily left to the States, and this section is thus construed as to be in harmony with itself, and with the expressed objects of the framers of the Constitution and the principles of free government.

When the majority of the committee can demonstrate that "the people of the States," and one-half the people of the States, are equivalent terms, or that when the Constitution provides that the Representatives shall be elected by the people, its requirements are met by an election in which less than one-half the adult people are allowed to vote, then it will be admitted that this section, to some extent, sustains them.

The committee say, that if it had been intended that Congress should prescribe the qualifications of electors, the grant would have given Congress that power specifically. We do not claim that Congress has that power; on the contrary, admit that the States have it; but the section of the Constitution *does* prescribe who the electors shall be. That is what we claim—nothing more. They shall be "the people;" their qualifications may be regulated by the States; but to the claim of the majority of the committee that they may be "qualified" out of existence, we cannot assent.

We are told that the acquiescence by the people, since the adoption of the Constitution, in the denial of political rights to women citizens, and the general understanding that such denial was in conformity with the Constitution, should be taken to settle the construction of that instrument.

Any force this argument may have it can only apply to the original text, and not to the fourteenth amendment, which is of but recent date.

But, as a general principle, this theory is fallacious. It would stop all political progress; it would put an end to all original thought, and

put the people under that tyranny with which the friends of liberty have always had to contend—the tyranny of precedent.

From the beginning, our Government has been right in theory, but wrong in practice. The Constitution, had it been carried out in its true spirit, and its principles enforced, would have stricken the chains from every slave in the republic long since. Yet, for all this, it was but a few years since declared, by the highest judicial tribunal of the republic, that, according to the "general understanding," the black man in this country had no rights the white man was bound to respect. General understanding and acquiescence is a very unsafe rule by which to try questions of constitutional law, and precedents are not infallible guides toward liberty and the rights of man.

Without any law to authorize it, slavery existed in England, and was sustained and perpetuated by popular opinion, universal custom, and the acquiescence of all departments of the government as well as by the subjects of its oppression. A few fearless champions of liberty struggled against the universal sentiment, and contended that, by the laws of England slavery could not exist in the kingdom; and though for years unable to obtain a hearing in any British court, the Sommersett case was finally tried in the Court of King's Bench in 1771, Lord Mansfield presiding, wherein that great and good man, after a long and patient hearing, declared that no law of England allowed or approved of slavery, and discharged the negro. And it was then judicially declared that no slave could breathe upon the soil of England, although slavery had up to that time existed for centuries, under the then existing laws. The laws were right, but the practice and public opinion were wrong.

It is said by the majority of the committee that "if the right of female citizens to suffrage is vested by the Constitution, that right can be established in the courts."

We respectfully submit that, with regard to the competency and qualification of electors for members of this House, the courts have no jurisdiction.

This House is the sole judge of the election return and qualification of its own members, (article 1, section 5, of Constitution;) and it is for the House alone to decide upon a contest, who are, and who are not, competent and qualified to vote. The judicial department cannot thus invade the prerogatives of the political department.

And it is therefore perfectly proper, in our opinion, for the House to pass a declaratory resolution, which would be an index to the action of the House, should the question be brought before it by a contest for a seat.

We, therefore, recommend to the House the adoption of the following resolution:

Resolved, by the House of Representatives, That the right of suffrage is one of the inalienable rights of citizens of the United States, subject to regulation by the States, through equal and just laws.

That this right is included in the "priviliges of citizens of the United States," which are guaranteed by section 1 of article 14 of amendments to the Constitution of the United States; and that women citizens, who are otherwise qualified by the laws of the State where they reside, are competent voters for Representatives in Congress.

WM. LOUGHRIDGE.
BENJ. F. BUTLER,

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 23.

CLAIM OF THE STATE OF NEW HAMPSHIRE.

[To accompany H. Res. No. 226.]

JANUARY 30, 1871.—Ordered to be printed and recommitted to the Committee of Claims.

Mr. ELA, from the Committee of Claims, made the following

REPORT:

Late in the year 1863 the President of the United States issued a call for three hundred thousand men, to be raised prior to the 8th day of January, 1864. It was found, in the State of New Hampshire, that many would volunteer if they could have the bounties, which the Government proposed to pay in installments, advanced to them, to be left with their families, in addition to the bounties offered by the State and by the several towns and cities in the State. The governor of New Hampshire was interrogated by the officers of the several towns, to know if any arrangement could be made with the United States Government to this effect; and he at once made inquiries of the War Department to know, if the towns and cities of the State of New Hampshire would advance the bounties offered by the General Government, in installments, and take assignments therefor, whether the Government would pay the installments as they became due, to the State, for the towns and cities advancing them. The result was, that an agreement was made by the War Department, representing the Government of the United States, with the governor of the State of New Hampshire, representing the towns and cities of that State, by which it was promised, on the part of the Government, that if the towns and cities of New Hampshire would advance the bounties which the Government offered in installments, to the men who volunteered to fill their respective quotas, and took assignments from them of such bounties, the Government would pay all such bounties as the installments became due, to the State, for the benefit of the towns and cities that had advanced them.

Under this arrangement about three thousand men volunteered, and received in advance their bounties, to the amount of near $900,000, and made assignments to the towns and cities advancing them. Allotment-rolls, containing the names of all the volunteers who received this advance bounty from the towns, were forwarded to the Paymaster General of the Army at Washington, to be by him forwarded to the paymasters in the field, so as to prevent the possibility of double payment to the soldiers.

The agreement on the part of the Government is clearly shown by the following letters:

WAR DEPARTMENT, PROVOST MARSHAL GENERAL'S BUREAU,
Washington, D. C., November 3, 1863.

Your telegram to the Secretary of War, asking if "the State of New Hampshire, or the various towns, should pay in cash to each man mustered the amount of bounty offered by the General Government, and take an assignment of his claim for bounty, will the Government pay these bounties to the State or towns instead?" has been received.

The proposition will be entertained, and the bounty paid to the State or towns, as proposed by you, for every recruit raised under the present call, and duly mustered into the United States service and delivered at the general rendezvous.

JAMES B. FRY,
Provost Marshal General.

His Excellency Governor GILMORE,
Concord, New Hampshire.

Official copy:

NATT. HEAD,
Adjutant General of New Hampshire.

WAR DEPARTMENT, PROVOST MARSHAL GENERAL'S OFFICE,
Washington, D. C., December 9, 1863.

SIR: I have the honor to inclose herewith memoranda of the proposition submitted to me, for refunding to the towns in New Hampshire the amount of bounty advanced to recruits under the present call of the President, and to state that the plan proposed is approved.

Orders will be issued immediately to the United States disbursing officer at Concord to pay to the State treasurer the first installment of the bounty due, and the Paymaster General will be requested to provide for the payment of the future installments as they become due.

I am, sir, very respectfully, your obedient servant,

JAMES B. FRY,
Provost Marshal General.

His Excellency J. A. GILMORE,
Governor of New Hampshire, Concord, N. H.

Official copy:

NATT. HEAD,
Adjutant General of New Hampshire.

WAR DEPARTMENT, *Washington City, December* 15, 1863.

SIR: The Secretary of War directs me to acknowledge the receipt of your communication of the 7th instant requesting that the paymasters who shall pay the New Hampshire regiments on the regular muster to be made on the last day of this month, may be ordered to retain the bounty or premium due the volunteers mustered in in that State since the 1st of November, 1863, for the purpose of securing to the various counties of the State the reimbursement of the United States bounties and premiums advanced by them, in full, to all such volunteers.

In reply, I am directed to call your attention to the inclosed copy of letter of instruction to the Paymaster General, and to say that the Secretary is highly pleased that the energetic and patriotic efforts of the good people of New Hampshire, to furnish their quota within the time prescribed, have met with such satisfactory results.

I have the honor to be, sir, very respectfully, your obedient servant,

ED. R. S. CANBY,
Brigadier General, Assistant Adjutant General.

His Excellency J. A. GILMORE,
Governor of New Hampshire, Concord, N. H.

I certify that the above is a true copy.

NATT. HEAD,
Adjutant General State of New Hampshire.

WAR DEPARTMENT, *Washington City, December* 15, 1863.

SIR: The Secretary of War directs that instructions be given the paymasters of the Army who may pay the New Hampshire regiments on the rolls for the muster of December 31, 1863, to pay no bounties or premiums to the volunteers mustered into the

service in that State since November 1, 1863. This direction is given in furtherance of the arrangement made with the governor of New Hampshire by the Provost Marshal General, under the authority of the Secretary of War, which is fully explained by the correspondence heretofore furnished you by the Provost Marshal General and by the accompanying copy of the governor's letter of the 7th instant.

Very respectfully, sir, your obedient servant,

ED. R. S. CANBY,
Brigadier General, Assistant Adjutant General.

Official:
C. T. CHRISTENSEN,
Assistant Adjutant General.

The PAYMASTER GENERAL, *Washington, D. C.*

Official copy:

NATT. HEAD,
Adjutant General of New Hampshire.

WAR DEPARTMENT, *Washington City, January* 16, 1864.

The agreement announced in telegram from Provost Marshal General, dated November 5, to the effect that if the State of New Hampshire or the towns should pay the bounties offered by the United States, and take an assignment from the recruit, that the Government would pay these bounties to the State or towns instead of to the men, will be carried out in good faith, and General Hinks will receive orders accordingly. Experience has developed difficulties in this connection which were not foreseen by the Department, and the arrangement will terminate on the 15th of February next.

EDWIN M. STANTON,
Secretary of War.

Official:

H. R. RATHBONE,
Brevet Colonel United States Army, in Charge Enrollment Branch.

Governor J. A. GILMORE,
Concord, New Hampshire.

WAR DEPARTMENT, PROVOST MARSHAL GENERAL'S BUREAU,
Washington, D. C., January 18, 1864.

SIR: In reply to your letter of the 12th instant, to the Secretary of War, referred by him to this office, in relation to the repayment to the towns of your State, of the United States bounties by them advanced in cash to the recruits from New Hampshire, and to your telegram upon the same subject, I have the honor to inclose herewith copy of instructions this day issued to Brigadier General Hinks, superintendent volunteer recruiting service for New Hampshire.

Please see telegram upon this subject of the 16th instant, to you from the Secretary of War.

I am, sir, very respectfully, your obedient servant,

JAMES B. FRY,
Provost Marshal General.

Official:

H. R. RATHBONE,
Brevet Colonel United States Army, in Charge Enrollment Branch.

His Excellency J. A. GILMORE,
Governor of New Hampshire.

WAR DEPARTMENT,
PROVOST MARSHAL GENERAL'S BUREAU,
Washington, D. C., January 18, 1864.

GENERAL: I am instructed by the Provost Marshal General to inform you that your circular of January 5, 1864, is not entirely approved, and to direct you to modify the first clause thereof so as to read as follows:

"The United States will repay by installments to the cities and towns of this State so much of the premium and bounties offered by the General Government to the volunteers under the President's call of October 17, 1863, as may have been actually advanced and paid in cash to or for each volunteer by said cities and towns, provided the recruit, in each case, for whom such amount was paid shall have made, or shall make, an assignment to the town of the amounts so paid. The bounties to be repaid to the towns in installments, as established by existing orders."

The Provost Marshal General further directs that you make such modifications of

the remainder of the circular, and of all papers dependent upon it, as may be required to conform them to the changes herein above ordered.

I am, General, very respectfully, your obedient servant,

GEO. D. RUGGLES,
Assistant Adjutant General.

Official:

H. R. RATHBONE,
Brevet Colonel United States Army, in Charge of Enrollment Branch.

Brigadier General E. W. HINKS,
Acting Assistant Provost Marshal General for New Hampshire, Concord, N. H.

Under this arrangement the first installments of these bounties were paid to the State of New Hampshire by the Government, at the time the volunteers were mustered into the service, and other amounts were sent to the State during the war as the installments became due. After the close of the war a settlement of these unadjusted claims was commenced with the officer of the Second Auditor of the Treasury, when it was found that some $40,000 were stopped from payment for the following reasons:

First, where payments were made to soldiers in the field as assigned bounties accrued. Second, for payments made to soldiers on muster-out. Third, for payments made to heirs of deceased soldiers. The following letter from the Second Comptroller of the Treasury explains why the accounting officers of the Treasury have not settled this class of claims in accordance with the agreement made by the War Department with the governor of the State:

TREASURY DEPARTMENT,
SECOND COMPTROLLER'S OFFICE, *April* 22, 1870.

DEAR SIR: In reply to your inquiry of this date I have to state that by the bounty laws the soldier, or beneficiary, could not alienate or devise the bounty, an order of descent having been prescribed by law. Whenever, therefore, a bounty had been paid by inadvertence to the soldier, or his heirs, by the disbursing or accounting officers, ignoring the claim of the State (of New Hampshire) founded on her advance and the soldier's transfer of his bounty, with the concurrence of the War Department, there was no law by which it could be recovered, nor any legal authority to credit the State with the amount.

I am, very respectfully, yours,

G. M. BROADHEAD, *Comptroller.*

Hon. JACOB H. ELA,
House of Representatives.

Congress is now asked for such legislation as will enable the accounting officers of the Treasury to adjust and pay to the State of New Hampshire, for the towns and cities of that State, the amount which may be found due under the agreement made with the governor of the State by the Provost Marshal General of the United States, acting under the direction and authority of the Secretary of War. The towns and cities in New Hampshire advanced the bounties in good faith, supposing they were dealing with the agent of the Government, who had full power and authority to make the agreement and to carry it out. The towns understood that they took only the risk of such losses as came from desertion, and relied upon the honor and integrity of the Government for the rest, and furnished the troops with such promptness as to receive the thanks of the Secretary of War. Justice would seem now to require that the errors of the United States Pay Department, which was under the control of the War Department, should not result in loss to the towns and cities of the State of New Hampshire, which had no control over it. They carried out the agreement on their part in good faith, and with an undoubting belief that the Government would do the same.

To effect this we recommend the passage of the accompanying joint resolution.

O

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 24.

WILLIAM McGARRAHAN.

FEBRUARY 1, 1871.—Recommitted to the Committee on the Judiciary and ordered to be printed.

Mr. PETERS, from the Committee on the Judiciary, made the following

REPORT.

The Committee on the Judiciary, to whom was referred the memorial of William McGarrahan, praying the passage of the following bill—

That the tract of land known as the Panoche Grande Rancho, in the State of California, granted by Governor Manuel Micheltorena, in the State of California, A. D. 1844, *and by said Gomez conveyed to William McGarrahan on the 22d day of December,* 1857, *surveyed by the United States surveyor general for California, and approved by him September* 11, 1862, *and which survey is now on file in the General Land Office, be, and the same is in all respects hereby, fully confirmed to said William McGarrahan, upon this condition, however, that the said McGarrahan shall, within twelve months after the passage of this act, pay into the Treasury of the United States the sum of* $1 25 *per acre for the land embraced in the said survey—*

submit the following report:

As the claimant invokes the aid of Congress to enable him to obtain possession of certain lands, the question arises, assuming that Congress has control of the subject, whether he has established such a claim as would justify the special legislation desired. To arrive at a correct conclusion on this question, it may be advisable to present a brief history of the case.

R. C. Hopkins, keeper of the archives of the former Mexican government of California, in his testimony, in speaking of the expediente (record) of V. P. Gomez, the grantor to the present claimant, says:

"This expediente consists of petition of Gomez to Governor Micheltorena, dated March 13, 1844, accompanied by map; marginal order of governor, dated March 14, 1844; order of secretary of state, Jimeno, referring the matter to the justice of the peace of San Juan, also dated March 14, 1844, and the favorable report of José Antonio Rodriguez, justice of San Juan, dated March 20, 1844; and here the expediente stops."

This petition was for three square leagues of land called "Panoche Grande." He further states that he searched diligently through the archives for evidence of the Gomez grant, but nothing could be found save the unfinished expediente.

On March 3, 1851, the Congress of the United States passed an "act to ascertain and settle private land claims in the State of California," &c., and providing for the appointment of three land commissioners to pass upon them, with a right of appeal to the United States district court for California, and also to the United States Supreme Court.

On the 9th of February, 1853, Gomez, by P. Ord, his attorney, presented to the said land commissioners a petition for the confirmation of his claim called "Panoche Grande," of the extent of *four* square leagues, and stated that the grant had been made by the Mexican governor. He filed no documentary evidence of title, stating that the title papers were

destroyed during the occupation of Monterey by the United States forces. In his petition to the land commissioners he claimed *four* square leagues, while in the one to the Mexican governor he asked for only *three*. But there was no record evidence that the Mexican governor made Gomez any grant whatever. He endeavored before the land commission to supply the deficiency of documentary title by parol evidence. Four witnesses were called before the land commission to testify to the existence of the grant. José Abrego testified that in the year 1845 Gomez showed him certain title papers to the land called "La Panoche." Oscar de Grand Barque testified that in the fall of 1845 Gomez offered to sell him a tract of land which he called "Panoche Grande," or something like it, and showed him a map and document which, he said, was a title to the land. J. L. Ord, brother of P. Ord, attorney for Gomez, says that in January, 1847, some old papers found in the custom-house at Monterey were destroyed. José Castro's testimony is to the same effect. The board of land commissioners, after hearing all the testimony, rejected the claim.

Gomez, through P. Ord, his attorney, appealed the case to the United States district court for the northern district of California, and the case was afterward transferred to the southern district, where it more properly belonged. While this appeal was pending, Ord was appointed United States district attorney for the district last mentioned, and his oath of office and good conscience required him to protect the United States against all interests adverse thereto. But in the Gomez claim he betrayed the trust committed to him by the Government, and covertly continued the attorney of Gomez, receiving from him a deed of half of the land in question. This conveyance, for the nominal sum of one dollar, is dated November 24, 1856, while Ord was United States district attorney, and without the shadow of a doubt was the consideration for his extraordinary conduct in securing the confirmation of the alleged grant. The letter of the clerk of the northern district to the clerk of the southern district, inclosing the papers, with the order of transfer, is dated June 1, 1857. It could not have reached Monterey before June 3, probably June 4. On June 5, 1857, Ord procured a brother lawyer to move the United States district court held at Monterey for the southern district of California to reverse the decision of the land commissioners, and confirm the grant. In reply to which motion Ord stated that the United States had no objection to the confirmation. On this statement alone, without trial or examination, the alleged grant was confirmed, but no decree of confirmation was then prepared.

On the 7th of January following, Ord filed a decree which was signed by the court, and entered *nunc pro tunc*, as of the first mentioned date, reciting that having omitted to sign and enter a decree then, it be done *now* for *then*, which confirmed *three* square leagues of land; and on the following 8th of February he procured another decree covering the same land, with an additional square league. This decree was filed also *nunc pro tunc*.

On December 22, 1857, the petitioner, McGarrahan, for the sum of eleven hundred dollars, purchased the interest of Gomez, and thus Ord and McGarrahan became tenants in common in the alleged grant as confirmed. At the time of this transfer there had been no decree entered; it was only "ordered to be entered." It was not entered as amended until February 8, 1858.

Under the law of Congress of March 3, 1851, no patent for a Mexican land grant could issue until final confirmation. This could be had in two ways: First. By the decision of the United States Supreme Court,

accompanied by a mandamus to the district court to carry out the decree, and an order for the survey of the land. Second. Congress authorized the Attorney General in any land grant case where the Government had taken an appeal to the district or Supreme Court, to examine the record, and when satisfied that the claim was legal to dismiss the appeal, and then the inferior court could have the land surveyed, and thus the claimant could get his patent.

In 1858 the Government sent the Hon. E. M. Stanton to California to appeal to the Supreme Court of the United States all cases decided adversely to the Government, and to look after land cases generally. Mr. Stanton, hearing of the fraud of Ord, filed a motion to set aside the decree in the Gomez case for such fraud, and to grant a new trial. This motion was never finally disposed of. Judge Ogier up to that time was not aware of the interest which said Ord had in the claim, Ord not having recorded the deed received from Gomez.

From December 22, 1857, when claimant purchased of Gomez, he and Ord became joint owners. At that time there had been an order for a decree in favor of the claim, but still a survey of the land was required in order to obtain a patent, which could not be had except upon final confirmation. It is clearly evident that a conspiracy was formed, through the contrivance of Ord, to effect a formal appeal to the Supreme Court of the United States in order to have the same there docketed and dismissed without attracting the attention of the United States and others adversely interested. For this purpose a paper, purporting to be the granting of an appeal in this and several other cases, was, without any authority of the court, placed among its files. This paper, purporting to allow an appeal, and in the handwriting of Ord, is pretended by him to haye been presented to the court by Colonel Kewen, a member of the California bar, while Kewen's testimony has never been obtained upon this point, and while Ord in his affidavit (which is a part of the testimony in this case) admits of his own knowledge that he knows nothing of it. The clerk of the court and the presiding judge both positively assert that no appeal up to that time was ever allowed, signed, or entered of record.

As the next step in carrying out the purposes of these parties, McGarrahan applied by letter, dated September 2, 1858, to the clerk of the court for a transcript of the record for the purpose of carrying the case to the Supreme Court of the United States. A correct transcript was sent, containing no statement of an appeal, as none had been granted, but containing among other papers the motion made by Stanton as before described. This was returned by McGarrahan to the clerk with a special request to send to him a transcript showing that an appeal had been allowed, and that he would find it among the papers, and also to omit the motion as made by Stanton, and to make it *regardless of expense;* in response to which a deputy clerk, without the knowledge of the court, made out to him what purported to be a transcript of the case, and made in accordance with his wishes, placing therein an appeal as if allowed, and omitting the motion of Stanton.

The petitioner's friends and attorneys carried this transcript to Jeremiah S. Black, then Attorney General of the United States, and endeavored to persuade him to allow the decree of the United States district court to be confirmed. Mr. Black, although he had not yet learned the true status of the case in the California court, having had his suspicions excited from the complicity of Gomez in other land claims which had proved fraudulent, utterly refused to comply with the proposition. Thereupon petitioner went into the Supreme Court of the United States.

One of the rules of this court is, that when an appellant neglects to file his record within twenty days of the next term, the appellee may file the transcript, and upon the meeting of the court the case, on his motion, shall be dismissed for want of prosecution. This the petitioner did, and the court dismissed the appeal, confirmed the decree below, and granted a mandamus to the district court to carry out the same and have the lands surveyed, no person appearing for the United States.

When the mandamus came to be heard in the district court Judge Ogier had it filed and continued, alleging that the Supreme Court must have been imposed upon, as he had never granted an appeal in the case.

The Attorney General, hearing of the falsity of the transcript imposed on the Supreme Court in this case, moved the court to rescind its former action, and that a mandamus be issued to the judge of the United States district court to certify whether any appeal had been taken, and directing the clerk to send up a true transcript of the case. These motions were granted.

The Supreme Court, on inspection and proof of the returns to the mandamus, set aside its previous order of confirmation, (23 Howard, p. 338,) saying, "It is a delicate and most unwelcome task which we are now performing, but it must be done in order that violated justice may be vindicated, and official purity of conduct in our courts may be preserved and be unsuspected."

When Judge Ogier learned of the fraud which had been practiced upon him he vacated his decree of confirmation, commenting with great severity upon the conduct of the party who had been guilty of the imposition. This step left the claim as it came from the commissioners—decided for the United States.

In the spring of 1862 Judge Ogier died, and Judge Haight was appointed his successor. The claimant, McGarrahan, moved to set aside Judge Ogier's vacating order, on the ground that as an appeal had been granted by the district court no decree could be changed after the term at which it had been allowed. Judge Haight granted this motion August 4, 1862; but censured severely the conduct of P. Ord, district attorney, declaring it to be a "gross case of fraud," and stated that it was not surprising that his predecessor, Judge Ogier, had, on learning the facts, set aside the decree of confirmation.

At the same term, August 25, 1862, Judge Haight granted an appeal from this decision to the Supreme Court of the United States.

December 3, 1862, Judge Haight set aside this allowance of an appeal, upon the mistaken theory that he had no right to have allowed the appeal. Before this, on the 22d of September, 1862, Attorney General Bates directed the district attorney to take an appeal from Judge Haight's decision to the Supreme Court and send up the record.

Mr. Wheeler, clerk of the court, would neither make out a transcript of the case nor permit any one else to have access to the records to perform that duty.

The claimant applied for an injunction to restrain the Attorney General from getting a record of the case, which application was, however, refused.

For more than a year the efforts of the Attorney General to obtain a transcript of the case were unavailing. Finally, the attention of the district attorney being called by the Attorney General to an act of Congress which allows the district attorney himself to make up such a record in certain cases, the necessary transcript was obtained.

The case having come before the Supreme Court under this law the claimant's attorneys moved to dismiss the appeal, on the ground that

more than five years had elapsed since the decree was pronounced; which motion was overruled. The decision of the court will be found in 1 Wallace, page 702, where the court says: "In view of the whole case our conclusion is, that the motion to dismiss the appeal must be overruled. The effect of the motion, if granted, would be to leave this decree below in full force and unreversed. That is a result we are not prepared to sanction."

The case was then set down for hearing on its merits. The decision of the court rejecting the claim will be found in 3 Wallace, page 773.

As to the judgment of the Supreme Court on the merits of the case, we have only to say that it is in accord with every decision concerning Mexican land grants; that if this case had never been before that court at all, but stood entirely on its merits, the decision must be adverse to the claimant, as it always has been. Hence, when Judge Ogier set aside the decree procured by the fraud of Ord, and set the case for trial, the claimant never made any demand for trial upon the case. He rested until Judge Ogier died, and Judge Haight was appointed his successor, and then came into court, not to seek a trial on his *rights*, but to take advantage of a technicality and avoid submitting the case on its *merits*.

Attorney-General Bates on this point says: "The United States only seek to secure what the claim has never been subjected to—a fair judicial hearing. If that is allowed, we expect to show that the claim is as fraudulent and illegal as the means that have been used to screen it from investigation." The trial of the case before the land commission was one of the first that was had under the law to settle titles protected by the Mexican treaty. The commissioners had not learned the extent of perjury and forgery which was so commonly afterward attempted to be practiced upon them, nor had they become acquainted with the true character of Gomez. But the case has been finally decided by the Supreme Court of the land, and decided upon all the law and the evidence, upon full transcripts and upon full hearing, and the claim has been unanimously rejected.

During the time that claimant was preventing the Attorney General from obtaining a transcript upon which to appeal the case from Judge Haight's decision, he was using extraordinary exertions to obtain a patent for the land from the Interior Department. It seems that the effort was to obtain this before the Supreme Court could get the case again upon its docket.

This plan nearly succeeded. Secretary Smith, of the Interior Department, under date December 29, 1862, says: "The only questions to be decided are, 'has the grant been confirmed by the decree of the proper court and are there any legal proceedings pending to reverse or set aside that decision?' Upon both of these questions it appears to us the answer must be in favor of the claimant." Further, that "the survey is but *prima facie* evidence of true location, and a patent will be but *prima facie* evidence of title," and "should conflicting claims arise, the parties cannot be precluded by a patent," &c.

The Secretary could not have known that Judge Haight had allowed an appeal to the United States Supreme Court, August 4, 1862, and that the Attorney General had ordered the transcript for that purpose, September 12, 1862, for he admits that the subject is one exclusively for the courts and that their action would bind the Department.

Secretary Usher, a few months afterward, and under the same misapprehension, decided that the action of his predecessor was binding upon him, and that such was the precedent and rule of the Department. He, too, advised that the patent should, by way of greater caution, contain

a provision that the description should be *prima facie* evidence only of the true location of the land granted, to be modified or avoided in that respect, if the same should be found to be erroneous.

This last ruling was made March 4, 1863. March 13, 1863, Attorney General Bates notified Secretary Usher that he intended to have the case brought before the Supreme Court for review. Upon which the Acting Secretary directed the Commissioner of the General Land Office to suspend the execution of a patent in the case until further orders.

The petitioner claims that President Lincoln also recognized his alleged rights.

The Honorable D. E. Sickles, "as one of the parties interested in the grant claimed by William McGarrahan and his associates," says in a letter dated January 22, 1867, that in the spring of 1864 he called upon the President for an order directing the patent to issue, and that the President ordered it to be issued; "that it was thereupon engrossed and signed *ready for delivery, but was not delivered*, although promised to me (him) on a day named."

It is clear enough, from all the sources of evidence in the transaction, that it was the spring of 1863, and not 1864, which Mr. Sickles referred to.

It is evident enough that the Executive Department in all its branches was beset and importuned unremittingly in behalf of the owners of the Gomez or McGarrahan claim.

In answer, however, to this parade of executive action and opinion, let it be borne in mind that there is no evidence that there was any knowledge upon the part of such parties that ulterior proceedings were pending or to be had in the courts; that in the patent as draughted the caution was used to insert the important clauses that the survey under which it was draughted should be *prima facie* evidence only of the true location of the land granted, and that "it should not affect the interests of third persons," while the claimant now asks for a confirmation without any such conditions.

Let it be remembered, further, that all the Attorney Generals in whose time of office this claim has appeared have most vigorously and earnestly denounced it, and as soon as the first notice came from the Attorney General's office to the executive branches all executive action has ceased, in order that the Supreme Court could determine the question, which long ago has been done.

Considerable controversy has arisen whether in fact a patent for this grant, which was prepared at the General Land Office, was ever executed. While, as hereinafter stated, the committee do not deem this to be an essential question at all, it may deserve some attention in this report. There is an unexecuted patent in the Land Office which has never been by anybody signed.

The question is hardly raised that any other one was ever made, but the proposition is intimated that this one has been tampered with by a subtraction of its last page, and the substitution of a new one.

If such a thing has occurred, no theory is started as to when, or how, or by whom such a thing has been done. Such a proposition should be supported by evidence the most conclusive.

What is the evidence?

Mr. Sickles in a letter, and not as a witness, says it was signed by the President. He gives no circumstances; he makes a mistake in the year, and says he feels confirmed by the verbal assurance of Mr. Usher, showing that his own recollection was not strong about it, and Mr. Usher has never been called to say any such thing.

Mr. Sickles had in mind the principal fact, which was the engrossing of the patent, and probably not so much the details.

This was said in 1867; the patent was engrossed in March, 1863; but the statement of the petitioner's counsel, made at or about the date of the patent, would be more likely to be accurate, and he would not be likely to give away anything by confession.

R. H. Gellett, of counsel for petitioner, in his written argument to said Usher, dated June 23, 1863, uses these words, "Before the patent *was actually signed* the Attorney General requested that its issuance might be delayed, which was ordered by the Assistant Secretary."

Mr. Stoddard, who was in 1863 secretary to the President for signing patents, testifies in 1871 to signing a patent labelled "Panoche Grande," but knew nothing of its contents, or in whose handwriting it was, or of its particular character; has not had his recollection called to it from 1863 until 1871, though he has been in New York all that time; thought the cover and the ribbon through the cover looked somewhat differently. The committee were not much impressed with the statements of this witness.

W. H. Lowry, who was a clerk in the General Land Office till June 30, 1863, and was conversant of the making and recording this patent, testifies that it was never signed.

J. F. Stoek, who was a clerk under said Lowry in 1863, and who has remained in the General Land Office ever since, testifies that this uncompleted patent was drawn by him on the 13th or 14th day of March, A. D. 1863, and was never signed, and that it has never been out of the Land Office but twice since and then for the inspection of the Judiciary Committees of the House of Representatives; that the reason it was not signed and completed will be found in the following letters.

It will be noticed that while it was made on the 13th or 14th, there could have been no intervening time for its completion from the dates of the following correspondence:

The patent itself is dated March 14th, though patents were, as has been explained, dated sometimes a day ahead of the making.

DEPARTMENT OF THE INTERIOR,
Washington, March 13, 1863.

SIR: The Attorney General has notified this Department that he intends to have the case of the land claim of Vicente P. Gomez, known as the Panoche Grande, brought before the Supreme Court of the United States for review, for the purpose of testing the validity of the grant.

Under these circumstances you will suspend the execution and delivery of a patent, under the decision of this Department of the 4th instant, until further advised in the case by the Secretary.

I am, sir, very respectfully, your obedient servant,

W. T. OTTO,
Acting Secretary.

COMMISSIONER GENERAL LAND OFFICE.

DEPARTMENT OF THE INTERIOR,
Washington, March 14, 1863.

SIR: I have the honor to acknowledge the receipt of your letter of the 12th instant, requesting me to forbid the issuing of a patent for the tract of land in California called Panoche Grande, claimed by Vicente P. Gomez, and to inform you that, in accordance with your desire, I have directed the Commissioner of the General Land Office to suspend the issuing of a patent until further advised on the subject.

I am, sir, very respectfully, your obedient servant,

W. T. OTTO,
Acting Secretary.

HON. EDWARD BATES,
Attorney General of the United States.

The book in which the patent was recorded in the Land Office, as it stood originally and before its correction according to the fact, reads as if the patent had been signed by the President. This is clearly explained by uncontradicted testimony that it was, and until lately ever had been, a fashion of the Office to record the patent in full with the President's name before it was presented to him for his official signature. However irregular this would seem to be, there were certain conveniences about it which led to such a practice.

There is considerable other testimony of an important character, showing that the unexecuted patent was never signed by the President of the United States, and your committee are of opinion that it never was signed by him.

But supposing it was so signed, was it ever in other respects completed? There is no evidence that it was ever signed by the Recorder of the General Land Office, or that it was ever sealed; and the signing by such Recorder and the sealing were acts in order of time done after the patent was returned from the President of the United States; while, on the contrary, all the evidence, oral and written, tends conclusively to show that such subsequent acts have never been performed. The record before alluded to shows an omission of the recorder's signature. The letter-book of the Land Office shows no record of letters sent either to the President or recorder requesting their signatures, though a patent never goes without such letter, and the letters are recorded. Nor can the Recorder or the President's secretary find such letters to them on their files, or in their possession.

In any view, there can be no claim that this or any patent to this party was ever *delivered*. Sickles says, "*but was not delivered.*" It would be strange indeed if McGarrahan had got a delivery in 1863, and should not know it till 1870! It is too late now to start the pretense that there was such a thing, actual or constructive.

There are deducible from these statements the following propositions:

1. That if there had been a delivery, then the land may have become vested in the patentee, and he needs no legislative aid or confirmation, but can find all his rights in the courts. He should seek his remedies in a judicial tribunal.

2. If not delivered, then it matters not whether the patent was formally completed or not, or to what extent it was completed. It remained the property of the United States.

3. But whether completed or not, or even delivered or not, if the petitioner can avail himself of the land claimed only by congressional action, and the claim is tainted with fraud, in such case he should be denied.

Inasmuch as the patent was suspended, and the record contemporaneously made would be an incorrect one, it has been cancelled by an indorsement by the order of the late Secretary of the Interior in the following words:

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
July 25, 1870.

This record, from pages 312 to 321, inclusive, was made in accordance with the custom at the time, in anticipation of the original being submitted to the officers whose duty it is, under the law, to sign land patents, but an order dated March 13, 1863, having been received from the Acting Secretary of the Interior, to "suspend the execution and delivery of the patent under the decision of" the "Department of the 4th" of March, 1863, "until further advised in the case by the Secretary," the form of patent which had been prepared, and from which the aforesaid record was made, was not submitted for signature, and has never been dated, signed, nor delivered.

JOS. S. WILSON, *Commissioner.*

J. N. GRANGER, *Recorder.*

The same thing has been done in other cases. Where can there be any impropriety or want of correctness in an annotation like this? Does the petitioner desire the accidental advantages of a false record, and denounce honest and sworn officials for their endeavors to have all the facts fairly presented and perfectly understood? It would seem as if a cry were raised about these immaterial matters to withdraw attention from the other, and, as far as the claimants are concerned, indispensable parts of their case.

The petitioner persistently claims that he has at least shown some steps taken by Gomez in pursuance of an intention, in 1844, to obtain a grant, and that the record evidence in that direction, to the extent named in the beginning of this report, would constitute a "property" within the language of the treaty with Mexico.

If such a claim had not been abandoned, lying dormant from 1844 until 1853, when the agricultural land began to be considered as valuable for its minerals, and if the case had not been repudiated by the proper judicial tribunal of the country, and further, if the owner of the claim had not been fully estopped by the magnitude of fraud, by which it has been beset in the courts of California, and if it was at this time a fair and open question, the committee find no difficulty in arriving at the conclusion that the position taken is unwarrantable.

The treaty was ratified May 30, 1848. In article 8, page 129, United States Statutes, 9 vol., this provision occurs: "In the said Territories *property* of every kind, now belonging to Mexicans not established there, shall be inviolably respected. The present owners the heirs of these and all Mexicans who may hereafter acquire said property by contract, shall enjoy, with regard to it guarantees equally ample as if the same belonged to citizens of the United States."

This is the only section under which any Mexican or his assignee could claim any interest. The property of Mexicans and Americans was to be protected alike. The sole object of the treaty was to *protect* property, not to *create* it, or add to it in any way.

Congress, in its act of March 3, 1851, section 11, after creating a board of land commissioners, before whom claims for Mexican lands should be submitted, enacted "that the commissioners herein provided for, and the district and supreme courts in deciding on the validity of any claim brought before them under the provisions of this act, shall be governed by the treaty of Guadalupe Hidalgo, the law of nations, the laws, usages and customs of the government from which the claim is derived, the principles of equity, and the decisions of the Supreme Court of the United States, so far as they are applicable."

Our Government in good faith fulfilled the obligations of this treaty. The records of the different tribunals of the United States show how fully that stipulation was enforced.

The treaty protects "*property*." This word is used in its common meaning and acceptation. It does not include inchoate equities or imperfect claims, but perfected rights. It was property "*now belonging* to Mexicans." This was in May 30, 1848. It was not what status they might subsequently acquire as to property, but the limitation was on their right at the date of the treaty.

Congress put a construction upon this section. It provided that the commissioners and the courts, in deciding land claims, should be governed by the "usages and customs of the Mexican government respecting them." What are these usages and customs?

R. C. Hopkins, keeper of Mexican archives, in his evidence, describes fully the manner in which the Mexican archives were kept by that gov-

ernment, as shown by the originals on file in the surveyor general's office. He states that the Mexican records of land grants consists of the expediente, or record of proceedings had in procuring the grant. This record was the petition to the governor, the reference to the alcalde to investigate the facts and ascertain if the land was in a condition to be granted under the laws of colonization, and if the petitioner was worthy to receive the land, and this was accompanied by a map.

When the governor was satisfied of the condition of the land and character of petitioner, he made a decree or order, &c. In case he granted the same, he directed a "titulo" or formal title deed to be made out and delivered to the grantee for his security, and a copy of this "titulo" was attached to the expediente, and this only required the approval of the departmental assembly. Next was the books of record, "Toma de Razon," which were required by the regulations of November 21, 1828, to be kept in the secretary's office. The grant must be recorded therein.

An original index, or list of expedientes, called the Jimeno Index, and the approvals of grants as found in the journals of the departmental assembly, and grants, are often mentioned in official and private correspondence on file in the archives.

Mr. Hopkins continues: "There are on file in the archives 579 expedientes, called complete, because the proceedings shown therein are prosecuted until the grant is either given or refused." He further shows that "said complete grants were all recorded, numbered, and placed in the archives."

He further says: "Besides these 579 so-called complete expedientes, there are 314 called incomplete, because they are not prosecuted until the grant is either given or refused, but were, from some cause, abandoned at different stages of the proceedings before they had reached the point where the governor either made or rejected the grant. In some of these expedientes there is only found the petition; others go so far as the marginal order of the governor requiring report to be made; and some go so far as the report of the justice of the peace or other officer in relation to the condition of the land."

He continues: "The incomplete expedientes are not found entered upon any original index or book of record in the archives, nor are they numbered, save in pencil, and this was done by clerks in the office of the United States surveyor general, about the year 1853, when an index of all the expedientes, complete and incomplete, was compiled for the use of that office. So that as to those unfinished expedientes there is no reference in the archives outside of the documents themselves."

Gomez petitioned for a grant on the 13th of March, 1844, as is claimed, for agricultural purposes. The Americans took possession of the country in 1846. For nine years he failed to prosecute his petition, nor had he possession of the land. All the circumstances tend strongly to show an abandonment of his application. There are on file 314 similar incomplete cases. To confirm this incomplete application would not be in accordance with the laws, usages, and customs of Mexico.

In the case of The United States *vs.* Noe, 23 Howard, 312, the court decided that "where a grantee, under the colonization laws, suffered eleven years to elapse without taking any steps toward the completion of his title, or the fulfillment of the obligations imposed, and there was no expediente in the archives to show the segregation of the land from the public domain, nor any delivery of possession or other assertion of right, he will be deemed to have abandoned the grant."

Nine years, 1844 to 1853, have elapsed without Gomez taking any

steps toward the completion of his title. There is no record of any grant to Gomez in the archives, nor do the archives show any segregation of the land from the public domain; nor was possession ever delivered to Gomez of the land; nor did he ever assert any right thereto during said time.

The Mexican Congress, on the 18th day of August, 1824, (and the regulations thereunder of November 21, 1828,) conferred upon its governors the only power that they had to make grants of the public domain of that country.

Grants, like the one set up in this case, were made, containing the following express conditions:

1st. "That they should be approved by the departmental assembly; that the land should be appropriated to use and cultivation."

2d. "That the grantee should solicit from the proper judge juridical possession, by which the boundaries should be marked by the proper landmarks."

3d. "That the grant should be recorded in the respective books; that a copy should be deposited in the archives, and a copy be delivered to the party interested for his security and other uses." (Rockwell's Mexican and Spanish Law, p. 453.)

There is no evidence that any of these conditions were either performed or undertaken to be performed during the continuance of the premises under Mexican dominion.

To confirm this grant would be to abrogate every requirement of the Mexican Congress, and the regulations thereunder.

Gomez claimed that this grant was made to him in 1844 by Governor Micheltorena.

During this year Manuel Jimeno was secretary of the governor. He is the same officer to whom the governor referred the petition of Gomez.

Jimeno kept a complete and perfect record, called "Jimeno's Index," of all the grants made during that year, (of 1844,) and there is no record in it of any such grant as the Gomez grant.

In the celebrated Limantour case Jimeno was called as a witness by the United States, and proved that there was no record ever made of said alleged grant, which enabled the Government to defeat this gigantic swindle.

There was also a book kept by the Mexican authorities, showing all the land grants made for a number of years, including the year 1844, known as the "Toma de Razon," in which land grants made by Governor Micheltorena are more particularly described. No copy of the alleged Gomez grant can be found in it.

There is not found on the journals of departmental assembly of Mexico any approval of the Gomez grant, or any reference to the same. Nor is it mentioned in the official and private correspondence on file in the archives. (See evidence of R. C. Hopkins.)

In Romero *vs.* The United States, 1 Wall. 721, the Supreme Court decides that "The Mexican record books called the 'Toma de Razon,' and the 'Index of Jimeno,' are public records, which this court may consult, though not put in evidence below."

The court places great value upon these Mexican books of record. (See 22 How., 405; Wall., 742; 1 Black, 349.)

The absence of the alleged Gomez grant from the "Toma de Razon," the Mexican record of land grants for 1844, from "Jimeno's Index" for the same year, kept by the secretary of Governor Micheltorena, no approval of the grant to be found of record in the journals of the departmental

assembly, and no copy of said alleged grant to be found in the Mexican archives, nor any mention of it in any of the official correspondence.

It may be worth while at this place to add a word upon the question of how far a possession under a grant was necessary to its validity. It has been urged that the land commissioners erred in their view of the law in the Gomez claim. We do not admit such an error. While the decision in the Frémont case, so much relied on, admits some departure from the rule, it does not abrogate it.

One of the conditions of every Mexican grant was, that "when the title shall be confirmed, he (the grantee) shall demand of the respective judge judicial possession of it, by which the boundaries shall be designated with the necessary landmarks."

This was necessary to segregate the grant from the public domain. No survey was made until the period of judicial possession. Under the colonization laws of Mexico, settlement and cultivation were indispensable conditions of every grant. This judicial delivery of possession is akin to livery of seizin, and was actual possession made before witnesses. The Supreme Court of the United States decides "that when a doubt arises upon the meaning of a grant, as to the quantity ceded, reference may be had to the judicial *possession* delivered to the grantee." (U. S. *vs.* Pïco, 6 Wal., 536.) Hence we see the necessity of this possession in order to make certain the boundaries of grants.

Alvarado, the grantor of Frémont, was prevented from taking possession of his grant, located in a wild and unsettled part of the country, by hostile Indians. The Supreme Court simply say, that the failure to perform an *impossible condition* will not vitiate a grant. Some time since the Frémont case was decided, the Supreme Court of the United States, in Malarin vs. United States, 1 Wall., decided that "judicial *possession after execution* of the grant was essential to the investiture of the title." In the case of Graham vs. United States, 4 Wallace, it reaffirms that decision.

Another point which attracts the attention of the committee, and which we cannot forbear to comment upon as briefly as its importance will permit, is as to the true location of the alleged grant to Gomez.

In the early history of land claims in California, it was found that by means of false surveys, grants of agricultural lands were located upon valuable tracts of mineral lands. These surveys were privately made, at the instance of the claimant, and were sent to the General Land Office at Washington. Thus, it was only by a journey of thousands of miles, at great expense, that an opportunity of contesting the integrity of these surveys could be had by the settlers, or those whose rights were affected by them. To remedy this evil, an act was passed by Congress, June 14, 1860, making it the duty of the surveyor general to give notice for at least sixty days, (afterwards made ninety days,) in some newspaper published in vicinity, of every survey of lands lying in the district of California, the plat being retained for examination in his office at San Francisco, with leave to settlers and others in interest to question its correctness.

June 26, 1860, claimant made application to the surveyor general of California for a survey of the Panoche Grande.

The application was forwarded to the General Land Office. September 4, 1860, the Secretary of the Interior refused permission to make the survey. June 2, 1862, Congress passed a law providing for a private survey of land claimed under alleged grants in California, but making such surveys "*prima facie*" evidence only of the true location of the grant.

The claimant in this case caused a private survey of the alleged Gomez grant to be made under this act within a very few weeks after its passage, under his own personal supervision. It was made by E. H. Dyer, United States deputy surveyor, in July, 1862. Said Dyer testifies that "he did not make the survey from *his own judgment* as to where the grant should be located, but that he made it under the *direction of McGarrahan* and the general instructions of the office," (surveyor general's;) that he was wholly unfamiliar with the country and could not have recognized the boundaries from the papers alone, and that he made the survey in three or four days.

Sherman Day, present surveyor general of California, says "he is familiar with the district of country," &c., "that he became acquainted with it January, 1859; that in April, 1866, he surveyed the New Idria mine and the country about there; that the country about the mine is a series of rough and precipitous mountains and hills, intersected by deep cañons; that the greater portion of it is barren and unfitted for agricultural purposes; it is essentially a mineral region; that the rancho de los Aguilas (one of the boundaries of the alleged Gomez grant) is distant about twenty-four miles in an air line from said mines;" that "he could make a correct survey of the Gomez claim;" that "such a survey would locate it *adjoining the Real de los Aguilas rancho, and not less than thirteen or fourteen miles from the New Idria mines;*" that "it appears from the field notes in his office that the Dyer survey was made between the 24th and 28th of July, 1862;" that "the aggregate length of the exterior lines of the Dyer survey is thirty-six miles and a little over;" that "from his knowledge of the country and experience as a practical surveyor it would take at least a fortnight, and perhaps three weeks, to make the Dyer survey properly."

Laurens Upson, the late surveyor general of California, states that he knows the localities.

He repeats the same statement as Sherman Day about the mountainous character of the country; that he has visited the reduction works of the New Idria Company. He then refers to a map, and says it is prepared upon the application of parties in the surveyor general's office, and the standard and township lines of the public surveys projected upon it, as well as the lines of private land claims finally surveyed and confirmed, viz, ranches Panoche de San Juan y los Carrisolitus and Real de los Aguilas, and the lines and location of these ranches, correspond with the official corrected map of the survey of private land claims in California for the year 1866, and that the survey of Panoche Grande is correctly delineated on said map. He, too, makes the boundaries of the land claimed to be confirmed to Gomez, by the decree, to be sixteen miles distant from New Idria mines.

Cassimer Bielawski, a civil engineer and draughtsman in the surveyor general's office, under Surveyor General Beale, says that, as draughtsman, he made a plat or map of the Dyer survey in September, 1862, under the order of E. F. Beale, surveyor general; it was made from the field notes and data of Dyer's survey; that in examining the field notes and survey, from which he compiled the plat, he found that one-half of the corners of the exterior boundaries of said grant had not been established by the deputy surveyor, on the ground, and for this reason he wrote in pencil on the map, when finished, his remarks to that effect, and advised him (Beale) that the survey should not be approved. He then handed the plan to Mr. William McGarrahan, who submitted the same to Mr. Beale for inspection. Mr. Beale overruled his objections, and on the 11th day of September, 1862, approved the plat and survey.

The boundaries of the Gomez grant do not seem to have been given always alike.

In his petition to the governor, Gomez prays for a grant "north by Julian Ursua, *south by the serrania*, (*mountain range*,) east by the valley of the Tulares, and west by Francisco Arias, containing three square leagues.

In his petition to the land commissioners to confirm the same alleged grant, he bounds it: "North by the lands of Julian Ursua, *south by the lands of Francisco Arias*, west by the barren hills," (no eastern course given,) "of the extent of *four* square leagues."

Claimant purchased the undivided one-half of three square leagues, and his deed recites the boundaries as "being the same lands for which a decree of confirmation has been entered in favor of Gomez. This decree gives them, northerly by the lands of Julian Ursua; easterly by the valley of the Tulare; westerly by the lands of Francisco Arias, and southerly by the hills."

Claimant asks Congress to confirm to him the Dyer survey in all respects as the boundaries of the alleged grant. That makes the boundaries "north by Julian Ursua; westerly by the lands of Francisco Arias; east by the Tulare Valley, and south by the Santa Anna River."

It will be seen that the alleged grant to Gomez was of an agricultural tract, and for agricultural purposes, while petitioner's claim is now essentially upon lands valuable only for its minerals; that while the valleys in that country are the only fit spots for agriculture, he has chosen his location mostly upon a mountain nearly 5,000 feet above the level of the sea, and 3,000 feet and more above the surrounding valleys, taking his location in a grotesque form, so as to throw upon a small portion of valley what acres he had left, after using up the valuable hills; that, as surveyed by Dyer, he is a great many miles away from the neighbors upon whom his calls would adjoin him in all the descriptions which he has heretofore given.

But particular attention is due another position in this connection.

McGarrahan asks Congress to confirm his grant as located on the face of the earth by the survey of Dyer, while, under the act of 1862, such location would only be *prima facie* evidence, leaving other parties to contest it, if not correct; and while the alleged patent now in the Interior Office, whether finished or not, contains a provision that the description shall be *prima facie* evidence only of correctness, the petititoner asks that Congress shall make this survey to him final and conclusive. The petitioner does not ask for the land which he claims was granted to Gomez, but such as was granted to Gomez and *surveyed to him by the private survey under the law of* 1862, thereby asking from Congress what he would not have obtained had the patent in the Department of the Interior been fully finished and delivered to him.

A word upon matters somewhat personal may not be objectionable in this report. In view of the appeals which have been made to us in behalf of the claim of petitioner, it may not be improper to remark that while the claim is pushed nominally by, it does not belong exclusively to, Wm. McGarrahan.

It seems that a quicksilver mining company has been erected to work upon this grant, incorporated by the laws of the State of New York, with a capital stock of ten millions dollars, but whether owned by few or many is a matter which should have no claim upon either our prejudices or sympathies.

The greatest latitude of argument was indulged in before the committee toward the United States Supreme Court, and especially in

regard to the conduct of several of the Attorneys General. The committee can see nothing in the official services of these gentlemen, upon whom much aspersion was heaped, which was not in accordance with the strictest integrity and a conscientious desire to perform, without fear or favor, the trusts which fell to them.

The committee do not consider it necessary to determine what rights upon the premises in question may or not belong to the company called the New Idria. Such a question has not been before us, only as incidentally bearing upon the main question as to the rights of the petitioner. While their claim is for 480 acres only, the petitioner's claim is for upward of 17,000 acres. The New Idria claim that they are the representatives of three-quarter sections, taken by settlers and miners, under the act passed by Congress on July 26, 1866. They claim no favors of special legislation, and ask only such rights as they allege belong to them under the general laws.

They will take their chances before the Departments and in the courts under the provision of the laws, as open to them as to all others, and merely ask that the general statutes shall not be, as to them and others, repealed or modified by invidious special legislation.

From the foregoing review, it seems there never has been a judicial decision in favor of the title of Gomez.

It is said, besure, that the land commissioners decided against the claim upon the law, and for the claim upon the facts, and that the decision of the question of law was erroneous.

It is enough for the present purpose that the decision upon the law and facts was rendered against Gomez.

If he was confident upon the facts at the trial before the land commissioners, neither he nor his successors have been willing to rely upon them afterward, but have constantly trusted to a pretended right founded on the merest technicality.

If the petitioner has sufficient proof of facts upon which to ask Congress for relief, why so unwilling to stand upon such proof before the courts?

Well has Attorney General Black said:

> The struggle, from the beginning of this case to the end of it, as far as I know anything about it, was a struggle upon the one side to get the case into court—to some court of competent jurisdiction, where it would be impartially and *fairly heard*—and upon the other side the struggle was to prevent it from being heard at all.

The committee find that there never was a completed grant to Gomez; that his witnesses are not trustworthy; that he was himself, in sustaining other grants, guilty of fraud and forgery; that the case was attempted to be put through the courts by fraud and gross deception; that the controversy has been fairly brought before the highest tribunal in the land upon its merits, and been fairly and properly decided; that it would be unwise in every view to reopen the litigation; that its effect would be to encourage and awaken numerous other defeated claimants of grants; that it would weaken the public faith in titles obtained under our treaty stipulations, and spread alarm among the multitude of miners and settlers in California, who cannot be heard or represented here; that the land now claimed for the Gomez title was not that covered by the alleged original grant.

In view of all which and for many other reasons, the committee recommend the passage of the following resolution:

A resolution relative to the petition of William McGarrahan.

Be it resolved by the House of Representatives of the United States of America in Congress assembled, That William McGarrahan is not en-

titled to the relief prayed for in his petition, and that the Committee be discharged from a further consideration of the same.

The committee would submit, as indispensable to the correct understanding of the propositions discussed in this report, documents annexed and marked—

Exhibit A, extract from the opinion of the Supreme Court in the case of United States *vs.* Gomez, 23 Howard.

Exhibit B, decision of the Supreme Court United States rejecting the Gomez claim on its merits, 3d Wallace, 773.

Exhibit C, Judge Ogier's return to the mandamus of the Supreme Court as to the fact whether an appeal was taken or not.

APPENDIX.

A.

Extract from the opinion of the Supreme Court in the case of United States vs. Gomez.

The following is an extract from the opinion of the Supreme Court in the case of United States *vs.* Gomez, 23 Howard, page 332:

Mr. Ord was originally the attorney of Gomez before the board of land commissioners, and filed his petition there as such on the 9th February, 1853. He was not then district attorney, but he became so on the 1st of July, 1854, before the land commissioners decided the case against his client. After his appointment, and after an order had been obtained, at his instance, to remove the cause from the northern district of California to the southern, of which he was the district attorney, and while the cause was pending in the latter, he took from Gomez, for the nominal consideration of one dollar, a transfer to himself for one-half of the land in controversy. This Mr. Ord admits in his affidavit, presented to this court by counsel. The conveyance to him bears date on the 24th of November, 1856. It was acknowledged on the same day by Gomez, before a notary public of the county of San Francisco, and was, at the request of Mr. Ord, recorded in the county of Merced on the 26th November, 1857; was also filed for record in the county of Fresno on March 26, 1858, and again recorded by Mr. Ord, in Monterey County, the 3d May, 1858. A copy of that conveyance is now before us. These dates show that no record of the conveyance to him was made until after the claim had been confirmed by the district judge, upon his representation that, as district attorney, there was no objection to its confirmation; in other words, that he thought the claim a valid claim, and was within the rulings of the court in other claims of the same kind.

We shall cite the notice in its words; for, as it had been in fact the subject of the court's action, and could not have been so without the knowledge of Mr. Ord, and without his agency, it devolves upon him the task to disprove the declarations of Mr. Hartman of the forgery of the name of the firm of Hartman & Sloan to the paper. We ought to remark, however, that Mr. Sloan, of the firm, is not shown by any paper to have had any personal agency in the matter. The notice is: "Now, on this day came the parties, the appellant by Hartman & Sloan, and the appellee by P. Ord, United States district attorney. Whereupon, on motion of the attorney of the appellant, it is ordered that the transcript and papers transmitted from the northern district court be filed in this court, and that the petition for a review of the same be entered thereon, and that the claimant have leave to proceed in said cause the same as if it had been originally filed in this court." On the same day, a petition was filed for a confirmation of the claim.

After the confirmation of it, in the manner as will hereafter be stated, Mr. Sloan, upon being told of the motion, and that it was signed by the firm of Sloan & Hartman, but, in fact, as if the style of their firm was *Hartman & Sloan*, made his affidavit under a commission instituted by Judge Ogier, that neither as a member of the then firm of Sloan & Hartman, nor otherwise, was he ever retained or employed in the case; that he never wrote nor authorized to be written any petition or other paper in the case; that he never had seen such a petition; that he had never authorized any one to use his own name, or that of the firm of Sloan & Hartman, in the case; and that, if the paper was signed as it is represented to be, it had been without any consultation with him, or his consent or approbation.

* * * * * *

The motion made for the removal of the cause to the southern district is said to have been signed by E. W. F. Sloan, esq., and presented by him in open court; and the order said to have been passed recognizes that as a fact. On the same day the firm of Hartman & Sloan is reported in the transcript to have filed a notice of appeal with the clerk of the district court for the southern district. The paper has all of the formality and substance which such a paper should have, but Hartman & Sloan deny the fact of having had any agency in making such a motion; and these separate affidavits would be sufficient to sustain their disclaimer, were it not, so far as Hartman is concerned, that his subsequent conduct in the case shows a connection between himself and Mr. Ord, which throws suspicion upon both; and that is aggravated by Hartman's deposition, by that of other persons, and by the narrative given by Mr. Ord of his conduct in the suit.

Hartman then makes his affidavit, that he had no knowledge who made and caused the petition to be filed, nor by whose authority and direction the same was done. But he states that, while attending the June term of the southern district court in 1857, Mr. Ord, then United States district attorney, asked him if he would do him the favor to present a claim to the court for confirmation, stating it was a case in which there would be no opposition on the part of the Government. That, not suspecting there would be anything wrong about a claim to which the Government had no objection, he consented to do so; that, on the same day, the court being in session, and he being seated at the bar table, Mr. Ord passed to him the transcript in the case of Gomez and the United States, which he read to the court without any remarks, supposing it to be the case of which Mr. Ord had spoken to him; that after he had finished reading it, Mr. Ord remarked to the court that there was no opposition on the part of the Government to a confirmation; whereupon the court replied that there being no objection, the claim would be confirmed as a matter of course. Mr. Hartman continues his narrative of his further connection with the case and with Mr. Ord, six months after, at the December term of the court, when it was held at Los Angeles. He says that when Mr. Ord remarked to him that it had been omitted, at the time of the confirmation of the claim, to have a decree signed by the judge, that Mr. Ord requested him to draw a decree, and to present it to the judge, to be signed *nunc pro tunc*. He says that he did so, without knowing or suspecting that Mr. Ord had an interest in the land claimed by Gomez. This statement by Hartman of his agency in the confirmation of the claim, and in getting a decree upon it six months afterward at the instance of Mr. Ord, is denied by the latter in his affidavit, excepting as to his declaration to the court that the Government had no objection to the confirmation of the decree. The latter he admits in stronger terms than have been given. We shall use the affidavit for other purposes, and will have it printed in connection with this opinion, in justice to Mr. Ord, that the relation between himself and Mr. Hartman may be properly estimated from their respective declarations concerning it, only remarking now that there is proof that Mr. Hartman had subsequently declared himself to have been the attorney of Gomez in the case; that he had been so in all that he had done in the case; and that he had charged and demanded a fee for his services. It is not necessary for us to attempt to reconcile these differences, but it has certainly turned out unfortunately for Mr. Ord, in raising a violent presumption, from the manner in which they acted in the cause, that there was a concert between them to reverse the decision of the commissioners, and to obtain a decree in the district court for the claimant.

B.

Decision of the Supreme Court of the United States rejecting the Gomez claim upon its merits.
(3 Wallace, page 733.)

Regarding the case as regularly before the court, it becomes necessary to examine the merits of the claim. Some suspicion attaches to it, because it is made for four leagues of land; whereas the only document introduced in support of it, which is of the least probative force, represents the original claimant as having asked for but three leagues. The document referred to purports to be a petition of the claimant to the governor, and there is appended to it the usual *infórme;* but there is no concession or grant, nor is there any satisfactory evidence, that any title of any kind was ever issued by the governor to the claimant. He states in his petition to the land commissioners, that he obtained the map or record from the proper officers of the department; but the alleged fact is not satisfactorily proved. Four witnesses were examined by the claimant before the land commissioners, but only one of the number pretended that he had ever seen the grant, and his statements are quite too indefinite to be received as satisfactorily proved.

Instead of proving possession under the grant, it is satisfactorily shown that he never occupied it at all, and it is doubtful if he ever saw the premises during the Mexican rule. The land commissioners rejected the claim; but before it came up for hearing in the district court, his attorney had been appointed district attorney of the United States, and the proof shows that he conveyed two leagues of the land to the district attorney. The circumstances of the confirmation of the claim in the district court are fully stated in the opinion of this court, when the mandate was revoked and recalled. (United States *vs.* Gomez, 23 Howard, 339.) Comment upon those circumstances is unnecessary, except to say that the confirmation was fraudulently obtained.

Although the decree was fraudulently obtained, still, inasmuch as it is correct in form, it is sufficient to sustain the appeal for the purpose of correcting the error. The party who procured it cannot be allowed to object to its validity as a means of perpetuating fraud, especially as he did not appeal from the decree. The decree of the district court is therefore reversed, and the case remanded with directions to dismiss the petition.

C.

Return of Judge Ogier upon the application of McGarrahan's attorneys for a mandamus to compel him to carry out the mandate of the Supreme Court of the United States.

To the Honorable the Supreme Court of the United States:

The undersigned, judge of the United States district court in and for the southern district of California, having been served with a copy of an application to be made to your honorable court for a peremptory mandamus "commanding him,(me,) as judge of said district court, to dismiss a certain motion now pending in said court, for a new trial in a certain cause now remaining in said court, entitled Vicente P. Gomez, appellant, *vs.* The United States, appellee, and numbered on the calendar 393, said United States being the moving party in the motion aforesaid; also, commanding me to do and allow to be done in said cause whatever by right and justice and the laws of the United States ought to be done, and remains to be done therein," the aforesaid application will be made to the Supreme Court on the affidavits and exhibits thereunto annexed, and on the records and files now remaining in the said court in a case lately pending therein, entitled Vicente P. Gomez, appellant, *vs.* The United States, appellee, begs leave to return the annexed certified copies of the files and extracts from the minutes in this cause.

The undersigned would also beg leave to suggest to your honorable court that if he has erred in entertaining the motion for a new trial, and continuing the hearing of the same, the remedy of the party was not by mandamus, but by appeal or writ of error.

I would also most respecfully suggest that the application for a peremptory mandamus, in a case of this character, before the issuance of the rule "*nisi*," is entirely without precedent.

But if your honorable court should decide that this remedy sought for by the party be the proper one, I would most respectfully beg leave to submit the following statement:

This cause came on to be heard before the United States district court in and for the southern district of California, on an appeal from the board of land commissioners.

The transcript in this case was first filed in the northern district of California, and afterward, upon the suggestion of E. W. F. Sloan, and upon the affidavits of Gomez, the claimant, and H. Cambuston and Castro, that the lands claimed were in the southern district of California, the court ordered the transcript and record to be sent thereto.

The transcript of the record before the land commissioners shows that a petition was filed before that board on the part of the claimant by Pacificus Ord, as his attorney, asking for a "confirmation of the lands claimed." The next document of record is the decree of the commissioners rejecting the claim.

A notice or intention to appeal on the part of the claimant is filed in the cause, signed by E. O. Crosby.

The next document which appears of record, and in this court, is a petition for a review in accordance with the practice established by the court, and signed by Hartman and Sloan, (marked in annexed exhibits I, pages 10 and 11,) filed June 4, 1857. No answer thereunto appears on the record of the court.

The extract from the minutes of the court, marked K, page 14, in exhibits hereunto annexed, shows that the case was submitted to the court, and a judgment rendered therein. No decree was entered at the term during which the judgment was rendered.

A motion was made on the 5th day of February, 1858, to enter a decree "*nunc pro tunc*," and a decree was accordingly signed, filed, and entered on that day as of the 5th of June, 1857. On the 15th of March, 1858, E. J. C. Kewen, acting for P. Ord, United States district attorney, filed a motion for leave to take an appeal in this and several other cases, which motion was taken under advisement by the court, as will be seen by reference to page 21, document P, in annexed exhibits. On the 7th of July, 1858, E. M. Stanton filed, as special counsel for the United States, a motion to open said decree, reinstate the cause upon the docket, and for leave to take testimony on the part of the United States; said motion is in annexed exhibits, marked W, page 29.

When, afterward, on the 7th of December, 1858, J. R. Gitchell, United States district attorney, who had succeeded P. Ord, filed his motion for leave to withdraw the motion made on the 15th March, for leave to appeal this with several other cases, which was granted, as will appear by reference to document Q, page 22, of annexed exhibits. Upon the same day, to wit, the seventh day of December, 1858, J. R. Gitchell, United States district attorney, filed his motion and affidavit for reopening the decree, and to reinstate said cause on the calendar; which said motion and affidavit were lost from the files of the court, but refiled "*nunc pro tunc*," January 11, 1860, as will be seen by reference to documents marked A A, B B, and G G, to be found on pages 32, 33, 34, and 44 of annexed exhibits.

On the 4th day of May, 1859, J. L. Brent, attorney of Vicente P. Gomez, appellant,

appeared in open court, and made his motion for leave to file a mandate of the Supreme Court, and for an order to proceed under the former decree of this court as under a final decree; which said motion was, by consent of parties, continued indefinitely, as appears from documents R and S, pages 23 and 24, annexed records.

From document T, page 25, of annexed records, it will be seen that on the 7th of November, 1859, Shafters, Park, and Hydenfelt, and E. W. Taylor were substituted as attorneys of record for appellant in this cause, and on the 8th day of November, 1859, the parties, by their counsel, stipulated that all questions in this cause should be set down for argument and for final submission on Monday, the 9th day of January, 1860, as will be seen by reference to document X, page 30, annexed records.

On the 7th of December, 1859, E. L. Goold appeared as special attorney of the United States, and moved to continue the whole case until the next regular term of this court; which motion was overruled. See extracts from minutes, marked Y, page 31, annexed exhibits.

On the 11th day of January, 1860, J. R. Gitchell, United States district attorney, filed his motion and affidavit for a continuance of this cause until the next regular term of the court; said motion and affidavit will be found, marked C C, pages 33 and 36, annexed records; which said motion was considered and overruled by the court, but said cause was continued by the court on its own motion, for further testimony, as will appear from extracts of minutes, marked I I and J J, pages 46, 47, and 48 of annexed records. In addition to these exhibits are also fied the affidavits of Mr. Hartman, setting forth that the petition in this cause, purporting to be signed by Hartman and Sloan, was never so signed by them, nor either of them, or by any person authorized by them, and that they nor either of them ever appeared as attorneys in this case, except by the request of P. Ord, United States district attorney, as will appear by reference to document E E, pages 39, 40, 41, and 42, annexed records.

The attention of your honorable court is particularly called to this affidavit of Mr. Hartman, and also the deposition of Mr. E. W. J. Sloan.

I have filed in this cause a record of the whole proceedings in the case, voluminous, and somewhat, perhaps, irrelevant; but I have done so for the reason that in arresting the case in its present stage on my own motion, I have taken a course outside of the usual and ordinary practice of courts of justice.

The rules of the United States district court in and for the southern district of California require that, after the filing of a transcript from the board of land commissioners, and a notice of intention to prosecute the appeal, a petition should be filed by the party seeking a review of the decision of the board of land commissioners, and that a copy thereof shall be served upon the opposite party or their attorneys, before the cause can be brought to a hearing.

The rules of this court, adopted on the 14th day of June, 1855, are annexed to the documents filed in this case, and marked Y Y.

It will be seen from the record evidence heretofore referred to, that P. Ord was the attorney of the claimant before the board of land commissioners; and that he afterward became United States district attorney for the southern district of California.

The notice of intention to appeal in this case was filed by one E. O. Crosby. This, so far as the claimants are concerned, seems to be all that was ever done in their behalf, or by their sanction. A petition for a review of the proceedings of the board of land commissioners was filed on behalf of claimants, purporting to be signed by Hartman & Sloan. The affidavit of Mr. Hartman is to the effect that no such petition ever was signed by either Mr. Sloan or himself, or by any other person authorized by them to sign the same. The affidavit further shows that they never were employed by the claimants in this cause, or authorized to take any steps therein.

An answer to said petition was filed in the clerk's office of the United States district court in and for the southern district of California, by P. Ord, United States district attorney, but by whom signed is not known, as the said answer is now missing from the records of the court.

On the 5th of June, 1857, at a term of the court held in Monterey, Mr. Hartman appeared, and presented this cause to the court, merely stating the title of the cause and the number upon the docket. Mr. Ord appeared upon the part of the Government, stating that there was no objection to a confirmation upon the part of the United States, and, as a matter of course, a judgment of confirmation was entered. Supposing, as the court did, that Mr. Hartman was the attorney of record for the claimants, and duly authorized to represent them in said cause, and Mr. Ord being the United States district attorney, an officer of the United States Government empowered to attend to the interest of the Government in these causes, and consenting to said confirmation, without an examination of the papers, I, as judge of the court, ordered a decree of confirmation to be entered.

No decree was entered at the term at which judgment was rendered, nor was any motion for appeal on the part of the United States made. At a subsequent term of the court, held at Los Angeles, commencing on the first Monday in December, 1857, to wit, on the 15th day of March, 1858, during said term, E. J. C. Kewen, acting for P. Ord,

United States district attorney, made a motion for leave to appeal this cause with several others. At that time, counsel employed in the land cases in California were in doubt whether an appeal could be taken after the expiration of the term at which judgment was rendered, and, at the suggestion of Mr. Kewen and other counsel engaged, the question was taken under advisement by the court to await the decision of a case then pending before the Supreme Court, in which it was suggested to this court that this point would be settled. Intermediate to the motion of Mr. Kewen for leave to appeal from the judgment of confirmation, a decree had been offered to the court by Mr. Hartman, Mr. Ord thereunto consenting on the part of the United States, and signed by me, as judge, confirming the claim.

On the 7th of July, 1858, Mr. E. M. Stanton, special attorney for the Government, filed his motion before referred to for a rehearing in this case, unaccompanied by any showing, which motion was filed in the clerk's office, and no action had upon it by the court.

At the commencement of the term, to wit, on the 7th day of December, 1858, J. R. Gitchell, United States district attorney, who had succeeded Mr. Ord, filed his motion for leave to withdraw the motion heretofore made by Mr. Kewan for leave to appeal this and several other cases; and also filed a motion for a rehearing in this case, accompanied by an affidavit, substituting the same for the motion of Mr. Stanton.

It seems from the records and from the affidavits of the clerk of the United States district court in and for the southern district of California, and his deputy, that something purporting to be a record of proceedings in this case was obtained from the clerk's office by one William McGarrahan, and filed in the clerk's office of your honorable court, and the cause called up upon what purported to be a record of the proceedings of this court, and dismissed, and the mandate of your honorable court issued, commanding me to allow the parties to proceed under the decree heretofore entered in the United States district court in and for the southern district of California, as under a final decree.

When this mandate was offered by Mr. J. L. Brent to be filed, together with the order for carrying it out, it was resisted by the United States district attorney on the grounds that no appeal had ever been allowed, and the records of this court were produced in support of his objections. Under these circumstances, I was induced to examine the case thoroughly, and for the first time finding, from the transcript filed from the land commission, that Mr. Ord had been the attorney of the claimants before that board, and that the notice of intention to appeal the cause to the United district court was also in his (Ord's) handwriting, although signed by one E. O. Crosby; that the answer to the petition of review, which was then in the records of this court, was also in the handwriting of Mr. Ord; and there appearing upon the records of the court no attorney for the claimants, that the court had been imposed upon and induced to issue its decree of confirmation by the false representations of Mr. Hartman and Mr. Ord, I entertained the motion. Your honorable court will see, from the record evidence filed in this cause, that when the day, fixed by consent and stipulation of all the parties, for the hearing of all the motions pending in this case, had arrived, to wit, 11th day of January, 1860, Mr. J. R. Gitchell, United States district attorney, made a motion for a continuance, accompanied by an affidavit setting forth that the decree of this court heretofore entered had been improvidently made and fraudulently obtained, inasmuch as the United States district attorney, P. Ord, had, before the rendition of the judgment and entering the decree of the court in this cause, become interested in the claim by virtue of a deed of conveyance from the claimant, Vicente P. Gomez, to him, (Ord,) for two square leagues of the land claimed, and that he (Ord) had collogued and conspired with the said Vicente P. Gomez, or his assignees, and for his own interest, to permit said judgment to be entered without contest on the part of the United States.

The deed from Gomez to Ord did not accompany the affidavit, but it was admitted by counsel for claimant that said deed existed, and it was stipulated that a copy of said deed might be filed in this cause as evidence; which has since been done, and a copy thereof annexed to accompanying records.

This motion of the district attorney for a continuance was refused for reasons which I stated from the bench, and which were, that his remedy was not by a motion for a rehearing, but by motion for leave to file a bill of review; but while I refused the continuance on the motion of the district attorney, I felt it my duty, convinced by the proof shown by the records, that I had been induced improvidently to make the decree in this case, and to continue it on my own motion, in order to obtain the testimony of Mr. Sloan as to his connection with the cause.

A commission was issued, and the deposition of Mr. Sloan taken in it. He denies all connection with the case whatever, except so far as having made the motion before the district court of the northern district of California to send the transcript in this case to this court, which he avers he did, as a matter of courtesy, on the application of some attorney, (he believes Mr. Ord.)

Under these circumstances, I have felt it my duty to keep the case open, in order that the parties interested may have an opportunity of fairly presenting their inter-

ests before this court. The whole record shows that Mr. Ord was representing both interests in this case; that he had been the attorney of the claimant from the inception of the cause before the board of land commissioners, up to the time the decree was entered in this court; and that the appellees in this case had really never been represented; and when this fact was brought to the notice of the court by the present district attorney, Mr. Gitchell, sustained by the record proofs, it seemed to me the only course left, in order that justice might be done, was to keep the case open.

As to the merits of the claim, I have carefully abstained from examining into them. The course pursued by me can under no circumstances work permanent injury to either party. If the claim be meritorious, the parties in interest have only to have it properly presented, and I am sure your honorable court will feel the same indignant disapprobation of the conduct of counsel in this case which I have felt, and which has induced me to the course I have pursued.

However, should your honorable court think that I have erred in entertaining this motion, and continuing the same, and so decide, I shall most cheerfully submit to such decision.

Very respectfully,

ISAAC S. K. OGIER,
U. S. District Judge, in and for the Southern District of California.

D.

UNITED STATES OF AMERICA, *Southern District of California, Los Angeles:*

C. Sims, being duly sworn, says he is, and has been for two years, the clerk of the district court of the United States for the southern district of California; that in the case No. 393, wherein V. P. Gomez is claimant *vs.* The United States, for the rancho "Panoche Grande," a transcript was called for by letter signed W. W. McGarrahan, and was prepared and forwarded to him by my then deputy, J. H. Coleman.

Subsequently, and on or about the first week of September, 1858, another letter was sent by said McGarrahan, asking, among other things, that a motion, filed on behalf of the Government by Mr. E. M. Stanton, special counsel, asking for the reopening of the cause, be omitted from the transcript, a true copy of which letter is appended hereto. My said deputy, J. H. Coleman, had been superseded by Mr. W. W. Stetson, who, being fully empowered to open and act upon letters officially directed to me, did act upon the letter just mentioned, and prepared and forwarded to said McGarrahan a transcript in accordance with the terms of said letter, as I afterward ascertained.

When said letter was received, the motion of the Government for an appeal was under advisement by the court. And deponent further says that no appeal to the honorable the Supreme Court of the United States has ever been allowed by this court in the case of V. P. Gomez, claiming "Panoche Grande," No. 393 of the docket, and that the said motion of the Government for such appeal has been withdrawn by the present district attorney of the United States for the southern district of California.

And further deponent saith not.

C. SIMS.

Subscribed and sworn to before me this 8th day of December, 1859.

ISAAC S. K. OGIER,
U. S. District Judge for the Southern District of California.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 24, pt. 2.

WILLIAM McGARRAHAN.

FEBRUARY 1, 1871.—Ordered to be printed.

Mr. BINGHAM, for the minority of the Committee on the Judiciary, submitted the following as the

VIEWS OF THE MINORITY.

The minority of the Committee on the Judiciary, to whom was referred the memorial of William McGarrahan, dissent from the conclusions of the majority, and beg leave to make the following report:

The memorialist claims that in 1844 the then governor of Upper California, in accordance with the laws and customs of Mexico, granted to one Vicente P. Gomez a tract of land known as the rancho "Panoche Grande," situated within what is now the State of California; and that on the 22d December, 1857, for a valuable consideration and in good faith, he purchased the premises from Gomez. By the treaty of Guadalupe Hidalgo, entered into by the United States with Mexico February 2, 1848, it was provided that "property of every kind now belonging to Mexicans shall be inviolably respected;" and that "the United States should pass such laws as would give effect to the treaty stipulations." (United States Stat. at Large, vol 9, pp. 929–931.)

In pursuance of these treaty obligations, the United States, March 3, 1851, provided by law for a board of land commissioners, and further, by the same law, provided "that each and every person claiming lands in California by virtue of any right or title derived from the Spanish or Mexican government, shall present the same to the said commissioners, when sitting as a board, together with such documentary evidence and testimony of witnesses as the said claimant relies upon in support of such claim; and it shall be the duty of the commissioners, when the case is ready for hearing, to proceed promptly to examine the same upon such evidence, and upon the evidence produced in behalf of the United States, and to decide upon the validity of the said claim." (United States Stat. at Large, vol. 9, p. 632, sec. 8.)

On the 9th of February, 1853, Gomez, in accordance with this act of Congress, presented his petition to the said board of commissioners of the United States, alleging the grant to him by the Mexican governor of Upper California of the rancho Panoche Grande, and praying a confirmation of his claim to the same, which petition is as follows. The board of commissioners, having fully heard the evidence, made the following finding and decision:

To the board of commissioners for ascertaining and settling private land claims in the State of California:

The petition of Vicente Gomez, of Monterey County, California, respectfully represents: That some time in the year 1844 M. Micheltorena, governor of Upper California, granted to your petitioner a certain tract of land called Panoche Grande, of the extent of four square leagues, (now lying and being in the county of San Joaquin,) bounded

as follows: On the south by the lands of Francisco Arias; on the north by the lands of Julian Ursua and the low hills; and on the west by the barren hills, as explained by the map hereto annexed. Your petitioner alleges that for some time before the military occupation of Monterey, California, by the American forces, July 7, 1846, he was a clerk in the commissary's office of Monterey, and that, at that time, he had his original title papers for said tract of land deposited in his desk in said office of the commissary. That shortly before the naval forces of the United States took possession of the town of Monterey he had left the town with some of the Mexican troops to assist in the defense of the country.

That when he so left Monterey he left his said original grant of said land in his desk, at the office of the commissary as aforesaid, and believing it to be in a secure place. That upon his return to Monterey he found it in possession of the United States troops, and the public buildings, offices, and papers were all in possession of and guarded by American soldiers. Your petitioner made application without delay to the American officer who had charge of the office and papers where his said original title for said tract of land was deposited as aforesaid, but the said officer (Lieutenant Maddox, of the United States marine troops) refused to deliver any paper or papers then in possession or under his charge. Your petitioner alleges that the map herewith presented is the map which accompanied the original expediente, and that the grant made as aforesaid by Governor Micheltorena was the land delineated by this map.

Your petitioner became possessed of this map by permission of the proper officers for the purpose of having a copy made for his use and benefit, and he had taken it to his present dwelling-house a short time before California fell into the hands of the American authorities. Since he got possession of the map as aforesaid it has always remained in his hands. He has made application to the person in charge of archives of the former government, which was taken at Monterey, for information in relation to this grant and title made to him as aforesaid; but it could not be found, nor was the original expediente found.

Your petitioner has heard, and believes and alleges, that many original papers and documents belonging to the government archives taken at Monterey on the 7th of July, 1846, have been since lost or destroyed. If such be the fact, his title papers and the expediente must have been among the papers and documents so lost or destroyed.

Your petitioner hopes that, after such proof as the nature of the case will admit, your honorable board will confirm his said claim to the said four leagues of land granted as aforesaid, and that he may have a decree accordingly and general relief, as in duty bound.

P. ORD,
Attorney for Petitioner.

Filed in office February 9, 1853.

GEORGE FISHER,
Secretary.

Recorded in vol. 1 of Petitioners, in pages 549 and 550.

GEORGE FISHER,
Secretary.

Vicente Gomez *vs.* The United States, No. 569. Claim for a place called Panoche Grande, containing four square leagues, situated in the county of Monterey.

The petitioner in this case states in his petition that he had a grant for the above-named place, issued in the year A. D. 1844, by Governor Micheltorena, and that the grant was among the archives of the state in Monterey, at the time that the archives fell into the hands of the Americans, in July, 1846, and that it was either lost or destroyed. He has also given satisfactory proof of the existence and loss of the grant, but has failed entirely to offer any proof whatever going to show that he ever occupied, improved, or cultivated any part of the land, or that any one ever did for him, or that he ever saw the land. We are, therefore, of the opinion that the claim is invalid, and a decree rejecting the same will be entered.

Rejected.

Filed in office March 6, 1855.

GEORGE FISHER,
Secretary.

Recorded in record of decisions, No. 2, p. 552.

GEORGE FISHER,
Secretary.

It will be observed, that the board of commissioners find that Gomez had "given satisfactory proof of the existence and loss of the grant, but had failed to show that he had ever occupied, improved, or cultivated any part of the land. We are, therefore," say the commissioners,

"of the opinion that the claim is invalid, and a decree rejecting the same will be entered."

A decree was accordingly entered by the commissioners "that the claim of the petitioner is not valid." The commissioners find that the claimant gave "satisfactory proof of the existence and loss of the grant," but reject and refuse confirmation of his claim, because, and only because, he had not occupied, improved, or cultivated any part of the land. Very soon after this decree of the commissioners, the Supreme Court of the United States in the case of Frémont *vs.* The United States, 17 Howard, 542, ruled that omission to occupy under Mexican land grants did not forfeit or invalidate the grant.

By the act of August 31, 1852, it was provided that, "in every case in which the board of commissioners on private land claims in California shall render a final decision, it shall be their duty to have two certified transcripts prepared of their proceedings and decision, and of the papers and evidence on which the same are founded, one of which transcripts shall be filed with the clerk of the proper district court, and the other shall be transmitted to the Attorney General of the United States; and the filing of such transcript with the clerk aforesaid shall *ipso facto* operate as an appeal for the party against whom the decision shall be rendered; and if such decision shall be against the private claimant, it shall be his duty to file a notice with the clerk aforesaid, within six months thereafter, of his intention to prosecute the appeal; and if the decision shall be against the United States, it shall be the duty of the Attorney General, within six months after receiving said transcript, to cause a notice to be filed with the clerk aforesaid that the appeal will be prosecuted by the United States; and on a failure of either party to file such notice with the clerk aforesaid, the appeal shall be regarded as dismissed." (United States Stat. at Large, vol 10, p. 99, sec. 12.)

The commissioners supposing the land to be in the northern district of California, sent the transcript of their proceedings in this cause to the northern district court. The order was as follows:

And it appearing to the satisfaction of the board that the land hereby adjudicated is situated in the northern district of California, it is hereby ordered, that the transcript of the proceedings and of the decisions in this case, and of the papers and evidence upon which the same were founded, be made out and duly certified to by the secretary. One of which transcripts shall be filed with the clerk of the United States district court of the *northern district* of California, *and the other transmitted to the Attorney General of the United States.*

The claimant also filed his notice of appeal as follows:

District court of the United States for the northern district of California.

Vicente Gomez, by his attorney, hereby gives notice that it is his intention to prosecute the appeal in the above-entitled cause, from the decision of the commissioners to ascertain and settle the private land claims in California, rejecting his said claim, the transcript of which was filed in the clerk's office of said district court on the 1st of October, A. D. 1855.

E. O. CROSBY,
Attorney for Appellant.

Filed March 18, 1856.

W. H. CHEEVERS,
Deputy.

Filed 6th June, 1857.

A. S. TAYLOR,
Deputy Clerk.

It subsequently appearing that the lands of the Panoche Grande were in the southern district of California, the court certified and transferred the cause to the southern district by their order, as follows:

At a stated term of the district court of the United States of America for the north-

ern district of California, held at the court-room, in the city of San Francisco, on Monday, the 9th day of March, in the year of our Lord one thousand eight hundred and fifty-seven. Present, Hon. A. McAllister, circuit judge, and Hon. Ogden Hoffman, district judge.

THE UNITED STATES *vs.* V. GOMEZ. } D. C. 278, L. C. 569.

It being represented to the court that the lands claimed in this case lie in the southern district of California, now, therefore, on motion of E. W. F. Sloan, esq., made in open court, ordered by the court that the clerk of this court send to the clerk of the district court for the southern district of California said transcript, together with a certified copy of this order.

(Indorsed.) Filed March 7, 1857.

JOHN A. MONROE, *Clerk.*
By W. H. CHEEVERS, *Deputy.*

I, John A. Monroe, clerk of the district court of the United States for the northern district of California, do hereby certify the foregoing to be a full, true, and correct copy of the original, now on file and remaining of record in my office.

In testimony whereof, I have hereunto set my hand and affixed the seal of the said court this 1st day of June, A. D. 1857.

JOHN A. MONROE, *Clerk.*
By W. H. CHEEVERS, *Deputy.*

Filed June 4, 1856.

C. SIMS, *Clerk.*
A. S. TAYLOR, *Deputy.*

Next follows the petition for a review of the decision of the land commissioners, as follows:

Petition for review.—Proceedings, &c., in southern district, June term, A. D. 1857.

VICENTE GOMEZ, appellant, *vs.* THE UNITED STATES, appellees. } Docket No. 393. Transcript No. 569.

To the honorable the district court of the United States for the southern district of California, on transfer from United States district court, northern district of California.

The petition of Hartman & Sloan, attorneys for Vicente Gomez, or those claiming under said Gomez.

That this case is an appeal from the decision of the board of United States land commissioners to ascertain and settle private land claims in California.

That the land claimed for by your petition is the land described in the expediente making a part of the evidence, proceedings, pleadings, &c., in the transcript No. 569 of said board of land commissioners above alluded to, together with the accompanying map or diseño, filed and indorsed in said transcript; and that the said land is known as the "Rancho Panoche Grande," and is within the jurisdiction of this honorable court.

That after considering the claim of your petition and the proofs filed in support thereof, said board, on the 6th day of March, 1855, decided the claim to be invalid.

That a transcript of the record of said proceedings was filed in this court on the 4th day of June, 1857, being transferred by consent of this court from the district court of the United States for the northern district of California, and that said transcript record was filed in said northern district on October the 1st, 1855, and a notice of appeal filed in said northern district court on the 18th March, 1856, by E. O. Crosby, said claimant's attorney.

Your petitioners pray that such decision of said board may be reversed, and that this court may confirm his title to said land.

HARTMAN & SLOAN,
Attorneys for claimant and those under him.

Filed 4th June, 1857.

A. S. TAYLOR, *Deputy Clerk.*

On the 5th of June, 1857, the said United States district court for the southern district of California, made the following order in the case:

Now, on this day, this cause coming on to be heard, the parties appearing by their respective attorneys, the appellant by Sloan & Hartman, esqs., and the appellees by P. Ord, United States district attorney, and, after argument by counsel aforesaid, the same is submitted to the court for final adjudication.

Whereupon the court, being fully advised in the premises, delivered its opinion, confirming the claim of the appellant to the extent called for in the transcript and papers; three leagues or sitios de granada magor, and a decree was ordered to be entered up in conformity to said opinion.

Afterwards the court made the following decree:

In the district court of the United States, southern district of California.

VICENTE P. GOMEZ, appellant, *vs.* THE UNITED STATES, appellees. } Case No. 393.—"Panoche Grande." Transcript No. 569.

This cause coming on to be heard on appeal from the decision of the United States board of land commissioners to ascertain and settle the private land claims in the State of California, under the act of Congress approved March 3, 1851, on a transcript of the decision and proceedings of said board, and the papers and evidence upon which said decision was founded, and the other evidence adduced by the appellant before this court, and it appearing to the court that said transcript and the notice of appeal have been duly filed according to law, and counsel for the respective parties having been heard:

It is ordered, adjudged, and decreed that the decision of said board of land commissioners be and the same is hereby reversed, and that the claim of appellant is good and valid, and the same is hereby confirmed to him as follows, to wit: Three leagues of land, more or less, situate in the county of Monterey, State of California, bounded on the north by the lands of Julian Ursua; on the south by hills; on the east by the valley of the Tulares; and on the west by the lands of Francisco Arias, as is more fully set forth and described in the title issues for the same, and the diseño accompanying the same.

But it appearing to the court that on the 5th day of June, A. D. 1857, the lands in this case described had been confirmed by the court to said claimant and appellant, and it having been omitted to sign and enter a decree therefor at this date last aforesaid, it is ordered that the same be done now for then.

ISAAC S. K. OGIER,
United States District Judge.

Filed this 7th day of January, A. D. 1858.
Nunc pro tunc, (5th June, A. D. 1857.)

C. SIMS, *Clerk*.
Per J. H. COLEMAN, *Deputy*.

On February 4, 1858, on motion of Sloan & Hartman, it was ordered that the appellant have leave to amend the decree by substituting another in its stead. This was the final decree:

In the district court of the United States for the southern district of California—Decree filed February 5, 1858, *as of June* 5, 1857.

VICENTE P. GOMEZ, appellant, *als.* THE UNITED STATES, appellees. } Case No. 393.—"Panoche Grande." Transcript No. 559.

This cause came on to be heard on appeal from the decision of the United States board of land commissioners to ascertain and settle the private land claims in the State of California, under an act of Congress approved March 3, 1851, on a transcript of the decision and proceedings of said board, and the papers and evidence upon which said decision was made, and the other evidence adduced by the appellant before this court; and it appearing to the court that said transcript and notice of intention to appeal have been duly filed according to law, and counsel for the respective parties having been heard, it is ordered, adjudged and decreed that decision of said board of land commissioners be, and the same is hereby, reversed, and that the claim of said appellant is good and valid, and the same is hereby confirmed to him, as follows, to wit: The tract of land situated in the county of Fresno, State of California, known by the name of "Panoche Grande," bounded northerly by the lands of Don Julian Ursua; southerly by the Serrania, easterly by the valley of Tulares, and westerly by the lands of Don Francisco Arias, containing four square leagues of land and no more; provided that quantity is contained within the boundaries aforesaid, that confirmation of such less quantity is hereby made to said claimant; and for a more particular description of which said land reference is hereby made to the map contained in the transcript in this case; and it also appearing that heretofore, to wit, on the 5th day of June, A. D. 1857, at a regular term of this court, holden in the town of Monterey, State of California, the claim of the appellant in this case had been confirmed by this court, but that it

had been omitted by the court to sign the decree of confirmation at the time the same was made, it is therefore further ordered by this court that the same be signed now as for then.

Given under my hand, in open court, 5th day of February, A. D. 1858.

ISAAC S. K. OGIER,
U. S. District Judge for the Southern District of California.

Filed this 5th February, 1858, for the 5th June, 1857.

C. SIMS, *Clerk.*
Per J. H. COLEMAN, *Deputy.*

At the December term, 1857, an appeal was ordered, on motion of the United States attorney, to the Supreme Court of the United States, as follows:

In the district court of the United States for the southern district of California, Los Angelos, December term, 1857.

On motion of P. Ord, attorney of the United States for the southern district of California, it is ordered by the court that appeal to the Supreme Court of the United States be allowed the United States in the following cause, viz, No. 393, Vicente P. Gomez *vs.* The United States, decided June 5, 1857.

C. SIMS, *Clerk.*
Per J. H. COLEMAN, *Deputy.*

Filed March 15, 1858

Something has been said of the decree being but for three leagues, and afterward amended so as to decree four leagues. It is answered that the order for decree, June term, 1857, confirmed the claim of Gomez "to the extent called for in the transcript and papers." The extent called for in his petition to the commissioners was four leagues. The words of his petition, which is part of the transcript and papers, are: "That some time in the year 1844 M. Micheltorena, governor of Upper California, granted to your petitioner a certain tract of land called Panoche Grande, of the extent of four leagues," &c., and prays that the board "will confirm his said claim to the said four leagues of land granted as aforesaid," &c.

His original petition concludes as follows:

Your petitioner hopes that, after such proof as the nature of the case will admit, your honorable board will confirm his said claim to the said four leagues of land granted as aforesaid, and that he may have a decree accordingly and general relief, as in duty bound.

P. ORD,
Attorney for Petitioner.

Filed in office February 9, 1853.

GEORGE FISHER,
Secretary.

Recorded in vol. 1 of Petitioners, in pages 549 and 550.

GEORGE FISHER,
Secretary.

It is sufficient to add further that the original decree of the court was for "three leagues of land more or less."

This appeal to the Supreme Court of the United States was perfected, and the same, after full consideration by the then Attorney General, Black, was, with his consent, docketed by the counsel of McGarrahan in the Supreme Court, December term, 1858, and dismissed thereby for want of prosecution on the part of the United States, and a mandate was issued by the Supreme Court to carry the decree into effect.

The following is the decree of dismissal and the mandate issued thereon:

UNITED STATES OF AMERICA, *ss:*

The President of the United States of America to the honorable the judges of the district court of the United States for the southern district of California, greeting:

Whereas lately, in the district court of the United States for the southern district of

California, before you, in a cause between Vicente P. Gomez, appellant, and the United States, appellees, wherein a decree was rendered in favor of said appellant, whereupon the said appellees prayed an appeal, which was allowed by the said district court, to remove the said cause to the Supreme Court of the United States, as by the inspection of the transcript of the record of said district court, which was brought into the Supreme Court of the United States agreeably to the act of Congress and the rules of the said Supreme Court in such case made and provided, fully and at large appears; and whereas in the present term of December, in the year of our Lord one thousand eight hundred and fifty-eight, the said cause came on to be heard before the said Supreme Court on the said transcript of the record, and it appearing that the appellants (the United States) have failed to have their cause filed and docketed in conformity with the rules of this court, it is now here ordered and decreed by this court that the appeal from the district court of the United States for the southern district of California be, and the same is hereby, docketed and dismissed, and that this cause be, and the same is hereby, remanded to the said district court, January 31.

You, therefore, are hereby commanded that such proceedings be had in said case as according to right and justice and the laws of the United States ought to be had, the said appeal notwithstanding.

Witness the Hon. Roger B. Taney, Chief Justice of said Supreme Court, the first Monday of December, in the year of our Lord one thousand eight hundred and fifty-eight.

[L. S.]

WILLIAM THOMAS CARROLL,
Clerk of the Supreme Court of the United States.

[Indorsed.]

No. 393, No. 299, December term, 1858. Mandate of Supreme Court United States. United States *vs.* Gomez.

Filed May 4, 1859.—C. Sims, clerk.

C. SIMS, *Clerk.*

In the district court of the United States for the southern district of California.

VICENTE P. GOMEZ, appellant,
vs.
UNITED STATES, appellee.

And now comes Vicente P. Gomez, appellant herein, and files in open court the mandate of the Supreme Court of the United States, held on the 1st day of December, 1858, and rendered herein.

Whereupon it is by the court ordered, adjudged, and decreed, that the said mandate be carried into effect; that the said Gomez proceed under the decree of this court, heretofore rendered, as under a final decree.

Thus done and signed in open court this May, A. D. 1859.

[Indorsed.]

No. 393. Vicente P. Gomez *vs.* United States. Final orders of court upon filing mandate of the Supreme Court of the United States.

Filed May 4, 1859.

C. SIMS, *Clerk.*

That Attorney General Black was fully advised and privy to this proceeding is apparent from the fact that the appeal was docketed in his office by him as Attorney General, and the further fact that before the appeal was docketed in the Supreme Court he addressed the following letter to T. F. Meagher, esq., of counsel for McGarrahan:

ATTORNEY GENERAL'S OFFICE, *December* 18, 1858.

DEAR SIR: I gave General Shields an answer day before yesterday, which he promised to convey to you, and which I supposed you had received. I now repeat the substance of it when I say that, as at present advised, it is impossible for me to dismiss the case. But I have assented to let it stand until Mr. Stanton comes home, in the hope that it may then appear to be included within a rule which will enable me to gratify you, as I am extremely anxious to do. Mr. Stanton is expected by the next steamer from California, and I am very sure that he will come then, unless the illness of his son prevents him. You may, therefore, confidently expect a reply about the last of the present month, but not before, unless you would prefer a decision against you to the suspense of waiting that length of time.

Very respectfully, &c.,

J. S. BLACK.

T. F. MEAGHER, Esq.

After this letter the case was docketed in the Supreme Court, the appeal dismissed, and decree entered as above. The mandate issued by the Supreme Court was received in the district court of the United States for the southern district of California, and entered on record at its December term, 1858, to wit, in May, 1859, as appears by the record above. Thus the decree of the district court was made final.

By virtue of this final decree under the laws of the United States, McGarrahan, as grantee of Gomez, was entitled to have a survey of the land by the United States surveyor general of California. (See Statutes of 1862, vol. 12, p. 410.)

He applied to the United States surveyor general of California for a survey of the tract Panoche Grande, which officer caused a survey to be made, and approved the same September 11, 1862. This survey was transmitted immediately thereafter to the General Land Office and a patent for the property was demanded. The New Idria Mining Company appeared and resisted the issuance of this patent, though up to this time the said company had no color whatever of title to the premises and were mere trespassers.

Hon. Mr. Smith, then Secretary of the Interior, ordered the patent to issue to Gomez, which order is as follows:

DEPARTMENT OF THE INTERIOR,
Washington, December 29, 1862.

SIR: I have carefully examined the papers accompanying your communication of 29th October last, relating to the application for a patent for the Panoche Grande Mexican claim of Vicente Gomez, in California.

From these papers the following facts are established: Vicente Gomez made his application before the board of land commissioners in California for the confirmation of an alleged grant by the Mexican authorities in 1844, of four square leagues of land in Monterey County, California, which grant he alleged was lost or destroyed at Monterey when that city was captured by the American army.

On the 6th March, 1855, the commissioners decided that the claimant had "given satisfactory proof of the existence and loss of the grant, but has failed entirely to offer any proof whatever going to show that he ever occupied, improved or cultivated any part of the land, or that any person ever did for him, or that he ever saw the land." The commissioners therefore rejected the claim as invalid.

From this decision the claimant appealed to the district court for the southern district of California. After the appeal was taken, and before the trial of the case by the court, the Supreme Court of the United States decided that neither improvement nor occupancy was necessary to give validity to grants made by the Mexican government before the annexation of California to the United States. From this decision it appears that the land commissioners found all the facts which were necessary to give validity to the claim. Had this decision been made before the commissioners decided the case it is evident they would have confirmed the grant.

On the 5th June, 1857, the district court for the southern district of California made an entry upon their minutes that, "being fully advised in the premises, delivered its opinion confirming the claim of the appellants to the extent called for in the transcript and papers, three leagues or sitios de ganada, and a decree was ordered to be entered up in conformity to said opinion."

No formal decree was signed and entered upon the record at that term; but on the 5th of February, 1858, at the next term of the court, a full and final decree was signed by the court and entered upon the records, which described the land by boundaries, and decreed that the decision of the land commissioners was reversed, and that "the claim of said appellant is good and valid, and the same is hereby confirmed to him." The decree also recited that the claim had been confirmed on the 5th June, 1857, by the court at a regular term, but it had been omitted by the court to sign the decree at the time it was made. It was therefore ordered that the decree be signed "now as for then." This was a decree *nunc pro tunc*, and had relation back to the time when the order of confirmation was made by the court.

On the 21st March, 1861, several regular terms of the court having intervened, the court made an order setting aside all previous proceedings in the case and placing the same on the calendar for trial *de novo*. On the 4th day of August, 1862, the court at a regular term made an order vacating the previous order granting a new trial, and ordering that it "be and the same is hereby vacated and set aside." These several

decrees and orders constitute a confirmation by the court of the grant of the claimant, and entitle him to a patent unless it shall be apparent that some proceedings have been instituted on behalf of the United States by way of appeal or otherwise, which will require a review or reëxamination of the case.

The case was docketed in the Supreme Court at the December term, 1858, as an appeal from the district court of California, and the appeal was dismissed on the motion of the appellee, and a mandate granted to the district court to execute the decree of confirmation. At the December term, 1859, on motion of the Attorney General, the order dismissing the appeal was vacated and the mandate was recalled. The effect of this order was to leave the case as though no appeal had been taken, and to authorize an appeal on behalf of the United States.

No appeal appears to have been subsequently taken until the 25th of August last, when an order for an appeal to the Supreme Court of the United States was made by the district court of California. On the 4th of the present month the district court vacated the order allowing the appeal, and set aside the motion of the district attorney asking leave on behalf of the United States to take an appeal to the Supreme Court from the final decree of confirmation, and denied the same.

This proceeding appears to me to be final and conclusive in the case. The time within which, by law, an appeal may be taken has elapsed, and the decree of confirmation made by the district court therefore fixes and determines the rights of the claimants.

It appears, from the opinion of the Supreme Court of the United States before referred to, that the district attorney, who represented the United States when the decree of confirmation was made, was interested in the claim at that time, and it is alleged that he fraudulently assented to the decree. Questions of fraud which have been raised in the case cannot be examined or determined by this Department. The only questions to be considered are: has the grant been confirmed by the decree of the proper court, and are there any legal proceedings pending to reverse or set aside that decree? Upon both of these questions it appears to me the answer must be in favor of the claimant.

The act of 14th of June, 1860, which requires the surveyor general to publish for a given time the fact of the survey, with a view of affording to persons interested an opportunity to contest the boundaries fixed by the survey, is directory to that officer The law directs this proceeding before the survey shall be reported to the General Land Office. The survey having been reported in this case, the presumption arises that the surveyor general has performed all the prerequisite duties enjoined by the law. Besides, by the law of June 2, 1862, the proper officers are required to survey such grants upon the application of the claimants, they paying or securing the expense, and such survey is declared to be but *prima facie* evidence of the true location of the land claimed or granted. Of course it is the duty of the surveyor general to report such survey to the General Land Office, which has been done in this case. The survey is but *prima facie* evidence of the true location, and a patent will be but *prima facie* evidence of title. No notice has been presented of any conflicting claim, and should such arise the parties cannot be precluded by a patent.

The order of Secretary Thompson against the issue of a patent in this case, based upon the letter of Attorney General Black, was founded upon the assumption that further proceedings would be instituted to reverse the decree of confirmation of the district court. No such proceedings are now pending, and the time within which any further appeal can be presented has elapsed.

My conclusion is, that the decree of the district court for the southern district of California confirming the grant has become final. The United States has no longer any interest in the controversy. No claim of third parties has been interposed. The suggestions of fraud in the grant, or in the manner of procuring its confirmation, are *res adjudicata*, and I am unable to discover any reasons why a patent should not be issued in conformity with the decree of the court and the survey.

You will, therefore, issue a patent for the land, in accordance with the survey as reported by the surveyor general.

The papers pertaining to the case are herewith returned to your office.

Very respectfully, your obedient servant,

CALEB B. SMITH,
Secretary.

The COMMISSIONER OF THE GENERAL LAND OFFICE.

(Sen. Ex. Doc. 48, P't 3d, p. 22, 40th Congress.)

From some cause the execution of this order was delayed until the retirement of Mr. Smith, then Secretary, from the Department. The application was renewed by McGarrahan to Mr. Usher, the successor

of Mr. Smith as Secretary of the Interior, who, on the 4th of March, 1863, made the following order that the patent should issue:

DEPARTMENT OF THE INTERIOR.
Washington, March 4, 1863.

SIR: I have considered your communication of the 3d of January, 1863, relative to the issuing of a patent for the Panoche Grande claim in California. My predecessor having determined that the title was in the grantee named in the grant, the only question for my decision is, whether a patent shall issue upon a survey returned by the surveyor general, made under the act of June 2, 1862.

The view which I have taken of that act is, that it modifies the acts of March 3, 1851, and of June 14, 1860, so far as to allow the survey to be made at the instance of the party claiming the land, and making that survey only *prima facie* evidence of the true location of the land claimed. If the survey had been made under the acts of March 3, 1851, and June 14, 1860, and advertisements had been made and all things done in pursuance of the last-named act, the acts of the surveyor, if the same had remained, without having been caused by an interested party to be certified to the court, or the adjudication of the court, if the same had been so certified, would have been conclusive as to the *locus* fixed by the survey.

Whereas the act of June 2, 1862, makes the survey made under that act *prima facie* evidence only of the true location of the land claimed or granted, and as the survey was necessarily made under that act, I am of the opinion that the latter act modifies the former acts in this particular only, and that they are in force so far as they direct patents to be issued. I think, therefore, that the decision of my predecessor—directing the patent—was correct, and that it should issue. I would advise you, however, to cause to be inserted in the patent, by way of recital, the fact that it was issued upon a survey made under the act of June 2, 1862. And also, by way of greater caution, to insert a provision that the description of the land therein conveyed was to be taken against the United States, or any person making claim to the land, as *prima facie* evidence only of the true location of the land granted, and to be modified or avoided in that respect, if the same should be found to be erroneous.

Respecting the payment of the survey, or for the survey, I think it may be fairly presumed that his fees have been paid, or he would not have returned the survey. To strengthen this presumption, two certificates of the assistant treasurer of the United States at San Francisco, (No. 3,) one of $545, and the other of 55, have been deposited with me by the claimants, which, with the papers, are returned to you. The sums mentioned in these certificates, it is alleged by the claimants, and I may fairly presume, were deposited for this survey,

Very respectfully, your obedient servant,

J. P. USHER, *Secretary.*

Hon. J. M. EDMUNDS,
Commissioner of the General Land Office.

That it was manifestly the duty of the Interior Department to make these orders, is apparent from the express provisions of the law. See act of 1851, to ascertain and settle private land claims in California, vol. 9, pp. 631–34, sec. 13, which provides that "for all claims finally confirmed by the said commissioners, or by the said district or Supreme Court, a patent SHALL issue to the claimant upon his presenting to the General Land Office an authentic certificate of such confirmation, and a plat or survey of the said land, duly certified and approved by the surveyor general of California."

That this claim was so finally confirmed by the district and Supreme Court at the time and before the date of the Secretary's order is not to be questioned. The facts are recited in the order of Secretary Smith, as they appear in Senate Ex. Doc. 48, part 3, Fortieth Congress. It is also a fact appearing therein, page 16, that the surveyor general of California, E. F. Beal, did make the plat and survey as of date September 11, 1862, in pursuance of the act of June 2, 1862, United States Statutes at Large, vol. 12, pp. 410, 411. It also appears, from the letter of D. E. Sickles, p. 96 of Senate Ex. Doc. 48, part 3, Fortieth Congress, that the President ordered that the patent should issue, and that the same was thereupon engrossed and signed, ready for delivery.

These orders having been made, it was by law made the duty of the

General Land Office to make a record of the same. (See Brightly's Digest, vol. 1, p. 463.)

The act of 1836, section 4, provides that the recorder of the General Land Office shall certify and affix the seal of the General Land Office to all patents for public lands, and shall attend to the correct engrossing, sealing, and transmission of such patents; and by act of March 3, 1841, vol. 5, section 2, p. 417, "it shall also be the duty of the recorder to countersign all patents."

Accordingly, a record of the patent to Gomez was made, as hereinafter shown; but, for reasons never explained, the fact of the record was concealed and the knowledge thereof withheld by the Commissioner of the General Land Office.

That the original patent never was delivered does not affect the question now before us; for without delivery the record is *prima facie* evidence of title.

In Opinions of Attorneys General, vol. 3, p. 654, Mr. Crittenden says:

> The patent was issued by authority and direction of law; and upon general principles, where the patentee does not expressly dissent, his assent and acceptance are to be presumed from the beneficial nature of the grant. But it is hardly necessary to resort to such presumptions; because, in this and all such cases, the acts required to be done by the claimant, and actually done by him in the preparation of his claim for patenting, are equivalent to a positive demand of the patent, and amount to an acceptance of it. The patent, in the meaning of the act referred to, is granted to the patentee from its date, though he may never actually see or receive it, and is valid and effectual to pass the title of the land."

By direction of the Judiciary Committee of the House, as appears by Senate Ex. Doc. 48, part 3, p. 79, Fortieth Congress, third session, its chairman, James F. Wilson, addressed to the Commissioner of the General Land Office the following letter:

THIRTY-NINTH CONGRESS UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D. C., January 17, 1867.

SIR: Will you have the kindness to send me, for the use of the House Judiciary Committee, at as early an hour as possible, a copy of the patent which was prepared and executed, but never delivered, in the case of the Panoche Grande land grant?

Yours truly,

JAMES F. WILSON.

HON. JOSEPH S. WILSON,
Commissioner General Land Office.

On the 18th of January, 1867, the Commissioner, Joseph S. Wilson, replied to this letter as follows:

DEPARTMENT OF THE INTERIOR,
General Land Office, January 18, 1867.

SIR: Pursuant to your request of yestesday, received this morning, I have the honor to inclose herewith the original *unexecuted* patent for the Panoche Grande rancho.

With great respect, your obedient servant,

JOS. S. WILSON,
Commissioner.

HON. JAMES F. WILSON,
Chairman Judiciary Committee House of Representatives.

Why did the Commissioner not furnish the record, knowing, as he did, that the law made it evidence conclusive of a patent duly executed by the President?

Early in July, 1870, the committee were notified by counsel for McGarrahan that a record had been discovered of an executed patent for this Gomez grant in the record of the General Land Office of the United States, and on the 7th of July, 1870, the Judiciary Committee of this House, having requested the production of the record, were duly

notified that the record should be sent to the committee, which was accordingly done on the 8th of July, 1870. Volume 4 of the records of California Mexican confirmed land grants contains a grant to Gomez as follows:

1 THE UNITED STATES OF AMERICA.

To all to whom these Presents shall come, Greeting:

Whereas, It appears from a duly authenticated transcript, filed in the General Land Office of the United States, that pursuant to the provisions of the act of Congress approved the third day of March, one thousand eight hundred and fifty-one, entitled "An Act to ascertain and settle the Private Land Claims in the State of California," Vicente P. Gomez, as claimant, filed his petition on the ninth day of February, 1853, with the Commissioners to ascertain and settle the private land claims in the State of California, sitting as a Board in the city of San Francisco, in which petition he claimed the confirmation of his title to a tract of land called Panoche Grande, of the extent of four square leagues, situated in the County of San Joaquin, and State aforesaid; said claim being founded on a Mexican grant to the petitioner, made in the year 1844, by Manuel Micheltorena, then Governor of Upper California;

And whereas, the Board of Land Commissioners aforesaid, on the 6th day of March, 1855, rendered a decision rejecting said claim, which decree or decision was, on appeal, reversed by the District Court of the United States for the Southern District of California, by decree rendered as follows:

"Vicente P. Gomez, appellant, vs. The United States, appellee; case No. 393, 'Pano-
"che Grande.' Transcript No. 569. Decree. This cause came on to be heard on appeal
"from the decision of the United States Board of Land Commissioners to ascertain and
"settle the private land claims in the State of California, under an Act of Con-
2 "gress approved March 3, 1851, on a transcript of the decision and proceedings
"of said Board, and the papers and evidence upon which said decision was made,
"and the other evidence adduced by the appellant before this Court, and it appearing
"to the Court that said Transcript and notice of intention to appeal have been duly
"filed according to law, and counsel for the respective parties having been heard,
"It is ordered, adjudged, and decreed, that the decision of said Board of Land Com-
"missioners be, and the same is hereby, reversed; and that the claim of said appellant
"is good and valid; and the same is hereby confirmed to him as follows, to wit: the
"tract of land situate in the County of Fresno, State of California, known by the name
"of 'Panoche Grande,' bounded northerly by the lands of Don Julian Ursua, southerly
"by the hills, easterly by the valley of the Tulare, and westerly by the lands of Don
"Francisco Arias, containing four square leagues of land and no more, provided that
"quantity is contained within the boundaries aforesaid, and provided also that if a
"less quantity is contained within the boundaries aforesaid, that confirmation of such
"less quantity is hereby made to said claimant, and for a more particular description
"of which said land reference is hereby made to the map contained in the Transcript
"in this case.

"And it also appearing to this Court that heretofore, to wit: on the 5th day of June,
"A. D. 1857, at a regular term of this Court holden in the town of Monterey, State of
"California, the claim of the appellant in this case had been confirmed by this Court,
"but that it had been omitted by this Court to sign the decree of confirmation
3 "at the time the same was made: It is therefore further ordered by this Court
"that the same be signed now as for then.

"Given under my hand in open Court this 5th day of February, A. D. 1858

"ISAAC S. K. OGIER,

"*U. S. Dist. Judge for the S. Dist. of Cala.*"

And whereas, it further appears from a duly certified extract on file in the General Land Office, from the minutes of the Supreme Court of the United States, that this cause being brought by appeal before the said Court at the December term, 1858, the following proceedings were had therein: "Now on this day this cause coming on to be
"heard, the parties appearing by their respective attorneys, the appellant by Sloan &
"Hartman, Esqs., and the appellees by P. Ord, U. S. Dist. Atty., and after argument of
"counsel aforesaid, the same is submitted to Court for final adjudication. Whereupon
"the Court being fully advised in the premises, delivered its opinion confirming the
"claim of the appellant to the extent called for in the Transcript and papers, three
"leagues or sitios de gañada major, and a decree was ordered to be entered up in con-
"formity with said opinion;" and thereafter, to wit, at the December term, 1859, of the Supreme Court of the United States the following order was made in this case: "The
"United States, appts, vs. Vicente P. Gomez. Appeal from the District Court of the
"United States for the Southern District of California."

"On consideration of the motion made in this cause on a prior day of the present "term, to-wit: on Friday the 27th day of January, A. D. 1860, by Mr. Attorney Gen- "eral Black, to rescind the order and decree of this Court of the 31st day of January, "1859, docketing and dismissing this appeal, and to revoke and cancel the man- "date issued by this Court to the District Court of the United States for the 4
"Southern District of California, and of the argument of counsel thereupon had "as well in support of as against the said motion: It is now here ordered by this "Court that the aforesaid decree of this Court docketing and dismissing this appeal be "and the same is hereby rescinded and annulled, and that the mandate issued by this "Court to the District Court of the United States for the Southern District of Califor- "nia in this case be and the same is hereby revoked and canceled; and it is further "ordered by this Court that the Clerk of this Court do forthwith send a certified copy "of this order to the aforesaid District Court of the United States for the Southern "District of California."

And whereas, it further appears from a duly certified transcript on file in the General Land Office, that an order having been made in the District Court of the United States for the Southern District of California, granting a new trial in this case, the said Court on the 4th day of August, 1862, on a motion to vacate and set aside said order, made the following order: "Vicente P. Gomez, appellant, vs. The United States, ap- "pellee, D. C. No. 393, L. C. No. 569. 'Panoche Grande.' On this day the Court delivers "its opinion in this case granting the motion heretofore made by the appellant herein "praying the Court to vacate and set aside the order of Hon. Isaac S. K. Ogier, late "Judge, granting a new trial in this cause. And it is hereby ordered that the previous "order of this Court made and entered on the 21st day of March, 1861, setting aside "all proceedings had in this cause, and placing the same on the Calendar for trial *de* "*novo*, be and the same is hereby, vacated and set aside."

And whereas, it further appears from a duly certified transcript on file in the 5
General Land Office of the United States, that an order having been made on the 25th day of August, 1862, in the District Court aforesaid, allowing appeal in this case to the Supreme Court of the United States, the said District Court, at the December term, 1862, made the following order: "Vicente P. Gomez vs. The United States, "No. 393, Panoche Grande. In this case the court delivered an opinion on the motion "submitted the day before yesterday, and ordered that the appeal taken on the twenty- "fifth day of August, A. D. 1862, by the United States to the Supreme Court of the "United States from the final decree of confirmation herein be vacated and set aside, "and it is further ordered, that the order of this Court made on the said 25th day of "August, A. D. 1862, allowing said appeal, be and the same is vacated and set aside, "and the motion of the United States District Attorney for leave to take an appeal on "behalf of the United States to the Supreme Court of the United States from the said "final decree be and the same is denied."

And whereas, there has been presented to the Commissioner of the General Land Office a plat, with a certificate of the survey of the said claim, authenticated by the signature of the Surveyor General of the public lands in California, said survey having been made pursuant to the act of Congress approved June 2, 1862, entitled "An act "for the survey of grants or claims of land," said plat and certificate being in the words and figures following, to wit:

"UNITED STATES SURVEYOR GENERAL'S OFFICE, 6
"*San Francisco, California.*

"Under and by virtue of the provisions of the act of Congress of the 2d of June, "1862, entitled 'An act for the survey of grants or claims of land,' and in consequence "of a certificate of the United States District Court for the Southern District of Cali- "fornia, a copy of which is hereto annexed, by which it appears that a decision of the "said District Court has been had, recognizing and confirming the title claim of "Vicente P. Gomez to the tract of land designated 'Panoche Grande,' the said tract "has been surveyed in conformity with said decision, and I hereby certify the annexed "map to be a true and accurate plat of said tract of land as appears by the field-notes "of the survey thereof made by E. H. Dyer, Deputy Surveyor, in the month of July, "1862, under the direction of this office, which, having been examined and approved, "are now on file therein.

"And I hereby certify that the said tract of land is bounded and described as fol- "lows, to wit:

"Beginning at post in earth mound corner to sections one, two, eleven, and twelve, "township seventeen south, range eleven east of Mount Diablo meridian, from which "post a point on the highest ridge of the Lomas Muert as (a high range of barren and "broken mountains, the eastern slope of which forms the western edge of Tulare "Valley) bears north nine degrees west, distant about two miles.

"Thence according to the true meridian, the variation of the magnetic needle being "fifteen degrees thirty minutes east, over rolling land to the north of a small

7 "valley called Vallecito, north forty chains to post in earth mound on quarter "section corner between sections one and two. Station.

"Thence west eighty chains to quarter section corner on line between sections two "and three. Station.

"Thence north forty chains to post in earth mound, corner to sections two and three "on fourth standard line south. Station.

"Thence west, at forty chains quarter section post in earth mound eighty chains to "post in earth mound corner to sections three and four on fourth standard line south. "Station.

"Thence through township sixteen south, range eleven east, north forty chains to "station.

" seven, township eighteen south, range eleven east, all of Mount Diablo meridian.
"In witness whereof I have hereunto signed my name officially, and caused
[SEAL.] " the seal of my office to attached, at the city of San Francisco, this eleventh
" day of September, one thousand eight hundred and sixty-two.
"E. F. BEALE,
" *U. S. Surveyor General, California.*"

And whereas, application having been made for the issue of a patent upon the 13
foregoing survey, the Secretary of the Interior, under date of 29th December, 1862, rendered his decision, in which, upon recital in substance of the proceedings had in the matter and review, it is held as follows: that "the decree of the district court for the southern district of California, confirming the grant, has become final;" that "the United States has no longer any interest in the controversy;" that "no claim of third parties has been interposed;" that "the suggestions of fraud in the grant, or in the manner of procuring its confirmation, are *res adjudicata*," and he is "unable to discover any reasons why a patent should not be issued in conformity with the decree of the court and the survey," and ordered the issue of "a patent for the land in accordance with the survey as reported by the surveyor general."

Now know ye, that the United States of America, in consideration of the premises, and pursuant to the provisions of the acts of Congress and decisions aforesaid, have given and granted, and by these presents do give and grant unto the said Vicente P. Gomez, and to his heirs, the tract of land embraced and described in the foregoing survey, with the stipulation that said survey under the aforesaid act of June 2d, 1862, shall "be taken as *prima facie* evidence only of the true location of the land granted," and with the further stipulation that, in virtue of the 15th section of the said act of March 3d, 1851, the confirmation of this said claim and this patent "shall not affect the interest of third persons."

To have and to hold the said tract, with the appurtenances, unto the said
14 Vicente P. Gomez, and to his heirs and assigns, forever, with the stipulations aforesaid.

In testimony whereof, I, Abraham Lincoln, President of the United States, have caused these letters to be made patent, and the seal of the General Land Office to be hereunto affixed.

Given under my hand at the city of Washington, this fourteenth day of
[SEAL.] March, in the year of our Lord one thousand eight hundred and sixty-three, and of the independence of the United States the eighty-seventh.

By the President: ABRAHAM LINCOLN.

By W. O. STODDARD, *Secretary*,
Acting Recorder of the General Land Office.

This record is marked "examined," in this form "ex'd." The record having been completed and marked examined as aforesaid, has pencil lines drawn over the words "fourteenth March, sixty-three, and eighty-seventh;" and has also pencil lines drawn over the names "Abraham Lincoln, W. O. Stoddard," and the word "acting;" and has also written on the margin of the page, in pencil, the words "not signed." It is not indicated by anything upon the record of the patent when and by whom these obliterations by pencil lines were made, or these words in pencil, "not signed," were written. An unexecuted patent, corresponding in all respects with this record, except the words and names erased in pencil, as before mentioned, and the words "not signed," was exhibited to the committee by the Commissioner of the General Land Office. It will be observed by the House, that the Commissioner of the General Land Office, Joseph S. Wilson, in certifying an authenticated copy of this record, states in his certificate of the date of July 25, 1870, among other things:

That on the said record pencil lines are drawn across the date, the name of the President and the President's secretary, and the words "not signed" are written in pencil in said record.

The House will notice that at that time the Commissioner says nothing of the pencil line drawn across the word "acting" on the record, while the authenticated copy has a pencil line drawn across this word. The House will also observe, that in said certificate the said Commissioner certifies that the patent is unexecuted and unsigned both by the President and recorder; whereas he testifies on oath before the committee that he does not know whether that certificate is true, and is not prepared to swear that the said patent was never signed by the President.

On the same 25th of July, 1870, after the inspection of this record had been called for by the committee, and after Congress had adjourned, the matter still pending before this committee for its final decision under the order of the House, the following was written across the face of the record of said grant to Gomez, to wit:

DEPARTMENT OF THE INTERIOR,
General Land Office, July 25, 1870.

This record, from pages 312 to 321, inclusive, was made in accordance with the custom at the time, in anticipation of the original being submitted to the officers whose duty it is, under the law, to sign land patents; but an order, dated March 13, 1863, having been received from the Acting Secretary of the Interior to suspend the execution

and delivery of the patent under the decision of the Department of the 4th of March, 1863, until further advised in the case by the Secretary, the form of patent which had been prepared, and from which the aforesaid record was made, was not submitted for signature, and has never been dated, signed, nor delivered.

JOS. S. WILSON, *Commissioner.*

J. N. GRANGER, *Recorder.*

It is provided by law, as above shown, that all patents for public lands shall be duly sealed and recorded. It is also provided that a secretary shall be appointed by the President, with the advice and consent of the Senate, whose duty it shall be, under the direction of the President, to sign in his name and for him all patents granted for lands under the authority of the United States; and it is further provided that it shall be the duty of the Commissioner to cause to be prepared a certificate, under the seal of the General Land Office, and such copy of the records on file in his office as may be applied for, to be used in evidence in courts of justice.

It is reasonable to conclude that no record would be made, as this record manifestly was made, complete in all respects, save the name of the recorder, unless the same had been signed by the President and sealed, for the law does not authorize it. Having been marked "examined," the record manifestly imports that what was there recorded had been compared with the original, and was found to be a true record thereof in all respects, including the dates, the seal, and the name of the President and his secretary as therein written. It was the duty of the recorder to countersign this patent, made so by positive law. It is to be presumed he did his duty.

It is useless, and worse than useless, to suggest that the examiner, who was authorized by the law to indorse, as he did indorse, "examined" on this record, did so after the obliterations by pencil lines, and the indorsement of the words "not signed" in pencil, had been made on this record. Such a certificate of record that it had been examined after such mutilation, and the indorsement also, "not signed," was not only useless, but unauthorized by any law whatever.

The minority insist that no record or grants can be made until signed by the President, and, when made, such record cannot be impeached or avoided by lines drawn over its face by any one, and especially by one in the employ of parties who have an interest to be advanced by the concealment or mutilation of the record.

We submit to the consideration of the House the provisions of the act of March 3, 1843, (5 Statutes at Large, pages 627 and 628,) and which, among other things, provides—

That literal exemplifications of any such records which have been or may be granted in virtue of the provisions of the seventh section of the act approved on the 4th day of July, 1836, entitled "An act to reorganize the General Land Office," shall be deemed and held to be of the same validity in all proceedings, whether at law or in equity, wherein such exemplifications are adduced in evidence, as if the names of the officers signing and countersigning the same had been fully inserted in such record.

The undersigned submit to the House that both the certificate authenticating the transcript of said record, before the committee, and herewith published, and the indorsement written across the face of said record, each bearing date the 25th of July, 1870, were not only unauthorized by law, but in direct contravention of the above-recited act and the act of 1836. (United States Stat. at Large, vol. 5, page 107.) It will also be borne in mind that this record was made in the year 1863, and it is presumed to have been made on the day of its date, the 14th of March, 1863. At that time Joseph S. Wilson, who makes this certificate, was not Commissioner of the General Land Office, nor was he

such Commissioner for years thereafter. Nor was Mr. Cox Secretary of the Interior. This being understood, we inquire again by what authority of law Joseph S. Wilson thus mutilated the record by writing across its face, on the 25th of July, 1870, the words:

> The form of patent which had been prepared, and from which the aforesaid record was made, was not submitted for signature, and has never been dated, signed, nor delivered.

We submit that when a matter within his jurisdiction was passed upon by the head of the Department, as in this case, and also by the President, no order short of that of the President himself, who made it, could authorize any such interference in the premises. Chief Justice Taney, as Attorney General, vol. 2, Opinions of Attorneys General, p. 463, says:

> Unless claims finally decided by the proper Department shall, in general, be considered *res judicata*, every change in the officers thereof will produce a new hearing of the same, and the accounts of the Government will remain open and undecided.

The Attorney General further says in this opinion, that from the decision of the head of the Department, "the party may carry his appeal to the President, who may affirm or reverse the decision;" and from his decision, he adds, an appeal may be had to Congress.

And in the United States *vs.* Arredondo *et al.*, 6 Peters, 729, the Supreme Court of the United States say:

> If any jurisdiction is given, and not limited, all acts done in its exercise are legal and valid; if there is a discretion conferred, its abuse is a matter between the governor and his government, &c. (King *vs.* Picton, late governor of Trinidad, 30 St. Tr., 868–871.)
>
> It is a universal principle, that where power or jurisdiction is delegated to any public officer or tribunal over a subject-matter, and its exercise is confided to his or their discretion, the acts so done are binding and valid as to the subject-matter; and individual rights will not be disturbed collaterally for anything done in the exercise of that discretion within the authority and power conferred. The only questions which can arise between an individual claiming a right under the acts done and the public, or any person denying its validity, are, power in the officer and fraud in the party. All other questions are settled by the decision made or the act done by the tribunal or officer, whether executive, (1 Cranch, 170, 191,) legislative, (4 Wheat., 423; 2 Pet., 412; 4 Pet., 563,) judicial, (11 Mass., 227; 11 S. & R., 429, adopted in 2 Pet., 167, 168,) or special, (20 J. R., 739, 740; 2 Dow. P. Cas., 521, &c.,) unless an appeal is provided for, or other revision, by some appellate or supervisory tribunal, is prescribed by law.

In point of fact this certificate of Commissioner Wilson is not only contradicted by the record, but is contradicted by the testimony before this committee of William O. Stoddard, who was in the year 1863 the secretary of Abraham Lincoln, President of the United States, duly appointed by the President and confirmed by the Senate of the United States to sign patents under his direction in his name. He swears before the committee that he signed a patent in the name of Abraham Lincoln, and as his secretary, for Panoche Grande in the spring of 1863; that he remembers there were *three* patents, brought about the same time, and that he recollects it was in March, 1863. He also states that the other *two* patents brought about the same time were patents for the Honcut and Canard Deparle. He further testified that the record as originally made up shows the signing of the President's name and his own in the manner that "was the customary way of appending the signatures;" that he examined the grant for Panoche Grande at the time he signed it, and called the attention of others to it at the time, and that it was done at the office of the Executive Mansion. We submit, however, this testimony, together with all the other testimony bearing upon this point, for the consideration of the House, and ask that it be printed herewith.

Mr. Granger, the recorder, being sworn before this committee, states that he was recorder at the time named in the record in 1863; that he does not know, and could not say, whether the patent for Panoche Grande was ever presented to him or not, to be countersigned; that he kept no record of California land grants, except the letters of transmission from the Commissioner of the General Land office; that he keeps these letters on file in his office; that upon an examination last summer, being called upon to know if there was any such letter, he made some examination, and since that time, upon a further examination, he found that in 1863 there were no letters from January down to June remaining on his files; that the files for that year from July until December were all there; that he knows letters of transmission, between January and June, 1863, had been received by him; that there were fifty-one letters of transmission of land grants between January and June, 1863, and there must have been more patents than that, as sometimes a single letter would inclose a large number of patents; that there must have been taken at least fifty-one letters of transmission from his office, which came to him from January to June, 1863, and he has no knowledge what has become of them; that he kept the letters locked in a case in his office; that he attached his name to the certificate written across the face of the record of date July 25, 1870; that he does not know that the statement of the certificate, signed by him, and written across the face of the record, is true; that he does not know that the patent from which the record was made never was dated or executed; that he so stated at the time he signed the certificate; that he signed the certificate under the written order of Secretary Cox, and verbal order of Mr. Wilson, the Commissioner, that he should sign it as written.

Joseph S. Wilson, the Commissioner of the General Land Office, testified before the committee that he had no knowledge on the subject whether the patent recorded for Panoche Grande was ever signed; nor does he know whether it was signed, sealed, and dated or not; neither does he know whether it was ever presented for signature or not, and has no knowledge that will enable him to swear that it never was presented for signature.

It may be noted here that reference is made to a letter of Acting Secretary Otto, dated 13th March, 1863, directing the Commissioner to suspend the execution and delivery of the patent.

As the patent recorded bears date March 14, 1863, being subsequent to the order of Acting Secretary Otto, and was signed by the President himself, as sworn to by his private secretary and evidenced by the record, it must be presumed that the President's act superseded the order of Mr. Otto, and enjoined upon the officers of the Land Office the duty of recording the patent as required by law.

It is not to be overlooked that an effort is made by some of the witnesses to show a custom violative of the statutes herein referred to, and violative as well of the rights of the people of the United States, to wit: that records may be made of grants before any grant has, in fact, been signed by the President. It is simply an effort, which happily has failed, to establish a special custom against the positive requirements of the law. This cannot be tolerated. But we ask attention to the law as to special customs:

> Special customs must be immemorial, continued, peaceable, reasonable, certain, compulsory upon every person, and consistent with general customs and the statute law. (1 Black. 77, 78.)

The minority, without professing to review all the testimony, call especial attention to the further fact, sworn to by himself, that William

H. Lowry, who was employed by the New Idria Mining Company about the year 1867, and has remained in the employ of said company ever since, states that about the date of the pencil mark, or the pencil date on the record, he compared the record; that he erased the name of the said secretary in the record, by crossing it in pencil, and writing on the margin in pencil "not signed;" that they remained until lately, and are probably there still; but he added that he did this on comparing the record and receiving an order to withhold the patent. On the inquiry being made, "Is there any pencil date to it?" he answers: "There is a pencil date on the record, and that is the only way I can identify the time."

The minority respectfully submit that there is no pencil date upon the record and never was. This witness further states that he knows of no case other than this marked "examined" on the record, which was without the seal of the General Land Office, the name of the President, and date.

The record was not marked examined by Mr. Lowry, but by Mr. Stoek.

As to any proceedings in the Supreme Court between the United States and Gomez, subsequent to the action herein before stated of the Executive Department, and after the 14th March, 1863, we do not deem it necessary to say anything in relation thereto. But we deem it important to notify the House that the contest which has been continued against the action of the Executive Department upon this claim, while it has been ostensibly in the name of the United States, has been, in fact, carried on at the expense of the United States for the exclusive benefit of the New Idria Mining Company. The company was organized about the year 1858, in the State of California, and wrongfully, about that time, entered upon, and has since wrongfully occupied as mere trespassers, the tract of land in dispute, and now seeks to obtain a grant from the Government of the United States for 480 acres thereof, which includes the mines, and is supposed to be the chief value of the tract, for the paltry sum of $2,400, when its estimated value, as stated by a late attorney general, is perhaps three million. This last proposition of the company to take all, or nearly all, that is valuable of the tract for $2,400, when the memorialist, in accordance with the action of this House, in the Fortieth Congress, tendered $22,000 to the Government for the land, is only another illustration of the care with which the New Idria Company guards the interests of the United States.

The counsel who appeared before the committee on behalf of the company, the Hon. Mr. Evarts, stated in his argument (on page 18) when speaking of this tract of land, that "we (meaning the company) have no title, and knew that we had no title." Yet it is claimed that by reason of the occupancy and improvement under the act approved 26th July, 1866, (Stat. at Large, vol. 14, pp. 251, 252, 253,) the company may rightfully demand of the Government a patent for 480 acres of the tract.

In our opinion there is no color of right in the New Idria Company to make this demand of the Government. It has occupied the land, as we said, only as trespassers, and has more than reimbursed itself for all the improvements it has made, and has never paid to the United States anything whatever for the same. The act of 1866 opens the mineral lands only "to citizens of the United States, or those who have declared their intentions to become citizens." Surely this provision does not contemplate an occupancy by aliens and non-residents.

On the 24th of January, 1868, D. O. Mills testified as to the persons constituting the company, as follows:

D. O. MILLS sworn and examined.

By Mr. LAKE, counsel for the New Idria Quicksilver Mining Company:

Question. You are a resident of California, and the president of the Bank of California?—Answer. Yes, sir.

Q. Can you state some of the principal stockholders of the New Idria Mining Company?—A. Barron & Co.—consisting of W. E. Barron, Thomas Bell, Joseph Barron, (all foreigners,) and some others whom I do not know, *being in foreign countries*—own, perhaps, half the stock. I own about one-eighth of it, and Mr. Rawston owns about one-eighth.

By Mr. WOODBRIDGE:

Q. What, in your judgment, is the property worth?—A. I should think it is worth from $500,000 to $750,000 in gold. That may be over-estimating it.

By Mr. ELDRIDGE:

Q. How much of the mining estate do you include in that?—A. I include the whole mining estate; the whole Idria mines proper.

Q. What do you claim that that covers?—A. The mine as developed does not cover nearly what the company has put in for. The company has put in for 3,000 or 4,000 acres.

It appears from this testimony that one-half of the stock of this company is owned by aliens.

The second section of the act provides that upon occupation and improvement of the mineral lands, and an actual expenditure thereon of an amount not less than $1,000 by the person or association of persons so occupying, "and in regard to whose possession there is no controversy or opposing claim, it shall and may be lawful for said claimant or association of claimants to file in the local land office a diagram of the same, &c., and to enter such tract, and receive a patent therefor, granting such mine, together with the right to follow such vein or lode with its dips, angles, and variations, to any depth, although it may enter the land adjoining, which land adjoining shall be sold, subject to this condition."

We have shown that from the time the New Idria Mining Company occupied, in regard to their possession of the premises there has been and still is controversy and opposing claim.

It is further provided in section four of said act that not more than 3,000 feet shall be taken in any one claim by any association of persons, and yet this company has filed its survey for 480 acres, and demanded a patent therefor, without color of right.

This company has employed the agents of the United States to defend its wrongful possession, and secure to itself the proceeds of the land in controversy, ever since the decree was rendered in favor of the memorialist in the United States court, in 1858, as of June 5, 1857.

E. L. Goold, of counsel for the New Idria Company, testified before the committee of this House, January 25, 1868, as follows:

WASHINGTON, D. C., *January* 25, 1868.

E. L. GOOLD sworn and examined as a witness: I have before me a letter dated March 3, 1861, from Edwin M. Stanton, Attorney General, to me, stating that I was employed in this case. I made the assignment on the back of it to Beale, in order to have it collected either by his brother-in-law, Evans, or himself, I forget which. Beale did not come, for reasons which I now forget, and I collected the money myself when I was in this city the following year. I have here a letter from the Treasury Department, stating the date at which the money was paid to me personally, which is as follows. I collected this bill for myself.

By Mr. WOODBRIDGE:

Q. In your examination of the case, did you satisfy yourself as to the ground upon which the land commission decided this case?—A. Yes; upon the ground that there was no possession; they said that they were satisfied there was a grant, but there had been no possession.

Q. But between their decision and the decree of the court, the decision of the Supreme Court in the Mariposa case had taken place?—A. Yes.

Q. Was Mr. Whiting, the district attorney for the southern district of California, from New York?—A. He was.

Q. Where did he attach his certificate?—A. In San Francisco.

Q. Was San Francisco in the southern district?—A. No, sir; in the northern district. Information came to San Francisco that the Secretary of the Interior would issue a patent for this land. *Mr. Casserly*, (now one of the new Senators from Calfornia,) who at that time represented Mr. Gibbs's interest, and *myself*, sent a dispatch to Mr. Latham, then Senator from California, to employ Judge Black; that they would allow him $5,000 in the event the motion to dismiss the appeal was refused. Judge Black drew the draft on me personally, at which I was a little surprised. My clients, however, were not then in a condition to pay it, and I had to go round to get it.

Q. Do you know how McGarrahan got hold of that private dispatch?—A. I do not; I think, if I mistake not, that is a true copy of a dispatch sent to me.

By the CHAIRMAN:

Q. During the time you were acting as special counsel for the Government of the United States, were you also counsel of the New Idria Company?—A. Yes, I became so because of my connection with Mr. Stanton; Mr. Stanton wanted to go home and left the case to me; he believed I would be zealous, as I had clients who are strongly interested against the claimants in this case.

By Mr. MCGARRAHAN:

Q. Is there not a claim of Judge Black's still pending before the New Idria Mining Company for his services?—A. I know he had such a claim last year. Whether it has been paid or not I do not know.

By the CHAIRMAN:

Q. You have said you were counsel both for the Government and for the New Idria Company. Were you employed by the Government because of your connection with that company?—A. Because I was counsel for Thompson, which was pretty much the same thing.

Q. Was that prior to the passage of the act by which persons were permitted to purchase and preëmpt lands?—A. Yes, of course.

Q. Did you receive compensation both from the Government and the New Idria Company for this service?—A. From Mr. Thompson; the same thing in substance, though not in form.

By Mr. MCGARRAHAN:

Q. Did you at any time state to John O. Wheeler that this was a valid donation or grant; that the only question was as to its proper location?—A. I never did; I stated to Judge Black, in the Supreme Court, that the petition was genuine; I recollect Judge Black stated it was a forgery; I have no doubt the petition, so far as it went to the governor for this grant, was genuine, but the governor was about that time driven out of that country in consequence of his taking with him three hundred or four hundred convicts from Mexico into California, and I think it very likely he went before Gomez got his grant. I am not at all certain that if Gomez had made his petition in time, he would not have had the grant. He was employed by the governor as a clerk, and was said to have been rather a favorite of his.

Mr. Goold, who thus testified before the committee of this House, on March 20, 1858, addressed the following letter to Attorney General Black:

SAN FRANCISCO, CAL., *March* 20, 1858.

Hon. JEREMIAH BLACK, *Attorney General of the United States:*

SIR: I beg leave to call your attention to two land claims, namely, that of *Francisco Arias*, No. 628, *vs.* United States, claiming the rancho Real de los Aguilas, and that of Vicente Gomez, claiming the rancho Panoche Grande, No. 569 of the land commission, both of which were rejected by the land commissioners, but which, I am informed, have been confirmed by the United States district court for the southern district of California. *There are grave reasons to doubt the genuineness of these grants.*

If the appeals in these cases have not already been dismissed, I have to request in the name of the parties interested, as well as the Government, in the rejection of the claims, that you will not *dismiss the appeals* until an opportunity is afforded to obtain such information, which I am now engaged in seeking, and which will be promptly communicated to you.

His testimony, above given, shows the parties interested, in whose

name he wrote the above letter to Attorney General Black, were the New Idria Mining Company.

On May 19, 1858, he wrote a second letter to Attorney General Black, in which he speaks of "my clients" as follows:

SAN FRANCISCO, *May* 19, 1858.

SIR: Referring to my communication of the 20th of March last, concerning the two land claims of *Francisco Arias*, No. 628, and Vicente Gomez, No. 569, I have to say that information has been obtained rendering it almost certain that the latter-named claimant (Gomez) was not in possession of the land claimed by him prior to the change of flags, and at the next term of the court I shall make to the judge such suggestions as will lead him to open the decree of his own motion.

With regard to the other claim, my clients have failed to learn anything, as they expected to, tending to create a doubt of its genuineness.

Your obedient servant,

E. L. GOOLD,
Counsellor at Law.

HON. JEREMIAH BLACK,
Attorney General of the United States.

The following letter of the late Mr. Stanton shows that Mr. Goold, was employed by authority of Attorney General Black as special counsel for the United States in the case of Gomez, for which service he was paid $1,000 from the Treasury of the United States, ostensibly for services rendered the United States, but in fact rendered for his "clients," the New Idria Mining Company:

In the district court of the United States, southern district of California.

THE UNITED STATES *vs.* VICENTE GOMEZ. } Claimant of the rancho called "Panoche Grande," southern district of California.

ATTORNEY GENERAL'S OFFICE, *March* 1, 1861.

SIR: While I was in California in the year 1858, as special counsel of the United States in law cases, you were employed by me, under authority of the Hon. J. S. Black, Attorney General, to act as special counsel of the United States in the defense of the case, and to aid the district attorney of the United States in reversing the confirmation of the claim in the district court. And it was stipulated that you should be paid by the United States for your services as special counsel the sum of $1,000. This retainer and employment you accepted, and agreed to make your professional services to the United States for that sum; that arrangement has been and is again ratified by this office.

Yours, &c.,

EDWIN M. STANTON,
Attorney General.

E. L. GOOLD, Esq.,
Counselor-at-law.

After Mr. Black retired from the Attorney General's Office, he, too, became special counsel for the United States against the Gomez claim, but in fact, and with Goold, the counsel as well for the New Idria Mining Company, as appears from the following letter and telegraph:

WASHINGTON, *April* 7, 1864.

SIR: You will oblige me by ordering me to be furnished with a copy of your letter addressed to the Secretary of the Interior on the subject of the patent applied for by the claimants of the Panoche Grande ranch, in California. One of the letters is dated October 29, 1862, the other on January 3, 1863.

I am counsel for the United States, and desire to use the letters for the purpose of an argument in the Supreme Court, where a question concerning this title is now pending.

I am, most respectfully, yours, &c.,

J. S. BLACK.

HON. J. M. EDMUNDS,
Commissioner of the General Land Office.

Attention is now asked to the following telegram by Mr. Black, sent

to Goold immediately upon the refusal of the Supreme Court of the United States to dismiss the appeal in the Gomez case in 1864, as follows:

> The Gomez title is as good as dead. I told you so. The court denied the motion to dismiss. I have drawn on you for $5,000 in gold coin, payable at sight, which you promised to pay in the event of the motion to dismiss being denied. Attend to my draft without delay or mistake.
>
> J. S. BLACK.

It is the opinion of the minority that it is unjust alike to the United States and to the claimant of the land, that the New Idria Company should be defended at the expense of the United States, in its wrongful possession and use of this property.

In view of all that has been stated herein, and all the testimony that has been before the committee; and in view of the color of title that is in McGarrahan, that he purchased the land in good faith after the United States Commissioner had found that Gomez had made satisfactory proof of the existence and loss of the grant of this tract, and after the United States district court had ordered a decree confirming the grant to Gomez to the premises in question; and of the fact that the New Idria Mining Company took possession thereof, without any color of title, and have employed the agencies of the United States to defend them in their trespass at the expense of this Government, and have in their employment the person who has obliterated the record, in violation of the law, according to his own sworn testimony, we submit to the consideration of the House the following joint resolution as a substitute for the report of the majority of the committee:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior be, and he hereby is, directed to cause the record on pages three hundred and twelve to three hundred and twenty-one inclusive, in volume four of "California Land Claims," of the patent of a tract of land known as the "Panoche Grande," as set forth therein, to be transcribed into the records as the same stood on the record book of the General Land Office at the time it was examined, without any mutilation or erasure whatever, so that the legal effect of the record so transcribed shall be the same as if the original record had never been interfered with or mutilated; and when such record shall have been so made, as herein provided, it shall be marked *examined*, as it was originally marked. And the President of the United States is hereby authorized and required to do in the premises whatever may, in his judgment, be just and equitable; without regard to any action or proceeding had subsequent to the 14th day of March, 1863, the date of the patent recorded.

NOTE.—The minority of the committee, for the information of the House, further ask that the report of the Judiciary Committee of the Fortieth Congress, Honorable James F. Wilson, chairman, may be published with this report, together with the bill thereto annexed, which bill passed the House, but was never finally acted upon by the Senate.

MAY 8, 1868.—Mr. Wilson, from the Committee on the Judiciary, made the following report:

> The Committee on the Judiciary, to whom was referred a bill for the relief of William McGarrahan, respectfully submit the following report:
>
> The history of this case is composed of such a multitude of circumstances, spread over a period extending from the year 1844 to the present time, that to give it in detail would be to present a report so voluminous as to defeat the very object contemplated by the House in submitting it to the committee—that of information to its members.

It has, therefore, been deemed advisable to exhibit leading and controlling facts, rather than minute and unimportant particulars.

The effort has been to give the present paper a synoptical rather than argumental character, as it is believed a plain but abbreviated narrative will be sufficient to satisfy all inquiries that the bill herewith reported should pass.

An impartial statement of the facts and of prominent proceedings is, in the judgment of the committee, all that is needed to show that Mr. McGarrahan is entitled to the relief he seeks, and to the land in question, as described in his original memorial presented to the House during the Thirty-ninth Congress.

In the year 1844, Manuel Micheltorena, the then governor of Upper California, in accordance with a Mexican custom to confer lands upon deserving officials and citizens, granted to Vicente P. Gomez a tract of land, then, it would seem, considered almost valueless, and situate in the present counties of Fresno and Monterey, State of California. The property was then, and is now, known as "Panoche Grande rancho."

The making of this grant has been denied, and this denial constitutes the principal ground from which has sprung the prolonged and exhausting litigation in the case, extending over a period of more than thirteen years.

The proof of the existence of the grant is satisfactory. It is found mainly in the following facts:

I. The deposition of José Castro, who filled the office of political chief of California, and was also prefect and commandant general, which states that Gomez, with whom he was well acquainted, desired him (Castro) to inform him (Gomez) of a suitable place to petition for or secure, and that he recommended the Panoche Grande.

II. The petition of Gomez to Governor Micheltorena, March 13, 1844, requesting a grant of the rancho.

III. A marginal entry made by the governor, March 14, 1844, on the petition of Gomez, that the proper secretary should cause the necessary investigations to be made and make report.

IV. A declaration of the same date, by Manuel Jimeno, the secretary, that the petition of Gomez had been transmitted to the first justice of San Juan, in order that he should report what would be just in the matter.

V. The report of the justice, dated March 20, 1844, stating that the land was vacant, and that there was no reason why the same should not be granted.

VI. A map of the land, filed in pursuance of the justice's report.

VII. The affidavit of Valentine Gajiola, employed in the Presidial Company of Monterey in 1848, showing that Gomez applied to him to make a map of the rancho; exhibited to him the title papers duly executed, and that he made the map as desired.

VIII. The deposition of José Abrigo, the head of the commissary department, and resident in Monterey, proving that Gomez was a clerk in his office, and that in 1845 he (Gomez) showed him a title to the land named, together with a map of the property; that the papers were signed by the governor and secretary, and that he was well acquainted with the signatures of these officers, having often seen them write; that the archives in which their papers were, passed into the possession of the American army, July 7, 1856.

IX. The testimony of Abrigo, Dr. James L. Ord, a surgeon in the United States Army, and others, proving the destruction of the archives in Monterey, and the fact that such destruction is generally admitted.

X. The deposition of Oscar De Grandé Basque, stating that Gomez, in 1845, showed him title papers for the rancho, and proposed a sale of the land to him.

XI. The affidavit of J. Marno Bonilla, secretary of the superior tribunal of justice in Monterey, stating that Gomez, in 1844, applied to him for stamped paper, to be used in procuring a title to lands; and that in 1845 he saw memoranda of grants of land, among which was that of Panoche Grande to Gomez.

XII. The affidavit of Matias Moreno, secretary of state of Upper California, stating that in 1846 he knew Gomez had obtained a grant for Panoche Grande, and that he saw the grant.

XIII. The affidavits of Maricio Gonzales, José Fernandez, Gabriel de la Torre, Joaquin S. Escamilla, and others, tending to prove the existence of the grant.

XIV. Statement of E. L. Goold, esq., before the Judiciary Committee, that he believed the petition of Gomez was a genuine document, and that he based his opinion on his knowledge of the facts and circumstances connected with the case of said Gomez against the United States, which involved the validity of the grant upon which this case is based. Mr. Goold was of counsel in said case in opposition to the grant, and appeared as a witness before the committee on behalf of the opposing parties.

XV. The grant by Governor Micheltorena, in the year 1844, to Don Julian Ursua, of the tract known as the rancho "La Panoche de San Juan and Los Carrisalitos," wherein the tract is described as being bounded on the south by the mine of "Los Aguilas" and "La Panoche Grande."

XVI. Statement of Henry D. Cooke, esq., that when he was in California, in the

years 1847–'48–'49, it was common report that Gomez had received a grant of a rancho near San Juan from the Mexican government.

XVII. In 1845 the board of land commissioners, at the hearing on the evidence, as required by the laws of the United States, decided that Gomez had given satisfactory proof of the existenee and loss of the grant.

1. In the treaty of Guadalupe Hidalgo, entered into between the United States and Mexico, February 2, 1848, it was provided that property of every kind belonging to Mexicans should be inviolably respected, and that the United States should pass such laws as would give effect to the different stipulations of the treaty, and always thereafter regularly enforce them. This featnre was introduced to secure all landed and other interests that might in any way be affected by a change of jurisdiction over the territory embraced in the treaty. (9 Stat. at L., pp. 229–231.)

2. The law contemplated was passed March 3, 1851, (9 U. S. Stat. at L., p. 631,) creating a board of land commissioners, and declaring among other things, "that each and every person claiming lands in California, by virtue of any right or title derived from the Spanish or Mexican government, shall present the same to the said commissioners, when sitting as a board, together with such documentary evidence and testimony of witnesses as the said claimant relies upon in support of such claim; and it shall be the duty of the commissioners, when the case is ready for hearing, to proceed promptly to examine the same upon such evidence and upon the evidence produced in behalf of the United States, and to decide upon the validity of the said claim, and within thirty days after the said decision is rendered to certify the same, with the reasons on which it is founded, to the district attorney of the United States in and for the district in which such decision shall be rendered." (Sec. 8.)

3. February 9, 1853, Gomez, in accordance with the provision of the act of March 3, 1851, presented his petition to the board of land commissioners, praying a confirmation of his claim to the rancho Panoche Grande.

4. The board, having fully heard the evidence of the grant, decided that the claimant had given satisfactory proof of the existence and loss of the grant, but had failed entirely to offer any proof whatever going to show that he ever occupied, improved, or cultivated any part of the land, or that any one ever did for him, or that he ever saw the land; and on the ground of non-occupancy decided the grant invalid.

5. In the case of Frémont *vs.* The United States, (17 Howard, 542,) decided at December term, 1854, the Supreme Court of the United States held that, in the case of Mexican land grants, omission to take possession of the land did not of itself forfeit the right or grant. Had this determination preceded the action of the board of land commissioners, the grant to Gomez would certainly have been pronounced valid, as the board decided against the grant on the ground that the grantee had not entered upon and possessed himself of the land granted.

6. The decision of the board of land commissioners made an appeal necessary, which was accordingly taken by Gomez, and June 5, 1857, the district court for the southern district of California confirmed his claim, and a decree to that effect was pronounced. But through what is claimed to have been a clerical mistake, and which the party asserts was unobserved for some months, the decree was for three leagues of land instead of four, as claimed, and as proved by the deposition of José Abrigo, used before the board of land commissioners, and in the court, to have been comprised in the grant, and was unsigned by the judge.

7. Thus, as Gomez, his counsel, and all interested might well have supposed, the question of title was settled, subject of course to the right of appeal. The records of the district court presenting Gomez as owner of the rancho in accordance with the finding of the board of land commissioners, the decree of the said district court, and the decision of the highest court in the Frémont case, Mr. McGarrahan, December 22, 1857, bought the property from Gomez in good faith, and for a valuable consideration.

8. The alleged error in the quantity of land stated in the decree of June 5, 1857, being discovered, an application was made to the court to correct it; whereupon, February 8, 1858, an amended decree was entered *nunc pro tunc*, (that is as of June 5, 1857,) covering the four leagues, and duly signed.

9. About the time Mr. McGarrahan purchased from Gomez, some persons having prospected the land, discovered mineral deposits, (a fact unknown to Mr. McGarrahan when he purchased,) and finding it had been sold by Gomez, they, as "squatters," took possession of and held it, as they still hold it, either in person or by assignees, cognizant of the facts, and without title.

10. March 15, 1858, the United States appealed from the decree of the district court, as it seems was their practice to do in all cases adjudicated against them, and on July 8, 1858, thirteen months after the final decree of confirmation, a motion was made by special counsel of the United States in the case, as it seems, without notice to the claimant to have the decree opened.

11. Mr. McGarrahan having been advised that the appeal to the Supreme Court had been taken by the Government, without examination as to its merits, in accordance with the uniform practice, made application through counsel to Hon. Jeremiah S.

Black, the then Attorney General, (a certified transcript of the case being presented to him,) to have him examine the case and determine whether he would persist in the appeal.

12. After full argument before the Attorney General, that officer directed that the appeal should be docketed and dismissed; and on January 31, 1859, it was so entered upon the books of his office, and upon the records of the Supreme Court. Whereupon, in March, 1859, the Supreme Court issued its mandate, which ordered and decreed the docketing and dismissal of the appeal entered in the Supreme Court, and commanded that "such proceedings be had in said case as, according to right and justice and the laws of the United States, ought to be had."

13. The said mandate was filed in the district court, May 4, 1859, whereupon the court ordered, adjudged, and decreed that the said mandate should be carried into effect, and that the said Gomez proceed under the decree of the court as under a final decree.

The effect of this was to perfect the title to said rancho in Mr. McGarrahan, as the grantee of Mr. Gomez.

At this stage of the case the most vigilant lawyer consulted by client, and required to examine records, could have given no other opinion upon the state of the records than that a fee-simple interest in the rancho was vested in Mr. McGarrahan.

From this time the parties occupying the property, without title or rightful claim, resorted to divers expedients to defeat McGarrahan's title; accordingly the "squatters'" interest, so called, which vested in the New Idria Mining Company, appealed to controlling officers of the Government. This is shown by the following facts:

1. A consultation between Mr. E. L. Goold, counsel for the "squatters" upon the property alluded to, with the Attorney General, and immediately thereafter that officer making a motion in the Supreme Court to recall the mandate before spoken of, on the ground of fraud and want of jurisdiction.

2. The alleged fraud was declared to consist in the fact that a conveyance of an undivided half-interest in the property had been made by Gomez to Pacificus Ord, then representing the United States as district attorney, and that he had consented to the propriety of the original decree of June 5, 1857.

3. It is shown that Mr. Ord, after his appointment to the office he held, not only revealed to the Government the fact that he was interested in the claim, but requested the Government to employ other counsel to attend to its interests.

4. This the Government did not do; the consequence of which was, that Mr. Ord, at the time of the original decree, having no evidence militating against the validity of the grant, acquiesced in its confirmation; and, so far as this committee can discover, the representation then made by Mr. Ord was in accordance with facts.

5. At this point in the proceedings, it appeared that some influence, unknown to the committee, had caused the file-marks and indorsements on the final order of the district court, made in obedience to the mandate of the Supreme Court, to be erased from the record, as well as the filing of the mandate itself. This seems to have been done on the 18th of January, 1860, more than eight months after the order had been filed. It also appears that certain entries in the books of the Attorney General's Office respecting the original appeal in this case, and the action of the Government in other appeals, embraced in the same order, were not known to the court or to McGarrahan's counsel in time for them to avail themselves of the benefits thereof, on the hearing of the case in the Supreme Court, on motion by the Attorney General to revoke the mandate. It will be remembered that it was upon the conclusive evidence of his order that the Supreme Court had directed the proper entry to be made upon their record, and that their mandate was issued.

6. This failure to disclose the facts to the court, by the Government, undoubtedly had much to do in securing the order of the Supreme Court revoking their mandate of 1859, and which order was strangely withheld until June, 1862, when it was filed by the present claimant for the purpose of again lodging jurisdiction of the case in the court below.

7. But in the mean time, (March 21, 1861,) the district court annulled its original decree. This extraordinary action on the part of the court seems to have been taken without notice, either to the claimant or his known counsel, and in the absence of both.

8. As soon as this condition of things was ascertained, an application was made to the court to restore the decree, and upon full hearing, the order, as requested, was made on the 4th of August, 1862.

9. Thus matters rested until the 25th August, 1862, when the then district attorney, contrary to express stipulation entered into between himself and the counsel for the claimant, in their absence, and without notice, obtained an order of appeal to the Supreme Court.

10. The impropriety of this proceeding is made apparent for the reason that, in order to give the Supreme Court jurisdiction, a citation should have been first issued, signed by the judges, served on the claimant, and formal return made, with proof of service.

11. The law is very clear upon this point; the acts of 1789 and 1803, which regulate

appeals, (the appeal not having been taken in open court at the June term in 1857, when the original decree was pronounced, nor at the December term in 1857, when the decree was entered *nunc pro tunc*, or, in other words, within five years, as directed by the statutes,) demand a notice to the opposite party, and the proceeding was therefore clearly wrong. The court, upon a full hearing, reached this determination, and accordingly decided, December 4, 1862, that the appeal allowed August 25, 1862, be vacated and set aside, and that an appeal on behalf of the United States to the Supreme Court be denied.

Here, for the second time, the record evidenced a perfect title in the claimant.

It having been twice judicially determined by the action of the courts that Mr. McGarrahan was the legal owner of the Rancho Panoche Grande, the aggressors upon his rights resorted to a new line of action.

1. As seen, after nine years of litigation, Mr. McGarrahan, the present claimant, succeeded in acquiring two distinct confirmations of his title. It was then, in accordance with the act of Congress of June, 1862, he applied to the United States surveyor general of California for a survey of the said tract of land, and which officer caused the survey to be made, and approved September 11, 1862. This survey was transmitted immediately thereafter to the General Land Office, and a patent for the property was demanded.

2. Here, again, he was confronted by the New Idria Mining Company, before referred to. The Secretary of the Interior at that time, (Hon. Caleb B. Smith,) after argument in the case, ordered the patent to issue.

Thus again, for the third time, the title to the Panoche Grande was found to be in Mr. McGarrahan. Some unknown cause delayed the execution of this order, and the patent was not issued. This neglect, or refusal, was persisted in throughout the remainder of Mr. Secretary Smith's term. The matter was then brought to the notice of Mr. Usher, the new Secretary, before whom it was again argued, and by whom a patent was directed to be issued. Neither the order of Mr. Smith nor Mr. Usher was obeyed, for some reason not yet divulged or ascertained.

For the fourth time, the title of Gomez and his grantee was decided to be good and available in law. A request was then made by the claimant of President Lincoln that he would make an examination of the case, and determine it upon its merits. This he consented to do. Printed briefs were laid before him; and, upon full consideration of all the facts and circumstances, he directed the Secretary of the Interior to cause a patent to issue to Mr. McGarrahan. And thus, for the fifth time, Mr. McGarrahan was declared to be entitled to the property or rancho, and that neither the United States nor any other person had lawful claim to the same.

In accordance with this order of the President of the United States to the Secretary of the Interior, a patent was actually made out; but, for reasons not fully explained, never delivered to him for signature.

To recapitulate:

1. The proof of a legal grant from the Mexican Government to Gomez and the transfer of title to McGarrahan are clearly and indisputably shown.

2. The district court of the United States for the southern district of California confirmed the grant.

3. The Attorney General of the United States declared the title to the lands to be in Mr. McGarrahan, and caused an entry to that effect to be made on the books of his office and in the Supreme Court.

4. Hon. Caleb B. Smith, Secretary of the Interior, after examination and consideration of the case, ordered a patent to be issued to Mr. McGarrahan.

5. Mr. Usher, the successor in office of Mr. Smith, similarly decided.

6. Mr. Lincoln, after inquiry, decided the grant to be genuine, and that a patent should be issued to Mr. McGarrahan.

From the time when the district court pronounced its decree of confirmation, (June 5, 1857,) and the President's action on the case, (in the fall of 1863,) it will be observed, over six years had elapsed, and, in consequence of the lapse of time, an appeal could not be had according to law, unless something should appear to avoid the limitation.

In December, 1863, a paper, purporting to be a transcript of proceedings as they appeared on the records of the district court, was prepared in the Attorney General's Office in Washington, District of Columbia, forwarded to the district attorney in California, certified by him out of his district, without comparison with the record, and merely from memory, and from which transcript were omitted material parts of the record, and returned to Washington.

Upon the transcript thus made up, the case was again brought before the Supreme Court, which being discovered by the claimant, a motion was made to strike off the appeal, which was refused, although it, as it seems to the committee, was out of time, and the transcript had been made up without reference to the actual records of the district court.

Notwithstanding the Supreme Court refused to strike off the appeal taken in the

manner indicated, a new transcript was obtained, 1865, from the clerk of the district court, and filed at December term, 1865, eight years and a half after the decree of the district court confirming the title was first pronounced, and more than three years after the period had elapsed within which the law allowed an appeal to be taken in the case, unless some exception takes it out of the limitation. Upon this appeal the Supreme Court, in March, 1866, decided the case against the claimant, and thus matters now stand.

The committee have bestowed a great deal of time and labor upon this case, in order to arrive at its real facts and merits. The claimant and the parties resisting his claim have been heard patiently and at great length.

In presenting the conclusion at which the committee have arrived, they do not wish to be understood as undertaking to review and reverse the action of the Supreme Court relative to the case. Under and by virtue of the right of petition, the claimant has presented his case to Congress, and the House of Representatives directed this committee to inquire into the grounds of his complaint. This has been done. Many facts have been presented to the committee which were not placed before the court. Additional evidence has been submitted, and circumstances disclosed which have induced your committee to conclude that the relief prayed for by Mr. McGarrahan ought to be extended to him; and this may very readily be done. The title to the land claimed, and which he asks that he may be allowed to purchase, is now vested in the Government of the United States, and it is merely a question whether he shall be permitted to secure that which, in the judgment of your committee, he acquired title to by virtue of the Mexican grant aforesaid, or it shall fall into the hands of a corporation, known as the New Idria Mining Company, which has been resisting his claim for years, and paying the expenses of the efforts of said company out of the proceeds of the mines, the title to which rests in the United States.

It is clear that McGarrahan purchased the property in good faith, and for a valuable consideration, when it was regarded as of but little value. His interests have been attacked and his title resisted, nominally, by the United States, but really by the New Idria Mining Company. The name of the United States, their officers and money, have been used to resist his claim, and all to the end that this property, valuable as it now undoubtedly is, may pass into the hands of parties who are wholly unknown to the record of the proceedings had in the courts of the United States respecting the title to the land in question, through all its years of transit from the board of land commissioners to and through the Supreme Court of the United States.

The company aforesaid placed before the committee a memorial, in which the case is stated as follows:

"The real parties who contested the grant were your memorialists, for against them only were the efforts of the owners of the 'Panoche Grande rancho' directed. For the New Idria mines, and for the fruits of the labor of those who have developed them, the owners of the 'Panoche Grande' are now seeking congressional interference in their behalf. It may well be doubted whether the 'Panoche Grande' would ever have been heard of in the district court of the United States or in Congress but for the hope of robbing your memorialists of the fruits of their years of labor and vast expenditures of money."

This extract shows that the United States have no interest as between these parties beyond that of preserving its faith as pledged in the treaty made between this Government and that of Mexico. And as to the allegation of robbery, &c., made by said company, it may be remarked that one of its stockholders of large interest testified before the committee that after paying all of the expenses of said company, including every outlay, a balance would be left in its treasury on account stated.

The precedents are numerous where the Congress has afforded redress in cases of an analogous character. The following are referred to:

1. The Soscol act, 12 U. S. Stats., p. 808.
2. The Bolsa de Jomales act, 13 U. S. Stats., p. 136.
3. Ex-Mission San José act, 13 U. S. Stats., p. 534.
4. Laguna de Santos Calle act, 13 U. S. Stats., p. 372.
5. Baron de Bastrop act, 9 U. S. Stats., p. 597.

In addition to which we have the act of June 21, 1860, and the act of March 1, 1861.

In view of all the facts developed in the case, and believing that justice and equity demand that the relief prayed for by the claimant be extended to him, the committee recommend the passage of the bill herewith reported.

Mr. JAMES F. WILSON, on leave, introduced the following bill:

A BILL for the relief of William McGarrahan.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the tract of land known as the Panoche Grande rancho, in

the State of California, granted by Governor Manuel Micheltorena to Vicente P. Gomez in the year 1844, and by said Gomez conveyed to William McGarrahan on the 22d day of December, 1857, surveyed by the United States surveyor general for the State of California, and approved by him on the 11th day of September, in the year 1862, and which said survey is now on file in the General Land Office, be, and the same is in all respects, hereby fully confirmed to said William McGarrahan, upon this condition, however, that the said McGarrahan shall, within twelve months after the passage of this act, pay into the Treasury of the United States the sum of $1 25 per acre for the lands embraced within the said survey.

SEC. 2. *And be it further enacted*, That upon the payment of the said sum of money to the Treasurer of the United States by said McGarrahan, the said Treasurer shall give a certificate therefor, and upon the presentation thereof to the Commissioner of the General Land Office, a patent shall be issued to said William McGarrahan for said lands.

ERRATA.

Page 31, line 8, letter of W. T. Otto, of July 6, 1870, after the word "any," insert the word "such."

Page 31, line 4, letter of Jos. S. Wilson, of July 7, 1870, for "Colofornia," read "California."

Page 31, line 5, letter of Jos. S. Wilson, of July 7, 1870, for "1853," read "1863."

TESTIMONY

TAKEN BEFORE

THE JUDICIARY COMMITTEE OF THE HOUSE OF REPRESENTATIVES

IN

The matter of the memorial of William McGarrahan.

DEPARTMENT OF THE INTERIOR,
Washington, D. C., July 6, 1870.

SIR: I have the honor to acknowledge the receipt of your letter of this date, requesting that the Judiciary Committee of the House of Representatives may be furnished with volume four of California Mexican confirmed grants, containing the records of March, 1863, and also with any unexecuted patent to William McGarrahan, and to inform you that it has been referred to the Commissioner of the General Land Office, who has been directed to send an officer of his Bureau with the record requested, for the inspection of the committee, and also to send any draught of patent, such as you refer to, if any exists.

I am, sir, very respectfully, your obedient servant,

W. T. OTTO,
Acting Secretary.

Hon. JOHN A. BINGHAM,
Chairman Judiciary Committee, House of Representatives.

DEPARTMENT OF THE INTERIOR,
General Land Office, July 7, 1870.

SIR: The Secretary of the Interior has referred to this office the communication to him, dated the 6th instant, from the honorable chairman of the Judiciary Committee, House of Representatives, desiring that there be "sent to the committee on Friday next, at 9½ o'clock a. m., from the Land Office, records of California Mexican confirmed grants, volume four, containing the records of March, 1853, for the inspection of the committee, and also desiring that there be sent to the committee, at the same time, any unexecuted patent to William McGarrahan."

Pursuant to the Secretary's direction, that the record be sent by an officer of the bureau, and also the draught of patent, I have the honor to transmit herewith by the hands of Mr. Calver, of the General Land Office, the aforesaid record and draught of patent, respectfully requesting of the honorable committee the return of the same by the bearer when no longer required.

With great respect, your obedient servant,

JOS. S. WILSON,
Commissioner.

Hon. JOHN A. BINGHAM,
Chairman Judiciary Committee, House of Representatives.

WASHINGTON, D. C., *July* 8, 1870.

THEODORE F. STOKES sworn and examined.

By the CHAIRMAN:

Question. Please state your full name.—Answer. Theodore F. Stokes.

Q. Are you employed in the General Land Office of the United States?—A. Yes, sir.

Q. How long have you been there?—A. Since 1861.

Q. Will you look at the record made on page 321, volume 4, of the General Land Office, and state to the committee who made that record?—A. I should think I wrote that.

Q. Have you any doubt about it?—A. No, sir; not at all.

Q. State when you did it.—A. I could not do that; I would have to take this date. It was on or about the time of the date here given.

Q. State what you made that record from.—A. It was made from the field-notes of the report of the surveyor general.

Q. What did you make the last entry on the page, 321, the signature of the President and Secretary, from?—A. It was a printed form that is made out, and the names were not on the printed form.

Q. What did you write the names from?—A. It is the usual course of doing such things in the office.

Q. Did you find them on any original grant?—A. No, sir.

Q. Who ordered you to make up the record?—A. The chief clerk, at that time, Mr. Lowry.

Q. Did he order you to do it?—A. It was sent down in the usual way.

Q. Is he in the office now?—A. No, sir.

Q. What is he engaged in?—A. I believe he is in the Treasury Department now.

By Mr. BUTLER:

Q. Where did you get the dates?—A. When they send down the papers they send word to the recorder, telling him what dates to put in.

Q. They say, date the patent at such a date?—A. Yes, sir.

Q. Do you date back or forward?—A. Never back.

By Mr. DAVIS:

Q. Did you make the patent before it was executed?—A. No, sir. We generally make out the patent and then have it copied.

Q. Have you any recollection so as to be able to say whether there was or not a patent from which this record was made?—A. No, sir; I have not.

Q. Is this in your handwriting?—A. No, sir. That is in Mr. Stoek's handwriting. Sometimes they wrote the patent first.

Q. What was the general practice about that time?—A. It was both ways.

Q. Was it more frequent to make the patent first, and then the record?—A. I could not say.

Q. When you made the record first did you make it complete, as if it were a completed patent?—A. Yes, sir. We always filled in the names of the President and Secretary.

Q. Although they had not been annexed to any patent?—A. Yes, sir.

By Mr. BUTLER:

Q. Why was that left blank? (pointing to a particular record.)—A. I suppose Mr. Granger was away, and they did not know who would sign it.

By Mr. ELDRIDGE:

Q. Do you put on the seal before the signature is put on?—A. I never saw it done. That is the last thing that is done.

By Mr. PETERS:

Q. Who fills it in?—A. The person who records it puts it all in.

By Mr. BUTLER:

Q. Is the place of the seal put in before it is executed?—A. We generally make a scroll for the seal before.

By the CHAIRMAN:

Q. Do you understand that the chief clerk ever ordered a patent to be made before it was submitted to the Commissioner?—A. The Commissioner does not order the patent. The head of the division sends word down to make the record.

Q. Do you know of a case that a patent was issued that had not been ordered to be issued by the head of the Department?—A. I have not known any.

WASHINGTON, D. C., *July* 8, 1870.

THOMAS CALVER sworn and examined.

By the CHAIRMAN:

Question. Give your full name if you please.—Answer. Thomas Calver.

Q. State whether you are employed in the General Land Office of the United States.—A. Yes, sir.

Q. How long have you been there?—A. I have been in the Department four years last past; the first six or seven months I was detailed in the office of the Secretary of the Interior.

Q. You were not in the Land Office in 1863?—A. No, sir.

Q. Have you any knowledge who made the record on page 321 of volume 4 of Land Office?—A. I could not swear to it. I have understood that a gentleman by the name of Stokes made the record, and it looks to me like his handwriting. He is in the pre-emption division of the General Land Office now.

By Mr. LOUGHRIDGE:

Q. What is the custom in regard to drawing up the patents?
[Mr. Eldridge objected to this question, and it was withdrawn.]

By the CHAIRMAN:

Q. State whether you have been a recorder of patents or grants of land in the Land Office?—A. I have. When I first went into the office I was a writer and recorder of patents. Subsequently, for a time, I was detailed in the Secretary's office; and then I went back to the General Land Office.

Q. You have been a recorder since that time?—A. Yes, sir; I have recorded them since that time.

By Mr. LOUGHRIDGE:

Q. What was the custom when you first went into the office, and what has it been since, in relation to recording these patents before they were actually executed?
[Mr. Eldridge objected to this question, because the patent purports to have been executed in 1863, before the witness was in the office.]
[The objection was overruled by the committee.]
A. In answer to the question, I would state that in 1866, for the sake of convenience, so that if any changes were to be made, or any mistakes occurred, it was customary to write the record first, giving a certain date, because the patent could not have any erasures or be scratched, but the record might be changed. The date was usually placed something ahead, when writing up a lot of patents, in order to secure the date properly. It was a matter of choice among the patent writers whether they would write the records or the patents first. I do not know about that to-day. When it is ascertained that mistakes have been made, the record is sometimes canceled. It is now the custom in our division—that is the division of private land claims—in issuing these patents, to secure the signature of the President and Secretary to the record before the patent is issued.

By Mr. DAVIS:

Q. Has it ever been the custom to record the instrument as a completely executed one before it was in fact executed?—A. Yes, sir.
Q. And the name of the Secretary?—A. Yes, sir.
Q. How could you ever presume by what Secretary it would be executed?—A. In some cases the records have been canceled, as I know to have been the case when Mr. Edward D. Neil was removed and another person appointed. These mistakes have been make, and the records have been canceled.
Q. Is there any such case in this book, to your knowledge?—A. I do not think there is any in that book; I do not recollect any.

By the CHAIRMAN:

Q. Do you know of any instance of any record being made of a patent or grant, in the book of records of the General Land Office, without an order first to make such a record or patent?—A. I am not aware of any patent recorded within my personal knowledge as having been complete, without an order; that is, without the matter having been submitted to the Commissioner. It is the business of the chief clerk of the private land claims to prepare a patent, and to have a form of the patent recorded. Subsequently it is his business to place the matter before the Commissioner with the papers, and then the Commissioner decides whether the patent shall issue or not. It is sometimes recorded before the Commissioner examines it.

By Mr. DAVIS:

Q. When the recording proceeds, the recorder would always have the instrument there, of course, to copy into the book?—A. Certainly.
Q. Do you make the instrument from the book?—A. In case the record is made first, the patent is copied from the record. It is the general custom, in the private land claims, to write the patent first, and write the record from the patent.
Q. When the book is completed first you would not be very likely to leave out of the instrument the date which you had entered in the book?—A. Sometimes we might; when there was no certainty as to the time when it was signed.
Q. Would you make a complete record, dates and all, in the book, and then make a copy to be executed from that, leaving out the dates?—A. I think that would be an oversight to do so. I was speaking of the custom in the private land claims, in the records division.
Q. I am asking you what would be done. Do you make a complete record of the in-

strument; and then for the purpose of having it transcribed, do you leave out the dates?—A. I think if left out in that case it would be an oversight.

By Mr. COOK:

Q. Do you know in whose handwriting these words, "Not signed," are?—A. I have been informed that it is the handwriting of the chief clerk of the private land claims. His name is W. H. Lowry.

Q. Is he in the city now?—A. I have been so informed; I do not know.

By Mr. DAVIS:

Q. I observe that the concluding sentence is, "Acting Recorder of the General Land Office;" but in this other book the word "acting" is left off. Why is that?—A. The reason is, we have a recorder; and in his absence, the law provides that the principal clerk shall be the acting recorder.

Q. Why was the word "acting" left off when writing in the book?—A. The recorder may have been writing from the patent or the original papers. In comparing, there are three different persons holding the three different classes of papers—the record, the patent, and the original papers, and they are all examined.

Q. These are to be examined and compared?—A. Yes, sir; and then a note is made to indicate that they are correct.

Q. What is that note?—A. It is written in ink, over the top of the patent, E. X. D.

Q. When is that done? After the patent is completed, or before?—A. It is generally done before; always, in fact, before the patent is signed. It means that the substance of the patent agrees with the record and papers. At present it is our custom to write the name and date after it passes from our hands, for if there were a blunder in it, it would have to be written over, because the law allows no erasures. This cannot be done after the seal is affixed, therefore it must be examined before it is submitted to the President and Secretary.

Q. That note, then, simply means that the blank patent has been examined and found to be correct?—A. Yes, sir.

By Mr. ELDRIDGE:

Q. Do you know what the custom was in 1863?—A. No, sir.

Q. Did you know anything about it between 1863 and 1866?—A. No, sir; except from hearsay.

Q. What is the authority upon which a patent is made out?—A. It is the final confirmation of the thing by decree of the court.

Q. Where do you get your authority, as recorder, for recording it?—A. I would have the papers placed in my hands by the person in charge of the division. The transcript decrees of the court would be my authority.

Q. You get your authority from the head of the division?—A. Yes, sir.

Q. Where does he get his authority from, decrees of the court, or by order of the Secretary?—A. He may from the transcript of the court, and still have orders not to issue the patent.

Q. Does the chief clerk or head of the division act in making out patents on his own judgment, or does he have authority from the head of the Land Office?—A. He has authority.

Q. From whom?—A. The Commissioner. The principal clerk of the private land claims has charge. The Commissioner exercises a supervisory power. If the clerk has executed his duty to the best of his knowledge and belief, he places the papers in the hands of the Commissioner; nothing of the kind ever passes without the authority of the Commissioner.

Q. Are the records and patents all made out without authority of the Secretary of the Interior, or of the Commissioner of the General Land Office?—A. Yes, sir; without any authority in the particular case. But they are not signed by the President and Secretary until the Commissioner has revised them.

Q. I am inquiring where you get your authority?—A. If I were the principal clerk I should say I get my authority by appointment and confirmation.

Q. Who gets the decisions of the courts and original records upon which the patents are made out?—A. They are sent by the surveyor general to the Commissioner of the Land Office, and he sends them to the principal clerk of the private land claims, and they are filed in his office.

Q. And then he acts upon these?—A. Yes, sir.

By Mr. BUTLER:

Q. At what time is the seal affixed to the patent?—A. After the President and Secretary sign it.

Q. Never till then?—A. No, sir.

Q. Now, I observe that all the records—take the one on page 369 for example—have the indorsement, "J. W. Granger, recorder, General Land Office?"—A. Yes, sir.

Q. Is that a copy or a genuine signature?—A. He does not sign it. It is signed by the clerk who makes out the patent.

Q. Here, again, I find, (examining the book,) "Granger, recorder," and here, again, I find it in a different handwriting?—A. Yes, sir. It is written by a different clerk.

Q. Why should the clerk put "Granger?"—A. The clerk who writes the record puts it in. (After examining the record.) In that instance, in all probability the names were left blank and written subsequently.

Q. Here we find "Granger," (still examining the records,) in a similar place, in a different handwriting? There is an unsigned patent, but still it is "Granger?"—A. The President himself signed that.

Q. Here I find "Martin Buel, acting recorder." But what I observe, is this, in every completed patent the acting recorder or somebody certifies it?—A. Yes, sir.

Q. He is a different officer from the land grant secretary?—A. Yes, sir.

By Mr. KELLOGG:

Q. When you went into the Land Office, Mr. Edmunds was Commissioner?—A. Yes, sir.

Q. Do you know this person's handwriting? (Pointing to the book of records.)—A. Yes, sir.

Q. The seal, you say, is not applied until the patent is signed?—A. No, sir; it is not.

Q. The seal not being there, in this case, is an indication that it never was signed?—A. Yes, sir.

DEPARTMENT OF THE INTERIOR,
Washington, D. C., July 19, 1870.

SIR: I have the honor to acknowledge the receipt of your letter of the 14th instant, requesting to be furnished with an authenticated copy of the Gomez grant for the rancho "Panoche Grande," and to inform you that it has been referred to the Commissioner of the General Land Office.

I am, sir, very respectfully, your obedient servant,

J. D. COX, *Secretary.*

Hon. JOHN A. BINGHAM,
House of Representatives.

DEPARTMENT OF THE INTERIOR,
Washington, D. C., July 26, 1870.

SIR: In compliance with the request contained in your letter of the 14th instant, I have the honor to inclose herewith a certified copy of the records of the General Land Office relating to the California private land claim known as "Panoche Grande."

I am, sir, very respectfully, your obedient servant,

J. D. COX, *Secretary.*

Hon, JOHN A. BINGHAM,
House of Representatives.

DEPARTMENT OF THE INTERIOR,
General Land Office, July 25, 1870.

I, Joseph S. Wilson, Commissioner of the General Land Office, do hereby certify that the annexed, on pages one to fourteen inclusive, is a true and literal exemplification of an *incomplete* record of an *unexecuted, unsigned* patent now on file in this office for an alleged private land claim in California, known as the rancho "*Panoche Grande*," said record being found on pages three hundred and twelve to three hundred and twenty-one, inclusive, in volume four of "California Land Claims," the said record being *incomplete* in this:

First. That it does not bear the name of either the recorder or acting recorder, the recorder's name or acting recorder's being by law and custom essential to the completion of the patent; and,

Second. The said patent is *unexecuted* and *unsigned* both by the *President* and *recorder*, as shown by the original of the said patent now on file in this office; and,

Third. That on the said record pencil lines are drawn across the *date*, the *name of the President* and *President's secretary*, and the words "*not signed*" are also written in pencil on said record.

In testimony whereof I have hereunto subscribed my name, and caused the seal this office to be affixed at the city of Washington on the day and year above written.

[SEAL.]

JOS. S. WILSON,
Commissioner of the General Land Office.

1 THE UNITED STATES OF AMERICA.

To all to whom these Presents shall come, Greeting:

Whereas, It appears from a duly authenticated transcript, filed in the General Land Office of the United States, that pursuant to the provisions of the Act of Congress approved the third day of March, one thousand eight hundred and fifty-one, entitled "An Act to ascertain and settle the Private Land Claims in the State of California," Vicente P. Gomez, as claimant, filed his petition on the ninth day of February, 1853, with the Commissioners to ascertain and settle the private land claims in the State of California, sitting as a Board in the city of San Francisco, in which petition he claimed the confirmation of his title to a tract of land called Panoche Grande, of the extent of four square leagues, situated in the County of San Joaquin, and State aforesaid; said claim being founded on a Mexican grant to the petitioner, made in the year 1844, by Manuel Micheltorena, then Governor of Upper California;

And whereas, the Board of Land Commissioners aforesaid, on the 6th day of March, 1855, rendered a decision rejecting said claim, which decree or decision was, on appeal, reversed by the District Court of the United States for the Southern District of California, by decree rendered as follows:

"Vicente P. Gomez, appellant, vs. The United States, appellee; case No. 393, 'Pano-
"che Grande.' Transcript No. 569. Decree. This cause came on to be heard on appeal
"from the decision of the United States Board of Land Commissioners to ascertain and
"settle the private land claims in the State of California, under an Act of Con-
2 "gress approved March 3, 1851, on a transcript of the decision and proceedings
"of said Board, and the papers and evidence upon which said decision was made,
"and the other evidence adduced by the appellant before this Court, and it appearing
"to the Court that said Transcript and notice of intention to appeal have been duly
"filed according to law, and counsel for the respective parties having been heard,
"It is ordered, adjudged, and decreed, that the decision of said Board of Land Com-
"missioners be, and the same is hereby, reversed; and that the claim of said appellant
"is good and valid; and the same is hereby confirmed to him as follows, to wit: the
"tract of land situate in the County of Fresno, State of California, known by the name
"of 'Panoche Grande,' bounded northerly by the lands of Don Julian Ursua, southerly
"by the hills, easterly by the valley of the Tulare, and westerly by the lands of Don
"Francisco Arias, containing four square leagues of land and no more, provided that
"quantity is contained within the boundaries aforesaid, and provided also that if a
"less quantity is contained within the boundaries aforesaid, that confirmation of such
"less quantity is hereby made to said claimant, and for a more particular description
"of which said land reference is hereby made to the map contained in the Transcript
"in this case.

"And it also appearing to this Court that heretofore, to wit: on the 5th day of June,
"A. D. 1857, at a regular term of this Court holden in the town of Monterey, State of
"California, the claim of the appellant in this case had been confirmed by this Court,
"but that it had been omitted by this Court to sign the decree of confirmation
3 "at the time the same was made: It is therefore further ordered by this Court
"that the same be signed now as for then.

'Given under my hand in open Court this 5th day of February, A. D. 1858.

"ISAAC S. K. OGIER,
"*U. S. Dist. Judge for the S. Dist. of Cala.*"

And whereas, it further appears from a duly certified extract on file in the General Land Office, from the minutes of the Supreme Court of the United States, that this cause being brought by appeal before the said Court at the December term, 1858, the following proceedings were had therein: "Now on this day this cause coming on to be
"heard, the parties appearing by their respective attorneys, the appellant by Sloan &
"Hartman, Esqs., and the appellees by P. Ord, U. S. Dist. Atty., and after argument of
"counsel aforesaid, the same is submitted to Court for final adjudication. Whereupon
"the Court being fully advised in the premises, delivered its opinion confirming the
"claim of the appellant to the extent called for in the Transcript and papers, three
"leagues or sitios de gañada major, and a decree was ordered to be entered up in con-
"formity with said opinion;" and thereafter, to-wit, at the December term, 1859, of the Supreme Court of the United States the following order was made in this case: "The
"United States, appts, vs. Vicente P. Gomez. Appeal from the District Court of the
"United States for the Southern District of California."

"On consideration of the motion made in this cause on a prior day of the present
"term, to-wit: on Friday the 27th day of January, A. D. 1860, by Mr. Attorney Gen-
"eral Black, to rescind the order and decree of this Court of the 31st day of January,
"1859, docketing and dismissing this appeal, and to revoke and cancel the man-
4 "date issued by this Court to the District Court of the United States for the
"Southern District of California, and of the argument of counsel thereupon had

"as well in support of as against the said motion: It is now here ordered by this "Court that the aforesaid decree of this Court docketing and dismissing this appeal be "and the same is hereby rescinded and annulled. and that the mandate issued by this "Court to the District Court of the United States for the Southern District of Califor- "nia in this case be and the same is hereby revoked and canceled; and it is further "ordered by this Court that the Clerk of this Court do forthwith send a certified copy "of this order to the aforesaid District Court of the United States for the Southern "District of California."

And whereas, it further appears from a duly certified transcript on file in the General Land Office, that an order having been made in the District Court of the United States for the Southern District of California, granting a new trial in this case, the said Court on the 4th day of August, 1862, on a motion to vacate and set aside said order, made the following order: "Vicente P. Gomez, appellant, vs. The United States, ap- "pellee, D. C. No. 393, L. C. No. 569. 'Panoche Grande.' On this day the Court delivers "its opinion in this case granting the motion heretofore made by the appellant herein "praying the Court to vacate and set aside the order of Hon. Isaac S. K. Ogier, late "Judge, granting a new trial in this cause. And it is hereby ordered that the previous "order of this Court made and entered on the 21st day of March, 1861, setting aside "all proceedings had in this cause, and placing the same on the Calendar for trial *de* "*novo*, be and the same is hereby vacated and set aside."

And whereas, it further appears from a duly certified transcript on file in the 5
General Land Office of the United States, that an order having been made on the 25th day of August, 1862, in the District Court aforesaid, allowing appeal in this case to the Supreme Court of the United States, the said District Court, at the December term, 1862, made the following order: "Vicente P. Gomez vs. The United States, "No. 393, Panoche Grande. In this case the court delivered an opinion on the motion "submitted the day before yesterday, and ordered that the appeal taken on the twenty- "fifth day of August, A. D. 1862, by the United States to the Supreme Court of the "United States from the final decree of confirmation herein be vacated and set aside, "and it is further ordered, that the order of this Court made on the said 25th day of "August, A. D. 1862, allowing said appeal, be and the same is vacated and set aside, "and the motion of the United States District Attorney for leave to take an appeal on "behalf of the United States to the Supreme Court of the United States from the said "final decree be and the same is denied."

And whereas, there has been presented to the Commissioner of the General Land Office a plat, with a certificate of the survey of the said claim, authenticated by the signature of the Surveyor General of the public lands in California, said survey having been made pursuant to the act of Congress approved June 2, 1862, entitled "An act "for the survey of grants or claims of land," said plat and certificate being in the words and figures following, to wit:

"UNITED STATES SURVEYOR GENERAL'S OFFICE, 6
"*San Francisco, California.*

"Under and by virtue of the provisions of the act of Congress of the 2d of June, "1862, entitled 'An act for the survey of grants or claims of land,' and in consequence "of a certificate of the United States District Court for the Southern District of Cali- "fornia, a copy of which is hereto annexed, by which it appears that a decision of the "said District Court has been had, recognizing and confirming the title claim of "Vicente P. Gomez to the tract of land designated 'Panoche Grande,' the said tract "has been surveyed in conformity with said decision, and I hereby certify the annexed "map to be a true and accurate plat of said tract of land as appears by the field-notes "of the survey thereof made by E. H. Dyer, Deputy Surveyor, in the month of July, "1862, under the direction of this office, which, having been examined and approved, "are now on file therein.

"And I hereby certify that the said tract of land is bounded and described as fol- "lows, to wit:

"Beginning at post in earth mound corner to sections one, two, eleven, and twelve, "township seventeen south, range eleven east of Mount Diablo meridian, from which "post a point on the highest ridge of the Lomas Muert as (a high range of barren and "broken mountains, the eastern slope of which forms the western edge of Tulare "Valley) bears north nine degrees west, distant about two miles.

"Thence according to the true meridian, the variation of the magnetic needle being "fifteen degrees thirty minutes east, over rolling land to the north of a small "valley called Vallecito, north forty chains to post in earth mound on quarter 7
"section corner between sections one and two. Station.

"Thence west eighty chains to quarter section corner on line between sections two "and three. Station.

"Thence north forty chains to post in earth mound, corner to sections two and three "on fourth standard line south. Station.

"Thence west, at forty chains quarter section post in earth mound eighty chains to

"post in earth mound corner to sections three and four on fourth standard line south.
"Station.

"Thence through township sixteen south, range eleven east, north forty chains to
"station.

"Thence through middle of sections thirty-three and thirty-two, west one hundred
"chains to station.

"Thence south, at forty chains intersects fourth standard line south twenty chains
"west of post corner to sections four and five; thence with a variation of fifteen
"degrees thirty-five minutes east through township seventeen south, range eleven east
"parallel to its eastern boundary; at sixty chains enters Vallecito Valley, course north-
"west and south of east, one hundred chains to station.

"Thence east twenty chains to station on line between sections four and five, thence
"south, at thirty chains leaves small valley, thence over broken hills near southern
"edge of said valley, sixty chains to quarter section corner between sections eight and
"nine. Station.

"Thence east, eighty chains to quarter section corner between sections nine and ten.
"Station.

"Thence south, forty chains to corner to sections nine, ten, fifteen and sixteen.
"Station.

8 "Thence east, one hundred and twenty chains to quarter section corner between
"sections eleven and fourteen. Station.

"Thence through section fourteen, south sixty chains to station.

"Thence east twenty chains to station.

"Thence south, twenty chains to station on line between sections fourteen and
"twenty-three.

"Thence on section line east, sixty chains to quarter section corner on line between
"sections thirteen and twenty-four. Station.

"Thence through middle of sections twenty-four, twenty-five, and thirty-six, over
"high and rough mountains, south two hundred chains to center of section thirty-six.
"Station.

"Thence east, at forty chains quarter section post in earth mound on line between
"ranges eleven and twelve east; thence through township seventeen south, range
"twelve east, eighty-two chains and fifteen links to center of section thirty-one.
"Station.

"Thence south, at forty chains quarter section post in earth mound on line between
"townships seventeen and eighteen south, sections thirty-one and six, on top of a ridge
"course northwest and southeast, thence through township eighteen south, range
"twelve east, two hundred and eighty chains to quarter section corner between sec-
"tions eighteen and nineteen. Station.

"Thence on section line, west twenty chains to station.

"Thence through section nineteen, south sixty chains to station.

"Thence east, twenty chains to station.

"east, north; at forty chains and forty links intersects line between townships

"seventeen and eighteen south, range twelve east, at post in earth mound corner to "sections three, four, thirty-three and thirty-four; thence through township seventeen "south, range twelve east, over high and broken mountains with a variation of fifteen "degrees thirty-eight minutes east, eighty chains and forty links to quarter section "post in earth mound between sections thirty-three and thirty-four. Station.

"Thence through section thirty-three, with a variation of fifteen degrees twenty- "seven minutes east, west forty chains to center of section thirty-three, from which a "marked cedar tree, eight inches diameter, bears west, distant forty chains. Station.

"Thence through middle of sections, with a variation of fifteen degrees thirty-eight "minutes east, north at forty chains post in earth mound at quarter section corner "between sections twenty-eight and thirty-three one hundred and twenty chains to "post in earth mound at quarter section corner between sections twenty-one and "twenty-eight, two hundred chains to a sandstone twelve inches long, ten inches wide "and eight inches thick, in a rock mound in deep rocky gulch, from which a steep "rock cliff bears north forty-five degrees east; said sandstone is set for quarter section "corner between sections sixteen and twenty-one; thence over alkali hills two hun- "dred and eighty chains to quarter section post in a mound of alkali soil between ', sections nine and sixteen. Station.

"Thence with a variation of fifteen degrees fifty-nine minutes east, west forty 11 "chains to post in mound of alkali soil, corner to sections eight, nine, sixteen, and "seventeen. Station.

"Thence on section line with a variation of fifteen degrees thirty-eight minutes east, "north forty chains to quarter section post in mound of alkali earth. Station.

"Thence through section eight, with a variation of fifteen degrees fifty minutes east, "west forty chains to center of section eight. Station.

"Thence with a variation of fifteen degrees thirty-eight minutes east, north forty "chains to a sandstone rock twelve inches long, ten inches wide and eight inches thick "in mound of alkali earth, quarter section corner on line between sections five and "eight. Station.

"Thence on section line with a variation of fifteen degrees fifty-four minutes east, "west at thirty chains thirty-eight links enters the narrow valley of the Arroyo Pan- "oche Grande, at thirty-nine chains eighty-eight links across Arroyo Panoche Grande "fifty links wide course north ten degrees east; thence over low hills, forty chains and "thirty-eight links to post in mound at corner to sections five, six, seven, and eight; "thence on section line with a variation of fifteen degrees thirty minutes east, eighty "chains and thirty-eight links to quarter section post in earth mound, one hundred and "twenty chains and thirty-eight links to post in earth mound at corner to sections one, "six, seven, and twelve on line between ranges eleven and twelve east; thence through "range eleven east, one hundred and sixty chains and thirty-eight links to quar- "ter section post in mound two hundred chains and thirty-eight links to point 12 "of beginning, containing seventeen thousand seven hundred and sixty-eight "and seventy-seven one-hundredths acres, and being designated in the plat of public "surveys as lot number thirty-seven, township sixteen south, range eleven east, lot "number thirty-seven, township seventeen south, range eleven east, lot number "thirty-seven, township seventeen south, range twelve east, and lot number thirty- "seven, township eighteen south, range eleven east, all of Mount Diablo meridian.

"In witness whereof I have hereunto signed my name officially, and caused [SEAL.] "the seal of my office to attached, at the city of San Francisco, this eleventh "day of September, one thousand eight hundred and sixty-two.

"E. F. BEALE,

"*U. S. Surveyor General, California.*"

And whereas, application having been made for the issue of a patent upon the 13 foregoing survey, the Secretary of the Interior, under date of 29th December, 1862, rendered his decision, in which, upon recital in substance of the proceedings had in the matter and review, it is held as follows: that "the decree of the district court for the southern district of California, confirming the grant, has become final;" that "the United States has no longer any interest in the controversy;" that "no claim of third parties has been interposed;" that "the suggestions of fraud in the grant, or in the manner of procuring its confirmation, are *res adjudicata*," and he is "unable to discover any reasons why a patent should not be issued in conformity with the decree of the court and the survey," and ordered the issue of "a patent for the land in accordance with the survey as reported by the surveyor general."

Now know ye, that the United States of America, in consideration of the premises, and pursuant to the provisions of the acts of Congress and decisions aforesaid, have given and granted, and by these presents do give and grant unto the said Vicente P. Gomez, and to his heirs, the tract of land embraced and described in the foregoing survey, with the stipulation that said survey under the aforesaid act of June 2d, 1862, shall "be taken as *prima facie* evidence only of the true location of the land granted," and with the further stipulation that, in virtue of the 15th section of the said act of

March 3d, 1851, the confirmation of this said claim and this patent "shall not affect the interest of third persons."

To have and to hold the said tract, with the appurtenances, unto the said
14 Vicente P. Gomez, and to his heirs and assigns, forever, with the stipulations aforesaid.

In testimony whereof, I, Abraham Lincoln, President of the United States, have caused these letters to be made patent, and the seal of the General Land Office to be hereunto affixed.

Given under my hand at the city of Washington, this ~~fourteenth~~ day of ~~March~~, in the year of our Lord one thousand eight hundred and ~~sixty-three~~, and of the independence of the United States the ~~eighty-seventh~~.

[SEAL.]

By the President: ~~ABRAHAM LINCOLN~~.

Not signed.

By: ~~W. O. STODDARD~~, *Secretary,*
~~*Acting Recorder of the General Land Office.*~~

NOTE.—The words in the margin, "*not signed*," and the erasures of the dates, and crossing of the signatures, are in pencil.

[NOTE.—The following paragraph is written in red ink across page 13 of the patent:]

[DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
July 25th, 1870.

This record, from pages 312 to 321, inclusive, was made in accordance with the custom at the time, in anticipation of the original being submitted to the officers whose duty it is, under the law, to sign land patents, but an order dated March 13th, 1863, having been received from the Acting Secretary of the Interior, to "suspend the execution and delivery of the patent under the decision of" the "Department of the 4th" of March, 1863, "until further advised in the case by the Secretary," the form of patent which had been prepared, and from which the aforesaid record was made, was not submitted for signature, and has never been dated, signed, nor delivered.

JOS. S. WILSON, *Commissioner.*

J. N. GRANGER, *Recorder*]

WASHINGTON, DISTRICT OF COLUMBIA,
January 10, 1871.

W. O. STODDARD sworn and examined.

By the CHAIRMAN:

Question. State your place of residence.—Answer. New York.

Q. State, if at any time, you were secretary to the President of the United States, to sign land patents?—A. I was to Abraham Lincoln.

Q. State when you were appointed?—A. I was appointed April 1, 1861, by the President, and afterward, on the 16th of July, 1861, by and with the advice and consent of the Senate. These are the dates of my commissions.

Q. State how long you continued to hold the office of secretary?—A. Until September 24, 1864.

Q. State whether at any time you signed any patents under the direction of President Lincoln, by your own name as secretary, and in his name?—A. I did a number of them.

Q. You will look at the record now shown you, ending on page 321 of California Land Claims, coming to us from the General Land Office, and state to the committee what you know, if anything, about signing a patent corresponding with that there recorded, if you have not already examined it?—A. I take this to be the same record which I have already examined; I have now examined it also. I remember signing a patent for Panoche Grande in the spring of 1863.

Q. State whether, about the same time, you recollect having signed any other patents; and if so, how many by order and direction of the President?—A. I remember the Panoche Grande patent as one of three brought to me about the same time, so that I remember them together.

Q. What month in 1863?—A. March, as near as I can now recollect; and I could not be particular as to the exact date except by having referred to the records.

Q. Can you recollect and state to the committee what the other two grants were? that is, for what tracts and to whom made?—A. I can only recollect one of them without having refreshed my memory by referring to the record, which I have in respect to the other.

Q. State the one you recollect independent of having referred to the record?—A. The name of that is Honecut. The other I find, by referring to the record, is Canard de Parle.

Q. Can you recollect whether you signed all three on the same day?—A I cannot be

positive about that. It was on or about the same date, so that I remember them together in the same connection.

Q. Looking at that record and to the signatures, state to the committee whether that record shows the manner in which you appended the two names to the grant for the Panoche Grande rancho?—A. That was the customary way of appending the signatures.

Q. State whether that is the way in which you signed that grant?—A. I never vary; I was particular about that.

Q. Will you state to the committee whether you made any examination of this grant for the Panoche Grande rancho at the time you signed it; whether you looked into it?—A. I did.

Q. State any reasons which operated upon your mind, which induced you to take notice of it, any circumstances which enables you to remember more particularly about it?—A. I was very apt to examine the large patents, and this one was a large one. I called the attention of others to it at the time. I called Mr. John Hay's attention to it, and I have tried very hard to remember the names of the others who were in the room and whose attention was also called, but I do not remember them at this distance of time.

Q. Where was it you that signed these patents?—A. At the office at the Executive Mansion.

Q. After you had signed do you remember to whom you delivered them, or how you disposed of the patents after they were signed?—A. In almost all cases a messenger from the Land Office came up and took them back. There were a few instances in which I sent down patents by a messenger from the White House; which was done in this case I do not know.

By Mr. ELDRIDGE:

Q. Do you know that it was sent to the Land Office?—A. Only that I was always particular to see that my patents were sent back. I know that I performed my duties regularly. That is all the recollection I have about it.

By the CHAIRMAN:

Q. Look at the copy now shown you of an unexecuted patent brought here from the General Land Office, referring to the same record but without the signatures to it, and state whether you have seen the original draft, or unexecuted patent as it now is in the Land Office, at any time, and examined it before to-day?—A. I have.

Q. State how it compares as to its text, and the material upon which it is written, &c., with the original which you say you signed, as secretary for President Lincoln, for the same tract of land?—A. I have no recollection whatever as to the body of the patent. The material strikes me as about the same in size and general exterior appearance, with this exception: I had a pretty well-defined image in my mind of this lettering on the outside, and this which appears on the outside now does not appear to me to be familiar; it does not seem to be the same.

Q. That is the lettering of the envelope or cover?—A. Yes, sir. On the inside I find a map. There was a map to the patent I signed. I do not find the signature of the President nor the seal of the General Land Office.

Q. Was the seal of the General Land Office on the patent when you signed it.—A. It is my impression that it was; I do not want to be too positive about it; possibly I may be mistaken. It happend about five or six times that the seal was put on by accident, haste, or something of the kind before the patent was brought to me. It may not have been more than three or four times, but it is my impression that this was one of the times, but I cannot be positive.

Q. Look at the concluding page of this unexecuted patent, which you will observe is blank as to dates, and state whether the patent you signed had its dates filled up in writing like the rest of the patent, or not.—A. I think I should have noticed their absence.

Q. Have you any doubt about it?—A. Not at all. I should have noticed their absence. I do not remember ever signing a patent in any case that was not filled up, as to dates, in writing. I think I may safely say I never did.

Q. Have you examined that record? If not, examine it now and say whether the other two patents, to which you refer as having been executed about the same time, are recorded there or not.—A. I believe they are recorded, whether in this book or not I do not know. I asked about that when, and went to the Land Office to examine the record, and I found the date of one was on the 16th and the other on the 14th. That was my recollection, and I found that my memory was correct. I am not sure whether they were recorded in this book or not.

Q. During your term of office, and after the expiration of your term of office, did you have your attention called by anybody again to this patent for the Panoche Grande rancho?—A. I do not know. I would not say I did. I do not remember it.

Q. State, if you please, after examining carefully the body of that unexecuted patent

now before you, whether or not, in your judgment, it differs from the patent you signed, and to what extent and in what particulars does it differ, either as to words or appearances?—A. I should say that the date must have been on the patent I signed. I put the name of the President, Abraham Lincoln, upon it, which is not here, and I put my own name upon it, which is not here; and, according to my recollection, there was a seal, which is not here. That, however, I am not positive about. On all the patents which I signed I wrote, "Abraham Lincoln, by W. O. Stoddard, secretary."

Q. You will notice that on the record it reads, "Acting recorder" of the General Land Office, and on the original brought before us it reads, "Recorder of the General Land Office." Do you remember whether the paper, to which you put the name of the President and of yourself, had "Acting recorder of the General Land Office" upon it?—A. I do not remember anything about it.

Q. State whether you remember that it was the custom at the time, or not, to present patents to you with the name already countersigned, ———, "Recorder" or "Acting recorder" before you signed?—A. I do not recollect any such instance.

Q. State how the patent you signed, for the Panoche Grande Rancho, was bound up, if you recollect.—A. In the usual way for patents of that size and class.

Q. State whether it was bound in the same manner, and with the same kind of material, as the one now before you?—A. I think wider ribbon was used, with long ends to come under the seal. When I saw this patent I noticed that difference and asked the clerk in the Land Office, Mr. Stoek, about it. He said this was what they used sometimes, and sometimes they used a different one. I am inclined to think that at that time they were using a wider ribbon.

Q. Was anything said about using this cover at the Land Office when you were making your examination?—A. Yes; and I told the clerk it did not look familiar in any way. He said, no, I had never seen it before.

Q. Look at this unexecuted patent and say, when you have examined it, whether there are additional perforations in the paper?—A. I examined it in that respect when at the Land Office.

Q. How many did you find without ribbon in them when you examined it?—A. I did not count them; I just saw that there were perforations.

Q. Look at them and say how many appear to be there now?—A. There appear to be five on the outside and nine on the inside. The perforations appear to be through all the sheets except the cover.

Q. State whether upon an examination of the original unexecuted patent, now before you, from the General Land Office, there are perforations not filled with ribbon in all the leaves of the patent, except the cover, and how many are not filled with the ribbon.—A. There are five holes in the cover and nine in all the other sheets.

Q. Are there any holes in the cover which are not filled with ribbon?—A. No, sir.

Q. What number of perforations are there in the leaves of the patent that are not filled with ribbon?—A. Four.

Q. In the last leaf of this unexecuted patent, state how many perforations there are.—A. Nine.

Q. And the same number in each of the other leaves, except the cover, and five in each of the leaves of the cover?—A. Yes, sir.

Q. State, upon an inspection of this paper, whether the four perforations in the other leaves are so made as to indicate that they were to have been filled with ribbon in fastening together or binding the leaves?—A. They seem to have been put there for that purpose. That is all I can say.

Q. You may state now your opinion whether the wrapper and ribbon and indorsement of the wrapper of the unexecuted patent from the Land Office, before the committee, now shown you, are the same as were on the patent to which you signed the President's name, and your own as secretary.—A. My opinion is that they are not.

Q. You have already stated your recollection of the difference between the last leaf of the unexecuted patent, now before you, and that which you signed, the absence of date, seal, &c.—A. I have stated the difference.

By Mr. LOUGHRIDGE:

Q. How many perforations do you think there were in the leaves of the patent which you think you signed?—A. I could not tell. I should never have dreamed of counting them.

Q. Do you know whether there were not just the same number, and just the same number in the cover, as in this?—A. No, sir.

Q. What can you state of the cover or ribbon on the other two patents which you signed about the same time?—A. My impression is the same in regard to them, that there was a brighter ribbon.

Q. Do you mean that the color of the ribbon was brighter?—A. My impression of the patent I signed is, that it had a brighter and wider ribbon than this. That was the kind used at that time.

Q. Was the ribbon on the three you signed at that time lighter in color?—A. I cannot state except from general impression.

Q. Do you remember the color of the other two?—A. I have no recollection of any difference. The impression upon my mind is that a brighter and wider ribbon was used at that time.

Q. How many patents did you ever sign?—A. I do not know.

Q. Give some impression.—A. It would be impossible. In 1861 there were a good many; in 1862, very much less; in 1863, very few indeed, and almost none in 1864. It would be impossible to give any estimate of the number. Sometimes there would not be any for a good while, and then again there would be a rush of them.

Q. Can you remember the color of the ribbon on all those you signed?—A. There was no ribbon on any of those I signed, except the large ones, probably not more than a couple of dozen during the whole time I was in office.

Q. Do you know whose handwriting the patent was in which you think you signed?—A. No, sir.

Q. Do you know in whose handwriting that copy is in?—A. I have been told.

Q. Was the one you signed in the same handwriting?—A. I could not tell.

Q. Why could you not remember that as well as the color of the ribbon and the writing on the back of the patent?—A. I think that answers itself. A man picking up a patent sees the indorsement on it, and sees the ribbon with which it is bound, before he would examine the writing inside.

Q. Did you examine the writing inside?—A. No, sir; I had no occasion to.

Q. And you do not know what was inside at all?—A. Except the signature and dates, and the fact that there were a number of pages of manuscript parchment, as was customary in patents of that kind.

Q. In looking at the dates, would you not be likely to see the handwriting?—A. I would see the handwriting in which the dates were written.

Q. You saw the handwriting in this patent?—A. I presume I did.

Q. Have you any remembrance whether it was the same as that of this copy?—A. I have no recollection about it.

Q. Why would you not be as likely to remember that, when your attention was called to it, as you would the color and width of the ribbon with which it was bound?—A. I do not know that I can answer that question. I do not know.

Q. There is, then, no reason that you can give?—A. None but what would be evident to the eyes of any one.

Q. I understand you to say the only reason you think you signed that patent is that you always signed all the patents presented to you; do you not have any remembrance expressly of signing that paper?—A. That was not the statement I made.

Q. What is your statement?—A. If the clerk will read it, you will see.

Q. You will please state it yourself.—A. That I remember Panoche Grande as one of three patents signed by me in the early part of 1863—in the spring of that year. I think that was my statement.

Q. Did you state positively you remembered having signed it?—A. Yes, sir.

Q. Was that your statement before?—A. That was my statement before; yes, sir.

Q. Who brought that patent to you?—A. It came in the usual way.

Q. From whom?—A. From the Land Office.

Q. From whom in the Land Office?—A. From the officer whose business it was to send these patents to the President. They came to me by messenger, with a letter. That is about all I would know about it.

Q. Who was the letter from?—A. From the Commissioner of the General Land Office.

Q. Do you know in whose handwriting?—A. I only know the signature, which was that of the Commissioner of the General Land Office. I suppose the handwriting was that of one of the clerks in the office.

Q. Was there any clerk in the Land Office whose business it was to enroll such patents?—A. I do not know what you mean by enroll; I have never seen a patent before it was written.

Q. That is witty, but not an answer to my question. Patents are engrossed, are they not?—A. Engrossing is what I would call preparing for signature; if you had said engrossed, I should have understood you. I suppose it was done by some one assigned to that duty in the Land Office.

Q. Was there any one in the Land Office at that time who had that duty to perform specially; and if so, who was it?—A. I do not remember, if I ever knew.

Q. Is your memory good?—A. Not good enough to remember the assignment of clerks to duty in the Land Office.

Q. My question was, is your memory good?—A. I think it is.

Q. Do you know Mr. Stokes in the Land Office?—A. I know a Mr. Stokes.

Q. What was his business in the Land Office?—A. He was a clerk there.

Q. Had he anything to do with enrolling those patents and sending them to you?—A. I think he was a recording clerk, from what I have heard lately.

Q. Are you acquainted with his handwriting?—A. Not so as to identify it.

Q. What was done with that patent when you signed it ?—A. I always sent my patents directly back to the Land Office, and this must have gone in the same way.

Q. Then you sent it back to the Land Office?—A. According to my custom, from which I never varied. That is the only recollection I have.

Q. Let me understand what it was you signed. You have sworn that you signed something. What was it that you signed?—A. A patent for lands, such as I was in the habit of signing.

Q. A patent for what lands?—A. That I cannot tell.

Q. To whom was that grant made?—A. That I do not know.

Q. Then what do you know?—A. I know that I signed a patent for lands.

Q. You signed a great many patents for lands?—A. I did.

Q. But you do not know to whom or for what lands?—A. No; of course not.

Q. Can you swear that you read a word inside the leaves of what you say was a patent, or supposed to be one?—A. Of course I can, for I read the signing clause. I glanced at the map. Beyond that, I merely noticed a mass of writing and leaves.

Q. And read none of it?—A. And read none of it, except that, seeing that it was a large patent, I glanced at it to see the number of acres and description, as was frequently my custom in these large patents.

Q. You do not remember the number of acres?—A. No; I recollect that it was a very large and valuable patent. I do not recall any one of the patents I had occasion to examine in which I could recollect distinctly the number of acres; and I do not remember the number of this. I have the general impression of it that it was a very large and valuable one.

Q. Did the others of the three patents you have alluded to contain maps?—A. My recollection is that they did.

By Mr. LOUGHRIDGE:

Q. I understood you to say in answer to my question that you did not look into that patent at all, except to glance at it and see that it was for land.—A. I did not make that answer in that form.

Q. Did you see that patent or read any part of it, except at the end of it where you signed?—A. I have answered that question to the gentleman who spoke last. I cannot swear to any other examination of the patent; but it was my custom to look through these large patents, and I presume I did in this case, because I got the impression that it was a large and valuable patent. That is my answer, and I cannot be more minute about it.

Q. You got that impression from the size of the bundle and the general appearance of it, did you not?—A. I cannot say. That is the very point I am making, that I cannot say how I got my impressions.

By Mr. PETERS:

Q. Did you not state a moment ago that you could not say in whose handwriting that patent was, because you had no recollection of having read it, or any part of it?—A. I have no recollection of the handwriting.

Q. Did you at that time ordinarily know the handwriting of the party in whose hand these patents were written?—A. There were some of the clerks whose hands I knew. Others I did not know.

Q. And you cannot say now whether this particular handwriting was one you were familiar with or not?—A. I cannot. I can say very positively that the handwriting of some of the clerks was familiar to me—I know it when I see it. That of others I do not know. I cannot say whether the handwriting of this patent was familiar to me or not.

By Mr. LOUGHRIDGE:

Q. Did you ever execute the President's name to a patent to William McGarrihan?—A. Not that I know of.

By Mr. KELLOGG:

Q. You spoke a moment ago of a letter from the General Land Office accompanying patents for your signature; did such a letter always accompany each patent?—A. Each patent or package of patents inclosed or transmitted.

Q. Then no patent was practically in form for your signature without a letter accompanied?—A. Certainly not.

Q. And you think a letter from the General Land Office accompanied this particular patent?—A. Certainly.

Q. What was done with that letter?—A. I kept my letters for a long time, and then they were lost or destroyed.

Q. Were letters of that kind lost or destroyed?—A. Yes, sir; I considered them of no further value.

Q. Was a record of this kept in the Land Office?—A. There should have been.

Q. These letters were copied, and there should be a copy in the General Land Office?—A. There should be.

By Mr. PETERS:

Q. Have you looked there to see if there was such a record?—A. I have.

Q. Did you find it?—A. I have been unable to find it.

Q. Was there a book, and did you examine such a book in which such letters were regularly recorded?—A. I examined what I was told was such a book.

Q. Did the book bear any evidence of mutilation?—A. No, sir, no mutilation, but a great many blunders.

Q. Did you discover evidence of a page having been torn out, or anything of that kind?—A. No, sir.

Q. When you say errors, do you mean errors in copying?—A. I do.

Q. When was your attention first called to this matter, since the date of your signing this patent?—A. The first that I recollect, was last summer.

Q. You never were applied to before?—A. I cannot say as to that. I was applied to last summer, and whether I was spoken to on the subject during the intervening time, I cannot say, but I am very sure I never was.

Q. Your attention had never been called to it from the date of your signing it until some time last summer?—A. Not that I now recollect.

Q. Who called your attention to it last summer?—A. I was first called upon by a gentleman of the name of Frank.

Q. Connected with the party petitioner here?—A. I believe he is; I am not sure of that fact.

Q. Was there any particular difference in the size, or shape, or general appearance of the three patents you speak of?—A. My recollection is that this was the larger patent; not larger in the size of the sheets, but having a greater number of sheets.

Q. Was it your practice to sign patents without special direction of the President in each particular case?—A. Yes; but never without an accompanying letter from the General Land Office; I required no other direction or instruction.

Q. So that these patents did not come under his personal observation?—A. Not that I know of.

Q. But if they were executed, it was at the instance of the General Land Office; and they were returned there?—A. Yes, sir.

By Mr. ELDRIDGE:

Q. Who was Commissioner of the General Land Office at that time?—A. J. M. Edmunds, I think.

Q. How long did he remain Commissioner after that time?—A. He was there when I left Washington; when he finally left the office I do not know; I think he was Commissioner when I went away in 1864, if I remember correctly.

By Mr. LOUGHRIDGE:

Q. Have you any interest in this grant?—A. No, sir.

Q. Direct or indirect?—A. None, direct or indirect.

Q. Have you any interest in Panoche Grande?—A. No, sir.

Q. Who was this Frank who talked with you about this matter?—A. I am informed that he is in business for himself, but what his business is precisely I do not know. He is a resident of New York, and a broker of some kind. His office is down in Water street.

Q. What is your business now?—A. I am secretary of the Tehuantepec Railroad Company.

By the CHAIRMAN:

Q. You stated that you noticed a difference in the indorsement on the back of this unexecuted patent from that on the back of the one to which you signed the name of Abraham Lincoln by yourself as secretary; state clearly and distinctly what that difference was.—A. I remember the words "Panoche Grande," but I expected to see it in letters about the size of the indorsement on this, but slanting backward instead of perpendicular, as I find them here. The impression I have may have been wrong or right, but that was the impression on my mind, and what I expected to find.

Q. Have you any doubt on your mind that the indorsement on the patent which you signed was "Panoche Grande?"—A. No, sir.

By Mr. ELDRIDGE:

Q. Did you look at the map so as to fix it in your mind?—A. I did look at it; but I do not recollect anything about it. I expected to have a more distinct recollection of it when I came to see it.

By Mr. LOUGHRIDGE:

Q. Is it not a good while from that time until now to recollect the exact position and slant of letters?—A. Yes, sir, it is.

Q. Do you remember it distinctly, without having your attention particularly called to it?—A. No; I do not think I would if my attention had not been particularly called to it.

Q. What called your attention particularly at the time to the slant of these letters?—A. That I cannot tell. I merely know that my attention was called to it; I cannot tell how.

Q. Particularly called to the slant of the letters?—A. No; to the general appearance of the patent.

Q. But you testify, after this number of years, as to the particular slant of the letters.—A. No; I did not state that. I merely said that I expected to find that.

Q. You did not say the letters of the indorsement of the patent which you think you signed were more slanting in the manner in which the letters were written than it appears on this unexecuted patent?—A. I did not say absolutely.

Q. You cannot swear, then, that they were not just exactly like these?—A. I do not think they were. I do not think it is the same. I could not say more than that, because, as you say, it is a small thing to remember.

By Mr. ELDRIDGE:

Q. Is there anything about this map that resembles the one you saw at that time; is there anything by which you can identify it?—A. I could not identify it at this time.

Q. What is your recollection about it?—A. That it was a map of this general character.

Q. Is there anything else—in the number of acres or otherwise—that would enable you to identify these papers?—A. No; my impression, as I have stated, is, that it was for a large number of acres; but whether that impression was derived from the map or otherwise, I am unable to say.

Q. Had you any other means of gaining information of the number of acres, except from the papers presented to you?—A. Not that I now remember.

Q. Do you recollect distinctly that the patent which you signed was a patent for Panoche Grande?—A. I have already replied to that. I do.

By Mr. LOUGHRIDGE:

Q. Do you say that you remember that that was a patent for Panoche Grande?—A. I have sworn that my recollection is, that it was indorsed "Panoche Grande" on the outside.

Q. That is all you know?—A. I have not said that was all I know. I may have other things in my head that are not distinct enough to swear to.

WASHINGTON, *January* 10, 1871.

JULIUS N. GRANGER sworn and examined.

By the CHAIRMAN:

Question. State whether you are recorder of the General Land Office of the United States.—Answer. Yes, sir; I am.

Q. State how long you have filled that office.—A. I think I was appointed in 1853.

Q. State whether you have been recorder from that date to this.—A. I have.

Q. Under the law you are required to countersign patents for the Land Office?—A. Yes, sir.

Q. You countersigned patents for private California land grants, as well as other land grants?—A. Yes, sir; I have no records of the California land grants, or of private land claims. All other grants come under my charge for record.

Q. State to the committee whether you have countersigned on the face or back of the patent, or whether you are certain in regard to that.—A. It is always done on the last leaf of the patent, although the last leaf sometimes contains nothing more than the attesting clause.

Q. Do you mean that you always countersign on the same leaf or page?—A. I always countersign on the last leaf of the patent.

Q. Do you know whether the patent for Panoche Grande was ever presented to you, or not, to be countersigned?—A. No, sir; I could not say whether it was or was not.

Q. You kept no records of cases for California land grants, which you countersigned, except of the letters of transmission?—A. Nothing, except the letters of transmission.

Q. Are these letters of transmission sent to you by the Commissioner of the General Land Office before you countersign the patent?—A. Yes, sir; always.

Q. Are you prepared to say whether there was or was not a letter of transmission, when the patent for Panoche Grande was sent to you?—A. I could only say that I never signed it without there was a letter.

Q. Are you prepared to swear whether such a letter was sent to you?—A. No, sir; I am not.

Q. Do you keep a file of these letters in your office.—A. I do keep them on file.

Q. Have you made an examination of your files to see whether this letter is there on file?—A. I have.

Q. State whether you can find any such letter.—A. I can find no such letter.

Q. State in what way you keep those letters in your office?—A. I will state precisely: I place them in a drawer in my desk, where they remain until a considerable number has accumulated. I then take them out, bind them, and place them in my book-case.

Q. State whether you have looked in your book-case for this letter?—A. Yes, sir; and also in my drawer.

Q. State whether you have made more than one examination of your book-case, and with what result.—A. The first time I made an examination was last summer, when I was called upon to know if there was such a letter. That was the first I heard anything about it. I looked the letters all over carefully, but did not find this letter. Sometimes the letters would become disarranged, or run over into another year, and I looked through tolerably careful, and noticed that there were letters for that year, 1863, which were missing.

Q. State whether you have made an examination since that time.—A. Yes, sir. I took the letters out and put them together in the year in which they were written, and I found that in 1863 there were no letters from January down to June. The files of that year from July until December were all there.

Q. State whether you are satisfied that between January and June, 1863, there were letters transmitted to you and filed by you in the regular course of business in your office.—A. I know there were such letters. I have taken great pains, for this is something that came unexpectedly upon me, to refresh my mind, and I find that there are fifty-one letters of transmission of land grants, under different acts, for my own division, between January and June, 1863. There were, of course, more patents than that. Sometimes a single letter would inclose a large number of patents. The letter would simply say, "Your signature is requested to series of patents from number such a one to number such a one." That was all there was of the letter.

Q. Then you say there were fifty-one letters of transmission which have been taken from your office?—A. They certainly must have been taken, at least I have had them, but cannot now find them. They are out of my office, I am confident.

Q. And letters coming to you from January to June, 1863?—A. Yes, sir.

Q. Have you any knowledge of what has become of them?—A. I have not.

Q. State to the committee whether from an examination of your desk and lock there is any evidence of there having been any interference with the lock or keys in any way.—A. I could not say that there has been any interference with it. It is a very common lock, which can be opened with a very common key. I always kept it locked. I ascertained this just on Saturday last, and yesterday when I came to my office I wanted to make a careful examination, for I knew there had been a large number missing from the files of the year 1863, and I wanted to see if I had these letters on record.

Q. You made no record of the transmission of private land claims?—A. Never. I kept the letters themselves. When I went to my book-case yesterday morning to look over my files again and compare them with the letter book, I found an old key in the lock, and the lock very much disturbed. The key I found was an old brass key, which was in the lock of my book-case; it had evidently been used to unlock the lock, and then pulled back to get it out again. It remained in the lock.

Q. Was that your key?—A. No, sir. I inquired carefully of others, and could find no one who had any such key.

Q. Where did you find this key?—A. In my book-case, where I keep my files.

Q. And what did you say in regard to its use?—A. It had evidently disarranged the lock, so that the key could not be drawn out without a good deal of trouble.

Q. When did you first make the discovery that these letters of transmission had been taken out of your possession?—A. Last summer; but I had not settled down in my mind that they were really lost. I expected to find them in some other place. I made the discovery in looking, after the adjournment of Congress, in regard to some matters before the courts, and I then had the letters overhauled and put into the files for the year in which they were written.

Q. Have you heard the testimony of Mr. Stoddard before the committee to-day in regard to California land grants?—A. Yes, sir; I heard most of it.

Q. Can you state to the committee whether there is a record of the other two grants referred to by him?—A. No, sir. I never looked over these private land grant records.

By Mr. ELDRIDGE:

Q. Have you found all the other letters in your files?—A. I have not gone through them all to see whether they are all there; but they are all arranged for their respective periods in files of about the same size, and I have run them back in that way to 1856, and judge from the size they are all there except from January to June, 1863.

By the CHAIRMAN:

Q. Look at the indorsement made upon this record book, page 321 of California land grants, volume 4, and state whether the signature "J. N. Granger, recorded," attached to it, is your signature.—A. Yes, sir; it is.

Q. State whether it was written at the date it purports to have been.—A. Yes, sir; it was written July 25, 1870.

Q. What is there written across the face of this record of the Panoche Grande land grant?—A. "Department Interior, General Land Office, July 25, 1870." This record, from pages 312 to 321 inclusive, was made in accordance with the custom at the time in anticipation of the original being submitted to the officers whose duty it is under the law to sign land patents. But an order dated March 13, 1863, having been received from the Acting Secretary of the Interior to suspend the execution and delivery of the patent, under decision of the Department of the 4th of March, 1863, until further advised in the case by the Secretary, the form of patent which had been prepared, and from which the aforesaid record was made, was not submitted for signature, and has never been dated, signed, nor delivered—signed by the Commissioner of the General Land Office and by myself.

Q. State to the committee whether you know it to be true that the form of patents from which this record was made never was dated.—A. No, sir, I do not.

Q. Do you know that it is true that the original patent from which this record was made was not dated?—A. No, sir, I do not know anything about it, and so stated at the time. I signed this certificate under the written order of the Secretary, and the verbal order of Mr. Wilson, that I should sign the certificate as written. I did not like to sign it for the reason that I did not know anything about it; but I took it as a matter of official honor that it was all right.

Q. What Secretary did you refer to?—A. The Secretary of the Interior, J. D. Cox. I was called to the room of the Commissioner without knowing what for. I was shown the order of the Secretary and directed to sign the certificate.

Q. Do you know that the form of patent which had been prepared, and from which the aforesaid record was made, had never been submitted for signature?—A. No, sir, I do not know whether it had or had not been.

Q. Do you know that the form of patent which had been prepared, from which the aforesaid record was made, had never been sent?—A. No, sir; I do not know whether it had ever been sent or not.

Q. You did not know these facts to be true when you signed this certificate.—A. No, sir, I did not. I signed it on the written order from the Secretary requiring me, and signed it under the verbal direction of Mr. Wilson.

Q. You mean Joseph S. Wilson, Commissioner of the General Land Office?—A. Yes, sir.

Q. State whether or not his signature to the certificate was made in your presence?—A. No, sir; it was signed by him before I came into the room.

Q. State anything he said to you when you came into the room.—[Question objected to by a member of the committee and withdrawn.]

Q. Did Mr. Wilson direct you to sign it?—A. Yes, sir; he did.

Q. Did you protest to him that you did not know the facts stated?—A. I made the remark, and I believe Mr. Stoek was present. I took it as a matter of course that it was all right. I did not know the facts because they did not come under my supervision at all. I had never seen the record before and knew nothing about the matter.

Q. State whether you are acquainted with the handwriting in pencil on the margin of this record?—A. I do not know that I am acquainted with it. I may be, but I could not identify it.

Q. Do you know when it was put there?—A. I do not.

Q. It is in pencil, is it not?—A. Yes, sir.

Q. You do not know when the pencil line was drawn across the figures 14th?—A. I do not. I had never seen the record until then.

Q. And you do not know anything about it?—A. No, sir. I might state one circumstance which may have a bearing here, and which may not. It seems from my records that I was absent from the city from the 11th of March, 1863, up to the 1st of May following, and I find from my memoranda that I was with my family, who were sick in New York, and that during this time the acting secretary signed the letters.

By Mr. MERCUR:

Q. Who received these letters while you were away?—A. Mr. Buell, the acting secretary. He continued to act in my place until about the 1st of May; but it had been his custom always to file the letters received by him with me, and I believe he testified, on a former occasion, that he did file them with me on this occasion.

Q. Do you say that he gave the letters, during this period, to you?—A. He was in the habit of doing it. I asked him yesterday if he always returned these letters to me, and he stated that he did. I have no doubt that he did, or believed he had done so.

Q. Can you state how many were recorded in your absence?—A. I could not do that precisely; I took no memorandum. I noticed the date when I commenced signing again; there were quite a number.

Q. I understand you to say that none of the letters are to be found from January to June?—A. None.

Q. Have you any record of the transmission of California land grants?—A. No; I never had any record of them.

Q. This record is marked "acting recorder of the General Land Office;" state in whose handwriting it is made.—A. I believe this to be in the handwriting of Mr. Stoek.

Q. Has he been record clerk long in the Land Office?—A. I think since 1861.

Q. State whether he is a careful and accurate recorder?—A. He is a very careful copyist. When I wanted any copying done with more than usual correctness, in my division, I always gave it to him. He was very careful and followed copy exactly. He was very trusty in that respect, and I think it was because of that reputation he had that he was taken from my division.

Q. What do the letters on this record, "E, X, D," indicate?—A. That indicates that the record had been compared with the patent and found to be correct.

Q. By whom is that comparison made?—A. In my division we have an examining board of three clerks who do it. I do not know how this is done in the records of private land claims.

Q. The object of comparing is to ascertain if there is any decrepancy between the record and the patent?—A. Yes, sir.

By Mr. ELDRIDGE:

Q. When that is done is the patent completed?—A. Yes; it is complete so far as the record is concerned. The seal is not yet on, and formerly there was a custom in the office to sign the patent after the body of the patent and record was "examined."

Q. The date and everything of that kind is filled in?—A. It has been practiced heretofore, to complete the examinations and comparison of the patent and record before the President or recorder's name was affixed, so that no incorrect patent should bear their signatures.

Q. How long did it take to make this record, from page 312 to 321?—A. Mr. Stoek is a very slow writer. He was probably three days making that up; he writes very slowly and very carefully.

By Mr. KELLOGG:

Q. If I understand you correctly, you did not discover that the lock of your bookcase had been tampered with last summer?—A. No, sir; not until yesterday morning.

Q. If there had been all the letters, from January to June, taken out before yesterday, would you have known it?—A. Not unless my attention was called to it.

By Mr. PETERS:

Q. When did you first miss these letters?—A. I could not give the date—shortly after the adjournment of the last session of Congress.

Q. Before yesterday, of course?—A. Yes, sir; and I then made an examination, and arranged the letters carefully myself, so as to become satisfied that they were gone.

Q. Do you recollect making an affidavit on the 27th day of August, 1870, in which you stated "that this deponent has carefully examined the files in his office, and the records thereof, of letters transmitting patents for signature, and that there is no letter, communication, or other paper on said files, or in said office purporting to inclose any patent, or to request or direct the signature of the recorder to any patent for a tract of land in California, known as Panoche Grande, and that there is no evidence in said office that any patent for said tract of land, called Panoche Grande, was ever signed by this deponent as recorder, as aforesaid; and this deponent has no recollection of ever having signed any patent for said tract of land?"—A. I remember that distinctly.

Q. Is it true that you had then carefully examined the files in your office?—A. Yes, sir; I had examined them once, but not as carefully as I have since.

Q. When you have had important patents transmitted to you to sign, have you usually retained a recollection of them?—A. No, sir; I have not; I have signed so many of them, often from thirty-five to fifty thousand a year.

Q. You have no recollection whatever that you have signed a patent for this tract of land?—A. No, sir; my attention is rarely ever called to one of these land claims. Some of them cover very important grants; but I assume they are all right when sent to me from the private land claim room, and I assumed that when I signed this certificate across the face of this record without knowing anything about it, that was the truth of the case.

Q. You believed it to be right?—A. Yes, sir; I believed it to be right as a matter of official honor.

By Mr. ELDRIDGE:

Q. State whether the Secretary or President did not have to sign just as many patents as you did?—A. Yes, sir; just the same number.

Q. And how many do you say you signed?—A. During the war the sales of land became very light; since 1865 they have averaged from 36,000 to 45,000 a year.

Q. And you do not pretend to remember all that you have signed?—A. No, sir.

Q. How many during the war, or about 1863?—A. They ran down to probably 20,000 a year during the last war; I do not remember just how many in 1863; I think not more than 20,000, and probably not so many.

Q. How many of these California land claim patents probably in that year?—A. Probably not one in two weeks. Mr. Stoek, however, could answer that question accurately if you wish it.

WASHINGTON, D. C.,
January 16, 1871.

THEODORE F. STOKES sworn and examined.

By Mr. LOUGHRIDGE:

Question. State whether you made and signed an affidavit dated 29th of August last in regard to this claim?—Answer. Yes, sir. That was taken before Mr. Brown. I have now before me a printed copy of it.

Q. You may say whether the statements in the printed affidavit you have now before you are true or not?—A. They are true. I wish to say, however, that since I made the affidavit this record from the Land Office has had a certificate written across it in red ink, which is not in my handwriting, and which I did not make. I submit the printed copy of my affidavit to the committee as part of my evidence.

Q. Was there ever any other patent prepared in the Panoche Grande case than the one referred to in your affidavit?—A. I could not say.

Q. State whether there was to your knowledge.—A. I have no knowledge of any patent having been made in the office except the one that record is made from.

Q. Could a patent for this land have been made and duly executed, sealed and countereigned, in 1863, without passing through your hands?—A. Oh, yes, sir.

Q. Or without coming to your official knowledge?—A. Yes, sir.

Q. If that patent had been signed and not delivered, where would it have remained?—A. I presume it would have remained in the private land claims division. At the time that record was made I was clerk in the recorder's division. The mode of doing the business in our division was different from what it was in the private land claims division.

By the CHAIRMAN:

Q. You testified before this committee in this matter on a former occasion, did you not?—A. Yes, sir.

Q. Do you remember being asked from what you made the entry in this record of the signature of the President and Secretary?—A. I think I was asked that question, and think I stated that it was made in accordance with usage in the recorder's division.

Q. Do you remember having answered that it was a printed form that was made out?—A. I remember that in all California patents the granting clause was printed.

Q. Do you mean that you made that record from a printed form?—A. I think so. Yes, sir.

Q. Can you furnish that printed form?—A. No, sir; I cannot.

Q. Can you account for the description in the printed form which is in this record of the survey, &c.?—A. I can only say that I followed the copy.

Q. Can you produce the original you made this record from?—A. No, sir; I cannot.

Q. Do you say now that you know there was ever a printed form for California special cases?—A. No, sir; only from the manner in which I generally did business. I have written a great many patents for private land claims, and this form of patent was printed.

Q. You did not write the original from which this record was made at all?—A. I only made the record.

The copy of the affidavit referred to is as follows:

"DISTRICT OF COLUMBIA, *County of Washington*, ss:

"Be it remembered that on this 27th day of August, A. D. 1870, before the subscriber, a notary public in and for the county aforesaid, personally appeared Theodore F. Stokes, who, being first duly sworn, deposes and says that he is a resident of Washington, D. C., and is now and has been continuously since May 1861, a clerk in the General Land Office; that in the month of March, 1863, he was detailed to make a record of the form of patent that had been prepared for a tract of land in California called Panoche Grande; that the record in volume 4 of California private land claims, pages 312 to 321, both inclusive, was made by this deponent, and is in his handwriting; that it was the usage and custom in the recorder's division of the General Land Office, in which division this deponent was then a clerk, to make the record or copies of the patents before the signatures of the recorder and of the President or his private secretary were affixed thereto, and to make said records and copies complete in anticipation of the signatures of said officers, and as though said signatures had been already affixed; that to the best of the knowledge and belief of this deponent the record hereinbefore

referred to was made in accordance with said usage and custom, and to the best of the recollection and belief of this deponent said record was made by this deponent from a form or draught of a patent not signed by the President of the United States, nor by his secretary, nor by the recorder of the General Land Office, nor was the seal of the General Land Office affixed thereto; that this deponent is confirmed in this recollection by the fact that in said record the name of the recorder does not appear, and this deponent left the same blank because he did not know who would be the acting recorder on the day said form or draught of a patent should be actually signed. This deponent further says that he is not now, nor has he ever been, directly or indirectly interested in the claim of the New Idria Company, nor of William McGarrahan, nor of any other person or corporation, to said tract of land called Panoche Grande; nor did he know of the existence of said New Idria Mining Company at the time said record was made, nor for a long time thereafter.

"THEO. F. STOKES.

"Sworn to and subscribed before me this 29th day of August, 1870.

"EDM. F. BROWN,
"*Notary Public.*"

WASHINGTON, D. C., *January* 16, 1871

W. H. LOWRY sworn and examined.

By Mr. LOUGHRIDGE:

Question. You have in your hand a printed copy of an affidavit purporting to have been made by you in August last. Say whether you made that affidavit, and whether the statements it contains are true?—Answer. I made it, and the statements it contains, as printed, are true.

By the CHAIRMAN:

Q. Have you filed a paper in this case brfore this committee, dated August 12, 1868?—A. I do not know that I have filed any paper before the committee.

Q. Look at Executive Document 48, part 3, pages 151, 152, and 153, signed W. H. Lowry, for the New Idria Mining Company, and state whether you filed that paper?—A. This paper, I presume, from its marks, was filed with the Commissioner of the General Land Office. I filed a good many papers from time to time with him on that subject.

Q. Did you file it as attorney for the New Idria Company?—A. Yes, sir.

Q. You were at that time in the employ of this company contesting the title of McGarrahan?—A. I was in the employ of the New Idria Mining Company for the purpose of pressing their claim to a patent, without regard to any other claimant, at that time.

Q. Had it regard to this Panoche Grande rancho?—A. It must have had.

Q. That was an application for a patent to how much land?—A. For a three-quarter section, as I remember.

Q. When were you employed for the New Idria Company?—A. I think about the close of the year 1867.

Q. Have you remained in their employ ever since?—A. Yes, sir.

Q. Did you ever compare this record in volume 4 from the Land Office which is now before you?—A. In regard to Panoche Grande, I did examine it.

Q. I did not say examine it, I said compare it.—A. Yes, I did compare it.

Q. When?—A. It must have been about the date which is indicated by the pencil mark.

Q. Is there any pencil date to it?—A. There is a pencil date on the record, and that is the only way I can identify the time.

Q. When did that pencil date get into ink?—A. I think it is there in pencil now.

Q. Did you compare the record with the patent at that time?—A. I did. It was my duty at that time.

Q. When did you do it?—A. I cannot say exactly the date.

Q. Do you know what month?—A. Yes; I know very well the month, because it must have been about the time the order arresting the issue of the patent came to the Land Office.

Q. Do you know with what order or regularity they make up the records of these patents in that office?—A. I know what was my practice when I was there; I can say nothing of what has occurred since.

Q. Were you, or not, required to make comparison of the record with the original, whether there was an order of arrest or not?—A. I should not have done so, unless they were going to send the patent out to be signed.

Q. Were not all your records compared when made up by the examiner?—A. That was the general custom; but, if I had known that a patent was not going out to be signed I should not have examined the record.

Q. Had there not been an order to make up this patent for issue?—A. There had been two of them.

Q. Did you make this comparison before or after the signature had been affixed?—A. Our practice was to make the record before.

Q. Did you ever know a patent recorded and marked examined without any name appended to it?—A. I think that happened several times in my experience when we employed clerks outside of the division.

Q. Was that ever done without putting your name to it?—A. Yes; when I compared a record made with the patent and found afterwards that it was not issued or signed, I would strike out the signatures and write in pencil "not signed." This happened several times.

Q. Do you know of more than one case in this or any other record for land grants, where the record shows the signature of the President and Secretary and the seal of the Land Office, without the date, and on which the words "not signed," were written in pencil?—A. My attention has only been called to this one; I have no doubt there are several.

Q. Do you know of any other on this record?—A. I cannot call to mind any other special case, but I know it was my custom when I found that a patent had actually not been signed, to strike off the signature and dates.

Q. Do you know when Judge Otto's order to arrest the issue of this patent was received at the Land Office?—A. I do not. The record, I think, shows that it was about the 16th or 17th of March, perhaps. The letters on file also show.

Q. Who ordinarily writes the word "examined" on a record?—A. The man who holds the record for the comparison, and the man who holds the patent, in comparing, writes the same word on the patent.

Q. Has the indorsement on a record of the United States, "examined," any other significance than to certify that it is a true copy of the original?—A. The only significance it had in my experience was to show that it had been compared with the original patent.

Q. Then it meant that there was a patent corresponding with the record?—A. It meant that it was a true copy, except where it was marked otherwise.

Q. I ask you to state now whether there is any instance except the one you are talking about, in which the record of the United States shows "ex'd" on the face of the record, and where there is neither the seal of the office nor the signature of the President to it?—A. I have no doubt there is. That is all I can say about it. If I compared an unsigned patent with the record I marked it as examined. That was understood in the office.

Q. In whose handwriting is the word "examined" on page 312 of this record?—A. It is not mine, and I do not know whose it is; I think it is Mr. Stoek's. I generally held the patent in making the comparison.

Q. You can state no case where this mark is on the record, which has neither the signature of the President, nor the seal, nor the date?—A. I cannot now, from memory, state any particular case. I can only state what was my habit, and that I adhered to to it pretty closely.

By Mr. ELDRIDGE:

Q. Did you, while you were in the Land Office, hold any correspondence with E. L. Gould about this Panoche Grande case?—A. None, whatever, I think.

Q. Did you ever telegraph him?—A. It is possible I may have done so within the last two or three years; I do not remember that I did.

Q. I refer to the time when you were in the Land Office, and before you were in the employ of the New Idria Company?—A. I may possibly have done so; I do not recollect it; and I am pretty positive that I did not while I was in the office. I should have referred any matter requiring an answer to the head of the office.

Q. Did you give any information in regard to the case?—A. I think not; I do not remember having given any, and such was not my habit.

Q. While you were clerk in the office, were you in the habit of having intercourse with Mr. Gould in reference to the state of this title, and the proceedings of the Government in regard to it?—A. Certainly not.

Q. You are sure of that?—A. I am sure of that; I had no knowledge of the existence of this mining claim until long after I left the office; not, I think, until 1868, when I was retained in the case.

The affidavit referred to in the above testimony is as follows:

"DISTRICT OF COLUMBIA, *Washington County, ss:*

"On this 27th day of August, 1870, before me, a notary public in and for the county aforesaid, personally appeared William H. Lowry, who being duly sworn according to law, deposes and says as follows:

"That for several years prior to July 1, 1863, he was a clerk in the General Land Office, in charge of the division of private land claims, in which capacity it was part of

his duty, under the direction of the Commissioner of said office, to superintend the preparation and recording of all patents for private land claims; that the practice of the office in such cases when a patent was ordered was to have it engrossed and recorded, after which a letter was addressed by the Commissioner to the recorder of the General Land Office, and another to the President's secretary to sign land patents, describing the patent, stating the volume and pages where recorded, and requesting the signature of those officers to said patent; the said letters being always recorded in the letter records of the private land claims division, and no patent was submitted for signature unless accompanied by such letter, duly recorded as aforesaid; and deponent further says that he distinctly recollects the claim known as 'Panoche Grande,' and that no patent was issued for said claim up to 30th June, 1863, when he left the General Land Office.

"That a patent was engrossed and recorded for said claim, but never signed, for the reason that before it was sent to the secretary and recorder for signature, an order came directing the withholding of said patent; which was done accordingly, and the said incomplete and unsigned patent remained in the private land claims room, in the custody of deponent while he remained in office, and he is satisfied and believes, from having lately seen and examined it, that the said unsigned patent, known to him by the handwriting, marks, and other evidences, is the unsigned patent still on file in the General Land Office; and deponent further says that the record of said patent was made by a clerk in another division of the General Land Office, who erroneously, and contrary to the practice of the private land claims division aforesaid, inserted in the record the name of the secretary to sign land patents; that in comparing said record with the patent, which was the duty of deponent, and finding the name of the secretary had been inserted in the record, and receiving the order to withhold the patent, he erased the name of said secretary in the record by crossing it in pencil, and writing on the record opposite said name the words '*not signed*,' where they remained lately, and are probably still there.

"Deponent further declares that no other patent was prepared for said 'Panoche Grande' whilst he was a clerk in the General Land Office than the unsigned one now on file in that office, and that none could have been issued for it without his knowledge prior to July 1, 1863.

"Deponent further says that until the year 1868 he had no knowledge of the New Idria Mining Company, or the existence of their claim.

"W. H. LOWRY.

"Sworn to and subscribed before me this 27th day of August, 1870.

"EDM. F. BROWN,
"*Notary Public.*"

WASHINGTON, D. C., *January* 16, 1871.

J. F. STOEK, sworn and examined.

By Mr. LOUGHRIDGE:

Question. State whether you made and executed an affidavit in regard to the matter of this claim on the 22d of August last.—Answer. Yes, sir; I have before me a printed copy of that affidavit.

Q. Say whether or not all the statements in that affidavit are true.—A. I believe it to be the same affidavit I made, and that all the statements are correct. I could not state as to dates without comparing them. The probability is that I did it before that time.

By Mr. ELDRIDGE:

Q. What was the habit of the office in regard to the recording of the business letters of the office; were they recorded on the date of their receipt?—A. Letters received by the office were not recorded at all; they were kept on file; I mean letters transmitting patents to be countersigned by the recorder. It did not necessarily follow that they were recorded on the date which they bore, for other business might come in and crowd them out.

Q. If they were not recorded on the same day, what was done with them in the mean time?—A. They were kept in the division of private land claims.

Q. Where and how were they kept?—A. I do not know. Mr. Lowry was in charge of that division at that time. They were in charge of the head of the division.

Q. Would they not in fact remain on a spindle upon the table of the clerk in charge of the division until a certain number had accumulated for record?—A. No. There was never a spindle in his office that I am aware of. They would, perhaps, have been handed to the clerk, whose duty it was to record them.

Q. Were they recorded in the order in which their dates appear?—A. Yes, sir; they should have been.

Q. Do they not appear now on the record as recorded out of such order, those of later date having been recorded earlier, and those of earlier date later?—A. That was sometimes done.

Q. Was not that frequently the case?—A. I do not know without examining the record.

Q. And in the mean time these letters were kept by the clerk, whose duty it was to record?—A. I only say it is probable they were handed to this clerk. He should have recorded them in the order of their dates.

Q. Did not two, three, and four weeks often elapse from the date of these letters until they were actually recorded?—A. I do not know, without examining the record, one way or the other.

Q. And you cannot answer the question one way or the other?—A. No, sir.

By the CHAIRMAN.

Q. Is there any record of the letters transmitting patents at all by the recorder?—A. I do not know what his practice is. I am only speaking in regard to the division of private land claims. I know nothing in regard to how the records of the recorder's division are kept. I have been in the private land claims division since 1861, and nearly all the time I have been connected with the Land Office, and I, therefore, only speak of the practice in that division.

Q. I mean in that division.—A. The recorder of patents is not in that division at all.

Q. Does he not countersign the patents?—A. Not in the private claims division.

Q. I mean in his own division.—A. Yes, in his own.

By Mr. LOUGHRIDGE:

Q. Who examined this unexecuted patent and marked "Ex'd" upon it?—A. That is my writing.

Q. Is that last page of the record in the same handwriting?—A. It is in the same handwriting.

Q. What do these letters "Ex'd" mean?—A. They mean a comparison of the record with the rough form of the patent which had been prepared.

Q. What were they put there for?—A. Merely to show that the patent before it had been signed by the President's secretary, or by the recorder, and had been compared with the papers upon which it was based.

Q. When were these letters put on it?—A. Before it was sent for signature.

By the CHAIRMAN:

Q. Did you say that these letters were put on that record after the record was made?—A. After the record was made, certainly.

Q. And after the patent was signed?—A. No, sir; not after the patent was signed.

Q. Are there not other instances in that record which show the patent was not signed at all?—A. Yes, sir.

Q. Is any such record marked examined?—A. I do not know. Here is one from page 58 to 63, not signed, and I do not find upon it any mark that it has been examined or compared.

Q. How long since that record has been made?—A. I do not know.

Q. Does not the book show?—A. The book shows that it was made before a certain time. The date is the 9th of August, 1866; but that is merely an evidence that the record was made before that.

Q. It has never been examined?—A. No, sir, it has not, because it has never been executed. I did not usually examine them, unless they were sent for signature.

Q. Look at page 23.—A. Yes, sir; that patent was signed June 9, 1862.

Q. Look at page 52.—A. The patent, a part of which is recorded on 52, appears to have been signed.

Q. State whether the signatures to some of these records do not appear to have been put on afterward in another hand.—A. Yes, sir.

Q. Look on page 466.—A. This is a patent, the termination of which is on page 475, and appears dated, signed, and sent away.

Q. Is it marked as examined?—A. The word "examined" is written on it in full.

Q. Has your attention been called to the fact that there were several other records there, where the name of the President and his secretary have been inserted on the record by another hand altogether than that of the man who made up the record?—A. That is usual; I usually did that myself. I can only speak of the practice since I have been there. I think the first patent in this book is one that has not been examined or compared. The granting clause of this is on page 17; I see, however, a note referring for correct copy of this patent to the pages 88 to , inclusive. I suppose, therefore, that this patent has been executed, but that this is not a correct copy of it. The second patent recorded in the book has the record in one handwriting and signature in another. The next is in my own handwriting, date, signature, and all. On page 69 is another in my own handwriting, date, signature, and all. There is no regularity about the practice, though I think the record is oftener in one hand, and the date filled in by another.

By Mr. ELDRIDGE:

Q. Can you find in that book another record in which the dates, signature, seal, and everything are filled in where the record is marked "examined," and yet where the patent was never issued?—A. I do not know, and cannot answer without looking through the books, whether there is any such record in this book or not.

Q. Look on page 69, and state when, and by whom, this mark "Ex'd" was put there.—A. I do not know when it was put there.

By the CHAIRMAN:

Q. What is the date of the record there?—A. The 19th of August, 1866.

Q. Then the examination must have been made about the year 1866, was it not?—A. It must have been made before that time. When I first came to the office I wrote a great many patents, and recorded them, which were never sent, the rule being not to send out a patent until it was applied for by the claimant or his attorney.

By Mr. ELDRIDGE:

Q. Were these dates put on in your handwriting?—A. I do not know whose handwriting they were in.

Q. Was it the custom to place them there?—A. The practice was to put them on when the patent was signed.

Q. Do you have any knowledge or recollection when that was done in this case?—A. No; I have not.

By Mr. LOUGHRIDGE:

Q. Have you any knowledge at all in relation to this patent on page 69?—A. No; I do not know what it is.

Q. Have you any distinct knowledge in reference to this Panoche Grande record?—A. I have, from the particular circumstances attending it.

Q. Was the President's signature on that record when it was marked "examined?"—A. No, sir; it was not.

By Mr. ELDRIDGE:

Q. When was that mark, "Ex'd" put on?"—A. I cannot tell that. I recorded the patent myself, but the dates are in a different hand from mine.

Q. Can you state when this record was put in the book?—A. I cannot for the reason I have stated. I think the dates were put there by Mr. Sloan.

Q. When did Mr. Sloan come into the office?—A. I think in 1864.

Q. Can you not tell within two years when you made that record?—A. No; I cannot. I do not think it was in 1866 at all, because I was not making up these records then as a rule.

Q. It is probable that this record which appears on page 69 was made before 1863?—A. Yes; it is very probable it was.

Q. And then it was dated in 1866 by another clerk?—A. Yes, sir.

The affidavit referred to in the above testimony is as follows:

"DISTRICT OF COLUMBIA, *County of Washington, ss:*

"Be it remembered, that on this 27th day of August, A. D. 1870, before the subscriber, a notary public in and for the county aforesaid, personally appeared Jacob F. Stoek, who being first duly sworn, deposes and says that he is a resident of Washington, D. C., and is now principal clerk of private land claims in the General Land Office, and, as such clerk, is in charge of the division of private land claims, its files and records, under the direction of the Commissioner of the General Land office; that he was appointed a clerk in the General Land Office in April, 1861, and in the latter part of said year he was assigned to duty in said division of private land claims, and has been on duty in said division continuously from that time to the present date; that he has a distinct and perfect knowledge and recollection of all the facts and circumstances pertaining to the preparation of the unexecuted and incomplete patent, or draught of patent, now in the custody of the deponent in said division of private land claims; that in the month of March, and within a few days of the date written on said form of patent, in pencil, this deponent received instructions from William H. Lowry, then in charge of said division of private land claims, to engross a patent for a tract of land in California known as Panoche Grande Rancho; that in obedience to said instructions this deponent did engross the draught of a patent according to the form furnished to him by said Lowry, and completed the engrossment thereof in his own handwriting, on the 13th or 14th day of March, 1863, as this deponent believes; that said form or draught, when engrossed as aforesaid, required to complete it the signature of the recorder of the General Land Office, and of the President's secretary to sign land patents, or of the President, and the seal of the General Land Office. The date was in pencil. That after said draught of a patent was engrossed, as aforesaid, the same was retained in the division of private land claims in consequence of the receipt from Hon. W. T. Otto, Acting Secretary

of the Interior, dated March 13, 1863, and received in said division on the 14th day of March, 1863, and was not sent to the recorder, nor to the President of the United States, nor to the secretary of the President to sign land patents, for signature; that said draught of said patent has never been out of the General Land Office except on two occasions, once upon the call of the Hon. James F. Wilson, chairman of the judiciary committee of the House of Representatives, on the 18th day of January, 1867, and once to the Hon. John A. Bingham, having been sent in charge of a clerk in the Land Office, July 7, 1870. On the first occasion it remained out of the General Land Office until the 3d day of May, 1867, and was in the mean time sent to the Public Printer to obtain a printed copy as a part of the report of the judiciary committee. It was returned in the same condition it was in when sent to the chairman of said judiciary committee, except that the stitching which bound the leaves had been cut at the printing office for convenience in printing; that the leaves thus loosened were stitched together again by direction of this deponent; that the unexecuted patent thus stitched together by order of this deponent, and now in the division of private land claims, is the identical one prepared by this deponent in 1863, in his own handwriting, and is unaltered and the same in every respect except in the stitching, and that no other form or draught for a patent for said tract of land in California called Panoche Grande has ever been prepared in the General Land Office since the beginning of the year 1862. This deponent is able to make this assertion positively, because of his familiarity with the business of said office, and because no patent was or could have been prepared in said division without the knowledge of this deponent. This deponent further says that in the year 1863 and for a long time thereafter he was ignorant of the existence of the New Idria Mining Company. This deponent further says that he has read the charges made in the 14th section of a "bill in equity between William McGarrahan and the New Idria Mining Company" and others, filed by William McGarrahan in the supreme court of the District of Columbia, and that the same, so far as they relate to this deponent, are utterly false; that he has not now nor has he ever had, directly or indirectly, any interest in said company or in any controversy between said company and said McGarrahan; nor has he ever received any money or other valuable consideration or promise from any person or persons connected with said claimants, or either of them.

"J. F. STOEK.

"Sworn to and subscribed before me this 27th day of August, 1870.

"EDM. F. BROWN,
"*Notary Public.*"

WASHINGTON, D. C., *January* 16, 1871.

MARTIN BUELL sworn and examined.

By Mr. LOUGHRIDGE:

Question. State whether on or about the 27th of August, 1870, you made and signed an affidavit in this case, and whether the printed copy you now have in your hands is a copy of that statement, and whether the facts therein set forth are true.—Answer. I did make such an affidavit, of which the printed copy now before me seems to be correct. The statements made in this affidavit are true.

By the CHAIRMAN:

Q. You were acting recorder in the General Land Office for the purpose of recording patents?—A. I was at that time and before.

Q. When Mr. Granger, the recorder, returned to the city, state whether you delivered to him the letters transmitting patents for him to countersign, which you had received in his absence?—A. That was my custom invariably. As soon as he returned I delivered them to him.

Q. In the meantime, state whether you kept them in the same office which you occupied.—A. I did keep them in the office which I occupied, taking them to his room after he returned.

Q. Was he absent at any time in 1863?—A. Yes, sir.

Q. And you were acting recorder while he was absent in 1863?—A. Yes, sir.

Q. And whatever letters were transmitted to you with patents for signature you handed over to Mr. Granger on his return?—A. Invariably.

The affidavit referred to in the above testimony is as follows:

"DISTRICT OF COLUMBIA, *County of Washington, ss:*

"Be it remembered that on this 27th day of August, A. D. 1870, before the subscriber, a notary public in and for the county of Washington, personally appeared Martin Buell, who being first duly sworn, deposes and says that he is a resident of Washington, D. C., and a clerk in the General Land Office; that from July, 1861, to some time in the year 1869 he was principal clerk of private land claims in said General Land Office, and ex-officio was acting recorder in the absence of the recorder, and signed all

patents in the absence of said recorder; that it is the uniform custom of the office that all patents are prepared for signature by the Commissioner, and sent by the Commissioner to the recorder with a letter addressed to the recorder describing the patent and requesting the signature of the recorder; that said letters transmitting patents for signature are carefully preserved and filed in the office of said recorder, and that while acting as recorder this deponent never signed any patent unless by the direction of the Commissioner of the General Land Office expressed in a letter. This deponent further says that he never, while acting as recorder, as aforesaid, signed any patent for a tract of land in California called "Panoche Grande," and that during the year 1863 no person was authorized to sign patents for land, as recorder, except Julius N. Granger, recorder of the General Land Office, and this deponent, in the absence of said Granger.

"MARTIN BUEL.

"Sworn to and subscribed before me, this 27th day of August, 1870.

"EDM. F. BROWN,
"*Notary Public.*"

WASHINGTON, D. C., *January* 16, 1871.

JOSEPH S. WILSON sworn and examined.

By Mr. LOUGHRIDGE:

Q. State your official position.—A. I am at the present time acting as Commissioner of the General Land Office.

Q. How long have you been Commissioner?—A. Since the 1st of September, 1866. I was also Commissioner from 1859 until, I think, some time in 1861.

Q. You were at the time this unexecuted patent for Panoche Grande was recorded?—A. No, sir; I was not. Mr. Edmunds was then Commissioner.

Q. You were in the Land Office?—Yes, sir; I was chief clerk.

Q. State what you know of the history of this matter.—A. It became a matter of controversy as to whether this title would finally be confirmed in such way as to justify the issue of a patent. My predecessor ruled as his opinion that it would not; but a former Secretary of the Interior, Hon. Caleb B. Smith, decided in favor of the confirmation, and ordered the patent to issue. When Judge Usher succeeded Mr. Smith as Secretary of the Interior he confirmed the same opinion, but at a later period, probably in March, 1863, there came an order to suspend proceedings, and so the matter has remained, as I understand, from that time to this, except in respect to the judicial proceedings which have taken place.

Q. Was that unexecuted patent prepared in your office?—A. That I cannot tell, because I was not in that branch of the office. It was prepared in the private land claims room. I might express an opinion that I have no doubt it was, but I could not say it was from my own knowledge.

Q. Do you know of any patent for this tract of land having been signed by the secretary of the President, countersigned by the recorder of the Land Office, and the seal of the General Land Office attached to it?—A. No, sir; I have no knowledge of any such thing.

Q. Did you make an indorsement upon the record of this patent?—A. The indorsement, I think, was written by one of the clerks in the office. I did not write it. I think it was written in the division of private land claims. It was signed by me and countersigned by the recorder of the office under an order of the former Secretary of the Interior, Mr. Cox.

Q. Was that order in writing?—A. Yes, sir; I think it is here. It is dated July 15, 1870, and I now present it to the committee. It is as follows:

"DEPARTMENT OF THE INTERIOR,
"*Washington, D. C., July* 15, 1870.

"SIR: I have received your letter of the 13th instant, in relation to 'the application, dated the 11th instant, of George W. McGill, as attorney for William McGarrahan, for a certified copy of the record of the Panoche Grande patent.' You inform me that the patent was never signed by the President's secretary to sign land patents, or countersigned by the recorder of the General Land Office, and that the seal of your office was never affixed thereto. As the record is, in your opinion, incomplete, wanting the name of the recorder or acting recorder, you request the ruling of the Department as to whether the copy should be furnished, in view of the provisions of the act of July 2, 1864, entitled, 'An act prescribing the terms on which exemplifications shall be furnished by the General Land Office.' You send me the original instrument and the proposed form of certificate to be attached to the copy asked for, in case such copy should be furnished.

"Your statement is fully established by an inspection of the instrument, and conforms to the evidence which the files of this Department furnish on the subject. I

perceive that, by a letter of the Acting Secretary of the Interior, of March 13, 1863, your office was directed to suspend the 'execution and delivery of the patent until further advised in the case by the Secretary.' No subsequent order or direction in conflict therewith appears. The instrument was never perfected in the mode required by law, and it was, in its incomplete state, improperly admitted to record. It cannot be considered a patent, in the legal sense of the term. A paper writing, purporting to convey lands in fee, if never signed, sealed, and delivered, is not a deed, nor is it effectual to pass the title to the land therein described.

"You informed me in our personal interview that it had been the practice to record these inchoate and imperfected patents, including the name of the President's secretary, before he signed them; and that when they were subsequently so signed the countersigning by the recorder of the General Land Office was afterward affixed to the instruments, and a corresponding change made in the record. I deem the practice to be an objectionable one, and you will give the requisite directions to the recorder to discontinue it. The instrument should not be recorded until it is in all respects complete and ready for transmission to the party who is thereunto entitled. In every instance where record has been made of an uncompleted instrument in anticipation of the due execution of it, and the original is in your office unsigned and unsealed, you will write across the record, in red ink and in legible characters, a statement of the facts, attested by your signature and countersigned by the recorder of the General Land Office; and this statement should appear in the transcript or exemplification of the record of the instrument which you deliver.

"Under the circumstances of this case, I have no objection to your giving the requested copy, attaching a certificate in the form presented to me, upon the applicant's complying in other respects with the statute and regulations of your office. The papers accompanying your letters are herewith returned.

"I am, sir, very respectfully, your obedient servant,

"J. D. COX,
"*Secretary.*

"Hon. JOS. S. WILSON,
"*Commissioner General Land Office.*"

Q. Was it in pursuance of that order of the Secretary of the Interior that that cancellation was made upon the record?—A. Yes, sir, I so understood it.

Q. What is the reason that patent was never signed or executed?—A. The reason, as I understand it, was that there was an order suspending the case by Judge Otto, Acting Secretary of the Interior, which order, as I understand, was made in pursuance of a notification from the Attorney General.

By Mr. ELDRIDGE:

Q. You will please distinguish what you state from your own knowledge and what you state from hearsay.—A. I speak from having seen the order.

By Mr. LOUGHRIDGE:

Q. Was there any other patent prepared for that land?—A. I have no knowledge of any other, and no reason to believe any other was prepared.

Q. If any other had been prepared, would the fact have come to your knowledge?—A. I can only say that it is most likely it would have come to my knowledge. I should have heard of it. Nothing of the kind certainly has come to my knowledge.

Q. How long since you first became connected with the Land Office?—A. I first came in the Land Office in Mr. Adams's administration, and as private land clerk, I think, in 1837.

Q. You have been in the Land Office how many years?—A. Forty years or more.

Q. How much of that time have you been Commissioner?—A. At present, from September, 1866, until to-day. I suppose a few days will relieve me from duty. In 1859 and 1860, I was also Commissioner fifteen or sixteen months. This was near the close of Mr. Buchanan's administration. I was appointed without any solicitation or expectation upon my part, and remained until the incoming administration.

By the CHAIRMAN:

Q. Did you address Secretary Cox any communication about this patent before you received the letter which you have presented here?—A. No, sir; not to my recollection.

Q. Did you communicate your wishes verbally?—A. No, sir; I never waited upon the Secretary in regard to any case unless I was sent for.

Q. You were not Commissioner of the General Land Office at all in 1863?—A. No, sir; I was chief clerk.

Q. Do you know whether the patent recorded here for Panoche Grande was ever signed?—A. I have no knowledge on that subject. From looking at the patent itself I could give you an opinion.

Q. Do you know whether this patent, recorded as dated, signed, and sealed, was signed, sealed, and dated or not?—A. No, sir, I do not.

Q. You do not know whether it was or not?—A. I know from the records. I know nothing about it of my own knowledge.

Q. You do not know whether it was ever presented for signature or not?—A. I do not know that it was ever presented.

Q. And you do not know that it was not?—A. No, sir; only from my general conviction upon the subject. I do not know of any letter having been sent transmitting it.

Q. Personally you have no knowledge that enables you to swear that it never was presented for signature?—A. I have not.

Q. And you do not know that it was ever sealed?—A. I do not know that; I do not know that it was ever sealed, or the contrary.

Q. Where are letters transmitted to the recorder of private land claims—I mean Mr. Granger—for countersigning land patents, recorded?—A. They are recorded in the private land claims division.

Q. Are letters kept by him recorded at all?—A. I could not answer that; it would be very unusual and very unnecessary. I presume he files them in his own office.

Q. State whether in the private land claims office they are recorded in the order in which they are sent or dated.—A. It is their business to record them in their order of date; I do not know personally whether that is done or not.

Q. You have had occasion to look at the records, have you not?—A. I have looked at them generally.

Q. Do the records disclose that they are recorded in the order of their date of receipt at all?—A. I think they do; I may not speak with exact accuracy, however, for I have never overhauled the records in that respect.

Q. You speak of Mr. Otto being Acting Secretary of the Interior; is he created so or not by positive law to your knowledge?—A. I do not know.

Q. Do you know whether there is any such officer as Acting Secretary of the Interior except by special appointment?—A. I do not know whether there is any special statute on the subject or not.

Q. Do you know anything about it?—A. I do not.

Q. It is not usual anyhow, is it, for an Acting Secretary to overrule an order of the Secretary?—A. No, sir.

By Mr. PETERS:

Q. Have you ever found any evidence whatever in the office that a patent to McGarrahan was signed or sealed?—A. I have not.

Q. Have you made diligent search for it?—A. No, I have not; it has not been before me in that form.

Q. Are you sufficiently familiar with the records and proceedings of the office to know it if there was any such evidence?—A. I might know it in one way, and in another I might not. I have never heard of any such evidence.

By Mr. ELDRIDGE:

Q. Are copies of letters transmitting patents retained in the Land Office?—A. That is the rule. It is required that a record shall be made of every letter submitted for signature.

Q. Where should that record have been in this case?—A. In the private land claims division where the patent was made up—in the room in which Mr. Stoek was.

By Mr. COOK:

Q. Regularly, then, the records of the office should show it if a note was addressed requesting the signature of a patent?—A. Certainly, always; that was the uniform rule, and if there was ever an exception, it was an oversight.

By Mr. ELDRIDGE:

Q. How came you to sign the note cancelling this record?—A. I did it upon a letter of the Secretary of the Interior directing it.

Q. You did it upon that order without a personal knowledge of the facts?—A. Yes, sir.

Q. Did you advise the Secretary to make that order?—A. No, sir; I never did.

Q. Were you the instigator of, or did you have anything to do with making or getting up these affidavits?—A. No, sir; I never heard of them until after they were made.

Q. Did you advise Mr. Steck to make his?—A. No, sir.

Q. Did you speak to him on that subject?—A. I do not remember having done so. I spoke to nobody on that subject.

Q. Did you direct Mr. Granger to execute his signature to the cancellation of this record?—A. I handed him the written order of the Secretary, which requires him to sign, and he signed it.

Q. Did you also verbally tell him to sign it?—A. No, sir; I have no recollection that I did.

Q. In answer to a question by Mr. Peters, I understood you to say that you knew of no evidence in the Land Office of any kind whatever that a patent was ever executed

for this land. Is this record itself not evidence of that fact? If there was nothing else showing the contrary, would not that record itself be evidence?—A. I do not know that it would be. The letters and other record evidence would have to be examined in connection with it.

Q. Suppose this record stood unimpeached by any other evidence, would it be of itself evidence to your mind?—A. But it is impeached, and I would not record it as evidence in any event, because it had not the signature of Mr. Granger, the recorder of patents.

Q. Would not the signature of the President, by his secretary, be evidence?—A. Not unless it was countersigned by the recorder. The signature of the recorder must be there.

Q. Would not the signature of the President be conclusive evidence, even without the signature of the recorder? I ask your opinion.—A. I do not think it is conclusive evidence at all; it is only one of the items of evidence.

Q. What was the occasion for the cancellation of that record?—A. That you must ask of the Secretary himself. It was done in pursuance of his order.

Q. Did you think when you were signing that you were signing a cancellation of a record which of itself was no evidence of the patent?—A. I did think so; but in what I did I simply obeyed orders.

By Mr. LOUGHRIDGE:

Q. You have been asked your opinion in regard to this record; let me ask you what is the meaning of the letters "exd?"—A. "Exd" means examined. Whenever a patent is recorded they compare it with a draught from which the record is made, and, finding them to agree, these letters, "exd," are written on it by the clerk in charge.

Q. It would not import that the patent was executed at all?—A. Oh, no, sir; not at all, because it is done before the patent is submitted for signature.

By Mr. PETERS:

Q. Then the patent is usually recorded before it is executed, and instead of being a final act in the usage of your office, it is simply a preliminary act?—A. This was the former usage of the office. The record was made and compared before the patent went up for signature, so as to prevent the necessity of going over the second time after the patent was returned executed.

By Mr. ELDRIDGE:

A. When the patent is returned signed, do you not have to reëxamine the record?—A. No, sir; only to see that the names are properly affixed.

Q. Why were the names of Mr. Lincoln and Mr. Stoddard affixed, and not that of the recorder?—A. That was the rule, because we knew the name of the secretary who alone was authorized to sign, while sometimes the name of the recorder, and sometimes that of the acting recorder was affixed.

Q. Then you put the names of the President and secretary on before the patent was sent to the secretary for signature?—A. That was the rule in Mr. Cox's administration, and, as I said, the name of the recorder was not placed there, because we could not tell whether the recorder or acting recorder would countersign. That, however, was not under my supervision.

Q. Then you know nothing about it, personally?—A. No; I only speak of the practice. I never saw this patent until the matter came up in the way it did. I do not know even the handwriting in which it is recorded.

Q. Who wrote this cancellation in red ink on the face of the record?—A. I do not know the handwriting at all. I think Mr. Stoek wrote it.

Q. The signature is yours!—A. Yes, sir.

Q. Was it written in your presence?—A. No, sir; it was not.

Q. Was there more than one acting recorder at this time?—A. Only one and he is made acting recorder by law.

Q. Was there more than one at any time?—A. Not that I know of.

WASHINGTON, D. C., *January* 16, 1871.

JULIUS N. GRANGER, recalled and examined.

By Mr. LOUGHRIDGE:

Question. Did you ever sign a patent in your capacity as recorder before it was examined?—Answer. No, sir; they were always examined first.

By the CHAIRMAN:

Q. You never signed them at all, did you, unless they had the President's signature?—A. No; the President signs before I do. There may have been cases where there was a large number of patents when I was compelled to leave, in which case I would sign my name before the President's was affixed.

Q. They are not examined until the President's signature is affixed?—A. Not in my division.

Q. What is your division?—A. I have supervision of the military acts, the cash, homestead, and agricultural.

Q. State, if you please, what orders, if any, you received to put your name upon this certificate of cancellation in July, 1867?—A. The first I knew of it was a request by a messenger, or perhaps by Mr. Stoek, to come to Mr. Wilson's room. I went up there and found this record lying upon the table with the certificate upon it written out in red ink. I was requested by Mr. Wilson to sign it, and he at the same time showed me the direction of the Secretary that I should do so.

Q. State whether Mr. Wilson ordered you to sign it?—A. I would not say it was an order. He requested me to sign it.

Q. Who requested you to make the affidavit which has been filed here in print?—A. I think I was requested by Mr. Lowry. I think he first spoke to me about it.

Q. By Mr. Lowry, who has been a witness here this morning?—A. Yes, sir; I think so.

By Mr. LOUGHRIDGE:

Q. Please look over the printed copy of the affidavit and say whether the statements in it are true.—A. I have looked it over. It is correct. I do not desire to change it. The affidavit referred to is as follows:

"DISTRICT OF COLUMBIA, *County of Washington, ss*:

"Be it remembered that on this 27th day of August, A. D. 1870, before the subscriber, a notary public in and for the county of Washington, personally appeared Julius N. Granger, who being first duly sworn, deposes and says that he is a resident of Washington D. C., and the recorder of the General Land Office, and that he has held said office of recorder of the General Land Office continuously, and performed the duties thereof since the year 1853; that he is well acquainted with the usages and customs relating to the transaction of business in the General Land Office, and with the laws of the United States relative to the issue of patents for land; that by provision of law all patents for land are required to be signed by the recorder of the General Land Office, and by the President of the United States, or by his clerk for the signing of land patents, and to be sealed with the seal of the General Land Office; that patents are prepared under the direction of the Commissioner of the General Land Office, and that it is the uniform custom of the office, and one never departed from within the knowledge of this deponent, when patents are ready for signature for the Commissioner of the General Land Office to send them to the recorder with a letter, signed by the Commissioner and addressed to the recorder, describing the patent transmitted and requesting the signature of the recorder; that all letters accompanying patents and requesting the signature of the recorder are carefully preserved in the office of the recorder and filed in said office; that this deponent has carefully examined the files in his office and the records thereof of letters transmitting patents for signature, and that there is no letter, communication, or other paper on said files, or in said office, purporting to inclose any patent, or to request or direct the signature of the recorder to any patent for a tract of land in California known as Panoche Grande, and that there is no evidence in said office that any patent for said tract of land called Panoche Grande was ever signed by this deponent as recorder, as aforesaid; and this deponent has no recollection of ever having signed any patent for said tract of land.

"J. N. GRANGER.

"Sworn to and subscribed before me this 27th day of August, 1870.

"EDM. F. BROWN,
"*Notary Public.*"

WASHINGTON, D. C., *January* 23, 1871.

J. F. STOEK, recalled at his own request, made the following statement:

On examining the printed copy of my testimony before the Judiciary Committee on the 16th instant, I find the following discrepancies and errors in printing, which I respectfully request may be corrected:

1. On page 26. In the first question asked by Mr. Loughridge, the date of an affidavit made by me in August last, is printed 22d of August, while the affidavit referred to, as the same is printed at the close of my testimony, bears date of 27th August. Since discovering the discrepancy, I have examined a copy of the affidavit in question, which I preserved, and find the date to be August 27, 1870.

2. On the same page. In reply to the question by Mr. Loughridge, "Say whether or not all the statements in that affidavit are true," I am reported as saying for part of my answer, "I could not state as to dates without comparing them. *The probability is that I did it before that time.*" What I intended to say was, that while I believed the printed affidavit handed me to be the same made by me in August last, and all the statements therein correct, yet I could not state as to the correctness of the dates of

transactions mentioned in the affidavit, as those dates are printed in the copy furnished me for examination, without comparing them with the records and files of the General Land Office, but had no doubt that the printed affidavit was a true copy of the original.

3. On the same page. The words "I mean letters transmitting patents to be countersigned by the recorder," in my answer to Mr. Eldridge's first question, were a *question* by Mr. Eldridge, and not a part of my answer. The succeeding portion of my answer as printed was the response to that question.

4. On the same page. In answer to the question by Mr. Loughridge, "Is the last page of the record in the same handwriting?" my reply is, "It is in the same handwriting." I meant to be understood as saying, I placed "ex'd" on the first page of the Panoche Grande record, and that the last page of said record is in the same handwriting as the rest of the same record, which was made by Mr. Stokes, and not by me.

5. On page 27. The sequence of question and answer would seem to imply that, in answer to the question by Mr. Eldridge, "When was that mark 'ex'd' put on?" I again testified that I recorded the Panoche form of patent myself, while the fact is that when Mr. Eldridge asked the question he presented to me the record of another patent; as will be seen by the succeeding portion of my testimony.

By Mr. ELDRIDGE:

Question. I find this question put to you by myself: "Can you find in that book another record in which the dates, signature, seal, and everything are filled in where the record is marked 'examined,' and yet where the patent was never issued?" The answer is, "I do not know, and cannot answer without looking through the book, whether there is any such record in this book or not." State whether you subsequently examined the book, and replied that you could find no other such record?—Answer. I did.

WASHINGTON, D. C., *January* 23, 1871.

JOSEPH S. WILSON, recalled at his own request, made the following statement in relation to his testimony before the committee January 16, 1871, as printed:

1. On page 31, in speaking of the time of my incumbency as Commissioner, I wish to say that my first incumbency as Acting Commissioner and Commissioner was about fifteen or sixteen months in 1859 and 1860, and the early part of 1861.

2. In answer to the question by the chairman, "Did you address Secretary Cox any communication about this patent before you received this letter which you have presented here?" I replied, "No, sir; not to my recollection."

I desire this understood as referring to any letter suggesting cancellation of the record; for on reflection and consultation of the record of letters I find we did address a letter (copy herewith) to the Secretary, under date 13th July, 1870, submitting an application of the attorney of McGarrahan for a copy of the record, with a proposed form of certificate of authentication to be attached to said copy in case the same should be furnished. The date of said letter submitting said application was given in the Secretary's letter of July 15, 1870, the original of which was handed to the chairman of the committee.

3. The further question was asked, "Did you communicate your wishes verbally?" The answer was, "No, sir; I never waited upon the Secretary in regard to any case, unless I was sent for."

I mean to say that I had no wishes in the matter, but not as saying that I made no explanations when called upon by the Secretary to do so. When so called upon, I gave such information and explanations as I was able to do from the knowledge I had of the matter.

Referring to the questions on page 31 of the printed copy of my testimony, I find that in answer to questions as to whether I knew whether a patent for Panoche Grande was ever presented for signature or not, I replied, "No, sir; only from my general conviction upon the subject. I do not know of any letter having been sent transmitting it." I desire to add that my conviction, from examination of the unexecuted draught of the patent and from the snspensive orders given, is that it never was signed.

5. In answer to the question, "And you do not know that it" (referring to the Panoche draught of patent) "was ever sealed?" my reply is, "I do not know that; I do not know that it was ever sealed or the contrary." I desire to be understood as saying, I do not know of my own personal knowledge; but from the fact that no seal is found on said draught, I do not believe one was ever placed there, and that I have no knowledge of any other draught of patent for said ranch having ever been prepared in the General Land Office.

6. On page 32 of the printed testimony, in answers to questions as to whether my signature to the certificate of cancellation of the record was placed there "without a personal knowledge of the facts," my answer as printed is, "Yes, sir." I desire to be understood in this as saying that, except as shown in my preceding testimony on this point, I had no personal knowledge of the matter, as the preparation of the form of

patent and record was not under my immediate personal supervision, but of the gentleman in charge of the division of private land claims.

7. Again, on page 32, in answer to the question, "Did you advise the Secretary to make that order?" my reply is, "No, sir; I never did." In this connection I desire to state that I never advised the Secretary to make any order in regard to the cancellation of the record; but in submitting the application for a certified copy, a form of certificate was submitted, as is shown in the letter to the Secretary of 13th July, hereinbefore referred to, and a copy of which, from the record, is herewith filed.

8. Further, on page 32, in reply to the question by Mr. Eldridge, "Then you put the names of the President and Secretary on before the patent was sent to the Secretary for signature?" I find my reply is, "That was the rule in Mr. Cox's administration," &c. What I intended to say was that that was the rule as I understood it, until within a few months of the close of Mr. Cox's administration, to wit, until the time of his order of 15th July, 1870, directing a discontinuance of the practice.

9. Also, in response to the last question on page 32, I say, "I do not know even the handwriting in which it" (the Panoche form of patent) "is recorded;" but since, on recurring to the record itself and comparison with many letters in his hand, I am satisfied it is in the handwriting of Mr. T. F. Stokes, then and now in the office.

"DEPARTMENT OF THE INTERIOR,
"*General Land Office, July* 13, 1870.

"SIR: I have the honor to submit herewith an application, dated the 11th instant, of George W. McGill, as attorney for Wm. McGarrahan, for a certified copy of the record of the Panoche Grande patent, said patent having never been signed by the President's secretary to sign land patents, or countersigned by the recorder of the General Land Office, and the seal of this office having never been affixed thereto, the record being therefore incomplete, wanting the name of the recorder or acting recorder; and respectfully request the ruling of the Department as to whether such copy should be furnished in view of the provisions of act of July 2, 1864, entitled 'An act prescribing the terms on which exemplifications shall be furnished by the General Land Office.' Statutes, vol. 13, p. 375. A copy of the proposed form of certificate to be attached to the said copy, in case the same shall be furnished, being herewith inclosed; also the original unexecuted patent and a copy of the granting clause in the record.

"I have the honor to be, very respectfully, your obedient servant,
"JOS. S. WILSON,
"*Commissioner.*

"Hon. J. D. COX, *Secretary of the Interior.*"

By the CHAIRMAN:

Question. You have said in explanation, as I understood you, that you only advised the Secretary when called on; state now, if you please, whether you were ever called on by Secretary Cox for an explanation in regard to this matter or for advice.—Answer. I made a verbal explanation to him; I gave no advice.

By Mr. MERCUR:

Q. You gave no verbal advice about what?—A. I mean about the cancellation of the record. I merely carried to him the draught of patent, which I obtained from the clerk who had the custody of it. It had not been in my custody at all; then we discussed the form in which the certificate should be appended. I proposed to have it made upon a separate sheet of paper, reciting, in accordance with the knowledge of the office, that the patent had never been signed, and append it to the record.

By Mr. PETERS:

Q. Your interview with the Secretary then was as to how the copy of this record, which you had been called on to furnish, should be made out?—A. Yes, sir.

By Mr. MERCUR:

Q. Who called on you for it?—A. This letter shows that it was McGarrahan's attorney.

By Mr. ELDRIDGE:

Q. In answer to a question by the chairman, "Did you address Secretary Cox any communication about this patent before you received the letter which you have presented here," you say, "No, sir; not to my recollection." He then asks, "Did you communicate your wishes verbally?" To which you reply, "No, sir; I never waited upon the Secretary in regard to any case, unless I was sent for." Yet, in the letter of Secretary Cox which you presented, dated July 15, 1870, he says, "You inform me that the patent was never signed by the President's secretary to sign land patents, or countersigned by the recorder of the General Land Office, and that the seal of your office was never affixed thereto." Did you so tell him?—A. I carried the patent to him and showed it

to him, and told him that, according to my judgment, or that according to my knowledge, it had never been signed or sealed.

Q. Did you have any knowledge on that subject which you have refused to give to this committee?—A. No; none whatever. It was just the traditional knowledge of the office; it had been talked about more or less for several years, that we never knew or heard of this patent having been signed. That is what I meant to be understood as meaning by knowledge on the subject.

Q. Had you ever seen the record which had been produced here, according to which the patent purports to have been signed by the President's secretary?—A. I do not think I had then.

Q. Had you never heard of that?—A. Of course. All patents made out are recorded.

Q. Had you never heard of that record which was produced here purporting that the patent had been signed by Mr. Stoddard, as the secretary of the President?—A. I can only say that I have no specific recollection of that patent having been signed.

Q. Had you never heard of that record?—A. Of course, I have heard of that record.

Q, Had you never heard of this record with the signature of Mr. Stoddard, as secretary of the late President attached, at the time you communicated with Secretary Cox?—A. I have no doubt I had. It was not my business to run round and hunt up every record in the Land Office and look at it, but it was then the rule that every patent should be recorded in advance of its being submitted for signature.

By the CHAIRMAN:

Q. State, if you know, when the straight lines were drawn across this authenticated copy now shown you, and which is printed on page 7 of this testimony?—A. I am unable to say.

Q. Do you know when these cross lines were drawn?—A. Nothing, personally; I only know from the testimony presented.

By Mr. LOUGHRIDGE:

Q. Was it the custom when patents were recorded, if they were not signed, to make any entry on the record?—A. If they were not signed, they were marked "canceled."

By Mr. BUTLER:

Q. Was there such a number of unexecuted patents recorded in your office that any custom prevailed in regard to cancellation?—A. I do not know the number, but that was the practice whenever such instances occurred.

Q. Was there such a number of unexecuted patents recorded as if they were executed that any practice had grown up in your office as to the manner of cancellation?—A. The practice was, whenever an unexecuted patent was recorded as if it had been executed, to mark it as canceled.

Q. Pardon me; besides this, do you know of one other that has been so recorded?—A. There are others so recorded that have not been delivered. I could not say that any special practice grew up in regard to the manner of cancellation.

Q. Pardon me; my question is, do you know of one patent unexecuted—leaving out this Panoche Grande—that has been recorded as executed?—A. I cannot say that I know of any particular one.

Q. Do you know of any such patent having been so recorded?—A. I cannot say that I know of any particular one, but the practice was ——

Q. If you do not know of one, how can you know that any practice has grown up?—A. I answer, that I do not know of any single one, but that in the progress of years there have been many; and that when such instances have occurred, the practice has been to write "canceled" on the record. You will understand that I could not, from memory, go back over a record of thirty or forty years and name individual cases.

By the CHAIRMAN:

Q. Can you give a single case?—A. I could undoubtedly find one.

By Mr. BUTLER:

Q. Will you do me the favor, if on looking over the records in your office you can find any unexecuted patent recorded as executed, and which has been canceled, to bring it before the committee?—A. I think I can do so.

WASHINGTON, D. C., *January* 23, 1871.

THOMAS F. STOKES, recalled at his own request, made the following statement:

I wish to say, that on page 23 of this printed evidence, the question is asked me, "Do you say now that you know there was ever a printed form for California special cases?" to which my answer is, "No, sir; only from the manner in which I generally did business. I have written a good many patents for private land claims, and this form of patent was printed." If I recollect correctly, when I made this answer, my hand lay upon the granting clause of a patent, and not upon the whole record. I did not intend to say that the whole record was printed, but that the granting clause was.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 25.

JURISDICTION OF THE COURT OF CLAIMS.

[To accompany bill H. R. No. 662.]

FEBRUARY 3, 1871.—Ordered to be printed.

Mr. WELKER, from the Committee on Private Land Claims, made the following

REPORT.

The Committee on Private Land Claims, to which was referred House bill No. 662, being a bill to confer jurisdiction on the Court of Claims to decide the claim of the city of Carondelet to the tract of land known as the "Jefferson Barracks, in Missouri," having had the same under consideration, make the following report:

That the city of Carondelet claims title to the tract of land known as "Jefferson Barracks," containing 1,702 acres, under a grant to said town by the Spanish government, before the acquisition of that territory by our Government. An action to recover the title to this tract was pending in the Court of Claims, but the Supreme Court of the United States decided that said court had not jurisdiction in the case, and the object of the bill before the committee is to confer that jurisdiction upon the Court of Claims.

The committee called upon the Commissioner of the General Land Office for a statement of the history of the claim, as well as a statement of the action of the Government in relation thereto, which he has furnished, and which is hereto appended as a part of this report.

It will be seen from the letter of the Commissioner that the decisions of the Government have been uniformly against this claim.

In addition to the decisions of the Government adversely to Carondelet, on the 27th of June, 1854, under full authority from the municipal officers, and in consideration that the Government would confirm Brown's survey of the common, which it did, the mayor made, executed, and delivered to the United States a deed conveying the entire title of the city to the property in controversy.

Congress is now asked to set this deed aside, and to allow the city to contest anew their title to the tract of land, on the ground that the deed was procured by fraud and undue means used by the Government to obtain it, and without consideration. There are several facts bearing upon this point worthy of consideration.

As early as 1826 the Government commenced the occupation of the tract of land for military purposes, and at that time some eighteen citizens, representing the city, undertook to convey the title of the city therein to the Government. This proved to be defective, those persons not having the legal authority to do so.

Afterward, in 1841, the Government, in form, declared it a military reservation under the claim that Spain had that right, and this Government, under Spanish law, had the same right as its successor and grantee.

From the first legislation in Congress, in 1812, to the date of the deed from the city to the Government in 1854, as above referred to, there was kept up a controversy between the city and the Government in relation to this property. The State of Missouri became more or less mixed up in this controversy, and several decisions of her courts were made in reference to congressional action in relation thereto.

On the 11th day of February, 1854, the United States district attorney for the State of Missouri gave a long written opinion on the question of title to this tract of land, in which he stated distinctly that the title of the city of Carondelet, under the acts of Congress of 1812 and 1831, was complete and perfect, and which opinion was filed in the General Land Office as a part of the case. Yet, in the face of this decision, the conveyance of the 27th day of June, 1854, by the city of Carondelet was made to the Government.

Between individuals this notice of right of property, if there had been no sufficient consideration, would in equity estop the grantor from claiming a rescission of the deed, on account of undue influence or fraud used by the grantee.

This property has been in the possession of the Government since 1826 to the present time, and valuable improvements have been made upon it. Sixteen years have elapsed since the title was finally settled by the conveyance of 1854, and the committee think that there do not appear to exist any such equities in behalf of the city of Carondelet as would justify it to recommend the opening up by the passage of this bill of the long controversy, so often disposed of and settled, and therefore recommend that the bill be laid upon the table.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
May 18, 1870.

SIR: In reply to your reference, on the 28th ultimo, of a letter from this office to Hon. G. S. Orth, dated March 28, 1870, relative to the "claim of the city of Carondelet," herewith returned, and your request for a history of the case, I have the honor to state, that said claim was presented to the old board of commissioners for the adjudication of titles to lands in the Missouri Territory, the report thereon by said board being printed in the American State Papers, (Gales & Seaton's edition, vol. 2, p. 672.) The claim was for 6,000 arpents of land, and as no record or evidence of a grant of the land by the legally constituted authorities could be found, nor any evidence of title beyond possession, and a decree of Lieutenant Governor Trudeau refusing to grant a portion of the lands claimed by the town to one Gamache, said decree stating "that the land demanded is within the limits of the land reserved for the purpose of furnishing wood for the village of Carondelet," the said claim was rejected by a majority of the board.

By virtue of long inhabitation, cultivation, and possession, however, it was adjudged by Congress that the title of the town was valid to the "town lots, village lots, common field lots, and commons in and adjoining" the said town, and the claim to the same was confirmed by act of June 13, 1812, (Statutes, vol. 2, p. 748.) Pursuant to the act of confirmation, an actual survey was made of the confirmed claim by Elias Rector, United States deputy surveyor. Under date of April 15, 1840, Surveyor General Milburn certified that the field notes of this survey were without date, but that "the survey was executed and the notes taken before the year 1817," and that said notes were, to his knowledge, "on file in the surveyor's office in the forepart of that year, and have always since that time been acted upon as the official notes and survey of said common as supposed to be confirmed by the act of Congress of the 13th June, 1812."

On the 26th May, 1824, Congress passed a supplemental act, (United States Statutes, vol. 4, p. 65,) requiring individual owners or claimants of lots confirmed by the act of June 13, 1812, to designate their lots within eighteen months after the passage of the act, and sustain their title before the recorder, in order that the surveyor general might be enabled to distinguish the private from the vacant lots, and directing the surveyor general "to survey and designate, so soon after the passage of this act as may be, the commons belonging to said towns and villages." Pursuant to this act, on the 10th of February, 1834, E. T. Langham, surveyor general, issued instructions to Jos. C. Brown,

deputy surveyor, sending him "a copy of the field notes of Rector's survey" aforesaid, and directing him "to retrace the lines and reëstablish the corners of said survey, connecting it with the lines and corners of adjoining surveys;" and in March, 1834, said resurvey was returned to the surveyor general's office, and found to differ from the original, as it made the western boundary of the claim 473.17 chains instead of 437.50 chains, as per the original survey by Rector. The resurvey by Brown was not approved, but remained suspended and in dispute for many years, being finally rejected by decision of the Secretary of the Interior under date of January 26, 1853, said decision being that the claim of the town of Carondelet, as presented to the old board of commissioners, having been for 6,000 arpents, and that claim having been confirmed as thus presented by the act of 1812, the town could not now justly claim a greater quantity of land, as the confirmation could not be construed to extend beyond the claims asserted.

During the pendency of the contest, on the 19th January, 1841, a reservation was made by the Secretary of War, for the use of the military, of a tract of land containing 1,702.04 acres within the limits of the Brown survey, but outside of the survey by Rector, said reservation being now known as the Jefferson Barracks military reservation

The tract of land outside of the military reservation, and exclusive of certain adjoining confirmed private claims within the outboundaries of the Brown survey, has been reserved to satisfy the claim of the corporation of Carondelet to 6,000 aspents, as originally presented to the board of commissioners, the survey of Rector not including this area. It was formerly held by this office that further legislation would be required to confirm the title of the corporation to any lands outside of the Rector survey, because said survey was recognized and unopposed by the citizens for over seventeen years; and there being no portion of the lands outside of its limits occupied, cultivated, or possessed by said citizens at the date of the act of 1812 confirming the title of the corporation, and said title prior to confirmation being based entirely upon occupation, cultivation, and possession. This opinion was virtually overruled, however, by the decision of the Department aforesaid, that the claim as confirmed was identical with the claim as presented to the board of commissioners, viz, embracing 6,000 aspents. Subtracting the united areas of the military reservation and of certain confirmed private claims within the outboundaries of the Brown survey from the total area of the said survey, the remainder so nearly approximates the quantity originally claimed, and decided to have been confirmed, that said survey has been adopted and approved by this office and the Department, with the aforesaid exceptions of the reservation and confirmed private claims, as fully satisfying the claim of the city of Carondelet.

The title of the corporation to the common lands below the town rested entirely upon equity until the passage of the confirmatory act of 1812, the equity having its foundation in the evident intention of the granting authority to reserve the land for the common use of the inhabitants of the place. The confirmatory act perfected the equitable title in law, but only to the extent of the claim presented for confirmation, viz, for 6,000 arpents of land in all, and with the proviso that such confirmation should not be construed to affect the titles of persons whose claims had been confirmed by the board of commissioners.

In order to induce an approval by the Department of Brown's survey of the commons, the city of Carondelet, by ordinance of her councils, approved June 27, 1854, authorized the mayor of said city to execute a deed of relinquishment in full to the United States of the lands embraced within the Jefferson Barracks reservation, which deed was executed the same date and transmitted by the mayor to this office.

The United States, as the successor of Spain, in assuming the obligations imposed by the Spanish laws governing the possession of landed property, succeeded also to the exemptions and privileges of the Spanish law, so far as such law mitigated the said obligations. It is a principle of Spanish law that the government has a right to its military sites and reserves, which cannot be invaded or impaired by concessions of land to private or corporate ownership. This is laid down with perfect distinctness in the case of Colin Mitchell *vs.* The United States, (15 Peters, p. 80.) Therefore, in case the land in question had been covered by an absolute grant, the Spanish authorities could legally have held the same for military uses in case it were found necessary for purposes of defense, for subsistence of troops, or for the erection of buildings for their shelter, and the Government of the United States, as the successor of the Spanish authorities, is entitled to the same privileges as against the claimant under the laws or usages of Spain.

In view, therefore, of the bare equity of the original Spanish title of the village of Carondelet; the limitation of the claim presented for confirmation to 6,000 arpents, than which no more could possibly be construed to have been confirmed; the recognition and acceptance of the Rector survey of less than that number of aspents, for more than seventeen years; the right of the United States to make and hold the reservation by virtue of her own laws and those of Spain; the deed of relinquishment by the city of Carondelet of all right, title, and interest in the lands covered by said reservation, executed by her mayor under authority of her councils, together with the fact that the matter has been finally settled by this Department, after a thorough and protracted

examination, running through many years, and with due consideration of the claims of equity as well as the demands of law, I respectfully submit that legislation providing for revival of the case before the judiciary would merely prolong a useless contest, without any probability whatever of its ever reaching a different final adjustment than that in which it now is resting, and that by the investment of such further authority the public interests might not be subserved.

I have the honor to be, very respectfully, your obedient servant,

JOS. S. WILSON,
Commissioner.

Hon. MARTIN WELKER,
Committee on Private Land Claims, House of Representatives.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
December 20, 1870.

SIR: Referring to my letter to you of May 18, 1870, relative to the claim of the city of Carondelet to the lands covered by the Jefferson Barracks military reservation, I respectfully invite your attention to the fact that it is found, upon further examination of the matter, that the said reservation is included within the exterior limits of the Rector survey of the Carondelet commons.

I have the honor to be, very respectfully, your obedient servant,

JOS. S. WILSON,
Commissioner.

Hon. MARTIN WELKER,
Committee on Private Land Claims, House of Representatives.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 26.

THOMAS TYNER.

FEBRUARY 3, 1871.—Ordered to be printed.

Mr. WELKER, from the Committee on Private Land Claims, made the following

REPORT.

The Committee on Private Land Claims, to whom was referred the petition of Thomas Tyner, having had the same under consideration, make the following report:

Thomas Tyner, in his petition, states that he is the father and father-in-law of John Neff, John L. Parker, James W. Carpenter, and William W. Tyner; that they filed preëmption papers with the register of the land office at Danville, in Illinois, on the 26th of September, 1855, for section 31, township 29, of range 10 east; that Samuel Dinwiddie also filed such preëmption papers at same office 21st day of November, 1855, for the southeast quarter of section 3, township 28, range 9; and that said parties received certificates of such preëmption from the register of said land office. These lands were the odd numbered section, reserved to the United States from the Illinois Central Railroad lands; that said parties made improvements of said lands by building cabins, breaking and planting ten acres of prairie on each quarter, and continued to live on them until December, 1856, when the lands were paid for and they received certificates from the register and receiver of said office, which entitled them to patents for the same. They continued to live upon the lands until the winter of 1857, when the Commissioner of the General Land Office gave notice that George W. Danforth had filed a claim in said office adverse to said claimants; that a hearing of Danforth's claim was had before the register and receiver at land office at Springfield, Illinois, where the Commissioner directed them to be heard; that said officers, on such hearing, decided in favor of said preëmptors; they then continued in possession of said lands until the fall of 1858, when the said Commissioner reversed the said decision of the register and receiver at Springfield, and awarded said lands to Danforth, except the northwest quarter of section 31, which was afterward patented to Carpenter; that Carpenter had to commence and prosecute suit to recover, at an expense of eight hundred dollars, which he succeeded in doing. He further states that about the time said preëmptions were made he was advised by the Commissioner of the General Land Office that the said odd number of said lands were subject to preëmption and entry, under the act of 1841, and made said preëmptions on that assurance; that after said decision against said claimants all the odd sections had been taken up by speculators and preëmptors, and the said parties have not received pay for said lands or their improvements; that the petitioner furnished all the money for entry and improvement of the land, which, with loss of time, &c., amounted to about $10,000, and that the lands

are now very valuable. The petitioner asks to be reimbursed for the money paid for the lands, and improvements made.

On examination in the General Land Office, the committee find that Parker, Tyner, Dinwiddie, and Carpenter located land warrants on each of their quarters, and that Neff made a cash entry of his quarter; that the location of said Parker, Tyner, and Dinwiddie, and the cash entry of Neff, were, in 1857 and 1858, canceled by the Commissioner of the General Land Office for non-compliance with the requirements of the preëmption law, and the warrants returned to the local office at Springfield, for delivery to the locators. The committee is also informed that the purchase money paid by Neff will be returned him, upon a proper application therefor through the local office. A patent was issued to Carpenter, for his quarter section, 10th January, 1862.

Under these circumstances, and with this statement of facts, the question arises, first, whether the decision of the Commissioner of the General Land Office, canceling the locations and entries aforesaid, shall be regarded as final? The committee think that the decision ought not to be disturbed by congressional action. The question was fairly made to the Commissioner, and having entire jurisdiction of the subject-matter, as between the Government and the claimants, it should be regarded as final.

The next question is, regarding the decision as final, shall the preemptors be paid by the Government for the improvements made on the land? It will be remembered that the warrants were returned, and the purchase money ready to be returned on proper application, without legislation.

These preëmptions are made by the parties on public lands at the risk of the preëmptors. The Government is to settle between conflicting claims, and cannot be held to pay parties for improvements made under a supposed preëmption right. Any other rule would involve the Government in endless controversies with private parties making such claims.

The committee is not informed, only by the statement of the petitioner, as to the extent of improvements or their value made upon the lands.

The view taken by the committee makes it unnecessary to make that inquiry further.

The committee therefore recommend that the petition be laid upon the table, and the committee be discharged from any further consideration thereof.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 27.

ETHAN RAY CLARKE AND SAMUEL WARD CLARKE.

FEBRUARY 3, 1871.—Ordered to be printed.

Mr. WELKER, from the Committee on Private Land Claims, made the following

REPORT.

The Committee on Private Land Claims, to whom was referred the petition of Ethan Ray Clarke and Samuel Ward Clarke, have had the same under consideration, and make the following report:

That the said petitioners state that Congress passed an act, approved March 4, 1868, confirming their title to a tract of land five miles square in Nassau County, Florida, to them as assignees and successors of one John Underwood, who claimed to be a grantee of said tract from the government of Spain before the acquisition of Florida; that after said confirmation they found that portions of said land had been devoted to schools and railroad corporations under the authority of Government; that many settlers had located upon the same, and most of the valuable timber had been cut off and destroyed, greatly lessening the value of the land; that it would be a great hardship to turn off such settlers, and, besides, the petitioners allege they are too poor to litigate the title with the occupants. They therefore ask Congress to grant them land warrants to the extent of 16,000 acres, the estimated quantity in said original grant, with authority to locate the same upon any of the public lands of the Government, subject to entry by them or their assigns, they releasing to the Government their claim to said tract in Florida.

The act of confirmation provides as follows:

> That nothing herein contained shall operate to the prejudice of any claim which may be set up to said land by reason of any sale thereof, * * or of any person or persons who may be entitled to preëmption rights under any existing laws of the United States.

Affidavits have been presented to the committee showing that during the rebellion the timber on said tract of land, which was very valuable before the war, was cut off and destroyed, rendering the land much less valuable; and that numbers of settlers are now on the land, claiming title under the United States.

The committee do not think the Government bound to make good the damages the petitioners may have sustained by the cutting of the timber from the land; nor do they think the Government should, in advance of any legal investigation as to the title of the occupants of the land, afford the petitioners relief to the extent even of the quantity of land in possession of settlers; much less should the Government give them public lands for the whole quantity of the grant. No such equities appear to the committee as would call for any action of Congress upon the subject.

They therefore recommend that the petition be laid upon the table.

41ST CONGRESS, } HOUSE OF REPRESENTATIVES. { REPORT
3d Session. } { No. 28.

EXPULSION OF CADETS FROM MILITARY ACADEMY.

FEBRUARY 7, 1871.—Ordered to be printed and recommitted to the Committee on Military Affairs.

Mr. ASPER, from the Committee on Military Affairs, under the resolution of the House authorizing an investigation into the circumstances of the expulsion of Cadets Baird, Flickinger, and Barnes, and their subsequent enforced resignation, with the recommendations of the committee on the subject calling for action on the part of the House made the following

REPORT:

The Committee on Military Affairs, instructed by resolution passed on the 12th day of January, which is as follows—

Resolved, That the Committee on Military Affairs be empowered to send for persons and papers to investigate said matters of the expulsion and subsequent enforced resignation of Cadets Baird, Flickinger, and Barnes, and to report the facts to the House, with such recommendation, by bill or otherwise, as the facts, in their opinion, may warrant, and the committee shall have leave to report at any time—

Having taken the same into consideration, did delay action on the same until the 23d day of January, by request of the Secretary of War, on account of the semi-annual examinations taking place in the academy on the first days of the month; and on that day the committee resolved to ask the House of Representatives to so modify the order as to authorize the sending of a sub-committee to West Point to make the investigation on the ground, and to take such testimony as could be found there; and on the 24th day of January such modification was asked for by the chairman of the committee, which was granted, and the committee was so authorized.

Whereupon Hon. Joel F. Asper, Hon. Jasper Packard, and Hon. H. W. Slocum, of the Committee on Military Affairs, were appointed the sub-committee, and fully charged with the burden of said investigation; and in pursuance of the said resolution, the amendment, and their appointment, did proceed to West Point on the 27th day of January, and there inquired into the circumstances of the expulsion of Cadets Baird, Flickinger, and Barnes, and then proceeded to take the testimony of the superintendent and commandant, together with that of several officers and cadets of the academy, which, together with the documentary evidence in the case, having first been submitted to the Committee on Military Affairs, is now reported to the House as a part of the report of the committee, required under said resolution.

Your committee have found no great difficulty in ascertaining the facts in the case, as the War Department and the officers and cadets at the academy have promptly placed at the disposal of the committee every means and facility in their power to enable them to make a thorough and ample investigation.

Your committee have found and report the facts in the case to be as follows:

That the 2d day of January, 1871, was observed as a holiday at West

Point and in the academy, as New Year day, and for that day discipline was somewhat relaxed, nor was duty or study exacted of the cadets. In the evening the first and second classes had permission to have a hop, so called; the members of the third class were authorized to visit in quarters, while the fourth class had no privileges extended to them, and were required to observe their usual evening study hours, as the next day their examinations were to commence.

This restriction did not seem to be fully understood by all the members of said class; and this uncertainty, together with the associations and festivities of the day, were but temptations to the young cadets for taking some unusual license, which under other circumstances might never have been thought of or attempted.

During the day, Cadet Baird went to Highland Falls, and while there obtained some spirituous liquor, and it appears was more or less under the influence of liquor. After "call to quarters," which is from evening to half after nine o'clock, and is devoted to study in the Academy, Cadet Baird left his quarters, proceeded to the sink, where he changed his uniform suit for a citizen's dress, and again went to Highland Falls, without permission, in company with a member of his class, and at the Falls these cadets met two or three other cadets of the second and third classes. Previous to going, Cadet Baird had some conversation with his room-mate, Cadet Flickinger, about making his absence all right if he went away in the evening; but on going out he said nothing about making it "all right" with the sentinel.

The sentinel made his usual rounds in the fore part of the evening, when Flickinger reported "all right," which, under the police regulations of the commandant, meant "present," or, if absent, that such absence was for a necessary purpose and not to exceed ten minutes; that on the second round the same report was made. The sentinel believed that it was not all right, and asked the corporal of the guard what his duty was in the premises, and he was instructed that if the cadet reported all right, it was his duty to so report; and if the report was untrue, that the responsibility would then rest properly on the cadet who had made the report; that the corporal and sergeant of the guard went to the room of Baird and Flickinger to investigate the matter, and they were in the room talking with Flickinger at the time the sentinel made his second round.

Baird was absent until about half after nine o'clock, and returned to his quarters; and then was advised by some of his friends to make an explanation in the morning, which he had resolved to do. Barnes left his quarters the same evening, reported "all right" to the sentry as he passed out, went to the rear of the room occupied by Baird and Flickinger, crawled in at the window, and was found there during the evening. It does not appear precisely at what time in the evening this occurred, but it is clear that he had nothing whatever to do with the covering up the absence of Cadet Baird. His offense was the report, made to the sentinel, which became false by his subsequently visiting clandestinely at the room of Cadets Baird and Flickinger.

On the morning of the 3d day of January, the officer of the day and the sergeant of the guard made report of these facts to Lieutenant Colonel Upton, commandant of cadets at the Military Academy, who immediately made inquiry in respect to the same, and believing the offenses were of such a serious nature as to require an investigation, ordered Cadets Baird, Flickinger, and Barnes under arrest.

Cadet Baird had not carried out his conceived intention of making explanation at the time of his arrest; but afterward he sent a class-

mate to the first class to have one of their number come and assist him in reference to making up his explanation, and also to assist him in his defense on trial before a court-martial, before which he already knew or believed that he would be ordered; but no one came to his assistance.

On the same day the following dispatch was sent to General Schriver at Washington, the inspector of the academy, viz:

WEST POINT, NEW YORK, *January* 3.

General E. SCHRIVER, *Inspector, Washington:*

Want authority to bring Cadets Baird, Flickinger, and Barnes before the general court-martial which convenes to-morrow.

T. G. PITCHER, *Superintendent.*

Whether the authority was given as asked does not appear to the committee, but it is presumed that the same was granted. At parade, about four and a half o'clock in the evening, the following special orders was read to the Corps of Cadets, viz:

[Special Orders No. 1.]

HEADQUARTERS CORPS CADETS,
West Point, New York, January 3, 1871.

I. Cadet Baird is hereby placed in arrest, and confined to his quarters.

Charge. Absent from quarters without authority during all inspections of sentinels, from call to quarters to tattoo in the evening of the 2d instant.

II. Cadets Barnes and Flickinger are hereby placed in arrest, and confined to their quarters.

Charge. Conduct unbecoming an officer and a gentleman; making false report to sentinel on the 2d instant.

By order of Lieutenant Colonel E. Upton.

EDGAR G. STEEVER, JR.,
Cadet Lieutenant and Adjutant.

This was the condition of affairs as to the Cadets Baird, Flickinger, and Barnes, up to tattoo and after, on the evening of the 3d of January.

After tattoo the sentinels are relieved, and no guard is kept on the watch from tattoo to reveille. The officer of the day goes off duty for the night about half after ten o'clock. The officer in charge, who is an Army officer, and one of the instructors in tactics, visits quarters irregularly, after the officer of the day retires, to make the inspection. These visits are made about once a week, but not on regular nights. No such visit was made on this night.

The alleged offenses of these three cadets, and their subsequent arrest, occasioned considerable comment during the day, and some time in the day, but before two o'clock in the afternoon, the first class held a meeting at the room of Cadet Nave, and consulted about the matter. This meeting is alleged by them to have been spontaneous, without call, nor was an organization effected. The deliberations of this meeting were cut short by the arrival of the recitation hour. In the evening, after parade, and after the orders for arrest of the three cadets with the charges against each had been read, another meeting of the first class was held. This meeting was organized by choosing a chairman, who was Cadet Hoag; and it was finally decided that the class "should put them" (the three cadets) "off that night," and to effect it the whole class was divided into three committees. Between eleven and twelve o'clock at night they assembled, about thirty-seven in all, and proceeded to the rooms of the cadets. One squad went to the room of Cadets Baird and Flickinger, and then to the room of Cadet Barnes, while another squad kept watch outside. The party consisting of Cadet Davis, a cadet captain, in whose company Flickinger and Baird were enrolled, Cadet Grant, Cadet Roe, and others, went into the room of these two Cadets. Cadet Davis himself aroused Cadet Baird, and Cadet Grant was

seen in Cadet Flickinger's alcove. They were aroused, and told to get up and dress in citizens' clothes, as they had lied, and must leave the Point. The charge Baird denied, but the denial was met by the statement, "No matter; you must leave." The dressing was hurriedly done, Baird leaving his watch hanging in his alcove, and his effects scattered around. Flickinger did not have citizens' clothes sufficient to dress him, and a coat and other articles were given him. After being hurriedly dressed, they were taken into the area, and then into Cadet Hoag's room, where they were met by the party who had been sent for Cadet Barnes, and then they immediately started, in a hurried manner, to the rear of the grounds. As they passed the mess building, another squad was found, who reported "all right," and then all moved on together.

The first class was alleged to have all been engaged in this matter, with four or five exceptions. No personal violence was used; but Cadets Brush and others had hold of Cadet Baird. After leaving the buildings, there was much bad talking and threatening, and menaces, directed to these boys. On arriving at cadet limits, near old Fort Putnam, a halt was called, money was given them, inquiry was made as to where their trunks were to be sent, and they were told that they had lied; that the first class was doing this, and that was the way that the first class treated men who lied; that they should now go and never return; that if they did return, they would be tarred and feathered. Other threats were used. The cadets, when let go, ran away, and continued at full speed until beyond the reach of missiles. Nothing was thrown after them, nor does it appear that any of the cadets had clubs or stones in their hands. The first class then proceeded to their quarters quietly, being absent therefrom about twenty to twenty-five minutes. Nothing was observed unusual by any officer or other person at the post, nor had any officer either suspicion or anticipation of the occurrence.

The three cadets, Baird, Barnes, and Flickinger, went to Highland Falls, where they obtained beds about one o'clock on the morning of the 4th day of January. On this day (the 4th) they found themselves ill clad for the inclement season, in a strange place, without friends, as they supposed, and suffering from fear of violence. Baird was nineteen years of age, a delicate-looking boy, while Barnes and Flickinger were only about seventeen years of age.

They first wrote a letter to the first class, asking for their clothing, for Baird's watch, and other things. This was sent by a boy. Some clothing was returned, with Baird's watch, and with them a letter, signed "First class," and again telling them to give the addresses to which their trunks could be sent, and reiterating the threat that they must never return. After further deliberation, Baird and Flickinger concluded to go to Poughkeepsie, and Barnes to Jersey City, where he has friends, and await events.

At Poughkeepsie Baird and Flickinger fell in with a former classmate by the name of Andrews, who took them to his father's house, when, on deliberation, they concluded to and did write a statement of the affair to the superintendent, which was signed by both. The letter is a part of the evidence. Baird wrote another letter to Commandant Upton, also in evidence. These letters bear date the 5th day of January, and seem to have been written under the supposition that they would not be permitted to return; that they wished to be cleared from any charge of desertion, and be permitted to resign or be dismissed. On receipt of these letters at the post, the commandant telegraphed Baird:

> Remain at Poughkeepsie until you receive a letter advising you what to do.
>
> E. UPTON.

On the 6th, Lieutenant Starring was sent for Cadets Baird and Flickinger, to take them back to the post. He readily found them, and returned with them about four o'clock in the afternoon. They were taken to their quarters, where they were ordered to remain; were relieved from all duty, but to be held in arrest; to go to their mess under the cadet guard, and not to leave their rooms unless sent for. Very soon Commandant Upton sent for them, talked with them, and told them that he could obtain strong evidence against them; that they could take their choice—stand trial or resign. He also advised them, on their inquiry, that under the circumstances, the best thing they could do would be to resign, and he would send up their resignations with the charges against them. They were returned to their room, and immediately sent for resignation blanks, signed and sent them in, and on the same day they were each forwarded, attached to the charges and specifications preferred against each, with the following indorsements:

HEADQUARTERS U. S. CORPS CADETS,
West Point, N. Y., January 6, 1871.

Respectfully forwarded, approved. Charges have been preferred against Cadet William Baird of such a nature as to insure, beyond question, his dishonorable dismissal. I recommend the immediate acceptance of his resignation, which is freely tendered, with a view to avoid publicity. The consent of parents to the resignation of cadets should be waived in this case, as to require it would occasion useless mortification and delay.

E. UPTON,
Lieutenant Colonel First U. S. Artillery, Commandant of Cadets.

UNITED STATES MILITARY ACADEMY,
West Point, January 6, 1871.

Respectfully forwarded, for the reasons stated in the indorsement of the commandant of cadets. Would suggest that Cadet Baird's resignation be accepted at once.

T. G. PITCHER,
Superintendent Military Academy.

The indorsements on Cadet Flickinger's resignation are the same, with the change of name only.

The following is an official copy of the order accepting these resignations:

[Orders No. 1.]

WAR DEPARTMENT, OFFICE OF THE INSPECTOR
OF THE MILITARY ACADEMY,
Washington, January 9, 1871.

[*Extract.*]

* * The resignations of Cadets William Baird and Enoch H. Flickinger, United States Military Academy, have been accepted by the Secretary of War.

* * * * * * *

E. SCHRIVER,
Brevet Major General, Inspector.

SUPERINTEDENT MILITARY ACADEMY.

A true copy:

E. C. BOYNTON,
Brevet Major and Adjutant.

Cadet Barnes was returned to the academy on the 10th of January. Exactly how this was done the committee did not learn, but on the morning of the 11th of January he was taken up on the morning report, "rejoined from absence without leave." On that day he was examined before the academic board, and reported to the Secretary of War for dismissal, for deficiency; and on the 13th day of January, 1871, by Special Orders No. 2, War Department, "On the recommendation of the academic board, Cadet McDowel Edgar Barnes, United States Mili-

tary Academy, declared deficient in studies at the recent examination is discharged the service of the United States."

These cadets were dropped from the rolls of the academy—the two former by reason of resignation, and Cadet Barnes by reason of dismissal, for deficiency; and they left the academy promptly on being relieved by orders.

On the morning of the 4th of January, Cadet Captain Davis reported, with his cadet sergeant, on his official morning report, that Cadets Baird and Flickinger were "absent without leave." This is certified on honor; and as he had charge of these cadets in a military sense, should have reported the facts, he being the cadet who waked up Baird and assisted to send him off. Officer of the day, Mott, relieved this morning on guard mounting, reported to the commandant of cadets the absence of the three cadets under arrest at roll-call, and he was immediately dispatched to learn the reasons why. He returned, and reported their rooms empty, in confusion, but could learn nothing respecting them. This caused further inquiry and expressions of astonishment. The commandant immediately reported to the superintendent in person and officially, and the superintendent immediately forwarded the report to the War Department. It is as follows:

HEADQUARTERS UNITED STATES CADET CORPS,
West Point, N. Y., January 4, 1871.

SIR: I have the honor to report that Cadets Barnes, Baird, and Flickinger, placed in arrest yesterday, were absent from their quarters at reveille this morning, and still remain absent. As they have broken their arrests, I can only presume they have deserted.

I am, sir, your obedient servant,

E. UPTON,
Lieutenant Colonel First Artillery, Commandant of Cadets.

Captain E. C. BOYNTON,
Adjutant United States Military Academy.

Indorsed: Date, name of officer, and substance, and further as follows:

UNITED STATES MILITARY ACADEMY,
West Point, N. Y., January 4, 1871.

Respectfully forwarded for the information of the inspector of the Military Academy.

T. G. PITCHER,
Brevet Brigadier General, Superintendent Military Academy.

During the day of the 4th of January, Cadet James R. Wasson and Cadet Russell, of the first class, went to the commandant and told him what they had done with the three cadets, and that they were not absent voluntarily without leave; that the first class had sent them away from the post, and then and there undertook to justify their conduct, upon the ground that the honor of the corps was suffering; that these cadets had lied they were satisfied, and they had taken the responsibility of doing the act.

This was about eleven or twelve o'clock in the day, but not early enough to prevent the foregoing report, charging the cadets with desertion, from going on to the War Department.

The commandant immediately reported the facts to the superintendent, but not in writing; but no official report was made to the War Department by the superintendent until the 11th of January.

On the 4th day of January, Captain Clark, acting as commandant, sent for Cadets Wasson and Russell, and they were directed by him to "present a written statement of the transaction, and anything we [they] wished to present in regard to it;" and at the request of Cadets Wasson and Russell, Cadet Davis was added to the committee. These cadets

proceeded to discharge this duty, drew up a statement, and were getting signatures thereto, when the class became dissatisfied with the matter, called a meeting, and appointed Cadets Ulysses G. White, Vinton A. Godard, and George F. Chase a committee to make the statement. They drew up a statement in the nature of a justification, which bears date the 5th day of January. This paper bears no indorsement, and was handed to the superintendent without indorsement. It was probably handed to the commandant on the day it bears date, and by him handed to the superintendent. It is found among the files of the War Department, attached to the superintendent's official report, bearing date January 11, and by him referred to.

On the 10th of January, the day before this report was made, special orders were issued, affixing such punishment upon the first class as the superintendent believed he could affix, which was confining them to the Plain, and taking away their usual privileges.

In his report of the occurrence, the superintendent says:

"My order of yesterday will explain what action I have taken in the matter. The gravity of the offense was not fully understood until some days after the occurrence. My constant attention upon the examinations will, I trust, in a measure excuse my tardy action in this matter.

"I am, respectfully, your obedient servant,

"T. G. PITCHER,

"*Superintendent.*"

Nothing further was done with the offenders. No arrests were made, no charges preferred, nor has any action been taken by the War Department.

The cadets of the first class engaged in this transaction have been kept on duty as before, have charge of the cadets in the lower classes as captains and lieutenants, and are daily engaged in assisting to train and discipline the corps.

The class, with four exceptions, were engaged in this transaction. The exceptions are Cadet Lieutenant Mott, who was officer of the day, Cadet Pardee, Cadet Wheeler, and Cadet Mansfield. All the others, thirty-seven in number, were engaged in the affair.

It is proper to add here that Cadet Baird bore a good reputation up to this offense; and that Flickinger also had a good standing.

The reasons which induced the sudden outburst of mob spirit in the first class seem to be either incomprehensible, or spring from some cause which your committee have been unable to fathom. Your committee examined several of the officers on duty at the post, but the only reason they could assign was, that the authorities there had not been properly supported in their efforts to preserve order and an enforcement of discipline. The sum of the testimony on this point was, that discipline at the Point was as good, or rather better, for the last six months than formerly. And if this be true, its former condition must have been deplorable. The officers immediately in charge of the first class join in the report that this class have been more than usually amenable to discipline; have had a high standing for good and orderly conduct.

The officers of the academy knew nothing of the transaction, nor have they approved or in any way indorsed it. "In a military point of view" they have utterly condemned it. They, however, speak of the "motive of the first class as good." In Special Orders No. 3, Military Academy, issued by General Pitcher, of the date of January 10, in which notice was first taken of the offense of the first class, he says:

While conceding that the motive which animated the members of the first class

originated from a praiseworthy source, no words can express too forcibly the disapproval by the superintendent of the assumption of power by cadets, until now unknown to those who organized and for sixty-eight years have governed the Military Academy.

Your committee have made a statement of all the facts they could gather, and they believe them full enough for a proper understanding of the transaction, and report them to the House, in obedience to the resolution. And it now remains to make such recommendation as they believe the facts will demand.

1. As to the officers, the committee believe that the superintendent of the academy and the commandant of the corps of cadets failed to properly appreciate the gravity of the offense committed by the first class, and showed a disposition to avoid a proper investigation and punishment of the gross breach of discipline and violation of regulations committed by the class. In their urgent recommendations for the immediate acceptance of the resignations of Cadets Baird and Flickinger, they disregarded the following regulation of the academy, (See Regulations of United States Military Academy, page 49 :)

A cadet's resignation, if he be under age, must be accompanied by a written consent of his parent or guardian. (Paragraph 165.)

Their conduct in advising these cadets to resign before any notice had been taken of, or investigation ordered into, the outrage of which they had been the victims, is censurable. Their failure to take prompt action for the punishment of the offending class, by arresting the guilty cadets and preferring charges against them for a court-martial; their official expression of a belief that the class were actuated by "good motives" in their unlawful action; and their continuance of the first class on duty as cadet officers to enforce the discipline of the academy, amount, in the opinion of the committee, to a virtual sanction of the riotous proceedings of the class, and an encouragement of the repetition of the offense. The position thus assumed by the officers is subversive of the discipline of the academy. It will, if maintained, place the government of the institution in the hands of the first class whenever they see fit to constitute themselves the judges of the delinquencies of the members of the other classes, and will thus destroy all subordination and respect for law in the corps of cadets. The conduct of the officers shows a lack of comprehension of the principles of military discipline surprising in officers of long and honorable service in the Army. The only thing that can be said in extenuation of their action is the fact that their efforts to maintain discipline heretofore seem not to have been properly sustained by the authorities at Washington, and that sentences of courts-martial, providing for the dismissal of cadets, have almost invariably been remitted.

2. As to the case of the three cadets, Baird, Flickinger, and Barnes:

Your committee believe that they were guilty of serious offenses against the regulations and discipline of the academy; but from the circumstances and the character of the boys, they do not believe them destitute of either manliness or integrity. The two, Baird and Flickinger, freely admitted their offenses. It does not appear that Barnes has said anything on the subject of the transaction. Your committee believe that the publicity given this affair, and their enforced resignations, will be a severe punishment; and they should be restored, to take effect in June next. This will cause them a loss of a year in their course, and will be a sufficient guarantee that they will not again offend in a like manner.

The committee would make no exception as to Barnes. His exami-

nation, under the circumstances, and deficiency as the result thereof, should not be taken as irrevocable, and he should be also restored.

Your committee therefore recommend that Cadets Baird, Flickinger, and Barnes be restored, to enter the academy on the commencement of the next academic year.

3. As to the offense of the first class:

Your committee, in making a recommendation respecting this class, realize the importance of the subject. This class committed a grave offense. None graver can be committed by an officer or soldier. Such action on the part of the cadets is subversive of all discipline in the academy, and must tend to destroy its usefulness, and cause a vicious influence to emanate therefrom. The offense is the more grave because these cadets have been under military discipline for nearly four years, and would soon graduate to enter the Army, to assist, so far as the Army may, to protect the lives and property of the citizens of the country. These cadets could not have been ignorant of their duties, nor of the regulations under which they are governed. These they have made their study since they have been connected with the academy. They themselves assist, as cadet officers, to enforce discipline in the academy, and to bring to punishment those who violate the academic regulations. Further, they could not have overlooked or forgotten the academic regulations, which contain the following paragraphs, found on pp. 42 and 43 of the Book of Regulations:

124. All combinations, under any pretext whatever, are strictly prohibited. Any cadet who, in concert with others, shall adopt any measure, under pretense of procuring a redress of grievances, or sign any paper, or enter into any written or verbal agreement with a view of violating or evading any regulation of the academy, or do any act contrary to the rules of good order and subordination, or who shall endeavor to persuade others to do the same, shall be dismissed the service.

Again:

135. No cadet shall, without permission, visit during the hours of study, or between tattoo and reveille, or be unnecessarily absent from his room or tent at those times.

The facts in this case show clearly, not only combination and agreement, but that the class did such acts as were directly in violation of the rules of good order and subordination, so pointedly described in paragraph 124, the penalty for a violation of which is dismissal. If this offense is overlooked, how can good order, subordination, and discipline be kept up in the lower classes in the academy?

Your committee, therefore, believe that the cadets engaged in the disgraceful affair should be severely punished, and that any slight punishment will have the effect to aggravate the evil instead of proving a remedy.

Four years ago a part of the first class took an innocent cadet into their own hands, branded "thief" upon him, and drummed him from the Point. The instigators of the offense were tried by courts-martial, convicted, and sentenced to be dismissed; but on application to the authorities at Washington the sentence was remitted, and this recent outrage must be regarded as in part the fruit of the leniency then shown.

The committee are of the opinion that the members of the first class who were the instigators and leaders in the affair of the 3d of January should be at once dismissed from the academy, and that all the other members of the class who participated in the affair should be tried by a general court-martial and subjected to punishment. They therefore recommend the adoption by the House of the accompanying resolutions:

1. *Resolved*, That the House of Representatives recommend to the Secretary of War to restore Cadets Baird, Flickinger, and Barnes to

the Military Academy at West Point, to take effect with the beginning of the next academic year; and then permit them to proceed with the fourth class without further punishment for the offenses heretofore committed by them.

2. *Resolved*, That the House of Representatives recommend that the Secretary of War convene a court of inquiry for the purpose of ascertaining what members of the first class were instigators and leaders in the affair of January 3 at the United States Military Academy, and that such leaders and instigators be at once dismissed from the Military Academy, and the remaining members of the class engaged in the affair be punished at the discretion of a general court-martial to be convened for their trial.

DOCUMENTARY EVIDENCE.

COPIES OF THE PAPERS FROM THE WAR DEPARTMENT IN EVIDENCE BEFORE THE COMMITTEE ON MILITARY AFFAIRS, IN THE MATTER OF THE INVESTIGATION AS TO CADETS BAIRD, FLICKINGER, AND BARNES.

[Dispatch.]

WEST POINT, N. Y., *January* 3.

General E. SCHRIVER, *Inspector, Washington:*

Want authority to bring Cadets Baird, Flickinger, and Barnes before the general court-martial which convenes to-morrow.

T. G. PITCHER, *Superintendent.*

Report as to desertion.

U. S. MILITARY ACADEMY, WEST POINT, N. Y., *January* 4, 1871.

SIR: I yesterday asked authority, by telegraph, to bring before the general court-martial ordered to convene this day Cadets Baird, Flickinger, and Barnes, all of the fourth class. The former was charged with being absent from quarters after inspection, &c., and the last two for making false reports to sentinels. Those cadets were all absent at reveille this a. m., and are supposed to have deserted. Cadet Barnes, you may recollect, was tried for a similar offense before the last general court-martial, but was acquitted.

I am, very respectfully, your obedient servant,

T. G. PITCHER,
Superintendent Military Academy.

The INSPECTOR *of the U. S. Military Academy, Washington, D. C.*

Commandant's report.

HEADQUARTERS U. S. CADET CORPS,
West Point, New York, January 4, 1871.

SIR: I have the honor to report that Cadets Barnes, Baird, and Flickinger, placed in arrest yesterday, were absent from their quarters at reveille this morning, and still remain absent.

As they have broken their arrest, I can only presume they have deserted.

I am, sir, very respectfully, your obedient servant,

E. UPTON,
Lieut. Col. First Artillery, Commandant of Cadets.

Capt. E. C. BOYNTON,
Adjutant U. S. Military Academy.

[Indorsed.]

U. S. MILITARY ACADEMY, WEST POINT *January* 4, 1871.

Respectfully forwarded for the information of the Inspector of the Military Academy.

T. G. PITCHER,
Brevet Brig. General, Superintendent.

CHARGES AND RESIGNATION OF CADET BAIRD, WITH INDORSEMENTS THEREON.

Charges and Specifications preferred against Cadet William Baird, U. S. Military Academy.

CHARGE I. Violation of 114th paragraph Regulations U. S. Military Academy.

Specification. In this, that he, Cadet William Baird, of the U. S. Military Academy, was under the influence of intoxicating liquor between the hours of 5 o'clock and 10 o'clock, on the evening of the 2d of January, 1871.

All this at or near West Point, New York, on or about the date above specified.

CHARGE II. Conduct to the prejudice of good order and military discipline.

Specification. In this, that he, Cadet William Baird, of the U. S. Military Academy, did, without authority, absent himself from his room or quarters in Cadet Barracks, at or near 6.30 p. m. on the evening of January 2, 1871, and did remain so absent until at or near 9.30 p. m. the same evening.

All this at or near West Point, New York, on or about the date above specified.

CHARGE III. Conduct unbecoming an officer and a gentleman.

Specification. In this, that he, Cadet William Baird, United States Military Academy, being about to leave his quarters for an unauthorized purpose, did agree and advise with his room-mate, Cadet Enoch H. Flickinger, that he, the said Enoch H. Flickinger, should report the condition of their room as "all right" to the sentinels who should inspect it, thereby intending to deceive the said sentinels and shield him, the said Cadet William Baird, United States Military Academy, from the consequences of his unauthorized absence.

All this at or near West Point, New York, on or about the date above specified.

E. UPTON,
Lt. Col. First Artillery, Commandant Cadets, officer preferring charges.

Witnesses to first charge:
Cadet E. H. FLICKINGER.
Cadet R. B. WATKINS.
Cadet C. C. HEWITT.
Cadet U. S. GLOVER.

Witness to second charge:
Cadet C. L. DALLAM.

Witnesses to third charge:
Cadet C. L. DALLAM.
Cadet F. U. SIBLEY.
Cadet Q. O'M. GILLMORE.

[Indorsed.]

Approved.

T. G. PITCHER,
Superintendent Military Academy.

WEST POINT, N. Y., *January* 5, 1871.

SIR: I have the honor to tender the resignation of my appointment of cadet in the service of the United States.

I am, sir, very respectfully, your obedient servant,

WILLIAM BAIRD,
Cadet United States Military Academy.

Hon. SECRETARY OF WAR.

[Indorsed.]

HEADQUARTERS U. S. CORPS OF CADETS,
West Point, January 6, 1871.

Respectfully forwarded, approved. Charges have been preferred against Cadet William Baird of such a nature as to insure beyond question his dishonorable dismissal. I recommend the immediate acceptance of his resignation, which is freely tendered, with a view to avoid publicity. The consent of parents to the resignation of cadets should be waived in this case, as to require it would occasion useless mortification and delay.

E. UPTON,
Lieut. Col. First U. S. Artillery, Commandant of Cadets.

U. S. MILITARY ACADEMY, WEST POINT,
January 6, 1871.

Respectfully forwarded for the reasons stated in the indorsement of the Commandant of Cadets. Would suggest that Cadet Baird's resignation be accepted at once.

T. G. PITCHER,
Superintendent Military Academy.

Dispatches annexed:

[By telegraph.]

SAN ANTONIO, TEXAS, *January* 10, 1871.

To Major General ED. SCHRIVER, *Inspector U. S. Army:*

What is the trouble about my son at West Point? Please do the best you can in my interest, and Mrs. Baird will start North immediately. My duties will keep me here five months.

A. BAIRD.

WESTERN UNION TELEGRAPH COMPANY,
San Antonio, Texas, January 10, 1871.

General ED. SHRIVER, *Inspector General U. S. Army:*

Ask the Secretary of War to have my son tried, and not accept resignation.

A. BAIRD.

COPIES OF CHARGES AND RESIGNATION AND INDORSEMENT IN CASE OF ENOCH H. FLICKINGER.

Charge and specifications preferred against Cadet Enoch H. Flickinger, U. S. Military Academy.

CHARGE. Conduct unbecoming an officer and a gentleman.

Specification 1. In this, that he, Cadet Enoch H. Flickinger, United States Military Academy, did make an official report to the sentinel of the first relief, in charge of the division, that "it was all right" for his room, or words to that effect, which statement was false, his room-mate, Cadet William Baird, being absent without authority from said room at the time of the making of said report.

All this at or near West Point, New York, at or about the hour of 6.30 p. m. on or about the 2d day of January, 1871.

Specification 2. In this, that he, Cadet Enoch H. Flickinger, United States Military Academy, having reported "all right" to the sentinel of the first relief, at his inspection, about 6.30 p. m., his room-mate being absent from his quarters, did repeat said report of "all right" to the sentinel of the second relief, at or about the hour of 7.35 p. m., his room-mate being still absent from his quarters, and not having returned since the inspection of the sentinel of the first relief, and did fail to correct said report until directed to do so by the officer of the guard.

All this at or near West Point, New York, on or about the 2d day of January, 1871.

Specification 3. In this, that the cadet Enoch H. Flickinger, United States Military Academy, having reported his room as being "all right," did fail to correct said report after the absence of his room-mate had exceeded the ten minutes authorized for necessary absences by the regulations United States Military Academy.

All this at or near West Point, New York, on or about the 2d day of January, 1871.

E. UPTON,
Lieutenant Colonel First Artillery Commandant Cadets, officer preferring the charge.

Witnesses:

Cadet J. E. SHORTELLE.
Cadet R. B. WATKINS.
Cadet C. C. HEWITT.
Cadet Corporal B. REYNOLD.

[Indorsed.]

Approved.

T. G. PITCHER,
Superintendent Military Academy.

Resignation.

WEST POINT, *January* 6, 1871.

SIR: I have the honor to tender the resignation of my appointment of cadet in the service of the United States.

I am, sir, very respectfully, your obedient servant,

ENOCH HORACE FLICKINGER,
Cadet United States Military Academy.

HON. SECRETARY OF WAR.

[Indorsed.]

HEADQUARTERS U. S. CORPS OF CADETS,
West Point, N. Y., January 6, 1871.

Respectfully forwarded, approved. Charges have been preferred against Cadet Enoch H. Flickinger of such a nature as to induce his dishonorable dismissal beyond question. I recommend the immediate acceptance of his resignation, which is freely tendered with a view to avoid publicity. The consent of parents to the resignation of cadets should be waived in this case, as to require it would occasion useless mortification and delay.

E. UPTON,
Lieutenant Colonel First U. S. Artillery, Commandant of Cadets.

UNITED STATES MILITARY ACADEMY,
West Point, January 6, 1871.

Respectfully forwarded. For the reasons stated in the indorsement of the commandant cadets, I would suggest that Cadet Flickinger's resignation be accepted at once.

T. G. PITCHER,
Superintendent Military Academy.

WAR DEPARTMENT, OFFICE OF THE INSPECTOR
OF THE MILITARY ACADEMY,
Washington, January 9, 1871.

[Orders No. 1.—Extract.]

I. The resignations of Cadets William Baird and Enoch H. Flickinger, United States Military Academy, have been accepted by the Secretary of War.

* * * * * * *

ED. SCHRIVER,
Brevet Major General, Inspector.

SUPERINTENDENT MILITARY ACADEMY.

A true copy:

E. C. BOYNTON,
Brevet Major and Adjutant.

HEADQUARTERS UNITED STATES MILITARY ACADEMY,
West Point, N. Y., January 10, 1871.

[Special Orders No. 3.]

I. In the hope that time and sober reflection would impel the first class, concerned in the recent unwarrantable outrage on certain members of the fourth class, to disavow and regret their hasty action, the superintendent withheld his disapproval of their mob-law violence until all the circumstances were fully made known. From these it appears that certain cadets of the fourth class were guilty of a violation of the regulations and of the law concerning veracity, which, considered in relation to recent similar occurrences, are calculated to destroy the well-deserved, and until now the well-preserved, good name of the corps of cadets.

While conceding that the motive which animated the members of the first class originated from a praiseworthy source, no words can express too forcibly the disapproval by the superintendent of the assumption of power by cadets, until now unknown to those who organized and for sixty-eight years have governed the Military Academy. Well may the enemies of the institution point sneeringly at its teachings, which, after nearly four years, have produced in its graduating class no better fruit than this.

While expressing his bitter and profound regret at the cause and consequences of this most discreditable affair, the superintendent is of the firm conviction that but few of the entire body of cadets hold the reputation of the Military Academy in so little esteem as not to feel the deepest mortification at this exhibition of mob law among its members.

II. Until further orders the members of the first class will be confined to the limits of the plain bounded by the carriage roads passing the barracks, library, Fort Clinton, and the superintendent's quarters. They are further deprived of all privileges and indulgence granted cadets, nor shall they apply for the same.

Members of the class not implicated may be relieved from the operations of this order, in disavowing all connection with this disgraceful affair.

By command of Colonel Pitcher.

EDWD. C. BOYNTON,
Brevet Major and Adjutant.

INSPECTOR MILITARY ACADEMY.

Report of Superintendent.

UNITED STATES MILITARY ACADEMY,
West Point, N. Y., January 11, 1871.

SIR: I desire to bring to your notice, officially, the circumstances attending the action of the first class on the evening of the 3d instant, which I have already unofficially informed you of.

The causes which led to this unwarrantable action will be fully understood by the charges already forwarded, and the statement of the members of the first class, voluntarily tendered, and which is herewith forwarded. I will only add that one of the victims of this outrage (Cadet Barnes) assures me that no violence whatever was used toward them. The facts are simply these: They were aroused about 12 o'clock at night by some of the first class, told to get up and dress themselves in their citizens clothing, and were then conducted to the road running between Fort Putnam and the post, and told to leave, and not to return, on pain of being used more roughly if they did.

My order of yesterday will explain what action I have taken in the matter. The gravity of the offense was not fully understood until some days after the occurrence. My constant attentions upon the examinations will, I trust, in a measure excuse my tardy action in this matter.

I am, respectfully, your obedient servant,

T. G. PITCHER, *Superintendent.*

The INSPECTOR OF THE U. S. MILITARY ACADEMY, *Washington, D. C.*

Paper annexed:

WEST POINT, N. Y., *January* 5, 1871.

SIR: We have taken a step of some boldness, but not of precipitation, as we fully considered the consequences of our act before accomplishing it, and were urged to it by motives which we believed to be commendable and to the advantage of the corps of cadets.

The evidences against Cadets Baird, Barnes, and Flickinger were taken into account and fully weighed, and we thought their conduct was such as would justify our course of action.

These evidences are as follows, viz: Cadet Dallam states as follows: "I met Cadet Baird in Cadet Sibley's room just before 'call to quarters.' He seemed to be under the influence of liquor at the time. He told me he was going to 'Buttermilk.' I told him that he ought not to go, as his room-mate could not report 'all right' for him. His reply was, yes he could; that his room-mate would do anything he told him to or wanted him to do, conveying the idea that his room-mate was in some manner influenced by him; that it would make no difference about the matter of reporting all right to the sentinels, providing he were not caught in the act of going off limits to 'Buttermilk.' I endeavored further to dissuade him from his purpose. He burst out of the room and I saw no more of him."

Cadet Sibley states as follows: "I was in the quarters of Cadet Baird soon after supper, and while there Cadet Baird asked Cadet Flickinger if he would report 'all right' for him in case he 'ran to Buttermilk?' Cadet Flickinger replied that he would report 'all right,' which seemed to satisfy Cadet Baird."

Cadet Gillmore states as follows: "On the morning of January 3 Cadet Baird asked me how it would do to say in his explanation that he was on cadet limits at the time? I replied to him if he were disposed to lie about it that would be an excellent way to get out of it, but as for me I would rather be sent away than get out of a 'skin' in that way."

Cadet Watkins states: "I was on the first relief, post No. 2, on the evening of January 2, and when inspecting the room of Cadets Baird and Flickinger, put the usual question, 'All right?' to which Cadet Fleckinger, who was alone in the roon at the time, replied, 'All right,' but in a manner so confused and unreliable as to arouse my suspicions. Consequently, I repeated my question several times, Cadet Flickinger replying, in each case, 'All right.' I was not satisfied with this report, and told Cadet F. that I would report his room-mate, Cadet Baird, absent, in case he did not return in ten minutes from that time. He made some remark to the effect, 'Oh! you wouldn't do that;' or, 'That would be no way to do!' I acted in pursuance of my avowed intention, and reported Mr. B. absent to the officer of the guard, Cadet Shortelle, informing him of my suspicions."

Cadet Shortelle's statement is as follows: "Cadet Flickinger reported 'all right' to the sentinel of the second relief, while I was in his room talking to him about his report to the sentinel of the first relief. I asked him if he did that intentionally. He said he did not. I then went to the guard-room, but thinking it over I went back and ordered him to alter his report. As I was leaving his room he asked me if in case he should report all right to the sentinel of the third relief, if that would fix it all right, and if there would be any more inspections after that."

Cadet B. Reynolds states that "shortly after Cadet Shortelle's return to the guard-room, after having ordered Cadet Fleckinger to change his report, the sentinel on the post 2 called the corporal of the guard, and I answered his call. The sentinel then reported Cadet Baird absent. A few minutes afterward I went into Cadet Fleckinger's room, and I asked him if I should report Cadet Baird absent when the second relief went on post, 7.35 p. m. He replied in a very low voice, 'Well, I did it intentionally.' 'Well, should I report him absent at that time?' when he replied, 'Well, I don't know; I did it intentionally.' After my relief had come off post, I asked Cadet Fleckinger if he had reported 'all right' for Cadet Baird intentionally or unintentionally. He replied, 'I reported unintentionally,' or 'I meant unintentionally.' Some time after this occurred Cadet F. told me that if Cadet Shortelle had not ordered him to change his report he intended to put out his light and go to the sink, so that it would appear 'all right' when the sentinel of the third relief should inspect."

Cadet Wallace makes the following statement: "I was on No. 5, third relief, shortly after 9 o'clock. Cadet Barnes came out of his room and asked me if the officer of the day had inspected. I replied that the officer of the day had inspected, but that the officer in charge had not. Cadet Barnes then reported that it was 'all right' for him, and went out and did not return whilst I was on post."

Cadet Glover states: "I was sentinel on No. 2, third relief, and shortly before tattoo I opened the door of Cadet Baird's room to see if he had returned. In his room I discovered Cadet Barnes. I did not see the latter come on my post, and he could not have entered through the door without attracting my attention, as the doors were closed and could not be opened without some noise; consequently I inferred that Cadet Barnes entered the room through the window."

The events to which the foregoing statements relate occurred on the 2d day of January, 1871. The above is the evidence upon which we acted, and it showed conclusively to our minds that such men as these were unfit to bear the name and be the associates of gentlemen, and were a disgrace to the uniform which they wore. Moreover, from the manner in which some members of the fourth class have been conducting themselves of late, and the utter disregard of the truth which they have evinced, we judged that a severe example was necessary to amend this laxity of principle, and that were the matter to be conducted by the first class it would have a more decided effect upon them than would a regular process by the proper authorities, for their prevarications would, to a great extent, screen them from the eyes of the latter, while little or nothing could be concealed from those who have every opportunity of witnessing and hearing of their misdemeanors. These are the motives which urged us to the conception of our project and the execution of the decided step which we adopted.

We are, very respectfully, your obedient servants,

ULYSSES G. WHITE,
VINTON A. GODDARD,
GEORGE F. CHASE,
Committee representing the first class.

Lieutenant Colonel E. UPTON,
Commanding Corps Cadets.

Letter of the Secretary of War.

WAR DEPARTMENT, *Washington, January* 13, 1871.

DEAR SIR: Referring to the resolution adopted yesterday by the House of Representatives, directing that an investigation be made by your committee into the late disorderly proceedings at the Military Academy, I beg to state that the semi-annual examination of the several classes has been in progress since the 3d instant, and will not be finished much before the 20th day of the present month, if at all before that day. During these examinations the ordinary routine of affairs at West Point is in a great measure suspended, so that the officers and instructors may be as much as possible relieved from any business likely to distract their attention from this particularly exacting duty, and believing that the intended inquiry would act injuriously upon the academy if set on foot at once, I venture to ask that it be suspended till after the 20th instant, pledging myself and the officers thus to be accommodated, to forward the investigation, when begun, to the uttermost extent.

Be pleased to acquaint me with the determination of yourself and your associate members of the committee.

Very respectfully, yours,

WM. W. BELKNAP,
Secretary of War.

The CHAIRMAN OF THE COMMITTEE ON MILITARY AFFAIRS,
House of Representatives.

Reply.

COMMITTEE ON MILITARY AFFAIRS,
House of Representatives, January 13, 1871.

SIR: In reply to your note of this morning I have to say that the Military Committee will not meet until Monday. I will then lay before them your request for a delay until the 20th of the investigation ordered by the House of the late disorderly proceedings at the Military Academy, and I have no doubt your request will be complied with.

I will inform you of the action taken by the committee.

Your obedient servant,

AMASA COBB,
Acting Chairman Committee on Military Affairs.

Hon. W. W. BELKNAP,
Secretary of War.

Report on E. McD. Barnes, of the United States Military Academy, who at the examination in January, 1871, *was declared deficient in the fourth class.*

Brevet Major and Adjutant.

WEST POINT, N. Y., *January* 27, 1871.

General THOMAS G. PITCHER sworn and examined.

By Mr. ASPER:

Question. State your age, rank, and position in the academy.—Answer. I am 47 years old; colonel in the United States Army and superintendent of the Military Academy, which position I have held since August 23, 1866.

Q. Go on and state, if you please, in your own language, all you know relative to the recent difficulties that have occurred at the academy.—A. On the morning of the 4th of January, (present month,) soon after the academic board met for our semi-annual examination, the commandant of the cadets, General Upton, reported to me that Cadets Baird, Barnes, and Flickinger had deserted. Immediately afterward he handed me a written report to that effect, which I at once indorsed and forwarded to the War Department. Some time afterward, in the course of the morning, General Upton stated to me verbally that these gentlemen had not voluntarily deserted, but that they had been forced to desert—had been "sent off" by the first class, I think was the expression used; at any rate, that they had done so not entirely voluntarily. I told him that would not do, and that we must take measures to get them back at once. The general stated that he did not think that they had got beyond our reach, and I told him to take measures at once to get them back. The general did so, and reported to me soon afterward that they had got beyond our reach; that they had gone. The next I heard of the young men was the following evening, when I received a note from one of them, dated at Poughkeepsie. I sent for General Upton immediately, and told him to dispatch an officer in the morning and bring the young men back to the academy. He did so, and on the afternoon of the next day they were brought back. It was the next day, I think, during the examination, General Upton told me he had a written statement from the first class in explanation of their conduct. I told him I could not attend to it then, but when we got through we would talk about it. I did not see this statement until the academic board had adjourned; I then received their statement and published my order inflicting punishment in the matter, and made report at once to the War Department. I would state that after these young men arrived the general came to me and brought their resignations written out, which he stated was voluntary on their part; that they were very anxious to get off, and he was anxious that they should go at once. I told him that we would have to await the action of the Department; that I would forward the resignations approved. The charges against them were of a very serious nature, and I thought it best for them to let them resign than to stand a trial.

By Mr. SLOCUM:

Q. When did you first learn that the first class had taken this action? Did you learn of it before it occurred?—A. No, sir; never dreamed of it; no one ever dreamed of it.

Q. You never heard that there was any meeting of the first class until you were informed that the boys were gone?—A. No, sir; not until the boys were gone; no one could have anticipated it.

Q. Did you ever hear of an incident of this kind in the academy before?—A. Yes, sir; I can call to mind two similar instances.

Q. When did they occur?—A. I cannot, without reference to the records, state the time. One of the young men was the victim of a similar outrage, if you may so call it.

Q. Did these cases occur during your superintendency?—A. No, sir; both prior to my superintendency; but within the last ten years.

Q. Has any officer at the academy to your knowledge encouraged the first class in this movement?—A. No, sir; not at all. I do not think there is any officer here who has done so. He certainly would not remain here a day if I had a suspicion of anything of the kind, if I could help it.

Q. Is it customary now for a class to get together and appoint committees to visit the superintendent?—A. It is not.

Q. Has any instance of that kind occurred before?—A. Not within my knowledge. It is not only not customary, but it is against the regulations.

Q. Do you recollect of a case of an instructor here who was insulted by a cadet, and the cadet was punished after trial?—A. Yes.

Q. What was the instructor's name?—A. Captain Clark.

Q. What was the name of the cadet?—A. Shortelle.

Q. What were the circumstances attending that affair?—A. I would have to refresh my memory by reference to the order before I could state it. It was a case of gross insubordination on the part of the cadet. Charges were preferred against him; he was tried, sentenced to be suspended, and afterward reinstated.

Q. What became of the instructor?—A. He is still on duty here.

Q. He was not removed?—A. No, sir; he is still here. He is one of our best instructors.

Q. Was the cadet reinstated on your recommendation?—A. No, sir.

Q. Or any officers of the academy?—A. Not that I am aware of. It certainly did not come through me.

Q. Do you know of the influences that procured his reinstatement?—A. I do not.

Q. Can you tell when it occurred?—A. I cannot, without reference to the orders. I think it was last spring, while the young man was in the second class.

Q. Does that cadet belong to the present first class?—A. Yes, sir.

Q. How did the order reinstating the cadet come to you?—A. It came by mail, in the ordinary way, through the War Department.

Q. After the dismissal of that cadet, and prior to his reinstatement, did Cadet Grant get leave of absence and go from here to Washington?—A. That I cannot state without reference to the records.

Q. I understand you to state, then, that you have no knowledge of the influences that brought that boy back to the academy?—A. No, sir; none whatever.

Q. Never heard any rumor about it?—A. I have heard rumors. I have heard that young Grant wrote to his father about it; but this is mere rumor. I can state very definitely that I have no knowledge in regard to it.

Q. Is there an instructor here by the name of Leger?—A. No, sir.

Q. Has there been such an instructor since you have been here?—A. Yes.

Q. In what branch was he an instructor?—A. In the department of French.

Q. Are you a member of the academic board?—A. I am.

Q. How long was Leger an instructor?—A. I think one year.

Q. Was this Leger an instructor of young Grant?—A. I think he was part of the time. I do not know whether he was all the time or not.

Q. Did Leger recommend that young Grant be found deficient in French?—A. That I could not say without reference to the records.

Q. Was young Grant recommended by any instructor to be found deficient in French?—A. I think he was, once, during the first course.

Q. But you do not remember the name of the instructor?—A. I could ascertain it.

Q. Do you know why Leger was removed?—A. Yes, sir. He was removed because I thought he was incapacitated for a teacher; not that he did not have any knowledge of his course, but because of other reasons which incapacitated him for the position of teacher. He was removed upon my recommendation.

Q. What, in your judgment, has been the cause of this action on the part of the corps of cadets? What is your idea about it?—A. It would be merely inferential. In my opinion, the action of the authorities in remitting the sentences of two young men who, in the month of October, I think, were dismissed on charges similar to those for which these young men were dismissed—namely, lying—had something to do with it. These two young men were charged with lying, tried by court-martial, and sentenced to be dismissed. Their sentences were remitted to six month's suspension; or, rather, they were suspended to go on with the next class. It is my opinion that this had some influence with the first class in their action.

Q. To what class did these two cadets belong?—A. The present fourth class. I would say that this present first class has been one of the most subordinate, obedient, prompt in the performance of duty that has come under my observation since I have been in the academy.

Q. You have sentinels at the barracks all night?—A. No, sir; only sentinels until taps.

Q. At what time did this affair occur—the driving out of the cadets?—A. I think it was some time between tattoo and 12 o'clock.

Q. Is not the officer of the day supposed to be on duty at that time?—A. The officer of the day is not on duty all night.

Q. You heard nothing of this disturbance until you were informed the next day?—A. No, sir; there was no disturbance about it; no noise to disturb any one as far as I know. I suppose it is unnecessary to state that it was something that no one could anticipate.

Q. How many boys that have been dismissed have been reinstated since you have been superintendent?—A. I could not tell that without reference to the records.

Q. Please furnish the committee the names of cadets who have been dismissed from the academy and afterward reinstated, and upon whose recommendation it was done, if you can ascertain that?—A. I will do so.

Q. Did you inflict upon these young men of the first class, who were guilty of this offense, the extent of punishment that you were allowed?—A. Yes, sir; I considered that I did.

Q. Is there any difference among them as to guilt; any ringleaders?—A. I would state that in my order inflicting punishment I said that any gentleman disavowing complicity in the act would be relieved from the operations of the order. Since its publication I think I have relieved three; one gentleman was in the hospital.

Q. Give their names in this connection.—A. Pardee, Mansfield, Mott, and Wheeler. Two other gentlemen who were not included in the first order were afterward included under the provisions of it.

Q. Of these four one was in hospital, and the others disapproved of it?—A. Yes, sir.

Q. To your knowledge, has any officer approved of this action of the first class, or indorsed it in any manner?—A. I think not. If they did they would not stay here if I could help it.

Q. Since forwarding these papers to the War Department have you received any communication on the subject?—A. I have not.

Q. No notice has been taken of it?—A. None further than the acceptance of the resignations of the young men.

Q. You forwarded to the War Department a full statement of all that has transpired, and the Department has taken no notice of it except to accept the resignations of the boys?—A. That is all.

Q. The resolution under which this committee is acting was introduced in the House on the 8th of January, before, I believe, your report was received at Washington?—A. My report is dated January 10.

By Mr. ASPER:

Q. Have you letters from the Department accepting these resignations?—A. It is a special order.

Q. Can you furnish this committee with a copy?—A. I can.

By Mr. SLOCUM:

Q. Is it customary for the Department to reinstate boys here without your knowledge, or without informing you upon whose recommendation it is done?—A. We are never informed of that.

Q. They never inform you upon whose recommendation it is done, and they do reinstate boys without conferring with you in any manner?—A. Yes, sir.

Q. They never ask you for a report upon the case when an application for reinstatement is made?—A. No, sir; it is a sentence of court-martial, and it goes up to the authorities for approval.

By Mr. ASPER:

Q. When did you first hear of this affair?—A. The offense occurred on the night of the 3d of January, and on the morning of the 4th it came to my knowledge.

Q. And then you heard nothing of it until informed by the commandant?—A. No, sir.

Q. It would not any way come under your immediate supervision?—A. It would come to me through the commandant in the course of his routine duties.

Q. How early in the morning of the 4th of January did you hear of their desertion?—A. About 10 o'clock.

Q. How was it reported to you?—A. The commandant of the cadets first reported it to me verbally, and afterward he brought me a written statement.

Q. Had the charges not been preferred against the young men?—A. The charges, I do not think, had been preferred then.

Q. Were they not under arrest on the night of their being taken away?—A. That is something that would not come under my general supervision. The commandant had not reported it up to that time. You understand that he has immediate control of the corps of cadets.

Q. What voice have you in the discipline of the corps of cadets?—A. I have general supervison of the whole instruction, discipline, &c., of the corps. The commandant reports to me of course.

Q. I understand you to say that a note was sent to you by one of the boys.—A. Yes, sir.

Q. Can you furnish the committee with that note?—A. I think I can find it. It was written from Poughkeepsie the night after they left here.

Q. Did it come by mail?—A. Yes, sir.

Q. By whom was it signed?—A. By Mr. Baird.

Q. You can produce the note?—A. I think I can.

Q. At what time did you first know of the action of the first class in reference to this matter?—A. I think it was on the 5th. The commandant stated during that day that these gentlemen had not gone away voluntarily; that the first class had something to do with it; and the next day he made a written statement about it. He had before this made a written report of their desertion, which I forwarded to the Department.

Q. And after that report went he stated to you that it was an involuntary affair?—A. Yes, sir; and made further report on the subject, which I forwarded.

Q. What conduct, if any, had these three boys been guilty of previous to this time that might raise prejudice against them?—A. Nothing against two of them—Baird and Flickinger. So far as Baird was concerned he was a very good boy. Barnes had been tried before for making a false statement, and acquitted.

Q. Was that Flickinger's first offense?—A. He was a very reckless and indifferent kind of a man, but I think there was no charge against him.

Q. Was there anything serious against him?—A. Oh, no! He was only indifferent

and careless; that is, so far as I know. I had occasion to send for him and admonish him about his reckless and indifferent conduct.

Q. What part, if any, does the institution take in the moral training of the boys?—A. The same as other colleges—nothing beyond that. I am always particular, when I see a young man going astray, to send for him like I would my own boy.

Q. Was there anything that came to your knowledge tending to show any feeling between the first and fourth classes?—A. Nothing whatever.

Q. Will you state to us how it is that a boy who stood as well as young Baird, a son of an officer of the army, should, for this one misconduct, be treated so harshly, and his resignation urged by General Upton?—A. You have no reference to the corps of cadets?

Q. No, I am speaking in relation to young Baird.—A. I had probably better explain, that while Baird was not charged directly with lying, he connived with his room-mate to make this false report.

Q. But this was his first offense. I want to know why the first class should treat a boy so harshly, just for this one offense?—A. That I cannot explain. I suppose it is unnecessary for me to state that lying is considered a very high offense here. It has always been my effort to encourage truth-telling and to discourage prevarication. We always take a cadet's word for anything until we have reason to believe otherwise; I have tried to do so. We never for a moment doubt his word. If he says so and so that is sufficient for me, and I think that during the history of this institution this has been the practice.

Q. Is it not usual, when a class of young men like these are gathered together and are under strict discipline, to take opportunities of that kind and try to cover them up?—A. It certainly very rarely comes to my knowledge.

Q. Suppose that Baird had taken it on himself to leave the barracks and go out for two or three hours and the other boys had said nothing about it; what connection would there have been between Baird and them; would they have been subjected to punishment?—A. They are required to report. The sentinel of the post comes to the door to ascertain whether all is right in that room, and the occupant of the room must respond.

Q. Suppose Flickinger had said "not all right?"—A. Then Baird would have been caught.

Q. State Flickinger's conduct previous to this affair.—A. I think his conduct had been very fair up to that time. His demerit record is not so good. I think his conduct had been very fair.

Q. Is there any other cause than the one you have stated for this action of the first class in reference to these boys?—A. Not that I am aware of.

Q. In whose handwriting is that resignation?—A. It is a lithographic form.

Q. In whose office are these papers kept?—A. In the adjutant's office.

Q. Do you know anything about the signing of these resignations?—A. No, sir; they were brought to me by General Upton.

Q. How did Barnes get dropped?—A. Barnes came back, stood his examination, was found deficient and was discharged.

Q. What had his connection with this affair to do with his being dropped on examination?—A. Nothing at all.

Q. His examination occurred after his return?—A. Yes.

By Mr. PACKARD:

Q. Have you any recollection of the difficulty between a cadet by the name of Woodruff and another by the name of Hoyle?—A. Yes, sir; I merely recollect there was a difficulty between them.

Q. Didn't Hoyle make a statement that what he had stated previously in reference to Woodruff was false?—A. I do not recollect clearly about that. The commandant can probably tell you clearly on that point. I recollect that there was some difficulty, and that Mr. Hoyle had charges preferred against him which were afterward withdrawn.

Q. He having retracted his statements?—A. I think so.

Q. What I want to know is whether these facts came to the knowledge of the first class; and if so, why they made a distinction—why they treated Baird and these other men so summarily, and let Hoyle escape.—A. The commandant can tell you all the facts.

By Mr. ASPER:

Q. Did you demand a court-martial for this first class?—A. I did not; I simply made a report of the facts to the Secretary of War.

Q. What steps did you take in reference to their conduct previous to making this order of the 10th of January, or whatever date it is?—A. I simply had them make a statement, and on that statement I published that order and made report to Washington.

Q. That statement of theirs seems to be a justification of their conduct, does it not?—A. Somewhat, sir.

Q. That was their object in making the statement?—A. Yes, sir.
Q. Is it not the duty of the cadets to remain in barracks after taps?—A. Yes, sir.
Q. The first class had no more right to be absent than Baird had?—A. No, sir.
Q. It seems, from their own confession, that they had been absent from their quarters?—A. Yes, sir.
Q. And violated the rules of the institution in that respect?—A. Yes, sir.
Q. And no action has been taken in regard to it?—A. Nothing, except for the offense they committed.
Q. Did these boys not know that they violated the rules of the institution?—A. They must have known it.
Q. Their offense was not lighter than the offenses committed by Baird and the other boys?—A. It was absence after taps.
Q. And this was the same offense that Baird was guilty of?—A. One of the offenses.
Q. The same offenses the other boys were guilty of—covering up their absence?—A. No, sir; It was for making false report—a good deal of difference between the two offenses.

By Mr. SLOCUM:

Q. Who reinstates cadets; is it done by order of the President or of the Secretary of War?—A. They come through the Secretary of War; they are signed by the inspector by order of the Secretary of War.

By Mr. ASPER:

Q. For how long a period in the history of the academy has that practice been observed, of reinstating cadets without reference to the superintendent?—A. I presume always. It has never been otherwise to my knowledge. The authorities never consult a juror about their action. If the Secretary of War thinks proper to reinstate or reverse the decision of a court-martial, he can do so.
Q. If a statement is made to you about a cadet in the academy who is under the immediate command of the commandant of the corps, would you not refer it to him before taking any action upon the matter?—A. Of course; he has immediate control of the cadets.
Q. Would not the Secretary of War naturally refer to you any matter in relation to the academy before taking any action in regard to it?—A. That is not the custom.

By Mr. SLOCUM:

Q. Now, was not that done?—A. O, no.

By Mr. ASPER:

Q. Suppose a member of Congress should go to the Secretary of War and say, "I want my boy to have fair play; he has been expelled for some offense;" would not the Secretary of War refer that to you before he acted?—A. No, sir. If he was tried by court-martial he would have all the facts before him.
Q. Are cadets dismissed or suspended without the action of a court-martial by you?—A. No, sir.
Q. But the Secretary has such power?—A. Yes, sir; he can dismiss or reinstate.

By Mr. SLOCUM:

Q. Will you look over your records and give me the number of cadets that have been reinstated during the last ten years, the offenses for which they were dismissed, and upon whose recommendation they were reinstated, if you can tell us? Also furnish us with a copy of the proceedings in the cae of Shortelle.—A. I will do so.

WEST POINT, N. Y., *January* 29, 1871.

General EMORY UPTON sworn and examined.

By Mr. ASPER:

Question. State your rank and position, both in the Army and here, and how long you have held the position here.—Answer. I am colonel First United States Artillery and brevet major general United States Army, and commandant of the Corps of Cadets, United States Military Academy; have held that position since July 1, 1870.
Q. Please state to the committee, in your own way, all you know in relation to the recent transactions here about which this committee is inquiring, giving names, dates, &c.—A. The unauthorized absence of Cadet Baird from his quarters, and the false report made by Cadet Flickinger to cover his absence, were reported to me officially, I believe, by the officer of the day on the morning of the 2d or 3d of January. I could tell exactly by looking at the official records.
Q. Was that report in writing?—A. It is an official report; whether in writing or not I cannot say.
Q. If it is I would like to have a copy of it.—A. I can furnish you with a copy if it

was in writing. The circumstances connected with it were reported to me, and the fact that Cadet Flickinger had answered all right to the sentinel. I sent for Mr. Shortelle, who was officer of the guard, in regard to the matter to ascertain the whole truth, and I believe it was from him that I learned that the sentinel received the answer "all right" from Flickinger. Shortelle was required to inspect the relief.

Q. What does this inspection mean?—A. It is to ascertain whether all is right in the barracks. The form "all right" as applied to a room signifies that all the cadets who belong in the room are present; that no cadet is absent, or if absent is absent by proper authority or for a necessary purpose, which covers an absence of only ten minutes; and if anybody is visiting in the room, it is on duty or by authority. It simply imposes on every cadet to make answer on his honor. Cadet Flickinger reported to the sentinel, Watkins, when asked, "all right."

Q. You don't know anything about that except as it comes to you?—A. Except as it was reported to me by the officer. Flickinger made this report in such a manner as to lead Mr. Watkins to believe it was not all right.

Q. Do you get this from the report the first class made to you?—A. No, sir; I get it from the report the officer made to me.

Q. Are these reports usually in writing?—A. The sentinel makes a verbal report. If the cadet is absent that absence is recorded on the report of the officer of the day, and comes to me in writing. Mr. Baird, I am pretty sure, was reported absent on the report of that morning. I will send for the reports and lay them before the committee. As I was saying, Cadet Flickinger reported in such a manner as to denote to the sentinel that he was making a false report, and when the officer of the guard asked the sentinel if it was all right on his post, he answered that it was reported all right. "Well," says the officer, "if it is reported all right it is expected to be all right. Why do you say that?"—Mr. Watkins replied that Flickinger reported all right, but he did not think it was all right for Mr. Baird, who was Flickinger's room-mate. Flickinger had made this report, and it became official through the officer of the guard of the next relief that went on at 8.40. In the mean time Shortelle went to Flickinger to ascertain what he meant, and whether he intended to report in that way. When the next relief reported, I understand that Shortelle was in the room at that time investigating the case, and Mr. Flickinger repeated the report again, showing that it was deliberate on his part, and false; and on the testimony I collected that morning I issued the order placing him in arrest.

Q. When did you issue that order?—A. On the morning of the 3d.

Q. Who were embraced in the order?—A. Cadet Flickinger.

Q. Anybody else?—A. I think Cadet Barnes.

Q. How was Barnes connected with it?—A. Barnes was in Flickinger's room. Mr. Barnes came out of his room and asked the sentinel if the officer of the day had inspected. The sentinel replied he had, but the officer of the guard had not. He then said, "It is all right for me." It could only have been all right if he was going to the sink. If I had inspected the guard at any time within ten minutes, the sentinel would have been justified in reporting to me "all right," accepting, of course, Mr. Barnes's statement as true. Instead of going to the sink and staying ten minutes he absented himself from his quarters for a considerable time, and was found in Cadet Flickinger's room many minutes after, under any circumstances, the proper time for him to return to his own room.

Q. Who found him?—A. The sentinel in Mr. Flickinger's division. He was found in Flickinger's room, and he had not come through the door. He had evidently entered through the window. That was sufficient to my mind to convict him of false statement.

Q. How convict him of a false statement?—A. He had reported "all right" to the sentinel, and it became a false report the moment he did not return. It was intended to cover his absence.

Q. Was Barnes present when the sentinel asked?—A. Every cadet, when he leaves his room, is required to report to the sentinel. When Barnes came out of his room and reported to the sentinel "all right," it meant that he was going to the sink. Instead of that he goes to visit another room, going through the window, and was found there by the sentinel.

Q. When did you hear of that?—A. It came to me officially from the officer of the day.

Q. Was that report in writing?—A. I think it was a verbal report.

Q. What did you do?—A. That was sufficient to put him under arrest. I put Cadets Flickinger and Barnes in arrest for false statement, and Cadet Baird in arrest for absenting himself so long a time from his room. I did not know then that he had been at Buttermilk Falls. There is a regulation that when a cadet is reported absent he shall render a written explanation, and if he does not expressly state in it that he was on cadet limits he shall be considered as having gone off cadet limits, and punished accordingly. That was the extent to which Mr. Baird had involved himself up to the time when the first class took their action.

Q. Who wrote out these charges against the cadets?—A. They were written out in my office, under my direction.

Q. Upon these charges, who ordered the arrest of the boys?—A. I did. I generally give a writtten order: "Cadet So-and-so is placed in arrest; charge, conduct unbecoming an officer and gentleman—making false statement."

Q. That is in writing?—A. Yes, sir.

Q. We would like to have copies of the orders in these cases.—A. I will supply the committee with them.

Q. What is the form of arrest?—A. The cadet sergeant is sent for and the order delivered to him. He proceeds to the cadet and says: "You are placed in arrest; charge, so-and-so." That is a verbal order, and then at parade following the official order is published to the corps.

Q. When were these arrests published?—A. On the 3d of January. It was on the night of the occurrence.

Q. Was it published before the whole corps?—A. Yes, sir.

Q. Including the first class?—A. Certainly.

Q. Did these boys violate their arrest?—A. Not to my knowledge. I have here now the morning reports, and will read such references as appear in them in regard to Baird, Flickinger, and Barnes. On the report of January 3 appears the following: "Cadet Baird absent from quarters at inspection of sentinel, 7.35; and again at 8.40 p. m." This is the official report of the officer of the day, Cadet Lieutenant A. H. Nave; and in the same report, in Mr. Nave's writing, is stated: "Mr. Barnes is reported from quarters over ten minutes." This report was handed in on the morning of the 3d, and all of this occurred on the night of the 2d. Cadet Flickinger's name is entered for making false report to the sentinel, and it is entered in the name of the officer of the guard, Shortelle. In addition to this the officer of the guard makes a personal explanation. Upon that report I made an investigation, and made the order for the arrest of the cadets. This thing occurred on the night of the 2d. The first time it could be brought before me officially was the next morning at 8 o'clock, when the officer of the day made his report.

Q. Is it usual for the officer of the day to make an extended verbal report beyond what he makes in writing?—A. Sometimes he makes other statements.

Q. This, then, was one of those cases in which he made a special report in addition to his written report?—A. Yes; he had reason to believe there was an official falsehood to report it. This morning report is given on his honor: "I have the honor to state that I have performed my duty as officer of the day in accordance with existing rules and orders." I have here an official copy of the order placing Cadets Baird, Barnes, and Flickinger in arrest, published officially to the corps, January 3, 1871:

"[Special Orders No. 1.]

"HEADQUARTERS CORPS CADETS,
"*West Point, N. Y., January* 3, 1871.

"I. Cadet Baird is hereby placed in arrest and confined to his quarters.

"CHARGE. Absent from quarters without authority, during all inspections of sentinels from call to quarters till tattoo, on the evening of the 2d instant.

"II. Cadets Barnes and Flickinger are hereby placed in arrest and confined to their quarters.

"CHARGE. Conduct unbecoming an officer and a gentleman, making false report to sentinel on the 2d instant.

"By order of Lieutenant Colonel E. Upton.

"EDGAR Z. STEEVER, JR.,
"*Cadet Lieutenant and Adjutant.*

"Official copy."

Q. Have you the morning report of the 4th?—A. Yes, sir. I would state that the absence of Cadet Baird from 7.35 to 8.40 p. m., as reported on the morning report of 3d, is sufficient cause to place him in arrest without any investigation whatever. This is a report of Cadet Lieutenant Mott, officer of the day, relieved on the morning of the 4th. On this appears the names of Barnes, Flickinger, and Baird, reported by him for absence from reveille and breakfast roll-call.

By Mr. SLOCUM:

Q. Was it part of the business of the officer of the day to visit quarters at night?—A. It was not.

Q. How was it the officer of the day of the previous day knew of the delinquencies of these three boys, while the officer of the day of the next night failed to report that the whole first class had gone to the quarters of these men?—A. I will state that never within my recollection, dating back until 1856, has it been customary to have sentinels

in barracks after 9.45 p. m. The only means that have been taken to keep cadets in their quarters after tattoo, and between that and reveille, is by means of frequent inspection by an Army officer in charge of the various cadets. They make this inspection once a week, and sometimes oftener.

Q. What are they called?—A. Assistant instructor in tactics.

Q. One of these officers did not make such an inspection that night?—A. It did not happen that they made one that night. It is possible for every man of the corps to be absent to-night, and to remain absent until reveille. It has never been thought necessary to keep sentinels on post all night. The officer of the day is not on duty at all after half-past ten. You understand that it has never been considered necessary to have sentinels on post all night. Of course if there are no sentinels men could steal out of their rooms quietly and nobody would be wiser at all. It will probably appear to you that Mott was the only man in the class who was profoundly ignorant of what was going to occur. Of course they could not say anything to him, because it would have been his duty to report it.

Q. He was on duty that night?—A. Yes, sir.

Q. You say officer Mott was of the first class?—A. Yes, sir.

Q. He was profoundly ignorant of what transpired that night?—A. Yes, sir.

Q. How was this class situated; all together?—A. No; they are distributed probably in every division of the barracks.

Q. Was Mott rooming with a member of his own class?—A. I believe he is.

Q. Did that member of the class know anything of this transaction?—A. That I do not know; it would have been possible for that member of the class to steal out of his room and Mott know nothing about it. Many men going to bed at half-past ten never wake up at the firing of the gun, and do not rouse until a "bull's-eye" is thrown on their face.

Q. Have you the morning report of the 5th?—A. Not with me, but there is nothing on the report of that day relating to this subject, I believe.

Q. When did these boys return?—A. I would like to look at my morning reports before I answer that question. It was either the 5th or the 7th.

Q. Their resignations are dated the 6th?—A. I believe that was the day they came back.

Q. On what day were they reported "absent from reveille and breakfast roll-call?"—A. That is on the report of the 4th, but the officer stated verbally in addition that they could not be found in their rooms. My impression was that they had deserted, and I made the remark that I was not prepared for such depravity.

Q. When did you learn that they had deserted?—A. About 8 o'clock on the morning of the 4th.

Q. Now, then, what further did you learn about them, and when and how?—A. The next thing I learned in regard to them was that two members of the first class, Cadets Wasson and Russell, came to me and reported the circumstance of the class having gone to their rooms the night previous, having ascertained to their satisfaction that these cadets had been guilty of falsehood. Of course they went into a justification of their course. They stated that the reputation of the corps had been suffering a long time from statements that the members were not as truthful or as honorable as they had been before, and that too many cases of this character had come to light recently, and they believed it was necessary to place some seal of condemnation upon that kind of conduct, and that they decided as a class that the only way they could do that was by telling these persons to leave the post, that they would not have them in the corps. They stated they went to the rooms of these cadets and informed them of this, took them up the back road near Fort Putnam, gave them citizen's clothes and some money, I think they said $50, to support them until they could get assistance from their friends, and then told them to leave. They stated further that it was a transaction of the whole class, and that they were all alike responsible.

Q. What time did they make this statement to you?—A. It was before 11 o'clock, I think, on the morning of the 4th of January.

Q. What did you then do?—A. I reported it to the superintendent.

Q. What further action was taken?—A. These gentlemen told me that there was nothing done but what any member of the class would tell me freely, and that they had given me the substance of it. I then directed them (for it amounted to a direction) to submit to me in writing the evidence on which they acted.

Q. You asked them to submit the evidence?—A. Yes; for I wanted to get at the root of the matter. They then submitted this statement to which the names of Chase, Goddard, and White were signed. The act was avowed as the act of the whole class, and one for which they expected to receive punishment. They said they were willing to do this rather than that the state of the corps should degenerate, or that it should be subjected to a bad reputation. All this I say I reported to the superintendent. I did not consider it necessary to put the whole class in arrest, for the reason that whatever was done should be done in a very deliberate manner, and there was plenty of time to consider what steps should be taken in the premises.

Q. The regulations require all the cadets to be in their rooms during the night, do they not?—A. Yes, sir.

Q. It is expected of them as a matter of honor?—A. No, sir; it was not, and never has been. The requirement is that they shall be in their rooms from taps to reveille.

Q. Now this first class absented themselves from their rooms contrary to regulations?—A. Yes, sir.

Q. And two of the members of that class waited upon you the next day and told you?—A. Yes, sir.

Q. When did they submit their defense in writing to you?—A. I think it was the following day.

Q. Was it before or after these boys were brought back?—A. I am not positive as to that.

Q. How did you learn where the boys were?—A. I heard at first that they were at Highland Falls, but I could get no communication with them there. Afterward I got information that enabled me to find where they were from Mr. Baird, who wrote me a letter dated at Poughkeepsie.

Q. Who went for them?—A. Mr. Starring, one of my assistants. I telegraphed Mr. Baird, on receiving his letter, to wait there.

Q. Did he bring them all back?—A. He brought back Flickinger and Baird, I think.

Q. At 11 o'clock you learned that these boys had not deserted?—A. Yes, sir.

Q. At what time was the report made to the Secretary of War that these boys had not deserted?—A. That I do not know. My report was made before I had any knowledge of it.

Q. What report?—A. My report to the superintendent.

Q. What, if anything, has been done with the first class about it?—A. Nothing has been done except the fact has been reported to the War Department and an order issued by the superintendent.

Q. Did you make any report in writing to the superintendent about the first class?—A. No sir, I did not; I have daily contact with him.

Q. You reported to him verbally during the day that these boys had deserted?—A. That I reported him officially, and sent a regular letter to him.

Q. What you reported about their not having deserted was done verbally?—A. Yes, sir.

Q. What day did you report that fact?—A. That I am not prepared to state.

Q. Examine this letter and state in whose handwriting it is, and what it is. (Paper handed witness.)—A. That is a letter to the inspector of the Military Academy, signed by the superintendent.

Q. In reference to the desertion of the boys?—A. Yes, sir.

Q. When is it dated?—A. January 4.

Q. State what action, if any, was taken in reference to this first class?—A. The action that I have stated. I understand that the facts were reported to the inspector of the Military Academy or to the Secretary of War, and a special order issued confining them to the Plain; that order is still in force, and deprives them of all their privileges.

Q. No arrests were ever made?—A. No arrests were ever made. I can give you one good reason for not arresting the whole class; the first-class cadets stand in the relation of officers to cadets below them, and to place the whole class in arrest would have been to entirely subvert discipline. It was tried once, and it resulted in the appointment of other cadets as officers who were not fitted for the places, and who were promoted not because of any particular merit of their own, but simply to meet the exigency of the moment, and it resulted in reducing discipline very materially.

Q. These cadets still perform duty as officers?—A. Yes, sir; they perform the same duty as before.

Q. Treated in the same manner as if nothing had occurred?—A. They are deprived of their limits and privileges.

Q. How long had these three boys been here?—A. Barnes and Flickinger were admitted in June, and Baird, I believe, in September.

Q. What has been the conduct of Baird since his admission here?—A. Within my knowledge it had been exemplary up to this time.

Q. He had never been charged with lying up to this time?—A. He had never been charged to me.

Q. His standing was as good as any man in the class?—A. I have heard expressions of officers not complimentary to him, but he had never been charged to me with anything.

Q. What was Flickinger's standing?—A. He had never come before me for anything of this nature.

Q. Was his standing as good as the class generally?—A. I believe it was.

Q. What was Barnes's conduct?—A. Barnes was a very depraved character in my opinion, wholly unworthy in regard to matters of truth; he was filthy in appearance and ungentlemanly in his conduct; there was nothing about him denoting self-respect or pride as a cadet.

Q. Had he ever been charged with misconduct?—A. He has been tried for an offence very similar to this.

Q. What was the result of the trial?—A. He was acquitted; there were other cases, however, that could have been proved completely in regard to his lying.

Q. Do you know the facts of your own knowledge?—A. The facts were reported to me in such a manner that I could have taken action if I wanted to.

Q. If you have now the morning reports before you I wish you would refer to them and state what they contain in reference to these three cadets.—A. On the morning of the 6th Baird and Flickinger are still reported absent without leave; Barnes had been dropped as a deserter, and does not appear on this report; in regard to this matter these cadets should have come back and reported to me the next morning; that would have been their duty in the case; Mr. Baird says that he would have done that, that he knew it was his duty, but I believe he was afraid of the first class. I have his letter.

Q. What report, if any, did these boys make to you when they returned?—A. I had the letter that Baird wrote that night, and as the class had confessed the whole thing, so that I knew without any further investigation what had been done, they assured me that violence had not been done.

Q. Was anything stated about threats?—A. I do not remember. It is very natural that there should have been threats under such circumstances.

Q. Did they say anything about it?—A. I do not think they did.

Q. Is it not unusual to examine boys under charges?—A. I cannot say that I have a fixed rule in regard to the matter; I sometimes send for the boy and examine him.

Q. About what time did these boys come back?—A. They must have arrived here about 3 or 4 o'clock in the afternoon.

Q. What time in the afternoon did they send in their resignations?—A. Shortly afterward.

Q. Who advised them to resign?—A. I called Flickinger and Baird to my office, and told them of the state of the case and the charges against them, mentioning the evidence I could produce against them. Flickinger fully avowed having been guilty of the offence, and Baird did practically the same thing. He tried to excuse his conduct on the plea of intoxication. I told them that they would be tried of course, and it was for them to decide whether they would stand trial or not; that they were under no obligations to resign, and I expressly stated to them that they must feel that they were not resigning under compulsion; that they could resign or not as they chose, but that under the circumstances it was best for them to resign. I told them of all the evidence against them, and they finally concluded to resign.

Q. What did you say to them about the continuance of the difficulties between them and the first class if they did not resign?—A. I do not think I stated anything.

Q. Is it usual in the practice of the academy to dismiss boys by court-martial for an offense of this character, and it being the first offense?—A. I have never known of a case being officially condoned. I have always considered it my duty to take prompt action in the matter, and whenever I have the facts of a cadet making a false report so that there is no doubt about it, I shall prefer charges against him most assuredly.

Q. Is it usual for courts-martial to dismiss cadets for this offense?—A. They have to do it; they have no discretion.

Q. Is there no discretion in you about preferring charges?—A. It is entirely discretionary with me.

Q. Do you usually prefer charges for the first offense?—A. I have never failed to prefer charges when I found a cadet deliberately falsified. There are all grades of falsehood, from perfect truth through ingenuousness to downright falsehood. I have to be careful that I have a case of intentional falsehood.

Q. What, in your opinion, was the cause that induced the first class to this action; what was the true motive that induced them to this act?—A. The action was wholly unexpected to everybody, and the only reason that I ascribe, and the only one stated in their own explanation, was the desire on their part to purge the corps of any men guilty of dishonorable acts. That was, I understand, the impelling motive. It was the motive they alleged to me, and the sole motive, I believe.

Q. But these boys had not been guilty of any offense previous to this time?—A. The offense of falsehood has always been regarded as a most serious one here, both officially and among the cadets themselves, and naturally it must be a grave offense, inasmuch as the whole character of an officer rests on his integrity. He can be of no service to the Government if he is not a man of integrity.

Q. How was it yourself and General Pitcher urged the acceptance of these resignations without reference to the parents, as is usual in such cases?—A. They had committed the offenses with which they were charged, and I thought it was better for the men the quicker they were out of the corps.

Q. Would it not have been better to have had a trial by court-martial to see if they were guilty?—A. If a cadet is conscious of having committed the offense with which he stands charged he escapes publicity, and that is a consideration for a cadet resigning,

if he knows he will be found guilty. I only advised their resigning in case they knew the charges were true.

By Mr. PACKARD:

Q. Cadet Barnes did not resign, but was examined by the board and found deficient?—A. Yes, sir.

Q. What day was that?—A. I will have to refer to the records of the academic board to answer that.

Q. Who filled up the lithographic forms of letters of resignation for Cadets Baird and Flickinger?—A. I understand they did this themselves.

Q. Where was it done?—A. It was done in their own room.

Q. Where did they get the blanks?—A. At the adjutant's. The blanks are kept there, and supplied to those who want them.

Q. Who brought their resignations to you?—A. I believe they brought their resignations in person.

Q. Within a half an hour or an hour afterward?—A. Yes, sir, they went to their room with an officer. I would like to have it fully understood that the whole motive I had in advising them to resign was that I felt perfectly confident they were guilty of the offense, and the effect of the immediate acceptance of their resignation would be beneficial to the corps, as stamping that conduct in such manner that it could not be very well imitated.

By Mr. SLOCUM:

Q. What effect would the action of the first class have on the corps?—A. The action of the first class, in shaping a certain amount of sentiment in regard to this matter, I think will be beneficial. It will lessen the tendency to falsehood, if there is any such tendency prevailing.

Q. Which would you think, as a graduate and officer of the academy, to be most injurious to its discipline and tone, allowing these cadets to remain in the corps or a mutiny on the part of a whole class?—A. I cannot conceive that a mutiny could occur.

Q. What do you call this proceeding of the first class?—A. It was an act the result of a few moments deliberation—an act that none here in authority could have anticipated or have prevented. It was not an act like refusing to do a certain duty, or planting themselves down and refusing to obey an order. This was the work of a moment and the result of a sudden ebullition of feeling. A mutiny would be where a class took upon themselves to defy the authorities.

Q. Do you know of any instance in which a class took upon themselves to expel anybody from the corps?—A. I never heard of but one other case.

Q. What punishment was inflicted upon the offending class?—A. That occurred before I was commandant.

Q. As to this being absent from quarters, have you not heard of a good many instances of boys going out and leaving stuffed dummies in their beds?—A. No instances of that kind have come to my knowledge since I have been commandant. I would not, by any means, consider that so great an offense as saying "all right" when it was not all right.

Q. Did not that use to be a common offense in your day?—A. It may have been done. He was not required to vouch in words for his presence. I do not think there is a parallel in the two cases.

Q. You think that this action of the first class was for the good of the corps?—A. I do not think it was done for the good of the corps.

Q. You think their intent was for the good of the corps, and that it will have a good effect in inculcating truth?—A. In a certain sense it will have a good effect.

Q. Has it got so that the officers of the academy cannot control the cadets and punish offenders?—A. No, sir; it has not. They can do it if they are sustained.

Q. But they are not sustained fully?—A. I believe that there is sufficient amount of power within the hands of the authorities to carry out all needful regulations for the government of cadets. I think the official action that has been taken in the cases of all these men that have been brought to my notice as having falsified—I think that of itself is sufficient to stop the practice.

Q. Then you have taken notice of these cases?—A. I have taken notice of them officially, and sent them for trial by court-martial, but the authorities in Washington have remitted their sentences.

Q. What cases do you refer to?—A. The sentences of Wagner and Keargman were remitted.

Q. And they were convicted of falsehood?—A. Yes, sir.

Q. Who recommended the remission of the sentence?—A. I know nothing of that. I never heard. The action there was taken upon the general court-martial proceedings.

Q. To what class did they belong?—A. They belonged to the present fourth class. Two other cadets were tried at the same time that belonged to the first class.

Q. What were they tried for?—A. Conduct unbecoming an officer and a gentleman.

Q. For what offense?—A. Erasing delinquencies recorded against one of them from the official books. Knows all the facts; and if the sentence was one of dismissal, he could have an opportunity of placing his views at length upon the proceedings, and this could govern the Secretary of War in issuing his orders. I do not think the superintendent should have the power of dismissal in his own hands.

By Mr. ASPER:

Q. Would it not tend to the efficiency of discipline if the punishment was not so severe as the punishment of dismissal for such an offense as that?—A. I think not. The only punishment a cadet fears is dismissal. That is the greatest hold we have on them, and when they know they cannot be dismissed for a dishonorable act the tone of the corps is lowered.

Q. You say there is no discretion, when you make charges against a cadet, but for the court to sentence him to be dismissed, if found guilty?—A. There are certain charges—for instance, conduct prejudicial to good order and military discipline—that do not require dismissal.

Q. Could you not charge them under that head, instead of conduct unbecoming an officer and a gentleman?—A. I could charge them that, but when Congress has designated a certain offense by one name we always call it by that.

Q. But when there is no discretion in a court but to dismiss, don't you often pass over certain offenses?—A. I think not. The superintendent has power, under the regulations, to inflict punishment without trial. He can make the cadet walk Saturday limits, and he can put them in light prison or dark prison, as he may choose.

Q. Has he ever punished what you call lying in any other way than by preferring charges and dismissal?—A. There can be no other punishment, for the good of the corps.

Q. Is there any other punishment?—A. There is not. My idea is that certain offenses can be punished here, but when a cadet commits any offense which is at all serious he should be tried by a court-martial. I think the cadets should be impressed with the idea that they are sent here for the purpose of letting the Government select from them who shall be its servants; that if they cannot come up to the standard of a good officer, now is the time to prune them off and send them back to their former avocations.

Q. But don't that system beget more or less perversity?—A. I think that carried out inflexibly is the only way to discipline the corps. I have never, in any case, done violence to my convictions of right in any case. Every case I thought deserving of trial I have invariably preferred charges.

By Mr. PACKARD:

Q. Are you quite sure there were any other reasons than what the members of the first class alleged at the bottom of their action?—A. I do not think there could have been any. I would like to have it clearly understood that this affair was the result of a sudden ebullition of feeling. You might infer that there was no discipline in the corps of cadets; I would like to have evidence on that point come from other persons than myself. This first class perform all their military duties in a very acceptable manner; they are very attentive to their duties, prompt in obeying orders, and soldier-like in every respect.

By Mr. SLOCUM:

Q. The case of Shortelle, who insulted Captain Clark, and who was tried, dismissed, and reinstated, occurred prior to your coming to the academy?—A. Yes, sir; and he was a member of a prior class. There has been here every desire to carry out the orders strictly; so far as the first class having disobeyed an order, or set their faces against orders, nothing of the kind ever occurred. On the contrary, as a rule, they have responded to every effort to place the performance of duty here upon the proper footing. If you will recollect, in your own time, there was a certificate required of the officer at every morning police inspection, that they had performed their duty properly. I had this done away with, saying that that was not the way to perform duty; that they should do it from a sense of honor. Since that certificate has been taken away I think the discipline of the corps equal to, if not better than, what it was before. If it was understood in the corps that every time a cadet committed a dishonorable act he should be dismissed it would tend to raise the discipline of the corps in a wonderful degree.

Q. Do you think that if that had always been the case the conduct of the first class would have been different?—A. I do not think that so large a number of cases of falsehood would have come up in so short a time, and that consequently there would have not been that strong feeling.

Q. Do you know anything about the difficulty between Woodruff and Hoyle?—A.

Yes, sir; it grew out of certain aspersions that Mr. Hoyle cast on Mr. Woodruff's character, and it originated in connection with the trial of Cadet Smith. Before this trial Cadet Hoyle was employed as an amanuensis, and he made some statement in regard to General Wilson's testimony, and defamed the character of Cadet Woodruff. These facts were presented to me by Cadet Woodruff, and I preferred charges against Hoyle for this defamation of character. Hoyle afterward stated that these remarks were founded upon a misunderstanding on his part of General Wilson's testimony, and he made a full retraction. This was perfectly satisfactory to Mr. Woodruff, and as I was satisfied that Mr. Hoyle had not intentionally done this thing I requested the charges to be withdrawn; but I did this only on the condition that Woodruff was fully satisfied with the amends that Hoyle had made.

Q. Do you believe that Hoyle was satisfied in the first place he had a good foundation for his statements?—A. Yes, sir. He was in this hall, and there was some conversation going on. I think that he mistook some words General Wilson uttered. At least I was fully satisfied that that was the case, and all the other acts flowed from that.

Q. When did this case occur?—A. Some time in August or July.

Q. Was Cadet Smith connected with it?—A. You remember the Smith letter? There was a court of inquiry in regard to this letter.

Q. Woodruff had befriended Smith, and for that Hoyle denounced him?—A. Yes, sir.

By Mr. PACKARD:

Q. Don't you think that has run through the whole of this thing?—A. I don't think it has had the slightest connection with it.

Q. Don't you think there was a feeling that Woodruff should be "cut" because he had befriended Smith?—A. That may have been the case.

Q. Hoyle admitted that he had lied?—A. No, sir; he stated that he believed fully, honestly, and conscientiously that General Wilson made this statement upon which all the subsequent part of the transaction was based.

Q. Did these two first-class cadets who were dismissed last summer for lying take any part in driving these other cadets away?—A. No, they are not here. They are suspended.

Q. How were Barnes, Flickinger, and Baird mixed up with this Smith affair?—A. Not at all.

Q. What side did they take in this controversy about cutting Woodruff?—A. I do not know anything about it at all. I understand that Cadet Smith has been practically isolated since he has been here. I do not think there was a single motive actuating the first class in driving away these cadets other than a desire to put the seal of condemnation on their conduct.

Q. It is perfectly evident to us, and must be to you, that there was something back of that affair.—A. I do not think there was anything under the sun behind it. They stated to me that in the other two cases the sentences had been mitigated, and the men would be thrown back upon them, and that they would have to be received.

By Mr. SLOCUM:

Q. Don't you think there is a feeling through the first class that they are safe from punishment through some cause?—A. No evidence of that has come to my knowledge.

Q. Don't they think they can escape punishment for any violations of regulations?—A. I do not think a great majority of the class rely upon it. There may be some that do. I think that a majority of the class do their duty. For a series of years back it has been the misfortune of the academy to have in the corps the sons of influential personages, and that if one of them stood at the foot of the class they were regarded, to use one of the expressions here, as a "tail-board," and that as long as they staid they would not be found deficient. That has existed for a number of years.

Q. It did not use to be so?—A. It did not use to be so. If a law could be passed making the discharge of a cadet obligatory upon the recommendation of the academic board that would increase the discipline of the academy very much; but when cadets feel that they cannot be turned back it has a very disastrous influence. I find by reference to my morning reports, which I now have with me, that on the morning of the 5th Barnes is dropped as a deserter. He does not appear again on the returns until the morning of the 11th, when he is marked "in arrest and joined from desertion." On the 7th Flickinger and Baird are marked "present in arrest."

WEST POINT, N. Y., *January* 28, 1871.

WILLIAM S. STARRING sworn and examined.

By Mr. ASPER:

Question. State your rank in the Army and position at the academy.—Answer. I am first lieutenant Second United States Artillery, and am assistant instructor of tactics, and in command of Company A, United States Corps of Cadets.

Q. What, if anything, do you know of the sending away of three cadets from the academy by the first class?—A. Cadets Baird, Flickinger, and Barnes were all placed

in arrest by General Upton; the last two for conduct unbecoming an officer and a gentleman, and the former for being absent without leave. They were placed in arrest on the 3d of this month, and on the next morning, on my going to the office, I found upon my morning report that two of them were absent. My first impression was that they had deserted, but soon after that I heard that the first class men had got together, and as a class had sent these men away.

Q. When was this?—A. It was in the morning, shortly after 8 o'clock.

Q. Before or after you made your morning report?—A. It was after I had received my morning report.

Q. Who makes the report to you?—A. It is made by the cadet captain.

Q. Who is that captain?—A. George B. Davis.

Q. Was he of the first class?—A. Yes, sir.

Q. Did he make the report that these men had deserted?—A. The report is signed by both him and the first sergeant.

Q. Who was the first sergeant?—A. William B. Whittemore.

Q. Was this report in writing?—A. Yes, sir.

Q. And in addition to that, is not a report made to you verbally?—A. On that morning report these two men were reported absent without leave.

Q. At the same time did you learn what had transpired the night before?—A. I did not until afterward.

Q. Who first reported it to you?—A. The first information I had was in an interview between the commandant and Mr. Wasson, commanding the first class, and Mr. Russell. They came up to explain to the commandant why these men had gone away.

Q. Do you know anything of your own knowledge about the transactions on the night of the 3d of January?—A. No, sir.

Q. You knew nothing of it?—A. No, sir; the first I heard of it was in the morning after they had gone.

Q. And after you had made your morning report?—A. Yes, sir. It was about the time I made my morning report.

Q. You first heard of it from General Upton?—A. I first heard of it in an interview between General Upton and two first-class men.

Q. What further did you have to do with these boys?—A. As soon as I found out that they had gone I sent for my first sergeant, and told him to take another cadet officer from the company and make an inventory of what property these men had left in their room, and then do the property up, and I would have it taken care of until we knew what action was to be taken in the matter.

Q. What next did you do?—A. I was sent by General Upton to Highland Falls to see if I could find them.

Q. When was that?—A. On the evening of the 4th.

Q. Was that the first attempt to search for them?—A. That was the first I knew of.

Q. What further connection did you have with the matter?—A. I came back from Highland Falls, stating that they were not there; that I had satisfied myself that they had gone to Peekskill, and asked if I should go there in search of them. General Upton said not until I received further orders. That was on the night of the 4th. On the night of the 5th I received directions to go to Poughkeepsie and see if I could find them.

Q. When did you go to Poughkeepsie?—A. On the morning of the 6th. I went up in the first train.

Q. Where did you find them?—A. I found them in a surgeon's office. Baird had written to General Upton for some of his effects, and gave his post office address. It was in the care of box No. 656, I think. I went to the post office and inquired who owned the box; and was told that Dr. Andrews owned it. I then went to a store near by, got a directory, and found where Dr. Andrews lived. I then proceeded to his house, and, on knocking, the door was opened by Baird.

Q. Who did you find beside Baird?—A. Flickinger was also there. Barnes, I understood, had gone to Jersey City.

Q. What did they say?—A. Baird opened the door, and I asked him if he was ready to go back, and without waiting for an answer I told him I was going back in the next train, and to be ready by that time. He said he didn't know about going back. I told him we would go back on the next train, and asked him what objection he had to going back. He said he did not know how they would be treated.

Q. What did he say about the treatment he thought he would receive on his return?—A. He didn't say anything about it at that time.

Q. What did he say at any time?—A. I think, in his letter, he said he would be treated to a coat of tar and feathers if he came back. He didn't say anything to me personally.

Q. Did they come back the same day?—A. Yes, sir.

Q. Did Flickinger say anything to you about the treatment he expected?—A. No, sir. Baird asked me what they would do with him if they got him back. I told him

I thought they would give him the choice of court-martial or permit him to resign. He said he wanted to resign.

Q. Had anybody said anything to you before you went away about their resigning?—A. General Upton had mentioned it casually. I do not remember how it came up. I think he stated that would be the thing, either court-martial or resignation.

Q. The boys were charged before they were sent off?—A. Before they were placed in arrest they were charged.

Q. What time did you get them back here?—A. About two or three in the afternoon.

Q. What was done with them when you got back?—A. They were sent to their rooms—the rooms that they had occupied before leaving, and instructed not to leave them unless they were sent for by some officer; I also told them not to attend to any roll-calls; that they could go to their meals with the guard.

Q. Were they sent for; and if so, how soon?—A. They were sent for very soon afterward by General Upton.

Q. What was said to them, then, about resigning, if you know?—A. General Upton asked Mr. Baird what he proposed to do. He replied that he wanted to resign. General Upton asked him if he offered his resignation of his own free will—if he made it voluntarily. Baird stated that he did. I think the General said that that was the best thing he could do—that he knew exactly the evidence against him, and how he would stand if brought to trial.

Q. Where were the resignations written?—A. In Mr. Baird's room, I suppose.

Q. How soon after he got back was that resignation written?—A. I think it was written the same afternoon.

Q. And when did they leave?—A. I do not think they left for three or four days after. I am not positive about that.

Q. They took their meals in the mess-room, under guard?—A. They took their meals with the cadet guard. They were under arrest. Going to the meals with the guard, I think, was a matter of choice with them.

Q. Why a matter of choice?—A. Because their other class-mates would not associate with them.

Q. Was it not from fear?—A. No, sir, I think not.

By Mr. PACKARD:

Q. When Davis reported the absence of these cadets——A. Please understand me. He sends in to me a morning report according to a certain form. On that report appeared these two cadets as absent without leave. He did not report to me personally, but only in this way, officially.

Q. There was nothing said about their being forced to leave?—A. No, sir; I think not.

By Mr. SLOCUM:

Q. Do you know of any cadet that has been reinstated in the academy after being dismissed through the influence of another cadet?—A. I don't know that I can answer that question.

Q. Do you know of any case to your knowledge?—A. No, sir; I have heard so from rumor.

By Mr. ASPER:

Q. Do you know the boys Baird and Flickinger?—A. Yes, sir; they were in my company.

Q. What was their standing here before they were sent away?—A. Baird I regarded as a quiet, inoffensive, and a good boy. Mr. Flickinger I did not think so much of. I thought him variable and uncertain.

Q. What offenses, if any, had they been guilty of up to this time?—A. You mean other offenses?

Q. Yes, sir; in reference to their standing—anything that is noteworthy?—A. I do not know; that could be ascertained from the superintendent's office.

Q. So far as you know, they were boys in good standing?—A. Baird was.

Q. Will you produce to this committee the morning report of the 4th, from the cadet officer?—A. Yes, sir.

(Lieutenant Starring subsequently appeared before the committee with his morning report book, and stated that Baird and Flickinger were placed in arrest on the 3d; on the morning of the 4th the following remark was entered on his morning report book: "Privates Baird and Flickinger, from duty to arrest;" on the morning of the 5th is entered, "Privates Baird and Flickinger, absent without leave;" on the morning of the 7th, "Privates Baird and Flickinger, returned from absence without leave to arrest;" on the morning of the 11th, Discharged by order; resigned, Privates Baird and Flickinger.")

Q. That report was made to you by Cadet Davis?—A. Yes, sir.

WEST POINT, N. Y., *January* 28, 1871.

WILLIAM BAIRD sworn and examined.

By Mr. ASPER:

Question. State your age and residence.—A. I am nineteen years old. I do not know that I can give any particular place as my residence, unless it be Geneva, New York. My father is in the Army.

Q. Go on and state in your own way all that you know in relation to the recent transactions at the academy, commencing at the beginning and running through the whole affair. Before you proceed, I will say to you that unless you desire to do so, you need not say anything that will subject you to any court-martial or punishment here, as I have been informed that you are to be reinstated.—A. On the 2d of January we had relief from quarters all day, and had no duties after 9 o'clock; so I went down to Highland Falls with two classmates, and got back in time for dinner, and one of them brought up some liquor for another cadet. After supper the first class had a hop, and the second and third classes had permission to visit in barracks. Our class did not have permission, but there was so much irregularity in barracks that I was not sure that the sentinels would inspect if they would not be able to account for the absentees, because some of the rooms would be empty and others would have visitors. I was under the influence of liquor that afternoon. Any member of my class would testify to that. I asked my room-mate if he would make it "all right" if I went out. He seemed to be willing to do so. I did not know whether sentinels would inspect, and if they did I thought perhaps he could arrange it so that my absence would not be discovered. I went off soon after the sentinels were put on, before they inspected, and went down with a classmate to Highland Falls, and met there two or three cadets of the other classes; we all came back together and got in just after tattoo. When I got in my room I found five or six cadets there; they told me that I had been reported absent, and one of them advised me when the officer of the day came in just to say that I would make my report to the commandant in the morning. He came in a little while afterward, and I told him I would make my report to commandant. I did not know what I would have to say; whether I should state I was off cadet limits. Nobody knew I was off cadet limits, and in making this report a cadet is not required to criminate himself. I wanted to have one of the first class to write it out for me; they are supposed to know more of the rules here. I knew I would be put in arrest. The next day after I came out of examination I was put in arrest. I found my room-mate was in arrest when I got back. In the evening I sent one of my class to one of the first class, whom I wanted to come and help me write my explanation, and be my counsel when I was tried. That is the custom here generally. He went up to the quarters of the first class, and they didn't want to let him in; they told him he had better not come in, as there was a meeting of the first class that evening. He left word for this first-class man to come and see me the next morning. He said the first class were rather mad about this thing, and that our class would probably cut Flickinger and Barnes, but he didn't think they would cut me, and were willing to go on pledge for me. I thought we would probably be tried, and that I would not be more than suspended at most. That night I was woke up about 12 o'clock by five or six cadets coming in my room with lanterns. One of them came to my bed and told me to get up, and then said the same to Flickinger. I got up and saw how it was. I saw they were all first-class men.

Q. State their names?—A. Cadet Davis spoke to me. I think he was the only one that spoke to me personally in the room; several were speaking. Davis said, "You have been lying." I said I had not. He replied, "Never mind; get up." Cadet Grant was in Flickinger's alcove. There were perhaps a half dozen in the room; it was pretty dark. I could not find my citizen's clothes; they said, "Never mind, wear your uniform." The great idea seemed to hurry us all they could. I supposed they were afraid they would be caught. I first could not find my stockings, and they wanted to hurry me off without them. I found them afterward, and they then took Flickinger and myself around to Hoag's room; there were over a dozen there. Some one said, "Is it all right over in C company?" The reply was made that it was. They then took us down stairs and told us to go on. I don't think they had hold of us, but they were close around. I saw another party going across the area. I suppose they had Barnes with them. They told us to start on double time. As we passed the mess-room I saw several there who seemed to be watching for the authorities. We started up the road toward the ————————. Going up the hill Cadet Brush had hold of my arm on one side. There seemed to be a great crowd; I should judge nearly the whole class. Flickinger and Barnes were both ahead and cadets had hold of them. They made us run until we got to where the road joins near Fort Putnam. They stopped, and I got into the crowd and recognized several cadets.

Q. Give their names?—A. I saw Cadets Roe, McKenzie, and Wyatt. Wyatt approached Flickinger (they are both from the same State) and said, "Flickinger, I am ashamed of you." I don't know what else he said; I know he said that. Several said,

"It is the first class who are doing this, we want you to understand, and if you come back again you will be tarred and feathered." I could not say who said this; they were all talking together. They said, "Don't you dare to show yourselves at reveille;" and they told us to run. I think they had stones in their hands, or something, but nothing was thrown. We ran a little distance and then walked on slowly. We went down to the Falls and got a place to sleep there. We were afraid to come back here in the morning, so we both wrote letters up here. Flickinger wrote to Wyatt and I wrote to the officer of the day. I asked him to send me my underclothing and my watch, which I left hanging in the alcove. I sent a boy up with it and he returned about 12 o'clock with a note stating that our trunks would be sent to us, and they asked where we wanted them sent. I told them to send mine to Highland Falls. Barnes wanted his sent to Jersey City. When they sent us off they gave me three dollars and some cents, and gave Flickinger seventeen dollars and told him to divide it among us. Flickinger said also that Cadet Grant gave him a coat and pair of pants. Some time the next day I got a letter addressed to me on the outside and to all three of us in the inside, and saying, "We have strong evidence against every one of you; don't come back to the Point," or some such words. It was signed by the first class.

Q. Have you that letter?—A. No, sir; I lost it.

Q. Was that the only signature to it—first class?—A. Yes, sir; there was another letter to Flickinger that was signed by Mr. Wyatt. It was more of a private letter, but it advised him to go away. I don't remember exactly what it said. I think he has that letter. While we were staying there we saw an officer, Lieutenant King, ride by. We thought they would order us back, and we were afraid to come back. We went around Fort Putnam and crossed over the river about 4 o'clock in the afternoon. Barnes took the train to Jersey City, and Flickinger and I started up to Poughkeepsie. We thought we would stop there a few days and write a letter from there to have our trunks sent there. We thought we would not be allowed to go back with this thing hanging over our heads. We started for the hotel near the depot, and on our way there met a classmate who had been dismissed this fall. He took us to his house, and took supper there, and staid over night. We explained to him all that had occurred, and he advised us to write to the authorities. Flickinger wrote a letter the next day, and we both signed it. It was addressed to the superintendent and stated all the facts. I wrote more of a private letter to General Upton, asking if I could not be allowed to resign without coming back, as I did not know how they would treat us.

Q. Who do you mean by "they?"—A. I mean the cadets. I knew we would be tried if we came back, and I thought they might carry out some of their threats while waiting the trial. I got a telegram the next day from General Upton as follows:

"WEST POINT, *January* 5, 1871.

"Remain at Poughkeepsie until you receive a letter advising you what to do.

"E. UPTON."

We got this telegram the day after we sent this letter to General Upton. The following morning the young man with whom we were staying came in and said he saw Lieutenant Starring inquiring at the post office about the post office box which we had given in our letter to General Upton, and he thought he was looking after us. After a little while Lieutenant Starring came up. He treated us very kindly; said the authorities had got our letters the day before, and he had been sent up after us. He did not say at first to bring us back, but asked if we were willing to go back. I said I was willing to do whatever the authorities required. He said General Upton wanted us to go back with him. We promised to meet him at the depot at one o'clock, which we did. Coming down in the cars we asked him how we would be received, and he replied that we would consider ourselves under arrest, the same as we were before, and go to our meals with the guard. He stated the first class had come forward the next day and acknowledged all they had done. I asked him whether we could get away at once, and he said our resignations would probably be accepted, and we would not have to be there a week, at most; perhaps not over three or four days. I asked him if he didn't think it was the best thing for me to resign. I think he said yes; and I said "I suppose if I do not resign I will be dismissed, if I am tried." I thought if I were dismissed I would be allowed to be reinstated. He said, "Yes, but if you should not be, it would not be very pleasant for you in the corps," meaning that the cadets would not treat us very well We reached here about four o'clock in the afternoon, and went over to the officer in charge of the guard-room. I think Lieutenant Marshall was in charge, and he told us to consider ourselves under arrest. We had scarcely got to our rooms before we were sent for by General Upton. We found him in his office, and he spoke to me first, stating that it was not necessary for me to write a letter down stating the facts, as the first class had acknowledged it. It seems that some of them knew about this arrangement with my room-mate, and preferred charges against me for absence without leave, intoxication, and prearrangement with my room-mate. Before this the only charge against me was absence without leave. General Upton stated they

had conclusive proof against me, and asked if the charges were not true. I said I thought they were. I forget the exact words he used, but he said something seeming to imply that I would like to resign. I asked him if I could resign without getting father's consent. I added that it would take a long time to get it, as he was in Texas. He said he would send the charges on with my resignation, and that perhaps I would be allowed to resign. We then went to our rooms and sent for two blanks on which to write our resignations. The officer of the guard told us that we would not be required to go to roll-call. We had nothing to do with the rest of the cadets; we did not go to the meals or perform any duty. We made up our minds that in any event we would not be allowed to stay there. Coming down on the train Lieutenant Starring told me, "You will not be molested, for the first class have been cautioned not to interfere with you;" but we didn't know whether this caution would be enough. When we got back and were in our rooms, either that evening or the next morning, we heard some cadets go by and say, "These men have been here long enough." That was the next day, when they found we were not going off right away. One of our class came in that afternoon and told us that our class had had a meeting, and that some of them were in favor of cutting us, but that a few of my friends had not gone back on me. I think he said the second class published an order in the mess-hall, saying that they had approved the conduct of the first class, and I think they gave out that they would not have anything to do with us.

By Mr. SLOCUM:

Q. Published an order in the mess-hall?—A. Yes, sir.

Q. Is there not an officer in charge of the mess-hall?—A. Yes, sir; perhaps they published it through him. I asked some others of our class about this, but they did not seem to know anything about it. It may be a mistake. At any rate, whether they published an order or not we saw by the way they acted that they would be afraid to come near us. Another cadet of my class came in the next morning; he had to slip in pretty quietly. He shook hands with me and said, "I am just as good a friend of yours as ever, and so are half our class; but the first class would make it too hot for us if we came round." I told him that I didn't think hard of them because they didn't come around; that all we wanted to do was to get away, and that there was no use in getting any of our class in trouble. The next morning the commandant sent for us and said that our resignations would be forwarded right away, and, said he, "I apprehend all you want is to get away legally." I said, "That is all." He asked, "This resignation is not compulsory?" and I replied that it was not. I thought it was the best thing I could do, and all the officers seemed to think so too. General told us we could make application for leave of absence, and go to our homes, and our resignations, if accepted, would be sent to us there. We made application for leave, but did not hear anything from it. We asked the officer of the guard whether it would be granted, and he said it could not be granted until they could learn from Washington whether our resignations would be accepted or not. We did not know until the Tuesday following that our resignations had been accepted, and we got off that day.

By Mr. ASPER:

Q. How did the idea of resigning come in your head; who suggested it?—A. When we went up to Poughkeepsie we thought we could never dare to go back, as they might carry out those threats. We thought we would be dismissed, and not allowed to resign.

Q. Who gave you the first idea about resigning?—A. I wrote in this letter and asked whether we would be allowed to resign. On our way down in the cars Lieutenant Starring said we would probably be allowed to resign, and when we got back here General Upton asked us, as I have related, if we did not want to resign. He said that all these charges could be proved, and I thought if we did not resign we would be dismissed.

Q. What threats did the first class use?—A. They said they would tar and feather us if we came back.

Q. Did they say anything about your resigning?—A. They did not say a word about that. They did not want us to come back.

Q. What reason had they?—A. When they came in the room they said we had been lying. I denied it.

Q. You say you put in your resignation the first afternoon after your return, (Friday afternoon.) Did General Upton send for you the next morning or did you go to him?—A. He sent for us.

Q. Who suggested that you should ask for a leave of absence to get away from here?—A. He did. He said he would see that it was forwarded, and gave us to understand that it would be granted.

Q. Did he say why?—A. He didn't say why.

By Mr. SLOCUM:

Q. Who came in your alcove and woke you up?—A. Davis. There were two or three who came over. I only remember him.

Q. Who went into Flickinger's alcove?—A. He told me it was Grant. He was in the room, I know.

Q. Did Grant say anything to you direct?—A. No, sir. He was the one that woke up Flickinger. When we returned, we fell in with the guard, and Cadet McKinney told the officer of the guard he ought to take off our clothes and give us a coat of tar and feathers. There were two other cadets who were tried some time ago for lying, and the first class wanted us to cut them and were down upon us because we didn't. I believe the second class shared in this feeling.

Q. What part did you take in reference to the cutting of those cadets?—A. I took no part whatever; I said nothing about it. There was another cadet dismissed from our class, and they thought we ought to cut him for what he had done.

By Mr. ASPER:

Q. Is this the letter you sent to General Upton?—A. Yes, sir.

Q. Is that your writing?—A. Yes, sir.

Q. Is that the envelope?—A. Yes. [Envelope bears address, "Gen'l E. Upton, U. S. A., West Point, N. Y." Postmarked, "Poughkeepsie, Jan. 5."]

POUGHKEEPSIE, NEW YORK, *January* 5, 1871.

DEAR SIR: I don't know whether, under the present circumstances, I am justified in writing this letter to you. But Mr. Flickinger and myself have both written to the superintendent, explaining to him that we did not desert, but were forcibly taken from our quarters by the members of the first class during the night, and were driven off the Point with the assurance that if we ever returned we should be tarred and feathered, if not worse treated. So we have not dared to return, knowing, in the first place, that we should have to be incarcerated for breach of arrest; and in my case, although deterred partly from returning by fear of maltreatment, I shrank from doing so chiefly for my father's sake, as I feared the whole affair would be made public, and it would seem that I had been guilty of such a dishonorable action that the cadets would not allow me to stay at the academy.

As far as my offense is concerned, I feel confident that I was not intentionally guilty of a dishonorable act. On Monday evening, being quite intoxicated, and knowing that other cadets of different classes were going off limits, I thought that I would run no more risk than they; and not being sober enough to reason about the matter, I thought Mr. Flickinger could perhaps arrange matters in the same way they had. So I started off, although I did not say a *word* to him that I *recollect* of when I went off, having had some conversation with him about it previously. The class were all willing to go on pledge for me, although I don't know whether this would have had any effect in mitigating my sentence.

I have had no one to advise with me, and both Mr. Flickinger and myself are unprovided with the proper citizens' clothing for this time of year, and also have only money enough to maintain us here for a short time. My father and mother are in Texas at present, and knowing your friendship with them, I have taken the liberty to ask you to use your influence to have me allowed to resign or even to be dismissed, as I had no desire nor intention of thus bringing disgrace on myself and family by deserting. If you can do anything for me or advise me how to accomplish either of these purposes I should be very much indebted to you. Some members of the first class wrote to us at Highland Falls while we were waiting there that they would have our trunks, &c., sent to us at once, but knowing that they might be unable to accomplish this, I have thought it better to write to you, asking, if possible, that they may be sent here as soon as possible, and that if my accounts can be settled I might have the money sent to me instead of my father, he being in Texas engaged in inspecting some remote posts, and until I can have my letters sent to me from the Point I do not even know his address or that of my mother.

I suppose the proper method for me would have been to have returned to the post, but knowing the first class were bent on preventing this, and fearing that if I did return the whole affair would be made public, and then, perhaps, after having undergone this punishment at their hands, I would after all be dismissed by the proper authorities, I thought it best to write and ask you if I couldn't be allowed to resign, or even be dismissed, without having to return, run the risk of maltreatment from the first class, and then suffer this punishment.

My address is care box 656, Poughkeepsie, New York.

Very respectfully, your obedient servant,

W. BAIRD.

General E. UPTON, *United States Army.*

Q. How did you know that cadets were going to Highland Falls on the night of the 2d; you say several cadets were going down?—A. One was going down with me. I spoke with one who was going; I met two more there; I didn't know they were going

there until I saw them there. There was only one of my classmates there; the others were of the second and third classes.

Q. All out at the same time you were?—A. Yes, sir.

Q. The same time of night?—A. Yes, sir.

Q. Before taps?—A. Yes, sir.

Q. What was done about their absence?—A. Nothing at all. They had a better chance to go than we had. Our class had not the privilege to visit that evening. We didn't know whether we had privilege or not; though I don't suppose we took much pains to ascertain.

Q. What difficulty, if any, had you with Cadet Shortelle?—A. None.

Q. Any unpleasantness?—A. No, sir. Flickinger told me the next day he did all he could for me, that he answered all right; the sentinel came around, and when the corporal of the guard came, and asked him if it was all right, he did not answer at first, but afterward responded "All right." He told the sentinel that it was all right, and there was no use in asking any more questions. He did ask questions, and it came to the ears of the officers of the guard, and he is on honor to report all such things.

WEST POINT, N. Y., *January* 28, 1871.

Captain ALEXANDER CLARK sworn and examined.

By Mr. SLOCUM:

Question. State your rank in the Army, and position at this academy.—Answer. I am captain Fifth United States Cavalry, and assistant instructor of tactics at the United States Military Academy.

Q. Is it within your knowledge that any of the Army officers at the academy knew of this affair prior to its taking place?—A. No, sir, it is not. I think I can definitely assert that no commissioned officer had the slightest knowledge it was going to take place.

Q. Is the act generally justified by the officers here?—A. No, sir; not in a military point of view.

Q. There was a young man by the name of Shortelle who was court-martialed upon charges preferred by you?—A. Yes, sir.

Q. When was that?—A. About a year ago.

Q. What was the sentence of the court?—A. The sentence of the court, if I remember rightly, was that he should be suspended until the next academic year, and then go on with the next class below him.

Q. Was the sentence remitted?—A. Yes, sir, the sentence was remitted. The young man was absent only a few days.

Q. On whose recommendation was it remitted?—A. That I cannot say. The order came from Washington.

Q. I want to ascertain, if I can, what influences are brought to bear to relieve cadets from punishment at this academy.—A. I don't know how that was. The order stated that the cadet's offense had its provocation in the excited manner of his superior officer. I made an application to the Secretary of War for redress on that point. It was referred, I think, to the President, and returned with the indorsement that he declined to take any further action in the matter.

Q. Was there anything in the evidence showing such to be the case?—A. No, sir; on the contrary, I could have produced evidence to show that such was not the case.

By Mr. ASPER:

Q. In your answer to the question whether the authorities justified the conduct of the first class, you say not in a military point of view. Please explain what you mean by that.—A. We think it is conduct prejudicial to military discipline, and that, of course, we cannot do otherwise than condemn it.

Q. As individuals, how do you feel?—A. I still condemn it as a wrong action, though I think the motive that gave rise to the action showed a high sense of honor on the part of the first class.

Q. What do you mean by motive?—A. I think their motive was to get rid of men who had been guilty of falsehood.

Q. But here are boys who had never been charged with anything of the kind.—A. Who are they?

Q. This boy Baird.—A. Previous to that time his conduct, I believe, was good.

Q. There were no charges against him?—A. I don't know whether, at this time, the charges had been made out or not. Still, they were subject to charges, and charges were either made out by this time or very soon after.

Q. Were they under arrest at the time this first class took them from the place?—A. Yes, sir.

Q. Were they not reported as deserters after that?—A. None of them belonged to my company. I have never seen the company reports. I believe they were.

Q. Are not the authorities capable of punishing all derelictions of duty and violations of regulations?—A. Undoubtedly they are.

Q. Is not the discipline very strict and severe?—A. Yes, sir.

Q. In every respect?—A. Yes, sir.

Q. Then what possible motive could there be in the matter?—A. I think that these young gentlemen labored under a very mistaken idea. There had been a case only a little while before, in which two cadets had been tried by court-martial for false statement, and had been sentenced by the court to be dismissed the service; the sentences were afterward commuted to a return of these men at the expiration of this academic year, and to go on with the class below.

Q. Do you know upon whose recommendation that was done?—A. I could not say; we never see any of the papers upon which it is done.

Q. These boys have not yet returned?—A. No, sir; they go on the 1st of July next.

Q. What class did they belong to?—A. The fourth class. There were two boys in the same situation in the first class. To further explain what I have said, I will add that I suppose that the first class inferred that these three young men would be sent back in the same way.

Q. You know nothing about that?—A. Oh, no, sir. It was merely the hot-headed action of a parcel of boys—the work of an instant.

WEST POINT, N. Y., *January* 28, 1871.

GERRITT H. SMITH sworn and examined.

By Mr. ASPER:

Question. State your residence and connection with this case?—Answer. I reside in Geneva, N. Y., and am uncle of Willie Baird, and brother-in-law of General Baird, his father.

Q. Go on and state all you know about this affair, what you learned, how you learned it, and what you did.—A. On the morning of the 10th of January, I came down from my residence, about a mile and a half from the village, to the post office, and there found a telegram from General Baird, saying: "Willie is in trouble; look after him; his mother comes North immediately." On the Saturday previous, I had seen in the Rochester paper an item that three cadets had deserted from West Point, and on the following Monday I saw a paragraph that they had returned, no names being mentioned in either case. I hastened home, and then immediately returned, as I had but fifty minutes to reach the next train. Before starting, I stepped into the telegraph office and sent a dispatch to Major Kendrick at the academy, an old personal friend of General Baird, saying, "Where is Willie Baird? Answer at the Delavan House." I thought that if I telegraphed him I would receive a reply quicker, as I supposed Willie was in punishment or in arrest, so that no telegram would reach him. I reached the Delavan House about midnight, and found a telegram from Major Kendrick: "Willie is still here. I learn that his resignation has been accepted"—the first news I had that he had resigned, or would resign. I took the next train from Albany; reached here about ten o'clock; had some difficulty in crossing the river; got over finally; went immediately to the superintendent's office, sent my card in by the orderly, and obtained an interview. I did not know General Pitcher; had never seen him before. He received me politely, and I said to him, "I am brother-in-law to General Baird, and uncle of Willie Baird, and I have come to learn all the facts about this affair." He said it was very painful matter, and expressed himself very feelingly for General Baird and the mother of this boy. I told him I knew nothing beyond what I had seen in the papers. On my way from Albany I had seen in the New York Tribune of that morning an account of the boy's running off. He said that Willie had been guilty of intoxication, and, I think, false report. I said, after hearing his remarks about it, which were about the evil tendency, &c., of this conduct, "General, this is not unprecedented. I have known West Point for twenty years; know Army officers who were cadets; I have heard of Benny Haven's and Buttermilk Falls. While that does not justify my nephew's conduct, it seems to me it might have over with." He said that "that was not all; that the intoxication might be got along with; it is the false report," or lying, or words to that effect. I stated to him, "I understand that Willie has resigned. I am very sorry that he has resigned. I would not have let him resign until we could have got word from his father. I told General Pitcher that this was a great blow to his father and mother, particularly to her, as he was a boy who had never given his parents a pang; who has been brought up properly and judiciously, and the last boy in the world who would go astray. We are all liable to err, and I would as soon believed my boy ten years old would get in a trouble of this kind. I then asked him what punishment was to be inflicted on this first class. He said, "I have issued an order on the subject." "Is that all the punishment the first class will receive?" I said. He replied that he did not know. I asked him then who the power was that would punish them if they are to be punished, and he informed me that the Secretary of War was the person. "Well," says I, "that seems to me pretty harsh

treatment to take three young boys out of their beds a cold, inclement night—pretty rough treatment." "Mr. Smith," said General Pitcher, "no violence was used; bear in mind, no violence was used. I don't uphold the action of the first class; it was wrong, it was improper; but I take into consideration the motive, that was meritorious." I think our interview ended there after some remarks of a general character. I afterward saw Major Kendrick, and after some conversation with him I sought the commandant. I found him and introduced myself, and explained to him the relation that existed between myself and Willie Baird. He said to me, "This is a very painful duty." I said, "Yes, sir; I have come to learn about Willie Baird." After what I thought was a moment's hesitation, as his manner was such, he said: "Do you wish to know all?" "Yes," says I; "I wish to know all the facts in relation to Willie Baird; I want facts—everything that was said or done." I supposed that some terrible disclosure was to be made. He said the charges were for intoxication, lying, or false statement. He then told me how important it was for an officer of the Army to be the soul of honor and to be truthful. I told him that no man had a higher appreciation of truth than I had. I asked him if it was not pretty harsh treatment. He said he did not justify the first class—these were his words; but that this fourth class had been a pretty bad one; that there was no class feeling about them; that they would go off in squads together; and did not seem to have any cohesion. He dwelt on the statement that lying was a vice that must be put down. He then branched off, and said he was sorry for the father and mother. Pitcher acted as though he was scared to death all through his conversation with me. It seemed as if he was transacting this business over the wires with the authorities at Washington. He didn't look as if he was willing to take hold of this matter himself; while General Upton seemed determined, and censured very severely the action of Willie in lying. He stated that Willie's associations had been bad. I stated to him what a surprise it was to us all, and he replied that "Willie had been associating with Mr. Barnes, who was a very low fellow, and I am very sorry that he has associated with him." Major Kendrick also told me that he associated with Barnes, and Barnes was a bad boy. Barnes was about undergoing his January examination. I supposed he had left, but General Upton told me that he had not; that if a man was under sentence they would go through with the routine, and pay no attention to anything else; and that he would be very likely found deficient on this examination and got rid of in this way. I conversed with Professor Bartlett, and he expressed great sorrow on account of poor Willie's father and mother, and bore testimony to his good conduct in the academy. That was about the substance of all that transpired here. I went to Boston, got my nephew, brought him home to Geneva, telegraphed his father, and received a dispatch from his mother at Savannah, on her way to Washington: "Bring Willie to New York at once; you will probably be both called to go before the committee."

WEST POINT, N. Y., *January* 28, 1871.

Cadet GEORGE B. DAVIS sworn and examined.

By Mr. ASPER:

Question. State your age, residence, and position here.—Answer. I am 23 years of age; reside in Springfield, Massachusetts, and am captain commanding Company A, Battalion of Cadets.

Q. We desire you to state what was done by you and others on the night of the 3d of January towards Cadets Baird, Flickinger, and Barnes; what action your class had prior thereto, and all that occurred.—A. As to the exact time my memory would not serve me to swear, but on Monday, the 2d of January, we had certain privileges extended to us. We had no recitations, and had the usual liberties granted on holidays of release from quarters during the day. At night, the first and second classes, I think, had permission to attend a hop, the third class had permission to visit in barracks, and the fourth class had no permission at all, as their examination commenced the next morning. Mr. Baird and Mr. Flickinger are room-mates, and it was ascertained that during that afternoon and evening Baird had been to Buttermilk, and had agreed with his room-mate, Mr. Flickinger, that he (Flickinger) should report him all right to the sentinel, while he, Baird, was absent at Buttermilk Falls. Flickinger did so report all right, and Baird returned some time in the evening, I think about nine o'clock. It was brought to the notice of the officer of the day during the evening that Mr. Baird was not in his quarters, and Mr. Flickinger was asked about it, and why he had reported "all right." To this he gave a very unsatisfactory statement—a statement which was false and with evident design to deceive, and the matter rested until the next day. On that same night, Mr. Barnes, during, I think, the third relief, which would be some time not far from eight or nine o'clock, left his room also, reporting "all right" to the sentinel, and then went out and crawled into the window on the ground floor of Mr. Flickinger's room, and visited there until after the sentinel was relieved. These circumstances were all developed the next day, when we found what had been done; that

they had been making and conniving at the making of a false report to the sentinel. We called together a meeting of the whole class, and talked the matter over.

Q. At whose request did you come together?—A. It did not seem to be anybody that caused the class to come together. Mr. Nave was the officer of the day, and he was more cognizant than anybody else of the circumstances, and we met at his room. I do not know that any one suggested it. It was so important a matter that it would not require any special canvassing. It was talked of by everybody the entire morning.

Q. Tell us about the meeting; whether you organized or not.—A. We all got together, and stood about and talked it over. At the first meeting we had no chairman. We spoke of the importance of the matter—that here were three men who had been making a false report to the sentinel; in other words, that they had been lying, and it was something, if passed over, must spread, and so it was decided that we should put them off that night. The whole class met again in the same room.

Q. At what time?—A. I think it was after four o'clock.

Q. What day was that?—A. It was Tuesday, the 3d.

Q. Was it before or after the publication of these orders of arrest?—A. If the order was published, it must have been published at parade. This is some 20 minutes after 4.

Q. Was the meeting held before or after parade?—A. The parade was at sunset, which was very soon after 4, and we had the meeting right after 4. We might have had it after parade.

Q. What did you do at that meeting?—A. At that meeting it was decided to send them away.

Q. Did you have a chairman at that meeting?—A. I think we did.

Q. Who was the chairman?—A. I am not certain, but I think it was Mr. Hoag.

Q. Did you appoint a committee to send them away?—A. No, sir; we decided that the whole class should be divided into three committees, one to wait on the cadets, another to provide them with clothing and money, and another to inform what the state of affairs was.

Q. That was in the evening about 4 o'clock?—A. Yes, between 4 and half-past 5.

Q. And before the parade?—A. My impression is now that it was after parade.

Q. After the orders were published?—A. Yes, sir.

Q. What did you do that night?—A. That night we met together just before 12 o'clock, went to their rooms, and arrested them.

Q. What part did you take in that matter?—A. I was in one of the committees. I went to Baird.

Q. Personally?—A. Yes, sir, and waked him up and told him the state of affairs; that he had been lying and must go away; and directed him to get up and put on his things. All the others were told the same thing, and within a very few minutes they got up and put on their citizen's clothing, and if they had not enough we gave them articles of clothing. We then took them as far as cadet limits on the back road leading to Highland Falls, and gave them money amounting, I think, to somewhere in the vicinity of $60, all we had, and asked at the same time to what place they wished their trunks and such balance as might be due them from the Government sent. They then went on to Highland Falls, and we returned to the barracks. Before they left we told them that they had been lying; that the first class was doing this, and that was the way we treated those who lied. We were only gone about twenty minutes, possibly less.

Q. What further did you do to these boys?—A. Nothing. They wrote us from Highland Falls, telling us to send their trunks to Peekskill, I think, and we made arrangements to do so, and then we received another letter to send them to Poughkeepsie. Lieutenant Starring went up there and brought them back, and they submitted their resignations.

Q. What threats did you make to these boys when you let them go on the hill?—A. We told them that if they came back they would be severely dealt with. Somebody said they would be tarred and feathered, and others made other threats.

Q. What violence was used toward them?—A. Not any; they were not harmed.

Q. At whose instance were they dressed in citizens' clothes?—A. Nobody in particular; it was considered proper that they should be dressed in that way.

Q. You directed what they were to put on when you took them off?—A. Yes, sir. Barnes and Baird had a citizen's suit hanging up in their rooms. Mr. Flickinger had not, so we gave him a hat and coat.

By Mr. SLOCUM:

Q. Are not citizens' clothes taken away from the boys when they come in?—A. They are, but they usually smuggle in clothes in the barracks. It was not known to the authorities that that clothing was in the barracks. Mr. Baird, it appeared, had gone down to Highland Falls.

By Mr. ASPER:

Q. How did it appear?—A. It was known. Any one that makes a practice of going down to Highland Falls, is generally known.

Q. What violence was used when these cadets were sent off?—A. Not any.
Q. Were they taken hold of?—A. I do not think they were.
Q. The class was divided into three squads?—A. Yes, sir.
Q. Each having a particular duty?—A. Each having to attend to the duty of arresting one cadet, and explaining to him what we were doing and why we did it, and to supply them with citizens' clothes and money.
Q. The regulations did not permit you to be out of your quarters at that time o night?—A. No, sir; except necessarily.
Q. About what time did this occur?—A. About 12 o'clock.
Q. How long were you absent from your quarters?—A. I think altogether about a half an hour. The whole matter was hurriedly gone through with.
Q. You knew, did you not, that these boys were under arrest and under charges?—A. We knew that they were placed in arrest.
Q. Did you not know that there were charges preferred against them?—A. We did not.
Q. Were not the charges read at parade on that evening?—A. Mr. Baird was put in arrest for absence from quarters; Mr. Flickinger and Mr. Barnes for making false report.
Q. That was known to the class?—A. Yes, sir.
Q. These charges were of such a nature that if the men were tried by court-martial they would be dismissed?—A. The sentence of court-martial in the case of Flickinger and Barnes, reasoning from analogy, would have been dismissal, but the probable result after the action of the Secretary of War would have been six months' suspension.
Q. But how could your action in sending the boys off change this result?—A. We reasoned that by sending them off, they would not return; it was a mere expression of opinion on our part.
Q. You thought your conduct toward them would be in the nature of an intimidation—that after that they would not wish to return?—A. It would create a sentiment against them; we did not wish particularly to intimidate them.
Q. Or force them to resign?—A. No, sir; we did not suppose they would come back.
Q. How many of the class disavow this conduct?—A. I think only two. There were four, I believe, that were not concerned; one was in hospital with a broken leg, one, the officer of the day, who was in his quarters, and two others.
Q. The two others disapproved the act?—A. I do not think they did; they were excepted because they were not concerned. I really could not say whether they went up to the commandant and said they had nothing to do with it. I only know they are excepted from the order punishing us.
Q. Were all the other members of the class present at the meeting and take part in the arrangements that were made?—A. They were all there or constructively there.
Q. Were they all engaged during the night in going to the rooms or in carrying out the different parts assigned to them in the transaction?—A. Yes, sir.
Q. Were not two of these boys in your company?—A. Yes, sir; Baird and Flickinger.
Q. It was your duty to report every morning whether they were present or absent?—A. Yes, sir.
Q. What report did you make of these boys on the morning of the 4th of January?—A. They were reported absent without leave.
Q. Now, at the time you made that report, did you not know what had transpired, having taken part in it, and didn't you know that that was not according to the fact?—A. My report was a mere formal report; the commandant was fully informed by the class of all that had transpired.
Q. You meant in this report that they were absent without your leave?—A. No, sir; I have no authority to grant leave.
Q. But you made your report in form?—A. Yes, sir.
Q. What statement, if any, did you make to the commandant in reference to this transaction?—A. I made none; the officer of the day is the first one whose duty it is to bring it to the notice of the commandant.
Q. Did you make any statement to the officer of the day?—A. They were reported to me as absent. I reported them to the officer of the day as absent, and he reported them to the commandant.
Q. Who was the officer of the day?—A. Mr. Mott.
Q. Who relieved him?—A. I do not remember.
Q. Was not Mr. Mott officer of the day on the night the transaction occurred?—A. Yes, sir.
Q. He would be relieved at eight o'clock in the morning?—A. Yes, sir.
Q. Mr. Mott knew nothing of this affair, so far as you know?—A. No, sir; he was very much surprised when he heard of it.
Q. You studiously attempted to keep this from him?—A. Yes, sir, and did so.
Q. Mott would make his report on the morning of January 4th?—A. Yes, sir.
Q. His report was according to the fact?—A. All he knew was that they were absent without leave.

Q. The officer of the next morning would also make note of it in his report?—A. He would not make any mention of them. They are only reported on one morning by the officer of the day.

Q. No further report is made until they are taken up?—A. We receive orders, after a certain time, in the company, to either drop them or make some other disposition.

Q. After this occurred, did your class have any meeting in regard to it?—A. No, sir; not for some time; we went up and told the commandant.

Q. When was the committee appointed to make a statement of the affair?—A. It was appointed in this manner: very soon after eight o'clock we went up, and told the commandant that we had sent them off. He, of course, was very much surprised, and asked for an explanation; that is to say, for a statement of what we had done and our reasons for doing it. This statement was drawn up by three members of the class and given to him. They were selected or appointed to draw up this statement.

Q. That was several days afterward?—A. It was a day or two afterward.

Q. Were you present when that report was made to General Upton?—A. I was not.

Q. Who made the report?—A. I think Mr. Wasson made the report. We did not desire to keep him in ignorance of what had transpired.

Q. What action was taken in reference to the first class that day?—A. Nothing was done to us. I suppose it was under consideration. Of course we did not know what the superintendent and the commandant were doing.

Q. Several days elapsed before an order was published about it?—A. Yes, sir; we informed him that we had done it, and that we expected to receive such punishment as he saw fit to impose upon us.

By Mr. ASPER:

Q. How do you regard this conduct on your part; as praiseworthy or otherwise?—A. Of course I can speak for no one but myself. With me it was a question—a very serious question—whether I should be dismissed or stay here; whether I should allow such lying to go on and remain, or to not allow it and go away. I chose the last.

By Mr. SLOCUM:

Q. Something has been said about an order being issued in the mess-hall for the second class to cut the fourth class?—A. No, sir; no such order could have been issued except through me, and none was issued; it would not have been allowed.

Q. To your knowledge no commissioned officer knew of this affair until after it occurred?—A. I know that none did. It was so sudden that no officer could have known it until it was entirely over.

By Mr. ASPER:

Q. What feeling was entertained by yourself and your class toward Cadet Baird?—A. None whatever, so far as I am personally concerned. I had probably more to do with him than any member of the class, as I am captain of his company. I had up to this time been very favorably impressed with him. I had not known of his going to Buttermilk. It was not in my province to disapprove of that. It is considered by us as a piece of recklessness, but not as evincing depravity. It was something I would not do.

Q. When did he enter the academy?—A. He came in September.

Q. The other boys came in June?—A. Yes, sir.

Q. As to Baird's general standing—was it good or otherwise?—A. Do you mean his scholarship?

Q. As to his standing as a cadet?—A. That we know very little of, except in our own class. We have nothing in common with the fourth class, and know nothing of them until they have been here a year.

Q. Was there anything against Flickinger or Barnes?—A. Mr. Barnes was one that would give you a very unfavorable impression. He was very dirty in his personal appearance—not clean or ambitious to be soldierly. That was the only way in which I had any knowledge of him.

Q. How was Mr. Flickinger's standing?—A. Flickinger was one of whom I knew very little. He was never thrown in my way except on duty, and on duty I had never had any fault to find with him, or with Mr. Baird either. They were very neat in their appearance, and that was about all that was required of them.

WEST POINT, N. Y., *January* 28, 1871.

Cadet FREDERICK D. GRANT sworn and examined.

By Mr. ASPER:

Question. State your age, residence, and position at the academy?—Answer. I am 21 years of age; reside in Washington, D. C.; and am a private in the first class.

Q. State as briefly as you can what part you took in the sending off of these boys?—A. On the 2d of January, while we had release from quarters, Mr. Baird, of the fourth

class, went to Buttermilk, where he got drunk. He returned in the afternoon, and in the evening he told one of his classmates, Mr. Dallon, that he was going down again. Mr. Dallon told him not to go, that he would be "hived" if he was caught during the inspection. He replied something to the effect that he was all right; that he had arranged with Flickinger; that he had him under his control, so that he would do what he told him to. At the sentinel's inspection at the first relief, Flickinger answered "all right;" the sentinel, however, suspected that all was not right, and so reported to the corporal.

Q. You need not go through with the details. Your class were satisfied that these cadets were guilty of falsehood, and held a meeting for the purpose of taking measures to expel them from the Point?—A. Yes, sir. There had been a great many court-martials before that, and out of 29 that had been dismissed within the last ten years, only one has remained away.

Q. You divided your class into three squads who were to take care of these boys?—A. Yes.

Q. The principal part of the class were engaged in the affair?—A. The whole of it.

Q. Are you a member of that class?—A. Yes, sir.

Q. You took part in the affair the same as the rest?—A. Yes, sir.

By Mr. SLOCUM:

Q. Speaking about the number of cases in which sentences have been remitted, in how many of these cases have you applied for a remission of the sentences?—A. Only three, sir.

Q. What were they?—A. One was the case of Mr. Clark, class of 1868. He was dismissed for going down to Buttermilk. I wrote a letter to father, but he took no action upon it; Mr. Johnson remitted it; and the other two were the cases of Mr. Groom and Mr. Davenport. I wrote to have their sentences remitted, as they were not guilty of any offense. Their sentence was remitted to suspension for one year.

Q. What were they charged with?—A. Conduct unbecoming an officer and a gentleman; the specification was for erasing a report. They did not erase it—at least I understood they did not; and out of the five men who were court-martialed at that time, three of them for lying, the two who were not guilty were sentenced to be dismissed, and only one that was dismissed finally was afterward proven to be innocent, and that was Barnes.

Q. Do you recollect the case of Shortelle?—A. That was another case about which I wrote. I forgot that.

Q. You wrote on about that?—A. Yes, sir.

Q. He was reinstated?—A. Yes, sir.

Q. These four cases are the only ones you can call to mind?—A. Yes, sir.

By Mr. ASPER:

Q. Were you present in the room calling up these boys, and what part did you take personally in sending them off?—A. I was merely in the room. I was appointed treasurer of the committee. I think there were six or eight men in the committee to which I belonged.

Q. Did you have a meeting on the day of the 3d, in which you heard testimony in reference to these boys?—A. We had a meeting of the class, I think, on the 3d. We had enough testimony to convince me.

Q. The boys were not present at any of these meetings?—A. No, sir.

Q. They did not know what was going on?—A. No, sir; we didn't intend to do anything until we were satisfied that they were guilty.

Q. Who were the movers?—A. There were no movers.

Q. Who were the leaders?—A. No one; all acted together.

Q. Did you see anything about violence?—A. There was none that I saw. I only remember seeing three men touch them, and that was only to wake them, which was not roughly at all; just enough to wake them up. They were informed that they had been lying, and that they knew it, and that we were going to send them off. We took them up the road toward Fort Putman and sent them off. I didn't see them touched going up.

Q. The talk going up was rather menacing than otherwise toward the boys?—A. I did not pay any attention to it. I believe something was said, if they came back in the morning they would be tarred and feathered.

Q. Was there not considerable talk all the time of that kind?—A. I believe there was.

Q. That they would be tarred and feathered if they came back?—A. Yes, sir.

Q. Were there any other threats?—A. Not that I heard.

Q. Were they not told to run?—A. Perhaps so; they ran about fifty yards.

Q. Were any missiles thrown?—A. None whatever.

Q. Did not some of the boys have rocks in their hands?—A. I did not see any.

By Mr. SLOCUM:

Q. Your class base their action in this matter wholly on the ground that it was found impossible to punish such offenses here?—A. That was one of the reasons; another was, the sentences being remitted as often as they are. We did not consider this the place for liars.

Q. Was there not a difficulty between your class and these boys before?—A. None whatever that I know of. I know that Mr. Baird, particularly, had friends in our class. Mr. Barnes had been arrested two or three times for lying, twice I think altogether, and was known to be a liar.

WEST POINT, N. Y., *January* 28, 1871.

General EMORY UPTON recalled and examined.

By Mr. SLOCUM:

Question. If you desire to make any additional statement to the committee in reference to your testimony yesterday, you can do so.—Answer. In reply to a question which you asked me as to which, in my opinion, would be most detrimental to the discipline of the corps, to receive back a liar who was convicted as such, or a mutiny of the first class, I think I went on to state that this action of the first class was not a mutiny in any sense of the word, and I did not go back and answer the question. I would like to state now that in my judgment no greater blow can be struck to the service or to the moral tone of the corps than to compel the academy to receive back a cadet who has been guilty of falsehood or conduct unbecoming an officer and a gentleman, and as a consequence to graduate him and send him forth to the Army. I think no blow can be struck greater than that; that an isolated act of breach of discipline, like the one committed by the first class, which can be adequately punished by the military authorities, cannot be compared in its pernicious results to those that flow naturally from receiving back a cadet who is known not to possess integrity of character. I wish to be fully understood that I do not justify the action of the first class; that can be punished by the military authorities in such a manner as to prevent its recurrence.

By Mr. ASPER:

Q. What, in your opinion, is the remedy for laxity of discipline at the academy, if any exists?—A. In general terms I would say that I do not think any exists. I think the best interests of the service would be served by having every cadet who is guilty of a dishonorable act dismissed. I think the superintendent should have authority to convene general courts-martial, to review their proceedings and act upon all sentences save those of dismissal, which should be reserved for the action of the Secretary of War, who is the head of the institution. I think it would raise the standard of education if every cadet who is found deficient by the academic board, and recommended by the board for discharge, was discharged upon that recommendation.

Q. Have there been many instances in which the academic board have been overruled?—A. I think there has not been many, but this is a thing which would look to the whole future. It would stop that political pressure which is always brought to bring a man back who has been discharged. If there is any doubt in your minds as to my views as to this action of the first class, I desire to say that I believe it was a gross breach of discipline, and should be punished by the military authorities. I would like also to put my views on record in regard to the resignations of these boys. I consider it better for themselves and for the interests of the service that they should resign (as they admitted all the facts) rather than to be brought to trial. Of course I am willing to stand or fall by all my official acts, and I would further state that it is my belief that where a cadet is guilty of a dishonorable action, and is conscious that he can be proven so before a court-martial, it is better for him to resign rather than to have his conduct made public by an official investigation. I have never advised a cadet to resign unless I was fully satisfied that the charges could be sustained against him. I have in no case urged a man to resign unless he admitted the charges against him, and I have simply given him advice in regard to his leaving the academy.

Q. In these cases there don't seem to be any admission of guilt.—A. Flickinger and Baird both admitted to me their guilt.

Q. But Baird was not under charges that would result in his dismissal.—A. I had charges made up against him. My first charge was only absence without leave.

Q. Is not that all you could have brought up?—A. I could subsequently bring up that he connived with his room-mate to make a false statement. I would also state that it has been customary where cadets have committed an offense which would occasion their expulsion by law for them to resign, and in some cases they have been ordered summarily to their homes to wait the action of the Secretary of War without trial.

Q. That would be what you would call a summary dismissal?—A. Yes, sir. It shows that it has not been the invariable rule to try cadets, and that if they want to resign

they would be permitted to resign. My understanding is that the first class are now very sorry about this thing, and regret it occurred.

Q. Do you know of any other cadets being at Buttermilk at the time Baird was there?—A. No, sir; I don't think there were any others there.

Q. If they were there must not their absence been covered up in the same way that Baird's was?—A. I suppose so.

General Upton subsequently appeared before the committee and desired to have the following statement incorporated as part of his testimony in explanation and correction of it:

HEADQUARTERS U. S. CORPS OF CADETS,
West Point, N. Y., January 29, 1871.

GENTLEMEN: Mr. Baird having testified before your honorable committee that cadets of other classes were with him at Highland Falls at the time his room-mate, Cadet Flickinger, falsely reported "all right" to the sentinel, and your having asked me if their absence could have been concealed in any other manner than that adopted by Cadets Baird and Flickinger, to which I replied "that it could not," or words to that effect, I now desire to state that on the evening of January 2, 1871, the evening Cadet Baird absented himself from the post, the superintendent gave permission to the first and second classes to attend a hop, and that a permit was presented to me by Cadet Birney, W. G., for the third class to visit in barracks from call to quarters till tattoo or taps; which permit was signed by the superintendent. The fourth class was the only one in the academy the members of which were required, as on other evenings, to remain in their quarters. When before your honorable committee, I did not recall the fact that the 2d of January was kept as a holiday, and that the superintendent had given privileges to the first, second, and third classes, authorizing their absence from their quarters. I now, therefore, request to amend my testimony, so that it may read: "At the time Cadet Baird was absent from his quarters, between 7.35 and 8.40 p. m. on the 2d of January, 1871, it was possible for any member of the first, second, and third classes to have been at Highland Falls without necessitating, requiring, or permitting their unauthorized absence to be concealed by the false report, 'all right,' to the sentinel, the absence of the members of these classes from their rooms being accounted for by the privileges granted by the superintendent."

As in the absence of this testimony your honorable committee may be able to report that the offense of Cadet Baird was committed by members of the higher classes on the same evening, and that their absence was covered similarly, by false reports to the sentinels, thereby leading the public to believe that falsehood is a vice common in the corps of cadets, I ask you to accept my testimony as amended; if not, I ask that, in justice to the academy, General Pitcher, myself, and a member or members of the first, second, and third classes may be summoned to testify before you in proof that the offense of Cadet Baird had no parallel in either of the classes above named.

I have the honor to be your obedient servant,

E. UPTON,
Brevet Major General U. S. Army, Commandant of Cadets.

Hon. JOEL F. ASPER,
Hon. H. W. SLOCUM,
Hon. JASPER PACKARD,
Members of the Sub-Military Committee, House of Representatives.

I would also add that before Cadets Baird and Flickinger returned from Poughkeepsie, I notified a member or members of the first class that they would return and go to their rooms, where they could remain undisturbed; that I should not place any sentinel over them, as I feared no molestation. I sent Captain Clarke, assistant instructor of tactics, to the room of Cadets Baird and Flickinger to notify them that they might rest in peace and quietnesss. The officer in charge, Captain Clarke, retired to his quarters as usual that night. There was no disturbance of any kind, and the corps of cadets was in as perfect a state of subordination as was ever known.

E. UPTON,
Commandant of Cadets.

WEST POINT, N. Y., *January* 28, 1871.

Captain ALEXANDER PIPER sworn and examined.

By Mr. ASPER:

Question. State your rank and position here.—Answer. I am captain Third United States Artillery, and assistant instructor of artillery cadets here.

Q. State your opinion as to the discipline here now as compared with former times.—A. I think it runs about the same. There are at times some things done that do not agree with my judgment; but I do not mean to say that these things are wrong. For instance, when I am acting as commandant I try, of course, to conform in my action

to my knowledge of what the commandant does when he is in his office. He has got his regular routine. I do not now think of anything, but occasionally there may be something which, if I were permanently commandant, I might act differently in, don't you know.

By Mr. SLOCUM:

Q. You mean that for the last five years you don't think the discipline has materially lowered?—A. I would not like to say one word or the other about that.

Q. How is the discipline of the corps now compared with what it was when you were a cadet?—A. All graduates say—you have heard that time and again—"things are not like when I was a cadet." I know that the authorities are much more liberal now than they were in our time. They grant more indulgence to cadets now than they did to us. Now, some of these things may not, in my opinion, be as conducive to strict discipline as others, but I would not like to set up my judgment against others.

Q. How is it as to the general character of the discipline?—A. I think it is about the same. Now, this occurrence which you are investigating; I ought to tell you that I know nothing of it except from hearsay, for this reason: At that time a general court-martial was in session at this post, and of which I was a member. I supposed that the affair would result in the trial of some persons—possibly these cadets—and thus bring the matter before me officially; and for that reason I wanted to know as little about it as possible until it came up before us. I don't think myself that this affair grew out of any relaxation of discipline. This is the second occurrence of the kind since I have been here, and I think if the first occurrence had been punished as the court-martial decided it would have had a good effect. Some four years ago there was some stealing going on in the corps, and they thought they had positive proof that they had the offender, and they drove him out of the corps by violence. Some three or four of the ringleaders were arrested, tried by court-martial, and I think the sentence was dismissal in all their cases. The sentences, I believe, were remitted; and it is my opinion that if it had been carried out strictly it would have had an excellent effect on the corps.

Q. Did not that young man prove innocent?—A. I was on the court of inquiry.

Q. What was the verdict of the court?—A. I could not say; it has never been published.

Q. In this party there seems to have been no ring-leaders?—A. I don't really know much about it; I was very careful not to know anything about it; I don't think this particular act indicates any falling off in discipline; I think that it is one of those things that are always liable to happen, and I believe it results from prior cases not having been punished as they should have been.

Q. What class was it that sent that boy off four years ago?—A. I think it was the first class. There had been a good deal of stealing, and the cadets had reported it to the commandant and were very much worried, because they thought the honor of the corps was being prejudiced; they did all they could to detect it, and when they thought they found the guilty person they acted as they did, and as in this case they acted impulsively; of course there was no justification in it; I go so far as to say that if the authorities choose to keep a thief in the corps or to keep a liar, it is not my business at all; if I don't like it I can apply for another station; it is not for me to say who shall or who shall not stay here.

WEST POINT, N. Y., *January* 28, 1871.

Lieutenant JAMES M. MARSHALL sworn and examined.

By Mr. ASPER:

Question. State your rank in the Army and position in the academy?—Answer. I am first lieutenant Fourth United States Artillery, and assistant instructor of infantry tactics at the United States Military Academy, West Point.

Q. Were you the officer in charge on the night of the 3d?—A. I was officer of the day on the night of the 3d, and was not relieved until the morning of the 4th.

Q. How many days do you run as officer in charge?—A. Just one day; from guard mount on one day to guard mount the next.

Q. It is part of your duty to go around and see whether everything is all right at quarters after the guards have been dismissed?—A. No, sir; as commandant of the cadet companies we inspect quarters after taps, and as officer in charge to make inspection once or twice a week at no regular or fixed time; as officer of the day my duty ceases at 10 o'clock, unless there should be something unusual to call me back.

Q. You made no inspection on the night of the 3d or the 4th?—A. No, sir.

Q. It was not the usual night of the week to do so?—A. It is more usual to inspect on Saturday night than any other, but there is no rule in regard to that. The commandant has expressly desired that we should inspect after taps, once a week, without

regard to the day of the week. Of course if they knew when we were coming there would be no use in the inspection.

Q. You made no inspection that night?—A. No, sir; I had not the slightest suspicion that anything of the kind was going to be done until the next morning when I went to the office.

Q. About what time was that?—A. That was about 8 o'clock.

Q. How did you learn it?—A. From the commandant, or one of the tactical officers. I first heard that they had deserted, and after I returned from my breakfast, which I usually do about 9 o'clock, I heard they had been sent away. I met General Upton, and he told me what had taken place.

Q. There was no consultation among the tactical officers as to what was to be done?—A. We talked the matter over. General Upton had gone over to the superintendent's office, as we supposed, to report the matter to him, and we of course had to act under his orders. It was a matter which excited a great deal of interest, and a great deal was said about it.

Q. What is the condition of discipline here, and how does it compare with former years?—A. I have been on duty here as tactical officer since October 1, 1869, and I think the discipline is better now than it was at that time. It has been improving the last six or eight months considerably, and it is as good as I ever knew it since I have been an officer. Of course when I was a cadet I looked at things with a different eye.

By Mr. SLOCUM:

Q. If there is any cause which you believe operates injuriously please state it?—A. My opinion is that so far as the officers here are concerned they do everything they can to keep up proper discipline; but the remission of sentences and the fact that the officers are not sustained has a bad effect.

Q. Do you know the names of the cadets who have been excepted from the order punishing the first class?—A. Wheeler, (W. B.,) Pardee, Mansfield, and Mott.

WEST POINT, N. Y., *January* 28, 1871.

Cadet JAMES R. WASSON sworn and examined.

By Mr. SLOCUM:

Question. State your age and position here.—Answer. I am twenty-four years old, and am cadet captain D Company corps of cadets.

Q. State briefly what occurred here on the night of the 3d and 4th.—A. The occurrence to which you refer is the forcible ejection of three cadets—Baird, Flickinger, and Barnes. They were taken out of their quarters and conducted to a point near Fort Putnam by the members of the first class, with the exception of five members who were absent—one as officer of the day, one sick in hospital, and three others who did not take any part.

By Mr. ASPER:

Q. Give their names.—A. Mott was officer of the day, Pardee was in the hospital, Bacon had just left the hospital, and Mansfield and Wheeler took no part.

Q. They declined to take any part?—A. I don't think Wheeler declined in the first place, but he did not turn out at night with the class.

Q. How many were there in the class besides those you name?—A. There are forty-two altogether; deduct five, leaves thirty-seven.

Q. Did all these men appear and take part in the transaction?—A. Yes, sir.

Q. What did you do, and how did you do it?—A. Two of the cadets lived together, and one roomed alone. A committee was sent to each room to prepare the men to leave—that is, to wake them up and dress them in citizen's clothing—and another committee waited down in the area to see if all was right. The men were then marched to a point near Fort Putnam, where we supposed cadet limits terminated, given some money, and told to leave the Point and never to return. I do not remember the language used. I did not speak to any of the men myself. There were a number of men talking at once, as would be expected under such circumstances. The class then returned to barracks—the whole proceedings occupying about twenty-five minutes.

Q. What part did you perform?—A. I only accompanied the class.

Q. Was any violence used?—A. I saw no violence used.

Q. Any violence in language?—A. At the time they were sent away I heard remarks, I could not state by whom, as many were speaking at the same time, that they had better not return as cadets, and threatening them with severe treatment in case they did. I heard the expression used, "you will be tarred and feathered," and that they should remember it was the first class that send you away, and that is the way they treat liars. There was no personal violence.

Q. Did you have one or two meetings of your class on the day of the 3d?—A. There were two meetings, I believe. We met first in a gentleman's room, and when we assembled it was not a full meeting of the class; it was an informal meeting altogether, and

men were called upon to express their views in regard to what had been done. It had attracted a great deal of attention and comment in the class. The meeting was adjourned to meet again at 4 o'clock, because at 2 we had to attend recitation. I did not attend the second meeting.

Q. But you assume all they did?—A. Yes, sir; it was generally understood that what they did would be sustained by the whole class.

Q. Was that meeting held before or after parade?—A. I think it was before parade.

Q. Before they knew what action was to be taken by the authorities?—A. We knew that the men were placed in arrest.

Q. What meeting, if any, did the class have after the sending away of these boys?—A. The first meeting we had after they were sent away was called by myself. The commandant, after the matter came to his knowledge, directed us in some way to communicate with these men, that they would not be molested. I do not know whether this was an order to us or not. I inferred not at the time, but as a letter by myself, on my own responsibility, could not pledge that the class would not interfere with them, I called a meeting and submitted that to them, and endeavored to obtain an expression of feeling by the class They, however, declined to do anything of the kind.

Q. That is, to permit them to come back?—A. No, sir, to communicate with them or send them any help. A good many reasons were urged, among which was that we could not properly bring them back after having sent them away and telling them they would be tarred and feathered if they returned; that the commandant would undoubtedly bring them back himself and protect them while here, so that there was no necessity for us to do anything.

Q. Who reported the transaction to the commandant?—A. Mr. Russell and myself.

Q. What time in the day did you report it?—A. Between 8 and 9 o'clock in the morning.

Q. You went to the commandant voluntariiy and reported to him?—A. Yes, sir.

Q. Was this the first intimation he had of what had been done to the boys?—A. I think it was.

Q. After that you had another meeting and appointed a committee?—A. That was appointed in this way: After the matter was reported to the commandant and we had told him all that occurred and our reasons for doing it, we added that any further information he desired would be furnished by us or any member of the class. Afterward Russell and myself were sent for by Captain Clark, who was acting commandant that day, and told to present a written statement of the transaction, and anything we wished to state in regard to it. At our request Mr. Davis was also included in the committee, and we were furnished with all the necessary facilities for drawing up this report; that is, we had permission to visit each other's rooms, &c.; after we had been working on it during the day some of the class were dissatisfied with what we were doing, and thought we were pursuing a course which would not be approved by the class. A meeting of the class was then called, and the matter was taken entirely out of our hands and given to another committee, who made a report to the commandant.

Q. Is this the report? (A paper shown to witness.)—A. I do not know whether it is the original or a copy.

Q. That report was made out by a committee appointed by the class?—A. Yes, sir.

Q. Was it read to the class before being sent?—A. If it was I did not hear it.

Q. Was it assumed by the class?—A. Yes, sir.

Q. They approved of the statement of facts and assumed its responsibility?—A. Yes, sir.

WEST POINT, N. Y., *January* 28, 1871.

Cadet WALLACE MOTT affirmed and examined.

By Mr. ASPER:

Question. State your age and position.—Answer. I am twenty-three years of age, and cadet lieutenant in corps of cadets.

Q. You were officer of the day about the 3d of January?—A. I think it was on the 3d of January, ending on the morning of the 4th.

Q. What, if anything, did you know of the transaction committed by the first class on the night of the 3d of January?—A. I knew nothing about it. I heard nothing that night which led me to believe that anything unusual was going on. I heard some one in my room to wake up my room-mate, Schwatka.

Q. He was waked up and went out?—A. I cannot tell whether he waked up. I heard some one in the room. In the morning at the first roll-call I found that Cadets Baird and Flickinger were absent, and it was my duty to look them up. I went to their rooms and found they were gone. Their beds were somewhat in disorder, but everything that a cadet usually has in his room was there; a watch was hanging up in Mr. Baird's alcove, clothes were in the press, &c. At surgeon's call, a half an hour afterward, it is my duty to be down there again to assist in forming the squads of the sick to march to the hospital. I visited their rooms again, and also Mr. Barnes's room, and found him

gone also. When the new officer went on we both went to the commandant's office and reported the fact that these cadets were missing, and had been gone since reveille. That was shortly after 8 when we reported this at the commandant's office.

Q. What report, if any, did you make about the disturbance in your own room?—A. I made no mention of it; it could hardly be called a disturbance.

Q. Is it a usual or unusual thing to wake up boys?—A. It sometimes happens that one cadet will visit another in his room.

Q. Do you pay your visits after taps?—A. Quite frequently.

Q. You made no mention of that fact?—A. No, sir.

Q. At the time you made your report what knowledge had you of the transaction that occurred the previous night?—A. None at all.

Q. How soon after did you hear of it?—A. I should think about a half an hour; it was talked of in the class.

Q. What part, if any, had you in assuming responsibility in this transaction?—A. I cannot say that I have had any responsibility. After the superintendent issued his order saying that any one who disavowed the act would be released from the effect of that order, I never availed myself of that privilege, but the commandant reported the fact to the superintendent that I had nothing to do with it, and there was a special order issued applying to my case and to one or two others who were in hospital.

Q. Do you know whether any feeling existed between the first class and the fourth class, or against these boys?—A. No sir, not that I know of. I do not think there was any other thing except the affair of the 2d of January.

WEST POINT, N. Y., *January* 28, 1871.

Captain ALEXANDER CLARK sworn and examined.

By Mr. ASPER:

Question. How long have you been stationed at the academy?—Answer. About five years.

Q. How does the state of discipline at the present time compare with any previous time?—A. I think it is as good to-day if not better than it was five years ago.

By Mr. SLOCUM:

Q. How does it compare with the time when you were a cadet?—A. Our opportunities for judging as officers and cadets are not the same. We are apt to think that when we were cadets that was the best time the academy ever saw. I used to think when I was a cadet that the discipline was better than it has been since.

Q. Do you know of any cause that operates to the detriment of the discipline or to the best interests of the academy?—A. I think that the reinstatement of men who have been sentenced to be dismissed by court-martial is one detrimental cause.

WEST POINT, N. Y., *January* 28, 1871.

Lieutenant CHARLES KING sworn and examined.

By Mr. SLOCUM:

Question. Give your rank in the Army and position in the academy?—Answer. I am first lieutenant Fifth Cavalry, and assistant instructor of cavalry, artillery, and infantry tactics.

Q. When did you graduate?—A. June 18, 1866.

Q. How long have you been on duty here?—A. Since August 28, 1869.

Q. We desire to inquire as to the discipline of the corps; is it as good as when you were here as cadet?—A. In some respects not better, and in some respects it has been worse. I regard it as improving.

Q. State, if you can, any cause that is injurious to discipline or to the best interests of the academy?—A. The main cause in my opinion is that the authorities have not been sustained in the punishment awarded cadets for violations of regulations.

WEST POINT, N. Y., *January* 28, 1871.

Captain EDWARD C. BOYNTON sworn and examined.

By Mr. SLOCUM:

Question. State your rank in the Army, and the nature of your service here.—Answer. I am a captain in the Army, and for nearly ten years I have been at the academy as adjutant.

Q. You are now adjutant of the academy?—A. Yes, sir.

Q. As adjutant what are your duties in the main?—A. I have care of the records of the academy, organize and arrange all the classes, keep the demerit rolls, and have charge of the official correspondence of the academy.

Q. Have you a list of cadets who have been dismissed from the academy and after-

ward reinstated?—A. I have with me a list of cadets who have been dismissed after trial by court-martial, or by the Secretary of War. The remarks opposite their names are taken from the official records of the academy. (The list referred to is attached to the testimony, and marked A.) I have also a list of cadets who have been suspended by the Secretary of War, or by court-martial. These lists cover a period of ten years last past. (The list last referred to is attached herewith, and marked B.)

Q. Do you know anything about the recommendations upon which the sentences were mitigated?—A. I only know what the general orders promulgating the proceedings states. I have here copies of all general orders relative to the proceedings of courts-martial for the trial of cadets, which I will lay before the committee. (Attached, and marked C.)

Q. As adjutant are you a member of the academic board?—A. Only as secretary. I have no voice in its proceedings.

Q. Is it customary for the academic board to find a cadet deficient on the recommendation of his instructor, even though the head of the department does not concur?—A. I think that as a general rule the head of a department and the instructor are found to agree. Where they are found to disagree, and that is a very rare instance, I have never known a cadet to be found deficient on the mere instructor's recommendation.

Q. Have the academic board found men deficient, and they subsequently reinstated by the War Department?—A. Yes, sir; repeatedly.

Q. And put back in the same class?—A. Yes, sir; sometimes in the same class, and sometimes in a succeeding class.

Q. Can you call to mind any of the names of the present first class who have been found deficient and reinstated?—A. I could not say without consulting the records. My impression is there are not any cases of that kind. There are twenty-seven names on the lists that I have presented you of cadets who have been dismissed, and of those, twenty-one have been put back with not so much as a word of explanation. Twenty-one of them have been reinstated, and the impression is that five of the balance are to return. Three of them were in the fourth class. They were pledged on their word of honor not to annoy or harass the fourth class cadets, their own companions; they having been admitted in June, and the latter in September, and for a violation of this pledge they were tried and dismissed.

Q. What is your opinion as to the state of discipline at the academy now?—A. I think it has been better within the last two or three years and within the last twelve months. I think there has been a better feeling among the cadets than I have ever known before; we have had fewer courts-martial, fewer cases of violations of regulations. They very rarely go to Buttermilk. The inducements to go there are removed. They can now go to Cold Spring and Newburg. There is more indulgence granted them, and I think they appreciate it. I think there is a higher state of discipline among them than there has been for many years.

A.

List of cadets who have been dismissed by courts-martial or by the Secretary of War from January 1, 1861, *to January* 1, 1871, *a period of ten years.*

Names.	Date of dismissal.	Offense.	Remarks.
James F. McQuesten.....	April 3, 1861	Absent from the post of West Point without authority.	Restored; remitted by the Secretary of War.
James P. Dronillard.....	April 3, 1861	Absent from the post of West Point without authority.	Restored; remitted by the Secretary of War.
William S. Beebe	April 3, 1861	Going beyond prescribed limits, and absence from duty.	Restored; remitted by the Secretary of War.
Jacob H. Smyser.....	April 3, 1861	Absent from the post of West Point without authority.	Restored; remitted by the Secretary of War.
James Seabrook	Oct. 9, 1861	Absent from quarters and beyond cadet limits between evening call to quarters and 8¼ o'clock p. m., September 26, 1861.	Restored November 1, 1861.
John G. Butler	July 19, 1862	Vulgar and profane inscriptions on check book on May 20, 1862.	Restored; sentence remitted by Secretary of War.
James E. Bachelder.....	Sept. 27, 1865	Intoxication.....	Restored; remitted by the Secretary of War.
Charles King	Feb. 10, 1866	Allowing Cadet O. B. Boyd to be paraded before the battalion of cadets assembled for evening parade as a degraded criminal.	Restored; remitted by the Secretary of War.
Frank Soulé	Feb. 10, 1866	Parading, or assisting to parade, Cadet Boyd as a degraded criminal.	Restored; execution of sentence suspended by Secretary of War.
Edward M. Wright	Feb. 10, 1866	Parading, or assisting to parade, Cadet Boyd as a degraded criminal.	Restored; execution of sentence suspended by Secretary of War.

A.—*List of cadets who have been dismissed by courts-martial, &c.*—Continued.

Names.	Date of dismissal.	Offense.	Remarks.
Arthur Cranston.....	Feb. 10, 1866	Parading, or assisting to parade, Cadet Boydas a degraded criminal.	Restored; execution of sentence suspended by Secretary of War.
Eugene P. Murphy.....	Feb. 10, 1866	Parading, or assisting to parade, Cadet Boyd as a degraded criminal.	Restored; execution of sentence suspended by Secretary of War.
Leonard G. Hun	Jan. 26, 1866	Intoxication and beyond cadet limits.	Restored; remitted by the Secretary of War.
John P. Walker.....	April 20, 1866	Disrespect to his superior officer...	Restored May 2, 1866.
William J. Hamilton.....	May 8, 1867	Intoxication.....	Restored; commuted to confinement to camp.
Hayden De Lany.....	May 8, 1867	Intoxication.....	Restored; remitted by the Secretary of War.
Robert N. Price.....	Aug. 3, 1869	Going beyond cadet limits.....	Restored; commuted to confinement to cadet limits.
Daniel C. Kingman	Dec. 6, 1870	Lying	Restored; mitigated to suspension by the Secretary of War.

William P. Clark ..	October 31, 1867 ...	Beyond limits, at Cozzens's H.	Revoked December 6, 1867.
J. B. Walker	March 2, 1868	Absent from quarters during night.	Disapproved March 2, 1868.
J. E. Shortelle.....	February 5, 1871 ..	Insubordinate and disrespectful conduct to his superior officer, Captain Clarke.	Commuted by kindness of President to restriction of limits.

T. G. PITCHER,
Brevet Brigadier General, Superintendent Military Academy.

C.

[General Court-martial Orders No. 40.]

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE,
Washington, February 10, 1866.

I. Before a general court-martial which convened at West Point, New York, January 23, 1866, pursuant to Special Orders No. 657, dated December 27, 1865, and No. 25, dated January 19, 1866, War Department, Adjutant General's Office, Washington, and of which Brevet Lieutenant Colonel J. C. Clark, jr., captain U. S. Army, is president, were arraigned and tried—

1. Cadet Lieutenant and Adjutant Charles King, jr., U. S. Military Academy.

CHARGE.—"Conduct prejudicial to good order and military discipline."

Specification.—"In this: that he, Cadet Lieutenant and Adjutant Charles King, jr., of the U. S. Corps of Cadets, while in charge of the battalion of cadets at evening undress parade, did allow certain cadets to parade Cadet O. B. Boyd, of the U. S. Corps of Cadets, as a degraded criminal, before the batalion assembled for evening parade. All this without the sanction of any authority, and in gross violation of good order and military discipline at West Point, New York, on or about the 18th of December, 1805."

To which charge and specification the accused, Cadet Lieutenant and Adjutant Charles King, jr., U. S. Military Academy, pleaded "Guilty."

Finding.

The court, having maturely considered the evidence adduced, finds the accused, Cadet Lieutenant and Adjutant Charles King, jr., U. S. Military Academy, as follows:

Of the specification, "Guilty." Of the charge, "Guilty."

Sentence.

And the court does therefore sentence him, Cadet Lieutenant and Adjutant Charles King, jr., U. S. Military Academy, "*To be dismissed from the military service of the United States.*"

2. Cadet Frank Soulé, jr., U. S. Military Academy.

CHARGE.—"Conduct prejudicial to good order and military discipline."

Specification.—"In this: that he, Cadet Frank Soulé, jr., of the U. S. Corps of Cadets, did force or assist in forcing Cadet O. B. Boyd, of the U. S. Corps of Cadets, to assume a dress other than his uniform, and did parade or assist in parading Cadet Boyd, as a degraded criminal, before the corps of cadets. All this without the sanction of any authority, and in gross violation of good order and military discipline, at West Point, New York, on or about December 18, 1865."

To which charge and specification the accused, Cadet Frank Soulé, jr., U. S. Military Academy, pleaded "Guilty."

Finding.

The court, having maturely considered the evidence adduced, finds the accused, Cadet Frank Soulé, jr., U. S. Military Academy, as follows:

Of the specification, "Guilty." Of the charge, "Guilty."

Sentence.

And the court does therefore sentence him, Cadet Frank Soulé, jr., U. S. Military Academy, "*To be dismissed from the military service of the United States.*"

3. Cadet Edward M. Wright, U. S. Military Academy.

CHARGE.—"Conduct prejudicial to good order and military discipline."

Specification.—"In this: that he, Cadet Edward M. Wright, of the U. S. Corps of Cadets, did force or assist in forcing Cadet O. B. Boyd, of the U. S. Corps of Cadets, to assume a dress other than his uniform, and did parade or assist in parading Cadet Boyd, as a degraded criminal, before the corps of cadets. All this without the sanction of any authority, and in gross violation of good order and military discipline, at West Point, New York, on or about December, 18, 1865."

To which charge and specification the accused, Cadet Edward M. Wright, U. S. Military Academy, pleaded "Guilty."

Finding.

The court, having maturely considered the evidence adduced, finds the accused, Cadet Edward M. Wright, U. S. Military Academy, as follows:
Of the specification, "Guilty." Of the charge, "Guilty."

Sentence.

And the court does therefor sentence him, Cadet Edward M. Wright, U. S. Military Academy, "*To be dismissed from the military service of the United States.*"

4. Cadet Arthur Cranston, U. S. Military Academy.

CHARGE.—"Conduct prejudicial to good order and military discipline."

Specification.—"In this: that he, Cadet Arthur Cranston, of the U. S. Corps of Cadets, did force or assist in forcing Cadet O. B. Boyd, of the U. S. Corps of Cadets, to assume a dress other than his uniform, and did parade or assist in parading Cadet Boyd, as a degraded criminal, before the corps of cadets. All this without the sanction of any authority, and in gross violation of good order and military discipline, at West Point, New York, on or about the 18th of December, 1865."
To which charge and specification the accused, Cadet Arthur Cranston, U. S. Military Academy, pleaded "Guilty."

Finding.

The court, having maturely considered the evidence adduced, finds the accused, Cadet Arthur Cranston, U. S. Military Academy, as follows:
Of the specification, "Guilty." Of the charge, "Guilty."

Sentence.

And the court does therefore sentence him, Cadet Arthur Cranston, U. S. Military Academy, "*To be dismissed from the military service of the United States.*"

5. Cadet Eugene P. Murphy, U. S. Military Academy.

CHARGE.—"Conduct to the prejudice of good order and military discipline."

Specification.—"In this: that he, Cadet Eugene P. Murphy, of the U. S. Corps of Cadets, did force or assist in forcing Cadet O. B. Boyd, of the U. S. Corps of Cadets, to assume a dress other than his uniform, and did parade or assist in parading Cadet Boyd, as a degraded criminal, before the corps of cadets. All this without the sanction of any authority, and in gross violation of good order and military discipline, at West Point, New York, on or about the 18th day of December, 1865."
To which charge and specification the accused, Cadet Eugene P. Murphy, U. S. Military Academy, pleaded "Guilty."

Finding.

The court, having maturely considered the evidence adduced, finds the accused, Cadet Eugene P. Murphy, U. S. Military Academy, as follows:
Of the specification, "Guilty." Of the charge, "Guilty."

Sentence.

And the court does therefore sentence him, Cadet Eugene P. Murphy, U. S. Military Academy, "*To be dismissed from the military service of the United States.*"

6. Cadet Welcome B. Randall, U. S. Military Academy.

CHARGE.—"Violation of the 46th Article of War."

Specification.—"In this: that he, Cadet Welcome B. Randall, of the U. S. Military Academy, having been duly posted as a sentinel in a hall of cadet barracks, did leave his post before being regularly relieved, and enter a room of said barracks under his charge. All this at or near West Point, New York, on or about the 30th day of December, 1865."
To which charge and specification the accused, Cadet Welcome B. Randall, U. S. Military Academy, pleaded "Guilty."

Finding.

The court, having maturely considered the evidence adduced, finds the accused, Cadet Welcome B. Randall, U. S. Military Academy, as follows:
Of the specification, "Guilty." Of the charge, "Guilty."

Sentence.

And the court does therefore sentence him, Cadet Welcome B. Randall, U. S. Military Academy, "*To be suspended from the U. S. Military Academy until the 1st day of July*' 1866, *at which time he will join as a member the then fourth class.*"

II. The proceedings, findings, and sentences of the court in the foregoing cases of Cadets Frank Soulé, jr., Edward M. Wright, Arthur Cranston, and Eugene P. Murphy, U. S. Military Academy, are approved. The execution of the sentence in each case is suspended, on the recommendation to clemency by six members of the court, and the previous good character of the accused, until the close of the present academic term, when the good conduct of the cadets in the mean time will be taken into consideration.

The proceedings, findings, and sentence in the foregoing case of Cadet Welcome B. Randall, U. S. Military Academy, are appproved and confirmed.

The proceedings and findings in the foregoing case of Cadet Lieutenant and Adjutant Charles King, jr., U. S. Military Academy, are approved. On the recommendation of six members of the court, based upon his high character and previous good conduct, the sentence of dismissal is remitted. But however honorable may have been his motives, Cadet King was guilty of a grave offense, and it is therefore ordered that he be deprived of his appointment as cadet lieutenant and adjutant.

By order of the Secretary of War:

E. D. TOWNSEND,
Assistant Adjutant General.

[General Court-martial—Orders No. 172.]

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE,
Washington, July 2, 1866.

In consideration of the good conduct of Cadets Frank Soulé, jr., Edward M. Wright, Arthur Cranston, and Eugene P. Murphy, U. S. Military Academy, as reported by the superintendent of the Military Academy, sentenced each "*to be dismissed from the military service of the United States,*" the execution of which sentence was suspended, (General Court-Martial Orders, No. 40, War Department, Adjutant General's Office, February 10, 1866,) the sentence of court-martial in their respective cases is set aside and vacated.

By order of the Secretary of War:

E. D. TOWNSEND,
Assistant Adjutant General.

[General Court-martial—Orders No. 23.]

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE,
Washington, January 26, 1866.

I. Before a general court-martial which convened at West Point, New York, January 2, 1866, pursuant to Special Orders No. 657, War Department, Adjutant General's Office, December 27, 1865, and of which Brevet Lieutenant Colonel Alexander Piper, captain Third United States Artillery, is president, were arraigned and tried—

1. Cadet Philip M. Price, jr., U. S. Military Academy.

CHARGE.—"Violation of paragraph one hundred and sixteen (116) United States Military Academy Regulations."

Specification.—"In this: that he, Cadet Philip M. Price, jr., of the U. S. Military Academy, did go beyond cadet's limits without leave from the proper authority, being found to the south of Fort Putnam, near the back road leading from West Point to the village of Buttermilk Falls, New York. All this at or near West Point, New York, on or about the afternoon of the 18th of November, 1865."

To which charge and specification the accused, Cadet Philip M. Price, jr., U. S. Military Academy, pleaded "Guilty."

Finding.

The court, having maturely considered the evidence adduced, finds the accused, Cadet Philip M. Price, jr., U. S. Military Academy, as follows:

Of the specification, "Guilty." Of the charge, "Guilty."

Sentence.

And the court does therefore sentence him, Cadet Philip M. Price, jr., U. S. Military Academy, "*To walk for ten* (10) *Saturdays, equipped as a sentinel, from 2 o'clock p. m. until retreat, and to be confined to the limits of camp during the next encampment.*"

2. Cadet John Conline, U. S. Military Academy.

CHARGE.—"Violation of paragraph one hundred and fifteen (115) United States Military Academy Regulations."

Specification.—"In this: that he, Cadet John Conline, of the United States Military Academy, did, without permission from the proper authority, absent himself from his room for a longer period than half an hour, between the hours of tattoo on the night of the 6th and reveille on the morning of the 7th of December, 1865. This at West Point, New York."

To which charge and specification the accused, Cadet John Conline, U. S. Military Academy, pleaded "Guilty."

Finding.

The court, having maturely considered the evidence adduced, finds the accused, Cadet John Conline, U. S. Military Academy, as follows:

Of the specification, "Guilty." Of the charge, "Guilty."

Sentence.

And the court does therefore sentence him, Cadet John Conline, U. S. Military Academy, "*To be suspended until July* 1, 1866, *at which time he will join as a member the then second class, and to be confined to the limits of camp during the ensuing encampment.*"

3. Cadet Leonard G. Hun, U. S. Military Academy.

CHARGE I.—"Violation of paragraph one hundred and thirteen (113) United States Military Academy Regulations."

Specification.—"In this: that he, Cadet Leonard G. Hun, of the U. S. Military Academy, was found under the influence of intoxicating liquor near the back road leading from West Point to the village of Buttermilk Falls, New York. All this at or near West Point, New York, on or about the afternoon of the 18th of November, 1865."

CHARGE II.—"Violation of paragraph one hundred and sixteen (116) United States Military Academy Regulations."

Specification.—"In this: that he, Cadet Leonard G. Hun, of the U. S. Military Academy, did go beyond cadet's limits without leave from the proper authority, being found to the south of Fort Putnam, near the back road leading from West Point to the village of Buttermilk Falls, New York. All this at or near West Point, New York, on or about the afternoon of the 18th of November, 1865."

To which charges and specifications the accused, Cadet Leonard G. Hun, U. S. Military Academy, pleaded "Guilty."

Finding.

The court, having maturely considered the evidence adduced, finds the accused Cadet Leonard G. Hun, U. S. Military Academy, as follows:

Charge I.—Of the specification, "Guilty." Of the charge, "Guilty."

Charge II.—Of the specification, "Guilty." Of the charge, "Guilty."

Sentence.

And the court does therefore sentence him, Cadet Leonard G. Hun, U. S. Military Academy, "*To be dismissed the military service of the United States.*"

II. The proceedings and findings of the court in the above cases of Cadets Philip M. Price, jr., John Conline, and Leonard G. Hun, U. S. Military Academy, are approved.

In the case of Cadet Price, that part of the sentence confining him to the limits of the camp during the next encampment is approved and will be executed. The remainder of the sentence is disapproved and remitted.

In the case of Cadet Conline the sentence is remitted.

In the case of Cadet Hun, on the recommendation of several members of the court to clemency, the sentence is remitted, and he will return to his duties.

By order of the Secretary of War:

E. D. TOWNSEND,
Assistant Adjutant General.

[General Court-martial Orders No. 109.]

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE,
Washington, April 20, 1866.

I. Before a general court-martial which convened at West Point, New York, March 27, 1866, pursuant to Special Orders No. 130, War Department, Adjutant General's Of-

fice, March 22, 1866, and of which Brevet Lieutenant Colonel Alexander Piper, Third U. S. Artillery, is president, were arraigned and tried—

1. Cadet John P. Walker, U. S. Military Academy.

CHARGE—"Disrespect toward his superior officer."

Specification—"In this, that he, Cadet J. P. Walker, U. S. Military Academy, having remained in the section-room after the dismissal of his section, for the purpose of speaking to his instructor, Brevet Lieutenant Colonel A. Mordecai, captain Ordnance Corps, in regard to certain marks that had been given him by his instructor for recitations, did, after having been directed by Brevet Lieutenant Colonel A. Mordecai to leave the section-room, hesitate to do so, and did say to the said Brevet Lieutenant Colonel A. Mordecai that 'he could say nothing more at present, but that after graduating he would,' or words to that effect, being thereby guilty of disrespect toward the said Brevet Lieutenant Colonel A. Mordecai. This at West Point, New York, on or about the 28th day of February, 1866."

To which charge and specification the accused, Cadet John P. Walker, U. S. Military Academy, pleaded as follows:

To the *Specification*, "Guilty," except the words "did, after having been directed by Brevet Lieutenant Colonel A. Mordecai to leave the section-room, hesitate to do so," "he would," and "being thereby guilty of disrespect toward the said Brevet Lieutenant Colonel A. Mordecai." To the CHARGE, "Not guilty."

Finding.

The court, having maturely considered the evidence adduced, finds the accused, Cadet John P. Walker, U. S. Military Academy, as follows:

Of the *Specification*, "Guilty." Of the CHARGE, "Guilty."

Sentence.

And the court does therefore sentence him, Cadet John P. Walker, U. S. Military Academy, "*To be dismissed the service of the United States.*"

2. Cadet Austin L. Peirce, U. S. Military Academy.

CHARGE—"Violation of paragraph 116, Regulations for the U. S. Military Academy."

Specification—"In this: that Cadet Austin L. Peirce, of the U. S. Military Academy at West Point, New York, did, without permission from proper authority, visit the village of Cold Spring on the east bank of the Hudson River, the same being 'beyond cadets' limits.' All this on or about the 27th day of January, 1866."

To which charge and specification the accused, Cadet Austin L. Peirce, U. S. Military Academy, pleaded "Guilty."

Finding.

The court, having maturely considered the evidence adduced, finds the accused, Cadet Austin L. Peirce, U. S. Military Academy, as follows:

Of the *Specification*, "Guilty." Of the CHARGE, "Guilty."

Sentence.

And the court does therefore sentence him, Cadet Austin L. Peirce, U. S. Military Academy, "*To be suspended from the U. S. Military Academy, with loss of pay, until July 1, 1866, and then to join the then fourth class of cadets, U. S. M. A.*"

3. Cadet John B. Walker, U. S. Military Academy.

CHARGE—"Deserting post."

Specification—"In this: that he, Cadet John B. Walker, of the U. S. Military Academy, having been duly posted as a sentinel in a hall of cadet barracks, did leave his post before being regularly relieved, and enter a room of said barracks under his charge. All this at West Point, New York, on or about the 26th day of March, 1866."

To which charge and specification the accused, Cadet John B. Walker, U. S. Military Academy, pleaded "Guilty."

Finding.

The court, having maturely considered the evidence adduced, finds the accused, Cadet John B. Walker, U. S. Military Academy, as follows:

Of the *Specification*, "Guilty." Of the CHARGE, "Guilty."

Sentence.

And the court does therefore sentence him, Cadet John B. Walker, U. S. Military Academy, "*To be suspended, with loss of pay, from the U. S. Military Academy until July* 1, 1866, *and then to join the then fourth class of cadets, U. S. M. A.*"

II. The proceedings, findings, and sentences of the court in the foregoing cases of Cadets John P. Walker, Austin L. Peirce, and John B. Walker, U. S. Military Academy. are approved, and the sentences will be executed.

By order of the Secretary of War:

E. D. TOWNSEND,
Assistant Adjutant General.

[General Court-martial Orders No. 127.]

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE,
Washington, May 2, 1866.

It is ordered that Cadet John P. Walker, U. S. Military Academy, who was sentenced "*To be dismissed the service of the United States,*" (General Court-martial Orders No. 109, War Department, Adjutant General's Office, April 20, 1866,) be reinstated in his class upon his making a suitable acknowledgment and regret of his offense, and apology to his superior.

By order of the Secretary of War:

E. D. TOWNSEND,
Assistant Adjutant General.

[General Court-martial Orders No. 33.]

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE,
Washington, May 8, 1867.

I. Before a general court-martial which convened at West Point, New York, January 29, 1867, pursuant to Special Orders No. 33, War Department, Adjutant General's Office, January 21, 1867, and of which Brevet Major General Alexander S. Webb, Lieutenant Colonel 44th U. S. Infantry, is president, were arraigned and tried—

1. Cadet William J. Hamilton, U. S. Military Academy.

CHARGE—"Drunk, or under the influence of intoxicating liquor, in violation of paragraph 114, Regulations of the U. S. Military Academy."

Specification—"In this, that he, Cadet William J. Hamilton, of the U. S. Military Academy, when in the act of proceeding upon a leave of absence granted under the conditional pledge 'that he would refrain from the use of all intoxicating liquors, and every other dissipation or excess, while absent from the post of West Point,' did publicly expose himself in a drunken condition, and was so much under the influence of intoxicating liquor as to require the assistance of his companions to disguise his condition and assist him in walking. This at West Point, New York, between the hours of 12 and 3 p. m. on Saturday, the 22d day of December, 1866."

To which charge and specification the accused, Cadet William J. Hamilton, U. S. Military Academy, pleaded "Not guilty."

Finding.

The court, having maturely considered the evidence adduced, finds the accused, Cadet William J. Hamilton, U. S. Military Academy, as follows:

Of the *Specification*, "Guilty, except the words 'and assist him in walking.'" Of the CHARGE, "Guilty."

Sentence.

And the court does therefore sentence him, Cadet William J. Hamilton, U. S. Military Academy, "*To be dismissed the service of the United States.*"

2. Cadet Hayden DeLany, U. S. Military Academy.

CHARGE—"Drunk, or under the influence of intoxicating liquor, in violation of paragraph 114, Regulations of the U. S. Military Academy."

Specification—"In this, that he, Cadet Hayden DeLany, of the U. S. Military Academy, was found drunk, or under the influence of intoxicating liquor, at the cadet hospital, on or about Sunday the 11th day of November, 1866, and was, in consequence thereof, unfit for duty. This at West Point, New York."

To which charge and specification the accused, Cadet Hayden DeLany, U. S. Military Academy, pleaded "Not guilty."

Finding.

The court, having maturely considered the evidence adduced, finds the accused, Cadet Hayden DeLany, U. S. Military Academy, as follows:
Of the *Specification*, "Guilty." Of the CHARGE, "Guilty."

Sentence.

And the court does therefore sentence him, Cadet Hayden DeLany, U. S. Military Academy, "*To be dismissed the service of the United States.*"

II. The proceedings, findings, and sentence of the court in the foregoing case of Cadet William J. Hamilton, U. S. Military Academy, are approved. The sentence is commuted to confinement for thirty days to the limits of camp during the ensuing encampment.
The proceedings, findings, and sentence in the case of Cadet Hayden DeLany, U. S. Military Academy, are approved, but in consideration of the previous high character given him as a cadet, the sentence is remitted, and he will be restored to duty.
By order of the Secretary of War:

E. D. TOWNSEND,
Assistant Adjutant General.

[General Court-martial Orders No. 49.]

HEADQUARTERS OF THE ARMY, ADJUTANT GENERAL'S OFFICE,
Washington, August 3, 1869.

I. Before a general court-martial which convened at West Point, New York, July 13, 1869, pursuant to Special Orders No. 163, Headquarters of the Army, Adjutant General's Office, Washington, July 8, 1869, and of which Brevet Lieutenant Colonel A. Piper, captain Third U. S. Artillery, is president, was arraigned and tried—
1. Cadet Robert N. Price, U. S. Military Academy.
CHARGE—"Conduct to the prejudice of good order and military discipline."
Specification—"In this: that he, Cadet Robert N. Price, of the U. S. Military Academy, did go beyond cadet limits, in violation of parapraph one hundred and seventeen, (117,) Regulations U. S. Military Academy, and visit Cozzens's hotel, near the village of Highland Falls, New York, between tattoo on the 15th and reveille on the 16th of June, 1869."
To which charge and specification the accused, Cadet Robert N. Price, U. S. Military Academy, pleaded "Guilty."

Finding.

The court, having maturely considered the evidence adduced, finds the accused, Cadet Robert N. Price, U. S. Military Academy, as follows:
Of the *Specification*, "Guilty." Of the CHARGE, "Guilty."

Sentence.

And the court does therefore sentence him, Cadet Robert N. Price, U. S. Military Academy, "*To be dismissed the service of the United States.*"

2. Cadet Corporal Charles D. Parkhurst, U. S. Military Academy.
CHARGE—"Conduct to the prejudice of good order and military discipline."
Specification—"In this: that he, Cadet Corporal Charles D. Parkhurst, U. S. Military Academy, being a corporal of the cadet guard, posted at Camp McPherson, New York, did improperly interfere with and injure Cadet Dillard H. Clark, of the fourth class of the U. S. Military Academy, a sentinel on post, by assaulting him with a bayonet while the said Cadet Clark was in the performance of his duty as a sentinel. All this at or near Camp McPherson, West Point, New York, on or about the 12th day of July, 1869."
To which charge and specification the accused, Cadet Corporal Charles D. Parkhurst, U. S. Military Academy, pleaded "Not guilty."

Finding.

The court, having maturely considered the evidence adduced, finds the accused, Cadet Corporal Charles D. Parkhurst, U. S. Military Academy, as follows:
Of the *Specification*, "Guilty." Of the CHARGE, "Guilty."

Sentence.

And the court does therefore sentence him, Cadet Corporal Charles D. Parkhurst, U. S. Military Academy, "*To be suspended from the United States Military Academy until the first day of July*, 1870, *and at that time to join the then third class of cadets, forfeiting all pay and allowances during the period of suspension.*"

II. The proceedings in the case of Cadet Price having been laid before the President, he has ordered that the findings and sentence be approved, but influenced by the promises of Cadet Price, he remits the severe penalty of dismissal to "Confinement to the limits of the Plain while he, Cadet Price, *is* a member of the Military Academy."

The proceedings, findings, and sentence in the case of Cadet Corporal Parkhurst are also approved, but by reason of the leniency shown in the former case, his sentence is also commuted to "Confinement to the limits of the Plain for one year from the promulgation of this sentence."

By command of General Sherman:

E. D. TOWNSEND,
Adjutant General.

[General Court-martial Orders No. 31.]

HEADQUARTERS OF THE ARMY, ADJUTANT GENERAL'S OFFICE,
Washington, May 6, 1870.

In the case of Cadet Robert N. Price, U. S. Military Academy, sentenced by a general court-martial "*To be dismissed the service of the United States,*" which sentence was mitigated to "*Confinement to the limits of the Plain while he, Cadet Price, is a member of the Military Academy,*" (General Court-martial Orders No. 49, Headquarters of the Army, Adjutant General's Office, August 3, 1869,) the unexpired portion of the sentence as mitigated is, by direction of the President of the United States, hereby remitted.

By command of General Sherman:

E. D. TOWNSEND,
Adjutant General.

[General Court-martial Orders No. 56.]

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE,
Washington, December 6, 1870.

I. Before a general court-martial which convened at West Point, New York, October 31, 1870, pursuant to Special Orders No. 287, War Department, Adjutant General's Office, October 26, 1870, and of which Captain Alexander Piper, Third U. S. Artillery, is president, were arraigned and tried—

I. Cadet Daniel C. Kingman, U. S. Military Academy.

CHARGE—"Conduct unbecoming an officer and a gentleman."

Specification 1st—"In this: that he, Daniel C. Kingman, cadet U. S. Military Academy, having been reported on September 16, 1870, for 'slow taking place in the ranks at formation of company after dinner, did submit to the commandant of cadets a written explanation in the following words, to wit: 'I would respectfully state that I took my place in ranks as soon as I could. I am sure it was before the company was formed;' said statement being false. All this at West Point, N. Y., on or about the 18th or 19th of September, 1870."

Specification 2d—"In this: that he, Daniel C. Kingman, cadet U. S. Military Academy, having been reported on September 16, 1870, for 'tobacco smoke in quarters at inspection, 8 and 9 p. m.,' did submit to the commandant of cadets a written explanation in the following words, to wit: 'I would respectfully state that there were several men smoking in my room just before call to quarters, and as the door was closed, and the window nearly closed, I suppose the odor of the tobacco smoke had not all escaped;' said statement being calculated and intended to lead the commandant of cadets to believe that there had been no smoking in his (Cadet Kingman's) room after call to quarters, when in fact there was at that time, and to his (Cadet Kingman's) certain knowledge, a lighted cigar in his room; and furthermore, the door was open, and not closed as stated. All this at West Point, New York, on or about the 18th or 19th of September, 1870."

To which charge and specifications the accused, Cadet Daniel C. Kingman, U. S. Military Academy, pleaded "Not guilty."

Finding.

The court, having maturely considered the evidence adduced, finds the accused, Cadet Daniel C. Kingman, U. S. Military Academy, as follows:

Of the 1st *Specification*, "Guilty." Of the 2d *Specification*, "Guilty, except the words 'and furthermore the door was open, and not closed as stated,' and of these words not guilty." Of the CHARGE, "Guilty."

Sentence.

And the court does therefore sentence him, Cadet Daniel C. Kingman, U. S. Military Academy, "*To be dismissed the service of the United States.*"

2. Cadet Arthur L. Wagner, U. S. Military Academy.

CHARGE—"Conduct unbecoming an officer and a gentleman."

Specification—"In this: that he, Cadet Arthur L. Wagner, of the U. S. Military Academy, having been reported 'absent from quarters at inspection by officer of the day, 11 and 11.30 a. m., October 10, 1870,' did submit a written explanation to the commandant of cadets in the following words, to wit: 'I was at the sink some time between 11 and 11.30 a. m.;' said statement being calculated and intended to lead the commandant of cadets to believe that he (Cadet Wagner) was necessarily absent from his quarters at the time of inspection, whereas he (Cadet Wagner) was visiting in an adjoining room at the time referred to in the report, having concealed himself in the alcove of a classmate, Cadet Norton, when said room was inspected by the officer of the day. All this at West Point, New York, on or about the 10th and 12th days of October, 1870."

To which charge and specification the accused, Cadet Arthur L. Wagner, U. S. Military Academy, pleaded "Guilty."

Finding.

The court, having maturely considered the evidence adduced, finds the accused, Cadet Arthur L. Wagner, U. S. Military Academy, as follows:

Of the *Specification*, "Guilty." Of the CHARGE, "Guilty."

Sentence.

And the court does therefore sentence him, Cadet Arthur L. Wagner, U. S. Military Academy, "*To be dismissed the service of the United States.*"

3. Cadet Thomas C. Davenport, U. S. Military Academy.

CHARGE—"Conduct unbecoming an officer and a gentleman."

Specification—"In this, that he, Thomas C. Davenport, Cadet U. S. Military Academy, being aware that he was about to be reported for the offense, 'attending riding with platoon not his own,' on October 19, 1870, did take the delinquency book of A Company, U. S. Corps of Cadets, to the cadet officer whose duty it was to report him for such offense in compliance with instructions of Captain A. E. Bates, instructor of cavalry, and when such offense had been entered in said book by said cadet officer, did, for the purpose of escaping punishment for said offense, willfully and secretly erase or cause to be erased, or connive at the erasing of, the said report from the said book, thus obliterating the record of his said offense. All this at West Point, New York, on or about the 19th day of October, 1870."

To which charge and specification the accused, Cadet Thomas C. Davenport, U. S. Military Academy, pleaded "Not guilty."

Finding.

The court, having maturely considered the evidence adduced, finds the accused, Cadet Thomas C. Davenport, U. S. Military Academy, as follows.

Of the *Specification*, "Guilty." Of the CHARGE, "Guilty."

Sentence.

And the court does therefore sentence him, Cadet Thomas C. Davenport, U. S. Military Academy, "*To be dismissed the service of the United States.*"

4. Cadet Millard F. Goodwin, U. S. Military Academy.

CHARGE—"Conduct unbecoming an officer and a gentleman."

Specification 1st—"In this, that he, Cadet M. F. Goodwin, private, 1st class, U. S. Military Academy, did erase or connive at the erasure of the following report, or a report to the following effect, viz: 'Davenport. Attending riding with platoon not his own,' from the book known as the A Company delinquency book. All this at West Point, New York, on or about the 19th day of October, 1870."

Specification 2d—"In this, that he, Cadet M. F. Goodwin, private, 1st class, U. S. Military Academy, did, without authority, enter in the book known as the A Company delinquency book, two reports for the purpose of concealing the unauthorized erasure of a previous report in said book, in regard to an offense reported as committed by Cadet Davenport, of said Academy. All this at West Point, New York, on or about the 19th day of October, 1870."

To which charge and specifications the accused, Cadet Millard F. Goodwin, U. S. Military Academy, pleaded "Not guilty."

Finding.

The court, having maturely considered the evidence adduced, finds the accused, Cadet Millard F. Goodwin, U. S. Military Academy, as follows:

Of the 1st *Specification*, "Not guilty." Of the 2d *Specification*, "Guilty." Of the CHARGE, "Guilty."

And the court does therefore sentence him, Cadet Millard F. Goodwin, U. S. Military Academy, "*To be dismissed the service of the United States.*"

5. Cadet McDowell E. Barnes, U. S. Military Academy.

CHARGE—"Conduct unbecoming an officer and a gentleman."

Specification 1st—"In this, that he, Cadet McDowell E. Barnes, U. S. Military Academy, on leaving his room between 2.25 and 3.40 p. m., on October 30, 1870, did report to his room-mate (Cadet H. L. Buckley) that, should the sentinel inspect before he returned, it would be 'all right' for him; that he would be at the sink, or words to that effect; said statement being made thirty minutes or more before said inspection was to take place; and then, under protection of said report, did go on the walk known as 'flirtation walk,' and did not return, but remained absent until between 4.15 and 4.25 p. m., there being no inspection during the time herein specified other than that of the sentinel heretofore mentioned, and for which he had made a report falsely accounting for himself. All this at West Point, New York, on or about the 30th day of October, 1870."

Specification 2d—"In this, that he, Cadet McDowell E. Barnes, U. S. Military Academy, when questioned by the officer of the day, Cadet Lieutenant Knox, in reference to his absence from his quarters at the inspection by the sentinel, 3.10 p. m., October 30, did state that he left his room between five and ten minutes before 3 o'clock p. m., which report was false, Cadet Barnes having left his room about 2.30 p. m., and being, at the time stated in such report, on or near the 'flirtation walk.' All this at West Point, New York, on or about the 30th day of October, 1870."

Finding.

The court, having maturely considered the evidence adduced, finds the accused, Cadet McDowell E. Barnes, U. S.Military Academy, as follows:

Of the 1st *Specification*, "Not guilty." Of the 2d *Specification*, "Not guilty." Of the CHARGE, "Not guilty."

And the court does therefore acquit him, Cadet McDowell E. Barnes, U. S. Military Academy.

II. The proceedings and findings of the court in the foregoing cases of Cadets Daniel C. Kingman, Arthur L. Wagner, Thomas C. Davenport, and Millard F. Goodwin, U. S. Military Academy, are approved.

The sentences are mitigated as follows:

In the cases of Cadets Kingman and Wagner, "*To be suspended without pay till July* 1, 1871, *then to join the fourth class.*"

In the cases of Cadets Davenport and Goodwin, "*To be suspended without pay till July* 1, 1871, *then to join the first class.*"

The sentences as mitigated will be duly executed.

The proceedings in the case of Cadet Barnes are fatally irregular, for the reason that no plea on the part of the accused appears upon the record.

The findings and acquittal are approved, and Cadet Barnes will be released from arrest.

III. The general court-martial, of which Captain Alexander Piper, Third U. S. Artillery, is president, is hereby dissolved.

By order of the Secretary of War:

E. D. TOWNSEND,
Adjutant General.

[General Court-martial Orders No. 8.]

HEADQUARTERS OF THE ARMY, ADJUTANT GENERAL'S OFFICE,
Washington, February 5, 1870.

I. Before a general court-martial which convened at West Point, New York, January

20, 1870, pursuant to Special Orders No. 14, Headquarters of the Army, Adjutant General's Office, Washington, January 18, 1870, and of which Major Theodore Edson, Ordnance Department, is president, was arraigned and tried—

Cadet James E. Shortelle, U. S. Military Academy.

CHARGE—"Insubordinate and disrespectful conduct, to the prejudice of good order and military discipline."

Specification—"In this, that he, Cadet James E. Shortelle, of the U. S. Military Academy, did, in an official interview with his superior officer, Captain A. S. Clark, of the U. S. Infantry, assistant instructor of tactics at the said Academy, make use of disrespectful and threatening language, and did say to him, the said Captain A. S. Clarke: 'If you were not my superior officer I would knock you down,' or words to that effect. All this at or near West Point, New York, on or about the 11th day of January, 1870.

To which charge and specification the accused, Cadet James E. Shortelle, U. S. Military Academy, pleaded as follows:

To the *Specification*, "Guilty," except the words, 'and threatening;'" to the CHARGE, "guilty."

Finding.

The court, having maturely considered the evidence adduced, finds the accused, Cadet James E. Shortelle, U. S. Military Academy, as follows:

Of the *specification*, "guilty," except the words, 'and threatening;'" of the CHARGE, "Guilty."

Sentence.

And the court does therefore sentence him, Cadet James E. Shortelle, U. S. Military Academy, "*To be suspended without rank, pay, or allowances until the 1st of July, 1870, and to join the then second class.*"

II. The proceedings, findings, and sentence of the court in the foregoing case of Cadet James E. Shortelle, U. S. Military Academy, are approved, and the sentence will be duly executed.

III. The general court-martial, of which Major Theodore Edson, Ordnance Department, is president, is hereby dissolved.

By command of General Sherman:

E. D. TOWNSEND,
Adjutant General.

[General Court-martial Orders No. 12.]

HEADQUARTERS OF THE ARMY, ADJUTANT GENERAL'S OFFICE,
Washington, February 15, 1870.

I. By direction of the President of the United States, the unexpired portion of the sentence in the case of Cadet James E. Shortelle, U. S. Military Academy, published in General Court-martial Orders No. 8, Headquarters of the Army, Adjutant General's Office, February 5, 1870, is hereby "commuted to 'restriction of limits' for the balance of the academic year, and loss of rank as a cadet non-commissioned officer for the same period, with the addition of a reprimand for his insubordination. This leniency is shown, not because the course of Cadet Shortelle is approved, but upon the ground of previous good conduct, the belief that his objectionable conduct will not be repeated, and also the provocation which he seemed to have in the excitable manner of his superior officer."

II. The sentence, as commuted, will be duly executed.

By command of General Sherman:

E. D. TOWNSEND,
Adjutant General

[General Court-martial Orders No. 85.]

HEADQUARTERS OF THE ARMY, ADJUTANT GENERAL'S OFFICE,
Washington, October 31, 1867.

I. Before a general court-martial which convened at West Point, New York, October 4, 1867, pursuant to Special Orders No. 456, Headquarters of the Army, Adjutant General's Office, Washington, September 30, 1867, and of which Brevet Lieutenant Colonel J. C. Clark, U. S. Army, is president, was arraigned and tried—

Cadet Captain William P. Clark U. S. Military Academy.

CHARGE—"Conduct to the prejudice of good order and military discipline."

Specification 1st—"In this, that he, Cadet Captain William P. Clark, of the U. S.

Military Academy, did go beyond cadet limits, in violation of paragraph 117, Regulations U. S. Military Academy, and visit Cozzens's Hotel, near the village of Highland Falls, N. Y. This at or near West Point, N. Y., between tattoo on the 16th and reveille on the 17th of September, 1867."

Specification 2d—"In this, that he, Cadet Captain William P. Clark, of the U. S. Military Academy, was at Cozzens's Hotel, near the village of Highland Falls, N. Y., in citizens' clothing, a dress not prescribed for cadets, and in violation of paragraph 97, Regulations U. S. Military Academy. This between tattoo on the 16th and reveille on the 17th of September, 1867."

To which charge and specifications the accused, Cadet Captain William P. Clark, U. S. Military Academy, pleaded "Not Guilty."

Finding.

The court, having maturely considered the evidence adduced, finds the accused, Cadet Captain William P. Clark, U. S. Military Academy, as follows:

Of the 1st *Specification*, "Guilty." Of the 2d *Specification*, "Guilty." Of the CHARGE, "Guilty."

Sentence.

And the court does therefore sentence him, Cadet Captain William P. Clark, U. S. Military Academy, "*To be suspended from the U. S. Military Academy till July* 1*st*, 1868, *and then to join the then first class of cadets, and to forfeit to the United States all his pay and allowances until that date.*"

II. The proceedings, findings, and sentence of the court in the foregoing case of Cadet Captain William P. Clark, U. S. Military Academy, are approved, and the sentence will be carried into execution.

By command of General Grant:

E. D. TOWNSEND,
Assistant Adjutant General.

[General Court-martial Orders No. 94.]

HEADQUARTERS OF THE ARMY, ADJUTANT GENERAL'S OFFICE,
Washington, December 6, 1867.

I. In the case of Cadet William P. Clark, U. S. Military Academy, sentenced by a general court-martial "to be suspended from the U. S. Military Academy till July 1, 1868, and then to join the then first class of cadets, and to forfeit to the United States all his pay and allowances until that date," as promulgated in General Court-martial Orders No. 85, Headquarters of the Army, Adjutant General's Office, Washington, October 31, 1867, the following orders have been received from the President:

EXECUTIVE MANSION, *December* 4, 1867.

So much of the sentence of the general court-martial in the case of Cadet William P. Clark as suspends him until July, 1868, with loss of pay, is hereby commuted as follows: That he will rejoin his class at the U. S. Military Academy, and remain until they graduate, when, if his conduct in the meantime is satisfactory to the Superintendent of the Military Academy, this sentence is hereby revoked from the date of this order; otherwise the sentence of the court will be carried into execution.

ANDREW JOHNSON.

II. Cadet William P. Clark will return to West Point and report to the Superintendent of the Military Academy, in accordance with the President's order.

By command of General Grant:

E. D. TOWNSEND,
Assistant Adjutant General.

WEST POINT, N. Y., *January* 28, 1871.

Cadet HENRY WALKER sworn and examined.

By Mr. ASPER:

Question. State your age, residence, and position here.—Answer. I am 23 years old, reside at No. 736 Broadway, Albany, and am corporal, B company, third class corps of cadets.

Q. You were corporal in charge on the night of the 2d of January?—A. Yes, sir; I was corporal of the first relief.

Q. We desire to examine you touching the affair of that evening; please state briefly what you know about it.—A. My attention was called to it by a member of my class

who said that the sentinel on number two was making some trouble with the occupants of one of the rooms; I went to him and he stated that one of the rooms had reported "all right," and he knew it was not all right; I told him he should report it "all right" as he received it, even if he knew it was not all right; I then went to Flickinger's room and asked him what was the matter, and he said, "That damned fool Baird is down at Buttermilk, drunk." I told him I would report all right for him but I don't know that it is all right; I told him to report not all right, as his classmate would be reported for being away, and that they could get the report off by going on pledge; he, however, reported all right to the sentinel, but in such a manner as to awaken suspicion; Baird, before going to Buttermilk, stated that he would be pretty careful not to get "hived," and that if Flickinger reported all right he, Flickinger, would not get into trouble by it.

Q. How do you know these facts?—A. From what Flickinger told me himself, and from what Webster, E. K., of the other class told me; he said that he was in the room in the afternoon; I knew Baird was not in his room when Flickinger reported all right.

Q. How did you know that?—A. I had seen him intoxicated in the afternoon, and I knew that he was not in his quarters.

Q. How did you know it?—A. I knew it from my own knowledge.

Q. You didn't see him away?—A. I saw him going away in citizen's clothing.

Q. You reported it to the officer of the guard and officer of the day?—A. Yes, sir; and they reported it to the commandant, and the boys were put in arrest.

WEST POINT, N. Y., *January* 28, 1871.

General T. G. PITCHER recalled and examined.

By Mr. SLOCUM:

Question. Have you the letter sent by Baird and Flickinger to you?—Answer. Yes, sir; I received it by mail, and immediately on its receipt sent an officer to bring them back.

The following is the letter referred to by General Pitcher:

POUGHKEEPSIE, N. Y., *January* 5, 1871.

SIR: We, the undersigned, do state that we have not willingly deserted, but were forcibly driven off the Point by the first class U. S. Military Academy. They entered our room about midnight on the 3d instant, calling us by various opprobrious names, forcing us to put on such articles of clothing as we could in the brief time they allowed us; after which they took us beyond Fort Putnam. They then told us that it was the first class U. S. Military Academy that was sending us away, threatening to tar and feather us if we ever returned to the Point. For that reason we have not dared to return. We are not provided with proper clothing for this time of year, and have very little money. We would respectfully ask permission to be allowed to resign, or to be dismissed for absence without leave, as we are not really guilty of desertion. If our accounts could be settled immediately it would be a great advantage to us, as we are destitute of means to proceed any further.

Very respectfully, your obedient servants,

ENOCH H. FLICKINGER.
W. BAIRD.

General PITCHER,
Superintendent U. S. Military Academy.
Address E. H. Flickinger or W. Baird, box 656, Poughkeepsie, New York.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 29.

SETTLERS ON CERTAIN LANDS IN CALIFORNIA.

FEBRUARY 8, 1871.—Ordered to be printed and recommitted to the Committee on Private Land Claims.

Mr. MAYHAM, a sub-committee of the Committee on Private Land Claims, submitted the following

REPORT.

[To accompany bill H. R. No. 2037.]

The undersigned, Sub-committee on Private Land Claims, to which was referred House bill No. 2037, makes the following report:

I. In 1835 the Laguna de la Marced was granted by the Mexican government to one Antonio Galindo, and was described in the grant as follows:

1st. Commencing at the river Con de San Bruno, on the northeast corner of the rancho Buriburi, at low-water mark on the shore of the bay of Francisco, thence westerly, in a straight line, along the north boundaries of the rancho Buriburi, through the Laguna Alta, to the ocean; 2d. Commencing again at the first station, thence in a straight line to the top of the hill of San Bruno, thence along the ridge of the range of hills extending thence in nearly a northern direction to the portezuelo or hollow, where the road leading from San José to San Francisco crosses the range of said hills; 3d. Thence north 30° 50′ west, in a straight line to the ocean; and 4th. Along the beach of the ocean to the terminating point of the first above-described line, containing a little more than one league from north to south, and a half league from east to west, more or less.

On the 27th of September, 1835, a grant was issued by the Mexican government to said Galindo for said land, who immediately took possession thereof, and on the 12th of May, 1837, conveyed the same to Don Francisco de Haro.

On the 16th of March, 1852, De Haro having died, his heirs filed their petition before the board of California land commissioners in California, under the act of March 3, 1851, praying a confirmation of their title to the above grant, and the same was confirmed for one-half league, the amount called for in the grant.

On the 3d day of June, 1863, the district court of the northern district of California made a decree whereby they confirmed the title of the petitioners to the land under said grant, but restricted the same to one-half league, and described the same as follows: "A tract of land shall be located and surveyed within the exterior bounds named in the grant, which tract shall be measured by north, south, east, and west lines, so as to include a tract of half a square league, being one league from north to south, and one-half league from east to west."

On the 27th of July, 1863, a survey pursuant to said decree was presented to the said district court and duly confirmed.

By this decree and determination, a large tract of land now in controversy, and lying within the exterior bounds of the De Haro grant, but not confirmed to the representatives of De Haro, became United States lands, unless the same were embraced within a grant made by the Mexican government to Jacob P. Lees on his petition filed in that government on the 14th day of November, 1839. That grant is described in the petition as bounded on the west by the road as far as the mountain pass; on the south, by the rancho of Francisco Haro and that of José Sanches, and on the east by the sea.

At this time the range of mountains of San Bruno seems to have been understood as the eastern boundary of the De Haro ranch, and that does not seem to have been disputed by any one until the decree of the district court limiting the extent of that ranch to one by one-half league.

If this view of the case be correct, then at the time of the grant of the Visitation ranch to Jacob P. Lees it was intended to extend only to the top of the range of the San Bruno Mountains, and embraced none of these lands which are now the subject of controversy.

On the 1st of June, 1854, the surveyor general of the United States entered on said land and townshiped and sectionized the same as public lands of the United States, and sent to the General Land Office in Washington, and the local land office in California, the survey for record; and the Land Office gave notice to the settlers that all preëmptors residing on said land must appear at the land office in California and enter their respective claims on said plats, according to existing laws of the United States, which notice was complied with by many of the residents on said lands; that in January, 1858, notice was given to the occupants to prove up their preëmptions, and pay the United States for the lands, which was also complied with by many of the settlers, and payments were made to and certificates granted by the United States for said lands.

By the act of March 3, 1851, all foreign land grants in California were required to be presented to the board of California land commissioners for adjudication by said board as to the validity of said grants; that about the year 1855 the owners of the Visitation ranch, in the name of Henry Payson, presented to the board of California land commissioners the Visitation Mexican grant for confirmation, and the same was confirmed on the 30th of January of that year.

That the decree of the board was confirmed by the United States district court for the northern district of California on the 18th day of June, 1856, and said district court, on the 1st of April, 1857, recorded a final decree of confirmation on information from the United States Attorney General, that no appeal would be taken to the United States Supreme Court. While these proceedings were pending before the district court, the petitioners in possession of the land within the exterior bounds of the De Haro grant, which had been surveyed by the United States as Government lands, and claiming under the United States preemption laws, intervened, and by their counsel and through the United States district attorney opposed the confirmation of said survey, and applied to the district attorney to appeal from said confirmation to the Supreme Court; but that officer, who was alone authorized by law to appeal for the intervenors, declined to do so, and stipulated not to appeal.

The patent issued by the United States to the claimants of the Visitation ranch excepted from its operation the rights of "third parties" on said land, but it is claimed by patentees that the patent is conclusive as to the extent of said ranch, and as the patent is issued to confirm a foreign land grant, no lands within its limits were ever subject to entry

under the United States preëmption laws, and that therefore the preëmptors got no rights as against them by their preëmption, and cite section 6, of the act of March 3, 1853, providing for the survey of California lands, in support of that position.

That the decision of the district court confirming the survey of the Visitation rancho, is *res judicata* as to the occupants of this land, who had the right to intervene, and who did intervene by counsel, and failed to appeal, although they were not parties to the record, and were in possession, claiming as preëmptors at the time of that adjudication.

That the patent is conclusive evidence of title in the patentee in an action at law, and cannot be impeached in an action of ejectment, and that under it they have vested rights that cannot be divested even by an act of Congress.

The petitioners insist that the right of the United States to these lands, after they were decided not to belong to the De Haro grant, and at the time they were sectionized by the United States, and preëmpted by them, was undisputed, and that they were not embraced in or properly claimed under a foreign land grant.

That as they were in the possession of these lands at the time of this adjudication under a right previously acquired of the United States, and were not parties to the record in that adjudication, so as to be in a situation to control the same and appeal, they have not had their day in court, and cannot be concluded by that adjudication.

That the patent now held by the patentees or their assigns is a cloud upon their title, and conclusive evidence against them in an action of ejectment by the patentees or their assigns, and that they should be permitted to go behind this patent; and interpose their equitable claim to these lands, and controvert the correctness of the line of this ranch.

In the case of the United States *vs.* Josepha de Haro *et al.*, determined in the Supreme Court of the United States in December, 1865, the court allow the preëmptors of lands claimed by De Haro to be within the foreign land grant to contest as to the extent of said grant, and by its judgment upheld the claim of the preëmptors, although at the time of the preëmption the claimants under the foreign grant were prosecuting their claim to said land.

From this and other decisions upon this question it would seem that the United States Government does not regard itself concluded from treating as Government land lands claimed by grantees under a foreign grant, except to the extent of the lands actually granted to such grantees.

The preëmption rights of the preëmptors were therefore valid, unless the lands preëmpted were in fact within the Visitation ranch, and that question the preëmptors should be permitted to try, unless they are barred by the adjudication already had. Was that adjudication a bar, or so far conclusive upon the preëmptors as to preclude them from attacking the location of this line, collaterally, in a direct proceeding between the patentee and the preëmptors; and, if not, then have the patentees acquired, under the patent, such vested rights as to estop Congress and the courts from correcting the error, if any existed, as between the preëmptors and patentees?

It is a well-settled general principle of law, that a judgment is a bar only as between parties to the record and their privies; and as the preemptors had as such a valid right as against the United States, they were not the privies of the United States, and would not in that character be bound by an adjudication between the United States and the patentee of the Visitation rancho.

But by the thirteenth section of the act of March 3, 1851, it is provided

that if the right of the claimants under a grant shall be contested by any other person, such person may file his petition with the judge of the district court, setting forth his claim, and may have an injunction restraining the Commissioner of the Land Office from issuing a patent pursuant to the confirmation of any survey or grant until the rights of such other person can be determined. Had the preëmptors availed themselves of that provision they might have fully presented their case and had the same adjudicated before the court without the aid of the district attorney. But it appears that they were not bound to do this, and by section 15 of the same act the determination is conclusive only as to the rights of the claimant and the United States; and by section 3 of the act of June 14, 1860, it seems that preëmptors are required to appear through the district attorney intervening in the name of the United States on appeals to the Supreme Court.

On the whole the preëmptors do not appear to be parties to the survey and confirmation of the boundaries of the Visitation rancho to such an extent as to be barred of their equitable rights. And this view is strengthened by the recommendation of the Commissioner of the General Land Office to the Secretary of the Interior in his communication of the 20th November, 1869, recommending a suit in chancery in the name of the United States, but at the expense of the parties, to settle this controversy.

It is therefore recommended that an act be passed allowing all persons, whether as preëmptors or settlers, under any grant or title on any lands within the exterior bounds of the patent granted by the United States Land Office in confirmation of the Mexican grant known as the rancho Cañada de Guadalupe la Visitacion Rodeo Viejo, in the county of San Mateo, and State of California, the right in all courts to contest the correctness of the location of the lines of said patent as confirmed by the United States district court of the northern district of California to the parties claiming said ranch, notwithstanding any official or approved survey made or hereafter to be made of the same; and that House of Representatives bill No. 2037, referred to this committee, be so amended as to conform to this recommendation, and, as so amended, do pass.

S. L. MAYHAM,
Sub-Committee.

APPENDIX.

DEPARTMENT OF THE INTERIOR,
General Land Office, December 15, 1870.

I, Joseph S. Wilson, Commissioner of the General Land Office, do hereby certify that the annexed are true and literal exemplifications of the following:

1st. On pages 1 and 2, the transcript petition of Jacob P. Leese, and the transcript marginal order of Castro, as the same are found on pages 127 and 128, volume 17, of the transcript record of evidence of the California land commission on file in this office.

2d. Of an unauthenticated diagram accompanying a letter dated 2d July, 1859, from the surveyor general of California, in which letter it is stated that the diagram sent up is not known to him "as an authentic or official paper."

[Diagram accompanies the MS. copy of this paper.]

In testimony whereof I have hereunto subscribed my name and caused the seal of this office to be affixed, at the city of Washington, on the day and year above written.

[SEAL.]

JOS. S. WILSON,
Commissioner of the General Land Office.

No. 142.	1839.
Claim of Robert S. Eaton.	Espediente, instituted by Jacob Leese, soliciting the tract of land known by the name of "Cañada de Guadalupe and Visitacion."
	245.
Cañada de Guadalupe Visitacion y Rodeo Viejo.	Stamp fourth, one-fourth of a real, provisionally authorized by the maritime custom-house of Monterey for the years 1839 and 1840. ALVARADO. [SEAL.] ANTONIO MA. OSIO.
"Espediente." Translation.	SAN JUAN DE CASTRO, *November* 16, 1839.—Let the justice of the peace of San Francisco report on the subject-matter of this petition. CASTRO.
	MOST EXCELLENT SIR: The citizen Jacobo Luis de Leese, before your excellency, with due respect and in due form of law, appears and says, that being desirous to have a place for the purpose of breeding meat cattle and horses thereon, he asks the place called "La Cañada de Guadalupe y Visitacion," situated in the bend formed by the hill of San Bruno, distant about one league from the mission of San Francisco, according to annexed sketch, excepting the "Rincon de las Salinas," as therein shown; the boundaries to be, on the north, the said "Rincon;" on the west, the main road as far as the mountain pass, (Portezuelo;) on the south, the rancho of Francisco Haro and that of José Sanchez; and on the east, the sea. Therefore I pray your excellency that you be pleased to accede to my application, and I shall be in duty bound, &c. I swear it is not in malice, &c. JACOB P. LEESE. MONTEREY, *November* 14, 1839.

GENERAL LAND OFFICE, *February* 25, 1870.

I, Joseph S. Wilson, Commissioner of the General Land Office, do hereby certify that the annexed on pages one to six inclusive is a true and literal exemplification of the certified transcript now on file in this office.

In testimony whereof I have hereunto subscribed my name, and caused the seal of this office to be affixed, at the city of Washington, on the day and year above written.

[SEAL.] JOS. S. WILSON,
Commissioner of the General Land Office.

*In the district court of the United States of America for the northern district of California. 1]

THE UNITED STATES, appellants, *vs.* HENRY R. PAYSON, appellee. } Decree No. 285, Rancho "La Visitacion Cañada de Guadalupe y Rodeo Viejo."

Stated term, June 18, 1856.

On appeal from the final decision of the board of land commissioners to ascertain and settle private land claims in the State of California, this cause came on to be heard at the stated term of the court, on appeal from the final decision of the board of commissioners to ascertain and settle private land claims in the State of California, under an act of Congress, approved on the 3d day of March, 1851, upon the transcript of the proceedings and decision of the said board of commissioners, and the papers and evidence on which the said decision was founded; and it appearing to the court that the said transcript has been duly filed according to law, and counsel for the respective *parties having been heard, it is by the court hereby ordered, adjudged, and decreed that the said decision be, and the same is hereby, in all things affirmed. [2

And it is likewise further ordered, adjudged, and decreed that the claim of the appellee is a good and valid claim, and that the said claim be confirmed; and that the

land of which confirmation is hereby made, is known by the name of Cañada de Guadalupe la Visitacion y Rodeo Viejo, granted to, and formerly occupied by, Jacob P. Leese, situated in San Francisco County, and bounded as follows, to wit: On the east by the waters of the bay of San Francisco; on the west by the Camnio Real, as the same was located at the time said land was granted, and the Porto Zuelo; on the north by the land known as the rancho of Don Cornelio Bernal; and on the south by the rancho of Don José Sanches, being the same land described in the grant to said Leese,
and represented as such on the map attached to and forming a part of the traced
3] copy of the espediente on file *in this case, and to which grant and map reference
is to be had for further description of said premises, the same containing about two sqnare leagues of land. Excepting and reserving therefrom, and from this confirmation, all that portion of the above-described premises which is described and bounded as follows, to wit: Commencing where a stake has been planted in the valley known as Visitacion Valley, on the western side of a large gray rock in and on the borders of the bay of San Francisco, said rock being the most southerly of a cluster of three, and rather flat and low compared with the other two, and bearing north forty-five degrees thirty minutes west, and distant six feet from side border; thence on same bearing north forty-five degrees thirty minutes west five chains twenty-seven links; thence north eighty-two degrees fifteen minutes west four chains and forty-seven links; thence north eighty degrees thirty minutes west nine chains seventy-six links; thence north eighty-two degrees
fifteen minutes west three chains ninety-eight and a half links; thence south
4] eighty-nine degrees thirty minutes west *twenty-one chains forty-seven and a half
links; thence north eighty degrees west nineteen chains; thence north eighty-seven degrees thirty minutes west forty-two chains fifteen and a half links; thence north eighty-five degrees west forty-seven chains twenty links; thence south five degrees thirty minutes east twenty-seven chains thirty links; thence south five degrees west thirty-four chains seventy-nine links; thence south fifty degrees east forty-five chains thirty-five links; thence north eighty degrees thirty minutes east seven chains ninety-six links; thence east thirty-seven chains thirty-seven links; thence south seventy-five degrees thirty minutes east forty-four chains sixty links; thence north eighteen degrees east, to place of beginning, containing, in all, seven hundred acres, more or less, and being the same premises heretofore confirmed by decree of the said board of commissioners to Robert S. Eastoro.

OGDEN HOFFMAN,
United States District Judge.

Indorsed: Filed June 18, 1856.

JOHN A. MONROE, *Clerk.*
By W. H. CHEVERS, *Deputy.*

5] *At a stated term of the district court of the United States of America for the northern district of California, held at the court-room in the city of San Francisco on Wednesday the first day of April, in the year of our Lord one thousand eight hundred and fifty-seven:

Present, the Hon. Ogden Hoffman, district judge.

THE UNITED STATES
vs.
HENRY K. PAYSON. } D. C. 285. L. C. 745.

The Attorney General of the United States having given notice that appeal will not be prosecuted in this case, and a stipulation having been entered into to that effect, on motion of the district attorney it is hereby ordered, adjudged, and decreed that claimant have leave to proceed under the decree of this court heretofore rendered in his favor, as under final decree.

OGDEN HOFFMAN,
United States District Judge.

Indorsed: Filed April 1st, 1857.

DEPARTMENT OF JUSTICE,
Washington, February 3, 1871.

SIR: I have the honor to acknowledge the receipt of your letter of the 26th ultimo, and to inform you that upon an examination of the files of this Department it does not appear that any general order has been issued relative to the decisions of the district court of the United States for the district of California in Mexican land grant cases.

The following is an extract from a letter upon the subject, written by Mr. Attorney General Stanton, on the 28th of February, 1861, to P. Della Torre, esq., special counsel of the United States in these cases:

"I authorize and direct you as special counsel of the United States to take appeals in all cases in which decisions have been made against the United States, where appeals have not been entered, and request you to see that the appeals are entered without delay, and that the transcripts are made out and forwarded to this office, to be entered in the Supreme Court."

I am, sir, very respectfully, your obedient servant,

A. T. AKERMAN,
Attorney General.

Hon. STEPHEN L. MAYHAM,
Sub-Committee Private Land Claims, House of Representatives.

In the district court of the United States for the northern district of California.—Notice of motion to approve survey.

THE UNITED STATES *vs.* HENRY R. PAYSON. } Land Case, No. 285.

You will please to take notice, that on Wednesday the 16th day of March instant, at the opening of the court on that day, or as soon thereafter as counsel can be heard, I shall move the court to approve the survey and location of the land confirmed in this case, as shown by the plat thereof, approved by the surveyor general of the United States for California, March 11, 1864, and filed herein March 12, 1864. And shall further move the court to enter a decree of approval and confirmation of such survey and location.

Dated San Francisco, March 12, 1864.

Yours, &c.,

ALFRED WHEELER,
Attorney for Claimant and Intervenor.

WM. H. SHARP, *United States Attorney.*
H. H. HAIGHT, *Attorney for Intervenors.*
J. B. WILLIAMS, *Attorney for Intervenors.*
SHARP & LLOYD, *Attorney for Intervenors.*

In the United States district court for the northern district of California.—Stipulation waiving right of appeal.

THE UNITED STATES *vs.* HENRY R. PAYSON. } Land Case, No. 285.

In this case it is hereby stipulated and agreed that the survey and plat thereof, and the location of the land, the claim to which has been confirmed in this case, which sur-

vey, plat, and location were made by the surveyor general of the United States for California, according to the plat of said land filed in this case on the 12th day of March, 1864, the same being in accordance with the decree of this court, made and filed herein on the 19th day of February, 1864, may be approved by the court, and a decree of this court entered approving such survey and location.

And it is further stipulated and agreed, that on the entering of such decree of approval, the survey so approved shall be regarded as finally approved and determined, and all right of appeal therefrom is hereby waived.

Dated SAN FRANCISCO, *March* 12, 1864.

ALFRED WHEELER,
Attorney for Claimant and for Intervenor Wheeler.

W. H. CHEVERS, *Clerk.*

In the United States district court for the northern district of California.—Order declaring approval of survey final.

THE UNITED STATES *vs.* HENRY R. PAYSON. } Land case No. 285.

On reading and filing stipulation in this case, signed by all the parties and intervenors herein, waiving all right of appeal from the decree of this court approving the survey and location of the land confirmed in this case, according to the plat of said land filed herein March 12, 1864; and also stipulating that said survey, so approved, shall be regarded as finally approved and determined: Now, therefore, it is hereby ordered and decreed, that the decree of approval made in this case as aforesaid, and to which is attached the plat of said approved survey, be, and the same is, declared final, and the said survey and location of said land finally determined and approved.

OGDEN HOFFMAN,
District Judge.

Indorsed: Filed July 9, 1864.

W. H. CHEVERS, *Clerk.*

I, William H. Chevers, clerk of the district court of the United States for the northern district of California, do hereby certify the foregoing to be full, true, and correct copies of their respective originals, now on file and remaining of record in my office, in the cause entitled The United States *vs.* Henry R. Payson, No. 285.

In testimony whereof, I have hereunto set my hand and affixed the seal of the said court this 17th day of September, A. D. 1864.

[SEAL.] W. H. CHEVERS, *Clerk.*

GENERAL LAND OFFICE, *February* 2, 1871.

I, W. W. Curtis, Acting Commissioner of the General Land Office, do hereby certify that the annexed, on pages 1 and 2, is correctly copied from a transcript of the original, duly authenticated by the United States surveyor general of California, which transcript constituted, in part, the basis of the patent for the private land claim in California known as the part of the rancho Cañada de Guadalupe la Visitacion y Rodeo Viejo, finally confirmed to Henry R. Payson.

In testimony whereof, I have hereunto subscribed my name and caused the seal of this office to be affixed at the city of Washington, on the day and year above written.

[SEAL.] W. W. CURTIS,
Acting Commissioner of the General Land Office.

1] *At a stated term of the district court of the United States of America for the northern district of California, held at the court-room in the city of San Fran-

cisco, on Wednesday the first day of April, in the year of our Lord one thousand eight hundred and fifty-seven:

Present, the Hon. Ogden Hoffman, district judge.

THE UNITED STATES *vs.* HENRY K. PAYSON. } D. C. 285; L. C. 745.

The Attorney General of the United States having given notice that appeal will not be prosecuted in this case, and a stipulation having been entered into to that effect, on motion of the district attorney it is hereby ordered, adjudged, and decreed, that claimant have leave to proceed under the decree of this court heretofore rendered in his favor, as under final decree.

OGDEN HOFFMAN,
United States District Judge.

J. M. EDMUNDS,
Commissioner of the General Land Office.

*In the district court of the United States for the northern district of California. [1

UNITED STATES *vs.* HENRY R. PAYSON, } Land case No. 285.

Deposition of Charles Clark and Israel G. Knowles.

County of San Mateo, ss:

Charles Clark, being duly sworn, deposes and says that he (deponent) is a citizen of the United States, of the age of twenty-one years, and a resident of San Mateo County, State of California, and that on or about the first of November, A. D. 1852, deponent entered and took possession of a certain tract of vacant land in said county aforesaid. The said land was pointed out to deponent by Francisco Sanche, now deceased. He, the said Sanch, pointed out to deponent the boundaries of the Burnburor rancho as lying on the south; also pointed out the Las Visitation on the east as bounded on the top of San Bruno Mountain. On or about six months from the date aforesaid deponent entered on said land, and employed the county surveyor to survey the said land in accordance with *an act of the legislature of the State of California, passed [2 April 20th, A. D. 1852, for the protection of settlers of public lands. Said surveyor commenced surveying, and with the aid of De La Cruse Sancho and Francisco Sanches, who were owners of one-tenth part each of said rancho at the time the said surveyor was on the ground, they, the said Sanches, pointed out to the said surveyor the lines of the afore-mentioned rancho, by maps and papers and by accompanying him on the ground. Said surveyor then, with the aid of all the papers and maps of the adjoining ranchos, townsh*h*iped and sectionized the land, which is located in township 3 south, range 5 west. Fractions two and three and northwest quarter of southwest quarter and southwest quarter of the northwest quarter of section seven, containing $187\frac{62}{100}$ acres. That after the lines of the surveyor were run deponent commenced fencing, and completed the fencing on the outline of his, deponent, said land, and at different times since deponent has made partition fences and buildings on said tract of

land. That deponent has expended the sum of five thousand dollars in making improvements on said land, and has resided upon the same up to the present time.

3] *That on or about the first of June, A. D. 1854, the surveyor general of the United States for California entered on the said land, and townshiped and sectionized the same as public lands of the United States. Said surveyor general approved the said plats, and sent one to the General Land Office at Washington and one to the local land office at Benetia, California, for record, and after the said plats were recorded. The land officer, Colonel Gift, issued a notice in the daily papers of San Francisco that all preëmtors that resided on the afore-mentioned tract of land must come forward to the land office at Benetia, California, and enter their respective claims on said plats, according to existing laws of the United States. Deponent did so enter within the three months prescribed in said notice. Deponent further avers that in January, A. D. 1858, deponent was informed by the land officer then at San Francisco, California, that it was necessary for deponent to come to the land office and prove up his (deponent's) claim and pay the Government for the land. Deponent did so, and received a certificate of purchase of the Government of the United States. Deponent has the

4] same at the present time in his possession. *Deponent further avers that on or about the year 1860 the present claimants of the ranchos Las Visitation and Burnburor caused a survey to be made of the said ranchos, and brought the same into the district court of the northern district California for approval. The said surveys mentioned above includes some nine families in said surveys; said families are located outside of the exterior bounds of the grants, as can be shown on said dezaneos and petitions of said ranchmen, although said preëmtors have, from the inception of this case, been represented on the record of the United States district court by counsel, & although said case has for years past been pending on rehearings granted on the application of said preëmtors' counsel, yet the grant claimants have, by stipulation between themselves and the district attorney, entered into an agreement, without notice to the preëmtors or their said counsel, and have established a bound called a B. B. Stake No. 2, w.. ch divides the lands of these families in about equal proportions among the aforementioned Spanish claimants, the same being Government land and containing

5] 1,500 acres, as can be shown *by said original maps and papers connected with the two ranchos, and that a decree of the district court was entered in accordance with said stipulations. Deponent further ayers that the time for appealing from said decree of said district court has not yet past. That deponent and others are prosecuting, as far as they legally can, an appeal from the said district court to the circuit court of the United States for said district.

Wherefore said deponent and others pray that the issuing of the patent to said claimants be stayed till the proper officers of the Government can be informed of the real facts and merits of the rights of deponent and others, and so as to afford sufficient time for the determination of the appeal as aforesaid, which said appeal deponent and others are prosecuting.

CHARLES CLARK.
ISRAEL G. KNOWLES.

W. O. ANDREWS,
Notary Public.

Affidavit of James Graves.

State of California, City and County of San Francisco, ss:

James Graves, being duly sworn according to law, says that he is a citizen of the United States, over twenty-one years of age, and has resided in San Francisco, California, for twenty years last. Deponent further says that prior to the making of the survey by the United States, which was finally approved, of the rancho Cañada de Guadalupe Rodeo Viejo y Visitacion, which was granted to Jacob P. Leese by theMexican government, he purchased an interest in said grant from the owners; that, at the time, this deponent had the lines pointed out to him by the persons owning said rancho, or some of them, and had the title papers examined; that it was then stated to him by parties owning the ranch that the line commenced at the bay of San Francisco, and it was bounded on the southeast by the bay, on the northeast by the Bernal ranch, and on the west by the Camino Real, or old road, and following said road as far as the Portezuelo, or pass or gap in the San Bruno Mountain; that the said line then turned nearly at right angles and ran along the San Bruno Mountain to the bay of San Francisco to Point San Bruno, where said line intersects with the northern line of the Buri Buri rancho, and which is the extreme southern point of the Visitacion rancho; that the title papers, in the opinion of affiant, corresponded with the claim of the parties. Affiant further says that he has since parted with his interest. Affiant further says that when the survey was before the United States court he testified substantially to

these facts as near as he can now recollect; that at that time Charles Clark, I. G. Knowles, A. C. Willard, and J. E. King, and others, who claimed to be settlers on the public land, were trying to confine the survey and prevent its going west of the San Bruno Mountain. Deponent says that he is acquainted with all these parties, and the widow of said King, who represents her husband's estate, and her children, who are heirs of J. E. King; he also knew John Sanderson and John G. Cooper, and knew where they lived, and that they lived outside of and west of the lines as pointed out to him when he bought, and what he understood to be the correct lines; that the survey, as approved by the United States court, passes entirely beyond the Portezuelo and west of the San Bruno Mountain into the valley and toward the Pacific Ocean. Deponent says that the survey, as approved by the United States district court, includes land that was represented to him to be outside of the grant, and which he never thought was inside of it when he owned in it. Deponent says that he knows that Clark and others contested that survey, and expended money to defeat it, and that he knows that Clark particularly was very anxious to appeal the case to the Supreme Court of the United States, and he called with Clark upon the district attorney for that purpose, and he thought it was to be appealed, but he now does not remember what passed, except that he thought the case was to be appealed. Deponent further says that he understood that all of the parties on the public lands were anxious to appeal the case, as well as Clark, but he knows more particularly about Clark because he was better acquainted with him.

JAMES GRAVES.

Subscribed and sworn to before me, this 2d day of May, A. D. 1870.
[SEAL.] J. W. McKENZIE,
Notary Public.

Affidavit of Israel G. Knowles.

STATE OF CALIFORNIA, *City and County of San Francisco, ss:*

I. G. Knowles, being duly sworn according to law, does, upon his oath, say, that he settled upon lands belonging to the Government of the United States in 1853; that prior to settling he took particular pains to ascertain that it was public land, and not within the exterior limits of any Mexican grant; that then the land was not worth more than the Government price; that afterward land became valuable, and every grant in his neighborhood, that could, claimed his land as belonging to it; that among other grants that it was pretended covered his land was the Visitation grant; that he with others went to Tully R. Wise, who was then acting for the United States as district attorney, and he, after examining the case, filed exceptions to the survey, on behalf of the United States. Affiant further says that he, with Charles Clark and other settlers west and south of the San Bruno Mountain, procured witnesses, paid their expenses, and helped to investigate that survey; that after said Wise ceased to be United States district attorney they employed him to assist the new district attorney, Calhoun Benham; that subsequently Wise left, and they employed Williams to aid Mr. William H. Sharp, United States district attorney after Benham; that after the survey was decided upon by Judge Hoffman, said Sharp distinctly promised to affiant, and to Mr. Clark, and to others, to appeal said case to the Supreme Court of the United States; that afterward affiant learned that the district attorney had agreed *not* to appeal the case, and he went to said attorney and found a stipulation to that effect had been entered into; that somebody had signed the name of Williams to said stipulation, and that said Williams was not then in California; that said Williams had a standing in the case, as an attorney for a claimant whose interest was not affected by settlers living south and west of the San Bruno Mountain. And affiant further says that when he asked Mr. Sharp why he had not appealed the case according to promise, he said that the Government had no interest in it, and that the cost was great. Affiant says that he then told him if he would appeal that case he would pay all expenses and give security for all costs; and that prior to his so stipulating he so stated to Mr. Sharp. Affiant further says that he is advised by counsel that the survey is wrong, and he believes it is; that it ought to be confined to the top of the San Bruno Mountain, and instead of that it runs over it. Affiant further says that he tried to induce Mr. Sharp to appeal that case, but could not; that he got an affidavit from Williams about signing the stipulation, and made every effort to get the case opened, but without success; that he could not appear by counsel or in person, because the law only authorized him to appear by the United States district attorney. Affiant further says that he is now in possession of a piece of land claimed by the Visitation grant owners, and to which they have a patent, and that he has also a patent under a preëmption purchase, and that if the said survey is permitted to stand he is advised that it will cause him a great deal of trouble; that a suit is now pending to recover it of him. Affiant further says that

he has made every effort to get clear of that survey, but without success, and that he has consulted and employed a great many attorneys, and they all say that only by action of the Government can anything be done.

ISRAEL G. KNOWLES.

Subscribed and sworn to this 15th day of March, A. D. 1870, before me.

EDW. B. COTTER,
U. S. Commissioner.

Affidavit of Charles Clark.

Charles Clark, being duly sworn according to law, says he is a citizen of the United States, over the age of twenty-one years, and has resided in San Mateo County, California, more than eighteen years; and, since his residence in said county, that he took up a piece of Government land, which he has paid the Government for, and to which he has had several lawsuits and controversies, both in the United States and State of California courts, and among those controversies have been the claimants of the Visitation rancho. Deponent says he has had several conversations with Mr. Theller, the agent of Pioch & Byrk, and that said Theller informed him that the Visitation rancho proper never extended any further west than the top of San Bruno Mountain, and that Pioch & Byrk never claimed any further west than the Porteznelo, and top San Bruno; and that Alfred Wheeler had caused the extension of said grant west of Portezuelo and San Bruno Mountain. Deponent further avers that he was informed that some parties were about to put up his land into a homestead without his knowledge or consent, wherefore deponent went to the Morning Call, a daily paper printed in the city of San Francisco, notifying and forbidding all persons from buying any of said land, as he had purchased the same land of the United States, and had resided on the same for more than eighteen years; and that all of said improvements on his land were made by himself; and also that all the improvements put on said land, the Visitation, west of San Bruno Mountain, were put there by the settlers, and not by the claimants of Visitation rancho. Deponent says he filed an affidavit some time in the year 1864, and forwarded the same to the Commissioner of the General Land Office, at Washington, before a patent was issued to the Visitation claimants, which states all the facts connected with the case up to that time, and to which affidavit is now submitted to Congress, and, therefore, deponent makes this affidavit, as the above matters have transpired since the date of his first affidavit.

CHAS. CLARK.

Subscribed and sworn to before me this 19th day of July, A. D. 1870.

F. J. THIBAULT,
Notary Public.

"*Notice to purchasers under the Abbey Homestead Land Association, and the public.*

"The undersigned respectfully notifies the public against purchasing any portion of land lying upon the fractions two and three, and northwest quarter of southwest quarter, and southwest quarter of northwest quarter of section seven, in township three south, of range five west. The portion referred to is included within the Abbey Homestead, as advertised by them for sale in city lots.

"I caution the public against purchasing the same. I have lived on the land in question more than sixteen years, in peaceable possession. I preëmpted the land of the Government, paid the Government for the same, and received a duplicate from said Government.

"CHARLES CLARK."

Affidavit of R. S. Thornton.

In the matter of the application of N. S. Murphy and others, to be permitted to use the name of the United States in a suit to be commenced against the owners of the rancho Cañada de Guadalupe La Visitacion y Rodeo Viejo.

R. S. Thornton makes the following statement: That he resides near the land in controversy, and is familiar with it and its history; that it is part of the land once claimed by Josefa de Haro et al., but which claim, having been rejected by the Supreme Court of the United States, was surveyed by the Government authorities and opened to settlement as public lands; that it was a strip of land lying between the above-mentioned Visitation rancho on the northeast and the Buri Buri rancho on the south; that the stipulation entered into on the 12th March, 1864, was intended to, and did inure only to

the benefit of the claimants under the Mexican grants, and did despoil and defraud the United States and the preëmptioners of their just rights; that by virtue of said stipulation, the intervenors, George Pen. Johnston, Schwerin, and others, secured what they claimed by purchase under the different Mexican grants. The claimants of the Visitation rancho and the Buri Buri rancho closed in and divided the aforesaid strip of land about equally between themselves, and the rights of the Government, as before determined in the De Haro case, as well as the rights of the preëmptioners, were totally ignored and disregarded.

Said Thornton further states that all of said settlers and preëmptioners have had possession of their respective claims for more than fifteen years, and some of them for eighteen years. One of these settlers, J. E. King, died, and his widow intermarried with Laswell, and they are still residing on their claim. Another, John E. S. Solomon, died, and by will devised all his estate to Nathaniel S. Murphy. During a part of the time proceedings were going on in the court in relation to the Visitation and Buri Buri ranchos, the settlers were permitted to appear by counsel; but neither they or their counsel were parties to the stipulation above mentioned, nor were they notified of it, nor would the district attorney, after the wrong was perpetrated, do anything to correct it, although requested to do so, and at one time promising to take an appeal to the Supreme Court for that purpose. After the decree of the district court in the Visitation survey case was rendered, the settlers in the strip of land in controversy, lying between the Buri Buri rancho, and which by that decision had, under the said stipulation, been divided about equally between them, went to see Mr. Sharp, the United States district attorney, with a view to having him take an appeal in behalf of the United States, and in their behalf, as claimants under the United States. I was present when Mr. Sharp promised them that an appeal would be taken on their behalf, and the record sent up to the Supreme Court of the United States. I went to Mr. Sharp's office afterward to see about this record in the appeal which had been promised, and I was then and there informed by Mr. Sharp's clerk (Thomas Jewett) that the record had been ordered by Mr. Sharp to be made out by him for said appeal, and that the said Jewett had been ordered to make it out. Why Mr. Sharp subsequently changed his mind on the subject I have no knowledge. I only know that he promised the settlers an appeal should be taken, but that no appeal was taken.

B. S. THORNTON.

Sworn and subscribed before me this 27th day of April, A. D. 1870.

N. CALLAN, *Notary Public.*

GENERAL LAND OFFICE, *January* 14, 1871.

I, Joseph S. Wilson, Commissioner of the General Land Office, do hereby certify that the annexed on file. 1 to 7, inclusive, is a true and literal exemplification of a letter dated November 20, 1869, addressed to Hon. J. D. Cox, Secretary of the Interior, as said letter is recorded, vol. 6, pp. 516 to 522, inclusive.

In testimony whereof I have hereunto subscribed my name and caused the seal of this office to be affixed, at the city of Washington, on the day and year above written.

[SEAL.]

JOS. S. WILSON,
Commissioner of the General Land Office.

* DEPARTMENT OF THE INTERIOR, [1
General Land Office, November 20, 1869.

Hon. J. D. COX, *Secretary of the Interior.*

SIR: I had the honor yesterday to receive by reference from the Department proper a communication from J. W. Denver, esq., in reference to an application, by Messrs. Hughes, Denver & Peck, on behalf of N. S. Murphy, esq., of California, for the recommendation of the Secretary to the U. S. Attorney General to instruct the United States district attorney for the district of California to institute inquiry with a view to filing a bill to set aside a patent issued to Henry R. Payson for a part of the rancho in California called "Cañada de Guadalupe la Visitacion y Rodeo Viejo," and have to report as follows from the records of this office:

1st. The claim was presented to the board of California land commissioners in the name of Henry Payson, and under date January 30, 1855, said board rendered a decree of confirmation in favor of the claimant, a copy of the opinion and decree of the board being herewith submitted, marked A.

2. The decree of the board was affirmed by the United States district court for the *northern district of California, June 18, 1856, and on notice from the [2
U. S. Attorney General that appeal to the U. S. Supreme Court would not be prosecuted, said district court on 1st April, 1857, rendered a final decree of confirmation upon *title*. Copy B, herewith.

3. Pursuant to these proceedings, and prior to 29th June, 1854, it appears a survey

of the ranch in question had been executed by the U. S. surveyor general, and there is on file here a township plat of t. 3 s., r. 5 w., Mt. Diablo meridian, California, approved 29th June, 1854, by the surveyor general of California, showing the subdivision of said fractional township; and under date April 5, 1859, Nathaniel S. Marphy preëmpted for cash the fractional S. W. ¼ of section 6, and fraction No. 1 of section 7, in said township; under the preëmption act of 3rd March, 1853. See copy of register's certificate and receiver's receipt No. 25, herewith, marked D, the whole of said fractional section 6 having also been selected by the State of California, July 1st, 1854, for internal improvement purposes under the act of 4th September, 1841.

It appears from a stipulation hereafter referred to that the aforesaid ranch survey was brought before the United States district court, where, by decree filed 19th February, 1864, it was rejected and set aside and a new survey ordered.

3] A new survey was accordingly returned *into court by the surveyor general, which was declared by judicial decree dated 16th March, 1864, to be in accordance with the order of this court heretofore made and entered; and said survey was accordingly "approved and confirmed" by the U. S. district court March 16th, 1864.

I enclose transcript (paper C) of the judicial proceedings *upon survey*, from which it appears that under date 8th July, 1864, there was filed in the district court a stipulation to the effect that the confirmatory decree of 16th March might be made final by decree of court, and waiving "all right of appeal" from such final decree, said stipulation and waiver being signed by "Alfred Wheeler, att'y for claimants, and for intervenors, Wheeler; J. B. Williams, att'y for intervenors Johnston *et al.;* W. H. Sharp, U. S. att'y; Sharp & Lloyd for Schad & Schiverin & Cabanes, intervenors; W. H. Clark, pro so.; H. H. Haight for Mills and others, intervenors." A decree of final approval was accordingly filed, July 9, 1864, said decree reciting that the "stipulation" filed the day previous was "signed by all the parties and intervenors herein."

4. The usual return of survey having been received here from the surveyor general of California, accompanied by duly *certified transcripts of the confirmatory judicial decrees hereinbefore mentioned under date 15th December, 1865,

4] patent was issued in favor of the confirmee, Henry R. Payson, for the tract so confirmed, the duties of this office in that respect being purely ministerial. Among the papers presented by Messrs. Hughes, Denver & Peck is the same statement of N. S. Murphy, in which it is alleged "that he, the said Murphy, together with other purchasers from the Government, on the return of said final survey, severally protested against the approval thereof, employed counsel to oppose the same before said district court, and used every exertion in their power to get the case appealed to the Supreme Court, but without success."

There is also an affidavit by John B. Williams, one of the parties whose name is found on the stipulation and waiver of appeal as attorney for intervenors Johnston et al., to the effect that he was attorney for Geo. Penn Johnston et al., intervenors, and also employed by Clark, *Murphy* and others, settlers, to aid the United States attorney to protect the rights of settlers; that during his absence from California his name was improperly signed to said stipulation by Johnston, so far as Clark, Murphy, and others, settlers, was concerned, although Johnston had a right, so far as his own

5] *interests were concerned, to sign the name of his attorney to said instrument.

It is further alleged in the affidavit of Mr. Williams "that on the return of affiant in July, 1864, he saw Mr. Sharp, then U. S. district attorney, at the request of said settlers, in relation to an appeal, who replied that in his opinion it was useless to carry up the case to the Supreme Court, and that he would not consent to vacate the stipulation, but would allow the survey to be finally approved."

From this showing it would seem that the recital, in the decree of confirmation of survey, that the stipulation, waiving all right of appeal to the Supreme Court, was "signed by all the parties and intervenors herein," is an error, the result of which was to defeat the efforts of parties who were intervenors to prosecute appeal to the United States Supreme Court.

It appears that the preëmption entry No. 35 of N. S. Murphy was made April 5th, 1859, upon frl. S. W. ¼ of sec. 6, & lot No. 1, sec. 7, tp. 3 S., r. 5 W., Mt. D. mer., which, however, was not made in the name of the actual settler, John E. L. Solomon, but by said Murphy as executor of said Solomon, dec'd, the testimony showing that said Solo-

6] mon settled in 1853, built a house, and was in actual possession of his *claim for a period of six months, when his home was torn down, and he was dispossessed by violence.

He again erected his house, and it was torn down a second time, by violence, whereupon, being in ill health, said Solomon removed to San Francisco, Cal'a and soon after died, 22nd April, 1865. That his D. S. was filed Oct. 14th, 1854, alleging settlement Feb'y 28th, 1854, and that such settlement is shown before the rendition of the decree by board of commissioners.

Under these circumstances it is recommended that the papers herewith filed by Messrs. Hughes, Denver & Peck, be transmitted by the Hon. Secretary of the Interior to the Attorney General with the recommendation that he instruct the U. S. district

attorney for the district of California to investigate the matter, and if it should appear to him, after due notice to all parties interested, that the legal representatives of the preëmption were not allowed to intervene, and not represented in waiver, and through no fault of their own, that they have unjustly been deprived of their legal right, then, and in that case, that the legal representatives of the said preëmptor be authorized, in a suit in chancery, to use the name of the United States in a bill to set aside the patent and survey *in favor of the confirmee, Henry R. Payson, to the extent [7
of the frl. S. W. ¼ of sec. 6, & lot 1 of sec. 7, tp. 3 S., r. 5 west. The whole proceedings to be at the expense of the complainants, and in no way involve cost to the United States.

The papers as indicated in the annexed schedule are herewith returned.

I have the honor to be, sir, with great respect, your obedient servant,

JOS. S. WILSON,
Commissioner.

Schedule.

1, 2, 3. Briefs of Messrs. Hughes, Denver & Peck.
4. Statement of Dr. N. S. Murphy.
5. Affidavit of John B. Williams.
6. Affidavit of Charles Brown.
7. Statement of Charles Clark.
8. Statement of Col. Leander Ransom.
9. Traced copy in Spanish, and translation, of a document forming part of a record in the surveyor general's office, in the case of the rancho "Cañada de Guadalupe y Visitacion," with map attached.
10. The traced copy plats, being first copy of township plat of township 3 south, range 5 west, approved by Surveyor General John C. Hays, June 29, 1854, second diagram from same plat on an enlarged scale, third diagram of the survey of rancho "Cañada de Guadalupe la Visitacion y Rodeo Viejo," as confirmed by court, showing also a survey of rancho "Laguna de la Merced."

GENERAL LAND OFFICE, *April* 19, 1870.

I, Joseph S. Wilson, Commissioner of the General Land Office, do hereby certify that the annexed, on pages one to four inclusive, is a true and literal exemplification of the original on file in this office.

In testimony whereof I have hereunto subscribed my name, and caused the seal of this office to be affixed, at the city of Washington, on the day and year above written.

[SEAL.]

JOS. S. WILSON,
Commissioner of the General Land Office.

**Affidavit of Ai Willard.* [1

Ai Willard being duly sworn, and says he is a native-born citizen of the United States and a resident of San Mateo county, State of California; over the age of twenty-one years.

Deponent says that in the year of 1857, he purchased a certain tract of land of William Scott, situated in said county aforesaid, supposed to be Government land at that time, but a few years afterwards the claimants of the Buriburi ranch claimed a portion of my place as their land, and about the same time the claimants of the Visitacion grant claimed the other portion. Deponent further says that the two named grant claimants, by the surveyor general of California, made surveys of their ranchos which does not correspond with the original grant as shown by the map attached to the original grant; the surveyor general in his surveys has adopted a survey in the Visitacion ranch aforesaid, a line on the west and south where deponent's land is situated, to wit: a stake marked B. B. No. 2, and *at that point the survey runs full [2
one mile and a half west of where the original line was established by the Mexican government, which line was run on top of the San Bruno Mountain, as shown by the map attached to the grant, and deponent further says that the Buriburi claimants has established the same bound for their northeast corner of their ranch, to wit, B. B. stake No. 2, which is outside of the grant as shown by the old map attached to grant; course named in said grant, the northerly line as shown by said grant runs from point San Bruno where an estuary looks to the south, thence west in a straight line as shown by old map to Lagunas Alta, where the only natural object is mentioned in said grant as shown by the old map as was one of the conditions of the grant and instructions of the Mexican government to their surveyor to survey the grant and give juridical possession. Deponent further says, he was admitted into the United States* district [3

court as an intervenor in the name of the United States, with Charles Clark and J. E. King and others, for the purpose of putting in proofs to set aside the aforesaid surveys, and have new ones made to correspond with said grant aforesaid as originally granted by the Mexican government.

Deponent has spent considerable money in the courts to get his rights. After the case had been in the courts four or five years, the case went against deponent in the United States district court, and an application for an appeal to the United States Supreme Court, the district attorney agreed to appeal the case to Washington, and informed deponent that the case should go up without any costs to deponent, wherefore deponent did not trouble himself about the matter until some four or five months, when he was informed by some one of his neighbors that the district attorney had not given notice of appeal, and afterwards he refused to allow the appeal to be taken
4] *to Supreme Court, wherefore I have had no redress in any of the courts of my country.

Also, deponent further says that a stipulation was entered into by the district attorney without his consent, or without notice to him or his counsel, with the grant claimants, stipulating that the aforesaid surveys should be final as surveyed by the surveyor general of California, to wit: That B. B. stake No. 2 should be the northeast corner of the Buri Buri ranch, and be one of the southern bounds of the Visitacion ranch. Deponent resid's on said land at the present time.

Witnesseth my hand and seal this 29th day of January, 1870.

AI WILLARD. [SEAL.]

Sworn to before me this 29th day of January, 1870.

[S. L.]

E. W. JONES,
Notary Public.

Statement of Tully R. Wise.

I have examined the vast amount of papers on file in the Visitation ranch case, and have prepared the following statement from them, at the request of Mr. Clarke:

Mr. Clarke's affidavit will explain much connected with this matter, and the accompanying documents and maps will, after reading and comparing them, suggest to any mind a great deal. I can only make a few suggestions, taken from the record. It is impossible to copy the whole mass of papers except at great expense.

The San Bruno Mountain runs entirely across the southern peninsula formed by the bay of San Francisco and the Pacific Ocean, from northwest to southeast. On the eastern side of the mountain, toward the bay, there are three small valleys, called Guadalupe, Visitation, and Rodeo Viejo. While the Mexican government owned the country Jacob P. Leese petitioned for a grant of these three valleys, by the name of "Cañada de Guadalupe, Visitation, y Rodeo Viejo." The name itself is very suggestive of what he wanted and of the country. "Cañada" is a small valley, almost a gulch. "Y" means and; and the full name is the Valleys of Guadalupe, Visitation, and Rodeo Viejo.

With his petition Leese presented a diseño or map, and gave the boundaries and description. In his petition he says it is "bounded on the east by the bay, on the west by the Camino Real and Portezuelo, on the north by the rancho of José Sanchez." The Camino Real is a public road or highway, or royal road; and Portezuelo means an opening or gate through which the road passed; that is, a gap. In the papers, again, the land is described as bounded by the Camino Real as far as the Portezuelo. And the tract of country is called a rincoñada, which means a pocket or inner angle, in contradistinction to a punta. The corner of a room would be called a rincoñada, while the outer angle would be called a punta. In Leese's deposition taken in the case, he says the Camino Real only bounded it to the Portezuelo. The Camino Real ran through the Portezuelo, and continued along the foot of the mountains to San José. It is evident that the Portezuelo was the point where the line of the map left the Camino Real. The map shows a tract of country not correctly delineated, but it would appear that the line ran along the top of the mountain, as far as it goes south. The courses are not correctly laid down. The Camino Real is not on the west, as the petition says, but on the northwest, nearly north. The rancho Buri Buri was not north, but nearly south. The Buri Buri, the rancho of José Sanchez, only touches it at the south, and does so, whether the line runs along the crest of the hill, as it ought to, or whether it runs beyond, (as it has been patented,) into the valley beyond the San Bruno Mountain.

From the name, from its being called a cañada and a rincoñada, from the map, from the three small valleys, from the description in the papers, from Leese's deposition, and from everything connected with the case, I was convinced that the survey ought to run along the top of the mountain. But the survey passes through the Portezuelo, over the San Bruno Mountain, and gives the claimant a breadth of land nearly three-fourths of a mile beyond the mountain, and giving him the whole mountain.

When the survey was made it was carried into the United States district court under the act of 1860. It was litigated there. Mr. Clarke and others employed J. B. Williams to aid the United States district attorney to oppose the location of the claim. Mr. Clarke was a preëmptioner, and had paid his money to the Government for the land afterward taken from him under this survey. After the decision of the court, a stipulation was signed, taking away the right of appeal to the Supreme Court. Mr. Williams did not sign that stipulation, although it purports to be signed by him. He was in the West at the time. Mr. Clarke was and is anxious to prosecute an appeal to the Supreme Court of the United States. He caused a motion to be made to vacate or set aside the order making the survey final under the stipulation, but was entirely unsuccessful. He tried to get an appeal and to vacate the stipulation, but here also he was not able to succeed. Mr. Clarke then opposed the issuing of a patent before the Land Office at Washington, and employed counsel for that purpose. But here, too, he failed, because the Commissioner regarded the decision of the court as final.

Here I deem it proper to make an explanation:

When Mr. Clarke was informed by his counsel that a patent would issue to the claimant, he applied to me to write to Washington and see if they would let him float a warrant which he had put on the land, and pay in money for the small fraction he had left. He thought all was lost and the patent had actually issued, and it was only a question of the value of the warrant. But at the Land Office, subsequently, they intimated to Mr. Thornton that Clarke had withdrawn his opposition from the fact of applying for leave to float his warrant. But he never meant to withdraw his opposition as long as he could oppose it.

Subsequently Mr. Thornton had an interview with Attorney General Speed, who said, if Clarke had been prevented from having an appeal he would see that something was done. That he has always been anxious for an appeal I know personally, as well as from the record. I thought, and still think, that the Supreme Court would have reversed the decision.

Colonel Leander Ransom, who was formerly chief clerk in the surveyor general's office, has made a traced copy of the diseño, which is herewith sent, and has traced with red pencil the line of the survey as actually made, as far as he could. The piece between the red line and the mountain includes Mr. Clarke's land, land that he settled upon, built upon, improved, bought, and paid for to the Government. I have marked it with black pencil. After the court made its decision the then United States district attorney, in my presence, promised Mr. Clarke that an appeal should be taken. Why it was not done I don't know. That it was not done is certain, and it was promised, and Mr. Clarke was anxious for it.

The facts I have stated or alluded to above. What the Government can do or will do I do not know. One thing I do know, that Clarke can do nothing under our laws. By our decisions only the Government can attack a patent. (See Leese *vs.* Clarke, 18 Cal., 535.) And this doctrine is at least hinted at in Field *vs.* Seabury, (19 How., U. S. S. C., 332.) It has also been decided in Missouri. See also the case of Jackson *vs.* Lawton, (10 Johns, 24.) It is positive beyond a doubt that our courts could not and would not go behind a patent under any circumstances.

Now, can the Government itself, by direct proceeding, set aside this patent? Perhaps it could. I am not prepared to say.

Very respectfully,

TULLY R. WISE.

P. S.—Mr. Clarke wants Mr. Thornton to request the lawyer he sent the papers to to return them if the Government will do nothing.

DEPARTMENT OF JUSTICE,
Washington, January 28, 1871.

SIR: According to the request in your letter of the 26th instant, I send you herewith copy of a letter from Attorney General Hoar to Mr. Latimer, the district attorney of California, which is undoubtedly the document to which you refer.

Very respectfully,

A. T. AKERMAN,
Attorney General.

Hon. S. L. MAYHAM,
Sub-Committee of Private Land Claims, House of Representatives.

WASHINGTON, D. C., *May* 3, 1870.

SIR: Referring to my letter to Mr. Pixley, your predecessor, of the 4th of January last, and to my letter to you of the 26th of February last, relating to the application in behalf of the legal representatives of N. S. Murphy, for leave to file a bill in equity in the

name of the United States to vacate a portion of a land patent of the rancho Cañada de Guadalupe la Visitacion y Rodeo Viejo, I have to say that this application has been considered by me, and evidence exhibited to me in behalf of the legal representatives of N. S. Murphy and in behalf of other persons alleged to be in the same predicament.

It appears that on the appeal by the United States from the final decision of the board of land commissioners to ascertain and settle private land claims in the State of California, Judge Hoffman, of the United States district court, on the 18th of June, 1856, affirmed the decision of said commissioners, and confirmed to the appellee, Henry R. Payson, the claim to the rancho, and that by an order filed in the said court, April 1, 1857, the said judge, after reciting that the Attorney General of the United States had given notice that appeal will not be prosecuted in this cause, and a stipulation having been entered into to that effect, ordered and decreed that "the claimant have leave to proceed under the decree of this court heretofore rendered, as under final decree;" that at a stated term of the said court held on the 16th day of March, 1864, said judge ordered and decreed "that the survey and location shown by the plat approved by said surveyor general March 11, 1864, and filed herein March 12, 1864, is a good and valid survey and location of the land confirmed to Henry R. Payson, as aforesaid, and that the said survey and location and the same is hereby approved and confirmed;" that on the 8th of July, 1864, a stipulation was filed in said court signed by certain persons waiving all right of appeal from said last-named order and decree, whereupon, on the 9th of July, 1864, said district judge ordered and decreed "that the decree of approval made in this court as aforesaid, and to which is attached the plat of said approved survey, be and the same is declared final, and the said survey and location of said land finally determined and approved."

These last proceedings were had under the act of June 14, 1860, (12 Stat., p. 33,) by the fifth section of which act no appeal shall be allowed from the order or decree as aforesaid of the said district court approving of the survey and location, unless applied for within six months from the date of the decree of the said district court, but not afterward; and the said plat and survey, so finally determined by publication, order, or decree, as the case may be, shall have the same effect and validity in law as if a patent for the land so surveyed had been issued by the United States; and the same section also provides that "it shall be the duty of the surveyor general to transmit, without delay, the plat or survey of the said claim to the General Land Office, and the patent for the land as surveyed shall forthwith be issued therefor." The land patent, conformably to the survey and location, approved by the district court, was issued in December, 1865.

It is plain, then, that the application is for leave to use the name of the United States, not only to cancel a land patent, but also to vacate a decree of the district court settling the location and boundaries of the claim. I do not find, on the evidence submitted to me, such facts as to convince me that the court will permit a bill of review to be now filed for the purpose of reversing the decree settling the boundaries and location, or probable grounds that the court would reverse its decree if all the facts were established which persons appearing before me have exhibited any evidence tending to prove, and I do not think that the name of the United States should be used for the purpose of unsettling or throwing clouds upon land titles, except where evidence of such facts is exhibited as show that the court might, under some view of the evidence, entertain proceedings for annulling a patent or vacating a judgment establishing an interest in land. You are, therefore, instructed to take no further action in the name of the United States under this application made in behalf of the legal representatives of N. S. Murphy.

Very respectfully,

E. R. HOAR,
Attorney General.

L. D. LATIMER, Esq., *San Francisco, California.*

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 30.

ELIAS C. BOUDINOT.

FEBRUARY 10, 1871.—Ordered to be printed and recommitted to the Committee on the Judiciary.

Mr. COOK, from the Committee on the Judiciary, made the following

REPORT.

The Committee on the Judiciary, to whom was referred the memorial of Elias C. Boudinot, together with a resolution that the committee be instructed to inquire into the statements of fact contained therein, and provide for the proper enforcement of the stipulations of the treaty with the Cherokee Nation, and for the protection of the individual rights therein involved, and that they be authorized to report at any time by bill or otherwise, respectfully report:

That the tenth article of the treaty made with the Cherokee Nation of Indians, on the 19th day of July, 1866, provides as follows:

Every Cherokee, and freed person resident in the Cherokee Nation, shall have the right to sell any products of his farm, including his or her live stock, or any merchandise, or manufactured products, and to ship and drive the same to market, without restraint, paying any tax thereon which is now, or may be, levied by the United States on the quantity sold outside the Indian Territory.

The one hundred and seventh section of the act of July 20th, 1868, is as follows:

And be it further enacted, That the internal revenue laws imposing taxes on distilled spirits, fermented liquors, tobacco, snuff, and cigars shall be held and construed to extend to such articles produced anywhere within the exterior boundaries of the United States, whether the same shall be within a collection district or not.

Prior to the passage of this act, Mr. Boudinot, who claimed to be a Cherokee Indian and a resident of the Indian Territory, applied to the Commissioner of Internal Revenue, by letter, for information concerning his rights as a manufacturer of tobacco, and received the following reply:

TREASURY DEPARTMENT, OFFICE OF INTERNAL REVENUE,
Washington, July 14, 1868.

SIR: In your letter of May 8 you state that you have a factory for the manufacture of tobacco in the Cherokee Nation, in the Indian Territory, and you ask my opinion as to whether you have a legal right to sell tobacco manufactured at such factory without the payment of the revenue tax thereon, at any place you may choose to sell it, whether in the Cherokee Nation or elsewhere in the United States. I reply, in my opinion, under *existing* laws no tax can be legally assessed and collected upon tobacco manufactured at such factory, whether it be sold in the Cherokee country or elsewhere in any of the United States. I do not, however, feel called upon to express any opinion as to the effect which the bill now before Congress may have upon this question should it become a law.

JOHN E. RISLEY,
Deputy Commissioner.

After the passage of the act of July 20, 1868, Mr. Boudinot requested

the opinion of the Commissioner as to the effect of the law, and received the following reply:

OCTOBER 21, 1869.

GENTLEMEN: This office does not propose to apply within the territories of the Cherokee Nation the revenue laws relating to tobacco and spirits produced there, but holds that section 107 of the act of 20th July, 1868, applies to the articles themselves, and will be enforced when those articles are carried into the States or Territories of the United States for sale. The grounds for this determination and the instructions given to the revenue officers are more fully explained by the accompanying memorandum of opinion by Judge James, to whom the question was originally referred.

Very respectfully,

C. DELANO, *Commissioner.*

The opinion of Judge James, referred to in the letter of Commissioner Delano, is in these words:

In the matter of taxes on tobacco produced in the territory of the Cherokee Nation.

SIR: I have examined the argument of Colonel Elias C. Boudinot, a citizen of the Cherokee Nation, against the collection within its territory of taxes upon tobacco manufactured there, and have the honor to make the following reply:

The question, whether section 107 of the act of 20th July, 1868, intended that the revenue laws relating to tobacco and spirits produced in "the Indian country" should be extended *into* that country and there enforced, was submitted to me by yourself about the 12th day of August last. I had the honor to advise you that, without any reference to existing treaties, it was apparent on the face of the statute itself that Congress did not intend to apply the revenue laws to the Indian country itself, but to *the articles* produced there, and that the application could be made only to such part of these manufactures as might be carried thence into the States or Territories of the United States. The action of your office was afterward taken in accordance with this advice, and instructions to that effect were sent, as I was informed, to the revenue officers of Kansas, Missouri, and Texas.

Very respectfully,

CHARLES P. JAMES,
Counselor-at-law.

HON. COLUMBUS DELANO,
Commissioner of Internal Revenue.

The Commissioner, at the time that this reply was made, entertained doubts whether the courts of the United States had jurisdiction to enforce the revenue laws within the Indian country, and for that reason it was held that the intention of the provision was that the taxes should be applied outside of the Indian country to the articles produced there, and in pursuance of this opinion instructions were given to the officers of the adjoining States to take care that all tobacco brought from the Indian country into their respective districts should be subjected to the tax.

Subsequently, and without previous orders from the Commissioner of Internal Revenue, several tobacco factories, with their stocks of tobacco, in the Indian country, were seized by the revenue officers of the adjoining district of Arkansas. The report of these seizures did set forth that a number of factories had been established near the State lines of Kansas and Arkansas; that the tobacco manufactured by them was almost wholly, if not wholly, purchased in Missouri and other States, and carried into the Indian country for manufacture; that an extensive illicit trade was carried on either by the manufacturers or by persons who purchased from them, by which the tobacco so manufactured was smuggled into Texas, Arkansas, Missouri, and Kansas; that for the purpose of claiming the protection of the treaty of July 19, 1869, white men nominally associated with them, as owners of the factories, members of the Cherokee Nation, but that the actual transactions were carried on by persons who did not claim to come within the terms of the treaty. The

local officers reported the whole system of tobacco manufacture in the Indian country as a fraud, as well upon the treaty as upon the revenue laws.

Under these circumstances the question was reëxamined by the Commissioner of Internal Revenue. The Indian country had originally been attached to the Territory of Arkansas, and afterward to the State of Kansas, for the limited purpose of giving the United States courts jurisdiction to punish certain crimes, and for no other purpose; but when the State of Arkansas was divided into two judicial districts, the Indian country was described as part of the western district, in the same terms as were the counties specified as part of the district. The western district of Arkansas was declared to consist of certain counties and of the Indian country. The revenue laws provided that the several district courts of the United States should have jurisdiction to enforce the revenue laws within their respective districts, and it was determined by the Commissioner, upon this reëxamination of the question, that under the literal terms of the acts referred to and of the revenue acts, the district court of the United States for the western district of Arkansas had special jurisdiction in two classes of cases—first, those arising under the acts regulating intercourse with these Indians; secondly, revenue cases—and that the one hundred and seventh section of the act of 20th of July, 1868, applied to all the tobacco produced in the Indian country, and made no distinction between that part of the product which was sold and kept within that country and that part which was carried outside; that the words of said section, "That the revenue laws imposing taxes on distilled spirits and tobacco shall be held and construed to extend to such articles produced anywhere within the exterior bounds of the United States," necessarily meant all such articles produced anywhere within the exterior boundaries of the United States, and consequently, after such reëxamination of the question, and decision thereon, the Commissioner declined to order the release of the factories and tobacco which had been seized, and the cases were left to the action of the courts. In the case of Mr. Boudinot, the question was raised whether he was entitled to claim any benefit secured by the treaty to the members of the Cherokee Nation, his claim of being a Cherokee being denied. It is conceded that, while Mr. Boudinot is of mixed white and Cherokee blood, he acted as secretary of the senate of the so-called Confederate States government of Arkansas during the war of the rebellion; and it is claimed that he has elected to be considered a citizen of the State of Arkansas, and exercised the rights of citizenship in that State.

The questions of law arising in the case are, first, what are the relative rights of the Cherokee Nation and the United States under the treaty, whether the treaty did protect the manufacturers of the products of the States carried on in the Indian country; secondly, whether the treaty is superior to and irrepealable by any law of Congress, in so far as such law relates to the collection of revenues; and, thirdly, what is the proper construction of the one hundred and seventh section of the act of July 20th, 1868, so far as the same applies to the Indian country.

The district court of the United States has already decided these questions adversely to Mr. Boudinot, and the case has been appealed to the Supreme Court of the United States, where it is now pending, and where the very important questions involved will be finally and authoritatively settled. The committee are of opinion that no action of Congress is advisable at the present time. It is impossible for the committee to say that the reports of the local officers to the Commissioner that

the tobacco factories in the Indian country were all established close to the lines of adjoining States, and that ample proofs existed that they were the means of an illicit trade which had destroyed the trade of tax-paying manufacturers of the neighboring States, are not entitled to credit; and if credit is to be given them by the Commissioner, it was clearly his duty to procure from the courts a decision of the question whether the laws of Congress do not forbid these injurious results.

The questions of law involved here have been submitted to the proper tribunal, and the committee are of opinion that an appeal to Congress, upon the purely judicial questions arising in this case, ought not now to be considered.

The committee ask to be discharged from the further consideration of the subject, and that the memorial do lie upon the table.

VIEWS OF THE MINORITY.

Mr. Kerr, on behalf of the minority of the Committee on the Judiciary, presented its views on the subject of the memorial in the following report:

Mr. SPEAKER: The undersigned, being unable to concur with the majority of the Judiciary Committee in the disposition they propose to make of the memorial of Colonel Elias C. Boudinot, respectfully submit their reasons for such non-concurrence in the following statement of facts and law in the premises:

We first embody the memorial itself, in order that the subject may be more fully comprehended by the House:

Whereas the tenth article of the treaty of July 19, 1866, between the United States and the Cherokee Nation of Indians stipulates in these words: "Every Cherokee and free person resident in the Cherokee Nation shall have the right to sell any products of his farm, including his or her live stock, or any merchandise or manufactured products, and to ship and drive the same to market without restraint, paying a tax thereon, which is now or may be levied by the United States, on the quantity sold outside of the Indian Territory;" and whereas Elias C. Boudinot, a "Cherokee, resident in the Cherokee Nation," confiding in the faith of the Government, did, subsequent to the date of said treaty, manufacture and sell tobacco in the Cherokee Nation "without restraint;" and whereas it is not charged by any party that the said Boudinot ever sold any "manufactured products" "outside of the Indian Territory" without paying the tax thereon levied by the United States; and whereas on the 20th of July, 1868, an act imposing taxes on distilled spirits and tobacco, and for other purposes, was passed, the one hundred and seventh section of which reads as follows:

"*And be it further enacted*, That the internal revenue laws, imposing taxes on distilled spirits, fermented liquors, tobacco, snuff, and cigars, shall be held and construed to extend to such articles produced anywhere within the exterior boundaries of the United States, whether the same shall be within a collection district or not."

And whereas the said Boudinot, after the passage of said act of July 20, 1868, referred the question of his right to manufacture and sell his manufactured products within the Indian Territory without paying tax thereon to the United States to Mr. Rollins, at that time Commissioner of Internal Revenue; and whereas, on the 23d day of February, 1869, in response to such reference, Mr. Rollins decided that "notwithstanding the language of said section, the tax could not be collected upon tobacco manufactured in the Indian country so long as it remained in said country, but upon its being brought within any collection district of the United States it would be liable to seizure and forfeiture unless it should be properly stamped, thus indicating that the tax imposed by law had been paid;" and whereas, after Hon. Columbus Delano succeeded Mr. Rollins as Commissioner of Internal Revenue, the said Boudinot submitted the same questions to Mr. Delano, citing the one hundred and seventh section of the act of July 20, 1868, and the tenth article of the Cherokee treaty of 1866; and whereas Commissioner Delano referred the questions submitted to his legal adviser, to which the following opinion was given:

"*In the matter of taxes on tobacco produced in the territory of the Cherokee Nation.*

"SIR: I have examined the argument of Colonel Elias C. Boudinot, a citizen of the Cherokee Nation, against the collection within its territory of taxes upon tobacco manufactured there, and have the honor to make the following reply:

"The question whether section 107 of the act of 20th July, 1868, intended that the revenue laws relating to tobacco and spirits produced 'in the Indian country' should be extended into that country and there enforced, was submitted to me by yourself about the 12th day of August last. I had the honor to advise you that, without any reference to existing treaties, it was apparent on the face of the statute itself that Congress did not intend to apply the revenue laws to the Indian country itself, but to the articles produced there; and that the application could be made only to such part of

these manufactures as might be carried thence into the States or Territories of the United States. The action of your office was afterward taken in accordance with this advice, and instructions to that effect were sent, as I was informed, to the revenue officers of Kansas, Missouri, and Texas.

"Very respectfully,

"CHARLES P. JAMES,
"*Counselor-at-law.*

"Hon. COLUMBUS DELANO,
"*Commissioner of Internal Revenue.*"

And whereas Commissioner Delano wrote the following letter:

"TREASURY DEPARTMENT, OFFICE OF INTERNAL REVENUE,
"*Washington, October* 21, 1869.

"GENTLEMEN: This office does not propose to apply within the territories of the Cherokee Nation the revenue law relating to tobacco and spirits produced there, but holds that section 107 of the act of 20th July, 1868, applies to the articles themselves, and will be enforced when those articles are carried into the States or Territories of the United States for sale. The grounds for this determination and the instructions given to the revenue officers are more fully explained by the accompanying memorandum of opinion by Judge James, to whom the question was originally referred.

"Very respectfully,

"C. DELANO, *Commissioner.*

"Messrs. PIKE & JOHNSON,
"*Counselors-at-law.*"

All of which opinion of Judge James and letter of Commissioner Delano were authorized to be sent, and were sent, to the said Boudinot as the final settlement of the question; and whereas but a few days after the date of the Commissioner's decision he authorized and instructed the supervisor of internal revenue for the district of Arkansas to seize the tobacco factory of the said Boudinot in the Cherokee Nation; and whereas, in pursuance to such instructions, the property of the said Boudinot in the Indian country was seized, and he arrested as a felon without notice of any change in the opinion of the Commissioner, and for no other offense than pursuing a legitimate business specially authorized by treaty and the repeated decisions of the revenue department; and whereas the said Boudinot has applied to have the merits of his case referred to the Attorney General for his decision, and the Secretary of the Treasury has refused to submit the questions involved to the Attorney General; and whereas the said Boudinot has not given bail, but is still at large, courting arrest in vain, that he may obtain a decision from the courts: Therefore,

Be it resolved by the House of Representatives of the United States of America, That the Committee on the Judiciary be, and is hereby, instructed to inquire into the foregoing statements of fact, and provide for the proper enforcement of the stipulations of the treaty with the Cherokee Nation, and for the protection of the individual rights herein involved, and that they be authorized to report at any time by bill or otherwise.

On the 19th day of July, 1866, a treaty with the Cherokee Nation of Indians was made and ratified by the United States, in the tenth article of which it was stipulated in these words:

Every Cherokee, and freed person resident in the Cherokee Nation, shall have the right to sell any products of his farm, including his or her live stock, or any merchandise or manufactured products, and to ship and drive the same to market without restraint, paying any tax thereon which is now, or may be, levied by the United States on the quantity sold outside of the Indian Territory.

Mr. Boudinot being a "resident of the Cherokee Nation," established a factory for the manufacture of tobacco in the Cherokee Nation, and claimed and exercised the right to ship his manufactured products to market "without restraint;" and it is not charged or pretended that he ever sold, or attempted to sell, any part of such manufactured products "outside of the Indian Territory," without paying the tax thereon levied by the United States. We find that previous to July 14, 1868, Mr. Boudinot addressed a letter to Commissioner Rollins, respecting his rights as a manufacturer of tobacco in the Cherokee Nation, to which letter he received the following reply:

TREASURY DEPARTMENT, OFFICE OF INTERNAL REVENUE,
Washington, July 14, 1868.

SIR: In your letter of May 8, you state that you have a factory for the manufacture of tobacco in the Cherokee Nation in the Indian Territory, and you ask my opinion as to whether you have a legal right to sell tobacco manufactured at such factory without the payment of the revenue tax thereon, at any place you may choose to sell it, whether in the Cherokee Nation or elsewhere in any of the United States.

I reply, that in my opinion, under *existing* laws, no tax can be legally assessed and collected upon tobacco manufactured at such factory, whether it be sold in the Cherokee country or elsewhere in any of the United States. I do not, however, feel called upon to express any opinion as to the effect which the bill now before Congress may have upon this question should it become a law.

Very respectfully,

JOHN E. RISLEY,
Deputy Commissioner.

E. C. BOUDINOT, Esq.,
Washington, D. C.

The bill "before Congress," referred to by Deputy Commissioner Risley, became a law on the 20th of July, 1868, six days after the date of the foregoing letter, the one hundred and seventh section of which reads as follows:

And be it further enacted, That the internal revenue laws imposing taxes on distilled spirits, fermented liquors, tobacco, snuff, and cigars shall be held and construed to extend to such articles produced anywhere within the exterior boundaries of the United States, whether the same shall be within a collection district or not.

After the act of July 20, 1868, became a law, Mr. Boudinot again referred the question of his liabilities and rights in the premises to Commissioner Rollins; and on the 23d of February, 1869, was officially informed that "notwithstanding the language of said section, the tax could not be collected upon tobacco manufactured in the Indian country so long as it remained in said country; but upon its being brought within any collection district of the United States it would be liable to seizure and forfeiture, unless it should be properly stamped, thus indicating that the tax imposed by law had been paid."

After the succession of Mr. Delano to the office of Commissioner of Internal Revenue, Mr. Boudinot presented to him a frank statement of his business as a manufacturer of tobacco in the Cherokee Nation, and requested an official opinion, as he had previously done of Mr. Rollins, respecting his rights and liabilities. In reply to such statement and request, Commissioner Delano, on the 21st day of October, 1869, wrote the following letter:

TREASURY DEPARTMENT, OFFICE OF INTERNAL REVENUE,
Washington, October 21, 1869.

GENTLEMEN: This office does not propose to apply, *within* the territories of the Cherokee Nation, the revenue laws relating to tobacco and spirits produced there, but holds that section 107 of the act of 20th July, 1868, applies to the articles themselves, and will be enforced when those articles are carried into the States or Territories of the United States for sale. The grounds of this determination, and the instructions given to the revenue officers, are more fully explained by the accompanying memorandum of opinion by Judge James, to whom the question was originally referred.

Very respectfully,

C. DELANO, *Commissioner.*

Messrs. PIKE & JOHNSON,
Counselors-at-Law.

The opinion of Judge James, referred to in the letter of Commissioner Delano, is in these words:

In the matter of taxes on tobacco produced in the territory of the Cherokee Nation.

SIR: I have examined the argument of Colonel Elias C. Boudinot, a citizen of the Cherokee Nation, against the collection within its territory of taxes upon tobacco manufactured there, and have the honor to make the following reply:

The question, whether section 107 of the act of 20th July, 1868, intended that the

revenue laws relating to tobacco and spirits produced in "the Indian country" should be extended into that country and there enforced, was submitted to me by yourself about the 12th day of August last. I had the honor to advise you that, without any reference to existing treaties, it was apparent on the face of the statute itself that Congress did not intend to apply the revenue laws to the Indian country itself, but to *the articles* produced there, and that the application could be made only to such part of these manufactures as might be carried thence into the States or Territories of the United States. The action of your office was afterward taken in accordance with this advice, and instructions to that effect were sent, as I was informed, to the revenue officers of Kansas, Missouri, and Texas.

Very respectfully,

CHARLES P. JAMES,
Counselor-at-law.

Hon. COLUMBUS DELANO,
Commissioner of Internal Revenue.

It appears, then, from the record, that Mr. Boudinot not only was anxious to obtain, but actually *did* obtain, the official sanction of Commissioners Rollins and Delano, with respect to his manufacturing business. And there is no allegation whatever that Mr. Boudinot has not scrupulously complied with the instructions and interpretations of the Commissioners of Internal Revenue in the actual management of his business in the Territory. The seizure of Mr. Boudinot's factory occurred on the 20th of December, 1869. It was more than a month afterward before Commissioner Delano officially or otherwise incorporated the Indian country into any collection district.

It was afterward stated by the Commissioner that he had reversed his former decision, before quoted, and the decisions of his predecessor, and holds, at present, that the one hundred and seventh section of the act of July 20, 1868, intended the extension of the revenue laws over the *Cherokee territory*, and not alone over the "*articles produced*" there; but it is admitted that no notice was given to Mr. Boudinot of any change in the opinion of the Commissioner, and that his property was seized, and his person arrested, as though he had willfully violated the law; and it is also admitted by Judge James, who represented Mr. Delano before your committee, that the reversal of the repeated decisions of the Commissioners of Internal Revenue was never officially promulgated until after the seizure of Colonel Boudinot's property, and after his personal arrest. The order was issued under date of January 25, 1870. It reads as follows:

TREASURY DEPARTMENT, OFFICE INTERNAL REVENUE,
Washington, January 25, 1870.

Whereas it is provided by section 107 of "an act imposing taxes on distilled spirits and tobacco, and for other purposes," approved July 20, 1868, "that the internal revenue laws imposing taxes on distilled spirits, fermented liquors, tobacco, snuff, and cigars shall be held and construed to extend to such articles produced anywhere within the exterior boundaries of the United States, whether the same shall be within a collection district or not;" and whereas it is further provided by section 103 of the same act, "that when any tax is imposed, and the mode or time of assessment or collection is not provided for, the same shall be established by regulation of the Commissioner of Internal Revenue; and the Commissioner is authorized to make all such regulations, not otherwise provided for, as may become necessary by reason of any change of law in relation to internal revenue made by this act;" and whereas neither the mode nor time of assessment or collection of the taxes imposed and extended by the provisions of said section 107 to distilled spirits, fermented liquors, tobacco, snuff, and cigars, produced within the country lying west of the States of Arkansas and Missouri, and known as the Indian Territory or country, has been provided for, except as in said section 103:

Now, therefore, by virtue of the power and authority given to me, as Commissioner of Internal Revenue, by said action 103, Thomas J. Hunt is hereby appointed, with full authority to exercise all the powers vested by the internal revenue laws in assessors, and Robert W. Wishard is hereby appointed, with full authority to exercise all the powers vested by said laws in collectors, respectively, within so much of the said

country known as the Indian Territory or country as constitutes a part of the western judicial district of Arkansas, for the purpose of the assessment and collection, respectively, of the taxes imposed and extended by said section 107, as above recited. And they are hereby directed and instructed to pursue, respectively, in the assessment and collection of said taxes the same mode and practice which are prescribed by law and regulations in like cases arising in collection districts, and to make the same reports and return the same accounts which are required in such like cases by law and regulations.

C. DELANO,
Commissioner of Internal Revenue.

It follows, therefore, that the opinions of Mr. Rollins and Mr. Delano, heretofore set forth, were the only recorded evidence of the views of those officials with reference to the right of Mr. Boudinot to manufacture tobacco and sell the same in the Indian country without paying tax to the United States. It further appears that Mr. Boudinot appealed from the last verbal decision of Commissioner Delano, and petitioned the Secretary of the Treasury to submit the legal questions involved to the Attorney General. The letter of Mr. Boudinot to the Secretary of the Treasury is herewith submitted:

WASHINGTON, D. C., *January* 26, 1870.

SIR: As a citizen of the Cherokee Nation, born a Cherokee, and resident in the Cherokee country, and as personally and gravely interested in the question, I appeal to you from the decision and action of the Commissioner of Internal Revenue, in respect to the collection within the Cherokee country of the tax upon tobacco manufactured there by me, and respectfully request your consideration of and judgment upon these questions:

1. Whether, under the tenth article of the treaty of 19th July, 1866, a Cherokee Indian, manufacturing tobacco within the Cherokee country, can, under the pretense that section 107 of the act of 1868, imposing taxes on distilled spirits, tobacco, &c., applies to the Indian country, be compelled to pay any tax to the United States on other or more of the tobacco manufactured by him than he may sell beyond the limits of the Indian Territory.

2. Whether, as to such tobacco, so manufactured in the Cherokee country by him, a Cherokee Indian is punishable for not observing the provisions of the revenue laws, when he takes none at all outside of the Indian Territory, or when he pays the taxes required on all that he does carry beyond those limits.

3. Whether a Cherokee Indian, residing in the Cherokee country, is liable to pay the tax on tobacco manufactured by him, which was grown in a State and purchased by him, when manufactured and sold by him in the Cherokee Nation and not elsewhere, and for use and consumption in the Indian country.

A more full statement of the case and its circumstances in which these questions arise, and referring to some charges which may seem to you to deserve to be inquired into, accompanies this letter. I most respectfully invite your attention to it, and have the honor to request that the foregoing questions, being of the utmost gravity and importance, may be submitted to the Attorney General for his decision, with the arguments herewith presented.

With the utmost respect, your obedient servant,

ELIAS C. BOUDINOT.

Hon. GEORGE S. BOUTWELL.

The answer of the Secretary was as follows:

TREASURY DEPARTMENT, *January* 28, 1870.

SIR: I have the honor to acknowledge the receipt of your letter of the 28th instant, covering an appeal by Elias C. Boudinot, from the decision and action of the Commissioner of Internal Revenue, in respect to the collection within the Cherokee country of taxes upon tobacco manufactured by him. In reply I have to say that the action taken by Mr. Delano in the matter was after consultation with me, and that I fully concur in the opinion which he has given.

Very respectfully,

GEO. S. BOUTWELL,
Secretary.

Hon. ALEX'R MCDONALD,
U. S. Senate.

Thus failing in his attempt to get his case referred to the Attorney General, Mr. Boudinot announced that he was an escaped prisoner, and with the certified copy of the proceedings before the United States commissioner of the western district of Arkansas in his hands, showing that he had not given the required bail, but was committed to the custody of the marshal, he sought to be arrested in this city, that he might test the legal merits of his case by *habeas corpus*. Yet, though the officer of internal revenue who had first procured his arrest, and knew the facts, was in Washington, he refused to have the arrest made.

Disappointed in getting his case before the Attorney General or before the courts, Mr. Boudinot represented to Mr. Delano that he had a large amount of unmanufactured material on hand, which was in imminent danger of being wasted and ruined, and made the following proposition in writing:

WASHINGTON, D. C., *January* 26, 1870.

SIR: The undersigned, a Cherokee Indian, is the proprietor of a tobacco factory in the Cherokee Nation, recently seized by order of the supervisor for the district of Arkansas.

Being desirous of resuming his business, the undersigned proposes the following compromise:

1. He will conform strictly hereafter, until relieved therefrom by competent authority, with all the regulations respecting collection of tax on tobacco in the United States.

2. He will pay the Government the revenue tax on all tobacco he has hitherto sold unstamped, whenever the courts shall determine that such tax is due.

ELIAS C. BOUDINOT.

Hon. COMMISSIONER OF INTERNAL REVENUE.

This proposition to waive for the present what Mr. Boudinot conceived to be his rights under the treaty, the law, and the repeated decisions of the Revenue Bureau, was refused, as will appear from the following:

TREASURY DEPARTMENT, OFFICE OF INTERNAL REVENUE,
Washington, February 9, 1870.

SIR: I have considered the proposition of E. C. Boudinot, presented through you, to compromise his liabilities to the United States for having manufactured and sold tobacco in violation of all the requirements of the act of July 20, 1868, relating thereto, and decline to accept it.

I shall be obliged to you if you will inform Mr. Boudinot of this result of his proposition, or give me his address that I may so advise him.

Very respectfully,

C. DELANO, *Commissioner.*

Hon. A. MCDONALD,
United States Senator.

As a last resort Mr. Boudinot appeals to Congress for redress; the record shows that he has been frank and open-handed in all his deportment in relation to this matter; but, while his conduct in the premises has been such as to command respect and sympathy, the whole question is one of law, and must be judged as such, without reference to extraneous matters. What is the law?

The tenth article of the Cherokee treaty of 1866 certainly gives Mr. Boudinot a right, as a Cherokee "resident in the Cherokee Nation," to ship his manufactured products anywhere in the Indian Territory "without restraint," and requires him to pay tax thereon only on such portions thereof as he may carry beyond the limits of the Indian Territory.

We do not feel called upon to give an opinion as to whether an act of Congress passed subsequent to a treaty, and in conflict with it, will abrogate the treaty; for we do not consider that such question enters into the present case at all.

It is now contended by Commissioner Delano that the one hundred

and seventh section of the act of July 20, 1868, gives the United States revenue jurisdiction over the *territory* of the Cherokees and Indian country; but there seems to be nothing in the act that warrants this construction. The decisions of Mr. Rollins and Mr. Delano, set out in this report, appear to rest upon clear legal ground, and to give the true construction; and it is evident from the terms of the one hundred and seventh section that Congress did not intend to assert revenue jurisdiction over the *territory*, but only over the articles that might be produced and manufactured there, and that tax upon the same could only be imposed and collected *when* such articles were taken *beyond* the limits of the Indian Territory for sale.

In all cases of ambiguity of language in Indian treaties it has been the custom of the Government and the decisions of the courts to give such construction thereto as would be most favorable to the Indians. The same rule should, for much stronger reason, apply to the interpretation of acts of Congress, where such acts tend in any respect to work a hardship upon the Indians, or to change the established policy of the Government toward them.

Chief Justice Marshall, in 6 Peters, 582, uses this language: "The language used in treaties with the Indians shall never be construed to their prejudice, if words be made use of which are susceptible of a more extended meaning than their plain import as connected with the tenor of their treaty." (See also the case of the Kansas Indians, 5 Wallace R., 737.)

In 1831, in The Cherokee Nation *vs.* The State of Georgia, (5 Peters, 1,) Chief Justice Marshall says:

> Is the Cherokee Nation a *foreign state* in the sense in which that term is used in the Constitution? The counsel for the plaintiff have maintained the affirmative of this proposition with great earnestness and ability. *So much of the argument as was intended to prove the character of the Cherokees as a state, as a distinct political society, separated from others, capable of managing its own affairs and governing itself, has, in the opinion of a majority of the judges, been completely successful.* They have been uniformly treated as a state from the settlement of our country. The numerous treaties made with them by the United States recognize them as a people capable of maintaining the relations of peace and war, of being responsible in their political character for any violation of their engagements, or for any aggression committed on the citizens of the United States, *by any individual of their community.* Laws have been enacted in the spirit of these treaties. *The acts of the Government plainly recognize the Cherokee Nation as a state, and the courts are bound by those acts.*

In addition to these judicial decisions it seems eminently just, upon principle, and to be required by the uniform policy of the Government, that the treaty stipulations with Indian tribes should be so construed as to give liberal effect to their intent and objects in favor of the Indians, and that no law of Congress should be permitted to reverse this policy, even when it is competent by law to do so, unless its terms be so clear and explicit as to admit of no other or more favorable construction.

The terms of the tenth article of the treaty in this case are very clear and free from ambiguity. They do not appear to forbid an Indian to purchase out of the Territory, in good faith, materials to be changed or manufactured by him in the Territory and there sold. Of course, it would not protect persons who, in any business they might conduct in the Territory, should attempt to do so in bad faith, or to evade revenue or other laws; but no such questions arise in this matter. Colonel Boudinot, although he admits he purchased some of his leaf tobacco out of the Territory, is not charged with having done so for any improper purpose. To construe the treaty to forbid any such purchase would unjustly limit the range of industry and production by the Indians in the Territory.

It is not necessary in this case to consider the power of Congress by law to repeal or annul a treaty with an Indian tribe. It will be conceded that such a power ought only to be exercised, if it exists, in the clearest cases of right and necessity. It is only demanded here that the law of Congress of July 20, 1868, be construed. There is nothing in its terms to disclose any clear intent on the part of Congress to annul the treaty. They can well stand together. They are not inconsistent. The original constructions put upon the law by the Commissioners, as stated, fully and fairly reconcile them. Those constructions do not invite or lead to frauds upon the revenue. If any frauds should be attempted, they can be readily detected and defeated. Besides, the laws extended over the whole Territory by the Commissioner are highly penal in their character, and cannot fail to lead to much embarrassment to legitimate business and enterprise, and much discontent.

It is true the Commissioner of Internal Revenue has caused legal proceedings to be instituted against Mr. Boudinot, and that the subject-matter of this controversy is in that way in process of adjudication by the courts. But, in our judgment, it is the duty of Congress, under the circumstances, to settle the legal construction of the treaty in question in favor of the memorialist, by enacting a law declaratory of the meaning of section 107 of the act of July 20, 1868. The history of this case, the extraordinary care and solicitude manifested by Mr. Boudinot to act within the law, his repeated efforts to have it construed officially and authoritatively, the several constructions of the law with which he was furnished by the proper officers, his absolute freedom from criminal intent in what he has done, and the true spirit and intent of the treaty, fully justify, if they do not require, as matter of simple justice, the enactment at once of such a law. We, therefore, recommend, as a substitute for the proposition of the majority, that the following joint resolution be passed by the House:

JOINT RESOLUTION declaratory of the true intent and meaning of section one hundred and seven of the act entitled "An act imposing taxes on distilled spirits and tobacco, and for other purposes," approved July twenty, eighteen hundred and sixty-eight.

Be it resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That neither section one hundred and seven nor any other part of the act entitled "An act imposing taxes on distilled spirits and tobacco, and for other purposes," approved July twenty, eighteen hundred and sixty-eight, shall be so construed as to repeal, annul, or abrogate article ten of the treaty of July nineteen, eighteen hundred and sixty-six, between the United States and the Cherokee Indians, or so as to require the members of said Indian tribe to pay any revenue taxes on live stock, merchandise, or other products in good faith raised, produced, or manufactured in said Territory, unless the same shall be removed from, and sold outside of, the said Indian Territory, and in that case taxes shall be required to be paid only on the quantity sold outside of the said Indian Territory.

Independently of the many meritorious considerations arising out of the personal conduct of Colonel Boudinot, and entitling him to just and kind, if not generous, treatment at the hands of Congress, we believe that the enactment of the joint resolution we offer is necessary, in order to maintain the good faith and honor of the Government toward the Cherokee Nation.

Respectfuliy submitted.

M. C. KERR.
C. A. ELDRIDGE.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 31.

JOHN BLACK.

FEBRUARY 11, 1871.—Ordered to be printed.

Mr. JUDD, from the Committee on Foreign Affairs, made the following

REPORT.

[To accompany bill H. R. No. 1071.]

The Committee on Foreign Affairs, to whom was referred the memorial of John Black, late consul of the United States at the city of Mexico, together with an act entitled "An act for the relief of John Black, late consul of the United States at the city of Mexico," beg leave to report:

That on the 15th day of February, 1858, by order of this Government, Mr. Forsyth, then minister of the United States at the republic of Mexico, closed his diplomatic relations with that Government, and delivered to Mr. Black the records, seal, archives, and papers of the legation, in accordance with the following instructions from the Government of the United States: "The archives of the legation you will deposit with the consul of the United States at Mexico, Mr. Black, and you will instruct him to afford such counsel and protection to the citizens of the United States as may be in his power."

Mr. Black had been consul of the United States, resident at the city of Mexico, from 1839 until that date. He was an able and efficient officer, understanding the Spanish language, and had discharged his duties as consul to the entire satisfaction of the Government. He had, moreover, previously been charged with diplomatic duties when the United States minister was absent in 1845, and had been paid, by act of Congress, additional compensation therefor. When Mr. Forsyth surrendered the records of the legation to Mr. Black, and he assumed the protection of our citizens, Zuloaga, who was in power and called himself president, was imprisoning citizens of the United States, confiscating their property, making forced loans, and, in general, treating them in a manner contrary to the treaty stipulations between the governments, and in violation of the laws of nations. Mr. Black entered upon the duties as chargé d'affaires, extending his protection to citizens of the United States, corresponding with the Mexican government, reporting to the State Department, and performing diplomatic services as completely and faithfully as any diplomatic representative could have performed the same. The government of Mexico conceded to Mr. Black diplomatic privileges in relation to his correspondence, and he performed the duties thus devolved by the Government upon him, from the 15th of September, 1858, to the 15th of April, 1859—a period of seven months.

Your committee have examined the archives of the State Department, and find that Mr. Black's correspondence with the State Department and the exhibits accompanying the same, during that period, cover more than one hundred and fifty pages, or one-half of one bound volume of Diplomatic Correspondence. The honest and energetic manner in

which Mr. Black discharged the duties thus devolved upon him met with the complete approbation of the Government of the United States, as well as the approbation of the large number of American citizens engaged within the Mexican Republic, whose interests he protected and cared for.

The committee do not deem it necessary to enter into all the details of the services performed by Mr. Black; but from the examination of the dispatches and correspondence between him and the government of Mexico and our Government, it is evident that he performed valuable service of a diplomatic character in the protection of our citizens in their persons and property, and is as much entitled to compensation as though he had been technically a diplomatic representative of the United States. His long residence in Mexico, and his familiarity with the language and institutions of that country, rendered him eminently fit to perform the duties required of a representative in those revolutionary times, and he did perform the same as effectively as any diplomatic representative could. The uprightness, fair dealing, and probity of Mr. Black during his long service as consul, extending over a period of more than twenty years, is vouched for fully at the State Department.

Your committee, in their dealings with applications of consuls for additional compensation for the temporary performance of duties not strictly belonging to their official position, have usually rejected such claims; but in this case the services were so valuable and so far beyond the exceptional duties sometimes performed by other consuls, that they believe Mr. Black is entitled to compensation.

Your committee, therefore, recommend the passage of the accompanying bill, with an amendment.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 32.

JOHN SEYS, CONSUL GENERAL TO LIBERIA.

FEBRUARY 11, 1871.—Ordered to be printed.

Mr. SWANN, from the Committee on Foreign Affairs, made the following

REPORT.

The Committee on Foreign Affairs, to whom was referred the petition of John Seys, minister resident and consul general at Liberia, submit the following report:

That on the 15th of November, 1867, a leave of absence was granted to John Seys for six months. In acknowledging the receipt of the same, on the 15th of January, 1868, he stated that it was not probable that he could find it convenient to avail himself of the permission until June 1. This correspondence shows that he left about the middle of May, and was absent until the 15th of December, 1868, when he returned to his post.

On his arrival in the United States, at his home in Ohio, the Secretary of State transmitted to him a copy of the consular and diplomatic act of 30th March, 1868, with a letter inviting his attention to the third section of that act.

It appears from information received from the Fifth Auditor that, owing to the incompleteness of the accounts of Mr. Seys, they have not been adjusted; that he charges salary for sixty days, and also for fifty-eight days, transit in returning to his post, and for the services of W. A. Johnson, vice consul general, $166 66 for four months.

There being no authority in the consular and diplomatic appropriation act of 30th March, 1868, to meet the claims of Mr. Seys, as before stated, they were refused both by the former and present Secretary of State.

The committee see no reason why Mr. Seys should be exempted from the general provisions of the act above referred to, by making Liberia an exception to the rule therein established by a special act of Congress.

The committee respectfully submit the following resolution:

Resolved, That this committee entertain unfavorably the petition of Mr. John Seys, minister resident and consul general at Liberia, and ask to be discharged from the further consideration of the same.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 33.

GEORGE F. ROBINSON.

[To accompany joint resolution H. Res. No. 501.]

FEBRUARY 11, 1871.—Ordered to be printed.

Mr. PORTER SHELDON, from the Committee on Foreign Affairs, made the following

REPORT.

The Committee on Foreign Affairs, to whom were referred the resolutions of the legislature of the State of Maine, declaring that the heroic conduct of George F. Robinson, late a private in the Eighth Regiment of Maine Volunteers, in saving the life of Secretary Seward from the knife of an assassin, at the imminent peril of his own life, and at the expense of permanent wounds, should receive public recognition by the Congress of the United States, to the end that his noble deeds may be known and remembered by the American people, and that provision may be made for his future welfare such as right and justice demand, and the generous impulse of a grateful people require, respectfully submit the following report:

That on the 15th day of August, 1863, George F. Robinson enlisted in the Eighth Regiment of Maine Volunteers. On the 20th day of May, 1864, at an attack at Burmuda Hundred, made on General Butler's lines by the rebels, Robinson was wounded very severely in the leg by a canister shot. He was sent to Douglas Hospital in this city, where he lay nearly a year undergoing great suffering from his wound. On the memorable 14th day of April, 1865, although his wound was not then entirely healed, he was detailed from the hospital to act as nurse to Mr. Seward, the Secretary of State, who, it will be remembered, was confined to his bed by serious injuries—a broken arm and jaw. At 10 o'clock that night Robinson was on duty in Mr. Seward's room, when the assassin, Payne, sought that room to murder the feeble, wounded, helpless Secretary, in pursuance of the great conspiracy which ended with filling the whole civilized world with horror. The Secretary was sleeping; the room was darkened. Robinson hearing a disturbance in the hall opened the door; a flood of light streamed on him from the hall. On the threshold stood the athletic assassin, a revolver in one hand and a huge bowie knife in the other. He saw against the wall the wounded, crazed Assistant Secretary, with blood pouring from his wound. He caught the gleam of that terrible knife aimed at his throat; instinctively he struck up at the assassin's arm to ward off the knife, partially succeeded, but received the blow upon his head, and was prostrated to the floor. Bounding over him, Payne rushed on to the bed, and commenced wildly striking with the knife at the throat of the Secretary. Already he had cut the flesh off from one cheek to the bone, and the blood gushed in torrents over the pillow. This soldier, just from the hospital, with his wounded leg not yet healed, enfeebled from his year of suffering and pain, just prostrated to the floor by a blow

from that terrible knife, springs to his feet, and without one moment's hesitation, without one moment's thought for himself, save, as he swears, the thought that he must die to save the Secretary; without a weapon of any description, with a bravery never surpassed in the annals of any country, he opposed his naked hands, his wounded and enfeebled body, to the terrible knife of the gigantic and desperate murderer. He seized the assassin just as the deadly knife was about to bury itself in the throat of the Secretary, and then commenced an unequal struggle which seemingly can only end in the death of the brave soldier. Having succeeded in dragging Payne from off the bed, he receives over his shoulder two deep wounds down his back, inflicting injuries from which one side of his face and two fingers of one hand are still partially paralyzed. He received two more wounds under his left shoulder blade, which proved nearly fatal, and received blows about the head and face from the revolver. At last Payne, probably becoming alarmed for his own safety should he spend more time in the house, wrenched himself loose and fled, stabbing a messenger from the State Department on his way down stairs. Disregarding his own desperate wounds, the blood from which was filling his shoes, with the help of Mr. Seward's daughter Robinson placed the insensible and mangled form of the Secretary on the bed from which he had fallen, and re-covering the gashed cheek with its flesh, he placed his fingers on the wounded artery from which Mr. Seward's life was fast passing, and with the same coolness, the same utter self-abandonment, he kept his position, though scarcely able to stand, and believing himself fatally wounded, until relieved by the arrival of the Surgeon General. After the Secretary's wounds were dressed his own were attended to, and he was the same night carried back to the hospital.

On the 17th day of May following Robinson was honorably discharged from the service. Finding himself unable to labor on a farm, by reason of his wounds, he was obliged to sell his little place for some $1,200, and sought employment as a Government clerk. He is now a clerk in the Quartermaster General's Department, at a salary of $1,200 per year, and has no other means of supporting himself, his wife, and boy, except a pension of $8 per month for wounds received on the field of battle. Robinson is a modest man, of excellent character, and a faithful and efficient clerk.

The committee unanimously recommend the passage of the accompanying joint resolution.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 34.

JOHN E. HAGERTY.

[To accompany H. Res. No. 503.]

FEBRUARY 11, 1871.—Ordered to be printed.

Mr. BOYD, from the Committee on the Post Office and Post Roads, made the following

REPORT.

The Committee on the Post Office and Post Roads, to whom was referred the petition of John E. Hagerty, of St. Louis, report:

That on July 1, 1870, he commenced to carry the United States mails between East St. Louis, in the State of Illinois, and St. Louis, in the State of Missouri, at the rate of $4,858 per annum; that the service then required but three wagons to do all the work, and but this number had been used by his predecessor, who had been carrying the said mails for the period of about four years, and had been able to do all the service with three wagons, for which he received pay at the rate of $5,200 per annum. Since the petitioner undertook the service the number of railroad connections has been so largely increased that the service has been unexpectedly and very largely increased, so that seven teams are now needed to do the work formerly done by three. The ferries, also, have raised their tolls 30 per cent., and the St. Louis postmaster reports the service increased 50 per cent. since the present contractor assumed the work. The petitioner shows an actual outlay of near ten thousand dollars per annum for a service for which he receives less than five thousand dollars. Under the law the Postmaster General cannot increase his pay; and he will soon suspend, from inability to sustain the loss if not relieved. He will lose about five thousand dollars if the present resolution is not passed; and the Government will be enabled to get a more favorable contract if advertised for now than if further delayed, or if the Department were allowed to increase the pay in proportion to the actual increase of service performed.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 35.

GOVERNMENT FOR THE DISTRICT OF COLUMBIA.

FEBRUARY 15, 1871.—Ordered to be printed.

Mr. COOK, from the committee of conference on the part of the House, made the following

REPORT.

[To accompany bill S. No. 594.]

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House of Representatives to the bill (S. 594) to provide a government for the District of Columbia, having met, after full and free conference, have agreed to recommend, and do recommend, to their respective Houses as follows:

That the Senate recede from its vote of non-concurrence and agree to the amendment proposed by the House of Representatives, with the following amendments, to wit:

In section 1, line 6, after the word "Columbia," insert "by which name it is hereby constituted a body corporate for municipal purposes, and may contract and be contracted with, sue and be sued, plead and be impleaded, have a seal, and exercise all other powers of a municipal corporation not inconsistent with the Constitution and laws of the United States and the provisions of this act."

In section 2, line 1, strike out the word "reside," and in lieu thereof insert the words "shall have resided." In line 8, in the same section, after the word "district," insert the words "twelve months before his appointment."

In section 3, line 12, after the word "reconsidered," strike out the word "and."

In section 4, line 23, after the word "the," strike out the word "officers," and in lieu thereof insert the word "offices."

In section 5, line 5, after the word "members," insert "of whom two shall be residents of the city of Georgetown, and two residents of the county outside of the cities of Washington and Georgetown."

In the same section, line 18, strike out the words "qualified voters," and substitute in place thereof the word "population."

In the same section strike out all after the word "respectively," in line 21, as far as and including the word "that," line 30, and in place thereof insert: "For the purposes of the first election to be held under this act, the governor and judges of the supreme court of the District of Columbia shall designate the districts for members of the house of delegates, appoint a board of registration, and persons to superintend the election and the returns thereof, prescribe the time, places, and manner of conducting such election, and make all needful rules and regulations for carrying into effect the provisions of this act not otherwise herein provided for: *Provided*, That the first election shall be held

within sixty days from the passage of this act. In the first and all subsequent elections the three persons having the highest number of legal votes for the house of delegates, respectively, shall be declared by the governor duly elected members of said house."

After section 5 insert, as a new section:

"*And be it further enacted*, That the legislative assembly shall have power to divide that portion of the District not included in the corporate limits of Washington and Georgetown into townships, not exceeding three, and create township officers, and prescribe the duties thereof; but all township officers shall be elected by the people of the townships respectively."

In section 6, line 3, strike out the word "twelve," and substitute in lieu thereof the word "three."

In line 4 of said section 6 strike out the words "first election," and substitute in place thereof, "passage of this act."

In line 8 of the same section strike out the words "prior to," and substitute in place thereof, "immediately preceding."

In line 9 of the same section, after the word "District," insert "and for all subsequent elections twelve months' prior residence shall be required to constitute a voter."

In section 7, line 5, after the word "over," insert "upon final judgment duly recovered."

In section 9, line 20, strike out the word "provided," and substitute in lieu thereof the word "punished."

In section 13, line 7, after the word "elected," insert "or appointed," and after the word "house," insert "as herein provided." In line 19 of the same section, after the word "law," insert "in at least two newspapers in the District."

In line 21 of the same section, strike out the words "at the time," and substitute in lieu thereof "in the act."

In section 16, line 2, strike out the words "local or."

In section 21, line 10, after the word "other," add "nor shall said cities, or either of them, be taxed for the exclusive benefit of the county outside of the limits thereof: *Provided*, That the legislative assembly may make appropriations for the repair of roads, or for the construction or repair of bridges outside the limits of said cities."

Strike out all of section 24, after the word "District," in line 7 of said section.

After section 24, insert as a new section:

"*And be it further enacted*, That there shall be appointed by the President of the United States, by and with the advice and consent of the Senate, a board of health for said District, to consist of five persons, whose duty it shall be to declare what shall be deemed nuisances injurious to health, and to provide for the removal thereof; to make and enforce regulations to prevent domestic animals from running at large in the cities of Washington and Georgetown; to prevent the sale of unwholesome food in said cities; and to perform such other duties as shall be imposed upon said board by the legislative assembly."

In section 25, after the word "of," in line 2, insert "register of wills, recorder of deeds."

At the end of section 26 add the following proviso: "*Provided*, That the powers of corporations so created shall be limited to the District of Columbia."

In section 29, line 2, strike out the words "police judge or judges," and substitute in place thereof "other officers." In the same section, after the words "take," in line 4, insert the words "and subscribe," and after

the word "take," in line 16, insert the words "and subscribe," and in line 23, after the word "taken," insert the words "and subscribed."

In section 32, after the word "Columbia," in line 4, insert "and shall have the qualifications of a voter," and in line 9 of the same section, after the word "representatives," insert "and shall also be a member of the Committee for the District of Columbia."

Strike out all of section 34.

In section 35, strike out from the word "all," in line 2, to the word "belonging," in line 3, and substitute in place thereof the words "real estate." Strike out all of line 5 and line 6 in said section 35, as far and including the word "schedules," and insert "and the grounds which have been dedicated to the public parks and squares."

In line 6 of the same section strike out the word "two," and substitute in lieu thereof the word "five." In the same section strike out all after the word "taken," in line 10, as far as and including the word "aforesaid," in line 12, and insert "and the aggregate of the valuation of private property in said District, whenever made by the authority of the legislative assembly, shall be reported to Congress by the governor."

Strike out all of section 35 after the word "appoint," in line 15, and substitute in place thereof "and under such regulations as he shall prescribe."

Strike out all of section 36.

In section 37, strike out the word "two" in line 3, and substitute in place thereof the word "four."

Strike out all after the word "therein," in line 8, as far as and including the "President," in line 12, and in place thereof insert "one of said board shall be a citizen and resident of Georgetown, and one of said board shall be a citizen and resident of the county outside of the cities of Washington and Georgetown."

In line 14, strike out the words "for misbehavior," and substitute in lieu thereof "by the President of the United States."

In line 15, strike out the word "ordinances," and substitute in place thereof the word "regulations."

In line 16, strike out the words "relating to," and substitute in place thereof the words "for keeping in repair," and after the word "avenues," in the same line, insert the word "alleys."

In line 19, strike out the words "received and," and after the word "disburse" insert the words "upon their warrant."

In line 20, after the words "United States," insert "in the District of Columbia," and after the words "property holders," insert the words "in pursuance of law."

In line 21, after the word "avenues," insert the word "alleys," and after the word "sewers," insert "and roads and bridges."

In line 22, strike out the words "and collect;" also strike out the words "they shall prescribe from," and substitute in place thereof the words "shall be prescribed by law upon."

In line 23, strike out the words "owners of any;" also strike out the word "speedily," and substitute in place thereof the word "specially."

In line 26, after the word "cost," insert "which sum shall be collected as all other taxes are collected."

In line 29, after the word "assembly," insert "all contracts made by the said board of public works shall be in writing, and shall be signed by the parties making the same, and a copy thereof shall be filed in the office of the secretary of the District; and the said board of public works shall have no power to make contracts to bind said District to the payment of any sums of money, except in pursuance of appropria-

tions made by law, and not until such appropriations shall have been made. All contracts made by said board in which any member of said board shall be personally interested shall be void, and no payment shall be made thereon by said District, or any officers thereof."

After the word "District," line 26, section 40 add: "*Provided*, That the charters of said cities severally, and the powers of said levy court, shall be continued for the following purposes, to wit: For the collection of all sums of money due to said cities, respectively, or to said levy court; for the enforcement of all contracts made by said cities, respectively, or by said levy court; and all taxes heretofore assessed remaining unpaid for the collection of all just claims against said cities, respectively, or against said levy court; for the enforcement of all legal contracts against said cities, respectively, or against said levy court, until the affairs of said cities, respectively, and of said levy court, shall have been fully closed; and no suit in favor of or against said corporations, or either of them, shall abate by reason of the passage of this act, but the same shall be prosecuted to final judgment, as if this act had not been passed."

Also add:

"SECTION 41. *And be it further enacted*, That there shall be no election holden for mayor or members of the common council of the city of Georgetown prior to the first day of June, eighteen hundred and seventy-one, but the present mayor and common council of said city shall hold their offices until said first day of June next. No taxes for general purposes shall hereafter be assessed by the municipal authorities of the cities of Washington and Georgetown, or by said levy court. And upon the repeal of the charters of the cities of Washington and Georgetown, the District of Columbia be, and is hereby, declared to be the successor of said corporations, and all the property of said corporations, and of the county of Washington, shall become vested in the said District of Columbia. All fines, penalties, costs, and forfeitures which are now by law made payable to said cities, respectively, or said levy court, shall be paid to said District of Columbia, and the salaries of the judge and clerk of the police court, the compensation of the deputy clerk and bailiff of said police court, and of the marshal of the District of Columbia shall be paid by said District: *Provided*, That the moneys collected upon the judgments of said police court, or so much thereof as may be necessary, shall be applied to the payment of the salaries of the judge and other officers of said court, and to the payment of the necessary expenses thereof, and any surplus remaining after paying the salaries, compensations, and expenses aforesaid shall be paid into the treasury of the District at the end of every quarter."

And the committee further recommend that the House agree to the amendments to the House amendment herein proposed.

J. W. PATTERSON,
H. HAMLIN,
Managers on the part of the Senate.
BURTON C. COOK,

D. W. VOORHEES,
Managers on the part of the House.

O

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 36.

PUBLIC HIGHWAYS IN THE DISTRICT OF COLUMBIA.

[To accompany H. R. No. 3048.]

FEBRUARY 16, 1871.—Ordered to be printed.

Mr. STONE, from the Committee on the District of Columbia, made the following

REPORT.

In obedience to the order of the House of Representatives passed December 15, 1870, in the following words:

Resolved, That the Committee for the District of Columbia be instructed to inquire whether the charters of the Washington and Rockville Turnpike Company and the Columbia Turnpike Roads Company have not been forfeited by wilful neglect and non-compliance with the terms thereof, with leave to report by bill or otherwise—

the committee after giving due notice to the persons interested, taking testimony, and hearing those interested, now respectfully report:

That there are two turnpike roads leading out of the city of Washington against which complaints have been made—one generally called the Bladensburg turnpike road, which leads from the city limits toward the village of Bladensburg, and the other generally called Seventh-street road, leading from the city limits toward Brookville, in Montgomery County, Maryland.

The first of these roads was incorporated by act of Congress passed April 20, 1810, (2 Stat. at Large, page 570,) and was intended to connect, and did in fact connect with a turnpike road incorporated by the State of Maryland, leading from the District line to the city of Baltimore. It is apparent that the only object of the incorporation of this road within the District was to establish a good road between the cities of Washington and Baltimore, this being before the establishment of railroads. It appears, however, that some years ago, and after the opening of the railroad between Baltimore and Washington, the turnpike company incorporated by the State of Maryland suffered their road in the State to become out of the order required by their charter, and upon complaint made, the State ordered legal proceedings against the company, and after years of litigation the charter was finally declared forfeited by the courts of Maryland. This action of Maryland left this turnpike within the District, about two and a half miles long, leading from the city to the District line, standing a useless link of a broken chain. As to the question whether this road has complied with its charter, we think there can be no doubt from the evidence brought before us. The charter requires the road to be made and kept "at least twenty-four feet in width of stone, gravel, or other hard substance of sufficient depth or thickness to secure a solid and firm road." The evidence is conclusive and overwhelming that this road has not complied with these requisites of its charter; but, on the contrary, is at no time of the year in the order imperatively demanded as the condition of its corporate existence, and at some seasons is almost impassable, and this in the face of the fact that it pays large dividends, and is therefore without a

shadow of excuse for its condition. In fact, the company hires out the road to the toll-gatherer for a thousand dollars a year for this two and a half miles of road. With regard to the Seventh-street road the case is somewhat different. It connects with the Brookville turnpike road, leading some twenty or more miles into Montgomery County, and although the testimony shows the road is not in the condition required by the charter, yet it also appears, from the testimony, that the company have applied the whole earnings upon the road, and have declared no dividends since 1866. But still the fact is very apparent from the whole of the testimony that the road does not come up to the requirements of the charter.

But while your committee are clearly of the opinion that these roads have not complied with the law of their creation, they are equally clear in their opinion that the judicial and not the legislative department of the Government is the proper tribunal to decide the question whether a corporation has forfeited its charter. No precedent can be found of "the legislature" undertaking to forfeit a charter, and such a course would, in our opinion, be a most unwarrantable exercise of forbidden power.

The power of the legislature is, however, ample in the premises. It has the undoubted right to *condemn* the franchise of a corporation as well as the property of an individual, whenever the public good may require. This question has been fully considered and settled by the Supreme Court of the United States, who have decided that the property and *franchises* of a corporation may be condemned in the same manner as the property of an individual, whenever the public good may require, and that the legislature is the sole judge of the necessity and expediency of such condemnation, subject only to the constitutional restraint of making *just compensation* therefor. (West River Bridge Co. *vs.* Der and al., 6th Howard.)

It has been shown that legal proceedings have been commenced to forfeit the charter of these companies, and it is urged in argument that the legislature should not interfere. This, in the view we take of the matter, is not the true issue. The truesubject for Congress to consider is whether the *public good* requires the condemnation of these roads, the right to do so being clear.

Are the facts presented sufficient to authorize the determination that the *public good* requires the condemnation of these roads? We think they are sufficient and that it is manifestly the duty of the legislature to interfere. The proceedings at law to annul these charters may last many years and in the mean time the people must suffer great and continued inconvenience.

If these roads were in the most perfect condition required by their charter, the public good, we think, would require their abolition. One of them, the Bladensburg road, has its gate about fifty feet from the city limits, and is a tax upon all ingress and egress to and from the city in that direction. This gate lies between the city of Washington and the largest and only Catholic cemetery of the city, and toll is collected from every funeral procession when on its way to the grave. Every market gardener and small farmer bringing the products of his labor to the city over this road is taxed for it. It is in truth a tax upon their labor.

It is manifestly unjust to deprive the people whose business leads them to or from the city over these roads of the benefits of the free ingress and egress which is enjoyed by the people on other roads. It seems to us a self-evident proposition that the interest of the city requires that facilities of egress and ingress should be as free as possible.

But when, in addition to these reasons, we add the fact that the road is in a bad condition and that the travel over it gets no true value for their tolls, we think the clearest case is presented for immediate action on the part of Congress.

As to the Seventh-street road the facts are somewhat different, but the conclusions we reach are the same.

This road does connect with a good turnpike road, and is the main avenue of travel from Montgomery County into the city. The company have shown that for years past they have expended all their earnings upon the road; and as the evidence shows that the road is not in condition required by its charter, therefore the just conclusion is that the company are not able to furnish the community with such a road as the necessities of the travel demand and their charter requires; it seems but just and reasonable that the road should be taken out of their hands and placed in the hands of those who can keep it in order.

We therefore recommend that both these roads be immediately condemned and made free public highways; that the damages be assessed in the usual manner, and as the city of Washington will be principally benefited, that the expense of such assessment be borne by the city and county of Washington somewhat in the proportion to the population and property of each, and herewith report a bill to carry out these provisions.

WASHINGTON, D. C., *January* 14, 1871.

The committee met; Mr. Muzzy appeared for the objectors and Mr. Temple for the turnpike company.

Mr. MUZZY stated that the objectors complained of the violation of the charter granted to the turnpike company, dated April 25, 1810, which required the company to cause at least twenty-four feet in breadth throughout the whole length of the road to be made an artificial road of stone, gravel, or other hard substance, of sufficient depth and thickness to secure a solid and firm road, and to be so nearly level that it should in no case rise or fall more than at an angle of four degrees from a horizontal line, and required the road to be kept in good and perfect repair, and bridges to be built of sound and suitable materials. The objectors complained that it was not an artificial road of twenty-four feet in width throughout the whole length; that it was not made of stone, gravel, or other hard substance, but that in places it was made of mud and sand. They complained that it was not level; that it was not kept in good repair; and that the bridges were not built of sound and suitable materials.

The objectors also alleged violation of the charter in the 12th section of it, which provides that whenever the net proceeds of tolls collected shall amount to a sum sufficient to reimburse the capital expended in the purchase of the land and the making of the road, with 12 per cent. per annum thereon, the road shall become free and toll shall no longer be collected on it, and provides that the company shall annually make returns to the circuit court of the District of Columbia of the amount of tolls collected. These returns had not been made for the last ten years and more.

Mr. STONE. I understand your objection to be, first, that the company has not complied with the terms of the charter in keeping the road of the prescribed width or in making it of the prescribed materials?

Mr. MUZZY. Yes, sir.

Mr. STONE. And, secondly, that the company has not complied with the terms of the charter in neglecting to return to the circuit court of the District of Columbia a statement of the amount of tolls received and of the expenses?

Mr. MUZZY. Yes, sir. The first objection is that the road is not made and kept in repair according to the terms of the charter; and the second, that the company has not made returns to the court according to the terms of the charter.

Mr. MCKENZIE. The charter is too long in operation to take up now the question of the manner in which the road was built; the committee must confine its inquiry to whether the road is now in good condition. It is not worth while to go back 50 or 60 years to find if the road was originally built right.

shadow of excuse for its condition. In fact, the company hires out the road to the toll-gatherer for a thousand dollars a year for this two and a half miles of road. With regard to the Seventh-street road the case is somewhat different. It connects with the Brookville turnpike road, leading some twenty or more miles into Montgomery County, and although the testimony shows the road is not in the condition required by the charter, yet it also appears, from the testimony, that the company have applied the whole earnings upon the road, and have declared no dividends since 1866. But still the fact is very apparent from the whole of the testimony that the road does not come up to the requirements of the charter.

But while your committee are clearly of the opinion that these roads have not complied with the law of their creation, they are equally clear in their opinion that the judicial and not the legislative department of the Government is the proper tribunal to decide the question whether a corporation has forfeited its charter. No precedent can be found of "the legislature" undertaking to forfeit a charter, and such a course would, in our opinion, be a most unwarrantable exercise of forbidden power.

The power of the legislature is, however, ample in the premises. It has the undoubted right to *condemn* the franchise of a corporation as well as the property of an individual, whenever the public good may require. This question has been fully considered and settled by the Supreme Court of the United States, who have decided that the property and *franchises* of a corporation may be condemned in the same manner as the property of an individual, whenever the public good may require, and that the legislature is the sole judge of the necessity and expediency of such condemnation, subject only to the constitutional restraint of making *just compensation* therefor. (West River Bridge Co. *vs.* Der and al., 6th Howard.)

It has been shown that legal proceedings have been commenced to forfeit the charter of these companies, and it is urged in argument that the legislature should not interfere. This, in the view we take of the matter, is not the true issue. The truesubject for Congress to consider is whether the *public good* requires the condemnation of these roads, the right to do so being clear.

Are the facts presented sufficient to authorize the determination that the *public good* requires the condemnation of these roads? We think they are sufficient and that it is manifestly the duty of the legislature to interfere. The proceedings at law to annul these charters may last many years and in the mean time the people must suffer great and continued inconvenience.

If these roads were in the most perfect condition required by their charter, the public good, we think, would require their abolition. One of them, the Bladensburg road, has its gate about fifty feet from the city limits, and is a tax upon all ingress and egress to and from the city in that direction. This gate lies between the city of Washington and the largest and only Catholic cemetery of the city, and toll is collected from every funeral procession when on its way to the grave. Every market gardener and small farmer bringing the products of his labor to the city over this road is taxed for it. It is in truth a tax upon their labor.

It is manifestly unjust to deprive the people whose business leads them to or from the city over these roads of the benefits of the free ingress and egress which is enjoyed by the people on other roads. It seems to us a self-evident proposition that the interest of the city requires that facilities of egress and ingress should be as free as possible.

But when, in addition to these reasons, we add the fact that the road is in a bad condition and that the travel over it gets no true value for their tolls, we think the clearest case is presented for immediate action on the part of Congress.

As to the Seventh-street road the facts are somewhat different, but the conclusions we reach are the same.

This road does connect with a good turnpike road, and is the main avenue of travel from Montgomery County into the city. The company have shown that for years past they have expended all their earnings upon the road; and as the evidence shows that the road is not in condition required by its charter, therefore the just conclusion is that the company are not able to furnish the community with such a road as the necessities of the travel demand and their charter requires; it seems but just and reasonable that the road should be taken out of their hands and placed in the hands of those who can keep it in order.

We therefore recommend that both these roads be immediately condemned and made free public highways; that the damages be assessed in the usual manner, and as the city of Washington will be principally benefited, that the expense of such assessment be borne by the city and county of Washington somewhat in the proportion to the population and property of each, and herewith report a bill to carry out these provisions.

WASHINGTON, D. C., *January* 14, 1871.

The committee met; Mr. Muzzy appeared for the objectors and Mr. Temple for the turnpike company.

Mr. MUZZY stated that the objectors complained of the violation of the charter granted to the turnpike company, dated April 25, 1810, which required the company to cause at least twenty-four feet in breadth throughout the whole length of the road to be made an artificial road of stone, gravel, or other hard substance, of sufficient depth and thickness to secure a solid and firm road, and to be so nearly level that it should in no case rise or fall more than at an angle of four degrees from a horizontal line, and required the road to be kept in good and perfect repair, and bridges to be built of sound and suitable materials. The objectors complained that it was not an artificial road of twenty-four feet in width throughout the whole length; that it was not made of stone, gravel, or other hard substance, but that in places it was made of mud and sand. They complained that it was not level; that it was not kept in good repair; and that the bridges were not built of sound and suitable materials.

The objectors also alleged violation of the charter in the 12th section of it, which provides that whenever the net proceeds of tolls collected shall amount to a sum sufficient to reimburse the capital expended in the purchase of the land and the making of the road, with 12 per cent. per annum thereon, the road shall become free and toll shall no longer be collected on it, and provides that the company shall annually make returns to the circuit court of the District of Columbia of the amount of tolls collected. These returns had not been made for the last ten years and more.

Mr. STONE. I understand your objection to be, first, that the company has not complied with the terms of the charter in keeping the road of the prescribed width or in making it of the prescribed materials?

Mr. MUZZY. Yes, sir.

Mr. STONE. And, secondly, that the company has not complied with the terms of the charter in neglecting to return to the circuit court of the District of Columbia a statement of the amount of tolls received and of the expenses?

Mr. MUZZY. Yes, sir. The first objection is that the road is not made and kept in repair according to the terms of the charter; and the second, that the company has not made returns to the court according to the terms of the charter.

Mr. MCKENZIE. The charter is too long in operation to take up now the question of the manner in which the road was built; the committee must confine its inquiry to whether the road is now in good condition. It is not worth while to go back 50 or 60 years to find if the road was originally built right.

CLARK MILLS sworn and examined.

To Mr. MUZZY:

My residence is in the county of Washington, in the District of Columbia; it is about a mile and a half or a mile and three quarters-from the toll-gate at the boundary line on the Bladensburg turnpike road. I purchased the place in 1854, and have resided there ever since.

Question. State whether you have been traveling over the road for the last few years, and what its condition has been?—Answer. I had my attention brought more particularly to the condition of the road in 1866, when I started a son of mine in the dairy business on a farm. The road became so bad at one time that it required two horses to do the work of one, and finally it became so impassable that teams had to leave the turnpike altogether and go through the fields on Mr. Hickey's farm.

Q. Were any efforts made to repair the road at that time?—A. No, sir; no efforts whatever. I went myself to the president of the road, Dr. Gunton, and stated the case to him. He said he could do nothing; that he had rented the road to Mr. Benson, the toll-gate keeper, and that Mr. Benson had obligated himself to keep the road in thorough repair. I then went to Mr. Benson and he used rather insulting language to me, saying that a man must be a fool to come to him at that time of the year to repair a road. I told him that he should repair it when he could repair it. That was in the latter part of January, 1866. There had been a severe freeze, and the frost had come out of the ground suddenly and had left the road in such a spongy condition that the wheels would go down to the axles and frequently get stalled. The road is far from having a solid bed now. It is a good road perhaps in the summer and in the dry seasons of the year, but at other seasons of the year it is impassable.

Q. How is it now?—A. It is not so bad now. When the ground freezes deeply, and then a thaw comes, the clay bottom becomes spongy and the wheels cut right down into it.

By Mr. MCKENZIE:

Q. It is not covered with rock?—A. No, sir. There never has been more than eight feet wide of it graveled. This information I have from a gentleman who stated that eight feet wide of gravel was sufficient, as the wheels would scatter it over. My attention was called to it the other day to examine the road in its present condition. I suppose that in the best parts of the road there is but from ten to fifteen feet of gravel bed; get outside of that and you are in clay bottom again. The charter requires twenty-four feet of gravel bed. I investigated the subject three years ago when the trouble was so great about the road. I hunted up the law and went to the president of the road and said, "All we want is a good road; we want such a road that our farmers can take their produce over it to market in any weather," because when our lands will not allow plowing or cultivation we send teams with produce to market.

By Mr. MUZZY:

Q. What is the condition of the bridges on the line of road; how wide are they; are they twenty-four feet?—A. No, sir; they are not. I never measured them. One of the bridges gave way in my time, and we had to go for many months through the fields before the bridge was rebuilt in consequence of the cobble-stone being washed out.

By Mr. MCKENZIE:

Q. You say that the company rents out the road to the toll-gate keeper?—A. Yes. I was told the other day by the toll-gate keeper that, if we wanted to pass over the road free, the best way was to go to Congress and ask Congress to buy it up. I said that the trouble about that was that the road was offered for $10,000, and that Congress objected that it would not buy a road which had not complied with its charter.

By Mr. STONE:

Q. What are the tolls on the road?—A. My toll now is, by the year, about $30 a year.

Q. That is for anything you wish to send?—A. Yes.

Q. You do not know the tolls by the single vehicle?—A. They are prescribed in the charter.

Q. What is the length of the road?—A. About two and a quarter miles is all that the company pretends to own.

C. M. ALEXANDER sworn and examined.

To Mr. MUZZY:

I own a place very near the Bladensburg turnpike road, and in reaching it I have to travel on that road for about three-fourths of a mile. I live near Mount Olivet cemetery. In the spring of 1866 the road was in an impassable condition. In going to the city we were compelled to travel through the adjacent fields. At that time I had oc-

casion, through some of the papers, to call attention to the inhuman manner in which the corpses going to the cemetery were jolted and jostled. I think that during that spring there was no toll charged. I do not think there was any toll-gate keeper there at all. Everything was free there for several months, while the road was in that condition. As to the width of the road, I have frequently had occasion to measure it by my step, and my own judgment is, that the road is not over twenty-one feet wide in any place. From the toll-gate, on toward Mount Olivet cemetery, the road varies from eighteen feet wide, from bank to bank, to twenty-one feet. My father, who lived with me, had his finger broken by having his buggy upset, from not being able to pass a team on the road.

By Mr. STONE:

Question. How much of that eighteen or twenty-one feet is gravel road?—Answer. It is difficult to determine. I should suppose that there had been a little gravel thrown on the center of the road, and that it had been dispersed toward the sides. As you get to the sides of the road the gravel gradually decreases, but it is not deep enough in any place to stand the frost, or prevent the road being cut through by the wheels when the rains come.

By Mr. MUZZY:

Q. Are there ruts in the road, or is the road smooth and level?—A. The road is not what we would call smooth or level; it is what you might call a very ordinary, common country road.

Q. How much repairing is put on the road annually, on that part of it which you travel over?—A. I can hardly estimate that. I have sold the company gravel to the amount of about twenty-four dollars, and I think they may have put twenty-five or thirty dollars' worth of repairs on the road. They bought gravel from me, and I think they bought it nowhere else. The gravel which they got in other parts was clay and gravel mixed.

Q. Has there been any macadamizing put on the road since you have been there?—A. No, sir, except to fill up a hole now and then. They would put it in the center, about six or eight feet, and then, as the outside became impassable, wagons would drive on this and spread the gravel.

Q. Is it possible for two wagons to pass each other abreast on the graveled part of the road?—A. No, sir, it is not possible.

Q. How is it about two loads of hay passing each other?—A. They could not do it on the road proper.

Q. How about the bridges—can two vehicles pass on the bridges?—A. There are but two bridges on the road. Two loads of hay cannot pass on the bridges; but two vehicles can pass, by one vehicle making room for the other. The difficulty in driving to Mount Olivet Cemetery is, that funeral processions take the center of the road, and every gentleman passing up the road is compelled to join in the procession for about half a mile, not being able to pass.

By Mr. STONE:

Question. Is that a large cemetery?—Answer. Yes; it is the cemetery where all the Catholics in the city are buried. I presume the interments average from three to five a day.

Q. Is that the only road to get there?—A. It is the only road to the cemetery.

Mr. MUZZY stated that the interments at Mount Olivet Cemetery, from June 1, 1868, to December 31, 1868, were 578; the interments for 1869, 649; and the interments for 1870, 674.

Q. How far is it from the toll-gate to the cemetery?—A. Between half and three-quarters of a mile.

Q. Has the road been in the condition which you have spoken of every winter?—A. Not in as bad condition as it was during that season. It depends upon whether the weather is cold or wet. If we have a rainy season, the road is impassable; and if we have a cold spell, when the frost comes out of the ground, the road becomes impassable.

By Mr. MCKENZIE:

Question. Do you know how long the road has been rented to the toll-gate keeper?—Answer. I do not know. He has been renting it, I think, since I went there, which was in 1865.

By Mr. STONE:

Question. Have they bought all the gravel that was used on the road from you?—Answer. Yes, so far as I know. They have taken some from the banks outside, but it was a mixture of gravel and clay. I do not know of any pure gravel that they bought, except from me.

THOMAS PETER sworn and examined.

To Mr. MUZZY:

I live on the line of the Bladensburg road, about a mile and three-quarters from the toll-gate. I have lived there since a year last October. The road has been in a very bad condition for a turnpike road. I have traveled on a good many turnpike roads in Virginia and Maryland.

Question. You have heard that the charter requires the road to be sixty-six feet wide, of which twenty-four feet is to be an artificial road, made of stone, gravel, or other hard substance; how has that requirement been carried out for the mile and three-quarters that you travel over?—Answer. I came over the road this morning. There is about one or two hundred yards of the road at this side of my gate which there is no gravel upon, nor stone. There are ruts of from six to twelve inches depth there this morning. I do not say that all the road is like that, but I say that a hundred yards of it there has not got a bit of gravel on it—nothing but the dirt scraped on each side.

Q. Do you commute your tolls by the year?—A. Yes. When I rented my place out last year, I was to pay one-third of the tolls, and the tenant was to pay two-thirds. I paid $10, and I presume the tenant pays the other two-thirds, which will make $30 in all. The road will be worse than it is now, if rain comes; but there is very little moisture in the ground, and consequently the country roads have not cut up much yet.

By Mr. TEMPLE:

Q. You say that you have been in the habit of passing over the turnpike roads in Virginia and Maryland; were none of them so bad that wheels could not penetrate?—A. I have traveled over the Shenandoah Valley turnpike road and the Northwestern and Western Virginia turnpike roads, away out in the Wilderness, and from Frederick to Hagerstown, and from Hagerstown to Williamsport, and from Rockville to Georgetown, but never found a road so bad as this. I do not say that all the road is like that near my gate. I do not call that a pike at all; I call that a dirt road; there is no gravel at all upon it.

By Mr. STONE:

Q. Do you know anything about the width of the road between the ditches?—A. No, sir.

Q. Can two loaded teams pass?—A. Not on the solid road. In some places they may do it. The road certainly is not twenty-four feet of hard material in all places.

By Mr. MCKENZIE:

Q. You think it a mighty poor road to lead to the seat of the Federal Government?—A. I consider it a disgrace to the United States Government to have such a road close to the city.

ANTON RUPERT sworn and examined.

To Mr. MUZZY:

I live on the line of the Bladensburg turnpike, about three-quarters of a mile from the toll-gate. I am a butcher by trade and drive teams over the road every morning. In 1865 and 1866 I had to go to market every morning, and the road was so deep that the horses sank in it and I had to send back to get more horses to haul them out. That happened not once but several times. Then I had to cut through my place and to take another road.

Question. What is the condition of the road now? Is there twenty-four feet of it in width of stone or gravel?—Answer. There is no stone on it; there is a little gravel on it in some places.

Q. How about two teams passing on the road?—A. Two buggies may pass, but not two hay wagons. I have had many a time to wait behind a hay wagon until we got to the toll-gate before I could pass.

Q. How is the road for hauling heavy loads?—A. Very bad.

By Mr. STONE:

Q. What is its condition now?—A. Tolerably fair. There are some few holes in it, but not many, because we have had no bad spells of weather this season.

Q. How was it last spring?—A. It was tolerable, too. During the time that the road was so bad there was no toll collected, but we who commuted had already paid our tolls for the year. I paid $30 a year.

GEORGE LAUER sworn and examined.

To Mr. MUZZY:

I live on the Bladensburg turnpike road, a little the other side of the Half-Way House, about a mile from the toll-gate. In 1866 there was a part of the road that wagons could not get through. I saw two or three hay wagons lying in it that could

not get out, they never found bottom in it. I never saw the road right, except in the summer, when all roads are good. I measured it the other evening and found it about eighteen feet in some places from one gutter to another. There are some gulleys on the road where, if a wagon were upset, it would be thrown into a ditch six or seven feet deep. There is a big gulley on one side and a small gulley on the other. It is the same way at the Half-Way House. If there are hay wagons on the road, you cannot pass them in some places.

By Mr. STONE:

Question. You say the road has been bad more or less every winter?—Answer. Every time that it gets wet it is bad. Even this morning it is beginning to break up, and if we have one or two days' rain it will be bad again. Even a week's rain during the summer makes it bad and spongy.

WASHINGTON DICKSON sworn and examined.

To Mr. MUZZY:

I live on the line of the Bladensburg turnpike. I lost a horse on that road in 1866. I started from home one morning with a light load, and the horse sank up to the knees in the mud. I took her out of the wagon and got some folks to help me draw the wagon out. I put her in the wagon again and got a little way further, and there again had to take her out. When I got as far as the toll-gate I then had a good road and got safe to market; but when I got back again as far as the blacksmith shop on the turnpike road, I had to take her out of the wagon; she gave out entirely. I started to take her home, but she could not get home, and died that day. I bought her from Mr. Dunn. I gave $65 for her, but would not have taken $100 for her. She was in good condition when I started with her that morning. I live about a mile and a half from the toll-gate, and about half a mile from the road. It is a tolerably good mud road from the turnpike to my house.

C. E. CREECY sworn and examined.

To Mr. MUZZY:

I have to pass Mr. Peter's place to get to my own place. On that portion of the turnpike road there is nothing at all but dirt. Passing there with a horse and carriage I broke down in the middle of the road. I broke the traces and part of the carriage, which cost me four dollars to have repaired. The mud was up to the axles of the carriage. That was last April or May. That was just before you reach the boundary line. I do not think that any stone or gravel has been put on the road, to my recollection.

By Mr. TEMPLE:

Question. Do I understand you to say that there is nothing but mud from Mr. Peter's gate to the end of the road?—Answer. No, sir; I say that as to about a hundred yards of the road. A portion of it has been graveled since then.

Q. Have you ever measured the road?—A. I stepped it over; and in some places it is not more than eighteen or nineteen feet in width; and there are deep gulleys on either side, which, if a horse ran away, or if a buggy were upset into, would endanger life. There is no barrier or fence protecting the road from these gulleys. On the left-hand side, going from the city, and not a quarter of a mile from the boundary line, one of the gulleys is eight or ten feet deep, and the gulley on the other side of the road is about five or six feet.

By Mr. MUZZY:

Q. Is the road twenty-four feet in width, of stone, gravel, or other hard substance, through the entire length of the road?—A. No, sir.

Q. Has it been since you knew it?—A. No, sir.

Q. How long have you traveled over that road?—A. Ten years.

By Mr. MCKENZIE:

Q. How long has it been leased to the toll-gate keeper?—A. I have heard it stated by persons who conversed with Mr. Benson, that he leased it before the war, and still continues to lease it. It is the general belief that they charged toll to all the Army wagons.

Mr. Muzzy put in evidence the following certificate from the clerk of the supreme court of the District of Columbia, which court succeeded in 1863 to the duties and powers of the circuit court of the District of Columbia:

SUPREME COURT OF THE DISTRICT OF COLUMBIA,
Clerk's Office, January 16, 1871.

I hereby certify that I have been clerk of this court since March, 1863.
And I further certify that during the time I have been clerk as aforesaid, the presi-

dent, directors, and company of the Columbia turnpike roads have not annually made returns to this court of the amount of the tolls collected by them and of their necessary expenses, nor have they made any such returns at any time since I have been clerk as aforesaid.

Given under my hand and the seal of this court, at Washington City, D. C., this 16th day of January, A. D. 1871.

[SEAL.] R. J. MEIGS, *Clerk.*

C. M. ALEXANDER recalled.

By Mr. MUZZY:

Question. State whether there is any portion of the road difficult to travel in summer by reason of sand?—Answer. There is a portion of the road bordering on Mr. Peter's farm, which is a deep sandy road, where the sand is sometimes five or six inches deep. It is always difficult for a heavy team to pass over it. This piece extends for two or three hundred yards. I think there is no gravel on it. If there has been any gravel put there it must have been a little put in the center; but I do not think there is any gravel there. It is a heavy sand road, such as they have in many parts of Maryland.

Q. How long have you noticed it in that way?—A. For the last five or six years—since I have been traveling over the road.

C. E. CREECY recalled.

By Mr. MUZZY:

Question. You have heard what Mr. Alexander has stated about a portion of this road being covered with sand. State what you know on that point?—Answer. That portion of the road lies between Mr. Rives's and Mr. Clark Mills's, and borders on Mr. Peter's farm. In the summer time it is the worst part of the whole road. It is tolerably good in the winter time. That sandy portion covers, I should think, one hundred and fifty or two hundred yards. The sand there is generally three or four inches deep. It is not covered with gravel or stone.

Q. How long has it been in that condition?—A. Ever since I have been traveling over it. I have never known it to be different. That is eight or nine years. I think they have got a little gravel now on the sandy portion.

WILLIAM FORSYTH sworn and examined.

To Mr. CREECY:

I am a surveyor by profession. I have made this survey now presented to me. I went out there by special request and made that little sketch of the road. It is a true sketch of the road.

(The sketch was put in evidence.)

To Mr. STONE:

The width of the road at the toll-gate, from fence to fence, is fifty-two and a half feet, I think.

Question. What is the width of the gate?—Answer. Sixteen and a half feet. That space of sixteen and a half feet extends some twenty feet or so from the gate.

By Mr. CREECY:

Q. Did you measure the road a short distance above the gate?—A. I examined the whole road some time ago, but did not make a survey.

Q. What is the width of the road, fifty yards up from the toll-gate, leaving out the gulleys?—A. I am not able to say exactly.

Q. What is the condition of the road generally?—A. Especially from the city boundary to Mount Olivet cemetery it is very bad. In winter time, particularly, it is almost impassable.

Q. Have you ever seen wagons or vehicles stalled there?—A. I have had my own carriage stalled there.

Q. Did you pay toll as you passed through?—A. I generally went out there on funeral excursions, and, of course, toll was charged.

Q. Have you ever seen a funeral stalled there?—A. I have seen hacks mired there very badly.

Q. Is that the largest Catholic cemetery in the district?—A. It is the only one I know of. I laid it out.

By Mr. TEMPLE:

Q. Are funeral processions charged toll for each carriage?—A. I am unable to say. I have passed through from time to time myself and have had to pay toll. I understand that there is an arrangement with the company about funerals.

WASHINGTON, D. C., *January* 18, 1871.

THOMAS M. BENSON sworn and examined.

To Mr. TEMPLE:

I have heard no complaints made in reference to the condition of the Bladensburg turnpike road. All that I have ever heard about it for the last two years has been from Colonel Rives. I had asked him, if he saw anything wrong with the road, to report to me; and at times he would tell me that at such and such places the road was out of order. At the time the colored man lost his horse the road was in as good condition as I ever saw it in; but the horse was actually worn out for the want of something to eat, and he naturally fell down and died. I was instructed by the president of the road to keep an account of the entire amount received for tolls. I kept the account and furnished it to Dr. Gunton. I hire the road from the company by the month. I have hired it for the last six or seven years. Up to about three years since I did the repairs myself; since then they are done by the company. I pay the company $85 a month for the road. During the war I paid $130 a month, and did the repairs. Dr. Gunton gave me $500 toward one repair. Since then, when I got some gravel from Mr. Alexander, he gave me, I think, $250. The year that Dr. Gunton gave me $500 the repairs amounted, I think, to over $1,000. That was in 1865 or 1866. My contract for the road is not for any specified time. I can abandon it whenever I choose. Any trifling repairs that are necessary I attend to. If I found a culvert out of order or a hole in the road I would have it fixed. That was my agreement with the company. I have never known anybody to be injured through being thrown out of a buggy on account of the bad condition of the road. There is another road to Bladensburg known as the old mill road, which strikes Colonel Rives's place three or four hundred yards to the west. There is also another road between that and the turnpike; and there is the Benning's bridge road on the east side of the Eastern Branch. That is a very good road, a little muddy at times. The old Bladensburg road is a nearer way to the Center Market from Colonel Rives's place than the turnpike road. The other is a nearer way to Capitol Hill. There are only nine residences between the railroad and the turnpike. The rates of toll are three cents a horse and three cents a vehicle; but sometimes I only charge people going in and out with a buggy ten cents. The toll-gate is thirty or forty yards from the city boundary line. There is very little travel on the road now, there are so many other roads leading to Bladensburg. If these roads are good people take them so as to save the toll; but if they are bad they come by the turnpike. I have always found the turnpike road better than any of the county roads. The turnpike company has an arrangement with the cemetery company by which only fifty cents is charged for a funeral, no matter what the number of carriages may be. The only difficulty in passing funerals has been at the cemetery gate, where hackmen sometimes block up the road with hacks four or five abreast. When I was a policeman I would go there and make them clear the road; but there is no difficulty along the road. I never heard of any. During the war fifty wagons have gone past in a train, two abreast. The width of the gate is something like sixteen feet. I built it myself, for my own convenience and that of the public. There has been no difficulty or trouble about it, and no one has ever said to me that it was in the way.

Q. Has the company shown any disposition to spend money beyond the limits of the road?—A. Yes, sir; I spent for the company a little over $700 about a mile beyond, out in the county of Prince George. I did that at one time in grading the road, hauling gravel and graveling the road, and cutting down hills. That was in 1866 or 1867. I have since then spent about $90 on a bridge beyond the limit of our road.

By Mr. DAVIDGE:

Question. What were the terms on which you rented the road?—Answer. I was to keep the road in repair, and was to pay $130 a month. When a thorough repair was necessary the company had to attend to it. I was answerable for the ordinary wear and tear of the road. Any extraordinary repairs were to be made by the company. I worked under that contract for three or four years. After the war ceased the toll fell off so that I went to Dr. Gunton and said that I could not afford to pay that price. Then it was reduced to $85, and the company was to do the repairs, except some trifling matters which I would attend to. That new arrangement was made, I think about 1868, and I have been working under it till the present time.

By Mr. TEMPLE:

Question. It is provided in the charter that just and true accounts shall be kept at the toll-gate; did Dr. Gunton explain to you the necessity of keeping the books?—Answer.—Yes.

Q. Did you do it?—A. To the best of my ability.

By Mr. MUZZY:

Question. How much money have you expended last year in repairs on the line of road?—A. I cannot tell.

Q. How many hands were employed on the road during that time?—A. I never kept an acount.

Q. What were the receipts of the road last year?—A. I cannot tell.

Q. How long is the road?—A. It is called three miles.

Q. Is that road, throughout its entire length, graveled for twenty-four feet wide, with gravel or covered with stone?—A. I cannot answer that question. I never took my pick along to try it. As to the gulleys, I went into the ditch the other day and my head was level with the road, and I thought that the depth of the ditch was about my height. There was one place where I could not see the road without stepping up a little. I should judge it to be about seven feet in the deepest part—allowing for the depth of the water. On the other side of the road I measured it with a tape-line, and three feet was the deepest place.

JAMES G. NAYLOR sworn and examined.

To Mr. TEMPLE:

I have been passing on the Bladensburg turnpike road for twenty-five or twenty-seven years. I have been frequently sent by the president of the road to look into its condition. I always thought that the road was as good as any road I traveled on—better than any of the country roads. I traveled the turnpike road from Georgetown to Rockville That road is macadamized, but it is a better road than it. I always hunted for this road when I went out for a pleasure drive. I would rather go on it than on any other road I can get, even in the city. It is better to-day than H street is, from the printing office to the toll-gate, and it is less dangerous. There was a hole on H Street bridge the night before last, which was very dangerous. Sometimes in the spring, when the frost is coming out of the ground, this road would be muddy, but I have always found the road tolerably good throughout its entire length. I do not live on the road, but have always traveled it a good deal. I live in Washington. Dr. Gunton has sent me frequently to look at the road. Twenty or thirty times would not excuse it. I have never had any difficulty in passing over it anywhere. Once during the war it was pretty muddy, but it was the same all over the city. It was muddy almost everywhere that the Army travel was. I had not been over the road for the last two months till the other evening, when I went up as far as the cemetery. It was a very good road then, I thought.

Question. Is there any difficulty in two vehicles passing each other?—Answer. I was sitting in my buggy the other evening at the toll-gate, talking to the keeper; my buggy was a little diagonal, too, three feet from the one side; a hack came up, I suppose at the rate of six miles an hour; when it got close to me I felt a little scared, but it went by and never touched my buggy or the other side. I think the toll-gate is about 16 feet wide.

By Mr. MUZZY:

Q. Do you know whether that road, throughout its entire length, is sixty-six feet wide?—A. I do not know.

Q. Do you know whether, throughout its entire length, there is twenty-four feet of artificial road, of stone, gravel, or other hard substance?—A. I cannot answer that question as knowing it.

Q. Do you know whether it is of stone, gravel, or other hard substance, of sufficient depth or thickness to secure a firm, hard road, with surface as smooth as the materials will admit?—A. I cannot answer that question. All the examination I ever made of the road was from general observation.

Q. You know nothing of the dimensions of the road, nor whether the company has complied with the requirements of the charter in adhering to those dimensions?—A. I do not know anything about it.

PATRICK CROWLEY sworn and examined.

By Mr. TEMPLE:

I have known the Bladensburg turnpike road since 1811. I was at the making of it when I was a boy. Whenever I went over it I always found it in good condition, except in the spring, when you will find ruts cut in it as in all turnpikes. I always found it better than half the turnpikes, and better than our own streets in the city. I have been a contractor of turnpikes and railroads for forty years. I was on the Bladensburg turnpike on the 8th of December last. It was then what we call first-rate. It was in good traveling order. I did not see a rut in the whole of it. I cannot see why our friends are making so much fuss about this pike, if they look at our own streets.

By Mr. MUZZY:

Q. Was this turnpike laid out on the old county road?—A. Part of it was. From the toll-gate to the cemetery it was all new. The old road was about 200 feet to the left of it.

Q. Is the road sixty-six feet in width throughout its entire length?—A. I did not measure it.

Q. Is there twenty-four feet of artificial road, made of gravel, stone, or other hard substance?—A. I consider it so.

Q. How deep is the gravel?—A. I do not know.

Q. Do you know whether any part of that road has sand on it?—A. Yes, sir; at Calvert's hog-pen there is nothing but sand; but I think that part is graveled.

A. I believe you have been a contractor for building roads?—A. Yes.

A. In building a turnpike what depth of gravel or stone do you put on the road to make it in first-rate order?—A. On a macadamized road we put twelve inches on the center, and ten in the sides, twelve feet wide. Then we have on one side a summer road and in some places two.

Q. You were contractor for building a road in Montgomery County some time ago?—A. Yes, sir; to Brookville.

Q. What is the cost per mile of building it?—A. Two thousand five hundred dollars a mile. It is twenty-four feet wide. The macadamized part is twelve feet wide, the gravel being twelve inches in the center and nine on the sides.

Q. What is your idea about the proper depth of gravel or stone on a pike twenty-four feet wide, which is to be covered with stone or gravel?—A. I should think about twelve inches in the center.

Q. Is this Bladensburg road that depth?—A. I do not know that. I only spoke of how solid the road was when I traveled over it on the 8th of December.

Q. Was there any road in the county, then, which you could not travel over nicely?—A. Yes; there was a turnpike out on Seventh street, part of which I could not travel over.

By Mr. TEMPLE:

Q. You say that the Brookville road cost $2,500 a mile Was that for the grading?—A.—For the grading, stone, and all. Some of it cost $3,500 a mile. Some of it was sub-let at $1,800.

By Mr. MUZZY:

Q. Have you not contracted to build a road up there this year for $2,500 a mile?—A. Yes.

Q. Have you sub-let for less than that?—A. Yes, sir; I sub-let it for $1,800. That road is twenty-four feet wide, with twelve inches on the center and ten on the side of macadamized road, and one good summer road.

JOSEPH J. MORGAN sworn and examined.

To Mr. TEMPLE:

I am a member of the police force. I have passed over the Bladensburg turnpike daily since I was a boy. Its condition has generally been good, except in the spring, at the breaking up after a hard freeze. I have seen it, then, sometimes very muddy. A colored man lost a mule on the road last summer, but it died from disease, I believe. I did not see it. There was no mud there at that time. In 1863 there were holes in the road after a freeze, and during cloudy, wet weather. I think there were places where there were some teams stalled. I have not heard any complaints during the last two years of the condition of the road. I heard some of the folks complain of its being a toll road.

By Mr. MUZZY:

Q. Does not the condition of the road depend on the weather—good in good weather and bad in bad weather?—A. Certainly; that is so with all roads.

Q. Have you never seen a turnpike which did not get muddy in bad weather?—A. No, sir; I did not.

Q. Is that road 66 feet in width throughout its entire length?—A. I cannot answer that question.

Q. Is it an artificial road 24 feet in width throughout its entire length, made of stone, gravel, or other hard substance?—A. I judge that in some places it is less than 24 feet, but I guess that much of it is more than 24 feet. The road has been graveled and re-graveled, and the gravel has worn out. On the top of it the gravel does not show, but there may be gravel there if you dig down.

Q. Is there any sand on the road?—A. There is in places. Where Mr. Peters's farm is there is sand. The road was rounded up last summer, and sand put on the top. That is the only piece of the road that does not show gravel.

Q. Have you ever measured that road?—A. I heard I was going to be summoned, and I measured some places yesterday with a stick. The least width of where I measured, where it is safe for persons to travel, is about 22 feet.

Q. Then I understand you that in many places the road is but 22 feet wide?—A. In one place.

Q. How far does that extend?—A. A small piece—about four feet.

Q. Did you ever know a funeral to be stalled on that road, going to the cemetery?—A. No, sir.

Q. How long has that road been on your beat?—A. For the last seven or eight years.

Q. At what point was it that you found the road to be only 22 feet?—A. About one hundred and fifty or two hundred yards above the gate. That is a slip. There is a running stream there, and in time of rain a great deal of water comes down, which has washed quite a ditch there. These places were fixed up last summer, but there came rain again, and caused them to slip again. I never heard of any one being injured by being thrown out of a buggy on account of the bad condition of the road.

CHARLES C. IVEY sworn and examined.

To Mr. Temple:

I passed over the Bladensburg turnpike last Sunday. I went out to Bladensburg and back. The general condition of the road, I thought, was very good—much better than some of the streets in the city that I passed over in going to the toll-gate, especially G and H streets.

Q. Were there any ruts in the road twelve inches deep?—A. No, sir. Near Clark Mills's place, going up the hill toward Colonel Rives's, was the worst place that I saw; but it is because people do not drive on the gravel, but on the side of the road. There has been gravel put there recently, and instead of driving on the gravel people take to the sand on each side. I cannot say what depth of gravel is there. There is a good deal; but last Sunday was a very muddy day.

To Mr. MUZZY:

I do not live on the line of road, but I frequently drive over it. The width of the place where the gravel was freshly put on was, I should say, 15 feet.

Q. Do you know whether that road, throughout its entire length, is 66 feet in width, from fence to fence?—A. I should think it was, but I am not a judge of distances.

Q. Do you know whether it is an artificial road, 24 feet in width, made of gravel, stone, or other hard substance?—A. I cannot say as to that. I can testify as to the general condition of the road. The road is very hard and firm. I could not trot my horse last Sunday on a portion of H street, but I could trot him along on the toll-road first-rate. The general condition of the road is much better than H street, especially that part from the toll-gate to the cemetery. It is in very hard and good condition.

Mr. Davidge put in evidence the account of tolls and of expenditures on the road.

WASHINGTON, D. C., *January* 23, 1871.

Mr. Muzzy called the attention of the committee to the act of February 15, 1819, page 482, 3 Statutes at Large, authorizing the extension of the road of the Washington and Rockville Turnpike Company in Maryland into the District of Columbia, upon the Columbia Turnpike Road Company surrendering the right to build the road, and providing that the act in relation to the width of road, &c., of the Columbia turnpike road, passed in 1810, should be in force, and should apply to that road. This act required the road to be 66 feet in width, &c.

H. W. BREWER, sworn and examined.

To Mr. MUZZY:

I reside in Georgetown, and am a civil engineer. I have examined the Washington and Rockville turnpike road, and hand in a plat of that road. I made the examination in connection with Mr. Forsyth, some time in December, 1870. The following is a correct copy of the statement made about it:

GEORGETOWN, D. C., *December* 11, 1870.

SIR: In company with you, I have examined into the condition of the Seventh street road, from Boundary street to the Maryland line. The following is the result, taken from notes and measurements made on the spot:

From Boundary street to station No. 2, on the accompanying sketch, road-bed uneven and in ruts, but foundation solid. Bridge between these points in good order. From No. 2 to No. 5, (toll-gate,) good gravel road. From No. 5 to No. 6, road-bed clay and sand. The culvert at No. 6 not in very good order; north wall bulges, and no protections on sides. From No. 6 to No. 7, loose sand and flat in the middle; road not in order for travel. From No. 7 to No. 8, road has been newly macadamized, and is very rough. From No. 8 to No. 9, road of loose sand, and in bad condition; culvert at 9 has good covering but is washed at bottom and upper end, and has no protection for travel. From No. 9 to No. 10, road in very bad condition. From No. 10 to No. 11, the road is macadamized, but it is in such a condition that the road would be benefited by its removal.

The bridge at No. 11 is built upon foundation walls three feet high, with plank sides about twelve feet in height. The railing is in dangerous condition. From the northern end, for the distance of two hundred and forty feet, there is a high embankment entirely unprotected, and is very dangerous to night travel. From No. 12 to No. 13, the road is macadamized, and is in fair order. From No. 13 to No. 14, the road is of sand, with patches of macadamizing, loose stones, &c. From No. 14 to No. 16, the road is from twelve to fifteen feet in width, and is fairly graveled. From No. 16 to No. 17, deep sand. From No. 17 to No. 18, macadamized, but much worn. From No. 18 to No. 19, road commences with four feet of macadamizing and ends with ten feet; the whole is in bad condition. From No. 19 to No. 20, sand, with patches of macadamizing. From No. 20 to No. 21, road in fair order, and about fifteen feet wide. From No. 21 to No. 22: About one-half of this portion of the road has well-worn macadamizing: the balance is in better order, and about fifteen feet wide. From No. 22 to No. 23: One thousand and twenty feet of this portion of the road is macadamized, and is in good order; the balance is in bad condition.

In reviewing these notes, there can be no hesitancy in answering the questions propounded to you by the attorneys of the levy court as follows:

1st. The road is not made throughout its entire length twenty-four feet wide of "stone or gravel, or other hard substance, of sufficient depth and thickness to secure solid and firm road."

2d. The surface of the road is not as "smooth as the material will admit."

3d. The road in no case rises or falls so as to make an angle of 4° with the horizontal line.

4th. The road is not in "good and perfect repair."

5th. The bridges are not built of "sound and suitable material."

You will find accompanying this, a sketch of the road enlarged from Boschke's map of the District.

Respectfully yours, &c.,

H. W. BREWER, *Civil Engineer.*

WILLIAM FORSYTH, *Civil Engineer.*

By Mr. STONE:

Q. State the length of each section of the road.—A. The length from the starting-point to No. 1 is 1,634 feet; between No. 1 and No. 2, 1,366 feet; from No. 2 to No. 3, 1,220 feet; from No. 3 to No. 4, 1,780 feet; from No. 4 to No. 5, 1,600 feet; from No. 5 to No. 6, 1,453 feet; from No. 6 to No. 7, 1,597 feet; from No. 7 to No. 8, 350 feet; from No. 8 to No. 9, 809 feet; from No. 9 to No. 10, 187 feet; from No. 10 to No. 11, 679 feet; from No. 11 to No. 12, 1,419 feet; from No. 12 to No. 13, 325 feet; from No. 13 to No. 14, 200 feet; from No. 14 to No. 15, 800 feet; from No. 15 to No. 16, 600 feet; from No. 16 to No. 17, 600 feet; from No. 17 to No. 18, 430 feet; from No. 18 to No. 19, 1,270 feet; from No. 19 to No. 20, 1,127; from No. 20 to No. 21, 1,773 feet; from No. 21 to No. 22, 700 feet, and from No. 22 to the end, 2,900 feet.

By Mr. MUZZY:

Q. What is the entire length of the road within the District?—A. 25,300 feet.

Q. What is the length from the city limit to the first toll-gate?—A. 7,600 feet.

Q. Is it your judgment that the road, including that part of it which is macadamized and graveled, is 66 feet in width throughout?—A. I did not measure it, but I should judge it is about 60 feet. I suppose the width is all right.

Q. Are you confident that the road is not, throughout its entire length, 24 feet in width, of stone, gravel, or other hard substance?—A. I am perfectly sure of it.

By Mr. WILLIAMS:

Q. What is the average width of the macadamized part of the road?—A. Some places it is only 8 feet, and in some places 5. I do not think that in any place it is over 20.

Q. Would it average half the width of 24 feet?—A. I hardly think it would.

Q. Is there any part of it graveled right, in your judgment?—A. Not a good graveled road. It has had some gravel upon it. In some places the road-bed is very good, but it is rather flat, I think—not crowned. The greater portion of it is sandy, and rather deep sand at that.

[The plat of the road was put in evidence, as follows:]

(For plat of road see original manuscript.)

CHARLES H. BLISS sworn.

To Mr. MUZZY:

I am a civil engineer; I am acquainted with the road known as the Seventh street turnpike; I have traveled it more or less within the last ten years.

Question. You have heard the requirements of the charter stated by me as to the

width of the road; that it was to be 24 feet, of gravel, stone, or other hard substance throughout its entire length. Is it your judgment that that has been complied with?—Answer. No, sir; not by any means.

Q. What is the condition of the road?—A. In muddy times the road is very bad. I recollect, some nine years ago, getting stalled there with a pair of horses and carriage. Since then I have been over the road a great many times. On another occasion, when I had my own team hauling a wagon, the road was so bad in one sandy place that I had to get out and walk the hills, and in many places it is dangerous to attempt to get from the side on to the stone in the center of the road. I consider it a dangerous road to travel over. I was very much surprised that such a road should be called a pike. The bridges are dangerous; I consider them so. The last time I went over that road, last fall, I came back by the other road from Brightwood, in preference to coming back over it. There is no railing for protection on the bridges.

Q. Between Howard University and the city are there any high banks?—A. Yes; there are several places that I consider dangerous.

Q. Can two carriages pass over the bridges together?—A. I think that perhaps they could on some of the bridges. I always hurry over the bridge, so as not to meet any other team on the bridge. I do not think that a carriage and a load of hay could pass each other on the bridges: it seems to me very doubtful. I have been city surveyor of Washington for two years past, and have had twenty years' experience of building roads and canals. I never saw such a turnpike; I would not call it a turnpike; it is not worthy of being called a common country road. You may travel over any country road in Maryland and be safer than traveling over that road.

Q. What amount of gravel or stone do you think necessary for a road 24 feet in width?—A. It should be at least 18 inches of gravel in the center and 9 on the sides.

By Mr. STONE:

Q. What would be the cost per mile of building such a turnpike?—A. I should think you could not build a good turnpike road, such as I speak of, short of from $3,000 to $5,000 a mile, to put up suitable bridges and everything else.

Q. Would that include the purchase of the land?—A. No, sir; simply for building the road.

Q. What do you suppose a road like this one could be built for?—A. I should not think that this road would cost half as much, or perhaps more than one-third, but that is merely a rough guess.

FRANCIS MILLER sworn and examined.

To Mr. MUZZY:

I am an attorney-at-law; I reside in Montgomery County, Maryland; I am familiar with the road known as the Seventh-street pike, and have been for twenty-five years. Within the past twelve years I have resided in Maryland, and have been very familiar with that road. I walked over the road last Saturday, with a view to examining its condition.

Question. State the result of your observation that day.—Answer. The result of my observation is entirely confirmatory of the report of Mr. Brewer. I made some rough notes, as I went along; but it is hardly necessary to encumber the record with it, because I agree precisely with Mr. Brewer. There are two large culverts and two bridges on the road, on either side of which it would be very dangerous for a carriage to go over. The culverts have no protection, no side railing at all. One of the bridges has partly a railing, but it is just in that condition that a child could push it down without the least difficulty. If a drunken man staggered against it, he would fall over and carry the railing with him. The first bridge has underneath it a partly stone wall. On that there are some upright posts, and across those is nailed some plank, and the earth rests against that plank. The approach on either side for forty or fifty yards is only from 14 to 16 feet wide, and quite precipitous, so that if two wagons were to meet there they would have difficulty in passing. It is entirely impossible for a carriage to pass a load of hay there. The bridge is about 14 feet wide, (I give the measurements as I stepped them,) and the railing is in the condition in which I have stated it. At the other bridge, which is further out, beyond the second toll-gate, there is no railing on one side, and on the other side there is a railing which consists of upright posts that are nailed on. The middle ones rest on the flat part of the bridge, and then they are toe-nailed. The others run down the side and are spiked to the side of the bridge. There is nothing buried in the ground at all. The rail is held entirely by these nails. The boards along the side and across the top have been nailed at times, and one end or other is frequently nailed now, but there is hardly ever a case when the board is nailed on both ends. The width is like the other bridge, and the approaches are quite precipitous. The whole surface of the road is flat. I do not think there is an instance in which there is 24 feet of rounded road along the whole distance. Sometimes the road is 24 feet wide, but when it is that width it is in little holes, so that if there is any

rain the water settles in them, and wagons go through the ground. I suppose that on Saturday, when I was on the road, there were fifteen or twenty mud holes in the road, some of them extending half-way across the road, some one-third of the way, and some smaller ones. I do not think there are a hundred yards of road consecutively that answer the conditions in the charter. There are some cases, mentioned by Mr. Brewer in his report, where the road is very sandy, particularly at Mayor Emory's place, near to Fort Stevens. There were ruts in the sand on Saturday at least six inches deep. If the sand went down to the center of the earth, wagons would not cut in any more than they do now. I have been on the road in the early spring and in the winter, and have often seen wagons cut in nearly to the hub. I do not know personally of instances in which they have gone quite down to the hub, but I have heard report of them. We have, in Montgomery County, a turnpike running to the end of this road from the village of Brookville, which is a macadamized road, and we can take there a load with three horses and bring it down to the District line, which will take five horses to bring to the city on this turnpike road. That is the experience of all our farmers. They have to nearly double their force on this road; they cannot haul more than half what they can on a good road. I speak of the road in the spring, when it is in its worst condition. For the past four or five months there has been scarcely any rain, the snow that we had a week or two ago is nearly the whole amount that has fallen during four or five months, and of course the ground is dry; but usually, in the spring, when the frosts get out of the ground, there is no limit to the depth into which wagons get on this road. There is nothing to keep them from going down to the hub. This road was built on a charter from the State of Maryland, chartering the Washington and Rockville Turnpike Company. That company was authorized by Congress to build this road from Washington to the Maryland line. I have made inquiries from every one likely to know anything about it, and I have not heard of any one who ever knew that that road was completed; I mean the road from the District line to Rockville. This charter was obtained on the pretense that they were going to build a turnpike from the city of Washington to Rockville. They have undertaken to build it out to the District line, and are collecting toll on it. The Brookville road from the city limit is on an entirely different charter; that was built, I think, from 1854 to 1856. In the twenty-five years that I have known the road, there never has been a toll-gate there, and there has not been any pretense to have control over that road by any corporate company from the District line up four miles. At the village of Leesburg the road goes to the left to go over Rock Creek, but there is not even a tradition that speaks of the existence of this road.

By Mr. STONE:

Q. This turnpike, so built, goes to Brookville, and not to Rockville?—A. To Brookville. It is on the road to Rockville for four miles, but it is under an entirely different charter and company.

Q. So that there is no turnpike road now leading from the District limits to Rockville?—A. Not only that; but I do not believe that a good load of any kind of materials could get by that way to Rockville. There has been no turnpike there. That company and two other companies depend entirely upon this Seventh-street road to get to the city. There are two other turnpikes that empty into the Brookville pike. This Brookville pike, with the Sandy Spring branch, is 18 miles long, and there are two turnpikes in course of construction that will be 21 miles long, making altogether 38 or 39 miles of turnpikes, which the citizens of Montgomery County have built in order to get to the city of Washington; but when they get to the District line, they are turned into a slough of despond, and find all their labor lost.

WASHINGTON, D. C., *January* 24, 1871.

C. E. CREECY sworn and examined.

To Mr. MUZZY:

I am familiar with the Seventh-street turnpike. I have been familiar with it 8 or 9 years. I have been over it frequently within the last 4 or 5 years. There are two toll-gates on it within the District line. The condition of the road is bad. I was over it last Saturday, and found it in some places very bad. There are some places where it is not macadamized. I cannot call to mind particularly the spots. I noticed that the road is not more than 18 feet wide near a bridge there, and that it is a very dangerous place. In the early spring and the latter part of winter the road is very bad, muddy, and rutty. Ten or twelve years ago they called it the Seventh-street plank road, but I never knew why, except that there were some few planks in some places. I have paid toll on the road whenever I went through the gate. The farmers along the road complain of the road being bad, and they all want the toll abolished. There is a great deal of travel over the road. I counted upward of 20 wagons—what they call Virginia market wagons—coming down the road. It strikes me that if all that pass pay toll, they must have a good revenue. I have not noticed any recent repairs on the road.

I should not suppose that there have been any repairs put on for a year or two. There is a bridge about half-way between the first toll-gate and Brightwood, which is very dangerous. I recollect driving over it once with a fractious horse and I came nearly going over the side of it. I would hardly have escaped with my life if I had. The railing was partially down at that time. There is a railing now to it, but the bridge is only about 20 or 30 feet long, and on each side of it there are dangerous gulleys—on a sort of causeway leading to it.

WASHINGTON, D. C., *January* 30, 1871.

J. T. HALL sworn and examined.

To Mr. STONE:

I reside in the county of Washington. I am well acquainted with the Seventh-street turnpike road. I have known it for two and a half years pretty thoroughly I have driven over it for the last eight years, off and on. Its condition has been very good on an average; much better than the roads running parallel with it. It has a solid road-bed. It seems to have a bottom solidly packed as a road that has been traveled over for a number of years.

Question. What is its width?—Answer. In my opinion the average width would be more than 24 feet. There are some places where the top road would not be quite 24 feet, but the road-bed is much more than that. There is no part of the road that I have seen where three wagons cannot pass.

Q. Are the bridges all in good repair?—A. They were when I last saw them, last fall. I have not been over the road, all the way, since then. They were all in good order then. I was over the whole road last fall, from the county line to Washington, and I examined it thoroughly.

Q. That part of it which you drove over this morning, was it in good order?—A. I cannot say, as it is covered with snow. We did not go through, however. The road was solid and even. That was from the toll-gate to the city.

To Mr. MUZZY:

I measured the road last summer; I have not measured it since.

Q. Was it throughout its entire length an artificial road 24 feet wide, of stone or gravel?—A. I do not like to say. There may be some places where the road was washed and would not be 24 feet wide, but in my opinion the average is 30 feet. The road in my opinion is much wider than any of the other county roads, but in some places they have given the grade of the road considerable dip, so as to make it solid, in passing through any cut or gully, but the top of the road there is 24 feet, easily. Most of the road is a good drive.

By Mr. STONE:

Q. Does the gravel or stone extend 24 feet in width?—A. Yes, sir.

Q. How deep is the gravel?—A. I do not know. It must be 9 inches deep, for if not, the heavy teams that come in from Montgomery County, loaded with corn and hay, would go right through it. It is used as one of the arteries of Montgomery County. Every morning 8 or 9 or 10 teams pass our house loaded with grain, and if it was not the best road in the county they would not take it, because the Fourteenth-street road taps it up above, where the teams would not have to pay toll.

Q. Does the Fourteenth-street road tap it within the District line?—A. Yes, sir; within the District line.

Q. What sort of a road is the Fourteenth-street road?—A. It is quite a good road. My teams are going over it every day to the city, from a place called Piney Branch. The majority of the farmers from Montgomery County take the Seventh-street toll-road, in preference to the Fourteenth-street road. The reason I know so much about the Seventh-street road is, that I went over it and examined it thoroughly. I offered to take it from the company, and I certainly would not take a broken-up road.

Q. How much work have you seen done on the Seventh-street road during the past year?—A. During the past year, from August last, I was sick in bed; but in the spring I saw a number of teams and men at work on Howard's Hill. I also noticed, before the snow came, a number of patches in the middle of the road, where gravel had been hauled; so that there must have been some work done.

Q. Have you examined the condition of the bridge at Marshal Brown's?—A. I have not seen the bridges for a year.

Q. Do you know the width of the road at either of the bridges, or at the approaches?—A. I do not. The approaches would be about the width of the bridges, and my impression is that the bridges are 15 feet wide, that is, wide enough for three wagons to pass.

Q. Three hay wagons?—A. No, I will not say that; a vehicle could hardly pass one hay wagon. I know that the bridges were all washed away about three years ago, in a heavy freshet, and that they were all built up anew.

JOSEPH C. LEWIS sworn and examined.

By Mr. STONE:

Question. State the condition of this Seventh-street road and any particular facts you may deem pertinent to the inquiry.—Answer. I think the road is in a good condition. It is not as good a road as we would like to have made; but we have expended all the money upon it that we have been able to collect for the last five years, and we are in debt besides over a thousand dollars. The plan of the road was made by Engineer Coyle and reported to the levy court, and approved as being within the rules or within the charter in every respect. This bridge which the gentleman speaks of is as broad as any of the bridges in the county. It is as broad as the bridge over Piny Branch at the quarry, and it is a good bridge. But, then, teams are not confined to the bridge; they can go down and cross above the bridge; and that used to be the practice always, especially when they wanted to water the teams; they leave the bridge and go over above it. This embankment, that is called too narrow, is probably at its base forty feet wide; but the embankment is high, and probably the road at the top is not so wide as is desirable; but there is no difficulty in passing two teams over it abreast at any time. If the Government will pay us what it owes us, we will expend it all on the road, or we will give up the road, if the Government says so. The Government owes us something like $8,000, without reckoning in interest.

Q. What is that for?—A. The first year of the war we let the Government teams travel over the road without paying toll or without keeping any account; but we found that this travel was running us in debt heavily to keep up the bridges and to make them stronger, so that the Government teams could travel over the road. We then commenced keeping an account, and one account of over $8,000 was rendered to the Government, of which the Government paid us one-half. We afterward rendered another account of about $4,000, and received one-half of it; and I think there was still another account of perhaps $2,000, of which we were also paid one-half. To the best of my recollection, the Government paid us some $7,000 out of $14,000. The other half is still in abeyance, and has not been paid.

Q. What reason does the Government allege for not paying you?—A. General Meigs said, during the war, "We want to make you help to carry on the war, and we will adopt this rule of paying you one-half the tolls;" but, as we did not keep an account the first year, the Government really owes us more than we sent an account for. There can be no hardship to the citizens in paying this toll, because, if they choose, they can take the Fourteenth street road, where they have not to pay any toll. The hardship is on our side, as we have expended a good deal of money for which we get nothing. The hardship is not on the part of the community, because the road is kept up without their money, and if people do not choose to travel it, they pay nothing whatever for it. When they do choose to travel it, it is when the other roads are bad, and when this is the best road to bring down heavy teams upon. They bring down their heavy teams on this road and go back with their empty teams on the other road. This Fourteenth street road goes up to Fort Stevens, and to Fort Massachusetts, and there it crosses the road to the Maryland line, so that there is no hardship at all in collecting tolls on this road; for even the Montgomery folks can come to this city without touching our road at all. I think I am authorized by the directors of the road in saying that, if the Government will pay what it acknowledges it owes, we will make a road there such as nobody shall be ashamed of, or, if the Government will pay us what it owes us and take the road itself, and take care of it, we would agree to that. I wrote to Judge Sargent, the president of the levy court, the other day, a letter which I will hand to the committee and Judge Sargent's answer to it. The letter and answer are as follows:

WASHINGTON, *January* 28, 1871.

DEAR SIR: I wish to know if it is the wish of the present levy court that the turnpike roads should be added to the present heavy taxes, or do they wish that the road be kept in repair, as now, by those who travel it. The whole receipts have been expended upon the road for the last five years.

Yours, truly,

J. C. LEWIS, *Tax-Payer.*

Judge SARGENT,
President of Levy Court.

WASHINGTON, *January* 28, 1871.

SIR: In reply to the foregoing letter, I can only say for myself, as a member of the levy court, that I have no desire that turnpike roads in the county should become a burden to the county. We have roads enough now to keep in repair without any being added to our burden.

At the next meeting of the court, this subject will probably be considered.

Your obedient servant,

N. SARGENT.

J. C. LEWIS, Esq.

By Mr. MILLER:

Q. When was the last dividend declared on this road?—A. Five years ago.

Q. What was the amount?—A. I reckon about 3 per cent.

Q. What was the aggregate amount?—A. I am not able to say.

Q. How much money has been expended on this road during the last year?—A. Mr. Jackson and Marshal Brown were the superintendents of the road, and attended not only to the repairs of the road, but to all the outlay.

Q. Do you charge toll on this road?—A. Toll is collected on it, and I do not think there is any hardship about that, for this reason: that all who pass over the road on this side of the first toll-gate, pass over it perfectly free; and all living in the county, on the other side of the toll-gate, can use the road for ten dollars a year; and they certainly could not make the repairs themselves for twice that amount. Those who pass over it from the other county pass over the whole length of the road, and I do not know any one of them who pays more than twenty dollars a year.

Q. Do you know of any persons who refuse to pay toll?—A. I do not know of any such case now. We used to have trouble with the Blairs, but I have not heard of their making any trouble recently. All the trouble that I have heard of was with Mr. Sheppard, who had some little difficulty with the toll-gate keeper. I traveled over the road the day that he made the complaint, and a finer road I never saw; I traveled the whole distance from the boundary line to the District line. It is certainly very poor encouragement to any person to engage in a public enterprise if they are not allowed to get along peaceably.

By Mr. STONE:

Q. What is the corporate name of the turnpike that connects with this road leading into Montgomery County, and when was it built?—A. The one that is most prominent now is the Washington and Brookville road. The Maryland part of the Rockville road was built, but was not kept up, perhaps. We have no connection with that; our part of the road was within the District, and Congress legalized the District part of it.

Q. Was that road ever built from the District line to Rockville?—A. I understood that it was built, but that it has not been kept up, and that only that part of the road leading to Brookville has been kept up; that is the road now in full operation under the laws of Maryland. The Rockville road was built more than thirty years ago—as much of it as was built, and how much of it was kept up I am not able to say; I understood that this road was built entirely from the District line to Rockville. The Brookville road, as I understand it, passes on the same bed for four miles, and that is a very good road; that was built about the year 1854 or 1855.

WASHINGTON, D. C., *February* 2, 1871.

JOSEPH C. LEWIS recalled.

Witness handed to the committee the list of the stockholders of the Washington and Rockville Turnpike Road Company, as certified from the records of the supreme court of the District of Columbia, as follows:

Criminal Court—March term, 1861.

UNITED STATES *vs.* THE ROCKVILLE AND WASHINGTON TURNPIKE ROAD COMPANY.	1859, January 12. Indictment for nuisance. 1861, April 16.

Nolle prosequi by United States attorney.

Copy from the records of the late criminal court of the District of Columbia.
Test:

R. J. MEIGS,
Clerk of the Supreme Court of the District of Columbia.

May 31, 1867	3,688 24		

No dividend declared since 1866, all of the receipts of the road having been applied to its repairs and improvement.

S. B. BOARMAN,
Secretary.

ROCKVILLE AND WASHINGTON
TURNPIKE ROAD COMPANY, *January* 30, 1871.

Witness explained that the stock of the old company was reckoned in the foregoing list at fifty cents on the dollar.

By Mr. MILLER:

Q. Did you ever know of any of the stock being sold?—A. Yes.

Q. How long since?—A. I have known it sold within the last two years.

Q. What did it sell for?—A. It rates generally at fifty cents on the dollar, but I have known it to be sold as low as twenty-five cents, within the last two years.

Q. Did you ever know it to sell for less than twenty-five cents on the dollar?—A. No, sir; I do not think I have.

Q. And there has been no dividend since 1866?—A. No.

Q. What was the dividend then?—A. Three per cent., I think.

Q. When had there been a dividend before that time?—A. We had had dividends every year for two or three years before that.

Q. State whether the amount stated in that return as being expended in 1870 was all expended in that year?—A. That is the amount of the payments in that year. It is not probable that it was all expended in that year, because we had owed bills from 1869, which we had not been able to pay. It was stated the other day that the road owed about $500 to the bank and $600 besides.

Q. Are you acquainted with any part of the road where work was done in 1870 to any extent, except at Howard's Hill?—A. A good deal of work was done opposite the Schuetzen place. It is well graveled along there. It was in bad condition before. It was flattened down, so that when it rained the water lodged there. It has been rounded up very nicely. I am frank to confess that the money has not always been as judiciously expended as it might have been; but as to the fact of its being expended, there is no question. Other gentlemen, however, differ with me, and think that they are permanently improving the road; and when it is permanently improved it will take less to keep it in repair, and will pay the shareholders something. But so far as I am concerned, I would be very glad if Congress would just pay up what the Government owes us and take the road. There is a good deal of travel on the road all the while, but the tolls are very low.

By Mr. STONE:

Q. Is not that road the main artery to the city of Washington from Montgomery County?—A. Gentlemen dispute that point with us, but I should say that it is one of the main arteries. I would not like to say that it was the main artery. I think it is also the best avenue, because it has been well chosen. The bed of the road is very solid and very well turned out; and the road is nearly a straight line.

J. J. HALL recalled.

WITNESS. At the request of Mr. Lewis, I measured the width of the road this morning between the city and the first toll-gate—the narrowest part. I found the average of the road to be 36 feet; not the road-bed itself, which is much wider. The whole 36 feet can be traveled, but not with pleasure, because there is a slight decline on each side.

By Mr. MILLER:

Q. How much of the road was graveled?—A. In my estimation, the whole of the road was graveled.

Q. Did you see any gravel there?—A. I saw the red structure of the road, and the road is hard, and therefore it must be graveled, as there is no frost there now.

Q. How was the curve?—A. Pretty flat.

Q. Was it smooth?—A. It was smooth in places. I will not say that it was like a table, but it was not a bad road.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 37.

TO PROTECT LOYAL AND PEACEABLE CITIZENS OF THE UNITED STATES.

[To accompany bill H. R. No. 3011.]

FEBRUARY 20, 1871.—Ordered to be printed and recommitted to the Committee on Reconstruction.

Mr. B. F. BUTLER, from the Committee on Reconstruction, made the following

REPORT.

The Committee on Reconstruction, to whom was referred the bill (H. R. 3011) to protect loyal and peaceable citizens of the United States in the full enjoyment of their rights, persons, liberty and property, and to enable such citizens to preserve and perpetuate the evidence of losses claimed to have been sustained by them in the war in the States lately in rebellion, have examined the bill submitted to them, and have taken into full consideration the evils and disorders which its provisions, if enacted into a law, are designed to suppress.

Your committee are fully convinced that secret organizations, overriding the laws of the States, depriving citizens of the United States of their rights of person and property, and interfering with the free exercise and enjoyment thereof, exist—under different names and designations, but all having the same object and intent—within the several States indicated in the bill, all of which were Confederate States, save only Kentucky, in which, from the rebellious and disloyal spirit shown by a large portion of the people there, seems to have as great and perhaps more need of the remedies proposed by the provisions of this bill as any other rebel State.

Your committee also believe that there are cases of oppression by individuals on the part of the land-holding people of the South against the landless, by which their wills are coerced and rights outraged, and their property taken without any possibility of redress by law. Every mail brings the most fearful accounts of burglary, arson, and murder in the night time by armed bands, prowling in disguise, especially in the States of Tennessee, North and South Carolina, Georgia, Alabama, and Texas.

Your committee need only refer to one or two as published in democratic as well as republican papers, as examples of the enormous and heinous crimes with which every mail teems. Since this bill has been under consideration before your committee, we are reliably informed that a band of five hundred armed men in disguise broke open the jail of Union County, South Carolina, took out ten prisoners, negroes, killed eight, wounded severely another, and one is yet unaccounted for; and your committee are not advised of any steps taken by the legal authorities to punish this band of marauders and murderers, or maintain and execute the laws, even such laws as there may be against them.

Now it is evident that such an amount of heinous crimes by such a number of people in a sparsely-settled district in the northwestern part of the State of South Carolina could not have been committed without the perpetrators thereof being in large part known to the community, and that therefore these murderers are either shielded and concealed by the community, or that the whole community is overawed by the combined force of the criminals; either case calling for instant redress.

Again, in the State of Texas, within the past few days, a scene occurred which is without parallel in the history of civilized nations. It seems that one Jenkins, a free colored man, had had some difficulty with a planter, upon whose estate he was a laborer. Two friends of the planter therefore most unmercifully whipped Jenkins until nearly dead, and then told him he would be killed if he went before the grand jury. In the effort of Jenkins to obtain justice he was called before the grand jury, whereupon he was followed from the court-house and murdered by four men, two of whom had assaulted him before, and his opponent, who meanwhile had wounded another man by mistake for Jenkins; whereupon the judge of the county court issued his warrant for the arrest of the four murderers. They were brought before the judge, and the local district attorney prosecuted the unprovoked murder which had been committed; whereupon threats of assassination of the judge and district attorney were freely made during the trial, if they dared hold the murderers to answer. The judge dared to do his duty, and ordered the prisoners to be committed for trial for this capital felony, of their guilt of which there was no doubt. Thereupon the prisoners, being armed by the connivance of their friends in the court-room, when they were about to be removed and committed to jail for trial by the sheriff by order of the court, commenced shooting at the sheriff, which fire he returned, wounding two of them; whereupon an indiscriminate shooting among the people in the court-house commenced, forty or fifty shots being fired in rapid succession, while a portion of the prisoners' friends stood guard with loaded revolvers to keep the officers of the law outside the court-house from interfering with a procedure which, if it were not so terrible, would seem to be a mere common pastime of the people. Numbers were wounded, one or more killed, the district attorney and judge both shot at, and one wounded before they reached their hotel, which was opposite the court-house. Twenty or thirty confederates, armed with shot-guns, with horses ready, greeted the murderers with cheers; then mounting their horses and firing their pistols, yelling like savages, the prisoners, followed by their friends, made good their escape from town.

The force under the sheriff was not sufficient to pursue or capture the prisoners, who, when last heard from, were some twelve miles off, guarded by a band of thirty armed confederates. The night after, another attempt was made to assassinate the judge. Could such a transaction as this be done in any country where the laws were sufficient for the protection of the citizens?

Again, listen to the cool announcement of a leading democratic paper, the Georgia Constitutionalist, of February 17th instant, of a murder:

> NEGRO LEGISLATOR KILLED.—Abe Turner, negro, elected to the legislature from Putnam County, was killed near Eastontown, on Tuesday. It is not known by whom he was shot.

Were these cases, which are indiscriminately given as examples, isolated ones, they would not serve as a reason why general legislation should be enacted to meet them, but they are only examples of the crimes and outrages which your committee are informed upon, evidence

which compels belief and which do believe they are being daily committed in every State and in many counties in each State of the late rebellious and now lawless States. These crimes are the outgrowth of the passions and hates engendered in the war in the minds of the Southern people toward those who fought for the Union or remained true to it, and toward the negro who took no part against the Government. All agree that the negro does not desire to fight in any locality, and that as a rule they are a quiet and peaceful people; but your committee fear the negro may be pressed too far, and be compelled to take up arms in his own defense. These men who oppress him in the manner before mentioned seem to dread this, for in many counties they have preceded their outrages upon him by disarming him, in violation of his right as a citizen to "keep and bear arms," which the Constitution expressly says shall never be infringed.

Your committee can safely aver that were the same number of murders of American citizens which are committed in any State in the South, without any interference of the State authorities to punish them, in any week, done in the space of a whole year by any nation in the world, it would be a cause of instant demand for reparation on our part from the government of that country, followed by a declaration of war if the fullest atonement was not made. Indeed, your committee cannot but remember that Great Britain went to war and spent many millions of dollars against the half-barbarous people of Abyssinia for the simple imprisonment of some five Englishmen, while the Congress and Government of the United States have thus far sat supinely by and seen hundreds and thousands of their fellow-citizens either beaten with many stripes, suffering grievous bodily harm, their property burned, or murdered in cold blood. Therefore, it appears to your committee that legislation of the most stringent and effective character, with the grant of the most extraordinary powers possible within the limits of the Constitution to suppress such felonies and murders, imperatively demands the instant attention of Congress.

But when such legislation is proposed we are informed by some of those who for political reasons wish to cover up these heinous crimes against the law and Constitution of their country, that, admitting this state of outrage, bloodshed, and murder, there are also cases of murder and of like crimes in the North. No doubt crime is rife everywhere, but the fact of crime in the North by no means excuses crime in the South, and your committee would recommend as stringent provisions as any contained in the bill which they ask leave to report herewith, to apply to any State in the North where such murders were done and such crimes committed, if it could be shown that in those States there is no successful attempt made to bring any murderer to the condign punishment which he deserves. And it is believed that it cannot be successfully shown that a single case of execution, or hardly a single case of imprisonment in the penitentiary, of a white man for the murder or maltreatment of a negro has occurred in the Southern States within the last three years—and perhaps the time may be extended much further—or indeed a single offender brought to justice. And it is this deprivation of any protection of the laws that seems to require some energetic and sweeping action on the part of Congress in this regard.

Again, we are told by those who still further seek to cover these outrages that there are many other outrages committed against the law and peace of the community by the negroes of the South. Be it so. If the negroes do aught against the provisions of the bill herewith reported, they may be brought, and your committee hope they will be brought, to condign punishment, as well as the whites.

Again, some gentlemen find objections to the stringency of the provisions of this bill as being unconstitutional, and in derogation of the "reserved" rights of the States. For the stringency of the provisions of the bill, so far as its operative legal machinery to suppress crime is concerned, it is framed almost exactly upon the fugitive-slave law of 1850; and while your committee admit that many of the provisions of that law went to the very verge of the exercise of constitutional power by Congress, and that the law was infamous because the Constitution was almost strained in order to cover the stringency of the provisions with which the panting fugitive from slavery was hunted down when he reached the goal of liberty and restored again to his master, yet, as those provisions were never in practice declared unconstitutional, although executed in many States at the North, and although the bill was infamous because of its objects and not because of its provisions, your committee see no good reason why the constitutional powers of Congress may not be examined with a microscopic eye even to find authority for using the same provisions in protecting peaceable citizens of the United States in the enjoyment of life, liberty, and property against rapine and murder.

The Constitution, in the fifth article of amendment, as well as in the fourteenth article of amendment, where the same matter is substantially reiterated, provides that "no person shall be deprived of life, liberty, or property without due process of law;" and by the second article "the right of the people to keep and bear arms shall not be infringed." Again, the Constitution provides that "Congress shall have power to make all laws which are necessary and proper to carry into execution the foregoing powers, and all other powers vested by this Constitution in the government of the United States or any department thereof." The fourteenth amendment of the Constitution also has vested in the Congress of the United States the power, by proper legislation, to prevent any State from depriving any citizen of the United States of the enjoyment of life, liberty, and property. But it is said that this deprivation of life, liberty, and property, of which complaint is made, examples of which your committee have hereinbefore set forth, is not done by the State but by the citizens of the State. But surely, if the fact is as your committee believe and assert it to be, that the State is powerless to prevent such murders and felonies as your committee have described from being daily and hourly committed in every part of the designated States, and if, added to that, comes the inability of the State to punish the crimes after they are committed, then the State has, by its neglect or want of power, deprived the citizens of the United States of protection in the enjoyment of life, liberty, and property as fully and completely as if it had passed a legislative act to the same effect. One of the objects which the Constitution of the United States was framed to secure is "domestic tranquillity." Surely there is no domestic tranquillity in any State where the midnight marauder rides in force and commits unrestrained murder upon its unoffending and peaceable citizens. So that, whoever sets up as an argument the assertion that these outrages and murders which we have seen to exist in the several States lately in rebellion are not done by the State because they are not done in pursuance of State law, simply plays upon words, and leaves the Constitution and Congress of the United States powerless to protect by its laws anywhere citizens of the United States.

Again, it is said that the provisions of the bill herewith reported are very broad and sweeping, and that they make many new classes of crimes. This is very true; but who ever fears any danger from the

provisions of this bill has only to conduct himself as a peaceable, quiet, and orderly citizen, and the bill will certainly do him no harm. There is no provision in it aimed in any degree or in anywise against any such citizen of the United States; there is no provision in the bill that any one who observes the commonest principles of justice and right in his acts toward his fellow-men need for a moment to fear; and your committee trust that there will be found no man who will palliate or seek to shield crime and defend wrong when done by the wicked and felonious conspirator against the laborious and peaceful citizen. Whoever will do so, for him does this bill offend.

Again, it is objected that the execution of this bill will necessarily create a very considerable number of office-holders. To that we answer that the bill does not create them office-holders; it is the necessities of the country which creates for them; its condition necessitates these officers as conservators of the peace. They have no other functions, power, and duty than such conservators, save one, which your committee will explain in its place. These officers, of the authorization of which by this bill some men complain, are only to act relative to bad men—criminals, felons, murderers; and they are only to be paid their fees when they are so acting; and if there is neither crime against the provisions of this bill, nor felonies nor murders committed in the Southern States, then these officers will simply have nothing to do, and they will make no expense on account of the United States. It is admitted by your committee that the expense of the system of preserving the peace inaugurated by this bill will be very considerable. But is that expense for a moment to be considered when weighed against the lives and liberties, the peace and happiness of thousands of our fellow-citizens? And how inconsiderable will it be even when weighed against the expense of any civil outbreak between the inhabitants of any part of the South, to say nothing of the loss of property and of life which such civil commotion and perhaps war might bring upon the country. Indeed, the expense would seem to be simply the ounce of prevention as against the pound of cure, which will be called for if the remedy is not timely applied.

Having thus sketched the causes which render the bill necessary, the constitutional grounds upon which your committee think it may rest, and some of the reasons why this proposed legislation is proper, your committee beg leave to call attention to the preamble and several sections of the bill.

The preamble sets out substantially the grounds of the necessity for this legislation, to which your committee have hereinbefore adverted.

The first section of the bill provides that by the several circuit courts in the several rebellious States, including Kentucky, there shall be a learned and discreet person appointed United States commissioner for each county or city over twenty thousand inhabitants, or parish in the case of Louisiana; that that commissioner shall have all the powers which commissioners of the United States courts now have, and shall be paid for his services in like manner as such commissioners are now paid by law for like services; and that he shall reside in the county for which he is commissioned so long as he holds his commission.

Section second provides that it shall be the duty of these commissioners to cause to be arrested all offenders of whom they may have information of outrage committed or wrong done against the liberty, person, or property of a citizen of the United States, with the intent to hinder, impair, or deprive such citizen of the full enjoyment of any right guaranteed him under the Constitution, or any violation of the provisions

of the act, and by proper process to bring the offender before him, and to hold him, either by bail or commitment, to answer to the circuit court of the United States for the district for the offense with which he is charged, and to send with him to such court copies of all evidence which tends to prove the guilt of the accused. And it is also made the duty of the district attorney diligently to prosecute all such cases to conviction and sentence for the crimes committed. In order to preserve a full record of such crimes and misdemeanors as are actually committed in the South, to prevent the necessity of any committee of investigation or inquiry as to their nature, so that the state and condition of that unfortunate portion of our country may be fully seen and known, this section further provides that the commissioner shall also forward duplicates of all the cases heard before him, with all the evidence, to the Department of Justice, there to be preserved of record for the use of whomever it may concern, whether Congress or Executive. It will be seen that there is a necessity for many details for the purpose of carrying out the provisions of the act, but it is believed by your committee that they have been with very considerable care well fitted for that object.

Section third, which is copied, *mutatis mutandis*, from the fugitive slave law of 1850, provides, by the most stringent requirements, that the marshal and his deputies shall obey all lawful orders of the commissioner, and for quick and sure punishment in case of refusal; and, to render the disobedience of the marshals nugatory, the commissioner is authorized to appoint a sub-marshal to execute his process; and it is made the duty of all good citizens to aid him in putting his powers into execution for restoring the peace and arresting the offenders. And for that purpose the commissioner is authorized, as he was for returning fugitives from labor, to call the *posse comitatus* to his assistance to enable him to execute the laws. So far it follows the law from which we have quoted. It will be observed that an addition has been made empowering the commisssoner to call upon the President of the United States, or the nearest commander, for military or naval forces for the purpose of executing his process and dispersing any combinations of offenders against the laws, if any there shall be, and that his call shall be obeyed by the commander of the nearest forces until the orders shall be countermanded by the President of the United States. So that all the use of the military is in fact put under the command of the President of the United States, except in the case of a pressing exigency, where he cannot be reached in the remoter parts of the South; but that exigency ceases the moment information can be got to the President. Your committee admit that this provision to call out the military by the commissioner is not in the fugitive slave law, yet, your committee claim that it was there in fact, because Attorney General Cushing, in an elaborate opinion upon that subject (6, Opinions Attorney General) decided that the power given to the marshal, or the deputy marshal, to call upon the *posse comitatus* under the provision of the fugitive slave law, carried with it in fact a power to call upon the naval and military forces of the United States. Your committee doubted whether that opinion was not a too broad and extended inference from the text of the law, and to remove that doubt, have put that opinion in this bill, in the language of legal enactment. This your committee states as an answer to the suggestion, that if it were clear that the power to call on the *posse comitatus* was a power to call upon the military forces of the United States, then this provision would be useless, and might as well be stricken out of the bill; but as that power, as held by the fugitive slave law, was

but an inferential one, and relates to a matter of so delicate a nature as the right to call upon the commander of forces for troops to suppress combinations of offenders, and to assist in the execution of the laws, it would seem best that such power should rest upon express words of the law, so that the one calling may know the extent of his powers, and the one called upon the extent and necessity of his obedience, so that nothing should be left to inference. It will not fail to be observed that, while the fugitive slave law, under the opinion of the Attorney General, allowed every marshal and deputy marshal—not persons likely to be very discreet, or learned in the law—to call to their aid, for the purpose of arresting a fugitive slave, all the military, naval, and militia of the United States, in indefinite numbers, and for an indefinite time, yet by the provisions of this bill, as reported by your committee, only a commissioner, a judicial officer, learned in the law, and discreet, is allowed to call for such forces for a very limited space of time, while a pressing exigency exists, until the President of the United States, by a telegram, can have notice, and then the whole military force is under his immediate orders and supervision, where it has been well trusted in war, and may certainly as well be in peace.

The office of the fourth, fifth, sixth, seventh, eighth and ninth sections is to declare certain acts against the life, liberty, and property of the citizen offences against the United States. First, it makes it penal and a high misdemeanor for men to be found in the public highway or on the land, or in the dwelling occupied by another, in disguise, whether armed or unarmed, alone or with others, with intent to do injury to the person or property, or by force of numbers to terrify or frighten and overawe others so as to hinder or prevent from the peaceable enjoyment of their legal rights and privileges. This is made a high misdemeanor if done in the day time, and a felony if done in the night time.

Section fifth provides that in case of the commission of any of the offenses provided for in the fourth section, all persons present shall be principals, and if death, or arson of a dwelling-house in the night time ensue, the offenders shall be punished as for a capital felony at common law, and committed to await trial without bail.

Section sixth provides that whoever shall conspire together to coerce or compel any citizen by any means to do or refrain from doing any act which he may lawfully do or refrain from doing, shall be guilty of a misdemeanor; and if such party shall go from one State or Territory into another for such purpose, then the misdemeanor of such party shall become felony on the fact being found by a jury.

Thus far the bill is aimed at combination of numbers, armed or unarmed, or conspiracies to do unlawful acts which are a molestation of peaceable citizens.

Section seventh provides that whoever shall intimidate, treat with violence, refuse to employ, or discharge from employment, or threaten with personal harm, any citizen, with intent to hinder him in the free exercise of his rights, or to do either of said acts because the citizen has legally exercised his rights, shall be punished for a misdemeanor, and be liable for all demands for his unlawful acts, to be recovered by the party injured.

Section eight is intended to enforce the well-known constitutional provision guaranteeing the right in the citizen to "keep and bear arms," and provides that whoever shall take away, by force or violence, or by threats and intimidation, the arms and weapons which any person may have for his defense, shall be deemed guilty of larceny of the same.

This provision seemed to your committee to be necessary, because they had observed that, before these midnight marauders made attacks upon peaceful citizens, there were very many instances in the South where the sheriff of the county had preceded them and taken away the arms of their victims. This was specially noticeable in Union County, where all the negro population were disarmed by the sheriff only a few months ago under the order of the judge who resigned lest he should be impeached by the legislature; and then, the sheriff having disarmed the citizens, the five hundred masked men rode at night and murdered and otherwise maltreated the ten persons who were there in jail in that county.

Section ninth is aimed at an evil which your committee is informed exists to a very great extent in the States in which this bill will act. It has come to your committee from many different sources that there are secret organizations under the name of "White Brotherhood," or "Knights of the Golden Circle," or "Ku-Klux Klan," or what other designation is used for the purpose of combination to break the laws of the State and the United States, where oaths are administered binding the members to conceal their own crimes and those of their fellows even in a court of justice, and binding them also to do the bidding of the chiefs of the order. The ninth section provides, therefore, that whoever shall take any such oath or obligation for the purposes above indicated shall be held guilty of a felony. Nothing is so abhorrent to the principles of republican liberty as in secret oath-bound organizations for the purpose of overriding the law, and nothing should be met with such condign punishment.

Section tenth is only aimed at the aiders and abettors of the criminal, making them equally guilty with the principal, and providing for the mode of their trial.

Section eleventh introduces a principle into the bill which is as old as the English common law, which held the ville, riding hundred, or county, as the case might be, responsible for damages, where they failed to arrest and bring to punishment the offender against the law, when the subject was injured by a crime and the community failed to arrest and bring to punishment the offender. The whole penalty, which accrued for the benefit of the complainant, was placed, in case of failure of justice, upon the community. This common-law provision was imposed upon the supposition, which was then, as now, exactly true, that great crimes to the individual subject could not be done without being punished, and the offender brought to justice, unless he was screened by the community in which the crime happens; and the common law, aided by special statutes, in the perfection of its wisdom, held that the community screening the offender, treating the failure and neglect to arrest him to be equivalent to screening, to pay the loss and injury sustained by the crime to the sufferer; and the eleventh section is drawn with the intent to carry out a similar purpose.

The twelfth section provides for punishment for the special crimes in the bill; imposing hard labor for felony, fine and imprisonment for misdemeanor, and capital punishment for the capital felony of arson or death in the night time of a peaceable citizen by armed and disguised bands of marauders. The same section also provides the jurisdiction of the court, and the manner of carrying on the prosecution and trials in the same.

The thirteenth and fourteenth sections, comprising the remainder of the bill, have a different action from their associate provisions. It is well known to Congress and the country that there are very large num-

bers of claims for loss or damage suffered during the war by men who claim to have been loyal and true to the Government, and many of whom were loyal and well-disposed toward the Government, even at the risk of their lives, during the war, of which there is now no provision to get, obtain, or preserve the evidence. And it is equally well known that there is a large number of fraudulent claims, either in their amounts or fraudulent in that they are the claims of those who were enemies of the United States during the war, and of course ought not to be paid. The necessity of some legislation in this regard is seen from the many attempts made during the present session of Congress to provide some remedy for loyal men of the South in that regard. Therefore, these commissioners being appointed in each county for the purposes indicated in the foregoing sections, it is provided by the thirteenth section that whoever, being loyal and well disposed during the war, and still remaining so, shall, by petition, apply to one of the commissioners, setting forth the facts of his claim, under oath, and of his loyalty and good dispostion toward the Government, and producing such loyal and well-disposed persons as witnesses as he may have to sustain his claim; that the testimony shall be examined by the commissioner, reduced to writing, and, together with the petition and other documentary evidence, transmitted to the Department of Justice, at Washington, together with the commissioner's opinion as to the character for loyalty of the applicant and his witnesses.

Section fourteenth provides that the Attorney General, upon the reception of this evidence, shall cause the same to be indexed for reference, and printed for the use of Congress, that the same may be used as evidence before the committees of either house of Congress whenever the claim is presented. It is further provided, in analogy to the restriction upon presentation of the claims of loyal men before the Court of Claims for property captured or abandoned during the war, for a limitation of two years in which the evidence of claims for losses may be presented to the commissioner, all others not so presented in that time are barred.

It will be seen that the bill proposes to confine the evidence taken to claims by loyal men, to be proved by loyal witnesses; the testimony taken to be cross-examined by a learned and discreet commissioner, and forwarded to the Department of Justice for record; so that claims made by a loyal man in the presence of his friends and neighbors, who are supposed to know all about it, and will, if they know all about it, be approved by his loyal neighbors, only will come here and be filed of record with the testimony with which he can sustain it. This will effectually prevent the growth of the claim thereafterward, which was so signally noticeable in the Chorpenning claim, which a number of years ago was only a sum of a few thousand dollars, but after many thousands had been paid grew to the enormous extent of half a million; and will protect the United States against fraudulent claims, and preserve the evidence of the just ones only, so that the claim can be fully understood. The prevention of frauds upon the United States in this regard alone would be also worth more than all the cost of the commissioner. In the case of just claims which ought to be paid, it is but giving a proper remedy to the loyal southern man who, if truly loyal, was true to the country under difficulties and embarrassments such as were seen by few, if at all, in the North.

Your committee have now presented the general features of the bill. They look upon its enactment into law as very important to the welfare and safety of the country—more so than any other passed during this,

and perhaps any session of Congress since the war. On the enforcement of its provisions they look for the weal or woe, the safety from violence or breaking out of a war of races at the South. Your committee would most strongly urge and recommend its passage. They would call attention to the fact that the bill has been very carefully examined in committee at two successive meetings, with almost the entire committee present, and that the bill forms a part of one system of legislative remedy, and cannot well be amended without injury to the whole; and a little reflection will show that it would be as hazardous to undertake to amend it by inserting new provisions or striking out any of the provisions already made, as it would for the owner of his watch to add to or subtract from his time-keeper a cog-wheel. Your committee would therefore submit that if the bill is passed at all, it should be passed substantially as a whole.

Your committee beg leave to report the bill which has been described, and ask leave to have it put upon its passage.

BENJ. F. BUTLER,
For the Committee.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 38.

CHANGE AND MODIFICATION OF BANKRUPT ACT.

FEBRUARY 23, 1871.—Ordered to be printed and recommitted to the Committee on Revision of the Laws.

Mr. JENCKES, from the Committee on Revision of the Laws, made the following

REPORT.

[To accompany bill H. R. No. 2124.]

The Committee on Revision of the Laws of the United States, to whom was referred "A bill to change and modify the act entitled an act to establish a uniform system of bankruptcy throughout the United States," approved March 2, 1867, have examined the bill submitted to them, and have heard various other propositions of amendment to the bankrupt law of a nature kindred to the provisions of said bill, and, after giving the same a careful consideration, do hereby submit the following report thereon:

The scope of the bill and of the kindred propositions is to give additional powers to the registers in bankruptcy, and to establish them as inferior courts in the several congressional districts for which they are appointed, for the transaction of the greater portion of the business in bankruptcy. The theory of the existing law is that every matter of law or fact upon which an issue is framed shall be adjudicated by the district judge as a court of bankruptcy, and that every other matter of administration under the law and the general orders may be disposed of by the register. The register is required to state every issue that arises before him in transacting the administrative business of the court, and to certify it to the judge for decision, and the judge may or may not require his opinion on such issue; but which, if given, is of no avail unless adopted by the judge.

The reason for this discrimination is to be found in the Constitution itself. The judicial power of the United States is vested in one Supreme Court, and in such inferior courts as Congress may from time to time ordain and establish. It follows that every portion of the judicial power of the United States must be exercised by some court, and that it cannot be delegated to any one but the judge of such court, as the same may be established by Congress.

In framing the bankrupt law all the power was given to the registers that was possible, consistent with this theory, but some of them have been continually asking for more; and this bill is in many respects identical with certain propositions of amendment proposed by one of the registers, and communicated in print to the members of the committee, and otherwise liberally distributed.

Thus it proposes to construe the word "court" in the act as meaning "register," wherever the word occurs, and such construction would not be inapplicable, and authorizes the register to decide all issues of law or fact that may be raised before him by the parties; and when either

party requires it, and pays the costs, the register is to certify the question with his decision to the district judge for review; it gives the register power to compel the attendance of witnesses, to take all testimony, and the examination of the bankrupt; to compel the signature of the bankrupt, or of any witness, to his examination, and to have the same power to punish for contempts that the courts of the United States now have. All petitions in bankruptcy, voluntary or involuntary, in their respective districts, are to be presented in the first instance to the register, and he is to have power to adjudicate the bankruptcy when there is no opposition; he is to issue the notices to creditors, call meetings of creditors, appoint official assignees and additional assignees, and to remove them at pleasure; he is to receive the petition for the discharge of the bankrupt, to notify the creditors, to adjudicate on the question of the discharge, to refuse or to grant the discharge, and to give the certificate; and to do this without reference to the amount of assets; and he is to have the same power which the courts now have over copartnership property, and the separate property of the copartners.

All papers in any case are to be kept by him till the proceedings are ended, and he is then to file them in the office of the clerk of the district court. Only in the case when a trial by jury is demanded by the debtor, is he to yield to the district judge. There are many minor provisions of a similar character.

It is manifest that if this bill should be enacted into a law the registers would be clothed with powers which can be exercised only by judges, and would become, in the sense of the Constitution, inferior courts. They must be appointed by the President and confirmed by the Senate, and not appointed as they are now by the courts of law, and their tenure of office would be during good behavior.

The first effect of passing such a bill would be to legislate all the present registers out of office.

It may under certain possible circumstances become necessary to the administration of justice under the laws of the United States to establish inferior courts in every congressional district; but in the opinion of your committee it is clearly not necessary for the proper administration of the bankrupt law. The course of proceeding under it has been made so clear and plain by the general orders and forms promulgated by the Supreme Court, and by the rules and decisions of the district judges, that the questions which require a reference to the district judge for determination are very limited in number. The questions upon which judges have differed in opinion are fewer than ever were known under any similar statute within the same period, and most of these causes of difference have been removed by apt amendments to the statute itself. The delay in the transmission of papers by mail between the offices of the register and of the clerk, and the necessity and expense of copies of the papers filed with the register to be sent to the clerk, are of little account when compared with the great convenience to all parties to have all the records in a judicial district kept at one place, and to have all the judicial business transacted in one court. Under the law as it stands the register can transact his administrative business at any place in the congressional district for which he is appointed, to suit the convenience of parties, and can be sent into another district if the judge deems it advisable, and his traveling expenses are paid to him in addition to his fees. He is clothed with the power to transact all business except only that which requires the exercise of the judicial power, and which by the Constitution is confined to the courts alone.

Besides, if the register should be constituted a court he must have a clerk, and an executive officer like a marshal, a seal, a place to keep

his records, and a hall to hold his courts. The additional expense to the Government and to the suitors would more than counterbalance any supposed convenience from the establishment of these new local courts.

It has been suggested that there is some ambiguity in the use of the word "court" in the act as it now stands. The committee can see none. All the proceedings in bankruptcy are conducted in the district court, and the registers are officers of that court, and whenever the judicial power is required to be exercised, it must be by the judge, and where the act is administrative or ministerial it may be by the judge or by the register. Bearing this distinction in mind no passage has been pointed out to us in the law where the use of the word "court" causes any ambiguity.

It has been suggested that it is an inconvenience to have the notices go through the office of the marshal of the district. The expense of the service would be no more when made by the marshal than by the regisister or some one specially deputed by him for that duty, but the protection to the petitioner or creditor is far greater. These notices are in the nature of process, and when properly sent by mail are sufficient in themselves to bring the party served within the jurisdiction of the court from which they issue. The marshal is a responsible officer, and gives a substantial bond, and himself and his sureties are liable for any failure in the performance of their duty, or for any false return. It is for the benefit of suitors that they have the protection of this responsibility and of this bond.

There are, and will continue to be, inconveniences arising from the extent of some of the judicial districts which it is not possible to overcome. But henceforth the persons upon whom the law will operate will be mostly found in the towns and cities, and the inconvenience is not greater to them than to the suitors in admiralty, who have to resort to the same courts for relief.

The principal remaining subject in the bill referred to us is that of fees. With the increasing powers and duties, greater and additional fees are asked for the registers. But it is wholly unnecessary to legislate on this subject. By the law as it stands, the justices of the Supreme Court are authorized to establish a schedule of fees for all the services performed by the register, and such fees for other officers as are not prescribed by law. The experience of these judges in the administration of the law will enable them to revise the schedule of fees with greater justice to the officer and the suitor than can be done by legislation. From copies of fee-bills as taxed by the judges in different districts, which have been forwarded to the committee, it does not appear that there is any great inequality or injustice in the fees as now allowed under the law, or that they are either inadequate or exorbitant. The committee have been informed that in many cases fees have been claimed by the officers which are not warranted by the existing law and the general orders promulgated by the Supreme Court, and in some cases they have been collected, but the courts have always been prompt to correct any such attempts at exaction whenever brought to their notice. It seems to your committee safer and better to leave this whole subject where it is now placed by the statute.

41ST CONGRESS, 3d Session. } HOUSE OF REPRESENTATIVES. { REPORT No. 39.

AFFAIRS IN THE INDIAN DEPARTMENT.

FEBRUARY 25, 1871.—Ordered to be printed and recommitted to the Committee on Appropriations.

Mr. SARGENT, from the Committee on Appropriations, made the following

REPORT.

The Committee on Appropriations, who were instructed to make investigation into Indian affairs, made the following report:

Certain charges were made December 7, 1870, by William Welsh, of Philadelphia, against the Commissioner of Indian Affairs, in a letter to the Secretary of the Interior, containing allegations of fraud and improvidence in the conduct of Indian affairs. The letter was published in the Washington papers and elsewhere, and though the writer held no official position it appeared that some investigation into the conduct of the officers charged with disbursements for Indian purposes was necessary. Accordingly on the 12th of December, 1870, the following resolution was adopted by the House of Representatives:

Resolved, That the Committee on Appropriations be directed to inquire and report to this House what effect, if any, has been given to the following provision of the act "making appropriations for the current and contingent expenses of the Indian Department, and for fulfilling treaty stipulations with various Indian tribes for the year ending June 30, 1871, and for other purposes," namely: "It shall be the duty of said board of Indian commissioners to supervise all expenditures of money appropriated for the benefit of Indians in the United States, and to inspect all goods purchased for said Indians in connection with the Commissioner of Indian Affairs, whose duty it shall be to consult said commission in making purchases of such goods." Also to what amount moneys have been expended on goods purchased in disregard thereof; also, whether the contracts for the purchase of flour or beef cattle for the Indian tribes on the Missouri River have been corruptly or improvidently made, or for greater quantities than required by the service; also, to investigate the charges of fraud and improvidence against the Indian service made in the report of William Welsh, esq., to the Secretary of the Interior; also, whether any portion of the sum of $90,000 appropriated in said act for the Quapaw Indians has been paid to other parties or diverted from its intended use; and that they have power to report at any time, and send for persons and papers.

Under this resolution your committee have endeavored to execute the will of the House, and have made strict and thorough investigation within the limits of inquiry designated. The first act of the committee was to give written notice to the complainant of the pendency of the investigation, and to request of him to be present at the sessions of the committee, and to furnish the names of any witnesses who could testify to the alleged misconduct. A notice was also sent to Commissioner Parker, requesting his presence, and offering to compel the attendance of any witnesses he might require for his defense. In compliance with the suggestions of the committee, Mr. Welsh appeared, and personally conducted the examination of witnesses; Mr. Parker, by leave of the committee, being represented by counsel of his own choice. A large amount of testimony was taken for the respective parties, and the committee

summoned others of its own motion. The testimony, as well as the printed arguments of the respective parties, is submitted with this report. It is due to truth to say that in the examination of witnesses the committee deemed it a duty to assist the prosecutor, who is not a lawyer, in a rigid examination of witnesses; to exert for him every power delegated to us to bring witnesses before the committee; to lay open the files and records of the Departments, and even the private bank accounts and telegrams of individuals connected with the inquiry.

To the mind of the committee, the testimony shows irregularities, neglect, and incompetency, and, in some instances, a departure from the express provisions of law for the regulation of Indian expenditures, and in the management of affairs in the Indian Department. But your committee have not found evidence of fraud or corruption on the part of the Indian Commissioner. With much to criticise and condemn, arising partly from a vicious system inherited from the past, and partly from errors of judgment in the construction of statutes passed to insure economy and faithfulness in administration, we have no evidence of any pecuniary or personal advantage sought or derived by the Commissioner, or any one connected with his Bureau.

The first duty enjoined upon your committee was to inquire and report what effect, if any, has been given to the third section of the appropriation act of July 15, 1870, and what amount of moneys has been expended in disregard of it. The section referred to is as follows:

> And it shall be the duty of said commissioners [referring to the board of commissioners created by the act approved April 10, 1869] to supervise all expenditures of money appropriated for the benefit of Indians in the United States, and to inspect all goods purchased for said Indians, in connection with the Commissioner of Indian Affairs, whose duty it shall be to consult said commissioners in making purchases of such goods.

There is much testimony concerning a contract made with J. W. Bosler for a supply of beef, bacon, and other articles, on the 17th of June, 1870, to which we shall hereafter allude; but it is sufficient to say for this branch of the subject, that that contract was made nearly a month before the appropriation bill containing the foregoing provision was enacted; and however it may have been made in disregard of other laws, it should not be judged by the subsequent statute. There was an extension of this contract made on the 10th of August, 1870, as to beef and flour, and a contract was made with J. A. Morrow for beef on the 17th of September, 1870, as well as several minor contracts, together involving a large expenditure, to which the section referred to in the resolution will apply. It appears from the evidence that the Commissioner of Indian Affairs did not consult the board of Indian commissioners in making purchases of provisions, or of any goods for the Indian service, except dry goods, blankets, and articles of that character. The explanation given in his testimony for this neglect is, that he believed that the law made a distinction between "goods" and "supplies," and the inconvenience of calling upon the commissioners to inspect every purchase and supervise every expenditure under the act. Your committee believe this view of the Commissioner erroneous, and that it was his duty to require the commissioners to supervise all purchases, to inspect all goods and supplies, and to consult the board on all expenditures. If the law worked inconvenience, on proper representation, after fair trial, Congress would probably modify it. The organization of the board of Indian commissioners was a part of the new system for dealing with the Indians, designed to aid in the introduction of an element of humanity into the dealings of the Government with the Indians, and to insure economy and faithfulness in expenditures for their civilization and com-

fort. Even with the limits to their usefulness occasioned by this construction of the Commissioner, they have succeeded in accomplishing much good, and have unselfishly and honorably discharged the duties required of them. The benefits of their supervision may be seen from the testimony relating to the purchase of annuity goods, where better articles were obtained at less prices than ever before.

The next article of inquiry submitted to us is "whether the contracts for the purchase of flour or beef cattle for the Indian tribes on the Missouri River have been corruptly or improvidently made, or for greater quantities than required for the service."

On the 17th of June, 1870, a contract was made with J. W. Bosler, of Carlisle, Pennsylvania, for the following-described subsistence stores, to be delivered as stated in the following extract from the contract, and at the prices stated:

To the agent of the Yankton Sioux Indians, at their reservation in Dakota Territory, the following supplies, viz: 234,000 pounds of beef, net, 24,000 pounds of bacon or dried salt pork, 96,000 pounds of flour, 7,600 pounds of coffee, 15,200 pounds of sugar, 1,920 pounds of salt, 1,920 pounds of soap, 900 pounds of tobacco.

To the agent in charge of the Indians at the Crow Creek agency, Dakota Territory, the same quantity of each article as that agreed to be delivered at the Yankton reservation.

To the agent in charge of the Indians at the Cheyenne agency, Dakota Territory, the same as at the Yankton reservation.

To the agent in charge of the Indians at the Whetstone agency, Dakota Territory, the following, viz: 468,000 pounds of beef, net, 48,000 pounds of bacon or dried salt pork, 192,000 pounds of flour, 15,200 pounds of coffee, 28,800 pounds of sugar, 3,840 pounds of salt, 3,840 pounds of soap, 1,800 pounds of tobacco.

To the agent in charge of the Indians at the Grand River agency, Dakota Territory, the following, viz: 585,000 pounds of beef, net, 60,000 pounds of bacon or dried salt pork, 202,500 pounds of flour, 18,000 pounds of coffee, 36,000 pounds of sugar, 4,500 pounds of salt, 4,500 pounds of soap, 2,250 pounds of tobacco.

The beef is to be of good, merchantable quality, and to be delivered on foot; one-third, or thereabouts, to be delivered on or about the 15th of July; one-third on or about August 1, and the residue on or about the 1st of September, 1870.

The flour is to be of number one spring wheat, in accordance with the sample in the office of the Commissioner of Indian Affairs, Washington, District of Columbia.

All the articles herein named, with the exception of the beef, are to be delivered at the respective agencies, between the 1st and 15th of July, 1870, and are to be of a good merchantable quality.

In consideration of the faithful performance of this agreement on the part of the party of the second part, he shall be paid at the office of the Commissioner of Indian Affairs, Washington, District of Columbia, on presentation of the receipts of the respective agents, the following prices, to wit:

For all beef furnished by him and received by said agents he shall be paid at the rate of six and a half cents (6½c.) per pound gross; for bacon, twenty-five cents (25c.) per pound; for flour, six and a half cents (6½c.) per pound; for coffee, twenty-eight cents (28c.) per pound; for sugar, eighteen cents (18c.) per pound; for salt, eight cents (8c.) per pound; for soap, fifteen cents (15c.) per pound; and for tobacco, eighty-five cents (85c.) per pound.

This contract was made in advance of the passage of the Indian appropriation bill, which was delayed by the difference between the House and Senate as to the proper mode of dealing with treaties made by the peace commission, and was not in pursuance of public advertisement. The excuse given for the making of this contract at that time is found in the following extract from the testimony of the Commissioner:

Q. Where was this contract of the 17th of June entered into?—A. In Washington City.

Q. What was the exigency that required a contract of that magnitude?—A. The Sioux, of Missouri, in June, 1870, had five agencies along the Missouri River, covering a distance up and down the river of, I suppose, between six and eight hundred miles; they had recently come into these agencies, and located under the stipulation that they should be subsisted there, according to their treaty with the peace commissioners. In the appropriation bill for the fiscal year ending June 30, 1870, was the appropriation

of two millions in bulk for the use of the Indians generally. After the passage of that appropriation bill, an arrangement was made with the Commissary Department of the Army to subsist the Indians wherever it was necessary, to be paid out of that two million fund. These Sioux Indians, while they were not really friendly, were not absolutely hostile. The appropriation bill was hanging here in Congress. On the 15th of June, two weeks before the arrangement with the Commissary Department was to terminate, we saw before us very serious difficulties. If the office took no action at all for continuing the supplies after the commissary's had ceased, we feared that the Indians would either leave the agencies or subsist themselves by depredating upon what they could find about them. We did not want them to leave the agencies or enter into any kind of depredations. My idea was that if we could subsist them for three months, we could in the ordinary routine of the business of the office be able to make regular arrangements for subsisting them after that time; and in making this contract of the 17th of June, my intention was to cover the exigency which then seemed to arise for subsistence for about three months from the 1st of July.

Your committee admit that the delay of the passage of the appropriation bill caused serious inconvenience to the Indian service, and necessitated some action to keep the restless Indians at peace, and to avert an Indian war. The Commissary Department had signified its purpose to cease furnishing supplies, and these had to be looked for in some other direction. But we think the Commissioner erred in taking the responsibility of making this contract, even if he consulted the Secretary of the Interior in the matter. The law of March 2, 1861, section 10, contains this clause:

> No contract or purchase shall hereafter be made, unless the same be authorized by law or under an appropriation adequate to its fulfillment, except in the War and Navy Departments, for clothing, subsistence, forage, fuel, quarters, or transportation, which, however, shall not exceed the necessities of the current year.

The President of the United States unquestionably has the power, in view of an exigency such as existed in this case, to order supplies for the Indians through the War Department, and it is a dangerous power, not contemplated by law, to allow a subordinate officer to make large purchases at his own discretion in the absence of appropriations. But that an exigency existed there can be no doubt from the testimony.

In one of Governor Burbank's letters to the Commissioner, (June 18,) he says:

> Allow me to call your attention to the statement of Major Hearn, that the flour, bacon, sugar, and coffee will last only to July 1. You are well aware that we must feed or fight the Indians in this superintendency, and by failing to have full supplies on hand we furnish the disaffected with an argument, or pretext, at least, to compel those who are disposed to be friendly to join them.
>
> I trust that you have the means at your command to send a full supply at once; but, if not, I hope that you may devise some means whereby subsistence can be kept on hand at this and all the other agencies.

Agent Hearn, from the Grand River agency, June 2, 1870, writes:

> I earnestly request that supplies be forwarded as soon as possible, as the deportment of the Indians deserves that the Government should promptly comply with the conditions of their treaty.

Again, July 1, Agent Hearn writes:

> We are entirely out of flour and bacon. * * Many Indians are dissatisfied, and think the Government is going to stop feeding and clothing them, as their supply of provisions for the coming year has not arrived, and they are living on corn and beef. I respectfully request that supplies be forwarded as soon as possible, if they are not already on the way.

Captain Poole, Indian agent at Whetstone, wrote, June 18:

> I am officially informed by Colonel Sullivan, supervising commissary Sioux Indian country, stationed here, that the rations for Indians at Whetstone agency will be entirely exhausted by the 10th day of July, 1870. As all the time will be required from this date to forward said supplies from this point, the nearest market where they can be procured, I deemed it for the interest of the service to notify you by telegram, that immediate steps may be taken to continue the supplies.

And he telegraphed the same day:

The supplies for Indians at Whetstone agency will be entirely expended by July 10, 1870; all the time will be required to forward more. Colonel Sullivan, commissary of subsistence, is prepared to forward them from this point on receipt of orders. Will the order be issued?

Major Goodhue, agent of the Yankton agency, wrote June 18, as follows:

I cannot too strongly urge upon the Department the importance of making provisions for the Indians of this agency, commencing with the month of July. All the rations provided for them under contract of last year will have been consumed by that time, and, in my judgment, if the Department should cease to feed them at this time, the Indians will scatter, many of them joining the disaffected Sioux, who are now committing depredations along the line of the Union Pacific Railroad. The Indians of the upper agencies are constantly taunting the Yanktons with a statement of the fact that they, (the Yanktons,) who are peaceable and friendly to the whites, have never received the presents and provisions from the Government that they, the hostile and unfriendly ones, have. If the Government should feed the Indians of the Whetstone, Cheyenne, Crow Creek, and Grand River agencies during the coming year, and withhold supplies from the Yanktons, it will result in the disintegration of the tribe, and have a strong tendency to alienate the friendly feeling now existing toward the Government. And if perchance there should be an uprising of the Sioux Nation this year, the Yanktons, smarting under what they deem the neglect of the Government, would in all probability join the hostiles. It is of the first importance, in view of the past and present efforts to advance these Indians in civilization, to pursue a policy that will induce them to remain contentedly on their reservation. If they become scattered and disaffected, in a very short time they will relapse into the same degree of wildness and barbarism that now characterizes their brothers of the Upper Missouri.

In view of these facts, I would earnestly invite the attention of the honorable Commissioner of Indian Affairs to the importance of making ample provision for subsisting the Yankton Indians.

The representations to the Commissioner about that time seem to have been uniform and urgent for some provision to be made to meet an exigency.

If an exigency existed for these supplies, which we cannot doubt, it was not only impossible to take the time necessary for an advertisement, but it was dispensed with by law. Section 10 of the act of March 2, 1861, provides that—

All purchases and contracts for supplies or services in any of the Departments of the Government, except for personal services, when the public exigencies do not require the immediate delivery of the article or articles, or performance of the service, shall be made by advertising a sufficient time previous for proposals, respecting the same. When immediate delivery or performance is required by the public exigency, the articles or service required may be procured by open purchase or contract at the places and in the manner in which such articles are usually bought and sold, or such services engaged between individuals.

It is alleged that the prices paid under this contract were larger than they should have been, or than fair competition would have secured for the Government. The price paid for beef, though not higher than the prices paid by the Indian Bureau and the peace commission in previous years, is considerably more than under a subsequent contract made with Morrow, and higher than that paid by the Commissary Department for the same reservations during the year 1870. We think this is partly due to the higher prices charged by contractors when there is no money in the Treasury to pay their bills, and an uncertainty about appropriations, and partly to an absence of competition. The Commissioner says he endeavored to inform himself as to the prices of supplies, and that many persons seeking contracts conversed with him. The only evidence of the nature of the offers made at that time is in the testimony of Mr. Finn, of St. Louis, who offered in writing to take a contract for the Whetstone agency, at a less rate per pound. As we have indicated, the proper solution of the matter was for the Commissioner to have referred it to the President, that the Indians might be sub-

sisted through the War Department. By this means the advantage of a lower rate could probably have been secured, and there could have been no opportunity to allege the assumption of doubtful powers by the Bureau officer.

After making this contract, and the passage of the appropriation bill, the Commissioner visited New York, and, in concurrence with the Indian commissioners, made purchases of three or four hundred thousand dollars' worth of goods for annuity purposes, after advertisement. He left in charge of his office his chief clerk as Acting Commissioner, endeavoring to direct its affairs, in part, by telegraph. He was gone, most of the time, for two months. During the time the chief clerk neglected to advertise for further supplies, and the Commissioner being, as he states, absorbed in the New York purchases, did not direct any action to be taken to procure further supplies until the 10th of August, when, without advertisement, he directed Bosler to furnish 1,500,000 pounds more of beef, net, at the rate of the June contract, and from 2,000,000 to 3,000,000 pounds of flour, not to cost exceeding three and a half cents per pound at Sioux City. There seems no reason for the neglect to invite competition, by advertisement, for these supplies, except the absence of the Commissioner, and his attention to the purchases being made in New York. He may have relied on the skill and promptitude of his chief clerk, but we think he should have given personal attention to the matter. The Morrow contract for beef was made September 17, 1870, after due advertisement, and the benefit to the Government from advertising is shown from the fact that the beef furnished under it was contracted for at $3 88 per hundred pounds, against $6 50 per hundred pounds under the Bosler contract. Seventeen proposals were made, averaging about $5 per hundred weight, gross. As there was money to pay the bills, the contractors could offer at lower rates, and the difference the Government gained would probably have been secured in August, if, instead of the August extension, an opportunity for competition had been given at that time. It is alleged, however, that the present contractors are losing heavily under their contract. In regard to the contract made for transportation of goods on the Missouri River, we think an examination of the contract made by the Commissioner, and those by the Quartermaster's Department, will show that the latter are most favorable to the Government, notwithstanding the stress laid upon the value of the way freights provided for in the latter. It is true, the season was advanced when some of the Indian goods, needing transportation, were shipped, and the river was getting low. Any interruption of navigation would lead to great expense in transporting by wagons by the company taking the contract; yet we believe that competition, obtained by advertising, would have secured at least as favorable rates as the quartermaster's contracts afforded; and most of the supplies, if not all of them, could have been carried under the latter contract.

We do not find that the purchases have exceeded in magnitude the wants of the service.

In conclusion of this branch of the subject, your committee would state that they have no action to recommend to the House other than they have heretofore incidentally suggested. We think that the law requiring the supervision of Indian expenditures was wisely intended, and that it should be executed. To give it greater clearness and efficiency the committee proposed recently the following amendment to the Indian appropriation bill, which was adopted by the House, and we trust may become a law by the assent of the Senate and Executive:

That hereafter no payments shall be made by any officer of the United States to contractors for goods or supplies of any sort furnished to the Indians, or for the transportation thereon, or for any buildings or machinery erected or placed on their reservations, under or by virtue of any contract entered into with the Interior Department, or any branch thereof, on the receipts or certificates of the Indian agents or superintendents for such supplies, goods, transportation, buildings, or machinery, until such receipts or other vouchers shall have been submitted to the executive committee of the board of commissioners appointed by the President of the United States and organized under the provisions of the fourth section of the act of April tenth, eighteen hundred and sixty-nine, and the third section of the act approved April fifteenth, eighteen hundred and seventy, for examination, revisal, and approval; and it shall be the duty of said board of commissioners, without unnecessary delay, to forward said receipts or other vouchers so submitted to them to the Secretary of the Interior, with the reasons for their approval or disapproval of the same, in whole or in part, attached thereto; and said Secretary shall have power to sustain, set aside, or modify the action of said board, and cause payment to be made or withheld as he may determine; if he overrules or modifies the action or decision of said board of commissioners, he shall furnish said board with his reasons therefor in writing, which shall be made part of their records.

We have found the system of agents' receipts, as vouchers, unsatisfactory and unsafe, and a change is necessary in the public interest. There is ample opportunity for fraud and collusion in the delivery of goods, both in quantity and quality. There is no present means of ascertaining how often they do occur. We think a vigilant supervision by the board of Indian commissioners, with the real supervisory power proposed in the above amendment, would check many evils almost inseparable from the present mode of receipting and paying for goods.

PAYMENTS TO QUAPAW AND OTHER INDIANS.

The resolution of December 12, 1870, also directed the committee to inquire "whether any portion of the sum of $90,000 appropriated in said act for the Quapaw Indians has been paid to other parties or diverted from its intended use." On this branch of the subject there is little or no controversy as to the facts. By the act of July 15, 1870, the sum of $90,000 was appropriated to enable the Secretary of the Interior to fulfill the twelfth article of the treaty with the Senecas, Mixed Senecas, Shawnees, and Quapaws, to be paid personally to each claimant or his heir, according to tribal usage, *pro rata*, on the awards, as set forth in report of commissioners dated April 25, 1869. About the middle of October, 1870, Joseph A. Williamson, a clerk in the office of the Secretary of the Interior, made the payment under orders from the Secretary. A number of persons were present, and while Mr. Williamson complied with his orders by placing the money in the hands of each Indian, one-third of it was paid to General James G. Blunt, and other portions, doubtless varying in different cases, to the Indian traders, before the parties to whom Mr. Williamson paid it left the room. The mode of payment to each is perhaps best described by Mr. Earle, of Worcester, Massachusetts, one of the committee appointed from New England to take a general interest in behalf of the Indians. As to the payment, he testified as follows: (See page 15 of the evidence taken before the committee.)

When this payment was about to take place, I mentioned that I had come there hoping to see justice done to the Indians, and that I should like to be in the room, if there was space for me. Mitchell said certainly, and I took a seat. I was going to take a seat by a little desk, but he said that that was General Blunt's desk. That was all arranged between him and the agent. There was another seat near Blunt's, which was for one of the clerks of some of the traders. I sat near him, and near another clerk of another trader; Agent Mitchell sat right before me; Jocknick sat in the corner, behind the stove, near the door; Williamson in the center of the room; and the interpreter between us. Thus the payment went on very much as Mr. Williamson has

described it. Sitting back and seeing the whole proceeding, and being a little more disinterested than he, I could perhaps describe it a little more accurately. There was no specific sum paid to the trader, but only the amount of the orders which Agent Mitchell had given for goods for the Indians. I kept a record of it in my book. For instance, No. 75 came in. His claim was $338 21. Jocknick handed a ticket to Pilkinton, who mentioned the amount and handed the ticket to Williamson. Williamson then sung out the amount and handed the money to the Indian. The Indian passed it directly to Mitchell, and Blunt, and myself. I would say how much Blunt was to have. Then the store-keeper would say how much his claim was, and I would tell them how much went to the Indian. Mitchell then handed me back what the Indian should have, and I counted it and handed it to the Indian, telling his interpreter to tell him just what the sum was. Now, for instance, No. 75 had $338 21, Blunt's claim was $112 73, and the store-debt was $40, which left the $185 48. It passed through these forms. I took my seat there because I had heard so much about cheating the Indians that I wanted to see how the thing was, and I thought I would rather be figuring and watching than sitting there idly.

By Mr. BECK:

Q. Could the Indian have taken his money and put it in his pocket and gone out of the house without objection from anybody, if he had wanted to?—A. I think that the chiefs and interpreters would have called him back if he had. It seemed to have been all pre-arranged; it was all understood by the agent, by Blunt, and by the store-keeper; it was thoroughly arranged the day before any of us got there; they told us that it was; they had every sum on the book arranged on purpose to show what the store-bills were, so that there would be no delay about it, and it was proceeded with pretty rapidly, in consequence of everything being systematically arranged.

Q. The common run of the Indians could not have got the full amount of their money from the agent and gone off without settling the 33⅓ per cent. commission to Blunt, and without settling the store bills, without being called back?—A. Undoubtedly they would have been called back.

By Mr. LAWRENCE:

Q. Who was the agent?—A. George Mitchell.

Q. Was all this done with his approval?—A. Yes; I think I can say that without doubt.

By Mr. SARGENT:

Q. Is he still in the service?—A. Yes; that thing was all arranged the day before Williamson got there.

Q. Did Mr. Williamson seem to approve of that course or to object to it?—A. Mr. Williamson said, just as he has stated here, that he had nothing to do only to pay the Indians.

Mr. WILLIAMSON. And I objected to the course?

WITNESS. Yes, I think you did.

Mr. Lang, one of the commissioners, was present, and protested against the payment of General Blunt of the $30,000 out of this $90,000 in every way he could, and so did Mr. Hoag, the superintendent of the Southern Indians. General Blunt testified to the payment to him of $30,000 out of this payment, and claimed that it was his fee as previously agreed upon with the Indians and their chiefs, for services in obtaining the treaty and appropriations from Congress, the contracts having been obtained, in many instances, for him by the present agent, and by the former Indian agent, Mr. Snow. While the committee were not instructed to inquire into any other payments except that made to the Quapaws, information having been laid before them that large sums had been paid to General Blunt and others out of the payments made to the Choctaws and Chickasaws, they interrogated General Blunt on that subject. The following extract from his testimony is taken from pages 55 and 56 of the evidence accompanying this report:

Q. You spoke of your connection with the Choctaws and Chickasaws?—A. Yes.

Q. How much was paid you for that service?—A. The Choctaws paid me forty per cent. and the Chickasaws fifty per cent.

Q. Of what sums?—A. The Chickasaws got $150,000, and $25,000 were taken out of that, and then I got 50 per cent. of the balance. Twenty-five thousand dollars were taken out of the $109,000 for the Choctaws, and I got 40 per cent. of the balance of that.

Q. Do you know how much of the remainder was taken out by others before the Indians got their portion?—A. The money was presented to the Indians, and they settled with me in the same way that the Quapaws did; they came to me directly. I was present at the payment, and when they got their money they came and paid me.

Q. Was there not a large number of claims taken away from the Indians there also?—A. No, sir; there were no claims taken out there. There were some parties on the ground at the payment, but they were not at the pay table. I was not present when the settlement was made with them. There were some few merchants who had sold them goods on trust, and they were there to collect the money.

Q. Who was the agent at that time who made the payment?—A. He was a special agent, named S. S. Smoot.

Q. Did you go there with Mr. Smoot?—A. Yes.

It will thus be seen that out of the payment of $125,000 to the Chickasaws, General Blunt received $62,500; out of $84,000 to the Choctaws he received $33,600, and out of $90,000 to the Quapaws, $30,000; in the aggregate $126,100, out of payments amounting to $299,000. As it was not believed to be of sufficient importance to delay the presentation of this report, the committee did not attempt to ascertain how much was paid to the traders, which could only have been learned, if at all, by sending for witnesses from a distance at great expense; and as neither General Blunt's conduct, nor that of the agents now out of the employ of the United States, nor of the traders, can be investigated by Congress for any other purpose except to prevent the repetition of such extortion and misconduct in the future, the committee think they have performed their duty by calling attention to the facts and the existing laws, and by suggesting such legislation as will prevent a repetition of these things, as it is fair to presume the cases to which the attention of the committee have been directed are only specimens of the whole.

The act of March 3, 1847, 9 Statutes at Large, page 203, after prohibiting the making of payments until all possible safeguards against drunkenness are thrown around the Indians, provides that "all executory contracts made and entered into by any Indians for the payment of money or goods, shall be deemed to be null and void, and of no binding effect whatsoever."

The act of July 21, 1852, section 3, 10 Statutes at Large, page 24, provides "that no part of the appropriations herein made for the benefit of any tribe, or part of a tribe of Indians, shall be paid to any attorney or agent of such tribe, or part of a tribe. * * * Nor shall the executive branch of the Government hereafter recognize any contract between any tribe, or part of a tribe, and any attorney or agent, for the prosecution of any claim against the Government under this act."

The act of August 30, 1852, 10 Statutes at Large, page 56, is substantially a repetition of the last-recited act.

The defect in each of these laws is the failure to provide adequate punishment for the violation of them; the precept is right, but the sanction is wanting. "Thou shalt not steal" is a good commandment, but without provision for the punishment of those who violate it, it would avail little. Your committee therefore recommended the following provision, which was made part of the Indian appropriation bill by an almost unanimous vote of the House, and they are glad to find it has been substantially adopted by the Senate:

> That hereafter no contract or agreement of any kind shall be made by any person, with any individual or tribe of Indians, for the payment of any money or other thing of value to him, or any other person, in consideration of services, or pretended services, for said Indians relative to their lands, or to any claims against annuities from, or treaties with, the United States; and all such pretended contracts or agreements hereafter made are hereby declared null and void, and all money or other thing of value paid to any person by any Indian or tribe, or any one else, for or on his or their behalf

on account of such pretended services, may be recovered by suit in the name of the United States in any court of the United States, regardless of the amount in controversy, one-half of which shall be paid to the person suing for the same, and the other half shall be paid into the Treasury of the United States, for the use of the Indian or tribe by or for whom it was so paid; and the person so receiving said money, and his aiders and abettors, shall, in addition to the forfeiture of said sum, be subject to prosecution for misdemeanor in any court of the United States, and on conviction shall be fined not less than one thousand dollars, and imprisoned not less than six months; and it shall be the duty of all district attorneys of the United States to prosecute such cases when applied to to do so, and their failure and refusal shall be ground for their removal from office. And any Indian agent, or other person in the employment of the United States, who shall advise, sanction, or in any way aid in the making of such contracts or agreements, or in making such payments as are here prohibited, shall, in addition to the punishment hereby imposed on the person making said contract, or receiving said money, be, on conviction, dismissed from the service of the United States, and be forever disqualified from holding any office of profit or trust under the same.

Your committee are not aware that anything can be done to punish those who have heretofore extorted money from the Indians, or aided others in so doing, except to cause strict inquiry to be made into the conduct of such of these persons as are still in the employ of the Government, and dismiss from the service all who have knowingly violated the law. It is but just to say, that so far as these payments are concerned, the Commissioner of Indian Affairs is in no way responsible.

ERRATA.

On page 7, in ninth question, read "J. A. Morrow" instead of "J. A. Morrill."
On page 8, at the end of fifth answer, add "(See page 80.)"
On page 11, last line, insert "page 159" after "appendix" in parenthesis.
On page 12, in tenth question, read "J. A. Morrow" instead of "J. A. Morrins."
On page 13, in sixth line, read "commissioner" instead of "commission."
On page 22, after eighteenth question, read "By Mr. Sargent" instead of "By the Chairman."
On page 36, in parenthesis at bottom, after "referred" substitute "in the appendix."
On page 46, in parenthesis after fifth question, after "are" substitute "in the appendix."
On page 51, after "James G. Blunt sworn" omit "by affirmation."
On page 56, near bottom, read "By Mr. Beck" instead of "By Mr. Peck."
On page 187, in table, twelfth line from foot of page, read "John N. Ely" instead of "John N. Eby."
On page 188, tenth line from top of page, in J. W. Bosler's account, read "Buckly, Welling & Co." instead of "Buckly, Willy & Co."

INVESTIGATION INTO INDIAN AFFAIRS.

PAYMENT TO THE QUAPAW INDIANS.

COMMITTEE ON APPROPRIATIONS, HOUSE OF REPRESENTATIVES,
Washington, D. C., January 17, 1871.

JOSEPH A. WILLIAMSON sworn and examined.

By Mr. SARGENT:

Question. What is your occupation?—Answer. I am a clerk in the office of the Secretary of the Interior, having charge of the Indian trust fund.

Q. Did you some time since convey an amount of money to the Quapaw tribe of Indians; if so, when, how much, and where?—A. During the month of October last I conveyed from the sub-treasury, in the city of St. Louis, Missouri, $90,000, reaching the Quapaw agency on the 14th day of that month, in the morning.

Q. Did any one accompany you?—A. Mr. Jocknick and Mr. Pilkinton accompanied me from Santa Fé; they were of my own party. In addition to that party there were, starting from the stage-house at Seneca, General Blunt and a gentleman named Mr. McBratney. They were there when I got to Seneca from St. Louis. Seneca is about four miles from the Neosho agency, just outside the reservation, in Missouri.

Q. State under what circumstances you paid the money to the Indians, how many Indians were present, and who else besides the Indians.—A. When I was at Seneca, that morning at my breakfast, General Blunt came to the breakfast table and spoke to me, and after a minute or two he said, "I was out at the Neosho agency yesterday, and we had quite a talk there. I made a speech and argued my own case to the Indians, and got all I wanted." I expressed my surprise at that, and when I got to the Neosho agency the first question I asked was whether it was true.

Q. Asked of whom?—A. I asked of Mr. Lang, one of the commissioners. I asked him if the speech or talk had been made, and he replied to me that it had been. I saw the situation in an instant, and asked for a private conference with Superintendent Hoag, Mr. Lang, Mr. Earl, Mr. Nicholson, and two others, all being members of the Society of Friends, and connected with Indian affairs. We had that conference in a room by ourselves. Recognizing the fact that under the act of July 15, 1870, the only supervisory power over the grant was with Mr. Lang, I made up my mind to follow out my instructions, and not to diverge one hair's breadth from them; and I read my instructions in the presence of those gentlemen. After reading them Mr. Hoag suggested that I should take the $30,000 claimed by General Blunt and put it in my pocket. He said that he would do it, if he were in my place, and would throw the responsibility back on the Department. I told him that I could not do that as a disbursing officer; that I was bound by solemn oath to obey my instructions; that these instructions were very severe, and that if I departed from them I would be regarded and treated as an embezzler.

Q. You understood your instructions to be to pay the money to the Indians?—A. Decidedly so, sir. Mr. Lang said that he thought I was carrying out my instructions to the letter, but not according to the spirit. Mr. Earl and Mr. Nicholson stated that they thought I was right in carrying out those instructions just as I said I would do. I then asked Mr. Hoag why he did not send away the Indians to have a council and to let them determine for themselves, and not to let any one interested approach them. He said he had no power over those Indians; that Blunt had all the power, and that Blunt had made this speech. Still recognizing the fact that Mr. Lang was the supervisory commissioner there, I stated that my duty was plain, and that I should proceed according to my instructions, and that from them I would not vary. Secretary Cox had told me that Mr. Lang and Mr. Vincent Colyer would supervise my paying the Indians. There was some discussion afterwards. Finally the hour of dinner arrived, and I begged these four gentlemen to remain and look after their branch of the business. Mr. Hoag said that he could not stay because he had to go to the Miami settlers. Mr. Lang said that he would stay, and the two gentlemen who accompanied him said that they would stay. After dinner we proceeded to the pay-house, which was just a few steps off from the house we were then in. On arriving at the pay-house I found that General Blunt, Mr. Earl, a trader, and an agent had occupied the back part of the room. I at once said that I would have nothing to do with their part of the

business; that that was totally outside of my instructions, and I had nothing to do with it.

Q. What part of the businsss?—A. This arrangement for the payment of General Blunt. Some one replied, (I have forgotten now who it was,) "It is your duty to see to the interests of the Indians." I said, "Gentlemen, I can have nothing to do with that; our party is a totally distinct party from that; my instructions will be carried out to the letter." I then walked in front of the pay-house, where those Indians, to the number of about two hundred, had gathered on the lawn, and I read to them the articles of the treaty authorizing this payment, and explained through an interpreter what it was for, and also what my instructions were, stating that I would recognize no attorney or trader at all in the business. I then proceeded to the payment in the way in which I have always paid Indians. First the name of the Indian was called out with the number of the claim and the amount due him, so that all could hear it, I having the principal chiefs right by my side, and Mr. Jockinck being just at the other side, so that the Indians would have to go to him first to get the ticket, on which was the number of the claim and the amount due to them. The Indian was then brought forward and identified by the chiefs and the interpreter. He then touched a pen, which is the Indian way of making a signature, and was handed this ticket, which I took, and counted out the money in full to him. In order that there should be no mistake, the Indian took it to the agent, who counted it again, which was a protection to the Indian and to me also. There my duty under my instructions stopped.

Q. You gave into the hands of each Indian the amount of money due to him?—A. Yes, sir; and that afterwards was counted in the presence of the chiefs and the headmen of the tribe and the interpreter, by the agent.

Q. What took place after that was done?—A. Immediately after the agent counted the money General Blunt would make his claim of 33⅓ per cent. on the whole amount. The calculation was made by Mr. Earl and the agent as to how much was to come to Blunt, and that was deducted from the amount held by the Indian and paid over to General Blunt. The amount of the trader's claim was also deducted and paid to the trader, and the balance was retained by the Indian. That was, as well as I understood, the operation. Several times during the proceedings I lost my temper somewhat, and spoke of this thing and protested against it in the name of the Government. I was replied to again that it was best for the Indian that the matter should be treated in this way, so long as it had gone that far.

Q. Who said that?—A. I think that at one time the agent said it, and I think that another time the agent also said it and Mr. Earl coincided with him. I am not sure, however, about Mr. Earl; but that is my impression. At any rate, that plan seemed to be acquiesced in by the gentlemen in that end of the room. Finally, after I had spoken several times, I found that I had just simply to submit to the delay, especially as I had received from Secretary Cox the assurance that if I squared up with the Indians, and if they afterward threw the money into the Arkansas, it was not the business of the Government. But it is just to Secretary Cox that I should say that when I went to him for general directions he said, "There is one thing which I wish to impress on your mind, and that is, that you allow General Blunt no privileges." That was why I was startled when I heard that this speech had been allowed the day before the payment while I was not there.

Q. What was the amount received by the trader?—A. I cannot tell you; I do not know. Mr. Earl, I believe, took down the amounts in his book. I had nothing to do with that, for I really kept my own part of the business clear from it.

Q. You say that Blunt received 33⅓ per cent of the $90,000?—A. Yes, sir; there is no question on my mind about that.

Q. Who was the agent?—A. Mr. Mitchell.

Q. What did Mr. Lang have to do with the matter? what was his office?—A. He was commissioner of the Board of Indian Affairs. I did all that I could to get those gentlemen there under the instructions from the Department. My instructions were these: I was to make the Creek payment, and at that time I was only to make the Creek payment. Mr. Lang and Mr. Colyer, as I understood Secretary Cox, were to be present at that particular payment. There were particular reasons why I should go there, and there were particular reasons why they should be there, owing to certain discoveries made in the Department. I think you ought to know that General Blunt was on my bond, and the reason why he was on my bond.

Q. State concisely how he happened to be on your bond?—A. About the middle of August the Secretary sent for me and said, "Mr. Williamson, I have determined to send you to the Creek agency, to make the Creek payment to the loyal refugees and freedmen." I objected in toto, saying that it was a dangerous and a responsible trip, and that, no matter how honestly an agent did his business, he was subject to censure. He replied to me, "Under the peculiar circumstances of the Creek agency payment you are the man to go. Mr. Colyer will meet you there and will examine into certain vouchers to the amount of 33 per cent. given in favor of certain parties. If Mr. Colyer is satisfied that those are good vouchers, you are authorized to take $15,000 of this money and

bring it back here, to cover a certain deficiency," (which I had discovered but a short time before.) He said, "General Blunt is the person who is to represent that particular party through whom the default has occurred." Said I, "Mr. Secretary, if that is the case, I think it is my duty to find out all that I can," and I instantly applied to General Blunt to go on my bond for a hundred thousand dollars for that particular payment. My reason for doing that was simply this, that as I had to take a hundred thousand dollars through a dangerous country, and as General Blunt was an interested party, and as others were interested, I felt that they should bear that burden, and not an innocent party, if any one was to suffer or if the money was to be lost. At that time it was not known that I was to make the Quapaw payment, nor did I know it myself. The Secretary agreed to that; he understood it perfectly. He sent me down to make the Creek payment. I found that the commissioners had not waited for me at St. Louis or at Baxter Springs, and I telegraphed to Mr. Lang and Mr. Colyer to meet me. I got there on Saturday, and I held back the payment until Monday, in the hope that the two commissioners would get up with me. I found great excitement there. There were two parties of Indians, one declaring that they would pay those vouchers, and the other declaring that they would not, and there was very bad blood. I waited until 9 o'clock on Monday morning, and I then got up and made a speech and sent the Indians off into council, where they decided that they would not pay this claim. That settled the question, and I went on and paid them without any difficulty at all, and not an attorney or a trader got a dollar. That was the reason why I applied to General Blunt to get him on my bond; he did not apply to me.

Q. Is General Blunt on your general bond?—A. Secretary Cox sent for me after that arrangement and remarked to me: "Mr. Williamson, I have decided to give you the Quapaw payment to make." I objected to that. I said, "Mr Secretary, recollect that General Blunt is on my bond." He said, "Mr. Williamson, Commissioner Parker and myself have examined the law on the subject and we find that, as you are in the employ of the Government, you can go without a bond." I said, "If you wish another bond I can go to Pennsylvania to-night and get a bond; but as it is I will get another person on the bond," which I did, for $50,000. He said that there was no necessity of my going to Pennsylvania. Then I had on the top of that payment $75,000 more put, and then $125,000 more, and on top of that $218,000, making in all $1,009,000, which I disbursed. That is the history of Blunt's going on my bond; it had no connection with the Quapaw payment.

By Mr. BECK:

Q. You paid these Indians $90,000?—A. Yes, sir.

Q. Thirty thousand dollars of which went to General Blunt at the same time?—A. So I heard.

Q. About how much did the trader get?—That I cannot say, because I took no notice of it.

Q. What was that money paid to the trader for?—A. Agent Mitchell met me as I was proceeding to the pay-house and said that he had some orders payable to traders, which I ought to recognize, because they were for provisions given when the Indians were near starving. I said that if an angel from Heaven asked me to pay a trader I would not do it.

Q. Were the Indians obliged to make these payments to General Blunt and the trader; could the Indians have got off without making these payments?—A. O, yes, sir; I am perfectly satisfied about that, because I told them in my speech that it was their own money, and that they could do just what they pleased with it. I was very cautious in that respect, in my speech to them, to tell them that the money was theirs.

Q. And you think there was no attempt to make them understand that the payments to General Blunt and the trader were part of the programme?—A. I am satisfied of that from what I heard.

Q. And whatever payments they made, they made voluntary, with the full knowledge that they need not do it unless they wanted to?—A. I think so; I would not like to say, but that the speech of the day before had its moral effect upon them.

Q. I want to know whether they made these payments to General Blunt by coercion?—A. Not what I saw; my back was to them. From the first I was earnest in my protest against that part of the business.

By Mr. SARGENT:

Q. Did Blunt, at any time during that scene, state what the $30,000 were for?—A. No, sir; not in my presence.

WASHINGTON, D. C., *January* 17, 1871.

GUSTAVUS P. JOCKNICK sworn and examined.

By Mr. SARGENT:

Question. Where do you live?—Answer. In this city.

Q. What is your occupation?—A. A clerk in the office of the Commissioner of Indian Affairs, in the Interior Department.

Q. Did you accompany Mr. Williamson to the Quapaw agency?—A. I did.

Q. State concisely what took place there within your observation.—A. We left Seneca, on the borders of Missouri, on the 15th of October, and proceeded to Neosho agency, some three or four miles from there. Mr. Lang and Mr. Nicholson were there before us, staying with Mr. Mitchell, the agent. General Blunt left Neosho at the same time that we did, and after arriving, say about 8 or 9 o'clock in the morning, there was a conference held in one of the buildings of the agency, which was protracted some time. Payment was deferred till the afternoon of that day. I was not present at that conference, but I understood that Superintendent Hoag, of the central superintendency, Mr. Lang, doctor, and Mr. Williamson, were present. Afterward we proceeded with the payment. The payment took place in a building occupied as the agent's office. There were three tables placed in it. The one in the center of the room was occupied by Mr. Williamson, the one near the door was occupied by myself, with the rolls, and the one at the further end of the room was occupied by General Blunt, a trader at Seneca, whose name I do not recollect, and a part of the time by Mr. Earl and Dr. Nicholson, and during the whole time by Agent Mitchell; also by Mr. Snow, who formerly had been agent of the Indians. The payment proceeded in the same manner as we had previously made payments. An interpreter was at the door who called the names of the Indians. As I called them out from the rolls he repeated the names. The Indians came up, came into the room, and the chiefs who were present identified each Indian as being the person named. Then I gave to the Indian a ticket for the amount placed opposite his name. The Indian took this ticket to Mr. Williamson, who handed him the money which the ticket called for, and directed him to take it to the agent, Mr. Mitchell, to be counted over again; and so we proceeded until the whole payment was completed on the evening of the following day. It took one day and a half to make the payment.

Q. What became of the money after it was paid to the Indians?—A. From the way in which I was placed in that room with my face toward the door, and constantly occupied with my rolls and making out tickets, I could not pay any attention to what was going on at the table at the further end of the room. It was only occasionally when I looked back that I could observe what was done. I noticed that the money was placed in the hands of the agent and counted by him, and that he then put the money in the hands of those two gentlemen, Mr. Earl and Doctor Nicholson, members of the Society of Friends.

Q. What did they do with the money?—A. They counted it, and there it was divided. General Blunt received a share, and the trader received a share, and the balance was placed in the hands of the Indian.

Q. Who handed the money to Blunt and the trader? Was it the Indian or was it any white person?—A. The Indian. The money was first placed in the hands of the Indian by Mr. Williamson, who directed the Indian to go to the agent to have it recounted. The agent, after counting it, handed it to Mr. Earl and Doctor Nicholson, to be counted over again by them. That is as far as I observed.

By Mr. BECK:

Q. Who counted Blunt's share to him?—A. I cannot say who put that money in the hands of Blunt. I was sitting near the door with my back toward him, and I was incessantly engaged with my rolls.

By Mr. SARGENT:

Q. Did you hear General Blunt make any statement in that presence of the service which entitled him to this money?—A. Not in that presence. In conversation with him I may have heard him say so, but not in that presence.

WASHINGTON, D. C., *January* 17, 1871.

JOHN D. LANG sworn by affirmation and examined.

By Mr. SARGENT:

Question. What connection have you with the Indian service?—Answer. As one of the President's commissioners, one of the ten.

Q. Were you present at the payment to the Quapaws; if so, how came you to be there, and what did you observe in connection with it?—A. The cause of my being there was from a special telegram from Secretary Cox to me while I was on my return home from the settlement of the Osages. Before I reached my home, I had a telegram

that Secretary Cox wished me to return and attend to the Creek payment, and the Quapaw payment, and the other payments that were coming on, if I could attend to them. I telegraphed to Vincent Colyer to meet me on my way home in Philadelphia, that I might ascertain what was expected of me. I had been out a long while and was weary, and did not want to go back again. He met me according to appointment, and I found that the condition of my family was such that I must return home to Maine. I returned home as quickly as I could, stopped at home a day or two, and went on immediately, night and day, until I got to the Creek payment, which was then just commencing. I expected to find special instructions in St. Louis in care of the postmaster, and for fear that there might be some mistake about it, I went to Washington to see the Secretary. He was absent, and I went to see the clerks of his Department, who searched for copies of letters, to the effect which I expected, but they found none. I proceeded immediately on to St. Louis, and made the inquiry there of the postmaster, and waited over a part of the day so as to let the last mail come in, but I got no letters, and went on immediately to the Creek payment. That payment was conducted well, and I certified to the same. I found that Paymaster Williamson had instructions from Secretary Cox. When that payment was got through with he had to go to St. Louis to spend perhaps a week to get the rest of the money, as he said, to pay to the Quapaws; and I went on to visit the Indians by the way. I went to the Quapaw tribe, and made all the examination I could into their condition. I ascertained their condition as well as I could until the time came for Williamson to come back. He did not got back as soon as was expected; but the day that he was expected back, we being at Baxter's Springs, I got an intimation that there was likely to be trouble there about this Blunt matter, and that Blunt was claiming a portion of the money. I was alone there, and I saw that there was no one who could be reached in the matter except Mr. Hoag, the superintendent, whose duty it was to look after the interests of the Indians. I went to the telegraph office and telegraphed to him in a very pressing manner for him to come on immediately without fail. He started off the next morning, and, as I understood, just as he was getting into the cars, William Nicholson, the one spoken of here, was about getting out, and Mr. Hoag mentioned to him that he had got a telegram from me, and that there was some great trouble, but that I said nothing about what it was, except that he was to come on immediately. He came in the evening, and I met him at the cars. We talked the matter over, and I told him what I had heard since I had arrived there from persons who knew the Indians. I had agreed that afternoon to send for some of the principal men of that Quapaw tribe and the interpreter, who was said to be a most influential man. I talked with the interpreter on the subject, but I could get nothing out of him, except that that was a settled matter. My advice to him was that it would be a very sad thing for them to have anything of that kind take place, because it would be to their injury to have their money wasted. The man said he would do what he could about it, and he left it in a very indefinite manner. We started the next morning to the Quapaws, taking dinner at Seneca, and not getting to the Quapaws until the afternoon. We found some persons there. I think Blunt was not there, nor any of these men who appeared afterward, but they came early the next morning, before Williamson got there. Blunt had been at the other payment, but nothing was said about his taking anything from the Quapaws that I remember. This matter was talked over between Hoag and me, and I gave my strong reasons and opposition against anything being paid in that way to Blunt. The paymaster came, I think, about ten o'clock in the morning.

Q. Before Williamson came there did Blunt make a speech to the Indians in your hearing?—A. As to the time I feel a little lost as to the exact time, but I think he made the speech in the forenoon. I heard it myself. I will not say whether it was before Williamson came or not.

Q. State what Blunt said in that speech.—A. He called the Indians together and got up, and said that there had been some stories about his having something from the Indians, and that he was not going to deal with them, or that he had not dealt with them well; and he wanted to inform the people who were there and the Indians about it. He then stated that it was said he was about taking a good deal from the Indians, and he went on to give his reasons about it. He said he had done a good deal for the Indians, and that they had agreed to pay him a certain amount for it. I think he stated that it was one-third part. He said he had made a fair bargain with them. He had his powers of attorney, as he called them, and he handed them around to us—to me first—that we might look over them. I looked at a few of them; but there they were passed around and the others looked them over. I asked the question when these powers of attorney were made. The papers showed the date; they were made a year before. I asked the agent, Mitchell, if he had witnessed these papers, and he said yes. I said, "The Government agent witnesses such papers as these!" He seemed to be very much astonished at what I thought about it. I told him that it was a very sad thing that he should witness any instrument of that kind as a Government agent. The thing passed off, and no more was said about it. I made some comment on his course in this matter. I felt it very much, because I had seen the condition of the Indians, and that

they were very poor and destitute and suffering, and I felt very sad about it that they should have what little money they were entitled to taken away from them. I so expressed myself to Blunt. Blunt seemed to say something in regard to some other persons who had circulated these stories around; and in his speech to the Indians he said: "Friend Lang seems to think that I am getting a good sum—an extravagant sum; but it is not so much that I shall get. I have paid out already $6,000 to get this bill through;" speaking of the Government, as I thought, in a derogatory manner. He said that a pressure had to be brought upon the Government to get the claim passed. He said that it was an honest debt, but that a pressure had to be brought upon the Government to pay it; that he had spent $6,000 in it, and was expecting to be called upon for $10,000 more, and that would leave him but a small sum comparatively.

Q. What did he say about the persons to whom he had paid that money?—A. I do not recollect his saying anything about that to me. He had conversation with other friends there.

Q. Did he say anything about spending money to get the claim through Congress?—A. He said he spent $6,000 to get the claim through; that he had spent $6,000 already, and expected to be called upon for $10,000 more.

Q. Did he say that the expenditure of that $6,000, and the prospective expenditure of $10,000 more was to Congressmen, or for the purpose of influencing Congressmen?—A. I do not think he did to me.

Q. Did he in that speech?—A. No. This communication was merely addressed to me in that feature of it, in answer to my complaint of the amount which was going to be taken by him.

Q. Are you now speaking of a private talk with him or of the speech to the Indians?—A. It was no private talk. As he was speaking to the Indians, he seemed to direct his attention to me, and called my name out, saying that I thought this was a very great sum for him to get, but that he had paid $6,000 out, and that he expected to be called upon for $10,000 more. In his address to the Indians, in my hearing, he said something like this: "You have never gone back on me, and you will not now, will you?" And the interpreter replied they would not.

Q. Did the Indians make any exclamation in their own language when the interpreter spoke for them?—A. I do not think they did. The interpreter was a sergeant in the Army with Blunt during the war.

Q. The interpreter answered for the Indians without their making any exclamation?—A. Yes; they made none that I remember.

Q. You have heard the testimony of the other witnesses in relation to the manner in which the payment was made. Do you know anything additional to or differing from what they said?—A. I think they stated it pretty nearly as it occurred.

Q. If you know anything additional to or differing from their statements, you may state it.—A. I heard a part of Paymaster Williamson's testimony. What I observed about the manner of payment was this: It was a very small building; and when I went to see how the thing was arranged, I found that the whole building was filled up. I do not think I was in the building after the payment was commenced. I only staid for awhile at the door. The building was filled up. Mitchell and Blunt and some friends were at the table toward the end of the room.

By Mr. BECK:

Q. What building was it?—A. It looked as though it might be a little shop or store house.

Q. Was it a Government building?—A. Yes; I presume so.

Q. Is it a building where anybody had a right to be without the paymaster's consent?—A. I suppose nobody had a right to go in except Government officers.

Q. Could either General Blunt, or the traders, or anybody else have gone there without the consent of the paymaster, or of a United States officer?—A. No, sir; they had no right there without the consent of the paymaster.

Mr. WILLIAMSON. It was under the control of the agent.

By Mr. SARGENT:

Q. Who could control the matter; the paymaster or the agent?—A. The paymaster could do it or the agent could do it. The paymaster had done it in other cases. He excluded people at the payment of the Creek Indians, and he could have done it there, and so could Mitchell, the agent.

By Mr. LAWRENCE:

Q. I suppose there was no particular place where the paymaster was bound to pay the Indians?—A. No, sir.

Q. He was not bound to pay them there if it did not suit him?—A. No, I suppose not. It troubled me so much that I came away; I did not seem to have anything to do after I desired the paymaster to suspend payment until he could hear from Washington.

By Mr. BECK:

Q. What was that last suggestion you made: did you desire the paymaster to suspend the payment until he could hear from Washington, owing to this claim set up by other parties?—A. Yes, sir.

Q. State what took place on that subject.—A. I manifested my feeling about its being wrong and unjust, and we talked it over to see whether we could arrange anything about it. My statement was to the paymaster that if the money was in my hands, I would not pay it. Hoag and myself agreed in the matter that if the money was in our hands we would suspend the payment until we could hear from Washington. The paymaster stated that he had had a private conversation with Secretary Cox almost the last thing before he left Washington, and that Secretary Cox told him that he wanted him to pay the money into the hands of the Indians, even if it was thrown into the Arkansas afterward. That seemed to be his argument against suspending the payment, and, therefore, he thought that under the circumstances he must go on with it.

Q. Did you make any suggestion about retaining in his hands the portion claimed by others?—A. This was one of the propositions in the course of canvassing the matter. I looked at this point, that the Indians were needy, and that if their two-thirds was paid out to them, the other third claimed by Blunt could be retained. I said, as a commissioner, that I could not consent to its being paid to Blunt if it was in my power to stop it; but when the paymaster made this statement as to what Secretary Cox told him, (and it appeared to me that he was honest in it,) we had nothing to do but to let him go on with the payment. I had nothing to do with the other Friends who were there, and I differed in opinion with them. Nicholson stated that he thought the promises of the Indians ought to be fulfilled. I considered that they were wards of the Government, and that they ought not to waste their money, and that, if they wasted their money in that way, Congress would withhold appropriations in the future. That was my view of it. It was stated there that, but for Blunt, the Indians would have lost the whole of it. Blunt said so, and they were willing to pay him for it.

WASHINGTON, D. C., *January* 17, 1871.

VINCENT COLYER sworn and examined.

By MR. SARGENT:

Question. You are secretary of the Indian commission of ten?—Answer. Yes.

Q. A contract for beef, bacon, flour, and other articles was made on the 17th of June, with J. W. Bosler, for a large quantity of those articles to be delivered on the Missouri at different stations. The contract was for goods to be delivered on the 15th of July, the 1st of August, and the 1st of September, 1870; was your commission consulted with reference to the making of that contract, or called upon to make any inspection of the goods delivered under it?—A. Not that I am aware of. I think if it had been, I should have known of it.

Q. Are you familiar with all the operations of the commission; is it your duty to be so?—A. It is; and I am.

Q. There was an extension of that contract on the 10th of August by which fifteen hundred thousand pounds of beef was ordered to be delivered at the same agencies. Was your commission consulted in reference to the extension of that contract, and as to the prices to be paid under it?—A. No, sir; it was not.

Q. Were you called upon to inspect any of the goods?—A. No, sir.

Q. A contract was made on the 17th of September, with J. A. Morrill, for the delivery of a number of millions of pounds of beef on the hoof. Was your commission consulted in reference to the prices to be paid under that contract?—A. No, sir.

Q. Or as to the making of the contract, or as to the expenditure of the money?—A. No, sir.

Q. Was the commission required to inspect the cattle delivered, ascertain their weight or number, or anything connected with it?—A. No, sir; nothing whatever.

Q. A contract was made with a transportation company on the Missouri River by which certain prices were to be paid for the transportation of Indian goods up the river, and also by wagons, if necessary. Was your commission consulted with reference to that contract, or any expenditure under it?—A. No, sir.

Q. In the Indian appropriation bill for the fiscal year ending June 30, 1871, passed July 15, 1870, there is the following provision: "It shall be the duty of said board of Indian commissioners to supervise any expenditure of money appropriated for the benefit of the Indians in the United States, and to inspect all goods purchased for said Indians in connection with the Commissioner of Indian Affairs, whose duty it shall be to consult with the said commission in making purchases of said goods." Was your commission called upon to perform its duties under this section, by the Commissioner of Indian Affairs, in any of the contracts to which I have alluded?—A. No, sir.

Q. There was a further contract made with J. W. Bosler for the delivery of a large amount of bacon in Chicago, on the 26th September, 1870. Was your commission consulted as the making of that contract?—A. No, sir.

Q. Was it called upon to inspect any of the goods?—A. No, sir.

Q. To ascertain their weight or whether the contract was carried out in any respect?—A. No, sir.

Q. In voucher No. 8, furnished by the Auditor, there is an item for an amount paid to Ezra Taylor, for inspecting bacon, $132 50; was Ezra Taylor one of your commission?—A. No, sir.

By Mr. BECK:

Q. By section 4 of the act approved April 10, 1869, two million of dollars was placed in the hands of the President, for the purpose of maintaining peace and promoting civilization among the Indians. That section contains this clause: "And for the purpose of enabling the President to execute the powers conferred by this act, he is hereby authorized, at his discretion, to organize a board of commissioners, to consist of not more than ten persons, to be selected by him from men eminent for their intelligence and philanthropy, who may, under his direction, exercise joint control with the Secretary of the Interior, of the disbursements authorized by this act." Did the President organize a board under this act?—A. Yes.

Q. State what authority the President, under that act of April 10, 1869, conferred on the board.—A. That can be better answered by referring to the President's own executive order, which will be found in our report of last year, and which I will furnish to the committee. The powers were general and yet pretty thorough. It was distinctly laid down that we should be made acquainted with the general transactions of the Commissioner of Indian Affairs in the expenditure of that $2,000,000. The order covers that.

Q. What I want to get at is this: Any contract made by the Commissioner of Indian Affairs with Bosler on the 17th June came under the provisions of the act of April 10, 1869, and not under the provisions of the act of July 17, 1870?—A. Yes, sir.

Q. Did you understand that it was made by the executive order the duty of the Commissioner of Indian Affairs, when he made the contract with Bosler on June 17, 1870, to consult and confer with your commission in any way before he made it?—A. That would be my interpretation of the President's order, but it had not been the practice of the Commissioner to do so.

Q. And in that contract it was not done?—A. It was not done.

Q. You had no connection with the contract or with the prices paid under it?—A. No, sir.

Q. Have you seen that contract?—A. I have seen it since. I saw it only lately.

By Mr. SARGENT:

Q. Was there any reason, such as the absence of the board, why it could not be consulted about that contract?—A. No, sir, there was no reason. A sub-committee of our commission was named to regulate purchases. It consisted of George H. Stuart, and William E. Dodge, and several other gentlemen. They did not go on the tour of inspection into the Indian country, but remained at their offices in Philadelphia or New York, where they could have been consulted at any time by the Commissioner.

Q. Has the Indian commission in any way acted under that section of the law?—A. Yes, sir.

Q. To what extent?—A. In the matter of the purchase of annuity goods in New York on the 21st, 22d, and 23d of July.

Q. What class of goods were they?—A. What is known as annuity goods—dry-goods, clothing, hats, shoes, blankets, cloaks, &c.

Q. And did your board inspect all of these goods purchased since the passage of the last appropriation bill?—A. We inspected the great bulk of what was advertised for, but there were other goods afterward purchased as presents and sent out to the Indian country which we did not inspect.

Q. Were you called upon to inspect them?—A. Not that I know of.

Q. Do you keep the records of the board?—A. Yes, sir.

Q. Would there have been a record of it if inspection had been made?—A. I think there would be. I should have heard of it. The presents that were purchased were purchased some little time after the commission had made their great purchases in the latter part of August.

Q. Do you know how the prices and quality of the goods inspected compared with those bought without inspection?—A. The contrast was very marked. The method of advertising under our superintendence was changed from the old method. By the old method the proposals were worded that the bidding should conform to a specimen in the possession of the Department. Our committee on purchases conceived that that was a disadvantage to many of the manufacturers; that it gave the manufacturer of that particular article of which there was a sample in the Indian Department an advantage over other manufacturers, because those that bid had to have goods conforming to that particular sample. The committee changed this and made it so that every merchant or manufacturer should bring in his own samples and his prices, and the committee could thus judge between the goods presented for their examination and between

the prices, and they purchased those which they thought best and cheapest for the Indians. The committee not only changed the mode of advertising, but took special pains that the advertisements should be in the papers longer than usual, and should be generally circulated. They extended the time for the advertisements, and also took pains to see that the advertisements were cut out of papers and copies sent to the most prominent manufacturers and merchants. The committee also addressed circulars to the leading merchants and manufacturers.

Q. What effect had that on the purchases?—A. It had the effect of making more men send in proposals. A better class of bidders were induced to compete: such men as A. T. Stewart, H. B. Claflin, and others. They sent in specimens, and informed us that it had not been their custom, heretofore, to compete for the contracts, as they had no probability of getting them, but that, as they saw there was likely to be fair dealing now, they were willing to take the trouble to send us specimens and prices.

Q. What was the effect, as to the quality and prices of the goods?—A. We purchased our goods at first hands. We bought our blankets from the manufacturer, Mr. Dobson, of Philadelphia; we also bought from H. B. Claflin & Co., and from the manufacturers, at first prices.

Q. What was the result as to quality and prices?—A. The advantage was that we got much better goods at much lower prices.

By Mr. BECK:

Q. What do you know about the urgent necessity that existed, if any, about the 18th of June, 1870, for immediate supplies to be furnished to the Indians of Dakota?—A. Officially I know nothing about it.

Q. Do you know, personally, anything of the kind?—A. No, sir.

Q. Do you know of any exigency that existed which required the extension of the contract in August?—A. I do not know of any, officially, because we were not called upon in any way to say anything about it.

Q. What do you know about 6½ cents per pound being paid for beef under the contract of 17th of June, and about that being a reasonable or unreasonable price?—A. I only know from the statement which I have heard from Chief Commissary Eaton.

By Mr. SARGENT:

Q. Did you see any blankets or other goods in the Osage country of inferior quality—of such quality as would be rejected upon inspection?—A. Yes, sir. We did not see them in the Osage country. They did not arrive there in time, as they ought to have done. We were there three weeks or more negotiating with the Osage tribes, and in the mean time we were waiting for those goods which were to be sent on as presents to the Osages. When the invoices arrived giving the prices of the goods, our attention was called to them by seeing that the price of blankets was considerably higher than the blankets had been offered to us for in New York a few weeks before. We found upon the invoices that there were red blankets there of a certain pattern, style, weight, and number of inches, which were charged at $8 a pair, and which the same house had offered to sell to us in New York at $6 80. Seeing that, we asked Agent Gibson, when those presents arrived after our departure, to see to it that samples were sent on to us at Washington, so that we might see unmistakably that they were the same articles. The samples arrived here a week or two ago, and we found that the blankets which were charged at $8 a pair were the same that had been offered to us in New York at $6 80. We found, also, that the blankets were to be furnished to the Indian Department up to the 20th of August. That was the day when we were instructed to report on the Osage grounds to meet the chiefs, and it was understood that those goods were to be there at that time.

Q. What was the extent of that purchase?—A. Not very large in the blankets. There were 200 of those and 200 of another quality, Mexican blankets, very inferior, which were sent, also, at prices much greater than should have been paid for them.

Q. Who made those purchases?—A. The Commissioner of Indian Affairs, I presume. They may have been purchased after our commission left the office at New York. Those blankets that were offered to us in New York at $6 80 were offered by the house of Amidon, Lane & Co. This firm had as sureties Thomas T. Buckley and Henry J. Marsh, and this Mr. Buckley was of the firm which afterward sold the blankets at $8 apiece.

By Mr. CHIPMAN, counsel for Mr. Commissioner Parker:

Q. With regard to your instructions which you have interpreted, did not your board also claim that it should have the right to disburse all the funds, and was not that the question that was early raised with reference to the duties of the board?—A. No, sir; our board did not claim that.

Q. What was the claim by your board about which some controversy arose?—A. That was before I was a member of the board.

Q. That matter was before the Secretary?—A. I think it was raised by Mr. Welsh, then our chairman; but my impression is that it was not raised by the board.

Q. Prior to the purchase of the annuity goods in New York City of which you have spoken, where were the commissioners?—A. They were at their homes.

Q. Were you not the only one in Washington?—A. I was the only resident member; but there were other members constantly coming here.

Q. Where was the board on the 17th of June, 1870?—A. The office of the board was in Washington.

Q. I speak of the members of the board?—A. They were at their residences, I presume. I was the only one in the city.

Q. Do you recollect whether you were here?—A. Yes, sir; I was here.

Q. When did the members of the board who traveled through the western country depart on that duty; was it prior to the purchase of the annuity goods, or afterward?—A. A portion of them afterward.

Q. Had some of them already been in the Indian country prior to that purchase?—A. Last year they were.

Q. I speak of the Bosler beef contract of the 17th of June?—A. The members were at their homes at that time, but the office was in Washington.

Q. Do you know whether any member of the board, or yourself, ever asked the Commissioner of Indian Affairs for permission to participate in the purchase of beef or of supplies mentioned in the contract alluded to?—A. No, sir; they were not likely to do that.

Q. Did they ever offer to do it?—A. No, sir; I do not think they ever offered to do it.

Q. Did they ever take any steps toward assisting the Indian Bureau in the purchase of annuity goods?—A. Our chairman notified Mr. Parker that the commission was ready to assist him in those purchases.

Q. In what purchases?—A. In the purchase of these goods.

Q. The annuity goods?—A. I presume any goods.

Q. I want the facts?—A. They said they were ready to assist him in his purchases.

Q. When did the chairman make that offer?—A. On the 3d of June, 1870.

Q. Prior to that time you have no knowledge of any offer of that kind?—A. No, sir; there was a standing order to that effect from the President.

Witness produced and put in evidence the letter of 3d of June, 1870, from Mr. Brunot to the Commissioner of Indian Affairs, and the letter in reply of July 18th, 1870. The following are copies of these letters:

"DEPARTMENT OF THE INTERIOR, BOARD OF INDIAN COMMISSIONERS,
"*Pittsburg, June* 3, 1870.

"DEAR SIR: At the last meeting of the Board of Indian Commissioners, I was not able to inform the committee intrusted with the duty of advising with the Commissioner of Indian Affairs in regard to the purchase of goods, at what time the spring purchases would be made and their services required.

"It is desirable that they should have some notice in advance, so as to suit their arrangements to your convenience. I will be obliged to you if you will let me know when you purpose to make the purchases, and to confer with the committee on the subject.

"Please address reply to Mr. Colyer's office, as I expect to be in Washington on Monday, 6th instant.

"Very respectfully, your obedient servant,

"FELIX R. BRUNOT, *Chairman.*

"Hon. E. D. PARKER,
"*Commissioner of Indian Affairs.*"

"DEPARTMENT OF THE INTERIOR, OFFICE OF INDIAN AFFAIRS,
"*Washington, D. C., July* 18, 1870.

"SIR: The Indian appropriation bill having been passed by Congress on the 15th instant, I am now able to answer your letter of the 3d ultimo, relative to the time when the purchase of Indian goods will take place.

"I shall be in New York on Thursday, the 21st instant, with a view of making the necessary Indian purchases, and I shall be happy to meet you or any of the commissioners at 10 o'clock a. m., at the Fifth Avenue Hotel, for consultation as to the best method of proceeding expeditiously in this business. The season is so far advanced that no time can be lost in this matter.

"Very respectfully, your obedient servant,

"E. S. PARKER,
"*Commissioner.*

"FELIX R. BRUNOT, Esq.,
"*President Board of Indian Commission, Pittsburg, Pa.*"

Q. Do you know the condition of the Indian Bureau about the time that the appropriation act of July 15, 1870, was passed; whether there was any balance left of the $2,000,000?—A. I know that there was a balance left, because there is still a balance of

that $2,000,000 in the Treasury. I do not know to what amount. Mr. French, the Auditor, told us the other day that there was still a balance remaining.

Q. You spoke of voucher No. 8, which was put in evidence, for the service of an inspector of bacon; do you know anything of the circumstances under which that item was paid?—A. No, sir.

Q. You do not know what service was performed, or under what circumstances?—A. No, sir.

Q. Are all the powers that are conferred upon your board contained in the President's instructions, together with such as are to be derived from the law?—A. Yes.

Q. You have no verbal instructions that you act under, except that order and the law?—A. No other.

Q. Then anything which you have said about your impressions of what your power is are only inferences from the order and the law?—A. Yes, sir.

Q I believe you said that you knew nothing of the contingency under which the Commissioner let the contract alluded to?—A. Not officially.

Q. With reference to the small lot of presents sent to the Osage country, did not the board telegraph to the Commissioner to have them forwarded?—A. Our committee in the Osage country telegraphed two or three times to know why they were not forwarded.

Q. Did not the board know that the Commissioner was making the purchases himself?—A. We supposed they had been made, for I was present at the inspection in New York of the great bulk of the purchases.

Q. You supposed they would be included among your original purchases?—A. Yes, sir.

Q. And you afterward discovered they were not?—A. Yes.

Q. How did you come to telegraph to the Commissioner?—A. We supposed that the purchases had been made.

Q. And then he made the purchases under the spur of your telegram?—A. That we do not know.

Q. You had omitted to purchase them yourself, and after you got West you found that they were not included in your purchases?—A. No, sir, we did not omit anything; it was not our duty to purchase them.

Q. Then the Commissioner has violated no instructions or order in regard to that matter?—A. He did not call upon our board to supervise the purchase.

Q. I understand you that when you were in New York you did not make the purchase of those presents?—A. We did not make any purchase.

Q. I mean you did not supervise it?—A. That is it; we did not supervise it.

Q. And after you got West you found that the purchase had not been made?—A. We found that the goods were not forwarded.

Q. And you telegraphed for them?—A. Yes, and the Commissioner answered us that the goods had been forwarded to such a place from Osage City.

Q. But under what circumstances he made the purchase you do not know; you only know that you did not inspect the goods?—A. And we know that the bill was dated on the 24th of August, and, so far as that bill proves it, we know that the purchase was made on the 24th of August.

Q. Do you know the amount of blankets that were offered to you at $6 80 by that firm of Amidon, Lane & Co.?—A. Not accurately; some two or three thousand pair.

Q. The number that General Parker bought was 200 pair?—A. He merely sent 200 pair to the Osage country.

Q. Might there not have been a difference in price between a large quantity and a small quantity?—A. Yes.

Q. And the inference which you derived about there being something wrong was based upon the difference of price between $6 80 and $8?—A. Yes, sir.

Q. Does your board take the ground that the Commissioner has the sole power of purchasing?—A. Certainly; that is the law.

Q. When he makes the purchase he performs his duty?—A. Yes.

Q. And when you supervise you perform yours?—A. Yes.

Q. It is his duty to act first in the matter and last in the matter?—A. Yes. In our interpretation we simply supervise, and all that we can do under that law, as I understand it, is to protest, and the Commissioner can finally act even against our protest.

Q. The final decision is left with him?—A. Yes.

Q. And the responsibility of the purchase is with him?—A. Yes.

Q. You are not bonded officers?—A. No, sir.

Q. Nor paid officers?—A. No, sir.

Q. It is a voluntary service?—A. Except as to the secretary; I am the secretary, and am paid a salary.

Q. You concede to the Commissioner the authority of deciding finally, when there is an issue between you?—A. Yes. I desire to present in this connection a letter addressed by myself to the chairman of this committee in regard to the duties of our commission under the last appropriation bill, and his reply. (See appendix.)

By Mr. SARGENT:

Q. Did the Commissioner ever see this correspondence?—A. No, sir; it was for our own information.

CONTRACTS FOR PURCHASING INDIAN GOODS.

WASHINGTON, D. C., *January* 17, 1871.

FELIX R. BRUNOT sworn and examined:

By Mr. SARGENT:

Question. You are president of the Indian commission?—Answer. Of the Board of Indian Commissioners.

Q. Have you been president since the organization of the board?—A. No, sir.

Q. Was your board called on to witness the making of a contract with J. W. Bosler, on the 17th of June, 1870, for the delivery of beef, coffee, &c., for the Indian tribes?—A. No, sir.

Q. Was your board called upon to inspect the quality of the goods delivered?—A. No, sir.

Q. Was your board consulted as to the propriety of extending that contract on the 10th of August?—A. No, sir.

Q. Or as to the character of prices to be paid under it?—A. No, sir.

Q. Were you afforded an opportunity to inspect the beef, coffee, sugar, &c?—A. No, sir.

Q. Were you consulted by the Commissioner in making the purchase of those goods?—A. No, sir.

Q. Were you consulted in any manner in regard to the making or execution of the contract, of 17th September, 1870, with J. A. Morrins, for the delivery of beef for the Indian tribes in Missouri?—A. No, sir.

Q. Were you consulted in making a contract with the transportation company for transporting Indian goods; or were you required to supervise any expenditure of money for that purpose?—A. No, sir.

Q. Were you called upon to pass upon the propriety of the contract with Bosler, made in September, for a large quantity of bacon to be delivered in Chicago?—A. No, sir.

Q. Were you called upon to inspect the goods and ascertain their quality?—A. No, sir.

By Mr. CHIPMAN:

Q. Did you ever complain to the Commissioner, about the time this contract was made, that he had not acted properly in excluding you from consultation with regard to the letting of the contract?—A. No, sir.

Q. You never spoke to him on the subject?—A. I never spoke to him on the subject.

Q. Did you have at that time, or have you had until recently, any occasion to complain of contracts which he made without consulting with you?—A. I have known nothing officially on the subject of contracts for supplies to the Indians.

Q. You knew nothing of the exigencies under which he acted?—A. No, sir.

Q. Did you regard it as your duty under this law to supervise literally all the expenditures of money appropriated for the Indian Bureau?—A. So far as it was practicable for our board, with their engagement to do so, I did.

Q. Did you not recognize that there were large administrative duties connected with the expenditure of money, which you could not in the nature of things supervise?—A. We did not expect to manage the expenditure of the funds of the Department.

Q. Did the letter which you addressed to the Commissioner relate to the purchase of the annuity goods?—A. It related to the purchase of any supplies intended to be purchased by the Indian Department under this act of Congress and under the act previous to the last act—the act of 1869.

Q. Prior to the appropriations made in the act of 1870, of course, you did not apply the duties to yourselves that are imposed by that act?—A. The letter was written with reference to the act of 1869.

Q. And not with reference to the act of 1870?—A. Of course the duty was continued more urgently by the act of 1870.

Q. Was the question ever discussed among you whether the term "goods" embraced everything for which there was to be an expenditure?—A. Yes, sir; I believe it was.

Q. State how you regarded transportation. Did you regard that as "goods?"—A. The question of transportation was never discussed, to my recollection.

Q. But you did discuss the meaning of the word "goods," as used in the law?—A. Yes; I think it probable that we did at the first meeting of the board, or at its organization.

Q. What was your determination at that time?—We came to the conclusion that it was intended to cover all the expenditures of the Indian Department.

Q. For whatever purpose?—A. Yes.

Q. You did not discuss the language of the act of July, 1870?—A. Yes, I think we had a subsequent conversation on that subject.

Q. When was that?—A. At a meeting in New York.

Q. When you were purchasing the annuity goods?—A. Yes.

Q. Was the commission present at that discussion?—A. I think not.

Q. Did your board ever communicate to him your construction as to the meaning of the word "goods," for instance that it embraced beef?—A. No, sir.

Q. It was a mere discussion among yourselves?—A. The acceptance of the powers given to the commission in the original instance was a qualified acceptance, and the words in which we accepted the powers were communicated to the President. We acted with this idea, that so far as it was practicable for us with our other duties and engagements, we would accept of the trust he had reposed in us. In the same way, under the last act of Congress, we accepted it with a similar qualification.

Q. Was that by letter?—A. That was not communicated.

Q. Was it a mental reservation?—A. No, sir; it was a consultation of the board as to whether we could accept those duties. We understood our duties were, to bear such a relation to the Indian Department originally as would not impose upon us the control of the executive business which belonged to the Commissioner of Indian Affairs, but that our duties were supervisory. Finding that the Indian Commissioner had the same understanding, and that he applied to us very shortly after our board came into existence to aid in purchasing certain goods in New York, we appointed a committee of the gentlemen of the board who were personally familiar with that business, and that committee in connection with the Commissioner of Indian Affairs made certain purchases, amounting perhaps to a hundred thousand dollars, in a manner very satisfactory to us. I inferred, of course, that when our advisory aid was again needed by the Commissioner of Indian Affairs it would be called for; and, as I think, properly doing all that could properly be done by myself as chairman of the committee, I waited some time for further information as to whether our services would be required.

Q. Was that under the recent law or under the old one?—A. It was previously to the enactment of the present law. Imagining that it was hardly possible that the business of the Indian Department could be conducted without making purchases during this time, I thought it my duty to address the letter which has been read here to the Commissioner of Indian Affairs, and I subsequently received the letter in reply which has also been read. I immediately called a meeting of the board of commissioners in the city of New York, for the purpose of meeting the Commissioner and coöperating with him. We then went on and made certain modifications of the Commissioner's plans, or we advised certain modifications which he adopted, and the purchases were made. It was not for me or for our board to stand over the Commissioner of Indian Affairs watching his movements, and demanding of him to come to us for the purpose of consulting us. That is the explanation which I wish to give of the action of our board.

Q. The language used by the act of July 15, 1870, is that it shall be the duty of the commission to supervise all expenditures, &c. Did you take that to mean consistently with the duties which you owed to your private positions, or did you receive that duty as a public officer would, to the exclusion of your other responsibilities?—A. Not to the exclusion of all our other responsibilities. We had made very great sacrifices of our private affairs in order to perform this duty.

Q. You did not feel yourselves acting under the obligation of an official oath; you were not paid?—A. We were not paid.

Q. Your services were voluntary?—A. Yes, sir.

Q. You recognized no pecuniary liability to the Government for your conduct?—A. No, sir.

Q. There were therefore none of the responsibilities connected with your office that are thrown around officers appointed by law?—A. Much higher responsibilities.

Q. Explain that. State whether you regarded yourselves as the managers of the Indian Bureau in any sense.—A. No, sir.

Q. Or of its affairs or its administration?—A. No, sir.

Q. Did you regard yourselves as charged with the administration of any of the laws connected with that Bureau, except as defined by those two acts?—A. No, sir.

Q. Did you regard yourselves as having supervisory control over the Commissioner, such as to compel him to do what he did not want to?—A. I cannot say that I at any time regarded our board as superior in authority to the Commissioner of Indian Affairs. I do not think it can have been intended that we should take the Commissioner's business and do it ourselves.

Q. Have you ever had any occasion to complain to the Commissioner, or to suggest to him that he was doing wrong with reference to the letting of any contract?—A. No, sir.

Q. Did your board ever make any complaint to him with reference to any of the contracts here spoken of?—A. No, sir.

Q. Do you know the circumstances under which he acted, or the facts upon which he based his official action with reference to those contracts?—A. No, sir.

Q. You know nothing of the exigencies under which he acted?—A. No, sir.

Q. You cannot say whether you would or would not approve his conduct?—A. No, sir.

WASHINGTON, D. C., *January* 17, 1871.

EDWARD EARL sworn by affirmation and examined.

By Mr. SARGENT:

Question. Where is your residence?—Answer Worcester, Massachusetts.

Q. Are you a member of the Indian commission?—A. No, I am not.

Q. What connection have you with the Indian service?—A. At the different yearly meetings, of which there are nine in different parts of the United States, a committee of two is appointed by each meeting, and I am one of that committee from the New England meeting. The duty of that committee is to take a general interest in behalf of the Indians.

Q. On such a mission as that were you at the Neosho reservation or agency when the payment was made to the Quapaws?—A. Yes.

Q. State how you happened to be there and what you observed there?—A. There were three gentlemen appointed to accompany Dr. Nicholson, and to go about among the Indians in the Indian Territory. The other two failed of coming. I came on, and when I got to Lawrence, Kansas, Mr. Hoag was there. After I had been to one agency he said to me that the next day there was to be a payment at Seneca, and that it would be a good opportunity for me to see some Indians. I had not seen Dr. Nicholson at that time; he had been to the Kaw Indians. On my return about Topeka, next morning, I fell in with him, and I told him that Mr. Hoag would like us to be at the Seneca payment. We started from Lawrence at 7 o'clock in the morning and went down to Baxter Springs, and there met Mr. Lang. That was on the 13th of October. On the 14th we went over to Seneca, and from there up to the agency. A little while after we had been there we were informed that General Blunt was going to address the Indians, and that he wished us to be present. He got them all around, one or two hundred of them. They were sitting on the ground, a good many of their chiefs particularly. General Blunt got near in front of them and went on and stated his case. I took some notes, not very perfect; but I will state from them as nearly as I can what took place. The substance of what he said was that he was applied to by the Indians to obtain certain sums from the Government for war spoliations; that the amount was $102,000 in the first place, but that it was finally cut down to $90,000. Then he told them how he fought it through Congress, and said that he had paid $6,000 for getting it through, and had got $10,000 more to pay.

Q. Did he say to whom?—A. No; I believe the question was asked him whom the $10,000 was to go to.

Q. Did he state that his services in getting it through Congress were what entitled him to the money?—A. Yes; he said he spent about three months the first year in an effort to get it through, and did not succeed, and that the next year he spent eight months more in accomplishing his work. He told how he watched it through the different stages; how it was left out of the bill once, and how he went and got it in again.

Q. In what house?—A. He did not say. He said that he afterward found that the whole thing was stricken out, and that he went to Mr. Morrill and said that it was a just claim and should be paid. Then he said that he got it put back into the report, and it passed, being referred to the Indian committee in both Houses. It was then referred back to the Commissioner of Indian Affairs, who recommended $90,000 instead of $102,000. He said that he got it put in the appropriation bill, and that he "bought it and fought it" through Congress. Those were his words. In his remarks to the Indians he said, "I have had a great deal to do with the Indians, and they have been always true to me, and now I do not think that they will come down on me;" and he asked them if they would do so. They said no, and he got them to indorse all he said. He then produced his contract with the chiefs—a written contract—all signed and sealed and stamped, and he brought it round to us to look at. Then he passed round four or five powers of attorney, and said that he had one of them from each claimant all the way through. He had prefaced the whole of this by saying that he understood that the Quakers were coming there to tell the Indians to repudiate their contracts, and it was then that he said to them, "I do not think that the Indians will come down upon me; they never have;" and he asked them then to reindorse all he had said. Aside from that I frequently spoke to him, trying to read his feelings a little, and he said that I did not know as much about the Indians as he did; that one dollar was as good to them as five dollars; that I would see them all drunk before they left. I was

there three nights, and one of those nights the Indians had a dance. That night I saw an Indian drunk, and perhaps I saw one drunk the next day.

Q. Was the paymaster of the Government present at that speech?—A. No; that was the afternoon previous to his being there.

Q. Was any Government official present at that speech?—A. Nobody but George Mitchell, the agent. Mitchell was there, and some lawyer from Peoria.

Q. Did the agent try to prevent the speech being delivered?—A. Not at all; he came and told us that Blunt was going to deliver the speech.

Q. Now state what took place the next day?—A. I would like to state one thing previously to that. We had a conference in the evening with the agent, before this took place. We asked him if nothing could be done. He told us that Blunt had power of attorney from every individual. I said to him, "Did you help to get those powers of attorney?" He said he did. I told him I was very sorry for that; that I thought it would complicate him, and he said he was sorry for it too. Every one of those powers of attorney was witnessed by him, and we were informed afterward that he did get them, even without Blunt being present. He said he was instrumental in getting them.

By Mr. BECK:

Q. Blunt said that he had "bought it and fought it" through Congress?—A. That was his language.

Q. Did you understand him to mean that he had paid members of Congress for the votes?—A. He said he had paid $6,000, and had $10,000 more to pay.

Q. He said that in connection with what he said about having "bought it and fought it" through?—A. Yes, sir.

Q. Did you understand him to mean you to understand that he had paid members of Congress to vote for this claim?—A. He would not give us any light upon that subject. I think I asked him afterward where the $10,000 were to go to in a rather joking way. He sort of bit his lip and did not make any reply.

Q. Did he make an impression upon your mind that he had to pay members of Congress?—A. I rather drew that inference; but still I should not care to say that I had any right to do so.

By Mr. SARGENT:

Q. Was any other inference possible when he said he had "bought it and fought it" through Congress?—A. That was the inference I drew from it.

Q. What else took place?—A. When this payment was about to take place, I mentioned that I had come there hoping to see justice done to the Indians, and that I should like to be in the room, if there was space for me. Mitchell said certainly, and I took a seat. I was going to take a seat by a little desk, but he said that that was General Blunt's desk. That was all arranged between him and the agent. There was another seat near Blunt's, which was for one of the clerks of some of the traders. I sat near him, and near another clerk of another trader; Agent Mitchell sat right before me; Jocknick sat in the corner, behind the stove, near the door; Williamson in the center of the room; and the interpreter between us. Thus the payment went on very much as Mr. Williamson has described it. Sitting back and seeing the whole proceeding, and being a little more disinterested than he, I could perhaps describe it a little more accurately. There was no specific sum paid to the trader, but only the amount of the orders which Agent Mitchell had given for goods for the Indians. I kept a record of it in my book. For instance, No. 75 came in. His claim was $338 21. Jocknick handed a ticket to Pilkinton, who mentioned the amount and handed the ticket to Williamson. Williamson then sung out the amount and handed the money to the Indian. The Indian passed it directly to Mitchell and Blunt and myself. I would say how much Blunt was to have. Then the store-keeper would say how much his claim was, and I would tell them how much went to the Indian. Mitchell then handed me back what the Indian should have, and I counted it and handed it to the Indian, telling his interpreter to tell him just what the sum was. Now, for instance, No. 75 had $338 21, Blunt's claim was $112 73, and the store-debt was $40, which left the Indian $185 48. It passed through these forms. I took my seat there because I had heard so much about cheating the Indians that I wanted to see how the thing was, and I thought I would rather be figuring and watching than sitting there idly.

By Mr. BECK:

Q. Could the Indian have taken his money and put it in his pocket and gone out of the house without objection from anybody, if he had wanted to?—A. I think that the chiefs and interpreters would have called him back if he had. It seemed to have been all prearranged; it was all understood by the agent, by Blunt, and by the store-keeper; it was thoroughly arranged the day before any of us got there; they told us that it was; they had every sum on the book arranged on purpose to show what the store bills were, so that there would be no delay about it, and it was proceeded with pretty rapidly, in consequence of everything being systematically arranged.

Q. The common run of the Indians could not have got the full amount of their money from the agent and gone off without settling the 33⅓ per cent. commission to Blunt, and without settling the store bills, without being called back?—A. Undoubtedly they would have been called back.

By Mr. LAWRENCE:

Q. Who was the agent?—A. George Mitchell.

Q. Was all this done with his approval?—A. Yes; I think I can say that without doubt.

By Mr. SARGENT:

Q. Is he still in the service?—A. Yes; that thing was all arranged the day before Williamson got there.

Q. Did Mr. Williamson seem to approve of that course or to object to it?—A. Mr. Williamson said, just as he has stated here, that he had nothing to do only to pay the Indians.

Mr. WILLIAMSON. And I objected to the course?

WITNESS. Yes, I think you did.

By Mr. SARGENT:

Q. Was anybody else present with you at the time Blunt made his speech?—A. Mr. Lang was present; perhaps it was the next morning after we got there, but it certainly was before Jocknick and Williamson got there.

Q. Is Mitchell an agent of any religious body, or is he a military officer?—A. He is an agent, who properly ought to be, I suppose, one of the Quaker agents; but he never has been removed; there seemed to be some difficulties in the way.

Q. Was he one of the Government agents appointed on the recommendation of the Quakers?—A. No, he was an old agent, who had not been removed; his wife is Senator Harlan's wife's sister.

Q. He did not come in under General Grant's Quaker policy, as it is called?—A. No, sir; he was there previously.

WASHINGTON, D. C., *January* 24, 1871.

S. E. WARD sworn and examined.

By Mr. CHIPMAN:

Question. Where do you reside?—Answer. In Nebraska City. I do business at Fort Laramie.

Q. How long have you been at Fort Laramie?—A. Since 1838.

Q. What business particularly have you been engaged in?—A. I have been engaged in the Indian trade, and as a sutler at Fort Laramie.

Q. Have you dealt largely in beef; and are you familiar with that trade?—A. Not in beef for the last few years.

Q. How long have you been trafficing in beef in that country?—A. Off and on for about twelve years.

Q. Largely or otherwise?—A. Not very largely.

Q. Are you familiar with the prices prevailing in that country, and have you been for this period of time?—A. For the last two years I cannot say I have.

Q. Do you know anything about the price of beef within the last few years?—A. Yes, I know what they are getting for beef at Fort Laramie.

Q. Can you state the difference between the price of furnishing beef along the line of the Pacific Railroad and in furnishing it on contract for the posts running from Yankton up to Grand River?—A. Taking the risk and everything, I should say not less than seventy-five cents in favor of furnishing beef along the line of the road.

Q. Upon what do you base that difference?—A. Upon the risk of capture by the Indians, of crossing the streams, and of the stampeding of the cattle.

Q. Have you had experience to enable you to speak of that matter from your own observation in that country?—A. I think so; that is as little as I would be willing to do it for.

Q. Have you recently bid for furnishing supplies of beef for any of the forts?—A. No, sir, not since 1869.

Q. Has there been any material variation in the cost of beef within the last four or five years?—A. I think it is less now. The last bid I remember to have made for beef at Fort Laramie was 12¼ cents net.

Q. Fort Laramie is how near the Pacific Railroad?—A. About ninety miles.

Q. Did you incur any risk in driving there?—A. Some risk. The greater risk is after you cross the North Platte and get into the Indian country.

Q. State as nearly as you can the value of beef in that country in June, 1870; what would be a fair price for supplying the Indian posts from Yankton up to Grand River?—A. There is a difference between Texas cattle and American cattle. I should not be willing to take a contract for less than seven cents to deliver them along up at the different posts.

Q. State what is the difference between Texas and American cattle; what do you understand to be Texas cattle?—A. I understand them to be cattle raised in Texas and driven there, and American cattle to be cattle coming from Nebraska, Iowa, or the adjoining States.

Q. What is the difference between the value of Texas and the American cattle?—A. I should judge a cent and a half.

Q. How is it with the Texas cattle that have been wintered?—A. There is about the same difference.

Q. What were cattle worth along the line of the Pacific Railroad—good merchantable Texas cattle?—A. I cannot say. I sold a lot at $80 a yoke, or $40 apiece, at Fort Laramie in September, 1870. They were working cattle.

Q. Were they sold for beef?—A. I really do not know what use was to be made of them.

By Mr. WELSH:

Q. Are you familiar with Schuyler and the great cattle depots in Nebraska?—A. I am not with Schuyler.

Q. You know where that point is?—A. Yes, sir.

Q. Do you know the price of cattle at Schuyler?—A. I do not.

Q. Or at Columbus?—A. No, sir; I have not been at Columbus lately. I have been at Nebraska City and Omaha.

Q. Have you ever delivered cattle on the Missouri River?—A. Yes, sir.

Q. What would you consider a fair price between prompt delivery and keeping them nine months and wintering them at your own expense?—A. Some months you would gain and some months you would lose.

Q. Suppose you bid for two contracts, one to drive cattle to be taken as delivered, the other to drive them there and you to keep them for nine months at your own expense, what would you consider a fair difference in the price?—A. I should consider it about two cents. I should say they would be worth two cents a pound more than when delivered at once.

By Mr. LAWRENCE:

Q. What stream is there in which there is danger in crossing cattle in going up to Yankton or Grand River?—A. That depends where you start from. If you start from the south side of the Missouri River and keep the roads for a short distance, you would have to cross the Missouri twice.

Q. Is there no other stream?—A. There is the Platte.

Q. Is there any place where the Platte would be dangerous?—A. Not at this season of the year. I have seen it when it would be dangerous crossing.

Q. Is there ever any danger in crossing the Platte with a herd of cattle where any skill is exercised in driving?—A. Yes, sir.

Q. Where?—A. Above Fort Kearney and above Columbus, Nebraska. It depends altogether on the season of the year.

Q. Did you ever know any cattle drowned in crossing?—A. Yes, sir; I have had them drowned.

Q. How many?—A. I have had them drowned at different times. I have crossed a great many times when I had to swim my oxen and ferry my wagons over. I could not say how many, but probably fifty or a hundred altogether.

By Mr. WELSH:

Q. You are aware that Whetstone is on the other side of the Missouri River?—A. Yes, sir.

By Mr. CHIPMAN:

Q. Do you know whether there is danger from Indians in driving up cattle from the Missouri River?—A. There is sometimes, when they are purchased in Iowa.

By Mr. BECK:

Q. What was the price of cattle in Nebraska in June, 1870—such cattle as were usually furnished Indian agencies, weighing a thousand pounds, gross?—A. I cannot say anything of what was furnished to the Indian agencies.

Q. What were cattle weighing a thousand pounds worth in Nebraska in June, 1870?—A. I should say not less than four cents.

Q. What were they worth in September, 1870, in Nebraska?—A. I do not know.

Q. Were they worth as much as they were in June?—A. I presume not.

Q. What difference, if any?—A. I should judge between a quarter and a half a cent. Cattle in June, to a great extent, are those which have been feeding through the winter on grain, and generally sell higher than they do in the fall.

Q. If cattle could be delivered in the fall at Whetstone and Grand River agencies, in Dakota Territory, and Yankton and Cheyenne agencies, at $3 80 per hundred pounds, gross, they ought to have been delivered at the same agencies in June for a quarter of

a cent more?—A. Yes, sir; though I would not have been willing to have delivered them at that price in any season.

Q. You were not dealing in cattle until the last season?—A. No, sir; except to sell working oxen.

Q. You were not therefore familiar with the price of cattle last summer?—A. No, sir.

Q. Were you familiar with the cost of transportation last summer?—A. No, sir; not in that region of country.

Q. Do you know anything about contracts made with the Indian commissions?—A. No, sir.

Q. Your experience is limited to transactions some years previous?—A. Yes, sir.

WASHINGTON, D. C., *January* 24, 1871.

ELY S. PARKER, Commissioner of Indian Affairs, sworn and examined:

By Mr. WELSH:

Question. In how many instances did you advertise publicly during the current year since June 30, 1870, for purchasing supplies for the Indians?—Answer. Twice during that time, I think.

Q. Do you know the extent, or about the extent of the purchases growing out of these advertisements?—A. I cannot give them to you exactly. Under the first advertisement between $350,000 and $400,000 were purchased.

Q. Of dry goods?—A. Yes, sir.

Q. Under the second advertisement how many?—A. I cannot state, from memory, the amount.

Q. What did they consist of?—A. Beef and bacon principally.

Q Do you remember the dates?—A. The first advertisement was dated July 26, I think, and appeared in the papers of July 27.

Q. And the contracts made about when?—A. The award was made about the 6th of August.

Q. For delivery at what time?—A. To be delivered on or before the 20th of August.

Q. The second, which was principally for beef and bacon, required the goods to be delivered about when?—A. The advertisement states, I think, the bacon was to be delivered at Chicago on or before the 20th of September.

Q. Can you give us an idea of about the extent of your purchases by private contract since the 17th of June last, and including that day, to be paid for out of the present appropriation bill?—A. Since June 17, beef has been purchased to the amount of about $514,000.

Q. Exclusive of this advertised beef contract?—A. Yes, sir. I cannot say, however, whether there is bacon included in this amount or not. I think there is.

Q. Does it also include supplies of sugar, coffee, and flour?—A. Yes; but I am not sure whether it includes bacon or not; nor can I tell without an examination of the vouchers. Under the head of "supplies," there is an item of $141,000.

Q. Were those purchases confined to supplies delivered in the Missouri region, or do they include the entire purchases of the Indian Bureau?—A. I am speaking now of what has been paid out since the 17th of June. At a later period in the fall there was additional flour purchased to the extent of about $101,000.

Q. Have you any means of getting at the entire amount spent in private purchases since the 15th of June last by the Indian Office, not only for the Missouri region, but for all regions?—A. That is what I am endeavoring to give you. I have another memorandum here of sugar and coffee, $80,000, and another small item of $3,900.

Q. Can you furnish the committee with the entire amounts spent by the Indian Office in private purchases since the 15th of June, to be paid for out of the present appropriation bill?—A. I have just given you the amounts, I think, with the exception of a purchase made on the 3d of December last, and I have not examined the bills of that to see what they amount to.

Q. Does the statement you have given include the purchase of the 10th of August, 1870?—A. Yes.

Q. Will you please furnish to the committee, at your convenience, the amount of the purchase of December 3d?—A. I will do so. They are all on the records.

Q. Did you consult the board of Indian commissioners in making any of your purchases, except for dry goods?—A. No, sir.

Q. Did you call upon them to supervise any expenditure of money other than the purchase of dry goods?—A. No, sir; I asked them to assist me in making payments of money.

Q. Did you call upon them to inspect any goods purchased for the Indians other than the dry goods purchased in New York?—No, sir.

Q It appears that on the 27th of May last the head of the Commissary Department of the Army notified you that there would be a surplus of supplies, and asked you to instruct the agents to receive these supplies at any time before the 30th of June. It

appears that on the 1st of June you did so instruct the agents; what means did you take to ascertain what surplus supplies there would be?—A. My recollection is that I simply asked the Commissary General to supply me at as early a day as possible, and to furnish me returns from the assistant commissaries as to what they did turn over to the agencies under these instructions. I had to depend on him for lists to be verified by lists that would be sent in to me from the agencies in the ordinary course of business.

Q. What means, before the 17th of June, did you take to ascertain the amount of surplus supplies which would be turned over to agents?—A. I took none in particular that I am aware of. That letter of the Commissary General which is printed was the first intimation I had that there would be a surplus of stores.

Q. Did you know the rate which the Commissary Department was paying for beef?—A. Yes, sir.

Q. What was the rate?—A. Four and forty-four one hund redths cents per pound. These were the figures given me by the Commissary General.

Q. Did you know whether the contractor was obliged to keep the cattle under these rates at his own risk and expense and deliver them as needed?—A. No, sir; I do not know as to that.

Q. The contract advertised in open market—I mean the Morrow contract—was to deliver beef at what rates?—A. Three and eighty-eight one hundredths cents a pound.

Q. Was the contractor bound to keep the cattle at his own expense and risk?—A. Yes, sir.

Q. And that contract runs through how many months?—A. Until the 1st of July next.

Q. That is about nine months?—A. The contract is dated 17th of September, running from that time until the 1st of July next. I think the delivery was to commence from the 1st to the 15th of October.

Q. Do you know whether Mr. Bosler is a partner in that Morrow contract?—A. I have such information; I have heard that he was.

Q. You speak of having inquired; what means did you take on the 17th of June or thereabouts to ascertain the lowest prices at which cattle could be furnished?—A. For several weeks previous to the 17th of June I had been in the habit of talking almost daily with parties visiting my office upon the subject of whether articles of subsistence could be had for an emergency in the region of these agencies, and, in my own mind, I had come to some conclusion as to what we would have had to pay in a sudden emergency for these articles of supply. The only means I could take was conversation with parties who were familiar with the country, and who were dealing in cattle.

Q. Do you remember whether Mr. Bosler was ever recommended to you by De Witt Clinton Wheeler?—A. I do not remember it.

Q. Are you aware that Mr. Bosler and Mr. Wheeler are partners in that business at all?—A. No, sir.

Q. What do you consider a fair difference of price between a prompt delivery of cattle, and delivering them as they are wanted, for nine months, subject to the risk of stampeding, loss of weight in the winter season, cost of feeding, &c., on the part of the contractor?—A. I do not feel myself a competent judge to give you an estimate of the difference.

Q. Did you ever inquire the price of cattle at that time at Schuyler, or other prominent cattle centers in Nebraska?—A. I did not know where the cattle depots in Nebraska were.

Q. Did you ascertain what the cattle herders in any of these depots were willing to deliver cattle for on the Missouri River?—A. No, sir.

Q. I observed that two of these agents asked the privilege of buying temporary supplies in the neighborhood; why was not that privilege granted, and why did you buy three months' supplies, instead of temporary supplies, in June, 1870?—A. We had no funds at that time to authorize them to buy for temporary uses; and, in the contract of June 17, the contractor agreed to supply the whole amount which we needed for all the agencies, taking the risk of an appropriation.

Q. Did you ask the Secretary of the Interior, or the chairman of either of the appropriation committees, to get a temporary appropriation for this purpose—such as was asked for and obtained on the occasion of Red Cloud's visit?—A. No, sir. The appropriation asked for during Red Cloud's visit was simply to pay the expenses of Indian delegation visiting Washington.

Q. I understand that you took no means to get funds for temporary supplies.—A. There was an appropriation bill then pending which we hoped might pass any day, and in the mean time I could only look to the arrangement made with the Commissary Department for supplies which would last to June 30.

Q. Did you notify the chairman or members of either the appropriation committees that an immediate appropriation was required for temporary supplies?—A. I was in frequent communication with the chairman and members of the committee in charge of this matter, and urged them to have the appropriation bill passed.

Q. Did you notify them of your contract made on the 17th of June?—A. No, sir.

Q. This contract requires the contractor to deliver in July, August, and September, in the mean time the contractor being required to keep the cattle at his own risk and expense; what reason was there for your sending to the agents notice requiring them to receive this cattle all at one delivery, against their wishes, and in some instances their protest?—A. That was done to carry out my original idea that supplies should be delivered into the hands of our agents in bulk, all at once if practicable. At the time of entering into this contract Mr. Bosler was doubtful whether he could deliver all of the cattle, as I wanted him to do at one time, and insisted on delivering them at different times, and at his request the clause authorizing different deliveries was put into the contract. I consented to it, at the same time stating that if he could deliver the cattle into the hands of the agents all at one time, I should prefer it. It gave better satisfaction to the Indians to know that the supplies were on hand for some time in advance. Hence when Mr. Bosler reported that he was able to deliver them all at one time, I notified the agents to receive them. It was supposed, and Mr. Bosler so represented, that he might have to make three different trips and purchase three different herds of cattle. There was urgency for the first lot to be taken up as speedily as possible, so as to serve their immediate necessities. That was the reason why that clause was put into the contract, and the reason why, when I found he could deliver all at once, I gave the order to receive them.

Q. Why did you insist that Mr. Poole should take them when he reported that he had three months' supply, and when under the contract the contractor was bound to keep them at his own risk and expense?—A. On the 18th of June, one day after the arrangement with Mr. Bosler had been made, Mr. Poole telegraphed me that he had nothing at all at his agency, and asked the Indian Office to supply him. I telegraphed back to him stating that arrangements had been made the day before to supply his agency. He then on the 22d writes that he has received some cattle from the commissary, twelve or thirteen hundred head, I think; but as the contract had been entered into with Mr. Bosler for a specific number, under the idea that that number would be required, and as Mr. Poole himself had represented that he had nothing on hand, I did not want to be at the expense of having them driven off to some other point, as I knew that in time we should need them for that agency. Hence I instructed that they should be received.

Q. Had Mr. Burleigh written to you that he would supply cattle at a less rate?—A. Not that I remember. He had written some time before, asking if I wanted cattle, and saying if I did he would furnish me. I do not recollect the price mentioned.

Q. Do you know what they were paying for beef in the Santee agency at that time?—A. I cannot state.

Q. Where was Burleigh furnishing them?—A. He was furnishing them at Santee, I think.

Q. And he wrote you that he had cattle on hand; that he would be glad to supply?—A. It is my recollection that he wrote me a private letter to that effect.

Q. What is the date of that letter?—A. Somewhere about the middle or latter part of June, as I remember.

Q. Can you produce it?—A. I do not think I can. I do not think I saved this private letter; it was not an official letter at all.

Q. Was it addressed to you as Indian Commissioner?—A. I am not sure about that. It was marked on the envelope "personal," and letters so marked, of an unofficial character, I do not ordinarily preserve.

Q. Why did you contract for cattle to be delivered in August and September and call it an exigency?—A. I do not know as I understand your question. I wanted them just as soon as I could get them, and the clause in the contract postponing the delivery of a portion of them was more for the accommodation of the contractor than anything else. I considered that the exigency would last until I could obtain supplies under the appropriation bill.

Q. Why did you not advertise immediately for cattle after the passage of the appropriation bill of July 15; did you not consider these supplies as of more importance than clothing?—A. Arrangements were made for a supply of annuity goods immediately after the passage of the appropriation bill, and my attention was directed wholly to their purchase during a considerable time. That is the only reason I can give you for not immediately advertising for subsistence.

Q. The contract of the 10th of August, for three million pounds additional of beef, was made for what reason?—A. It was made because at that time the subsistence matter had not received the attention which it ought to have received, and it became necessary to extend the arrangement previously entered into to continue the supply of beef and subsistence, which was getting short or would be before completing arrangements by advertisement, and as soon as my attention was called to the matter I had an advertisement prepared for supplies.

Q. Why did you receive cattle at 6½ cents per pound in November, contracted for delivery in October, when, under your open advertised contract, they were to be fur-

nished at $3\frac{88}{100}$ cents per pound in October?—A. The beef, under the Morrow contract, had not reached the agencies at this time nor at the time required by the advertisement for delivery. I had supposed, under the extension of the 10th of August, Bosler's beef would all reach there so as to keep the agency supplied until Morrow could commence delivering, and the extension of the 10th of August was intended to reach about October 15, or perhaps a little later, and that was the time Morrow was to commence his delivery, which, in consequence of some delays, he did not succeed in doing until some time afterward, and Bosler did not get up his cattle until after it was supposed it would reach there.

Q. Why did you not hold each party to his contract?—A. We would not get the information here from the agencies of the failure of the contractor to comply with the terms of his contract probably under fifteen or twenty days after the execution of it was due at the agency. We notified agents whenever arrangements were made for beef that it was due at such and such times, and if the contractors failed to deliver at these times we depended upon the agents to notify us. I was not aware in this case of the failure of the contractors to comply with the requirements of their contract in respect to time until the thing had past.

Q. When did you notify the agents that you had entered into that contract, or when did you send them a copy of the contract with Morrow?—A. I cannot from memory give you the date. My impression is that instructions were not sent up there until quite a long time after the contract was entered into. I give that as the impression on my mind.

Q. Have you any idea at all of the time?—A. I give you as my impression that it was after the middle of October or about that time; and I give it simply as my impression. I will furnish the exact date when I sent my instructions from the office, if the committee desire it.

Q. Was the Second Auditor ever notified of the receipt of a communication from Agent Randall, of August 20, 1870?—A. Not by me.

Q. Did you send invoices or descriptions of the various kinds of goods, sugars, coffee, and other stores sent up to the various agencies, so as to enable them to examine as to weight, quality, &c.?—A. I did not send them personally. I gave instructions that it should be done.

Q. Do you know that they were sent?—A. Not of my own knowledge.

Q. Can you produce evidence that they were ever sent?—A. I presume I could bring from the office witnesses who would testify that they were put into the mails. It is a rule always to send copies of invoices to the consignee, and I am perfectly satisfied that they were sent; but as I did not do it myself I cannot give it as a positive statement. I had returns from the agents sometimes stating that something was missing, showing that they had the invoices.

Q. Under the private contract of the 17th of June, for beef and flour, were there not other articles purchased?—A. Yes; bacon, sugar, coffee, salt, and, perhaps, other articles.

Q. Is that purchase in any of the papers before the committee?—A. I do not know.

Q. I observe by your letter to Secretary Delano, in evidence, you state that nearly all the Indian freight, consisting of annuity goods and other supplies, reached Sioux City in October; what evidence have you of that?—A. That was the opinion of the freight men in New York, who forwarded freight from New York, as to the time it would reach Sioux City. I was not at Sioux City myself, and of course could not know it personally.

Q. Did you not telegraph to Mr. Poole that annuity goods would reach him in September?—A. From his statements I presume I did; I cannot state it from recollection.

Q. What data did you have for making your published statement that nearly all the annuity goods reached Sioux City in October, necessitating a private contract on your part as to freight?—A. That is the opinion I had.

Q. Do you know where you got it?—A. I got a part of my information from the men in New York who transported the goods.

Q. If the goods left New York in August, they must have reached Sioux City in September.—A. I do not know that any goods left in August.

Q. Please state what evidence you have that these goods did not reach until October.—A. My information was from men who had the freight contract from New York to Sioux City, and who stated that the goods would not reach Sioux City until about such a time. They had been going on different days and by different trains, and my impression is that the last lot did not leave New York until the latter part of September. I could not tell, when in New York, at what time all the Indian freights would be ready to ship from Sioux City up the river, and I was compelled to make arrangements for late freight.

Q. With whom did you make your contract for freight from New York?—A. One contract was with a party whose name I cannot recall just now. He was the agent of what is termed among merchants the "Blue Line" from New York. I think Mr. Noble is the general agent.

Q. When and where was your contract made for freight up the river?—A. I was in Chicago, and executed a contract on the 26th of September, I think.

Q. That is the date of the contract, but it does not state at what place it was executed?—A. It was signed in Chicago upon my part, and, as I suppose, by the Northwestern Transportation Company at Sioux City.

Q. Is Mr. Wolworth an agent of the Northwestern Transportation Company?—A. He is secretary.

Q. Did that contract embrace past shipments or only future shipments?—A. It was to embrace everything that had to be done in connection with annuity goods and other supplies that were going up the river.

Q. When you made that contract did you know where these goods were you were contracting to send up the river?—A. I understood that some of them were at Sioux City or somewhere in that region.

Q. That was in September?—A. Yes. There were large quantities of goods that had not then reached there, and I understood there were Indian goods ready for shipment up the river, but I cannot say in what quantities.

Q. Have you ascertained, since that time, that all the goods reached Sioux City in September?—A. No, sir.

Q. Do you know how many goods were shipped up the river after that time?—A. No, sir.

Q. Then, when you made your contract, you did not know there were any goods at Sioux City, at all?—A. I knew there were goods there, but I did not know how many.

Q. Did that contract include goods shipped up the river in June?—A. No, sir; for all the goods which went up in June the contractors were required to deliver at the agencies.

Q. When you made your contracts were you aware that very large quantities of these goods had already gone up the river?—A. No, sir; I was not aware of it. I had an idea that some had gone, because I had given instructions to Mr. Wolworth, when I last saw him in New York, that when Indian goods reached Sioux City not to delay them there at all. I did not want them to remain in Sioux City any longer than possible, and gave instructions to have them crowded ahead to their destinations lest low water and cold weather might delay them.

Q. You gave this order to Mr. Wolworth without any contract?—A. I had an understanding with him that the goods were to be taken at the lowest price. The last time I saw him, in August or September, I think, I arranged with him to send on a contract executed on his part, at Sioux City, and I would execute it on my part.

Q. Without fixing the rates?—A. We had had a conversation about the rates.

Q. Were you not aware that there was a special contract already in existence for carrying all goods up the Missouri River?—A. No, sir; not at that time.

Q. Did you never see an advertisement for such a contract?—A. My attention was never called to it, and I had never seen it.

Q. What attempt did you make to get up competition among steamboat owners, and to obtain the lowest rates of transportation?—A. I did not find it necessary to make any such attempt. While I was in New York they were in to see me almost every day, and were talking about the freight business, and I obtained in those conversations their ideas of what they were willing to do.

Q. Do you know how many parties were interested in this freight up the river?—A. No, sir.

Q. Are you aware that De Witt C. Wheeler had an interest in it?—A. No, sir.

By the CHAIRMAN:

Q. At the time that the contract of the 17th of June was made, I understand you that no advertisement was published?—A. No, sir.

Q. That contract was made with J. W. Bosler?—A. Yes, sir.

Q. And it was for beef at 6½ cents a pound, bacon 25 cents, coffee 28 cents, sugar 18 cents, salt 8 cents, soap 15 cents, and tobacco 85 cents, to be delivered at the agencies?—A. Yes, sir.

Q. On the 16th of June, or any time shortly before making this contract, did you have a conversation with a man by the name of Finn, of St. Louis, and with a man by the name of Baldwin, in which they asked you if you intended to make any such contract, desiring to bid for it if you did; and do you recollect that you replied that you did not intend to make such a contract?—A. I recollect that Finn was here a great deal last winter and summer, and probably about the time you mention he may have asked me again. He had inquired at various times in regard to furnishing beef at Whetstone. I do not recollect giving him any such reply as you suggest.

Q. You did not state to him that you did not intend to make such a contract at any time, and that you could not make any such contract, because the appropriation bill had not passed?—A. I have no recollection of any such conversation.

Q. Did you consult the Indian commission in reference to the price to be paid under that contract?—A. No, sir.

Q. Did you furnish them any facilities, or request them to inspect any articles furnished under that contract?—A. I did not.

Q. One-third of these goods were to be delivered the 15th of July, one-third the 1st of August, and one-third the 1st of September?—A. That applied only to the beef; the balance of the stores were to be delivered at once, as soon as they could be sent up there.

Q. When you extended this contract, August 10, for 1,500,000 pounds of beef, or 3,000,000 gross, was not that after the appropriation bill had passed, and when you had funds under that bill in your hands?—A. Yes.

Q. Did you consult the Indian commission as to the propriety of paying these prices longer?—A. No; I did not.

Q. Did you advertise?—A. There was no advertisement published at that time for beef or subsistence?

Q. What was there to prevent an advertisement, after the passage of the appropriation bill, down to the 10th of August, when you made that extension?—A. I do not know that there was any, except that my time was occupied in attending to the annuity goods in New York. My whole attention was directed to that, and this subsistence matter was neglected.

Q. How much in amount did these goods come to?—A. From $350,000 to $400,000. I do not recollect the exact amount.

Q. What was the value of this three million pounds of beef at the contract price?—A. At 6½ cents, it amounted to $195,000, I think.

Q. At that same time, did you make an order for between two and three million pounds of flour, at 3½ cents?—A. Yes, sir, in the same letter.

Q. How much would that amount to, at 3½ cents?—A. It amounts, I think, to $105,000.

Q. Was the amount then of this extension of beef and flour the same as the annuity goods, to which you paid special attention?—A. The amount of the annuity goods, I think, was much larger.

Q. You made a contract on the 17th with J. A. Morrow, did you not?—A. Yes, sir.

Q. How long was the original advertisement for that contract?—A. I think it was dated August 26, and published in the papers here, August 29. The bids were to be opened September 5, which would make nine days.

Q. That would be nine days for the papers in the city of Washington; how long would it be for Chicago, where the advertisement was published, as I understand, allowing time for the bids to reach here by mail, under the advertisement?—A. It would not give more than three days in Chicago?

Q. What was the necessity for so short time of advertisement? Why was the advertisement not inserted at an earlier period, so to give bidders more than three days to make up their minds?—A. There is no reason why it should not have been inserted at an earlier date, except that my personal attention was directed to something else, and this did not receive either my attention or the attention of the office as early as it should. If it had been inserted earlier, we should have had a longer time for notice.

Q. By whose order was that advertisement extended?—A. By the order of Secretary Cox.

Q. On whose application?—A. I do not know.

Q. Under that contract the price of beef was $3 88?—A. Yes, sir.

Q. The first time there was an opportunity by advertisement for bids, the price that the Department paid was reduced to one-half?—A. Very nearly.

Q. You say that the agents were required to receive at once the cattle that by contract with Bosler were to be delivered from the 15th of July until the 1st of September, for reasons which you have given? Did not the change made by you requiring the cattle to be received at once devolve upon the Government the expense of herding, and the risk of the cattle straying, and of impoverishment for want of proper food?—A. I did not regard it so at the time, and do not know that such was the fact. There has been no such representation, except from one agency, where it is reported that extra expense was incurred by reason of the accumulation of cattle.

Q. Was not the Government compelled to employ herders in any event at every agency?—A. I do not think they should have been employed. They were, as I said, at one agency, and it may have been at others. We regarded it in this light: we had in the employ of the agency men enough who would make as good herders as we wanted.

Q. Was the Indian commission consulted as to the prices paid under the Morrow contract?—A. No, sir.

Q. Were they instructed to inspect goods, and supervise the expenditure of money under the contract with Bosler, or were they consulted?—No, sir.

Q. Were they in any case desired to inspect goods?—A. No, sir.

Q. In one of the vouchers from the Second Auditor's department I see that a person is paid for inspecting bacon at Chicago. Do you remember the circumstances?—A. Yes, sir.

Q. Was it inspected by one of the Indian commission?—A. No, sir.

Q. Why, when the law gave authority to the Indian commission to inspect goods purchased for the Indian service, did you pay other parties to make such inspection?—A. There was but one of the commission who resided in Chicago. I suppose I might have called on him. I did not. The person who inspected this bacon was a man employed by the board of trade of the city of Chicago, a man recommended to me through Colonel McTeely, Commissary of Subsistence United States Army, as one who was perfectly familiar with the article of bacon. I spent but a day or two in Chicago, during which time I did not meet Mr. Farwell, and I permitted this man to make the inspection.

Q. What is the cost, ordinarily, per hundred-weight of transportation from Chicago to Sioux City?—A. From Chicago to Sioux City, I think it is about $1 50 per hundred-weight, or in that neighborhood, by railroad.

Q. I have in my hand a contract furnished me by the Quartermaster's Department, showing that for 1870 they contracted with George K. Hazlett to transport goods from Chicago to Whetstone agency at $1 45 per hundred-weight. I find by your contract which you made with the transportation company that they were to transport goods from Sioux City to the Whetstone agency at $3 25 per hundred. Now, if the cost of transportation from Chicago to Sioux City is $1 50 per hundred pounds, how came you to pay so large a price during the same months between Sioux City and Whetstone?—A. I do not know anything about this quartermaster's contract at all which you refer me to, and hence I cannot answer the question intelligently as to why I had to pay so much more.

Q. Are the Cheyenne and the Big Cheyenne agency the same agency?—A. I suppose they are the same thing.

Q. The same quartermaster's contract includes transportation from Chicago to the Cheyenne agency at $4 20 per hundred-weight for September and October; your contract from Sioux City to the same place is $5 25 per hundred pounds; can you explain the difference?—A. I cannot explain the difference. I can say this, if you will allow me: In May and June, 1869, the Indian goods which left New York City were transported to the different points on the Missouri River, and I will give you some of the prices. From New York to Yankton it was $7 22 per hundred; to Fort Rice and points above Grand River, the price was $8 72. Now, this year I transported from New York to Sioux City by railroad, for first-class freight, at $2 55 per hundred, and for second, third, and fourth class, at a lower rate. From Sioux City to Yankton the price was $2 25, which would bring it to $4 80 from New York to Yankton, against $7 72 for last year; while from Grand River the price was $6 25 to Sioux City, which would make it from New York $8 80, or 8 cents higher than last year.

Q. The contract I ask your attention to was for transportation from Chicago to the different agencies; I do not refer to the prices from New York.—A. I understand that. I know nothing about these rates of the Quartermaster's Department.

Q. I have here a contract made between the Quartermaster's Department and Hiram K. Hazlett to furnish all transportation required by the United States for posts and Indian agencies between St. Louis, Sioux City, and other points on the river to Whetstone, Big Cheyenne, and Grand River agencies, and under that contract, for September, 1870, to the Grand River agencies from Sioux City, the price is put down at $2 20 per hundred pounds, while I find that under your contract, made with the transportation company, you paid $6 25 for transporting from Sioux City.—A. I know nothing about the quartermaster's arrangements.

Q. Was this contract with the transportation company made without any advertisement?—A. Yes.

Q. Did you have any talk with H. K. Hazlett about the cost of transportation?—A. No, sir. I did not know H. K. Hazlett at all. I had never heard of him.

Q. Did you consult any of the Indian commission as to the price which should have been paid for transportation?—A. No, sir.

By Mr. BECK:

Q. Can you tell us the amount of money which you paid Bosler under the contract of June 17, 1870, and at what time and how the vouchers were made out?—A. I could not answer that question fully without consulting the records of the office. I could give you the aggregates, but I could not state at what time the vouchers came in or in what sums, from memory or from any memorandum I have here. I can furnish these facts from the office.

Q. State the amount paid under the extension of August 10 and the amount paid under the contract of September 26.—A. I will supply all that from the office.

Q. State also the amount paid under the contract of September 17, with Morrow, and the amount paid the transportation company under your contract of September 26.—A. I will also furnish that information.

Q. The agreement in the contract with Bosler, of June 13, 1870, provides that in consideration of the faithful performance of that agreement upon the part of the contrac-

tor, he is to be paid, at the office of the Commissioner of Indian Affairs, in Washington, D. C., on presentation of receipts from the respective agents, the prices agreed upon. Was it usual to make payments to contractors upon the receipts of Indian agents at the Indian Office?—A. Yes, sir; upon the statement of the Indian agents that they had received the Indian goods in the amount specified.

Q. That was the only voucher which was required upon which to make payments upon contracts at the Indian Office?—A. Yes, sir. For instance, if we buy goods in New York City and Philadelphia, we would require the merchants to furnish invoices and bills of lading of the transportation company, showing that the goods had been started; then we require the agent to certify that he has received them according to invoice, which has been previously forwarded, and upon that receipt we make payment to the contractor.

Q. Requiring no other voucher than the receipt of the agent that he has got that much?—A. Yes.

Q. And that has been the custom of all other contracts as well as this?—A. Yes, sir; it is a settled custom of the office.

Q. So that the Treasury officials have no other vouchers from your office except the receipt of your agent for so much delivered?—A. That is all.

Q. Where was this contract of the 17th of June entered into?—A. In Washington City.

Q. What was the exigency that required a contract of that magnitude?—A. The Sioux, of Missouri, in June, 1870, had five agencies along the Missouri River, covering a distance up and down the river of, I suppose, between six and eight hundred miles; they had recently come into these agencies, and located under the stipulation that they should be subsisted there, according to their treaty with the peace commissioners. In the appropriation bill for the fiscal year ending June 30, 1870, was the appropriation of two millions in bulk for the use of the Indians generally. After the passage of that appropriation bill, an arrangement was made with the Commissary Department of the Army to subsist the Indians wherever it was necessary, to be paid out of that two million fund. These Sioux Indians, while they were not really friendly, were not absolutely hostile. The appropriation bill was hanging here in Congress. On the 15th of June, two weeks before the arrangement with the Commissary Department was to terminate, we saw before us very serious difficulties. If the office took no action at all for continuing the supplies after the commissary's had ceased, we feared that the Indians would either leave the agencies or subsist themselves by depredating upon what they could find about them. We did not want them to leave the agencies or enter into any kind of depredations. My idea was that if we could subsist them for three months, we could in the ordinary routine of the business of the office be able to make regular arrangements for subsisting them after that time; and in making this contract of the 17th of June, my intention was to cover the exigency which then seemed to arise for subsistence for about three months from the first of July.

Q. How had you been receiving supplies at this agency up to this time?—A. From the Commissary Department of the Army.

Q. I see a telegram from Sioux City, dated June 22, 1870, as follows: "I have enough cattle on hand to last three months. Will the Commissary Department furnish the other supplies? Your answer to this will guide me in closing up my papers with that department.—D. C. Pool, Captain U. S. A." Where did he get those cattle from and when?—A. All I know about it is from that telegram and from a letter subsequently written, stating that he received them from the contractor of the Commissary Department—the contractor who had been furnishing them the supplies they issued to the Indians.

Q. Who was the commissary contractor?—A. His name, I have learned, is Fenlon.

Q. What price was the War Department paying that commissary contractor at that time?—A. 4.44.

Q. To be delivered at the agencies?—A. Yes, sir.

Q. Why did you pay 6½ cents when these commissary contractors were furnishing it at these agencies at 4.44?—A. No such offer was made to me. I got the impression from my daily intercourse with these people, that they did not want to supply any more at that rate; that they had lost money under their arrangement with the Commissary Department, and I had the impression that they would not do it.

Q. Did you make any effort to ascertain whether or not you could have continued to have received supplies during this contingency that occurred at 4.44 or at the rates at which the Commissary Department had been supplied?—A. I talked with the Commissary General about it.

Q. Who was he?—A. General Eaton. I had frequent conversations with him.

Q. What was his report upon the subject?—A. I can only give my impression of it: that he did not care to continue the arrangements unless I had money to pay for the subsistence. His arrangement with these contractors was to terminate on the 1st of July or the last of June, and it became absolutely necessary for him to know whether

he was to continue the arrangement after that time, as he would be required to enter into new contracts to supply himself.

Q. Did you put yourself in communication with one of these contractors from whom the Commissary Department had received their supplies, for the purpose of ascertaining whether you could continue to receive them at the same rates?—A. I did not; I did not know who they were.

Q. Could not General Eaton have informed you?—A. He could have informed me. I did not ask him.

Q. He did not tell you the rates at which he was receiving these supplies?—A. He did give me some of the rates, and perhaps all, for my information.

Q. Do you remember the rate at which other supplies than beef were furnished to the Commissary Department?—A. I could not give you a single price.

Q. Were they not much lower than you contracted for with Bosler?—A. I have no recollection; I may have seen the rates once.

Q. General Eaton would not hesitate to give you any information you desired as to prices they were paying if you had asked him?—A. No, sir; and I do not say but what he did give me the prices at some time during the year at which he was supplying us with everything.

Q. How long before you made this contract of the 17th of June with Bosler had you known the fact to exist that the Commissary Department would not furnish these supplies beyond the 1st of July?—A. I did not know certainly that they would not. I knew merely the fact that the arrangement would terminate at that time.

Q. You had known that for many days?—A. The arrangement was entered into July 1, 1869, and was to continue for the year; I had known it, therefore, for the year previous.

Q. You were not compelled, then, to make these special purchases by any particular emergency which arose unexpectedly at that time?—A. No, sir; we were waiting upon the Indian appropriation bill, and as the 1st of July approached, the greater was the exigency, in point of time.

Q. Under your contract with Bosler, he had a right to come into the Indian Office and demand his pay upon the receipt of your agents, without regard to the appropriation bill; he took no risk upon that?—A. There was nothing mentioned in the contract on that subject.

Q. He had an absolute right upon his bill, as against the Government, to demand payment upon these receipts from the agents?—A. So far as the papers were concerned, that was so.

Q. Did not the advancement of the time at which he had to deliver these cattle to all at once, instead of the various periods named in the contract, expedite the right to demand his money from the Government at an earlier day than his contract contem-

—A. I presume it did.

Q. It enabled him to deliver his cattle and get receipt immediately?—A. Yes, sir.

Q. Whom did you send your instructions to the agents by to change the contract and receive the cattle all at once?—A. I sent them by Bosler himself. He was then at Sioux City. The mails were very irregular from Sioux City up the river. He was going right up, and I sent the instructions to the agents by him as the quickest way of reaching there.

Q. Mr. Pool had before that time advised you that he had cattle enough on hand to last three months?—A. Yes.

Q. And he was one of the agents who was required to receive in advance on this contract?—A. He was.

Q. Was not the effect of that change to relieve Bosler from risking the loss of his cattle by death, by stampeding, by impoverishment, or in any other way, taking that responsibility upon the Government itself, and enabling him to draw his money at a much earlier day than a strict compliance with his contract would have done?—A. That would be the effect.

Q. When the 10th of August came, you wrote him this letter, which is in the record, extending the contract at the same rates?—A. Such is the fact.

Q. State what exigency existed then for continuing these prices?—A. Nothing had transpired, so far as I was concerned, to change my opinion as to the value of beef up there.

Q. How did you get your information that beef was worth six and a half cents when Commissary General Eaton had informed you that it was furnished them at 4.44?—A. I got my information from daily intercourse with dealers in cattle, contractors, and business men up there, that 4.44 was too low a price; that I could not get it at that at all, and that consequently I had to pay more.

Q. Had you written communications to that effect from any one; and if so, from whom?—A. No, sir; it was conversation in my daily intercourse with men who came into my office, and who had such information.

Q. Conversation with men who were themselves wanting a contract?—A. Many of

them; or at least I do not know whether they wanted contracts. They were men in the business in the West.

Q. The fact was developed, was it not, in September, that you could buy them delivered at 3.88?—A. Yes.

Q. Up to the time you made your contract and the extension of it in August, had you informed yourself by advertisement or by calling for information from any one as to the prices of these goods?—A. I had published no advertisement, but I had not ceased picking up information from those I thought informed in the matter through verbal communication. I made no official communication to any one on the subject.

Q. Did not previous usage and did not law require all contracts of that character to be made after public advertisement?—A. There is a law on that subject.

Q. Of which you were aware?—A. Yes, sir.

Q. That law required advertisement for the lowest bidder?—A. Yes.

Q. Had you been in negotiation with Bosler for any length of time before June 17, relative to this contract?—A. Probably a week before.

Q. I see that your contract in September is signed by Mr. Cady, as acting Commissioner of Indian Affairs; I refer to the Morrow contract. Was that contract made in Washington?—A. It was made in Washington.

Q. Were you here at the time or absent?—A. I was absent.

Q. Where?—A. I was in New York at the time.

Q. Had you accepted the bid and made the contract before you went away, or did you leave it with Mr. Cady to make?—A. I left it with Mr. Cady. The bid that was accepted before I went away was one made, I think, by a Mr. Gibbs, of St. Louis. He was notified of it, and after two days I think he replied to the office that he declined to enter into a contract. In the meantime I had gone over to New York. The declination, which came after I left, was telegraphed by Mr. Cady to me. I responded to let it to the next lowest bidder, which was Mr. Morrow. As I understand, Mr. Morrow lived at Omaha, and he was telegraphed to. I give this as my impression.

Q. Was Bosler connected with that contract?—A. I understand that he is now. Whether he was then or not I do not know, because Bosler himself was a bidder. What combinations they had among the different bidders, I have no knowledge.

Q. This contract with the transportation company was for goods purchased in New York, was it not?—A. Yes, for goods purchased in New York, and for bacon purchased in Chicago, under the contract of the 26th of September.

Q. You had nothing to do with transportation of goods under the contract of June 17, or the extension of August 10?—A. No, sir; the contract for transportation included sugar, coffee, and articles of that kind, as well as bacon and the goods mentioned.

Q. State what Indians were paid by Mr. Williamson, what his instructions were, and what sums of money were paid into his hands, and when?—A. I can only give you a very general answer to that. The Creeks were paid by Mr. Williamson the sum of $100,000. This was paid out of what was called the Loyal Creek fund, arising out of their treaty of 1866, for losses sustained by the loyal Creeks, freedmen and refugees, in consequence of the war. It was appropriated under this bill of last July. A list had been made of the parties who were entitled to compensation, with the amount in each case, and Mr. Williamson's instructions were to take this roll and pay the Creeks named in the list, in accordance with it; not to pay to any attorney, but to put the entire amount which each Indian was entitled to into his own hands. The Quapaws, also, received about $90,000 for losses sustained by them during the war. They were paid also by Mr. Williamson, and his general instructions were to the same effect—that he was to pay the money into the hands of the Indians, and not into the hands of any attorney, claim agent, or other person. He was also furnished with a list of the claimants, and the amount due to each. The persons were to be identified satisfactorily to him, and he was to pay in the same way. So far as the Pottawatomies were concerned, the facts were about these: a portion of that tribe had become naturalized citizens, and their invested funds were sold, they receiving the proceeds, each his *pro rata* share of the invested funds of the tribe. A portion of the tribe did not become citizens, but still retained their tribal organization. The portion who became citizens were entitled, as I have said, to their *pro rata* of the fund. The entire amount given to them, as I recollect, was about $560,000, and this Mr. Williamson paid. He was also, in this instance, furnished with a list of the persons to whom the money was to be paid, and the amounts.

Q. These payments were made, then, to the Creeks, Quapaws, and Pottawatomies.—A. Yes, to the Pottawatomies of Kansas. I notice that Mr. Williamson, in his report, says he paid about a million. The sums I have given do not amount to that much, and it is very possible I have not given some of them accurately.

Q. Was there any recognized person or agent who had contracts with these people, or liens upon these payments, in any shape or form, which could properly be recognized in making the payments?—A. Not, to my knowledge, a single person.

Q. Was there any list of persons in connection with these payments to the Creeks,

Quapaws, or Pottawatomies, entitled to liens or deductions from payments made by Mr. Williamson known to you?—No, sir.

Q. Could it have been rightfully furnished to anybody without their authority?—A. No, sir.

Q. And you swear that none was furnished?—A. Not to my knowledge. If application had been made to me I should, as a matter of course, have refused it.

Q. And if any person had such lists in advance, containing the names of the persons and the amounts, it could not have been furnished by authority from your office?—A. No, sir, I think not.

Q. Did the Indian Office recognize in any way the right of agents or counsel, or other persons who pretended to represent the Indians, to have any claim upon that fund for any services they had rendered, or professed to have rendered?—Not to my knowledge.

Q. The Indian Department did not recognize any claim of that kind.—A. No, sir.

Q. How were the other Indians paid?—A. These were the only payments made by Mr. Williamson. The other Indian tribes of the country entitled to annuities are, as a general rule, paid by their local agents.

Q. Is the money sent from the Indian Department to the local agents?—A. It is sent from the Treasury Department.

Q. It does not go into your hands at all?—A. It does not go into the Indian Office at all; and in the case of Mr. Williamson it did not come into the Indian Office at all. We draw requisitions, and the Treasury pays the money into the hands of the person in whose favor the requisition is drawn.

Q. Take, for instance, the Choctaws and Chickasaws under the treaty of 1868, how is that money paid?—A. It is paid through the local agents of the Choctaws and Chickasaws.

Q. The money is sent direct from the Treasury to the local agent, and paid over by him?—A. Yes; paid either *per capita* or to the treasury of the nation, as the case may be.

Q. The Indian agents are under your control?—A. Yes, sir; they are appointed officers.

Q. Have any of them any authority from you to employ attorneys or agents, and give any liens or claims upon the funds going to such tribes as the Choctaws or Chickasaws for any services they may have rendered?—A. No, sir.

Q. Do the papers in your office show that large sums were taken both from the Chickasaws and Choctaws by persons who claimed it as their right?—A. No, sir; the only papers in the office of that character relate to the two, and refer to a large amount being taken from this payment that Mr. Williamson made. The Chickasaws and Choctaws are paid by the local agent, and there are no papers that I am aware of in reference to any of their funds being depredated on by claimants or attorneys.

Q. Where would these papers be, if any such were in existence?—A. I cannot tell unless they would be in the Indian Office. They would necessarily come there, if complaints were made.

By Mr. CHIPMAN:

Q. I ask you whether, at the time you made your contract of June 17, 1870, with Bosler, you believed from the information in your possession that there was imminent necessity for a contract of that character?—A. That was my belief.

Q. Did you act upon that belief and upon the information you had in your possession at that time?—A. I did.

Q. Did the matter come up in your mind as to whether the term "goods," used in the appropriation act approved July 15, 1870, embraced the matter of supplies generally, and, if so, what interpretation did you give to the statute?—A. I have never had but one impression until recently on this subject, which was that the term "goods" generally used in the appropriation act did not embrace what we call subsistence or provisions.

Q. Do not the laws distinguish between the two, and in this same appropriation act do not these two items appear separately?—A. They appear separately as a general thing, and I suppose there is where I got my impression.

Q. Did you feel that it was your official duty to consult the board of commissioners in regard to this matter of provisions or subsistence, and did the question come up in your mind as to whether it was your duty to consult them?—A. I did not regard it as my duty to consult them.

Q. Was that the reason you did not consult them?—A. That was the only reason. There were members of the board here during the month of June, and probably some portions of the month of May. We had conversations in the office in reference to the condition of Indian affairs, and the necessity of furnishing supplies to these particular Sioux. Red Cloud, with his delegation; Spotted Tail, with his; and another chief of another tribe up the Missouri, whose name I do not remember, were also here. Members of the commission were here, and, in my judgment and belief, the necessity was fully recognized by them of keeping these Indians supplied.

Q. As to that point, had you any doubt of your duty to act in the manner you did?—A. I thought it was my duty to act, and I do not know of any impression given me of any other opinion on the subject. I think Mr. Brandt was as anxious as I was that these Indians should continue to be supplied.

Q. Did any member of the board suggest to you that they should have the supervision of the purchase of these supplies?—A. I do not recollect that anything was ever said to me on the subject by any member of the board.

Q. When you made a contract with Bosler, I believe you have explained that it was your wish that the cattle should be delivered all at one time, if possible?—A. That was my intention from the beginning.

Q. And the extension to different times of delivery was to suit him in case he was unable to purchase the cattle all at one time?—A. It was to suit him in case he could not get all the cattle at first.

Q. Then, in furnishing the cattle at one time he practically complied with your original intention?—A. He did.

Q. Mention is made here of a correspondence between yourself and the Commissary General of the Army, of May 27 and June 1, in reference to what other supplies might be on hand. Was it contemplated at that time that there would be any large surplus, or what was understood with regard to the surplus remaining over on the 30th of June?—A. I did not get the impression at the time that they wanted to deliver over to the Indian Department any large amount of supplies, but that there would necessarily be what in common phrase would be called "the tag ends" in closing a contract, which they wanted us to take. The idea was that it would be suitable to our use, but would be worthless to them if left on their hands.

Q. In point of fact were there large quantities of cattle or stores remaining over?—A. Not to my knowledge, except at Whetstone.

Q. Was the number of cattle received by Mr. Poole under instructions given by you, or was it not an independent matter of which you had no knowledge?—A. My impression is that it was an independent matter. When I wrote this letter of June 1, it was my intention to indicate to General Eaton that we would take whatever was intended for us on the 1st of July, and which might be left on his hands, and which, from any circumstance, might not have been received by the agents, but the idea was not that we should take any large quantity.

Q. These were the supplies in the hands of the commissaries at different points?—A. In the hands of the different agents of the Commissary Department, which they had at their different storehouses, as I understand.

Q. But the cattle received by the agent at Whetstone were received directly from the contractor?—A. That is my understanding.

Q. Had you any previous acquaintance with Bosler prior to this contract made in June, 1870?—A. I may say that I hardly had any at all. I had seen him two or three times before this contract was entered into, or perhaps three or four times altogether.

Q. Had you any information as to his responsibility or reliability for complying with any contract he might undertake?—A. I did inquire as to his responsibility from parties whom I supposed would know respecting his capacity to execute or fill any contract he might enter into, and my information was that he was a good contractor, perfectly responsible and reliable.

Q. About the extension of the 10th of August, what, in your mind, was the controlling reason for making this extension; what were the necessities at that time which required it?—A. The main reason I had in my mind was simply to prevent the agencies from running short of supplies for the Indians on the Missouri River. I looked at it in this way: The beef supply, under the arrangement of June 17, was becoming exhausted, and before I could advertise, contract, and get beef under the contract, the agencies would probably be entirely out of supplies, and the Indians would have left the agencies, which I wished to avoid if possible. That was my reason for ordering the extension.

Q. What was the reason in your mind for not calling on the board of commissioners to inspect these provisions, as you did call upon them in regard to the goods?—A. I had no doubt in my mind, after the passage of the act of July 15, that they were directed by the law of Congress to inspect goods purchased, and I called upon them with that view; but I did not understand that the same requirements extended in reference to supplies. It would be often very inconvenient to bring them up to inspect every purchase and supervise every expenditure made under the extension.

Q. Had you any knowledge that Bosler had any interest in the Morrow contract of September 26, at the time it was made?—A. No, sir.

Q. State whether you had any interest, direct or indirect, in any contract made with these parties, which is now before this committee for examination?—A. No, sir; I did not.

Q. Was your conduct in the matter, or not, based upon your best judgment, as an officer of the Government in charge of the Bureau of Indian Affairs?—A. It was based

upon my best judgment. I thought, at the time, I was doing the best I could under the circumstances surrounding the case.

Q. Had you any reason to favor Bosler in any particular?—A. None at all.

Q. Did you ever favor him purposely?—A. No, sir.

Q. The contracts spoken of were made with a view to the best interests of the service, as far as you could judge, at that time?—A. That was my idea.

Q. Explain with regard to the question of transportation. The contract was dated September 26, yet some of the goods were forwarded, agreeably to your understanding, prior to that time. Did you complete, so far as you regarded it, your contract with Mr. Woolworth prior to his receiving any goods for transportation?—A. We had a full talk prior to his receiving any goods at all, as to all matters connected with the transportation of Indian goods. He did give me a general idea of what they would do it for, with the exception, it may be, of one or two points high up the river. They did not want to take the Berthold goods, which they subsequently did take. He said they would not go up with a boat with less than 150 or 200 tons, or something of that kind. There were two or three minor points like these which had not been settled when he went West, but I said to him that there must be no delay in forwarding the goods. That when they reached Sioux City, if there was a boat there, they must be forwarded at once, and for him to execute the contract as soon as he could and send it back to me and I would execute it on my part.

Q. Did you inform yourself with regard to the responsibility of this transportation company to carry out a contract of that kind?—A. I did inform myself as far as I could, and satisfied myself in my own mind that they were the only parties on that river that could do the transportation I wanted, without being subjected to inconvenient delays.

Q. State whether they owned the largest number of boats on the river?—A. I am told they owned the largest number.

Q. Had you reason to extend peculiar facilities to them. Had you any interest in their contract?—A. Not at all. The only interest I had was to get the Indian goods delivered to their respective destinations at the earliest possible day. We had promised Red Cloud and Spotted Tail that their goods should be delivered to them long before they reached there, and there was a good deal of dissatisfaction in consequence of their not being there earlier. I think I did the best I could to get them up at the earliest moment, and I took every precaution.

Q. In regard to advertising for bacon and beef, in August, did you purposely defer that advertisement in order to give Bosler an extension of his June 17 contract?—A. No, sir; it never entered my mind.

Q. Had you any correspondence with Bosler in regard to the June 17 contract whatever, in which you gave him to understand that you intended to give him an extension?—A. No, sir; I had no communication whatever with him to that import.

Q. State whether or not the first knowledge he had of your intention to give him an extension was your letter of August 10th?—A. I suppose that is the first intimation he had. I did not indicate to any one my intention to do anything of the kind. I found that it became absolutely necessary to extend his contract, or make a new one with somebody else, instead of waiting for a contract under an advertisement.

Q. What delays were usual under an advertisement, and what are the benefits of an immediate supply in an emergency?—A. The ordinary time for advertising, when there is no hurry, is about thirty days. After the proposals are received, the probabilities are that it will take from one to two or three days to canvass the bids. It depends, of course, very much upon the number of bidders, and upon the parties proposed to become sureties. In case the award is made to a successful bidder, it frequently happens that the successful party resides at a distance, and must be written or telegraphed to come on here and enter into the contract, if the letting is here in Washington. He must be prepared with sureties to go upon his bond, and the party, after coming from a distance, finds it necessary to return and obtain his bondsmen, so that sometimes a delay of ten days or two weeks occurs before the contract is finally executed, after the award is made. Then the party goes to work for the first time to make his preparations to execute the contract, getting together his materials in the shape of supplies, so that a considerable further time must elapse before he can commence delivering under it. We have had these experiences in the office, and I know the delays which are incident to them.

Q. Then, to meet an emergency, your office has never regarded it safe to wait for contracts by advertisement?—A. We could not do it very well. When an emergency occurs, we must take all the precaution we can to inquire into the responsibility and ability of the party to execute what he proposes to do, see that the price named is a reasonable one, and make the best contract we can.

Q. In making a contract of that character, do you, or not, consider it reasonable to give the party a greater compensation than he might otherwise obtain?—A. It is generally regarded so.

Q. Did Bosler understand, at the time his contract was made, that he was to take the risk of an appropriation.—A. He understood that perfectly well.

Q. Do you remember when your attention was first drawn to the matter of advertising for beef and bacon?—A. No, sir. I suppose it had been on my mind at different times after the passage of the appropriation bill as well as before, but I could not get to work preparing the thing until probably a week before the 26th. I was in New York, and the matter was overlooked in the office.

Q. I find here in the correspondence, printed, a letter of Mr. Cady, acting commissioner, to the Secretary of the Interior, dated August 13th, stating that the office was about to advertise for proposals for subsisting the Indians. Do you remember whether you were here in Washington, yourself, previous to that?—A. I was in New York. I came here on the night of August 9th, and was here the 10th and 11th. I think I left for New York the night of the 11th.

Q. And while you were here in town you extended the Bosler contract?—A. Yes, sir; and at the same time I probably suggested to Mr. Cady that the preliminary steps be taken toward advertising, under the law, for beef and bacon, providing it had not been done. I have no recollection of that, but that is what I naturally would have done. I have no memorandum on the subject.

Q. In your administration of the office have you, or not, had frequent consultations with your superior officer, the Secretary of the Interior?—A. I had daily conference with him upon every subject relating to Indian affairs.

Q. State whether there was any concealment, upon your part, about what you were doing in regard to supplying these Indians, or whether the Secretary was informed upon the subject?—A. There was no concealment upon my part. My communications were open and free with the Secretary. I wish to say here, as a matter of explanation, that a great deal of the business of the Indian Office, and of the administration of the office, is carried on by verbal conversation with the Secretary of the Interior, of which no memorandum or record is kept. As a matter of course they result in an order or instructions or directions in writing from the Indian Office, and nothing appears on record showing the consultations taken between the Secretary and the Commissioner on the subject.

Q. That is, you take your portfolio and talk with the Secretary verbally about it?—A. Yes, Sir.

Q. Explain whether you talked with him in regard to supplying the Indians as provided for in this contract of June 17?—A. I had frequently talks with him in reference to entering into this contract of June 17. He was aware of the whole of it.

Q. Do you remember whether you consulted with him when you came over from New York?—A. He telegraphed me to come over August 9, the day before the extension.

Q. Do you remember whether you talked over matters relating to the supplies of Indians at that time?—I do not recollect particularly whether we did or not. I know I was in the habit of mentioning all these things, which I considered necessary to be done.

Q. Had you any reason to conceal from him any facts in relation to it?—A. None at all.

By Mr. WELSH:

Q. Are you aware how much beef was furnished under the three million contract of August 10?—A. No, sir.

Q. Will you please furnish the committee with the amount furnished under that contract?—A. I will do so.

Q. From whom did you buy groceries for the autumn supplies?—A. They were purchased from Green & Whattles, New York.

Q. Will you furnish the committee with the rates and quantities?—A. Yes.

Q. Were they public or private purchases?—A. Private; that is, without advertisement.

Q. On the extension of your advertisement in New York for dry goods did you have the approval of the Indian commissioners?—A. I was not aware that an extension of the advertisement was made.

Q. I refer to the change in the form of the advertisement and extension, and I ask you whether the commission did not request you to extend the time, and you yielded to their request?—A. They may have done so. I have no recollection. I know I complied as far as I could with everything they wished in the matter.

Q. Do you know any other parties in interest, directly or indirectly, in either Bosler's purchases or contracts other than those whose names appear?—A. I do not.

By Mr. CHIPMAN:

Q. Explain about the purchase of the Osage presents in New York City after the commissioners had left there, at the time they made their purchases of the annuity goods, how you came to do it, and what the purchases were.—A. On the 15th of July last, Congress passed an act for the removal of the Osages from their lands in Kansas

to the Indian Territory, and required the assent of the Indians to the provisions of the bill. It was on consultation with Secretary Cox that we thought proper, when the Indians were convened for the purpose of acting upon the matter, that we should furnish them subsistence while attending the council, and give them a small amount of presents in the shape of goods, and after the council had closed have these goods distributed. Presents given to Indians who have been convened in council are generally intended for the chiefs and headmen, and are intended to be of little better quality than those ordinarily supplied, and I gave an order in New York, amounting, I think it probable, to about ten thousand dollars, for a variety of dry goods to be distributed among these Indians after the council should have closed their business, for the chiefs and headmen to take home to their families. They consisted of blankets, calicoes, sheetings, and really I do not remember every article I purchased. I have not examined the invoices. I know there were some blankets which, as I understand since, were not acceptable to the members of the Indian commission. I have heard that indirectly from the evidence of Mr. Colyer on the subject. I gave an order to Buckly, Welling & Co., a house in New York dealing largely in Indian goods, for the goods which I proposed to send out to the Osages. I think I gave the order to them for nearly everything.

Q. It was stated by Mr. Colyer in his testimony, that the same blankets which had been offered to that commission while there at $6 80, were invoiced at $8. They were scarlet blankets. What have you to say to that?—A. I have not looked at the bills to see whether the statement is true or not. I presume it is. I did not get the blankets of Amadon, Lane & Co., where they saw them, but of Buckley, Welling & Co., though the latter house may have obtained them from Amadon, Lane & Co., for anything I may know.

Q. When they made their offer at $6 80, how many were to be supplied?—A. My impression is they were to supply something like five thousand pair of scarlet, some four thousand indigo, and a like number of white.

Q. How many in fact were purchased for these presents to the Osages?—A. I think two hundred pair of scarlet.

Q. Would there be any difference in the price of 200 pair and several thousand pair, at the same purchase; and if so, to what extent?—A. I have noticed that bidders, as a general rule, have made a difference where they supply a large quantity. Where the supply was small they would be of very nearly what are termed the market-ruling rates, about manufacturer's prices. Where a large number of blankets were ordered they could generally be obtained at a less price of the merchants than the manufacturers.

Q. Did you buy at the lowest ruling rates at that time?—A. I did.

Q. Did the Secretary know about these purchases that were to be made?—A. Yes, sir; he had ordered it.

Q. Had you any motives in making these purchases of any particular persons, any favorites to whom you wish to extend benefits?—A. Nothing of the kind entered my mind.

Q. Did or not the commission know that these purchases were to be made?—A. I am not positive. My impression is that I mentioned the fact that presents would be sent to the Osages; but they may have got the impression that the Osage goods were included in the aggregates put down in the advertisement.

Q. The presents were a separate matter?—A. They were a separate matter. The advertisement quantities were made up from the amounts to which each tribe was entitled in their annual presents.

By Mr. SARGENT:

Q. Did not Mr. Brunot, a member of the Indian commission, as early as June 3, 1870, call your attention to the willingness of the commission to act under the law, which provided that they should exercise joint control with the Secretray of the Interior over the disbursements of appropriations made by the appropriation act of that year, or any part thereof, as the President might designate; did not the commission call your attention to their willingness to act, by letter?—A. Yes, sir.

Q. How soon after that did you reply to that letter?—A. Not until after the passage of the appropriation bill.

Q. The provision I refer to, in regard to the commission, is in a previous appropriation bill.—A. I understand that.

Q. Do I understand you to say you think the words "Indian goods" do not include flour, bacon, tobacco, coffee, and sugar?—A. My impression is that, in a reading of the law, goods are made a separate item.

Q. Where the law of 1869 provided that they should exercise joint control over the disbursements of appropriations made by that act, did not that, in your judgment, include expenditures for cattle, flour, tobacco, and coffee?—A. Very likely it did, but the execution of that law absolutely, with such a construction, would be utterly im-

possible, for they would have to come to the Indian Office and supervise every disbursement made under the Indian bill.

Q. Would it be impracticable in respect to the disbursement of large sums?—A. No; but if you were to carry out that construction literally, it would be impracticable.

Q. Could it not be carried out substantially where immense contracts were made, like these you have been speaking of this evening?—A. Yes, sir.

Q. By the act of 1869 it is provided that $25,000, or as much as may be necessary, is appropriated for the transportation, subsistence, and clerk-hire of said commissioners while engaged in that service; is your construction that that amount was provided for transportation and subsistence in buying a few dry goods in New York or elsewhere?—A. No, sir.

Q. You speak of the practice of giving contractors more for goods or service, whenever an emergency arises. Would not an emergency be constantly created, if the disbursements were not made and contracts provided for, until the goods on hand were about exhausted, and the Government be compelled to pay higher prices?—A. I presume it would arise if such a practice was adopted. It was not my intention to adopt any practice of that kind.

Q. You spoke of this transportation company having more steamers than any other on the Missouri; do you know how many Haslett & Co., who executed the contract of the Quartermaster's Department, had?—A. No, sir; I never heard of Haslett & Co.

Q. Do you not know that Haslett & Co. are the same company, with the transportation company with which you contracted, and are running the same steamers?—A. No, sir; I never heard of the name before.

Q. As there is so much difference between the prices paid by the Quartermaster's Department and the rates paid by yourself, in making further arrangements of that character would it strike you as judicious that an advertisement should precede a contract?—A. Certainly. If the committee will allow me I wish to say that at no time have I pretended to be an expert in regard to the management of Indian affairs. I entered the office of the Indian Bureau with the duties perfectly new to me, and it may be very probable that mistakes have been made. In looking back I can see many things which I would change.

Q. Where the law expressly requires you to advertise before making contracts, would it require the knowledge of an expert to understand your duty in that respect?—A. Do you refer to the June 17 contract, or to any particular contract?

Q. All of them are required to be advertised by law.—A. I followed the custom and practice that had grown up in the Department, in case of an exigency to purchase in open market.

Q. The law I have referred to expressly gave to the board of commissioners joint control with the Secretary of the Interior over the expenditure of the moneys appropriated for Indian purposes; were you to execute the law, or determine yourself whether it was expedient that it should be executed?—A. I was in consultation with the Secretary of the Interior, who was one of the gentlemen authorized and mentioned in the law.

Q. Do I understand you that Mr. Cox, Secretary of the Interior, advised that the board of Indian commissioners should not be consulted or have an opportunity to inspect these goods?—A. No, sir; I do not wish to be understood as saying that.

By Mr. WELSH:

Q. Do not you remember yourself and the Secretary of the Interior arguing the stringency of the law requiring contracts before the board of commissioners, from the first, and of the remark being made that you could not buy anything until after advertisement; have you no recollection of that?—A. No, sir.

By Mr. CHIPMAN:

Q. You say you followed the custom of the office in regard to purchasing in open market; has or not that been the uniform custom of the Indian Bureau, extending back for many years, to your knowledge?—A. So far as my information goes they have always done that every season.

Q. Have you, in any particular, departed from the custom and usages of the office, in executing the law?—A. I simply followed the custom of the Department in every respect. There are a good many things it is impossible for us to advertise, and which we must purchase in open market, or we cannot get along in the administration of the Indian affairs.

By Mr. WELSH:

Q. Do you speak of the very large sums covered by these contracts?—A. I say there are a great many such emergencies covering large and small sums both.

By Mr. SARGENT:

Q. Can you give any reason why an advertisement for beef could not have been made on the 15th of July last, to be awarded witin ten days or two weeks, or any later

time before the 10th of August, when this contract was extended?—A. As I have said, I was personally very much occupied after the passage of that bill in getting the many appropriations provided for into shape for the purpose of making them available. Aside from that my whole attention was directed to the purchase of the goods. These Indian delegations had been here urging us to furnish them with goods, and subsistence had to be supplied temporarily without waiting for advertisement.

Q. The subsistence was to be provided for September; what prevented contracts under advertisement for these goods before that time?—A. Nothing, except that I was in New York nearly all the time engaged in buying annuity goods.

Q. Were you gone three months?—A. Nearly two months.

Q. Was any one acting as Commissioner?—A. Mr. Cady was acting as Commissioner.

Q. Was there anything to prevent his advertising?—A. No, sir.

Q. Then I understand you to admit that you neglected your duty in not advertising yourself, or giving him orders to advertise?—A. I did not give him orders for the reason that my attention was entirely engaged in New York, as I have stated.

By Mr. CHIPMAN:

Q. State, if you are prepared to answer, if you had taken immediate steps, after the passage of the appropriation bill, giving the usual time for advertising, for completing contracts and delivery of the supplies, whether they would certainly have been delivered to meet the requirements of the service on the expiration of the June 17 contract.—A. I presume if I had made the advertisement at once, and given short notice and short delivery, the thing could have been done.

Q. Would not short delivery and short notice necessarily have resulted in higher prices?—A. There would have been a probability in that direction. I cannot say what the actual result would have been.

By Mr. WELSH:

Q. Did not you get a bid of 3.88 cents per pound for beef when there was only one month's notice?—A. The papers show what the bids were.

DEPARTMENT OF THE INTERIOR, OFFICE OF INDIAN AFFAIRS,
Washington, D. C., February 3, 1871.

SIR: I have the honor to submit herewith Appendix A, to complete answers to interrogatories made to me, and more fully explained by reference to manuscript copy of my testimony, pages 4, 5, and 100.

Also Appendix B, showing amount paid for beef under extension of August 10, and amount paid under contract of September 26, for bacon, and also the amount paid for transportation under contract of September 26, 1870.

There have been no payments made on the Morrow contract of September 17, 1870. (See manuscript of evidence, pages 50 and 100.)

Also Appendix C, being copies of letters to the Sioux agents, notifying them of the Morrow contract.

Before the Morrow contract was signed, I had left Washington on official business, under orders of the Secretary of the Interior, and returned the latter part of October, when, finding that the agents had not been notified of the Morrow contract, I sent these etters up.

No invoices were sent from the office to agents of the supplies furnished under the June 17th contract by Mr. Bosler. The agents receipted to Mr. Bosler for what they received.

Very respectfully, your obedient servant,

E. S. PARKER, *Commissioner.*

Hon. A. A. SARGENT, *House of Representatives.*

APPENDIX A.

Commissioner Parker's testimony, called for by committee. (See manuscript, pages 4, 5, *and* 98.)

PURCHASES IN OPEN MARKET.

Green & Wattles:		
August 26, 1870—150,000 pounds of coffee, at 21½	$32,250 00	
August 26, 1870—300,000 pounds of sugar, at 11½	34,500 00	
August 31, 1870—20,400 pounds of tobacco, at 65	13,260 00	
		$80,000 00
Jesse Oakley & Co.:		
September 3, 1870.—41,250 pounds of soap, at 9½		3,918 75
Wanamaker & Brown, (for Santee Sioux:)		
August, 1870.—60 boys' coats and pants, at $10		600 00

APPENDIX B.

Included in requisition dated November 9, 1870, for 1,222,922 pounds of beef furnished the Indian Department in October, 1870, at 6½ cents per pound.	$79,489 93
Requisition dated November 23, 1870, being for 393,696 pounds of beef furnished the Indian Department November 2 and 3, 1870, at 6½ cents per pound	25,590 24
Requisition dated November 29, 1870, being for 2,391,285 pounds of beef furnished Indian Department in November, 1870, at 6½ cents per pound	155,433 52
	260,513 69
Under contract of September 26, 1870, 531,469 pounds of bacon, at 18 cents per pound	$95,664 42
Transportation under contract of September 26, 1870	179,247 55

APPENDIX C.

DEPARTMENT OF THE INTERIOR, OFFICE OF INDIAN AFFAIRS,
Washington, D. C., December 2, 1870.

SIR: I have to advise you that by contract entered into with J. A. Morrow on the 17th of September, 1870, for furnishing the Indian Bureau with beef for issue to Indians, it is provided that he shall furnish the Crow Creek agency, Dakota Territory, with one million pounds, gross weight; one-ninth of the whole quantity to be delivered between the 1st and 15th of October, 1870, and thereafter the delivery to be made monthly, in such quantities as the Indian agent at said agency shall require; to be of good merchantable cattle, all steers, in good healthy condition, and to average one thousand pounds live weight, to be determined by weighing on scales when practicable; for which he is to receive three cents and eighty-eight one-hundredths of a cent per pound, gross weight, for all the beef accepted under said contract.

I have, therefore, to direct that you will receive, strictly in accordance with said contract, all beef that may have been ready for delivery on time. If the contractor was ready to deliver one-ninth of the quantity to be furnished at your agency at the time specified, you will receive all that may be due up to this time; otherwise, you will only receive such as may have been presented on contract time, and thereafter such quantities as may be required by you; giving, in accordance with the terms of said contract, receipts to the contractor for the number of pounds received by you.

Very respectfully, your obedient servant,

E. S. PARKER,
Commissioner.

HENRY F. LIVINGSTON, Esq.,
United States Indian Agent, Crow Creek Agency, D. T.

William F. Cady, United States Indian agent, Grand River agency, D. T., same as to agent Livingston, substituting Grand River agency for the former.

Samuel D. Webster, esq., United States Indian agent, Yankton agency, D. T., same as the foregoing, substituting Yankton agency.

J. Lee Englebert, esq., United States Indian agent, Cheyenne agency, same as foregoing, substituting Cheyenne agency.

DEPARTMENT OF THE INTERIOR, OFFICE INDIAN AFFAIRS,
Washington, D. C., December 2, 1870.

SIR: I have to advise you that by a contract entered into with J. A. Morrow on the 17th of September, 1870, for furnishing the Indian Bureau with beef for issue to Indians, it is provided that he shall furnish the Whetstone agency, Dakota Territory, with 1,440,000 pounds, gross weight; one-sixth of the whole quantity to be delivered on or about the 1st of January, 1871, and thereafter the delivery to be made monthly, in such quantities as the Indian agent at said agency shall require; to be of good, merchantable cattle, all steers, in good healthy condition, and to average 1,000 pounds, live weight; to be determined by weighing on scales, when practicable; for which he is to receive three cents and eighty-eight one-hundredths of a cent per pound, gross weight, for all the beef accepted under said contract.

I have, therefore, to direct that you will receive, strictly in accordance with said contract, all beef that may be ready for delivery on time. If the contractor be ready to deliver one-sixth of the quantity to be furnished at your agency at the time specified, you will receive it, giving, in accordance with the terms of said contract, receipts to the contractor for the number of pounds received by you.

Very respectfully, your obedient servant,

E. S. PARKER, *Commissioner.*

J. M. WASHBURN, Esq.,
U. S. Indian Agent, Whetstone Agency, D. T.

WASHINGTON, D. C., *January* 25, 1871.

WILLIAM MEYERS, captain and assistant quartermaster United States Army, sworn and examined.

By Mr. WELSH

Question. Are you familiar with contracts for transportation?—Answer. Yes, sir.

Q. Be good enough to say whether the advertisement for the contract now shown you includes the right to send Indian goods, and whether the contract itself includes the right to send Indian goods?—A. This is a quartermaster's contract, covering the period from March 20 to October 31, 1870, inclusive, and the contract itself answers your questions; it does include Indian goods. (Contracts referred to appended to this testimony.)

Q. Be good enough to say whether the contractors are to haul by land in case the water is low?—A. The contract specifies that in case boats are unable to reach their destination the transportation must be by land.

Q. Please state the contract price for transporting Indian goods, from March to August inclusive, from Sioux City to the points I will indicate.—A. The rate per 100 pounds—

From Sioux City to Yankton is	$0 75
From Sioux City to Whetstone	1 00
From Sioux City to Brulés	1 10
From Sioux City to Crow Creek	1 25
From Sioux City to Cheyenne or Big Cheyenne	1 60
From Sioux City to Grand River	1 60
From Sioux City to Berthold or Fort Stevenson	2 00

For the month of September the rates from Sioux City to the points named are, per hundred pounds, as follows:

To Yankton agency	$1 50
To Whetstone	1 60
To Brulés	2 20
To Crow Creek	2 50
To Cheyenne	3 20
To Grand River	3 20
To Berthold or Fort Stevenson	4 00

By Mr. CHIPMAN:

Q. These last rates are for September, 1870, as I understand; please give the stipulation with regard to the October rates?—A. They are two hundred per cent. advanced on the rates for March, April, May, June, July, and August.

Q. State, if you know, whether there is an understanding between the contractors and Quartermaster's Department, in bidding for these rates, that the bulk of the goods are to be sent up early in the spring, on the spring rise?—A. The rule with regard to the transportation of supplies by the Missouri River is to advertise early in the spring, ascertaining beforehand the exact amount, as nearly as possible, which will be required at the different posts. The quartermasters usually inform those interested in bidding of the amount intended to reach each particular post, and the bids are made upon the presumption that the bulk of supplies will be shipped at the most favorable period of navigation of the Missouri River, which is the spring rise, commencing in May and extending through the month of June and a part of July. And all the officers of the Government usually make it a point to have their supplies ready for that condition of the river in order to get the supplies to their posts, and also to secure more favorable rates for freights. As a matter of fact, that theory is carried out, or at least has been carried out, to my certain knowledge, during the last ten years in which I have assisted in supplying these posts.

Q. Do you know whether, under the contract now mentioned, there were freights to any considerable extent remaining over these early months into October?—A. No, I do not. My impression is that we have usually been successful in getting off nearly all our freights before July.

Q. The object, then, of providing for later dates was to cover any contingencies of smaller lots to be sent up which could not be provided for earlier in the season?—A. Yes, sir.

By Mr. WELSH:

Q. Do I or not understand that under that contract supplies of every kind could be sent up on ten days' notice for the Indian Department during any of these months? Is not the contract binding upon the man who executes it to do this?—A. The contract so provides, and is equally binding with any other Government contract.

By Mr. CHIPMAN:

Q. Is it not limited as to quantity?—A. I have not read this contract through now. They sometimes state that they will receive goods at any time, but a certain number of days' notice is required to be served on the contractor. That, I believe, is specified in article five of this contract, and I see that it requires ten days' notice to Omaha, Nebraska, or Sioux City.

Q. State whether there is any margin that could have been used for the purpose of transporting Indian goods?—A. I did not have charge of the execution of this contract, and cannot state definitely.

Q. Do you know whether any large quantities of Indian supplies were expected to be sent up in the late months?—A. No, sir.

Q. You do not know whether the Quartermaster's Department could have supplied transportation for any such large quantities under that contract?—A. No, sir, I do not. But contractors could have been required to do the work or suffer the consequence of non-fulfillment.

Q. State whether your Department contracts for transportation for the Indian Department, or whether it is a part of the Quartermaster General's duty to provide for such transportation?—A. That clause, as I understand, was inserted for the purpose of aiding the Indian Department in transporting its supplies and permitting that Department to avail itself of our contract for that purpose. I do not know that there was anything which made it obligatory upon the Quartermaster General to make that arrangement.

Q. Was it such a clause as would authorize your Department to set aside its freight and give place to Indian goods, if the transportation was not sufficient for all?—A. I think Indian supplies would be subordinate to our own in that respect, and my impression is there is some restriction of that sort, that the quartermasters are to forward Indian supplies, if possible. There are, however, no cases that I know of where both could not be forwarded as required.

By Mr. SARGENT:

Q. Was that contract made in pursuance of advertisement?—A. Yes, sir.

Q. Was there competition?—A. Yes, a large number of bidders.

Q. Was there any difficulty on the part of the contractor in carrying out his contract at these rates?—A. I think not.

Q. From your knowledge of transportation in that region, do you consider the rates named in this contract reasonable?—A. Yes, sir.

Q. Is it a good idea to make the rates for September and October relate back to transportation done during the spring and summer months?—A. I think that is a feature imposed upon the Department by the bidders, by those who do the work.

Q. Ought there not to be a difference in favor of the Government by which it would get its freight for the spring and summer months for less than would be fair rates for September and October?—A. Yes, sir.

Q. And any arrangement that did not insist upon that for the Government would be an improvident one?—A. Yes, sir.

By Mr. WELSH:

Q. Do you know Mr. Hazlett?—A. I do not know him personally.

Q. Do you know whether he has any relations to the Northwestern Transportation Company?—A. I do not.

Q. Do you know whether his freight is really taken up by the Northwestern Transportation Company's boats?—A. I have been told that it was taken up by their boats; I do not know it personally.

Q. State whether you could make a contract for full rates, in the fall, or during the months when freight had to be carried in the fall, at as favorable rates as you could make in the spring, with the arrangement under which the contract was made, reaching over into fall?—A. No, I think not; I think you could not get as favorable rates by making the contract in the fall as you can by making it in the spring; I am now talking of our own Government transportation; these rates are made to cover all contingencies of shipment, and enable the contractor by the profits he makes on the spring work to provide for possible loss on a single trip in the fall; for instance, in 1869, I remember two or three boats were sent up in the fall, as late as October, and they were all three ice-bound, involving, as I understand, a loss of from $10,000 to $15,000 to the contractor; they were ice-bound in the neighborhood of Fort Stevenson.

WASHINGTON, *January* 25, 1871.

L. H. ROBERTS sworn and examined.

By Mr. CHIPMAN:

Question. What occupation have you followed up to 1870?—Answer. I was for some time engaged at the Cheyenne Indian agency, Dakota Territory, as surveyor.

Q. Were you at any time left in charge of that agency by Major Randall?—A. Yes, sir.

Q. When was that?—A. I really could not give the date; I am under the impression that it was in June, 1870, and I think the latter part of June.

Q. Where was Major Randall?—A. He left with a delegation of Indians for Washington.

Q. Did he put the agency in your charge?—A. He did.

Q. What was the condition of the agency at that time as to supplies?—A. It was very poorly supplied. I recollect there was considerable talk, about that time, that if supplies did not soon reach the agency there would be trouble.

Q. Do you remember when cattle were brought there under the Bosler contract?—A. I do not remember the date; it was, I should say, about the middle of July.

Q. Were you called upon then, as acting agent, to receive them and decide as to their weight?—A. I was.

Q. State what you did in the premises?—A. I first consulted Captain Pearson, then

brevet lieutenant colonel and commandant at that post. The scales at the post had been torn up, and were utterly worthless. He said he hardly knew what to advise me, but finally suggested that if I went down to Fort Sully and got an agent there to assist me in judging of the weight of the cattle, it was the best that, under the circumstances, could be done. I went to Fort Sully and consulted with General Crittenden, the commander of the post being away, stated to him the circumstances and asked for assistance. He said we would go around and find who was in the habit of judging on that subject. I looked around and found Captain Irvine, of the Twenty-second Infantry, who had had a large experience in judging of the weight of cattle for the Quartermaster's Department, and who was that day the officer of the day at the post. I reported to General Crittenden, who relieved Captain Irvine as officer of the day, and he returned with me to the agency. Joseph Bosler, a brother of the contractor, was in charge of the cattle. I felt embarrassed, and did not want to do anything in Major Randall's absence, for I had discharged Major Randall's head clerk, and expected his censure in consequence. Bosler said his brother, the contractor, had directed him to leave the best cattle at that agency. Captain Irvine rode through the herd of, I think, 450 head, and judged the weight to be 1,200 pounds each. This seemed to be satisfactory to Bosler, and I was asked whether it was to me. I told him I was not competent to judge, but that if it was satisfactory to Captain Irvine it was to me, and I would receive the cattle at that rate.

Q. Was that the best you could do under the circumstances?—A. It was the best I knew how. We had no other means of arriving at the weights.

Q. After Major Randall's return did he make some complaint of what you had done?—A. He did.

Q. Was anything done in relation to the matter?—A. Major Randall, on his return, seemed to be very much dissatisfied with all my proceedings, and rather inclined to find fault. One objection he made was, that I had received the cattle on the opposite shore of the river from the agency. I did this on the advice of Captain Allison, and for the reason that there was a valley on that side of the river which would furnish much better pasturage. Major Randall also found fault with the weight of these cattle. He had the scales put in as good repair as possible, weighed some of the cattle, and reported that they fell short more than a hundred pounds. In the mean time, however, the best of the cattle had been killed.

Q. Did you forward to the Indian Office the evidence upon which you arrived at the average weight?—A. I did.

Q. What did that evidence consist of?—A. I stated that I had received a certain lot of cattle from Mr. Bosler; that I went to Fort Sully and consulted General Crittenden, and acted upon his advice as to what should be done under the circumstances.

Q. Do you know whether the scales at the agency were so repaired as to give correct weights after Major Randall's return?—A. I am not a judge of that. I told Major Randall that I did not consider them accurate by any means. He said he did not know whether they were or not, but that we must have something to go by.

Q. What was the condition of the agency as to supplies when the second lot of cattle were brought over by Mr. Bosler?—A. We were needing supplies very much, and were very glad to receive them.

Q. Prior to the receipt of the first lot of cattle what was the disposition of the Indians?—A. They were very hostile. Our supplies were short, and I consulted with Captain Pearson as to the best mode of making them hold out as long as possible.

By Mr. WELSH:

Q. You say you sent the evidence on which you received these cattle at the weight you did, to the Department; did you send any other evidence than the letter you wrote on the subject?—A. No; that was all. I refer to my letter of August 21, 1870. (Letter referred to printed in the Appendix.)

Q. Did you ever send the certificate of Captain Irvine, or of any other officer, on that subject?—A. No, sir.

Q. Have you any such certificate in your possession?—A. No, sir.

Q. You say you were not accustomed to estimating the weight of cattle; do you recollect the form of the receipt which you gave for these cattle?—A. I do not. I committed an error in not retaining a copy of the receipt.

Q. The receipt which is on file here gives the number of pounds net; how did you ascertain the net weight?—A. I consulted the officers there, and they said the gross weight must be double the net.

Q. Did you know the weight of these cattle at any other agency?—A. I did not.

Q. Were you informed that other articles fell short which were received by you, as well as cattle?—A. I was, and which I very readily corrected with Major Randall.

Q. Do you know whether the articles were paid for by the weight as corrected, or by the original certificate?—A. I presume, by my original certificate, which proved to be correct. I got Major Randall to go back and re-weigh enough of these articles to satisfy him that my certificate was correct, and he so changed it in his report.

Q. Can you tell me whether that letter of August 20 contains the correct weights?—A. Major Randall reported to me that he had so corrected his report; at least, I so understood him.

Q. Do you know whether the flour and all those articles were actually weighed?—A. They were not all weighed, and that was never done for any contract on the Missouri River that I am aware of. A part of it was weighed, enough to satisfy us that the weights estimated were correct.

By Mr. SARGENT:

Q. How did you ascertain and report to the Indian Department that you received twenty thousand pounds, if the bacon was not weighed?—A. I took the advice of the quartermaster, and got at it as is usually done. We weighed a portion of the sacks, and finding the weight marked on them to be correct, we took the others at the weights marked. The sacks weighed were selected indiscriminately from the entire amount.

Q. Did you have any invoice describing the qualities of the goods, &c.?—A. We had the bill of lading of the boat.

Q. Do you know about eighty head of cattle being stampeded that you received on the west side of the river?—A. I know from report. Quartermaster Goodloe sent up to Major Randall that he had about eighty head of his cattle down in his quartermaster's herd. Major Randall did not send for them for several days, and when he did send the report was that they had stampeded again, or something to that effect, so that he did not get them all.

Q. Do you know that Major Randall complained that cattle had been received at an average of twelve hundred pounds a head when the actual weight was nine hundred and thirty-four pounds gross?—A. I do.

By Mr. BECK:

Q. At what date did you receive these cattle from Bosler?—A. The receipt on file here states the date—July 29.

Q. How many did you receive?—A. I am not quite sure; I think four hundred and fifty head.

Q. And you averaged them at twelve hundred pounds gross, or six hundred pounds net?—A. Yes, sir.

Q. How far from the agency did you receive them?—A. It was at the Little Bend, on the opposite side of the river, probably from five to seven miles.

Q. And you kept them there in the valley where there was good grass?—A. That was one object in keeping them there; another was to prevent them from being ravaged by the Indians.

Q. From the time you received them until the middle of July or August should they have fallen off or improved?—A. Under ordinary circumstances they should have improved; but the valley was swept over by a big fire, the season was very dry, and I think they would have fallen off some.

Q. Who guarded your cattle?—A. They were agency men in charge.

Q. You were in the habit of killing them just as you wanted them?—A. Yes; we killed, every Saturday, as many as we wanted.

Q. What stampeded these cattle?—A. We had one severe wind; but cattle will stampede if they are not carefully watched.

Q. Were these all Texas cattle?—A. I do not know. The quartermaster at Fort Sully told me that he had received at that post what they said were American cattle; and after looking at these cattle he said they were a better lot than his; and Captain Irvine, who is a good Christian man, told me that these cattle taken from Bosler were a better lot than the ones I have referred to; he said some of them were not Texas cattle, and that as a lot they were very fine cattle indeed.

WASHINGTON, D. C., *January* 27, 1871.

THOMAS T. BUCKLEY sworn and examined.

To Mr. CHIPMAN:

Answer. I reside in Brooklyn, New York; I am engaged in the dry-goods jobbing business, at 382 Broadway, New York; the style of the firm is Buckley, Welling & Co.

Q. Did you sell a bill of goods to be sent to the Osage Indians, about the 23d August, 1870, to Commissioner Parker?—A. We sold a bill of goods that were shipped to the Indians; I should think about that date.

A copy of a bill of goods sold by Buckley, Welling & Co., to the Commissioner of Indian Affairs on the 23d August, 1870, was put in evidence, as follows:

NEW YORK, *August* 23, 1870.

United States bought of Buckley, Welling & Co., Nos. 380 *and* 382 *Broadway, corner White street.—For Osages.*

2 cases gray list cloth:	
No. 5309, 469 yards, No. 5310, 467¾—936¾ yards at $1 80	$1,686 15
Straps	75
2 cases scarlet S. L. cloth:	
No 5235, 499¾ yards, No. 5282, 497¼ yards—997 yards at $1 70	1,694 90
Straps	75
2 bales Mexican blankets:	
No. 3917, 100, No. 3970, 100—200 blankets at $6 50	1,300 00
2 pair wrappers, at $3	6 00
4 bales 3-point scarlet blankets:	
No. 324, 50 pair, No. 329, 50 pair, No. 297, 50 pair, No. 386, 50 pair—200 blankets at $8	1,600 00
4 pair wrappers, at $3	12 00
Case 113:	
50 dozen butcher knives, at $4	200 00
2 pieces S. L. scarlet cloth, 65½ yards, at $1 70	111 35
Case and strap	1 75
9 barrels sugar, 2,175 pounds at 12½ cents	271 88
6 bags coffee, 962 pounds at 22 cents	211 64
5 boxes tobacco, 548 pounds at 70 cents	383 60
6 sacks, at 30 cents	1 80
Cartage	2 25
	7,484 82

The above bill is correct.

E. S. PARKER, *Commissioner.*

Q. Look over that bill of goods and see if you can recollect from the items enough to speak with any certainty as to that being the bill or a copy of it.—A. There are two items here which I can recollect; two bales of Mexican blankets, and four bales of three-point scarlet blankets. My attention was called to them by Mr. Dodge.

Q. Were those the only items about which you were spoken to?—A. Yes.

Q. They are the only items about which any question has arisen?—A. So far as my knowledge goes.

Q. Explain the quality of the four bales of scarlet blankets, and where you purchased them.—A. The four bales of scarlet blankets were purchased by sample from Amidon, Lane & Co., manufacturers and merchants of New York.

Q. What is the price of those blankets, as stated in that bill?—A. Eight dollars per pair.

Q. State whether that was the ruling price at that time.—A. Eight dollars per pair is lower than we sold the blankets for as a general thing. We sold those blankets to the Indian Commissioner for $8 a pair. The cost is $8, less 5 per cent. and 5 per cent.

Q. Is that equivalent to 10 per cent. discount?—A. It is a little less than 10 per cent. It is 5 per cent. off first, and then 5 per cent. off the balance. That was as cheap as we could buy them in the market.

Q. Explain what you had to do with Mr. Dodge?—A. Mr. White, the inspector who inspected the goods which were sold to the Government by contract, called at the store and stated that Mr. Dodge wanted to see me, and they had a sample of blankets sent back to them from the lot which we had furnished to the Osage Indians. He stated that this was a sample from one of the bales, and I understood, from the letter he had at that time, that the other three bales were satisfactory. After receiving this message I called on Mr. Amidon and asked him to go down with me and see Mr. Dodge, and see what was the matter with the blankets. I said that we had bought them from him by sample, and had sold them to General Parker by sample; that we had marked them and shipped them in that condition, and presumed that they were equal to the sample. Mr. Colyer's letter, which Mr. White had, complained of that particular pair and particular bale as not being equal to the sample.

Q. Did anything else transpire at the interview?—A. I introduced Mr. Amidon to Mr. Dodge, and Mr. Amidon explained fully about the blankets. It was a very good blanket, but the color was dark. He said that he was surprised at the color, and that it must have been a mistake in shipping the bale. That was about all in regard to the scarlet blankets.

Q. Were they inferior only in regard to the color making them of less value, or were they in fact inferior for the purposes of use?—A. The wool was good, hard twisted, and the blanket was not as nappy as usual. It was a serviceable, strong, heavy blanket, that is, the sample I saw there. I never had seen the blankets before. I did not see

them when we shipped them. We bought them, as I said, by sample, and presumed that Amidon, Lane & Co. had given us the blankets according to the samples.

Q. Explain as to the other blanket.—A. The Mexican was complained of as being a loose and slimsy blanket. They were the same blankets that we sold for some little while. They are manufactured by Mr. Dobson, of Philadelphia. They are a blanket that we never had complained of, and in fact we were not able to procure as many bales of them as we had orders for from other parties. We sold them at less than the usual rates. We sold them at $6 50. We paid Mr. Dobson for them $6 25, less, I think, 5 per cent. and 5 per cent. I am not certain in regard to the discount, but I think there were 5 per cent. trade discount and 5 per cent. for cash.

Q. They are all, I understand, embraced in this one bill of goods sent to the Osage Indians.—A. Yes, sir.

Q. Do you remember to whom they were consigned ?—A. I do not.

By Mr. SARGENT:

Q. Were you one of the sureties of Amidon, Lane & Co. in their bid ?—A. Yes.

Q. Henry J. Marshall is the other ?—A. Yes.

Q. Do you not know that the kind of blanket which you first described was offered by Amidon, Lane & Co. to the Commissioner for $6 80 ?—A. Yes, sir, they were offered at that price, but that was for a very large lot of blankets, and this bill was only two or three bales. The price we paid for them was $8, which was the lowest price they could be bought for in the market.

By Mr. LAWRENCE:

Q. Where were they manufactured ?—A. In Philadelphia.

Q. Both they and the Mexican blankets were manufactured in Philadelphia ?—A. Yes, but the Mexican blankets were manufactured by Mr. Dobson, who also manufactures scarlet blankets; but we could not buy them from Mr. Dobson, owing to his having taken the contract to furnish the Government, and not having them to deliver to buyers.

Q. Does the Government generally buy of wholesale dealers or of manufacturers ?—A. They buy where they can buy the cheapest, I presume.

Q. Did the Commissioner know where these blankets were manufactured ?—A. Yes, sir; he saw the blankets.

Q. They could be bought, of course, cheaper from the manufacturer than from the dealers ?—A. We buy them from the manufacturer. The manufacturer, of course, if he can get an order to make a large amount of blankets, can make them and sell them on that order much cheaper than he can if he has to make them for a market, because the interest, storage, insurance, and all these things add very much to the cost. Eight dollars was the cheapest price the blankets could be bought for in the market, and Amidon, Lane & Co. were the only ones who had the blankets. When General Parker came into the store to buy these blankets, he had a telegram from Mr. Colyer, I believe, urging the shipment of those goods immediately. He remarked that Mr. Colyer was very urgent for them, and that he could not get them from Mr. Dobson, as I understood, and he wanted to know if we could give him these two bales of blankets. We got the samples, and showed them to him, and he considered them good blankets. The samples which we showed General Parker were certainly as good as those of Mr. Dobson.

By Mr. SARGENT:

Q. Are you large dealers in blankets ?—A. We sell a good many blankets.

Q. Do you deal largely with Amidon, Lane & Co. ?—A. Yes; and with Dobson & Co.

Q. Do you sell largely of these $8 blankets ?—A. Yes, sir; a good many of them.

Q. What did you pay Amidon, Lane & Co. for them ?—A. Eight dollars, less 5 per cent. and 5 per cent.

Q. If you, buying largely from Amidon, Lane & Co., paid $8 for them, how could the Indian Commissioner get them at $6 80 ?—A. Because they offered to furnish a number of thousand pairs of blankets.

Q. You are aware that they offered them at $6 80 ?—A. Yes, sir.

Q. Are you aware that the Commissioner obtained at that price a far superior article of blanket to that which you sold for $8 ?—A. No, sir; I am not. We consider those blankets as good as Mr. Dobson's, and they are so considered by the traders.

Q. Are not these blankets smaller in size, and meaner in quality than Mr. Dobson's ?—A. No, sir; they ought to be the same size and of as good quality. They are made of good wool, but they are twisted a little tighter, and are not so flossy as Mr. Dobson's blankets.

Q. Can you give the size of those blankets ?—A. I cannot give the inches, I can give it by pound weight. They should be eight pounds per pair.

By Mr. CHIPMAN:

Q. Is there not some rivalry between those two establishments ?—A. Yes; there has always been a contention between them.

Q. The Philadelphia people contend that their blankets are the best?—A. Yes; and Mr. Amidon thinks that his are the best.

Q. You spoke of having supplied the trade outside.—A. Yes.

Q. And from what the traders expressed to you, you state that the one blanket is as good as the other?—A. Mr. Baker, of Fort Dodge, to whom we sell these blankets, prefers the Amidon blankets because there is more wear in them. Other traders prefer Mr. Dobson's blankets, as being a flossy, showy blanket. We sold a great many blankets to traders at Leavenworth, and they have, for the last year, bought Amidon, Lane & Co.'s blankets of us.

By Mr. SARGENT:

Q. How many years have you sold Indian goods to the Department?—A. We have sold at different times. I think we have had three or four, or perhaps five contracts at different times. We have sold Indian goods for quite a number of years.

Q. To the Department?—A. No, not to the Department, but to the traders in Indian goods.

Q. Who are your partners?—A. Mr. Woolley, Mr. Wheeler, Mr. Frost, and my son.

Q. Who is Mr. Wheeler?—A. Mr. DeWitt Clinton Wheeler.

R. Did Mr. John J. White inspect these Osage goods?—A. No, sir; I have said that these goods were bought by Mr. Parker by sample, delivered to us, and shipped without being examined.

Q. Have you any knowledge of an item of $1,000 for 10,000 pounds of flour sold by your firm?—A. I have no knowledge of it; I do not recollect any such transaction.

By Mr. LAWRENCE:

Q. Do you deal in flour?—A. No, sir; we do not.

By Mr. WELSH:

Q. Can you say whether yourself or any member of your firm was interested, directly or indirectly, in any other goods than dry goods; were you interested in provisions, flour, tobacco, freight, or any other transaction of the Indian Department during the last year?—A. I have no knowledge of anything of the kind, except a little purchase that we made of 9 barrels of sugar, 6 bags of coffee, 5 boxes of tobacco, and 50 dozen of butcher knives, which we were required to get and forward with those Osage goods.

Q. Was your firm interested in the purchase of Green & Wattles?—A. No, sir.

By Mr. SARGENT:

Q. Did the board of Indian commissioners inspect any of the goods purchased from your firm by Commissioner Parker?—A. Yes, sir. The great bulk of them was inspected by the inspector.

Q. Did they inspect any of the goods sent to the Osage Indians?—A. No, sir; I think they were not inspected.

By Mr. WELSH:

Q. Were any of the goods examined, except those that were advertised for regularly?—A. The goods that were furnished to Red Cloud and his band were on an order for presents for them. They came to the store with their agent, or the officer in charge of them, and they selected the goods themselves, such as they wanted, and put them in trunks, and took them away with them.

Q. Do you know whether any goods bought by Mr. Parker himself were examined by Mr. White, or only those that were bought in conjunction with the commission?—A. I think not. I think that Mr. Parker examined them, and certified to them himself.

By Mr. CHIPMAN:

Q. State whether the articles embraced in this bill were purchased at the lowest market rates at that time, and were sold to General Parker at the ruling rates at that time?—A. They were.

By Mr. SARGENT:

Q. Is Mr. White a member of the Indian commission?—A. Not to my knowledge. I understood that he was an inspector appointed by the commissioners.

WASHINGTON, D. C., *January* 27, 1871.

EDWARD H. AMIDON sworn and examined.

By Mr. CHIPMAN:

I reside in New York. I am of the firm of Amidon, Lane & Co., dry goods merchants and manufacturers.

Question. Did you supply to Messrs Buckley, Welling & Co., in August last, any blankets that were to be sent to the Osage Indians?—Answer. I believe we did. I had

no special knowledge of it at the time, but I think I am justified in saying, from what I learned afterward, that we did supply some blankets for the Osage Indians.

Q. How many?—A. I think, 200 pairs, that would be 400 blankets.

Q. What color were they?—A. Scarlet.

Q. Did your firm make a bid for a certain quantity of blankets at a certain rate; if so, what was that bid?—A. In the spring of 1870 we made a bid for the whole amount of blankets wanted by the Indian Department, I think, about 14,000 pairs.

Q. Was that about the time that the board of commissioners were in New York?—A. I believe it was; I do not recollect the date, but it was at the time the blankets were wanted, and they were to be delivered very soon after we made the bid.

Q. What was your bid?—A. That I cannot tell now.

Q. I find here, in a bill of goods furnished to the Indian Bureau by Buckley, Welling & Co., on August 23, 1870, four bales of scarlet blankets, 200 pairs, at $8 per pair, to be sent to the Osage Indians; are those the blankets that you furnished to that house?—A. I presume they are, from what I have since heard, but I cannot swear that they are. Buckley, Welling & Co. bought four bales of blankets from me; I did not know then to whom they were to be sent. They bought them as low as they could buy them at that time from me, and I got as much price out of them as I could get at that time. Some time after that, Mr. Buckley called upon me and said he had received information that there was some complaint in regard to these blankets which I sold to him, and that they had gone to the Osage Indians. From that circumstance I infer that those are the four bales of blankets to which you refer.

Q. Tell what you know about the transaction.—A. Mr. Wheeler, of Buckley, Welling & Co., called on me to know if I had scarlet blankets for sale; I told him I had; he wanted to see the blankets, and I showed them to him; he wanted to know the price, and I told him a dollar a pound—that that was the lowest price; he finally made a proposition to buy them, with an extra 5 per cent. discount, and I sold them at that price; I gave the memorandum to my invoice clerk, and told him to deliver four bales of those blankets to Buckley, Welling & Co.; that was the last I heard of the transaction until the complaint occurred; I was called on by Mr. Buckley, who wanted me to call and see Mr. Dodge; I did so, and Mr. Dodge exhibited samples of the blankets, which he stated had been received by the Osage Indians, asking Mr. Buckley if that was one of the blankets he had sent out; Mr. Buckley asked me if that was one of my blankets, and I told him I thought it was; Mr. Dodge asked me if I thought that that was the proper sort of blanket to send to the Osage Indians; I told him that the blanket was as good a blanket as the Indians had ever had, except in color; he seemed to be under the impression that there was some shoddy in it, and untwisting the yarn out of which the blanket was made, it appeared that some of the inside fiber of wool had not been thoroughly dyed, which gave him the impression that the blanket was not good; I explained to him that the reason why the blanket had these defects was, in the first place, that it was a very well-made blanket; that the yarn had been spun so tight that it did not take the dye properly, and that it would probably outwear any blanket which could be produced, but that it had been spoiled in the dyeing; that the dyer had probably left it in the dye too long, and that it had taken too deep and dark a color; it was as good a blanket for wearing purposes as I ever saw, as strong and well made; it was probably the strongest kind of that sort of blanket that I ever saw, but it was a bad-looking blanket; on my return to the store I looked into the matter, and found on the invoice book against the number one, of those four bales, were written the words, "bad for color," and on referring to the invoice book of the factory it appeared that it was entered in that book in the same way. Of course, making so many blankets as we do, two blankets a minute, we spoil some; those spoiled blankets are always laid aside and shipped by themselves, and against them, on the invoice book, is indicated the defect; it appears that the shipping clerk to whom I gave the orders to deliver those blankets to Buckley, Welling & Co., gave them that bale of blankets, among the others, without observing it; I never heard of it until it was opened where it was delivered, to be used; I saw the letter which Mr. Gibson, the agent there, wrote to Mr. Dodge, in which he stated that one bale of that lot of four was very bad in some respects, and that the others were much better; the explanation which I gave you shows how it occurred; I explained all of that to Mr. Dodge, and also exhibited samples of the same material precisely, but dyed properly; I think I fully satisfied him that the blanket was a good blanket, with the exception of the defect in dyeing, and I offered to send for that bale, at our own expense, and deliver another bale, at our own expense, or to do anything that he cared to have done about it; that was the way in which the matter was left.

Q. Were the blankets, with the exception of color, as good for all purposes as the others sent at the same time?—A. Yes, undoubtedly.

Q. This mere defect in color would not deteriorate the value of the blanket for its use?—A. Not in my opinion. These blankets were very much more serviceable than such blankets ordinarily are.

Q. Would there be a difference in the price you will take between supplying four

bales of blankets and supplying 14,000 pairs?—A. There would be a difference. As a manufacturer, I can afford to take a contract for a large quantity at a definite price, for goods to be delivered as soon as manufactured, at a lower price than I can afford to sell goods which I make for the market, and have all the expense and risk of keeping for the market. In the first case I lose no interest, no expense of stock, and run no risk; I get my money as fast as the goods are made. In my opinion there is ten per cent. difference between the price I would be willing to contract for in large quantities and the price I would be willing to make the same goods for for open market.

Q. Examine the item of four bales of scarlet blankets charged in this bill, and state whether the amount charged for them there is the proper price.—A. I see they are charged here at $8 a pair.

Q. State what relation that bears to the ruling rates in the market at that time.—A. Scarlet blankets then and now were worth a dollar a pound. I am selling them now at a dollar a pound. I sold those blankets to Buckley, Welling & Co. at a dollar a pound, with an extra discount. I am in the habit of selling them goods, as they are large purchasers, at less than I sell to anybody else.

By Mr. SARGENT:

Q. How large purchasers are Buckley, Welling & Co. of you?--A. I am the only manufacturer of this class of goods besides John Dobson, and they probably buy from me to the amount of from $10,000 to $20,000 a year. The amount varies very much. Some years they sell very few blankets, and again they sell a great many. They buy from me in large quantities.

Q. Do you manufacture for them to order, or do you sell from your stock?—A. I never have manufactured for them to order.

Q. If your bid had been accepted by the Indian commission, would you have taken those blankets from the stock on hand?—A. I had but 5,000 pairs on hand at the time, and this bid was for 14,000 pairs.

Q. Then you would have furnished what you had on hand, and filled up the order by running your manufactory at the rate of 2 blankets per minute, as you say?—A. Yes.

Q. If Buckley, Welling & Co. buy as large quantities as you say, why did you make such a difference against them as that between $6 80 to the Commissioner and $8 to them?—A. I think I can make that very clear to you. The bid to the Commissioner was for 14,000 pairs of blankets, I think, and in that 14,000 but a small proportion was to be scarlet blankets. The price I bid on the scarlet blankets would not leave me a cent of profit; but the price I bid on some other colors would bring me some profit. On the whole, however, I made a very low bid for that contract. As I never had had an Indian contract and was desirous of introducing myself to the Department and making those goods for the Government, I thought it my interest to make an effort to get this contract, and I therefore made a very low bid; and you will find that the goods were actually taken by the Government at a higher price than my bid.

Q. From whom?—A. From John Dobson.

Q. Do you say that the blankets bought from John Dobson at $8 a pair were not superior to the blankets you have described?—A. I think the scarlet blankets were bought from John Dobson at $7 a pair. I bid at $6 80.

Q. You say that their blankets at $7 were not superior to yours at $6 80?—A. Yes, I say so; they were not as good.

Q. Do you charge as much for the blankets that are defective in color or in any other respects as you do for the perfect article?—A. No, sir; we make a heavy discount.

Q. If those goods had been properly inspected by Mr. Parker before they were shipped, would not this defect have been discovered?—A. I think so.

Q. And the Government would have saved at least the difference between the price of the defective article and the price of the perfect article?—A. I would have substituted the perfect article for the other.

Q. Or, if the Government had taken the other article with its defects, it would have got it at a discount? Yes.

Q. Who were your sureties on your bid?—A. Mr. Buckley and Mr. Marshall, I think.

By Mr. CHIPMAN:

Q. I understood that in your bid for the 14,000 blankets, there were comparatively few scarlet blankets?—A. I think 2,700 scarlet blankets.

Q. Would you have bid for 14,000 scarlet blankets at $6 80?—A. No, sir; I meant to convey that impression to you that I would not have bid for scarlet blankets so low.

Q. Were you furnishing any scarlet blankets to the trade at that time, August 23?—A. Yes, to the merchants who deal in that article.

Q. What were the rates then?—A. $8 for that quality of blanket.

Q. And the Government paid no more than other persons paid at that time?—A. No, sir; no more than I was getting for them from everybody at that time.

Q. What would you have furnished 14,000 pairs of scarlet blankets to the Government for at the time you made this bid?—A. Of course I cannot judge exactly now

what I might have done; but I should think I would have furnished them at 92½ or 95 cents a pound, which is $7 40 to $7 60 a pair.

WASHINGTON, *January* 27, 1871.

Major B. DUBARRY sworn and examined.

To Mr. WELSH:

I am a commissary of subsistence of the United States Army; I am on duty in the office of the Commissary General of Subsistence, as one of the assistants to the Commissary General of Subsistence.

Question. State the price and number of cattle contracted for, to be delivered on the Missouri River, in the contract made June 18, 1869, which was to terminate on June 18, 1870.—Answer. I have here a copy of the contract made on the 18th of June, 1869. It was made with Edward Fenlon, at the rate of $4 44¾ per hundred pounds, dry weight.

Q. Were the cattle to be kept at the contractor's risk and expense until needed, or were they to be delivered in bulk?—A. Their delivery was to commence on the 31st of July, 1869, and to continue until the number provided for by the contract was delivered, at specified rates per month, the rate being different for the different points at which they were to be delivered. The contract runs that the "beef cattle provided for at the respective places named are required to be held by the contractor sufficiently near thereto, that he may with certainty, and at the rate and under the conditions above specified, deliver them weekly, semi-monthly, or monthly, as the officer or agent of subsistence of the Department may require." The whole number comprised in this contract of the 18th of June was 9,075.

Q. After the completion of that contract, was any other contract made?—A. On the 6th of July, 1869, a supplementary contract was made with Edward Fenlon. The supplementary contract was for the same rate as the other and for the same number of cattle; it only made a change in the points of delivery from the first contract.

Q. Then it is only a repetition of the first contract, changing the place of delivery?—A. Not exactly a repetition, because it does not repeat all that is in the first contract, but it refers to the first contract. Subsequently, a proposition was made by the contractor, Edward Fenlon, to furnish any additional number of cattle that might be required at the five points named in the supplementary contract, (three points only being named in the original one,) at $4 20 per hundred pounds, gross weight, during the continuance of said contract—that is, up to June 30, 1870. That proposition was accepted by General Clark. The date of it was 21st of September, 1869. That was to extend up to 30th June, 1870, and was to embrace all the cattle delivered over and above the total of 9,075, provided for by the first contract.

Q. Is there any limit as to the amount of cattle you could call for under the proposition of 21st of September, 1869?—A. I find no limit assigned in it. The contractor agrees to furnish all the cattle required, at $4 20 per hundred pounds.

(The papers referred to by the witness are annexed to the testimony.)

Q. If the Commissioner of Indian Affairs had called on you for cattle before the 30th of June, 1870, could you have furnished him with cattle under that contract?—A. Yes, at those points. All what the contractor furnished in excess of 9,075 was to be furnished at $4 20 per hundred pounds gross.

Q. Did the Commissioner of Indian Affairs send to your office to ascertain what supplies would remain over on the 30th of June, 1870, or what supplies it would be possible for you to give him?—A. I do not recollect of it.

Q. Have you charge of the office here?—A. I have not charge of the office, but, as assistant to the Commissary General, I see pretty much everything that comes in. My province at that time was to see everything that came into the office. The papers pass through my hands, and I open and hand them to the chief, or distribute them, according to their nature.

By Mr. CHIPMAN:

Q. I understand that this contract provides for supplying cattle up to June 30, 1870?—A. Yes, sir.

Q. Does it make provision for supplies beyond that time?—A. Not beyond that time.

Q. Are you aware that a correspondence took place between the Interior Department and the War Department, relative to supplies beyond that period?—A. There was some correspondence.

Q. Do you recollect the purport of it? Do you recollect generally whether the office said it could furnish the Indian Bureau beyond June 30, 1870, or that it could not do so?—A. I do not know that the office said so, but my recollection is that we had no authority from the Secretary of War to furnish cattle beyond the 30th of June; that is, beyond the period covered by the $2,000,000 appropriation.

Q. The period covered by this contract ended June 30, 1870?—A. Yes.

WASHINGTON, D. C., *January* 27, 1871.

GEORGE A. MERCER examined.

By Mr. SARGENT:

Answer. I am a clerk in the Treasurer's Office of the United States.

Question. Have you a list of Treasury drafts drawn in favor of C. D. Woolworth, secretary of the Northwest Transportation Company?—A. I have, and here deliver it.

List of Treasury drafts drawn in favor of C. D. Woolworth, secretary Northwestern Transportation Company, indorsed by him to J. W. Bosler, and by him indorsed.

Number of draft.	Number of Interior warrant.	Date of draft.	When paid.	Amount.
1212	1233	October 28, 1870	October 29, 1870	$67,913 32
1213	1234	October 28, 1870	October 29, 1870	32,221 97
1269	1397	November 9, 1870	November 10, 1870	50,773 46
1363	1398	November 30, 1870	December 1, 1870	4,480 50
1364	1397	November 30, 1870	December 1, 1870	16,425 30
1382	1429	December 10, 1870	December 22, 1870	3,961 75
1423	1470	December 19, 1870	December 22, 1870	3,471 25
				179,247 55

Q. Do you know to whom these drafts were indorsed, if to any one?—A. They are all indorsed to J. W. Bosler, and by him indorsed to Jay Cooke & Co., New York.

(Witness produced the original drafts, which were all so indorsed.)

WASHINGTON, D. C., *January* 27, 1871.

General M. C. MEIGS sworn and examined.

To Mr. WELSH:

I am Quartermaster General of the United States Army. I have here a copy of the advertisement for proposals for the transportation of goods for my Department from March 20, 1870, to October 31, 1870.

Question. From and to what points?—A. From St. Louis to Sioux City, from Wyandott to Sioux City, and from Fort Leavenworth to Sioux City.

Q. Does it include from Sioux City up the river?—A. Yes, from Sioux City to Yankton agency, Fort Sully, &c. That is the Missouri River contract, as we call it.

The advertisement was put in evidence, as follows:

"*Proposals for transportation.*

"Sealed proposals will be received at the office of the Chief Quartermaster, Military Division of the Missouri, Chicago, Illinois, until 12 m., on Tuesday, February 1, 1870, for the transportation of Government troops, military, Government, and Indian supplies between the following points, as indicated during the time from March 20, 1870, to October 31, 1870, viz:

"From St. Louis, Missouri, to Sioux City, Yankton agency; Fort Randall, Whetstone Creek, Lower Brules and Crow Creek agencies; Fort Sully, Big Cheyenne, and Grand River agencies; Forts Rice, Stevenson, Buford, Camp Cooke, or any post that may be established at the mouth of the Muscleshell River and Fort Benton.

"From Wyandott, Kansas, to Sioux City, Yankton agency; Fort Randall, Whetstone Creek, Lower Brules and Crow Creek agencies; Fort Sully, Big Cheyenne, and Grand River agencies; Forts Rice, Stevenson, Buford, Camp Cooke, or any post that may be established at the mouth of the Muscleshell River and Fort Benton.

"From Fort Leavenworth, Kansas, to Sioux City, Yankton agency; Fort Randall, Whetstone Creek, Lower Brules, and Crow Creek agencies; Fort Sully, Big Cheyenne, and Grand River agencies; Forts Rice, Stevenson, Buford, Camp Cook, or any post that may be established at the mouth of the Muscleshell River and Fort Benton.

"From Omaha, Nebraska, to Sioux City, Yankton agency; Fort Randall, Whetstone Creek, Lower Brules, and Crow Creek agencies; Fort Sully, Big Cheyenne, and Grand River agencies; Forts Rice, Stevenson, Buford, Camp Cooke, or any post that may be established at the mouth of the Muscleshell River and Fort Benton.

"From Sioux City, Iowa, to Yankton agency; Fort Randall, Whetstone Creek, Lower

Brules, and Crow Creek agencies; Fort Sully, Big Cheyenne, and Grand River agencies; Forts Rice, Stevenson, Buford, Camp Cooke, or any post that may be established at the mouth of the Muscleshell River and Fort Benton.

"From Yankton agency to Fort Randall, Whetstone Creek, Lower Brules, and Crow Creek agencies; Fort Sully, Big Cheyenne, and Grand River agencies; Forts Rice, Stevenson, Buford, Camp Cooke, or any post that may be established at the mouth of the Muscleshell River and Fort Benton.

"From Fort Randall to Whetstone Creek, Lower Brules and Crow Creek agencies; Fort Sully, Big Cheyenne, and Grand River agencies; Forts Rice, Stevenson, Buford, Camp Cooke, or any post that may be established at the mouth of the Muscleshell River and Fort Benton.

"From Whetstone Creek agency to Lower Brules and Crow Creek agencies; Fort Sully, Big Cheyenne, and Grand River agencies; Forts Rice, Stevenson, Buford, Camp Cooke, or any post that may be established at the mouth of the Muscleshell River, and Fort Benton.

"From Lower Brules agency to Crow Creek agency; Fort Sully, Big Cheyenne, and Grand River agencies; Forts Rice, Stevenson, Buford, Camp Cooke, or any other post that may be established at the mouth of the Muscleshell River and Fort Benton.

"From Crow Creek agency to Fort Sully, Big Cheyenne, and Grand River agencies; Forts Rice, Stevenson, Buford, Camp Cooke, or any other post that may be established at the mouth of the Muscleshell River and Fort Benton.

"From Fort Sully to Big Cheyenne and Grand River agencies; Forts Rice, Stevenson, Buford, Camp Cooke, or any other post that may be established at the mouth of the Muscleshell River and Fort Benton.

"From Big Cheyenne agency to Grand River agency; Forts Rice, Stevenson, Buford, Camp Cooke, or any post that may be established at the mouth of the Muscleshell River and Fort Benton.

"From Grand River agency to Forts Rice, Stevenson, Buford, Camp Cooke, or any post that may be established at the mouth of the Muscleshell River and Fort Benton.

"From Fort Rice to Forts Stevenson, Buford, Camp Cooke, or any post that may be established at the mouth of the Muscleshell River and Fort Benton.

"From Fort Stevenson to Fort Buford, Camp Cooke, or any post that may be established at the mouth of the Muscleshell River and Fort Benton.

"From Fort Buford to Camp Cooke, or any post that may be established at the mouth of the Muscleshell River and Fort Benton.

"From Camp Cooke, or any post that may be established at the mouth of the Muscleshell River and Fort Benton.

"Proposals are also invited for the transportation of troops and supplies, during the season, from March 20, 1870, to October 31, 1870, from Chicago, Illinois, via Sioux City, Iowa, on through bills of lading, to all the points above Sioux City, that are above specified.

"Bidders will state the rate, separately for each month, from March 20 to October 31, 1870, inclusive, the date of starting, to determine the rate to be paid, at which they will perform the service from each of the starting points to the several points of destination above named, as follows:

"1st. The rate at which they will transport each officer and soldier (cabin passage to be provided for officers, and for soldiers necessary facilities for cooking their rations, which will be supplied by the Government.)

"2d. The rate per 100 pounds at which they will transport supplies.

"3d. The rate at which they will transport horses, mules, cattle, ambulances, carts, wagons, &c., (troughs for feeding the animals to be provided by steamboat.)

"A just preference will be given to parties who own and control boats. Boats will be expected to always give the Government freight the preference, and in no case will be allowed to carry private to the exclusion of Government freight.

"The contractor will be required to transport stores by land in the event of failure by water; and all stores received by the contractor for transportation must be delivered at their destination within the year 1870.

"Bidders will please give the rate at which they will furnish transportation down stream—though for that exclusive purpose no boat will be required to go up stream unless to bring down at least 160 tons of Government freight. The contractor for transportation from Chicago will not be required to furnish any down-stream transportation.

"In case the contracting party fails to carry freight as required, the Government reserves the right to furnish transportation at the expense of the contractor; and nothing herein contained shall be so construed as to prevent the Government from transporting its supplies on any of its own boats.

"Bidders are informed that no boat loaded with Government stores will be allowed to go above Sioux City, Iowa, drawing over three and one-half feet of water. As no boats will be required to go to points above Sioux City with less than one hundred tons,

bidders will state the rate at which they will transport detachments of troops of 100 or more, without freight.

"Bidders should give their names in full, as well as their places of residence, and each proposal must be accompanied with a bond in the sum of $10,000, signed by two or more responsible persons, guaranteeing that, in case the contract is awarded to the person proposing, it will be accepted and entered into, and good and sufficient security furnished by said party, in accordance with the terms of this advertisement.

"The contractor will be required to give bonds in the sum of ($100,000) one hundred thousand dollars.

"The party to whom the award is made must be prepared to execute the contract at once, and to give the required bond for its faithful performance.

"The Government reserves the right to reject any or all bids that may be offered.

"Copy of blank form of contract both for transportation from St. Louis, Mo., and Chicago, Ill., to be entered into in the event of award, and blank forms of proposals can be had by application to this office, to the office of the chief quartermaster Department of the Missouri, St. Louis, Mo.; chief quartermaster Department of the Platte, Omaha, Neb.; to Brevet Lieutenant Colonel James M. Moore, quartermaster Fort Leavenworth, Kan.; and to Captain James Gilliss, assistant quartermaster, Sioux City, Iowa.

"Proposals for transportation from St. Louis, &c., should be indorsed 'Proposals for Army transportation on the Missouri River, from St. Louis, Mo., &c.,' and those for transportation from Chicago, 'Proposals for Army transportation from Chicago, Ill., to points on the Missouri River,' and addressed to the undersigned.

"By order of the Quartermaster General.

"D. H. RUCKER,

"*Asst. Q. M. Gen'l U. S. Army, and Chief Q. M. Military Division of the Missouri.*

"ja.5;d&std."

Q. Did that include the transportation of Indian goods?—A. I understand that it did. It states that it is for the "transportation of Government troops, military, Government, and Indian supplies, between the following points."

Q. Have you an estimate of the amount of goods shipped by your Department under that contract?—A. I have a statement made from the monthly reports of freight transported up the Missouri River, under that contract, in 1870, but it is not quite perfect, because we find that the reports of Colonel Holabird for September and October have not been received at the Department.

Q. What was the total amount of freight transported under the contract during the year 1870?—A. Nine million five hundred and thirty-six thousand four hundred and eighty-eight pounds; but there is no report for November.

Q. What was the amount that your contract allowed to be transported?—A. The contract was for 20,000,000 pounds.

Q. Then that would leave a surplus of 10,464,000 pounds, which might have been availed of by the Indian Office under that contract.—A. If the Indian Office had called upon the Quartermaster's Department to transport its goods they would have been transported.

Q. At the contract prices?—A. Yes; unless we found that we had exceeded our quantity. That is so important a question that I cannot answer positively without knowing precisely what the contractor would claim that he had transported. At the end of the month the officer sends to us a consolidated report of stores and goods transported, in which he says that he has delivered for transportation so many million pounds, and if the contractor ever raises the question that he has transported more than he agreed to do we do not depend entirely upon these reports, but we go into an examination of the matter. I find that the quantity returned for September is only 26,788 pounds, but I presume that when we get all the returns in the amount will be over 600,000 pounds. The quantity for October is 605,284 pounds.

Q. Do you think there would have been any doubt, if the Indian Office had asked transportation for 3,300,000 pounds up the Missouri River under that contract that it could have had it?—A. I think there is no doubt of it, but I cannot say positively unless I am certain of these figures. Our contract was made to cover the Indian goods, at the request of the Interior Department.

Q. How long would it take you to get your figures accurate, by telegraph or otherwise?—A. I have already telegraphed for the report of Colonel Holabird. Whenever I get it I will send it to the committee, and if I find any other correction of these figures I will send it.

By Mr. BECK:

Q. Your official reports show that you could have transported as much as 10,400,000 pounds under this contract over what you did transport?—A. I think so. If the Indian Department had called upon the Quartermaster's Department to transport its goods, it would have been done whether under this contract, or under a supplementary contract,

or by an extension of the contract. In advertising for proposals, we fix a very low figure for the lowest amount and a very high one for the highest.

By Mr. WELSH:

Q. If the Indian goods had been shipped in August or September, then your October returns would not have counted at all?—A. No, sir.

By Mr. CHIPMAN:

Q. I suppose you can state with sufficient certainty that there was a margin to cover Indian goods?—A. I judge that there was, but I will not say positively that there was without seeing the figures; but I can say positively that we would have transported Indian goods, either under this contract or under some supplementary contract.

By Mr. SARGENT:

Q. Would you have had any difficulty in getting as fair rates under a supplementary contract as under this contract?—A. I cannot say as to that. The contract is awarded always to the lowest bidder who will give satisfactory security to make it likely that he will fulfill his contract.

Q. Is that the best way to get a low contract for transportation?—A. Unquestionably it is.

Q. Is it the way always pursued by your office?—A. Yes, in all large contracts. We never pretend to make a large contract without advertising.

Q. In advertising do you find much competition in that region for contracts?—A. I have brought an abstract of the bids received under this advertisement. I find here the names of eight bidders, as follows: H. E. Cutting, Hiram K. Hazlett, W. J. Kountz, Durfey & Peck, C. M. Seaman, Joel Lawrence, Barton Able, and Durfey & Peck. The successful bidder was Hiram K. Hazlett.

Q. Do you know whether Mr. Hazlett had any connection with the Northwestern Transportation Company?—A. I do not know anything about Mr. Hazlett. We let our contract to the lowest bidder, if his security is good. We do not inquire into his general character or antecedents; we depend more upon his security than upon himself.

By Mr. CHIPMAN:

Q. You say that if you had been called upon to transport these Indian goods you would have done it, even if you had been required to supplement the contract by another ne?—A. Yes, sir.

Q. That is simply in obedience to the order of your superior, the Secretary of War?—A. Yes.

Q. You do not know whether at the time the goods were actually shipped they could have been shipped under this contract?—A. I do not know at what time the goods were shipped. I am a stranger to all this investigation.

Q. That contract expires on October 31?—A. I think so.

Q. In speaking of the contract and its interpretation you simply speak from your own opinion of what the contract embraces; you do not pretend to give a judicial construction of the contract in regard to the rights of the Department and to the rights of the contractor?—A. I give my opinion, derived from having read the contract and from some experience in the business. I should like to say that of course the Quartermaster's Department did not undertake that transaction as a voluntary business; whatever we do for the Indian Department is done by order of the Secretary of War, and, as I understand in this case, at the request of the Interior Department and of the Indian Bureau.

By Mr. WELSH:

Q. Do you know whether last year the Indian goods were not sent up the river through the Quartermaster's Department?—A. I do not know whether they were or not. I know that we provided for their transportation.

By Mr. LAWRENCE:

Q. Did the Commissioner of Indian Affairs know that he could avail himself of the benefits of your contract for carrying Indian goods?—A. The Commissioner of Indian Affairs, as I understood, wrote a letter to the Secretary of the Interior Department, which was sent to the Secretary of War, requesting us to provide transportation.

Witness presented the following statement of shipments:

Statement of shipments made on the Missouri River during the year 1870 *of pound freight.*

1870.	Pounds.
March	740,905
April	2,589,447
May	2,278,531
June	1,963,065
July	73,363

1870.	Pounds.
August	1,007,689
September	*26,788
October	605,284
December	251,416
	9,536,488

Colonel Holabird has rendered no reports of transportation for September and October, 1870.

The amount of freight to be transported is limited to twenty million pounds.

Respectfully submitted,

M. I. LUDINGTON,
Quartermaster United States Army.

QUARTERMASTER GENERAL'S OFFICE, *January* 27, 1871.

WASHINGTON, D. C., *January* 27, 1871.

JAMES A. SMITH sworn and examined.

By Mr. WELSH:

Question. Are you owner of any boats on the Missouri River?—Answer. I am part owner of one boat at present, the Miner, Captain Hawley.

Q. Do you know whether that boat carried any Government or Indian freight up the river at any time this season?—A. I understand that it did.

Q. Do you know the rates of transportation?—A. There have been various rates paid for taking it up, ranging, I think, from 50 cents up to $1 50. It was taken up from Sioux City; I cannot tell you to what points—to some of the reservations; perhaps to all of them. The boat has brought up, I believe, a number of cargoes of Indian goods.

Q. Do you know for whom she carried those goods?—A. For the Northwestern Transportation Company, I understand.

Q. Do you know whether that company's boats took the Indian freight up this season?—A. I do not know it of my own personal observation.

Q. Have you any way of ascertaining the rates of freight?—A. I have seen memoranda of the prices that have been paid: $1 50 was the highest, and, I think, 50 cents was the lowest.

WASHINGTON, D. C., *January* 31, 1871.

JAMES G. BLUNT sworn by affirmation and examined.

By Mr. BECK:

Q. State your age, residence, and occupation?—A. I am about forty-four years of age, I reside in Leavenworth, Kansas. As to my occupation, it is pretty hard to tell. I am engaged in so many things. You may put me down as a farmer perhaps with as much propriety as anything else. I am also engaged as an attorney in prosecuting claims for various parties.

Q. State as fully as you can, without being asked specific questions, all your connections with the payment made to the Quapaws at the time that Mr. Williamson acted as paymaster?—A. In the winter of 1866–'67 a delegation of these three little tribes—the Quapaws, the Senecas, and the mixed Senecas and Shawnees—came to me in Washington, and requested my services to secure an indemnity for their losses in the war, stating that they were fully authorized by a council of their people to employ an attorney and to execute a proper power of attorney, and to make such contracts as they might deem advisable in the matter. I at first declined, on the ground that I thought the prospect of securing payment was so improbable that it would not justify me in spending time and money for a contingent fee, as they proposed to give me. They offered me one-third of all that I might collect, I to take all the risk and pay all the expenses. When I declined to accept the proposition, they said that if that fee was not enough they would give me one-half. I replied to them that if I succeeded one-third would compensate me liberally, and that if I did not succeed the offer of one-third was just as good as the offer of one-half or of two-thirds. I did finally accept the proposition and with very little hopes of success, and they had very little hopes. It was when Mr. Bogy was Commissioner of Indian Affairs. I assisted him in making the treaty, and I got a provision in the treaty providing for a commission to investigate and prove up claims for those losses, and appropriating in the treaty $90,000 for the payment. If the claims proved up should amount to any thing more than that they were to be paid out of that $90,000 *pro rata*. The treaty was not ratified at that session, and I came back the next winter and was here all that

* The above are from official reports received to date. It is probable that shipments of September were in fact as great as in October, but in the absence of actual official returns no certainty is obtainable.—M. C. MEIGS, *Quartermaster General.*

winter. No action was had on the treaty until after the impeachment trial in 1868, when it was taken up, and was referred to Mr. Morrill of Maine, as a sub-committee. I consulted Mr. Morrill in regard to the matter, laid all the facts before him in regard to the manner in which those Indians had to abandon their homes, and in regard to their subsequent conduct and loyalty during the war, all of which I was familiar with because I had to take care of them, they being within my command, and a good many of their young men having enlisted in the army in regiments under my command. Mr. Morrill assured me that that provision in the treaty should be retained, and he told me that I could write to the chiefs and headmen of the tribes assuring them that the treaty would be ratified, and that that provision would be retained, and that the ratification of the treaty was only a question of time. I did so. I supposed then that I had a sure thing on saving the provision. I wrote to those parties, as suggested by Mr. Morrill, to keep them quiet, as they were continually writing to me and manifesting a gread deal of anxiety. About four days before the adjournment of Congress, I discovered, by the merest accident, that the Senate Committee on Indian Affairs had amended, the treaty of several matters, among which was to strike out this entire article providing for the settlement and payment of those Quapaw and Seneca claims. I immediately came up to the Capitol, consulted different members of the committee, got them to reconsider their action, and finally got in a provision which ultimately resulted in the payment of those claims, but which was different, however, from the original provision in the treaty, as it provided only for a commission to investigate and approve of those claims and to report to Congress, leaving the whole matter optional with Congress whether it would make provision for the payment. The claims were finally approved, and Congress made an appropriation for their payment, and they were paid by Mr. Williamson. The money was paid to the Indians. The Indians receipted for it, and paid me as they had agreed to.

Q. What was the amount of the payment?—A. The amount of the payment was $90,000.

Q. Out of which you received how much?—A. Out of which I received just one-third, $30,000.

Q. Was that payment to you made at the same time and in the same building that the payment was made to the Indians?—A. It was.

Q. Was it arranged beforehand that it should be so done?—A. No, sir.

Q, How did you come to get admission into that building to make that settlement at the same time that the paymaster was paying the Indians?—A. There was no objection made that I know of. I was in the habit of going wherever a free man has the right to go and where there is no interdiction or authority for keeping him out. It would have been the same if I had gone into the woods half a mile off. I am sure that no Indian would have brought away a dollar of his money until he had paid me what he had agreed to.

Q. Had you made an agreement with each of the Indians?—A. No, sir; the agreement was originally made with the delegation that came here for that purpose. They were fully authorized by their people to make an arrangement, and upon their return from Washington, after they had executed a power of attorney to me and the contract, they called a council together, and ratified, as I was told by the chiefs, the agreement which they had made with me about a year subsequent to that time. Each Indian executed a separate contract.

Q. Who got up those contracts for you?—A. Those contracts were got up by Mr. Snow.

Q. Who is Mr. Snow?—A. A man who had formerly been their agent. When the commission was appointed in the winter of 1868–'69, and went down there to make their investigations, the Indians expected that I would be there, as I had promised them, and as they were very anxious that I should be, to get up their case and to help them through to get their papers in shape, and to aid them in making up their claims. I had other business on hand, and was so situated that I could not go, and I employed Mr. Snow, who had at one time been their agent, and who was familiar with them and with all their circumstances, to go there in my stead, and to do what they expected myself to do. At that time I sent to him a blank form of agreement, which was in substance the same agreement as had been executed by the delegation, in order that the matter might be presented to each Indian and fully explained to him, so as to know whether there was any misunderstanding between the individual Indian claimants and the delegation in respect to the matter, to be sure that they all understood what had been done for them by the delegation, and that it should be certified by them, so that there should be no misunderstanding in the end.

Q. And those contracts were brought back to you signed by all the Indians?—A. Yes, sir; and witnessed by the interpreters.

By Mr. LAWRENCE:

Q. Did the commission go out there to investigate these claims?—A. Yes, the commission was out there some two or three months.

Q. Under the treaty?—A. Yes, under the treaty.

Q. What was the date of the treaty?—A. The treaty was ratified in 1868, just before the close of the session, after the impeachment.

Q. And this contract was made after the making of the treaty?—A. Yes, in 1869, after the making of the treaty.

Q. Then there was no act of Congress to allow the claims at that time?—A. No, sir; there was only an act appointing a commission, which commission was to report to Congress.

Q. There was no liability of Congress incurred to pay the claim; it was still an unliquidated claim?—A. The treaty only provided for an investigation.

By Mr. BECK:

Q. When did that commission report?—A. That commission made its report to the Indian Department, I think, two years ago this winter.

Q. The report of that commission was made after your contract was signed by all the Indians?—A. Yes, sir. The report was transmitted by the Secretary of the Interior to both houses of Congress without any recommendation.

Q. From whom did you get the list of names of all the Indians who signed that paper?—A. When the delegation came here in 1866-'67, they had a list of all the Indians, with a schedule of their losses, which they had got some parties down there to get up for them, and which was the basis of the treaty. It was on it that we fixed upon this $90,000 as being, as we thought, sufficient to cover the amount.

Q. When was the payment made by Mr. Williamson?—A. Last October.

Q. Where did you meet with him and the gentlemen who were with him to make the payment?—A. I joined them at Leavenworth.

Q. How far was that from the point where the payment was made?—A. About 175 miles.

Q. Did you go from Leavenworth with them?—A. Yes, sir.

Q. Did you have any interview with the Indians, or make any speech to them prior to the payment?—A. No, sir; but I made a speech to some other parties who were there in the presence of the Indians.

Q. Who were they?—A. Mr. Lang, Mr. Hoag, the southern superintendent, Dr. Nicholson, and Mr. Earl.

Q. Did Mr. Williamson make any objection to your taking part in this payment and going into the house and receiving it, at any time?—A. He objected two or three times, and was a little out of humor at the delay which occurred in their making a settlement. He said he wished that that matter could be deferred and arranged afterward.

Q. Who was the Indian agent of the Quapaws at that time?—A. A special agent of the name of George Mitchell. These Indians used to be included with the Osages.

Q. Was Mitchell the attesting witness to your contract with those individual Indians?—A. A portion of those contracts are signed by Mr. Mitchell; I do not know whether they all are or not.

Q. Was he Indian agent at that time?—A. Yes; he was sub-agent.

Q. Were you aware, at the time those contracts were made, that there was any legislation by Congress prohibiting contracts of that character being made with the Indians?—A. No, sir; I was not. On the contrary, in 1868 there was a joint resolution passed by Congress, which recognized me as the attorney of other tribes of Indians in similar claims, and ratified a contract and compromise entered into by me and the representatives of the Choctaw and Chickasaw Nations, naming me as the attorney. That was in 1868. That is the only legislation I know of on the subject.

Q. Did it name you as acting under power of attorney?—A. It named me as the attorney of the Choctaw and Chickasaw claimants, and ratified a contract made with me on authority of the nation, and directed the Secretary of the Interior to carry it out.

Q. You were not aware that there was any act of Congress prohibiting an executory contract being made with the Indians?—A. I never heard of any. I always understood that a contract made with Indians was void; that is, that it could not be enforced by law; that whatever you had done for Indians in the expenditure of money or time in prosecuting claims, you had to rely upon their honor and good faith to carry out the contract.

Q. At the time you went to collect this money, was the money put in the hands of the Indians, and then your part taken out?—A. There were other parties there who had claims on the Indians for goods furnished to them on the order of Mr. Mitchell, a thing which, I believe, is very commonly done by Indian agents, and which is usually settled at the pay table when the annuities are paid. These parties were there, and a settlement of their claims was made. Mr. Mitchell held the book with the accounts of all the Indians, and superintended the settlement. The money was handed to them first, and they receipted for it; then Mr. Mitchell superintended the settlement of the claims for which they had given orders, and the money was handed over either to Mr. Earl or to Dr. Nicholson, one of whom was present all the time, sitting by me, for them

to make the division, and I took my money in every instance of one of those two gentlemen.

Q. All the money that was claimed to be due to the trader and due to you was paid before the Indian left the house?—A. Yes, sir.

Q. In your speech to those parties that morning, will you state to the committee what you said about the amount of money which you had already paid out of that $30,000, and about the amount you still had to pay, and for what purpose?—A. Yes; I think my recollection serves me pretty well on that point, because I expected that the matter would be stirred, and I took particular pains to recollect. I was aware for a week prior to making that payment, that an effort was going to be made by certain parties to prevent the Indians carrying out their contract with me. I had been apprised of it. The Indians told me that the matter had been first agitated by a Mr. Tuttle, a Quaker, who was teaching school there among them, who had gone among them and advised them not to pay anything, and that failing to make any impression upon them, he had sent for reënforcements, and had got Mr. Hoag, Mr. Lang, and those other two gentlemen of whom I have spoken, to assist him. I was at the Quapaw agency a day before Mr. Williamson got there on his return from St. Louis with the funds, and two or three days prior to that, I had sent word to the chiefs and head-men of the tribes to have their Indians there on a certain day, that Mr. Williamson would be back and ready to pay them. Mr. Williamson failed to get back on the day fixed. Hence I went out to the agency to see them and to explain the reasons of the delay, and to keep them quiet and patient until he returned. Within a few minutes of my arrival there, almost simultaneously, came Mr. Hoag, Mr. Lang, Dr. Nicholson, and Mr. Earl. I had not at that time spoken to an Indian, although they were all around me there, and although some of them with whom I had personal acquaintance had come to shake hands with me. I had not spoken a word to them in reference to the payment. We all took dinner together at Mr. Mitchell's, and spent an hour or two in ordinary conversation. When I was about ready to go back to Seneca, to the hotel where I was stopping, about 8 miles from there, I said to those gentlemen that I was about leaving there for the time being, and that I should not return until Mr. Williamson got back from St. Louis with the funds, and that I wanted to make a little explanation to them in reference to my connection with the matter, and desired to do it in the presence of the Indians, so that if I misstated any of the facts, the Indians might correct me or know at least what I had stated. We were all of us sitting out under the shade of a big tree on the grass plat. I requested Mr. Mitchell to call the Indians inside the yard, so that they might be within hearing distance. He did so. When they were present, I, addressing myself to Mr. Hoag, Mr. Lang, and the other two gentlemen, told them that I was aware of the object with which they had come there; that I had been apprised of the fact that they were coming there to try to induce the Indians to violate the contract which they had entered into with me in regard to the payment for the services rendered in prosecuting their claims; and that, while I did not recognize their authority to interfere, or their right to interfere in what I considered a private business between me and individuals who were just as capable of transacting business as they were, yet I wanted that they should know all the facts in the case, and then they could do as they chose in the matter. I said that so far as the relations between the Indians themselves and me were concerned I had not the least apprehensions that they would affect me with the Indians. I then stated to them what I have stated here to the committee in regard to the manner in which I became identified with those claims and the prosecution of them; and I said to them, in conclusion, that I did not expect to see the Indians again until the payment commenced, that the money would be paid to them, and that it would then remain for them to pay me or not as they chose, but that I had no apprehension that they would not do what they had agreed to. I said that my dealings with the Indians heretofore assured me that those Indians would not act in bad faith; and I said furthermore, "I expect that they will remain here until payment, where you can be in communication with them all the time, and where you will have every opportunity to question them on every point that you see proper," (which I understood they did that night in council.)

Q. The point to which I directed your attention is this: how much money did you say you had paid out of the amount coming to you, and how much more did you say you had to pay?—A. There was a kind of general conversation between me and Mr. Hoag and Mr. Lang and the other gentlemen in regard to the matter, Mr. Lang and Mr. Hoag particularly claiming that it was a large fee. Well, I said, it would have been a large fee if it had been a fee guaranteed without any contingency attached to it; but it was the offer which they had voluntarily made to me, and which I had accepted; and that I had already paid out a good deal of money in expenses, and had obligated myself to other parties who had aided me and assisted me in the matter, which obligation I expected to make good. I told them that I had expended, from the time I had been to work at Washington, for the better part of three years, somewhere in the neighborhood of $5,000; that that would not more than cover the amount of

money already paid out, and that I had obligated myself to other parties, whom I had employed to assist me, to the amount of $7,500, or one-fourth of the amount which they had contracted to pay me. Mr. Lang then said to me, "Yes, I suppose that you had to pay that amount to members of Congress and Senators to help to get the claim through, as I understand that no claim or appropriation of that kind can be obtained without resorting to such practices;" and then, turning to his company, he said, "That is one of the abuses that exist in Congress, and they have to be remedied there; we cannot help that here"--speaking of the matter as taking it for granted that that was the usual custom in obtaining appropriations.

Q. On that subject what did you say?—A. I said, no; that I had made no promise to any member of Congress, or to any one in an official station; that I had paid money to defray the expenses of others and of myself, and that I had placed myself under obligations to others whom I had employed as attorneys to assist me.

Q. Did Mr. Earl take notes of what you said at that time?—A. I do not know that any one took notes. Mr. Earl was there.

Q. Did you use this language, or language substantially similar to it—that you had paid out $6,000 already, and that you had $10,000 more to pay?—A. I may have made the statement that I had paid out $6,000, and that the amount which I would have to pay out would make more than $10,000, or more than $12,000.

Q. Did you use this expression, or anything substantially like it, that you had "bought the claim and fought the claim through Congress?"—A. No, sir; I did not.

Q. Nor anything approaching to it at all?—A. I may have said that I had "fought it through," which I think I did, and I made a pretty hard fight too. I know that Mr. Lang used that language, and tried to put it into my mouth.

A. Did you pay any money, directly or indirectly, to any member of Congress, or did you make any promise, directly or indirectly, to pay any money to any member of Congress?—A. I did not.

Q. And you did not say anything to that effect that day?—A. No, sir.

Q. And if any one said so, it would not be true?—A. It would not be true. On the contrary, when I said that I had expended quite a large amount of money, and had obligated myself to pay more, Mr. Lang assumed that I had paid it to members of Congress, and said, "Yes, I suppose you paid that to members of Congress and Senators," and then, turning round to his associates, he said: "I understand that that is the way these things have to be got through."

Q. Do I understand you to say that you denied it?—A. I denied it. When he had finished his remarks, I replied to him, "No, sir; the money that I have expended has been for legitimate expenses for the last three or four years of myself and others, and what I have promised is to be paid to others, who assisted me as attorneys."

Q. Were they Government agents in any form?—A. No, sir; not at all.

Q. Neither Indian agents nor connected with the Government in any shape?—A. They were not connected with the Government at all.

Q. Are you at liberty to state who they were?—A. Yes, sir. There is but one man to whom I paid any money, except what I paid for expenses. When I found that I could not go down in the winter of 1869, when this commission went down to make out these claims, and to get up the case, as I promised the Indians I would do, I wrote to Mr. Snow, who was living near Lawrence, and employed him to go down and fill my place, and agreed to pay him one-fourth, $7,500. He was not only to do that, but he was to assist me to the end of the prosecution of the claim, and was to do whatever was to be done.

Q. Where is Mr. Snow living now?—A. At Baldwin City, Kansas, near Lawrence. Mr. Snow went there and filled my place, and since then he has done everything that he could do in prosecuting the claim to final issue.

Q. What other Indians were interested besides the Quapaws?—A. The Quapaws and the Senecas, and the mixed Senecas and Shawnees. The $90,000 were paid to them all as a confederate band.

Q. You spoke of your connection with the Choctaws and Chickasaws?—A. Yes.

Q. How much was paid you for that service?—A. The Choctaws paid me forty per cent. and the Chickasaws fifty per cent.

Q. Of what sums?—A. The Chickasaws got $150,000, and $25,000 were taken out of that, and then I got 50 per cent. of the balance. Twenty-five thousand dollars were taken out of the $109,000 for the Choctaws, and I got 40 per cent. of the balance of that.

Q. Do you know how much of the remainder was taken out by others before the Indians got their portion?—A. The money was presented to the Indians, and they settled with me in the same way that the Quapaws did; they came to me directly. I was present at the payment, and when they got their money they came and paid me.

Q. Was there not a large number of claims taken away from the Indians there also?—A. No, sir; there were no claims taken out there. There were some parties on the ground at the payment, but they were not at the pay table. I was not present when the settlement was made with them. There were some few merchants who had sold them goods on trust, and they were there to collect the money.

Q. Who was the agent at that time who made the payment?—A. He was a special agent, named S. S. Smoot.

Q. Did you go there with Mr. Smoot?—A. Yes.

Q. And the payment was conducted very much in the same way as Mr. Williamson paid the Quapaws?—A. Yes, sir. That is the payment for which Congress passed a joint resolution directing the Secretary of the Interior to pay according to the terms of the contract entered into between me and the representatives of those two nations.

Q. Was that contract laid before Congress?—A. It was.

By Mr. SARGENT:

Q. Was the amount of the compensation that you were to receive stated in the contract?—A. No, it was a mere contract between me as representing the claimants, and the delegation representing the Choctaw and Chickasaw Nations, to make a compromise with me in the settlement of this matter after the commission had been appointed to go on down to investigate these claims. Mr. Browning and Mr. Bogy both opposed it and fought it, and advised the nation to defeat it if they could, claiming that those Indians were rebels to the confederacy and should not receive any pay.

By Mr. BECK:

Q. For what other Indians have you been acting as agent?—A. I am acting now as attorney for the Eastern Cherokees.

Q. In their claim before Congress?—A. No, sir; it is a question of controversy between the Eastern Cherokees and the Western Cherokees, the Eastern Cherokees claiming that they have the right to participate in the personal property and funds arising from the sale of portions of their country, which right the Cherokee Nation denies.

Q. What other Indians do you represent?—A. I am attorney also for the Miami tribe of Indians in Kansas for the settlement of their business.

Q. Have you been agent or attorney for any other tribes who received payment from the Government for the last two or three years?—A. No, sir; these are the only two cases. The Choctaws and Chickasaws were one payment and the Quapaws another.

Q. Do you say that Congress was advised at the time it passed the joint resolution for your benefit of the amount that you were to receive?—A. I do not know that it was advised of it. I know that the matter was stated on the floor of the House and was discussed for two morning hours. The Globe will show the debate that took place on that joint resolution, and will show that it was stated on the floor of the House that I was attorney for these people and had a contract by which I was to get 40 per cent.

Q. Was that stated by your friends and by your authority?—A. No, sir; it was stated by persons who opposed the resolution.

Q. Did your friends deny it?—A. No, sir; they did not.

Q. Did Congress know the facts at the time it acted on this thing?—A. I do not know whether Congress knew them or not. It was not my business to tell them. Congress could have known it if inquiry had been made of me. I had nothing at all to keep back or to conceal.

By Mr. LAWRENCE:

Q. Do you know of any improper agency to influence the legislation of Congress on this matter at all?—A. None at all; none whatever.

Q. By the use of money or otherwise?—A. No, sir. It was a straightforward business transaction, and was prosecuted on its merits as much so as anything that I had ever anything to do with.

Q. What was the claim for?—A. In 1862, before our lines were extended beyond the Quapaw country, the rebels had come up there and occupied Southwestern Missouri and made a raid on these people and tried to force them into the confederate service. They had commenced abusing them and stealing their property, and they, for protection, got up and stampeded, abandoning their property and coming within our lines. The rebels destroyed their buildings and property. This provision to compensate them was put in as an amendment to the appropriation bill in the Senate. It came from the Committee on Indian Affairs in the Senate.

Q. At whose instance was it put in in the Senate; who moved the amendment?—A. I think the chairman of the Committee on Indian Affairs moved the amendment. It was agreed to in committee.

By Mr. PECK:

Q. Was that amendment urged before the committee by you?—A. Yes, sir. The committee sent it back to the Commissioner of Indian Affairs, as it had been transmitted from the Secretary of the Interior without any recommendation in the matter, and the committee had no time to go over all the evidence in the case for an opinion and a recommendation. It was in the office of the Commissioner of Indian Affairs for

three or four weeks, and was returned with the recommendation that the claim be cut down 20 per cent. I never could see any reason for that recommendation, or any argument for it. If the claim was allowed at all, it should have been allowed for the full amount lost. Then I went before the committee, and I went to different members of the committee and argued the case with them, and finally I got them to compromise and agree upon the original amount put in the treaty, $90,000, which was about $12,000 more than the Indians would have got if the recommendation of Colonel Parker had been followed.

Q. Did you appear before the Committee on Appropriations of the House?—A. No; it was not before that committee. After it had been referred back to the Commissioner of Indian Affairs, and before it was returned again, the Appropriation bill had passed the House and was in the Senate.

Q. How often did you appear before the Committee on Appropriations in the Senate?—A. I think I was only there once, but I spoke to different members of the committee several times, whenever I had an opportunity to meet them.

By Mr. SARGENT:

Q. How do you know that the matter was not considered by the Appropriation Committee in the House?—A. The provision was put in as an amendment in the Senate, and was considered by a committee of conference.

Q. Did you see any member of the Committee on Appropriations of the House of Representatives in reference to it?—A. No, sir.

Q. Did you see any member of the committee of conference in regard to it?—A. I did not see any myself, but I requested Mr. Clark, the member from Kansas, to see the Appropriation Committee and see if they would consider it. That was after it had passed the Senate. I think I saw Mr. Clark one day and asked him to speak to Mr. Sargent about it. I saw him the next day, and he told me he had spoken to Mr. Sargent about it, and that the appropriation bill had been considered, and that there would be no chance to bring the matter up again in the Appropriation Committee, as they had got through with the matter. There is one matter which I wish to state here because it has been charged or intimated that there was some collusion between me and Mr. Williamson. I desired this Quapaw payment to be made by Mr. Hoag. Before I left Washington, after the adjournment of Congress, in the latter part of July, I went to Secretary Cox on two different occasions, stating the facts in regard to this claim; that I represented these people; that they looked to me for the money, and to nobody else, because they never did rely upon anybody else; that the appropriations had been made; that the Indians were very clamorous for their money, and were continually writing to me to know the reason why the payment was not hurried up, and saying that I would like to have the payment made as soon as possible, and desired that it should be made by Mr. Hoag. I told Secretary Cox that I had some interest in it, but that I did not ask any protection from the Government, or that my interest should be recognized, but that I wanted the money paid into the hands of the Indians, and that I did not want the Government to go out of its way to try to induce the Indians not to carry out their obligations to me, but that I was willing to rely upon their integrity and honesty. The last time that I made this application, Mr. Clark, of Kansas, was present in the room when I was talking to Secretary Cox about it. The Secretary said that the money should be sent out for payment as soon as it was got on the books of the Treasury Department, so that the Department could make requisition for it. At the same time he said that Mr. Hoag's duties were such that he might be pressed for time and might not be able to make the payment very soon, and that, in case he was not, he, Mr. Cox, would appoint a special agent to make the payment; but he assured me that the payment should be made by the 15th of August.

By Mr. BECK:

Q. Were you on the bond of Mr. Williamson?—A. I was.

Q. How did you come to be on his bond?—A. Because Mr. Williamson requested me. At the time I went on his bond I was not aware that he was going to make the Quapaw payment. I expected at that time that it would be made by Mr. Hoag. He was to make the Creek payment of $90,000, in which I had no interest at all, and he asked me to go on his bond. Afterwards the Secretary determined that Mr. Williamson should make all these payments—the payment to the Quapaws and Senecas and the payment to the Peorias and the Pottawatomies.

By Mr. SARGENT:

Q. Did your having an interest in any payment induce you to go on Mr. Williamson's bond?—A. Not at all, sir; I went on his bond as I have gone on many other people's bond, without any interest in the matter.

By Mr. BECK:

Q. How long had you known him?—A. Four or five years.

Q. What relationship had existed betwen him and you, business or otherwise, that you should go on his bond?—A. No more than existed between me and any other man that I was acquainted with. I thought him a man of integrity, and as he wanted me to go on his bond I did so.

By Mr. SARGENT:

Q. Did he give you any special reason for going on his bond?—A. No; I had been very intimately acquainted with Mr. Williamson for four or five years. I had had a good deal of business with the department and became acquainted with him in the transaction of my business. I have gone on the bonds of men with whom I was not half as well acquainted as I was with Mr. Williamson.

By Mr. BECK:

Q. There are some letters here from you relative to the transactions of the Choctaws and Chickasaws?—A. Yes, sir; I stated the facts in those letters.

Q. Have you any objection to their being made part of this record?—A. Not at all, sir; I have no objection to anything which I do being made public. I do nothing which I am not willing that the world should know, in connection with the Indians or anything else. There is another matter which I wish to state in reference to Mr. Mitchell. I never saw Mr. Mitchell in my life until I met him at the time of that payment down there.

By Mr. SARGENT:

Q. Who induced Mr. Mitchell to witness these powers of attorney?—A. I do not know. I had nothing at all to do with it. Mr. Snow may have requested him to do it. Mr. Snow had a good many of them got up when he was there. Most of them were got up when the claimants came in to make their claims. Mr. Mitchell was careful that, in every instance, the interpreter should be present, and, when the Indian did not understand English, (as many of them do understand it well,) that the contract should be read and interpreted.

Q. How do you know that, if you were not present?—A. I know it from the statements made to me by the Indians themselves, the chiefs and others. Mr. Mitchell did it merely to protect the interests of the Indians, so that every Indian should know what he was signing.

Q. Was Mr. Snow the agent at the time he got up these contracts?—A. No, sir; he had not been the agent for two years. He had nothing to do, in any official capacity, with the Indians for two years. He formerly had been agent with those Indians.

WASHINGTON, *January* 31, 1871.

J. W. BOSLER sworn and examined.

By Mr. WELSH:

Question. Where do you reside?—Answer. Carlisle, Pa.

Q. Are you familiar with cattle contracts?—A. I should be.

Q. What do you consider a fair difference between selling cattle for immediate delivery on the Missouri River, and keeping them during nine months, during the winter months, and delivering them as needed, week by week or month by month?—A. There is a difference, but it would require some calculation to get at it.

Q. Would you, for one and one-quarter cents a pound, take that difference?—A. That is a hard question to answer; it would depend entirely upon the state of the country that the delivery was to be made in. There are some times when the difference would be three or four cents a pound, and at other times would not be anything.

Q. Did you not tell me, that for one and one-fourth cents a pound additional, you would not take the risk of delivering cattle week by week, keeping them for nine months. Did you not tell me that in my library in Philadelphia?—A. I will tell you emphatically that I did not; and I will also say by way of explanation that I did not consider myself at all responsible for anything I said to you on that occasion, from the fact that I discovered very shortly after I had been there, although invited, that you were acting as a detective; but I did not say that; and now I will explain to you what I did say. Mr. Welsh assumed that one and one-fourth cents a pound would pay the difference, and he asked me, after arguing on that premise of his own, "Do you not think it would?" My answer was that perhaps it would.

By Mr. SARGENT:

Q. At whose house did this conversation take place?—A. At Mr. Welsh's, in Philadelphia. My brother had been up the Missouri River and stated to me that he had met Mr. Welsh, and that Mr. Welsh wished to see me. Mr. John H. Charles, of Sioux City, wrote me a letter stating that Mr. Welsh desired to see me, and had requested him to say so. Reverend Mr. Hinman also sent me word that I should by all means go to see Mr. Welsh, as he wanted to talk to me upon Indian matters up the Missouri River.

When I heard that Mr. Welsh had returned I addressed him a letter setting forth these facts and stating that at any time and place he suggested I would be ready to meet him. I received a letter at Washington, forwarded from New York, stating that Mr. Welsh had received my letter and would be glad to meet me at some time, mentioning the time, and that I should telegraph him if I would come. Of course the time had expired, and I did not see Mr. Welsh. I went to my home in Carlisle, and was detained there for quite a while, my family being sick and my little boy having died; and after I had an opportunity to communicate with Mr. Welsh, I telegraphed to him that I would meet him the next day, if agreeable, or something to that effect; that I could be from home only one day; and his answer was, to meet him between such and such an hour; and I went there to meet him.

By Mr. WELSH:

Q. What interest have you in the contract of J. W. Morrow for beef?—A. I have got a half interest in the contract.

Q. Did Governor Carney, or any one else, offer $40,000 to have that bid withdrawn?—A. Not to my knowledge. Mr. Welsh in that same conversation assumed that Governor Carney had offered $40,000, and my answer was that I had so heard it reported. I have never seen Governor Carney, and was not here when the contract was let. It was mere outside conversation and talk that such and such an offer had been made.

By Mr. SARGENT:

Q. Whom did you hear say that such an offer had been made?—A. I heard Mr. Welsh say it for one, and I believe I heard it in Chicago. I think I heard Mr. McCormick, of Omaha, say it. It was just a floating conversation.

Q. Is Mr. McCormick a partner in this contract?—A. Yes. I think I heard him say so, but I am not sure. It was a mere unfounded rumor.

Q. If the statement was made to you by a partner in the contract, would you class it an unfounded rumor?—A. Yes, I would, for this reason, that at the time he made that statement, if he made it, he did not know that I was a partner. I will not say that it came from him, it is just an idea that I have.

Q. At what time did you get an interest in Morrow's contract?—A. I met Mr. Morrow in Chicago, and he told me that he was coming on here to bid on this contract, and he asked me if I would join him. I told him I had put in a bid for the contract myself. A general conversation took place, in which he said that if I would join him, and furnish him with some money in connection with some friends of his, he would like to have me do it. I told him that I had every confidence in his capacity to execute the contract. I said that if he would go up the country and attend to the contract, I would like to join him, but that I would not go up the country and spend the winter there, attending to the business operations of the contract, under any circumstances, or for any amount of money. He said that he would do it, he and some parties whom he had with him, and I told him I would join him. I wanted to know what bid he would put in.

Q. Did he tell you?—A. No, sir; he did not.

Q. Did you go into the contract without knowing his bid?—A. I did. He said, "I will bid at such a price as will enable me to carry it out and make some money." I said, "I know you are thoroughly posted on this business, and if you give your personal attention to it I will join you." He said, "there is no use in fixing upon a price; just let me fix that."

Q. Had you not a bid for the same contract?—A. I had a bid in for a week before. The time for letting the contract had been postponed for a few weeks.

Q. His bid was to come in competition with yours?—A. Yes; I told him just what my bid was. I agreed to take an interest in anything he did.

By Mr. WELSH:

Q. Was your agreement to take an interest made after the extension of the time of letting the contract?—A. Yes; I think it was.

Q. When you came to me at my library, state whether I did not tell you that I had heard that an offer of $30,000 had been made by Governor Carney to have this bid withdrawn, and you replied specifically that $40,000 had been offered?—A. My recollection is that you did not put it in that way, although, as I stated, I had made up my mind, when you sat down there and made your speech, and told me how much you thought of me, and of everything I had done, and of the appreciation you had of my character and business reputation, and how you had investigated me, and told me you were glad to know you had found everything in connection with me entirely proper and right, I made up my mind, I say, that you were acting the part of a detective, and that I would hear you talk, and say as little as possible myself.

Q. You have not answered the question yet.—A. I do not recollect what may have been the conversation in regard to that, but I do recollect that you assumed in your argument that Governor Carney had offered a certain amount to have the bid with-

drawn, whether $30,000 or $40,000 I do not know, and my answer to you was that I had so heard such a report.

Q. Do you recollect my telling you that although I had heard a good account of you in your contracts with the Government, yet that in this connection I believed you had got into very bad company, and that they had misled you?—A. I remember something of that, and I asked you what you meant by it.

Q. What did you pay for flour in Sioux City in September?—A. Three dollars a sack, containing a hundred pounds.

Q. To whom did you pay that price?—A. To John H. Charles.

Q. Have you the bills?—A. I have.

Q. Can you produce them now?—A. I have not them here.

Q. What number of sacks did you buy from him at three cents a pound?—A. Something over 20,000 sacks; I forget the exact amount.

Q. What did you pay for flour in Yankton at that time?—A. I bought that flour from Mr. Charles.

Q. Do you know what was paid for it by him?—A. I do not; I have not the least idea in the world.

Q. What did you pay for the flour that was bought under the contract of 17th of June, and where did you buy it?—A. I bought part of it at Sioux City, but I cannot answer definitely as to the price, for I bought it from a number of different parties. I bought some flour at Omaha, which I shipped up there, and I cannot tell you what I paid for it. I paid from $2 50 to $3 a hundred pounds. I did not buy a sack less than $2 50, including freight to Sioux City, but I cannot give the exact amount.

Q. What freight did you pay up the river at that time?—A. One dollar and ninety cents per hundred pounds.

Q. From where to where?—A. From Sioux City to all the reservations—an average of $1 90.

Q. Were you a party to the bargain for the transportation of flour, pork, and other goods, made by Mr. Woolworth?—A. I was not interested in any shape whatever in their contract.

Q. Were you the custodian of the money?—A. I collected Mr. Woolworth's bills. I was delivering flour to the Government under a contract with the Commissioner, and was to be paid for it on the receipted bills of lading of the Northwestern Transportation Company, that being the evidence to the Indian Office of the delivery of the flour; and I insisted of course upon their sending the bills just as fast as they could. Mr. Woolworth asked me if I would collect his bills, as he knew that if he sent them to Washington it would take from one to two months to collect them; but that if I would take them with my own, and give my personal attention, I could get it done in a few days. I told him that I would do so, and he said he would send his accounts right to me and for me to collect them. He suggested that I should collect the drafts and indorse them, and that he would draw upon me for the amount. I told him that I would not like to do that without some authority, and he gave me written authority to sign his name to drafts. I did so and collected all the accounts. He telegraphed to me what to do with the money. I placed part of it to his credit in New York and in Sioux City, and he drew upon me for part of it.

Q. Had you a power of attorney from him to indorse?—A. I had a letter from him stating that he gave me authority to sign his name as secretary of the Northwestern Transportation Company to all drafts or evidences of debts that might be paid.

Q. Then you wrote his name without saying that you did so as his attorney?—A. Yes; that is, I wrote his name by authority, signed his name to the draft and collected the money; the draft was made payable to his order.

By Mr. BECK:

Q. How many contracts had you with the Indian Department in 1870?—A. I had a contract to furnish this beef in question, the contract of the 17th of June, and I had the extension of that contract of the 10th of August.

Q. And you were a half-partner in the Morrow contract?—A. Yes.

Q. Had you any right or authority to purchase bacon in Chicago for the Indian Bureau?—A. Yes, I had a contract for bacon; that was obtained under an advertisement.

Q. Your contract of June was a private contract?—A. Yes.

Q. And your extension of August was a private contract?—A. Yes.

Q. And your contract for bacon was made under an advertisement?—A. Yes.

Q. Were you the lowest bidder for the bacon?—A. I so understood it, and my bid was accepted.

Q. How did you come to obtain the contract of 17th of June; had you ever known General Parker before that time?—A. I met Mr. Parker in 1867 or 1868, the time when he and General Sully were commissioners to go West to negotiate some matters with the Indians; General Sully introduced him to me at Omaha; I probably did not talk to him for five minutes on that occasion, and never saw him again till last April, when

I called in his office and introduced myself, and asked him if he required any flour or subsistence of any kind for the Indians up the Missouri River; he told me that he did not, that they had a contract under the Commissary Department which was being filled, and that that would last until the 30th of June; that they had no appropriations for continuing the subsistence of the Indians beyond that time, and that he had no knowledge exactly what arrangement they would come to after that time. I said that I had been living in that country a good while, and doing business there; that I was extensively engaged in produce, and that if he wanted anything I would like to furnish him; Mr. Parker spoke then of General Sully's name, and said that he knew I was a reliable contractor in that country, and that if he needed anything he would be very glad to call upon me; the whole conversation probably lasted five minutes; I did not even sit down.

Q. Where were you in June when you next saw him?—A. I stepped into his office four or five times between April and June, and asked him if he wanted anything in my line; he said no, that if he did he would let me know, or something to that effect; not very long before I made this contract I stepped into his office and he told me that he did want some supplies up the Missouri River, and asked me if I was prepared to deliver them; I talked with him for half an hour or three-quarters, on the subject; he told me the condition that he was in, that the contract with the Commissary Department expired on the 30th of June; that he had no funds to pay for subsistence unless Congress made an appropriation, and he wanted to know if I would take the contract and deliver subsistence by the 1st of July; I told him that it was impossible to deliver it by that time, but that I would agree to take it up as quickly as any other person could probably do it; he wanted to know how soon I could do it; I told him I did not know exactly; my impression is that he mentioned the 5th of July, and he remarked in that connection that the Indian supplies would run out, from the best information he had, on the first, and that he could probably get supplies from the Commissary Department to last him for five or ten days; I told him that if he would make the contract at once, I would agree to deliver supplies to the lower agencies by the 5th of July, but that it would be impossible to do so to the upper agencies; I told him I could supply them by the 15th; he asked me to reduce my proposition to writing, and he would consider it; I submitted the proposition in writing; he said whatever I do in this matter I have got to do at once, as the service is in great want of subsistence in that country; I stated to him that I wanted an answer upon the bid immediately; he told me he would have to consult the Secretary, and that he would take my proposition to the Secretary and let me know the next day; he also told me in connection with it, that he had no money applicable to the payment of those supplies beyond about $90,000, and that the payment of the balance would be contingent upon an appropriation by Congress; he said he thought the appropriation would be made, but upon that point he would not guarantee anything; that he wanted me to know that I was taking that risk; he said that there was a point in controversy between the Senate and the House, which he explained to me, and that Congress might adjourn without making the appropriation; there was some talk in regard to the bid, as to this being too high or that too high, and we had the usual conversation on the subject of bargain and sale.

Q. Was it finally agreed upon according to your first bid?—A. No; there were some little changes made. I do not know exactly what they were. He cut down some things which he thought too high.

Q. Was the contract drawn a day or two after that?—A. The contract was drawn a very short time after that. It was drawn with some changes from my first talk to him.

Q. Were the propositions that you made substantially accepted?—A. Yes, sir; they were substantially accepted. In the case of tobacco, there was a little change, and in some other articles, but the propositions were substantially accepted.

Q. Was that contract changed afterward, so as to allow you to deliver all your cattle at once, instead of at different times?—A. Yes; but the way it occurred was this; my original contract with General Parker was that the cattle should be all delivered on the 15th of July. I stated that I would probably get myself into trouble by contracting to do that, as I might not be able to get so many cattle ready by that time, and, to provide for that contingency, I would like him to put in my contract that I should deliver a certain amount on the 15th of July, and a certain amount on the 1st of August, and a certain amount on the 1st of September. He called a clerk and told him to fix the papers in that way; and I also said at the same time that if I could get the cattle so as to deliver them all at once, it would make a difference to me, and that I wanted him to receive them all at once, but that I did not wish to be bound in a written contract to do so, as the probabilities were that I could not. He assented that it should be so done.

Q. Were you not authorized, after the contract was entered into, to deliver them all at once?—A. Yes; after I went up there, I discovered that I could get the cattle. I made a contract with one party to deliver the entire lot of cattle at once.

Q. Whom did you make that contract with?—A. Bosler, Herman & Co.

Q. Who were Bosler, Herman & Co.?—A. Three brothers of mine and their partner. One of them is in Sioux City, in the cattle business exclusively. I made a contract with them to furnish me with enough cattle to fill my contract, at a certain price. I discovered, when I got up there, that I had cattle enough to do it in one delivery, and I telegraphed to the Commissioner, asking him to instruct his agents to receive the cattle at once, in accordance with the understanding.

Q. Did the Commissioner telegraph to the agents or to you?—A. I asked him to send the telegraphs to my care, and I would see that they were delivered. Sioux City was the end of the telegraph line, and I attended to sending them on, by a messenger, so that they should be delivered. Part of the cattle were up there at the time.

Q. What amount of pecuniary advantage was it to you to be allowed to deliver them all at once, instead of as provided in the contract?—A. I considered that as part of my contract.

Q. The contract is in writing, is it not?—A. Yes; my contract in June was in writing, but when that contract was made up, it was understood, at my suggestion, that I should make three deliveries of the cattle, as I did not know that I could get them all up in one herd.

Q. What advantage was it to you, pecuniarily, to have the change of which you have spoken made, to deliver them all at once instead of according to the terms of the contract?—A. I do not regard it as of any advantage to me. In the technical construction which you would put upon it, it would be the cost of herding the cattle from the 15th of July until the 1st of August, which would be something, in the way of expense, whereas, in the way of advantage, there would be an increase in weight; I should think that it would make very little difference. The increase of weight would be considerable, from the fact that the cattle, after being driven that distance, would be very tired, and would pick up considerably in that season of the year. My impression is that one would about offset the other.

Q. Then you state to the committee that you think you derived no advantage from that change?—I think I did, from the fact that I got the cattle off my hands, got pay for them, and got the interest of the money.

Q. You bought all the cattle from one firm?—A. Yes.

Q. At what price?—A. At four and a half cents a pound, and I to furnish an escort to the cattle drivers, and to be responsible for all damages from Indian raids. I was to pay four and a half cents a pound for the cattle delivered at the agency.

Q. What negotiations, if any, had you with the Commissioner relative to the extension of August 10?—A. None, except what I have stated. The Commissioner asked me if I would furnish an additional amount of cattle, and I told him I would. There was very little talk on the subject.

By Mr. CHIPMAN:

Q. Did Mr. Welsh make any remark to you with relation to his motive in making charges against General Parker, and if so, what did he say?—A. In speaking of this prosecution against General Parker, he said that he was glad to assure me that he had no unkind feelings against me. He did not intend that there should be any reflection against me; but in the course of the conversation he spoke of General Parker, and said that his connection with those parties in New York was not very creditable, and further that the general was the representative of a race only one generation from barbarism, and he did not think that he should be expected to be able to withstand the inducements of parties who were his superiors in matters of business. He also said that the difficulty between General Parker and himself had occurred some time previous, when they were receiving goods in New York.

Q. While Mr. Welsh was a member of the board?—A. Yes. There was something in connection with the receiving and inspection of the goods. He objected to their being inspected and received in Buckley, Welling & Co.'s house, and gave some reasons for it. One was that there were some flannels which were at a low price. He would not agree that those goods should be inspected there, and asked that they should be removed to another house. Mr. Buckley and Mr. Wheeler had objected, and had got the Commissioner to side with them, and he (Parker) came on to Washington, and saw the President, and the President also sustained them. He said that he then resigned his position on the commission, and that if the balance of the commissioners had followed his example, they would have had General Parker out of office at that time; that the matter would have been ended there, or something to that effect. I told him that I had nothing to do with their quarrel, and did not care what the termination of it was.

Q. Was there anything else?—A. He said something about the President's desire to serve General Parker, and what he thought of it; I do not remember the exact words; but he attributed it to the President's goodness of heart. He asked me, in the same connection, if I had ever seen General Parker drunk; and he said that in New York he had been "feasted and wined;" that "tables had been kept up there;" and that he was satisfied that General Parker did not have the moral courage to withstand tempta-

tion. He said that he had gone to Secretary Cox and told him the condition of affairs, and the manner in which they were treating Parker, and asked Secretary Cox if he thought he (Cox) could withstand inducements of that kind, and that Secretary Cox said he did not believe he could.

Q. As to the delivery of the cattle, was the delivery on the one day the result which General Parker originally desired to secure?—A. His original desire was to have them all delivered on the 15th of July.

Q. Then, as far as the delivery was concerned, the instructions which he gave, at your request, did not vary from his original instructions?—A. No, sir.

Q. Do you know whether or not, under this contract of June 17, General Parker had authority to permit these deliveries at times different from those named in the contract? Did you understand that he had the right to receive your cattle without having them delivered precisely at the dates named?—A. I understood that he had the right to demand the receiving of them whenever I was ready to deliver them, from the fact that that was the understanding. The written contract was merely for my protection.

Q. With reference to the Morrow contract, would you have taken the interest in it you did if you had known the bid which Mr. Morrow was going to put in?—A. No, sir; I would not.

Q. Why?—A. From the fact that it was entirely too low.

Q. Do you know now whether or not that contract was profitable?—A. I know that it is not profitable.

Q. What will be the probable loss on that contract?—A. The loss on that contract cannot possibly be less than from $75,000 to $100,000. The whole amount of the contract, when filled, is about $270,000, and there is now over $260,000 expended. In my estimation, there is no possible way of getting out of that contract without a loss of from $75,000 to $80,000.

Q. And that by as good management as could be given?—A. As could possibly be given.

Q. What is a fair profit for handling flour by the sack where you are dealing in ordinary business transactions with responsible men—say in Sioux City?—A. I was in the mercantile business in Sioux City, and we regarded a dollar a sack as the profit we should have. At Carlisle, Pennsylvania, the profit would be a dollar a barrel.

Q. What difference would there be between dealing with responsible individuals in the purchase and sale of flour and dealing with the Government, where you would have to look to the Government for your pay, and have vouchers sent on to Washington and audited in the ordinary way?—A. My experience is, that there would be quite a difference in favor of the private individual, from the fact that you are supposed to get the money when the transaction is completed, whereas transactions with the Government, in connection with the Indian Bureau, have been very different from that.

Q. In ordinary transactions, where there is nothing but the usual official delay, the difference is against the Government?—A. Yes; quite a difference.

Q. You say that you paid for freight in the delivering of those goods, under the contract of June 17, $1 90 per 100 pounds to all points?—A. Yes.

Q. What season was that in?—A. In the month of July.

Q. Is that the most favorable time for freight?—A. It is the very best season of the year.

Q. Are you familiar with transportation on the Missouri River?—A. I am.

Q. How long have you been engaged in business in that country?—A. I was engaged in business there from 1857 up to 1867, about ten years.

Q. About what time of the year does navigation practically close about Sioux City?—A. What we understand in trading on the Missouri River is, that all freight should be sent up on what we call the June rise. There is a rise in the river which generally commences the 1st of June and lasts till about the middle of July, which is the time at which freights are lowest, from the fact that there is plenty of water, and that the navigation is very easy. After that the river commences to fall, and becomes hard to navigate. The delays then are very great, and there is a necessary increase in the price of freight.

Q. Do you recollect about what time for the past three or four or five years the river has frozen over at Sioux City?—A. It is generally considered that the navigation of the Missouri River is about closed on the 1st of October, and the September rates are very high. Every person who has freight to get up the Missouri River does it from the 1st of June till the 1st of August.

Q. Can you give, from your experience, any prices that you have had to pay in the late months of the year?—A. When General Sherman and General Sanburn were up there as commissioners, I had a contract to deliver some supplies for them. I hired my own freight, and I paid an average of 6 cents a pound from Sioux City to Yankton agency, Crow Creek, Fort Sully, Fort Rice, and Fort Berthold. The boat, I think, left about the 25th of September. I hired a boat the season before to take up grain to Fort Sully to the quartermaster's department. It was in the month of August, I think, and I paid 3 cents a pound. Along in the fall of the year the average price has been

about $1 per hundred pounds for a hundred miles. I think that in my contract with General Sherman and General Sanburn it was fixed at $1 50 per hundred pounds per hundred miles; but the usual price with merchants is supposed to be about $1 a hundred pounds per hundred miles.

Q. Had you any pecuniary interest in the Treasury warrants that you indorsed for Mr. Woolworth?—A. None whatever.

Q. Was it a mere matter of accommodation?—A. A mere matter of accommodation. I had the money for a little while before he drew it.

Q. And to that extent you derived a benefit from it?—A. Yes?

Q. But you returned the amount to him dollar for dollar?—A. Dollar for dollar.

Q. In no sense were you benefited by it?—A. In no sense.

Q. You had no compensation for it?—A. In no shape or form.

Q. Did you solicit the extension of the contract of 10th of August, 1870?—A. I did not.

Q. Had you any notice of it, except as you have already stated?—A. Except as I have already stated.

Q. Had General Parker any pecuniary interest, directly or indirectly, in any contract that he made with you for the supplies of the Indians, or in regard to matters here in controversy?—A. He had not.

By Mr. SARGENT:

Q. Did you have any written contract with Mr. Morrow by which you acquired an interest in his contract with the Indian Department?—A. Not until after the contract was awarded.

Q. When you made that written contract did you know the price which Mr. Morrow had bid and taken the contract for?—A. Yes.

Q. With your previous experience in buying cattle and furnishing them under contract with the department, did you still go as a partner with him at that reduced price?—A. I objected to it and asked to be released from it; but the other parties connected with it claimed that they had gone into it upon my agreement and insisted upon my remaining in it.

Q. Then I understand that you agreed, having already a bid for what you considered a proper price, to take an interest in a contract, if it was awarded, on some other bid, without knowing anything about what that bid would be?—A. Yes; from the fact that I had confidence in the parties who agreed to fill it and manage it.

Q. Did you not seek to protect yourself by getting some idea of the price they would offer to furnish the cattle for?—A. Yes; I asked Mr. Morrow what he was going to bid, and his remark was, that I should leave that to him; that he would not bid at such a price that he would lose money. I told him that I had entire confidence in his judgment.

Q. When you afterward found that he had bid such a price that money must inevitably be lost on it, contrary to his agreement with you, you still allowed yourself to go into the contract?—A. I did, because I could not get out of it.

Q. Was it not part of the agreement that he should not bid such a price as that you should lose on it?—A. No; it was an open transaction.

Q. How much money did you put into it?—A. Something over $200,000.

Q. Knowing at the time that there must be an inevitable loss?—A. I put it in since the contract was made. The parties went to work to purchase the cattle, and drew on me.

Q. My question was, whether you put in $200,000 at the time you knew the price would result inevitably in a loss of $70,000 or $80,000?—A. No; I lent this money to the company and took their written obligation for it, at the legal rate of interest, 12 per cent. a year. My money is a loan to the company.

Q. What interest do you own in the contract?—A. Half of it.

Q. And do you supply the money for half the contract and loan $200,000 besides?—A. I loan the company over $200,000, myself being one of the company.

Q. You have loaned the company over $200,000, with the inevitable result, in your judgment, that the company would lose $75,000 or $100,000 in the operation?—A. That was not the inevitable result when I did it; but that is, in my judgment now, the inevitable result. My agreement was to loan the company $200,000. That was before the thing was done.

Q. You knew then what the price under the contract was?—A. Yes; but I did not know what they would have to pay for the cattle.

Q. At what time was the Northwestern Transportation Company organized?—A. I do not know.

Q. Was it in existence at the time you carried goods for Harney and Sherman?—A. Yes; one season it was, and another it was not.

Q. Did it have the force of boats on the river that it now has?—A. I cannot say; they carried freight for me that season; but I don't know how many boats they had.

Q. Is that company now charging 6 cents a pound for freight?—A. I do not know; I have had no transactions with them since July.

By Mr. CHIPMAN:

Q. In subsequently complying with your verbal promise to Mr. Morrow, did you do it because you felt yourself obligated to do it—because you had given your faith to stand by him?—A. I went in with him because I had agreed to, and because these men insisted on my standing by my agreement. I objected to what they had done, and they gave me the reasons why they had done it.

Q. And you went into it simply to fulfill your agreement?—A. Yes, sir.

By Mr. WELSH:

Q. Did you make any bargain with Mr. Morrow to delay the delivery of the large contract, so as to allow you to make your other deliveries?—A. None whatever.

Q. What did you pay for the cattle delivered in October and November at Whetstone and Yankton?—A. Four and a half cents a pound.

Q. To whom did you pay that?—A. To the party I made the contract with—Bosler, Herman & Co.

Q. Have you any vouchers from them here?—A. Not in Washington.

Q. Do you know what they paid?—A. I do not. I never asked the question.

Q. What did you pay to Odell & Wheeler for the 4,100 cattle that were delivered under the $3 88 contract?—A. I do not know that I ever saw the men or any party connected with the contract. I left Omaha just about the time the contract was executed.

Q You do not know what was paid for the cattle?—A. I do not.

Q. What was paid for the cattle that were left at Choutean Creek, 1,200 to 1,300 head?—A. I do not know.

Q. What was paid for the 1,200 or 1,400 head of cattle that were left at Crow Creek, Hutchinson's cattle?—A. All I know is that I placed, altogether, some $200,000 to the credit of Morrow & McCormick for them to draw against, and I have had no statement from them as to what they paid for the cattle.

WASHINGTON, D. C., *January* 31, 1871.

CHARLES E. HEDGES sworn and examined.

To Mr. CHIPMAN:

I reside in Sioux City, Iowa. I have resided there for fourteen years. For the last five or six years I have been engaged in the cattle business.

Question. What have been your annual average transactions?—Answer. From $100,000 to $150,000.

Q. Have you delivered cattle to the various Indian agencies up the Missouri River?—A. Yes; to some of the military agencies and posts up the river.

Q. You know something of the risks of delivering cattle in that country?—A. I have experienced some of them.

Q. Do you know what cattle were worth about Sioux City in June, 1870?—A. I was buying cattle at from 4 to 5 cents gross. I have paid 4½ and 5 cents.

Q. Did you sell any beef to the contractor who was supplying the commissary department for the various posts up the river last year?—A. I had a half interest in the 400 head of cattle sold to Colonel Denman last spring.

Q. Were they sold to fill the Fenlon contract?—A. That is what he said.

Q. What did you sell for?—A. Five cents at Sioux City.

Q. As they came from the scales?—A. Yes.

Q. When was that?—A. I think it was in the month of May. He had exhausted the supply on hand, and this purchase was to fill up.

Q. At the time you made this sale, were there other cattle in the market in Sioux City?—A. Yes, in the vicinity.

Q. Do you know whether Colonel Denman had made efforts to get cattle?—A. Yes; he said that he found mine to be as cheap as any that were offered. H. T. Booge & Co. had a half interest in this 400 head.

Q. What was the difference, if any, between the prices of cattle in Sioux City in May and in June, 1870?—A. There was very little change in that time.

Q. Did Mr. Bosler apply to your firm for cattle in the latter part of June, 1870; and, if so, what were your prices?—A. He asked us what we would furnish cattle for, and we told him at 4½ cents a pound. That was in June, 1870, at Sioux City.

Q. What percentage would the risks and expenses of delivery from Sioux City, up the Missouri River, at the various agencies, reaching as high as Grand River, be beyond delivering the same cattle at Sioux City?—A. It would be owing a great deal to a man's luck. I suppose somewhere from 20 to 40 per cent., I think.

Q. Explain some of these risks.—A. In handling Texas cattle there is a risk of their stampeding. I remember one time when a lot of cattle was frightened by a man having a buffalo robe, who gave a sort of Indian whoop, and the whole herd ran away for twenty-five miles.

Q. Did you bid for any Indian contract in the latter part of September for cattle; and, if so, what was your bid?—A. I bid 5 cents.

Q. Had prices declined at that time under those ruling in the spring?—A. There seemed to be a material decline in prices from the large influx of Texas cattle, and from the general depression of the money market. We had bid at 3½ cents in the fall.

Q. How do the rates along the Pacific railroad, at Sioux City, compare with the rates at Chicago for Texas cattle?—A. We can get the cattle there at the Chicago prices, less freight and commission.

Q. What is the price per car from Omaha to Chicago?—A. I was told by the agent of the railroad that the price was $80. That would be from 50 to 60 cents per hundred pounds.

Q. What would you estimate to be the commission?—A. Fifty cents a head.

Q. What would have been a fair price for cattle delivered at the various posts up the Missouri River, as high as Grand River, on a contract, made in June, 1870, calling for from 1,200,000 to 1,500,000 pounds of beef, to be delivered, one-third on July 15, one-third on August 1, and one-third on September 1, 1870, when, at the time the contract was made, there was no provision for payment by an appropriation of Congress?—A. My experience has not been very satisfactory in waiting for appropriations. Taking my experience, I would not like to furnish it at less than from 5½ to 7 cents a pound.

Q. What difference would you make between furnishing cattle to a private individual, who was ready to pay on delivery, and furnishing cattle to the Government, where you would have to wait until the vouchers go to Washington and are audited in the usual course?—A. From 12 to 15 per cent.

Q. Can you give any instance where you had contracts?—A. I furnished about $3,000 worth of cattle for Mr. Finni's contract, and we fed cattle between the time Mr. Finni's contract closed and the reletting of the contract.

Q. At what prices did you furnish beef to the Winnebagoes?—A. At three and a half cents at Sioux City. This tribe is eighteen miles below Sioux City, on the opposite side of the river. This was, I think, in September and October, and part in November, 1870.

Q. Did you furnish cattle to General Harney along the river?—A. Yes; I had a half interest in Booge's contract. That contract, I think, was for about 50,000 or 60,000, at $7 80 per hundred pounds gross weight, for delivery at Whetstone, Cheyenne, and Grand River.

Q. Did you regard that as a fair price at that time?—A. We thought it a profitable price at the time, but it did not turn out in the end to be so.

Mr. BECK objected to the evidence going back beyond 1870.

Mr. CHIPMAN offered to show by the witness and by other witnesses, that in 1868 and 1869 beef and other supplies were furnished to the various agencies involved in this investigation, under similar circumstances to those in this case; that the supplies then cost the contractors about the amount paid for the supplies furnished in 1870; that in dealing with the Government there is a certain amount of risk and delay in the collection of the money, and that that circumstance had for many years entered into the computation made by contractors in dealing with the Government, and should legitimately be shown in this case to establish the fact that the matter was known to the Commissioner of Indian Affairs, and that he necessarily dealt with contractors in view of it. He offered to show that beef supplied to General Harney in 1868 and 1869 was paid for at the rate of $7 80 per hundred pounds gross, at a time when cattle in Omaha cost about the same price as they did in 1870. He desired to show that the prices of flour and other supplies did not vary materially in 1870 from the prices in 1868 and 1869, when high rates were paid by the Indian Department.

The committee decided that the prices paid for the beef, flour, and other supplies, in 1868 and 1869, did not, in its opinion, elucidate the question as to the value of those supplies in 1870, and that as to the difficulties in dealing with the Indian Department, the witnesses were permitted to speak of anything that they knew on that subject.

Q. What kind of cattle was furnished under the Winnebago contract at three and a half cents per pound gross?—A. They were young, thin, rough cattle.

Q. Explain the difference between such cattle and good, merchantable cattle, as mentioned in the Bosler contract of June 17?—A. The difference that we make between young, thin cows, and stag cattle and mature steers seven years old, would be from one to one and a half cents a pound. For instance, if we pay three and a half cents for these thin, young cows, we pay from four to four and a half cents for a steer.

Q. What do good, first-class Texas cattle average in weight?—A. From 1,000 to 1,100 pounds; owing to age.

Q. Do you recollect any average weight of cattle above 1,200 pounds?—A. I once turned over 150 head of cattle that averaged 1,300 pounds.

Q. Are you familiar with navigation on the Missouri River?—A. I suppose I am familiar with the shipping trade to the different points.

Q. In ordinary seasons, what would land transportation be worth when large quantities of supplies are to be carried from Sioux City to Grand River and Fort Berthold

by land?—A. To Grand River, freight would be worth from seven to eight cents, in large quantities; in smaller quantities it would be cheaper.

Q. How about freight to Fort Berthold?—A. I never knew of any land transportation from Sioux City to Fort Berthold. I never knew anybody who would take the risk.

Q. At what season of the year does navigation practically and usually close at Sioux City?—A. Generally about the middle of October; sometimes boats run later.

Q. Do you deal in flour?—A. Limitedly, not extensively.

Q. Do you know anything about the capacity of that country about Sioux City for the supply of flour?—A. Yes; I have some knowledge of it.

Q. What effect upon the flour market would an immediate demand for 28,000 sacks have if it were generally known—say in August last?—A. It would have the effect of immediately appreciating the market price.

Q. Up to what point?—A. It is pretty difficult to determine.

Q. Can you state what appreciation it would make in the price?—A. From fifty cents to a dollar a sack.

Q. Why?—A. Everybody in the country would know that it would require nearly all the flour in the country to fill such a contract, and they would be satisfied that they could get their own prices, and would regulate their prices by what it would cost to ship it there from Chicago.

Q. If you were going to purchase 28,000 sacks of flour in Sioux City at the best rates, would you advertise for it, or would you buy it quietly?—A. If I wanted to get it at good prices, I think I would go around and buy it quietly.

By Mr. WELSH:

Q. Do you know the price of beef in Schuyler and Abilene last year?—A. I do not.

Q. Do you know the prices at which the drovers from Texas deliver cattle on the Missouri River?—A. No, sir.

Q. Do you know George K. Hazlitt, the clerk of the Northwestern Transportation Company?—A. I have seen him, and I know him when I see him.

Q. Do you know that the contract for the Northwestern Transportation Company was taken in his name?—A. I heard it.

Q. Did you see the advertisement for that contract last spring?—A. I cannot tell whether I did or not. I know from general report that there was a contract to be let for freight up the river, but I do not know whether I saw the advertisement or not.

Q. Did you ship any goods up the river last season?—A. A limited amount—not much.

Q. To what points?—A. I shipped salt on a little bit of a contract for the Santee agency.

Q. What freight did you pay?—A. I believe I paid $3 a barrel.

By Mr. SARGENT:

Q. The impression to which you refer, and which makes you afraid of Indian contracts, is derived from your experience in the Harney case?—A. In the Harney case and one or two other cases.

Q. That was where contracts were made in advance of appropriations?—A. Yes, sir; and there is also a difference in cash being paid there, and in having to send vouchers on to Washington to collect pay, even where there is an appropriation.

Q. Then there is a difference against the Government where appropriations are not yet made?—A. Yes; we have always deemed it so.

Q. In such cases, then, it would be very much better for the Government to avoid buying, if possible, when there is no appropriation?—A. That would be my experience.

Q. The Government would get better bargains after the appropriation is made?—A. A good deal better.

Q. Then if there were an emergency arising requiring the purchase of cattle a month before the appropriation bill was passed, would it not be better to buy only cattle enough for that month, and to buy the rest after the appropriation bill had passed?

(Objected to by Mr. Chipman, and objection overruled.)

A. The Government can make a better contract when there is a certainty of getting the money when the appropriation bill is passed. But there is a difference on account of the red tape and the difficulty in getting paid. We pay 1¼ per cent. a month there on money.

Q. Are you putting any stress upon the consideration that an appropriation has passed or has not passed?—A. It makes a good deal of difference whether the appropriation bill has passed or whether it has not passed; but I would make a difference, also, between making a contract with the Government where the appropriation bill is passed, and getting cash in the country.

Q. If a fair price would be from 5 to 7 cents in the absence of any appropriation bill, what would be a fair price with an appropriation bill?—A. From 4¾ to 6 cents.

WASHINGTON, D. C., *January* 31, 1871

JOHN DOBSON sworn and examined.

By Mr. SARGENT:

Question. Where do you reside?—Answer. I reside in Philadelphia.

Q. Were you a bidder for the contract with the Indian Department, in pursuance of the advertisement of July 29, 1870?—A. I was.

Q. Did you furnish a quantity of blankets, among other articles?—A. Yes.

Q. Do you recognize this blanket as one of the blankets furnished by you?—A. Yes, sir.

Q. At what price did you furnish these goods under the contract?—A. I believe at seven dollars per pair.

Q. How does this blanket of yours compare in quality with the other blanket now shown you?—A. There is no comparison at all between them. This other blanket is not the right color. This blanket furnished by us for seven dollars is a heavy blanket; I should think it was nearly a pound heavier.

Q. State whether, under this contract of yours, if the Commissioner of Indian Affairs had desired 200 or 300 more pairs for seven dollars of these blankets you would have been required to furnish them?—A. No, sir; not under the contract. The contract did not so read. We were getting more for the blankets in the market.

Q. The advertisement contains this clause: "The right will be reserved to require none or a greater or less quantity of any of the articles than that specified in the above list at the prices proposed."—A. Yes; but when we got the contract the quantity was filled up, and there was an end to it.

Q. What would you furnish these blankets for outside of the contract?—A. Eight dollars; that is our regular price for selling to the trade.

By Mr. CHIPMAN:

Q. Your blanket has been in competition with the Amidon, Lane & Co. blanket?—A. Yes.

Q. Is there not a difference of opinion as to the merits of the two blankets?—A. Yes; of course. Amidon thinks his blanket as good as mine.

Q. Do not the persons who purchase both have a different opinion about them?—A. Our goods they call standard goods, and I guess where Amidon, Lane & Co. sell one we sell twenty. If there is any difference of opinion it is because they can afford to sell theirs a little cheaper than we can ours. Ours is made of a different material and of a different dye.

Q. The blanket exhibited to you to-night as Amidon, Lane & Co.'s is not their ordinary blanket that is in competition with yours?—A. I cannot speak of that blanket. I can swear that the other is one of our manufacture.

A. But the dark one you do not know anything about?—A. No.

Q. It does not look like Amidon, Lane & Co.'s blanket?—A. I do not know anything about their goods.

Q. What do they sell their blankets for?—A. They sell at various prices. I know that as a general thing they do not get as much for them as we do within from five to ten cents a pound.

By Mr. SARGENT:

Q. You are accustomed to handle blankets and you know their valne?—A. Yes.

Q. And you say that the article exhibited to you as yours is superior in weight and quality to the other article exhibited as Amidon, Lane & Co.'s?—A. Oh, yes; there is a difference of fifteen cents a pound in the market between them. Put them alongside of each other and the Amidon, Lane & Co. blanket would not bring within twenty cents a pound as much as ours.

By Mr. CHIPMAN:

Q. You say that yours rate at $8 to the trade generally?—A. Yes, I believe that is the present price.

Q. And you furnish to the Government at $7 on account of the large quantity supplied?—A. Yes.

By Mr. SARGENT:

Q. Suppose when the contract was made up in pursuance of this advertisement the Commissioner had required you to furnish 200 or 500 pairs more of your blankets, would you have been required to furnish them at the time of making the contract?—A. Oh, yes; I should have given them to him at the time of making the contract.

WASHINGTON, D. C., *January* 31, 1871.

VINCENT COLYER recalled and examined.

By Mr. SARGENT:

Question. Where did this blanket come from which the witness has just testified was furnished by himself?—Answer. It came from his house, Dobson & Co. It was purchased under the supervision of our board.

Q. Where did this other blanket, the dark one, come from?—A. It was sent to us by Agent Gibson, of the Osages, as a sample of the goods sent on to him among the presents by Commissioner Parker. They were purchased from Buckley, Welling & Co. This darker blanket is a Buckley, Welling & Co., made by Amidon, Lane & Co.

By Mr. CHIPMAN:

Q. Did you see all the blankets delivered to the Osages?—A. No, sir; we did not see any of them delivered; they had not arrived while we were there.

Q. Do you know how many of those dark blankets there were?—A. There was one bale like this.

Q. There was no objection to the others?—A. Agent Gibson said that the others may have been a shade better; that was all.

Q, You know nothing about the matter except from a letter written to you by Agent Gibson, accompanying a blanket which purported to have been delivered to the Osages?—A. Yes. We received it from Agent Gibson by express.

Q. Did you make known these facts to Commissioner Parker after you learned them?—A. Commissioner Parker was sick at the time. We report directly to the Secretary of the Interior.

Q. Did you, as the organ of the board, make known this matter to Commissioner Parker at all?—A. I could not do it; he was sick at his house.

Q. For how long a time?—A. Until this investigation took place.

Q. When did you first come to the knowledge that these defective blankets had been sent to the Osages?—A. This blanket was delivered to us in Mr. Dodge's store about three or four days before Mr. Commissioner Parker appeared here.

Q. Had you not heard of it before?—A. Undoubtedly; but not to take notice of it. The blankets had not arrived at our office. We report directly to the Secretary of the Interior; all our official communications are with him.

Q. And you do not have official communication with the Commissioner?—A. Not unless the Secretary of the Interior directs us.

WASHINGTON, D. C., *January* 31, 1871.

STEWART WILSON sworn and examined.

By Mr. SARGENT:

Question. What is your business?—Answer. I am in the commission dry goods; the name of the firm is Wilson & Bradbury.

Q. Have you any connection with Mr. Dobson in business?—A. We are the agents for Dobson.

Q. Do you know the blankets manufactured by Mr. Dobson?—A. Yes.

Q. Do you recognize this blanket as one of his manufacture?—A. Yes, these are the goods we sell.

Q. What is the difference in value between this blanket and the other blanket that I now hand you?—A. The difference in dye would be great. This one is a light dye, not fast. The difference would be about fifteen cents a pound in favor of the Dobson blanket. This other blanket feels as if the warp was not all clean wool.

Q. If the Dobson blanket is worth $8 in the market, what is the other worth?—A. This other is not quite so heavy. It is supposed to be a three point blanket. It would be worth about $7.

Q. Suppose this Dobson blanket was worth $7, what would be the value of the other?—A. About $1 10 or $1 15 less. We calculate at so much a pound for the difference in dye and stock.

Q. Are you accustomed to handle blankets, so as to know their quality and character?—A. I sell more blankets than any ten men in the United States.

Q. As an expert, you say that the Dobson blanket is a greatly superior blanket to the other?—A. O, certainly; it is a better blanket.

By Mr. CHIPMAN:

Q. What difference do you attach to the matter of the color?—A. The difference in dye would be about seven or eight cents a pound, I think. The difference in quality would make it about the fifteen cents.

Q. Did you ever have occasion to use a blanket of this kind in actual wear?—A Yes, I have traveled with one of these Dobson blankets four or five thousand miles.

Q. Did you ever travel with one of the Amidon blankets?—A. No, sir.

Q. Do you know which one would last the longest?—A. The better material always wears the longest. I do not know whether that is an Amidon blanket or not.

Q. Speaking of those two blankets, can you say that the Dobson blanket would wear longer than the other blanket?—A. Yes. In the first place it would retain the color, and this other one will not.

Q. Color has nothing to do with the wear?—A. O, yes. Sometimes brown will rot the fabric. I do not know what this dye is.

Q. If you do not know what the dye is, how can you tell whether it would be durable or not?—A. It might be durable.

Q. It is more a question of sale to the trade than of actual wear?—A. In point of beauty and wear I should think that the Dobson blanket is a much better one.

Q. Is there not some feeling of jealousy and competition between Amidon, Lane & Co., and Dobson & Co.?—A. Not that I know of. We suppose that ours is a much better blanket. If you were to pile these blankets up and a customer came in, he would certainly pay more for the Dobson blanket than for the other one. An Indian would not buy this other color at all if he could get the color of the Dobson blanket. The other blanket might wear well enough, but it is not of the color to be saleable.

Q. The merchants buy both the Amidon and Dobson blankets?—A. I know that we sell all the best trade in the United States. They sell a large quantity of blankets, but I never heard of their selling Indian blankets. There is no doubt that they have made a few pairs of Indian blankets, but I believe they have had hard work in selling them.

Q. Do they not make scarlet blankets?—A. Yes, they make scarlets, and a few blues, I believe.

Q. What you know of the Amidon trade and blanket is from hearsay?—A. I know that they sell a good many bed blankets and green blankets; but I know that we supply the best trade.

WASHINGTON, D. C., *January* 31, 1871.

JOHN H. CHARLES sworn and examined.

To Mr. CHIPMAN:

I reside in Sioux City, Iowa; I have lived there since 1856; during the last ten years I have been in the mercantile business; I do an exclusively wholesale business.

Question. Have you become somewhat familiar with transportation on the Missouri River?—Answer. Yes, sir.

Q. At what time does navigation usually close at Sioux City as against freights going up as high as Crow Creek?—A. Ordinarily, I should say by the 1st of October; the 15th of October is the outside.

Q. If you were going to make an arrangement to send freight up from Sioux City, about October 10 or 15, on what basis would you figure?—A. I might not be able to ship it at all by the river, and I could not give any rate, unless I knew what kind of weather we were going to have; if I were a contractor, I certainly would not agree to carry freight by boat after that time; I would make my calculations to carry it by land, and if I could ship it by boat I would do so.

Q. What would be the difference in shipping to the various Indian agencies along the Missouri River, on a basis of land operation, between small lots of from ten to twenty-five tons, and large lots of from 2,000 to 3,000 tons?—A. You can ship small lots for less money than large ones, because the transportation of the kind necessary to transport a large amount of freight is scarce in that country. There are many who will offer to carry ten tons, but there are very few who will compete for carrying 500 tons. There would be few bids for a contract of that size.

Q. And when it gets to a thousand tons the difficulty is still greater?—A. There is not anybody there who can transport a thousand tons by land within a month. The only one who could do it would be somebody who would purchase teams and wagons for the express purpose.

Q. Would the rates be higher or lower on a large contract or on a small one?—A. For from 500 to 1,000 tons the rates would be higher than they would be for from ten to fifteen or fifty tons, in consequence of the difficulty in finding men who would be responsible for that amount of frieght. For ten tons you would have a good many bidders who would come in and say they would carry it for so and so, and the competition would be such as to bring down prices. When you get to fifty tons you do away with a certain portion of that competition, and when you get to 500 there are very few people there who would be willing to take a contract for that much.

Q. A contract was made on the 26th of September, 1870, for transportation from Sioux City to Yankton Agency, at $2 25 per hundred pounds; from Sioux City to Brulé and Crow Creek, at $4 25; from Sioux City to Whetstone Agency, at $3 25; from Sioux City to Cheyenne Agency, at $5 25; and to Grand River, at $6 25; and to Fort Berthold, at $7 50; this freight to be transported at any time during the months of September, October, November, and December, 1870, the contract covering from ten to twelve hundred tons of freight. State whether or not, from your knowledge of the

navigation of that river at that season of the year, those rates were reasonable or otherwise?—A. I would have to base the calculation to a great extent upon land transportation. To Yankton I should think the rates should be $2; to Whetstone, $2 50; to Brulé, $4 50; to Cheyenne, $6 50; to Grand River, $8; to Berthold, it would be worth $15; but it would be an utter impossibility to transport any large amount to Berthold. It would be necessary to have a military escort to get there, and you could not get your cattle and teams back short of the following spring. That point is virtually out of the question. I have hauled to all these points. To Grand River I am paying 8 cents a pound now, and that is considered cheap. If it were a large lot I could not get it done for that. To Cheyenne I have paid 6½ cents; to Brulé I have paid for small lots 4 cents, but for large lots it could not be done short of 4½ cents; 4 cents would be the bottom price.

Q. Taking this contract with its provisions, made about the middle of September, for freight running through to the latter part of November, and with the chance of having freight thrown upon the hands of the contractor in December, with your knowledge of the navigation on that river, and of the time when it usually closes, state whether or not this contract is fair and reasonable.—A. The upper rates upon the basis that I am calculating would be very low—lower than I would want to take them. The rates for the lower points, that is to say, Yankton Agency and Whetstone, would be a good contract. I would be willing to carry freight for them.

Q. Taking the contract altogether, is it fair or otherwise?—A. It depends upon how much is to go to the upper points.

Q. Take it as requiring about equal distribution to the various points, high and low.—A. With the chances that at least a part of the freight could be taken by boat, I would be willing to take the contract, but I do not believe I would be very anxious to get it, because these upper rates would eat up the profits.

Q. The profits would come from the lower points?—A. Entirely, in the way I figure it.

Q. Do you recollect any instance where you have made contracts for taking freights up the river?—A. We shipped for Durfy & Peck goods which they had sold to General Harney in 1868, in November, by an ox train that went up there, and my recollection is that they got eight cents a pound for it; I think there was a contract; I recollect that we circulated printed advertisements through town and among all the people who we thought might furnish transportation for thirty or forty tons, and I think that the rates to the upper points averaged eight cents a pound; they may have been higher to Grand River and a little lower to some of the lower points. I furnished money to purchase wagons and outfits, and the result of it was that one of the men got out of the operation so badly that he only paid up the last note that he gave me ten or fifteen days ago, and they never could have paid fifty cents on the dollar if the Government had not purchased their teams when they got there; they made a very good sale of their cattle at seven cents a pound.

Q. For the last five or six years, at what time has navigation practically closed at Sioux City?—A. I should think about the 15th of October. Five years ago there was a different feeling in regard to navigating that upper river, and it was hard to get a boat to go up there after the 15th of October on account of the winds and bad weather; they might be overtaken up there and detained; but of late years they have got lighter-draught boats, and they venture out later in the season, so that what was good five years ago is scarcely good to-day. I should think that as late as the middle of October is as late as boats should go out as a general thing. This season was an extraordinary one, and boats ran through November.

Q. What is the limit up the river that they could venture?—A. I should not think, as a general thing, that they could go above Whetstone.

Q. There was a contract made with the Quartermaster General's Department, running from March 20 to October 31, 1870, with Hiram K. Hazlitt, for transportation from St. Louis, embracing the forts from Sioux City up. In this contract there is a provision for way freights and a provision for down freights; it embraces soldiers, officers, horses, cattle, mules, wagons, ambulances, and carts; it provides also for ten days' notice prior to shipment from Sioux City. The rates are, from Sioux City to Yankton, 75 cents per hundred pounds; to Whetstone, $1; to Brulé, $1 10; to Crow Creek, $1 25; to Cheyenne, $1 60; to Grand River, $1 60; to Berthold, $2, all for August; and for September, to Yankton, $1 50; to Whetstone, $1 60; to Brulé, $2 20; to Crow Creek, $2 50; to Cheyenne, $3 20; to Grand River, $3 20, and to Berthold, $4; and for October rates, 20⁰ per cent. above the August rates. With the understanding that the bulk of the freights would be sent up in the early months, I want your opinion as to whether that contract would be better or worse for the contractor than the contract made with the Indian Department by the Northwestern Transportation Company on September 26.—A. Looking back, I would take the Indian contract in preference.

Q. How would it be if you were contracting to do so next year; which would you regard as the most profitable for the contractor, the contract with the Quartermaster General's Department, or that with the Commissioner of Indian Affairs?—A. The mili-

tary contract is the best, and I would rather have it. Looking back now, I can see very well that there was more money in the Indian contract; but if I was going to contract without knowing anything of the future, I would take the military contract by all means.

Q. On what circumstances do you base your judgment?—A. Owing to the fact of our having had a remarkable season, so that nearly all the freight could have been carried by boat.

Q. Was this season unusual?—A. Certainly; the average time for closing navigation on the Missouri River is between the 1st and 15th of October.

Q. When this contract was made in the middle of September, could any human knowledge have foreseen the good fortune that followed in October and November?—A. I believe I could not have foreseen it.

Q. There was nothing to indicate it.—A. No, sir.

Q. Can you recollect such a season as the last during your residence in that country?—A. Yes, we have had one other season since I have been there that was very like this one. It must have been about 1860 or 1861. We had just such a fall; the river remained open until late in December at least.

Q. Do you think the contract of the Northwestern Transportation Company would have been a profitable one but for those favorable circumstances?—A. I would not have wanted it myself if it had been an ordinary season.

Q. Are you a dealer in flour?—A. Yes.

Q. To what extent?—A. I have bought and sold flour for ten years.

Q. Did you have anything to do with filling the Bosler contract for flour in August?—A. I sold Mr. Bosler some flour which was shipped to the agencies for him, about 23,000 sacks in all.

Q. How did you buy it?—A. I bought it in and around Sioux City. I bought some of it below Sioux City on the railroad. I bought some of it above Sioux City on the river. We sell flour for most of the mills around the city, as their agents. The first 5,000 sacks that I sold to Mr. Bosler we purchased a portion of the preceding March, and had on hand at the time.

Q. How did you fill this contract?—A. The second 5,000 sacks that Mr. Bosler wanted, I went to the mills and contracted with them to take all the flour they could make within a certain time, up to the 1st of October.

Q. Did you bind them up?—A. Yes; that they should not grind for anybody else but for me, so much so that some of the mills come to our store to get us to fill orders which they had contracted prior to making this arrangement with us, paying us more for the flour than we paid to them.

Q. Did you know at the time how much Mr. Bosler wanted?—A. I did not. My first sale to him was 5,000 sacks; then I sold him 5,000 more; and before that order was filled, he said he might want 5,000 sacks more; and we kept on that way, from time to time getting his orders for more flour, until we sold him 23,000 sacks.

Q. If it had been known at the time by you, and by the mills there generally, that 20,000 or 30,000 sacks would have been required, what effect would that have had upon the market?—A. If it had been understood that 25,000 sacks of flour were wanted, it would have raised the price of flour, and brought it very near to the rates for which it could be procured from Chicago, say $3 75 per 100 pounds. It would not have brought it up to that price exactly, but would have kept just inside of it, so as to prevent shipments of flour from Chicago.

Q. Did the quiet way in which you made your purchases have any effect upon the market?—A. Yes, sir; taking out that much flour left the mills bare, and left the merchants bare. One of the merchants came to me and bought some flour, giving me twenty-five cents advance on the price which I had paid to him on the same flour. He had his granary full of wheat at the time, but he could not get it ground, because the mills were working for me. The Chicago prices of wheat went up, and of course the city prices went up.

Q. What did you charge Mr. Bosler per sack?—A. Finally, in settling up, I charged him $3. I paid $3 myself for some of the flour, and $2 75 for quite a good deal of it.

Q. Would you make any difference between dealing with such a man as Bosler in the sale of flour, and dealing with the Government; if so, what difference would you make?—A. My experience with the Indian Department has not been very pleasant. I held a lot of their vouchers eighteen months, and could hardly get my pay then. I would rather sell cheap for cash to a man who I knew would pay on the day he promised, than sell on vouchers, and especially to the Indian Department.

Q. Do you regard Mr. Bosler as a man of prompt payment?—A. I do; I know him since 1857.

Q. What is his standing for business integrity, and character?—A. A number one, first-rate; none better.

Q. What is the difference between selling to a man who pays promptly and selling to the Government, where there is nothing but the customary delays in sending vouchers on to Washington and having accounts audited?—A. I would make twenty-

five per cent. difference in favor of a man who would pay promptly, and whom, if he failed to pay, I could sue. I would want to charge the Indian Department twenty-five per cent. more than I would Mr. Bosler, or a man like him. I am willing to admit, however, that my experience with Indian vouchers has not been quite so pleasant as it might have been.

Q. What do you have to pay for the use of money up there?—A. From one to two per cent. a month. A low rate is one per cent. The usual bank rate is two per cent.

Q. What would have been a fair margin or profit to warrant a prudent man in making a contract for 20,000 or 30,000 sacks of flour with the Indian Department at the time you have mentioned—do I understand you to fix it at twenty-five per cent?—A. What would be my rate, I should not want to do it for anything less. When we handle flour for merchants and people who pay promptly, our usual profit is twenty-five or thirty cents a sack. That is a fair wholesale profit; it is less than ten per cent.

Q. If the Commissioner of Indian Affairs had advertised for 20,000 or 30,000 sacks of flour, to be delivered at Sioux City in August and September, 1870, what would have been the effect on the flour market, and what would it have cost?—A. It would have cost me just inside the Chicago prices. For that quality of flour, it would have been in the neighborhood of $3 70 or $3 75. It would have cost that to bring it from Chicago, and we could have bought it just inside of that price. That is all that anybody would have done.

Q. Why would it have had that effect?—A. Because very few people thereabouts could handle 25,000 sacks of flour, and they should have fixed their price at that point.

Q. If you had known that Mr. Bosler wanted that amount of flour, could he have got it out of you at that price?—A. He could not. If I had not sold him the 5,000 sacks I had on hand, I would have got $3 50 for it, and in all probability a little over that.

By Mr. WELSH:

Q. Do you know Hiram K. Hazlitt, of St. Louis?—A. Yes, sir.

Q. Is he a clerk with the Northwestern Transportation Company?—A. No, sir, he is not. He is a steamboat owner, and a first-rate man.

Q. Do you know George H. Hazlitt?—A. I do.

Q. Is he a clerk with the Northwestern Transportation Company?—A. He is or he has been; I do not know whether he is now or not.

Q. Was he at the time the contract was taken?—A. I think he was. I know that he was about there.

Q. Did the Northwestern Transportation Company carry freight under both those contracts from St. Louis and Chicago and Sioux City?—A. I think not. They may have carried it part of the time, but they had a little misunderstanding, and they divided. Hazlitt's boats carried part of it, and Lord's boats carried the balance. What part they carried I cannot tell you; I know there was a division.

Q. Do you generally see the advertisement in the Sioux City papers?—A. I do.

Q. Did you know that the St. Louis contract was authorized to carry the Indian freight?—A. I did not.

Q. Did you see the advertisements for the military contract?—A. I did.

Q Did you propose for it?—A. No, sir.

Q. Did you or not observe that in that military contract all the Indian goods were included?—A. I did not.

Q. In advertising for this military contract, if they had restricted themselves to freight from Sioux City up the river instead of from St. Louis to Sioux City, would there not have been much more competition?—A. There would have been many more competitors.

Q. Would they not have been able to get freight by that competition at a more moderate rate by taking a separate contract from Sioux City up the river instead of coupling St. Louis with it?—A. Yes; the chances would be that way; but still there is another element that comes in. The trouble has been, heretofore, that certain parties there have had the advantage of the railroads and get a lower rate over the railroads than other parties can.

Q. Do you recollect, when I was at Sioux City, giving me these rates as fair rates—to Yankton agency in July and August, 50 cents; in September and October, $1; to Crow Creek, 30 per cent. advance on those rates, and to Cheyenne, 50 per cent. advance on those rates?—A. Yes, sir.

Q. Do you remember exhibiting to me the original bills and getting me to note down very minutely that you had purchased for Bosler 13,398 sacks of flour, in Sioux City, at $2 20; 5,219 sacks of flour, in Yankton, at $2 25; 4,812 at Missouri Junction, and that you had acted as Bosler's agent and charged him 10 cents a sack for labor, commission, &c.; and do you remember that I noted it down in your presence in a book and called the items off to you?—A. Yes, sir; I recollect it distinctly, all about it.

Q. Then about the matter of freight; it is in evidence that $1,493 88 was paid to you for freight from Sioux City to Fort Berthold, at 14 cents per pound, on July 13, 1870. Do you recollect the circumstances under which that was shipped?—A. I think that that was stuff we shipped in May to the agencies—agricultural implements, &c.

Q. Why was that high rate paid?—A. Because you could not get it up any cheaper. I know we shipped it by the first boat we could get. There were potatoes in that lot which should have gone up earlier, but we could not get boats to take them. I desire to say, in reference to flour, I bought some of that flour at $1 75 per sack—I mean some of the first 5,000 sacks that I sold Bosler—but I did not propose to sell it at $1 85, because I bought it in March and held it for four or five months. My contract with Mr. Bosler was in so many words: "Purchase, for me, 5,000 sacks of flour; charge me a profit, we will not differ about it; buy it as cheap as you can." I bought some of that flour at $2, some at $2 15, some at $2 20, and some at $3, and some at $5 75 per barrel, and I charged Mr. Bosler $3 per sack for it, as I had a right to do.

Q. Then why did you tell me that you would charge him $2 20?—A. Because I had not settled with him then.

Q. You gave me 13,000 sacks that you had bought for him at that time at $2 20, and 5,219 at $2 25; that makes nearly 18,600 sacks?—A. I still had 10,000 sacks to buy, and it was to my interest to keep the prices down. If people knew that I was getting three or four dollars a sack, it would have cost me more money. I offered you flour at $2 55 a sack, and would have been glad to sell it to you at that price.

Q. Do you know the price of flour at Omaha?—A. Yes.

Q. At Council Bluffs?—A. Yes.

Q. What was the price at that time?—A. It was from $2 to $3 a sack at that time, depending upon the quality of the flour.

By Mr. SARGENT:

Q. Suppose the bulk of the freight under the Indian Department contract for transportation had been shipped before the middle of September, what difference would that make; would it make the Indian contract for transportation better or worse than that of the Quartermaster's Department?—A. If the bulk of it had been shipped before the 15th of September, I would then rather have the Indian contract at those rates, a good deal.

Q. Suppose the great bulk of it had been shipped before the date of the contract, which was the 26th of September?—A. That would make a big difference, of course, for I would then have known that a certain portion of it was gone, and that that was all safe; but they certainly must have made the contract before that.

Q. Now, it is explained in evidence that the contract was made after a large portion went up the river, and that the rate applied to all that previous freight; how does that affect the matter, in your judgment?—A. That makes it a sure thing, of course, and then I would say that the military contract was right.

Q. So, as to the great bulk of the freight, there was no speculating on chances; it was a sure thing; but if it had to be shipped after that time, the river might be frozen up, and then you would consider the Indian contract not so favorable to the contractor; is that the way I understand you?—A. I think that is it.

By Mr. WELSH:

Q. Did not the boats under your care, the Miner and other boats, carry part of this Indian freight up the river?—A. I know that a portion of it was carried on the Miner, and a part on the Far West, and on several other boats, but what they got I do not know, for I do not own a cent's worth of stock in them.

WASHINGTON, D. C., *February* 1, 1871.

JACOB D. COX sworn and examined.

By Mr. SARGENT:

Question. Where do you reside?—Answer. At Cincinnati, Ohio.

Q. What position did you recently hold under the Government?—A. The position of Secretary of the Interior.

By General CHIPMAN:

Q. When did you enter upon the discharge of the duties of Secretary of the Interior?—A. In March, 1869.

Q. When did you resign?—A. I left the city on the 1st day of November, 1870; I was in office up to that time.

Q. Do you remember, after the passage of the act of April 10, 1869, creating a board of commissioners to assist in the administration of Indian affairs, whether the question came up as to their powers, and how it was settled, and what they were defined to be by yourself?—A. In the spring of 1869, when the board of commissioners were appointed, I believe their powers were defined by an Executive order signed by the President, which was made the basis of their authority, as I suppose, from that time up, until a new law was passed. That order was printed and copies of it were pretty freely distributed; they were sent to each member of the commission; I have not one myself, but I have no doubt it is in existence.

Q. Did that order issue prior or subsequent to any conversation had with members of the board as to the claims which they had made under the law, or right to exercise certain powers?—A. I do not know what I should say in regard to any claims made by any members of the board. This order was issued after more or less consultation with members of the board in regard to their duties, and getting their ideas pretty fully about them, and was substantially in accord with their wishes, as I understand, as well as the President's desire. (Witness shown printed copy of the executive order appended to this testimony, marked Exhibit A.) The order shown me is the one I refer to.

Q. Did you issue any instructions or inform the Commissioner of Indian Affairs with regard to his duties of recognizing the board in the exercise of their powers? if so, when, and if verbally stated, what they were?—A. I should say that this Executive order was fully known in its substance to the Commissioner before it was executed, and that he was consulted both by the President and myself with regard to it, and that his knowledge, therefore, was coincident with the drawing of the order itself; so that his assent may be said to have been part of the arrangement. Whether any subsequent specific instructions were given to him, I do not know, except that he had the order himself.

Q. You have no recollection of giving him special instructions?—A. No; I have no recollection about it.

Q. To what extent did this board aid your Department in the administration of Indian affairs, and did they always respond to your request for services by them?—A. The members of that board were all men who took the work upon themselves without pay, purely from their interest in it. It was the desire of the President, as well as of myself, to secure their coöperation for the purpose of having a medium between the Department, the Indian Bureau, and the moral and religious community, with a view of giving the Indian work a more philanthropic turn, if possible, than before, in the line of education, and to procure the sort of supervision and inspection of the work of the Department which would assist in making it what it ought to be. And any of these things the members of the board, every one of them, individually and collectively, always expressed the most ardent zeal in doing. Several of them, from ill health, were unable to give much attention to it from the beginning. One or two of them tried to be excused, or resigned on that account. They were urged to remain. Mr. Robert Campbell, of St. Louis, was one of that sort. His resignation was tendered on the ground that he was unable to go on with the work; but on the solicitation of myself, he consented to remain on the board, hoping to get more strength to do so. Mr. Tobey, of Boston, also tendered his resignation on the same ground. And two or three of them several times spoke of their resigning because of their inability, from ill-health or otherwise, to get on sufficiently with the work, according to their own idea of it. But they gradually became better acquainted with the duty itself, and made an organization at last which was intended to coöperate directly with the Department; hence much of their work was in the form of general consultation. From the beginning we endeavored to have an understanding that in the purchase of the annuity goods they should be present and take part, and have the inspections made under their eyes, for the purpose of seeing there was nothing improper done in that. During the year 1869 the supplies were got from the Commissary Department of the Army, by the orders of the head of the Department, in accordance with a consultation had with the President, and thus we thought we covered the two phases of the work. The purchases of the dry goods, &c., and the annuity goods were bought, and to be bought, under the inspection of the board of commissioners; the commissary supplies were obtained from the Commissary General of the Army explicitly, in order that there might be no opportunity for cavil or fault-finding in the work itself. In addition to the inspection of goods, the commissioners themselves agreed upon visits they were to make. They subdivided their board and mapped off the country where they would visit. Some of them went down into the Indian Territory particularly. A portion were to have gone up into Dakota; but owing to the sickness of Mr. Stuart, (who, after Mr. Welsh left the board, had that division in charge,) were unable to go. About that time Mr. Colyer came into the board, and he made an exploration in Alaska, of which he made a very interesting report. This was done not with the most rigid system in the world, but all with a view to the general purpose—first, of discovering what the Indian work was; what it ought to be; what evils there were in it; how they could be corrected; and then, by consultation with the Department in the performance of their duties, to correct them. As to the question, specifically, whether these gentlemen coöperated with the Department, I say they always showed the utmost zeal in their desire to do this work. Their reports which have been published show, I think, pretty fully what they did. I am speaking simply from memory.

Q. Did the Commissioner of Indian Affairs conduct the business of his Bureau under your supervision?—A. Certainly. The Bureau is a part of the Interior Department, and necessarily under the supervision of the Secretary.

Q. While you were there, during your term of office, did he consult you freely and

inform you fully in regard to Indian matters, and take your advice?—A. That was my supposition, of course. We were in frequent communication. General Parker secured, I think, very thoroughly the confidence of the President and myself with regard to his own earnest determination to carry on the business of the Bureau in accordance with those general principles that I have been referring to. His duties were naturally, necessarily, I may say, curtailed in some respects, his powers somewhat limited by this supervision of the commission, and the fear I had at the beginning was that it would lead to a natural antagonism between them. Therefore I noticed in that respect the indication of the general's feelings, and I must say that he seemed to be earnestly desirous of coöperating on this plan, and having it carried out fearlessly.

Q. Did you ever have any occasion during your administration to doubt his integrity and fidelity in the management of the affairs of the Bureau?—A. I have never had any suspicion of it in any way, nor any indication of it until I heard of this investigation.

Q. Am I to understand that you now have in that way?—A. No. I only speak of that as calling my attention to it. I have no opinion of this affair at all, and have never expressed any.

Q. Were his conversations with you regarding Indian matters such as to impress you that you were in possession of all the facts connected with the management of his Bureau?—A. That would be true to this extent: the head of the Department is not alone, of course, the head of the Bureau. The head of the Bureau must be held responsible for a faithful performance of the details of the work under such general directions as are given him. Now, I neither knew nor pretended to know the details of the work of the Indian Bureau; that would have been impossible without becoming actually the Commissioner. The Commissioner himself is responsible for the carrying out of the general directions which are given. When confidence is established in him then, of course, he is told to do under different circumstances the best he can, and to use his best judgment; and it would be only when he would bring up a matter for consultation that I would know of it. There might be a thousand things done of which the head of the Department could know nothing unless there was perfect good faith on the part of the head of the Department in bringing matters to him.

Q. And he might bring matters to your attention, and obtain your advice and direction, which would not enter into the records of your office?—A. If you mean by that to ask whether there was more or less of verbal consultation concerning which there was no record, it is true. It is necessarily true in every Department; and if nothing would be done except by written correspondence, of course but little would be done. There is a great deal constantly done about which there is verbal consultation only.

By Mr. SARGENT:

Q. Were you consulted with reference to a contract made on the 17th of June, 1870, prior to the passage of the appropriation bill, made with James W. Bosler for the supply of a large amount of beef, bacon, salt pork, flour, coffee, sugar, salt, soap, and tobacco, to be delivered on the Missouri River; a contract made without advertisement or competition?—A. In reference to any contract with Mr. Bosler, I can say I never heard of or saw the name of Bosler until this investigation commenced, and consequently I was not consulted in regard to any contract with him.

Q. Were you aware that a large amount of supplies were to be furnished under a contract of that kind, without any opportunity of consideration of the price by the Board of Indian Commissioners, or opportunity to inspect the articles?—A. I knew of no contract being made for any considerable amount of supplies at that time. I have endeavored to refresh my memory with regard to any intimation of purchases. My impression is that somewhere about that time General Parker stated as a fact that he was obliged as Indian Commissioner to make some temporary arrangements to get some supplies between the termination of the arrangement with the Commissary Department and his issuing of his advertisements. But there was never any consultation with regard to contracts further than such general statement as that.

Q. On the 10th of August, 1870, it is shown by the letter of Commissioner Parker in testimony, that he ordered Bosler at once to supply 1,500,000 more pounds of beef, net, to be distributed at the various agencies on the Missouri River, without making any contract therefor, or advertising so as to invite competition. Were you advised in that consultation, or were you consulted about it?—A. Not that I am aware of.

Q. Would you, where you knew it, allow very large amounts of supplies to be purchased for the Indian Department without advertising?—A. No, I should not. This thing, however, should probably be considered. In emergencies where there was danger of an outbreak, or where there was danger of starvation, I should regard it as within the power of the President to do what might be necessary to avoid an occurrence of that kind. As, for instance, I remember a case in which the ——— Indians were supplied for a considerable period by the Army, directly on the President's order, for the purpose of preventing destitution and starvation among them, where there was no other provision. And there has always been, as I have understood the action of the Indian Bureau, more or less of that kind of provision against temporary

emergencies. But the natural and the right theory, of course, would be that it is exceptional both in character and small in amount, and that would be the hypothesis. In this case I would say we had made our original arrangements with a special view to avoid the necessity of any purchases at all, if we could, in the first place. And then my understanding was that advertisements would be made just as soon as it was possible to do so after the law was passed.

Q. Do I understand you, in the case of a sudden emergency of that kind arising, that the President himself would order a supply through the Army to meet it?—A. In such a way, I should say, as his judgment would require, depending upon his being able to satisfy Congress that it was for the interests of the country; I simply want to say that a discretion of that kind had to be used occasionally, and I think is within the discretionary power of the President at a time like that to save what he considers a calamity.

Q. You would appeal to the President to exercise his discretion in such a case, rather than leave it to the Bureau officer?—A. That would be the exception. The President would, upon consultation, doubtless give his authority for doing what was necessary. But the discretionary power I regard as residing really there.

Q. After the passage of the appropriation bill on the 15th of July, 1870, the first contract entered into, (except the continuation of the Bosler contract, to which I have referred,) seems to be a contract with J. A. Morrow, on the 17th of September, 1870, for the supply of beef to the Indians on the Missouri River. An advertisement for that (in evidence) had been made, and the time for receiving proposals under that advertisement was afterward extended. Do you remember by whose order that extension was made?—A. Yes, sir; it was by mine.

Q. For what reason did you extend the order, and upon whose suggestion?—A. It is in connection with that that I remember about all I can remember of this matter. First, the law required the head of the Department to name the papers which should receive advertisements for different purposes. I called on General Parker to give me the names of the principal papers in the regions where he would like to have the advertisements made and the services performed, and the commercial centers. This he gave me. I then approved that list as the list in which he should publish when it was necessary he should advertise. This first advertisement was published, and it was in some way brought to my attention. It was within the province of the Commissioner of Indian Affairs to act upon it, and he had not submitted it to me, and there was no occasion that I know of that he should do so. It was the custom, and quite within his power, for him to determine upon the advertisement, and to publish it. It was also within the power of the head of the Department to interfere if he found a necessity of interference. When the advertisement was published, my impression is that a clerk in the Department called my attention to it, and I, in looking at it, came to the conclusion that the time was not sufficient for persons who might wish to make bids at Omaha or Sioux City to transmit bids from there to Washington after the advertisement should appear there. General Parker was then in New York, and one of the reasons why, perhaps, there was less of consultation at this time than at any other, was that he was in New York much of the period. As soon as the bill was passed making the appropriations, he went to New York with the commission to purchase the goods. I thereupon directed the chief clerk of the Bureau to telegraph the general there that it would be necessary to extend it; that I thought at least a week should be added to the time. He did so, and the time was extended in that way when the matter was brought to General Parker's attention. The general stated to me that he was, on the whole, confident that the parties who would naturally bid upon it would see it as it was, and that the short interval of time between its appearing in Omaha and in Washington was not a matter of material moment, although there was that appearance; for he had reason to believe that all the principal parties in the West, knowing that such things were to be done, were each watching for the advertisements, and that they would make their bids here, and all that country would be in fact represented. I remember I said it was not alone necessary that the thing should be in fact right, but it should be right on its face also. And, therefore, rather than have that appearance, I preferred to take the inconveniences that might arise from delay. I think at that time that Commissioner Parker's intimation to me was that there was inconvenience and perhaps loss in making delays, because it was important that the beef should be got, and the contracts given, as early as possible, to terminate all temporary arrangements that had been going forward.

Q. Do you know of any reason why the advertisement could not have been inserted a week or fortnight earlier?—A. None except that the general was in New York, busy with the purchases there, and having a good deal on his hands; I could see how, in the rush of work after the appropriation bill was passed, he might leave other matter unattended to for a time.

Q. But the appropriation bill passed on the 15th of July, and this transaction was in September?—A. The date of the contract is in September, but I think that must be some time after the bids were opened. I think so because the first week in September I went on my vacation, and the bids were opened before I left. General Parker was

gone through August; I think he left in July, immediately after the appropriation bill was passed.

Q. Was anybody left here to attend to the business of the Department?—A. Of course. The chief clerk is, by law, the acting Commissioner in the absence of the head of the Bureau, just as Judge Otto is Secretary in the absence of the Secretary.

Q. Was there anything to prevent his inserting it a week earlier?—A. Nothing that I know of, except that he seemed to hesitate to take the responsibility, and that was the case during the whole of Commissioner Parker's absence. I think it might be said that Mr. Cady was hesitating to take the responsibility, and consequently the general was attempting to do, by telegraph from New York, pretty much all the work.

Q. Do you know of any inconvenience that did arise from the extension of the time one week?—A. No; I do not. Nothing came to my knowledge.

Q. Was it brought to your knowledge that the bidders in the West were complaining of the limited time that that advertisement was published there—some three or four days?—A. I cannot recollect that it was. My impression would be that some one in the Department called my attention to it, and that it was there I gave the direction. I do not think it could have come from the West, because my calculation was, when I gave the order, that the advertisement was only just appearing at the West.

Q. If there were bidders at Omaha or Chicago who knew that the Department was going to issue proposals, and consequently would be ready to bid, would they be likely to send in their bids until they could see the advertisement and knew the terms which the Department proposed?—A. That was my theory, and on that I ordered it extended. But then the suggestion made to me was, that everybody was on the *qui vive*, or supposed to be.

Q. But if the parties in Omaha or Chicago did not have time, after the advertisement appeared there, to get their bids here, what advantage was it for them to be on the *qui vive* to bid?—A. You do not understand me. The statement I made a little while ago shows that the hypothesis was, that these western bidders were either represented in the East or were East themselves; that they knew at this season the contracts were to be let, and they had been watching your appropriation bills, and knew as well as those in the Department what was going on, and that they were here. Certainly, persons at the West would get no advantage unless they had time enough to send in their bids; and that was the theory on which I made the extension.

Q. Then I understand you that any one in the West who wanted to bid, who was not here in Washington, would not have had the opportunity?—A. That was my idea of it.

Q. Do you know, as a fact, that the successful bidder, Morrow, was not in Washington, but was in Omaha at the time?—A. I do not. I do not remember his name. I do not know where any of them were, except that I knew one or two were from Omaha, or somewhere out there.

Q. Without the extension which you gave, would it, or not, have given an advantage to persons who might be here upon the ground, to the exclusion of others?—A. I thought it would, and upon that hypothesis I ordered the extension. General Parker thought it would not, and that, everything considered, it was better to make the time short.

By Mr. WELSH:

Q. I understood you to say, in answer to a question of the chairman of the committee, that you had not been consulted, and had no actual knowledge of the special contract of the 17th of June with Bosler.—A. Yes, sir; I never heard of Bosler's name until since this investigation commenced.

Q. In other exigencies during your administration what course was pursued to feed Indians?—A. During the whole of the preceding year we had been getting our supplies from the Commissary Department, so that this question could not arise. The commissary arrangement terminated with the close of the fiscal year. If I remember right, this period, between, probably, the 30th of June and the time when these contracts were let by advertisement, was the only period (within that time) when we called upon anybody else except the War Department for supplies.

Q. I wish to inquire whether, before the passage of the law, you would, had you known it, warranted a contract to the extent of $362,000?—A. Well, that is a matter of judgment; I should want to find the circumstances peculiar, full of necessity, before I would make any contract that was not strictly warranted by the letter of the law. If an Indian tribe was, in my judgment, in danger of immediate outbreak or in danger of starvation, I should use every possible means to prevent it, and if I were confident that there was simply a delay in passing the appropriation bill, and had, from my acquaintance with the committee, full knowledge of the almost certain probability of its passing, I should, in a case of great emergency, at the head of the Department, feel like acting on that probability, but I should want to be very certain about it. But it is a case of discretion, where I would not like to draw very closely the line of what I would do or what I would not do, except that I should want to be very certain that I was acting in accordance with the necessities of the case, and of the almost certain action of Congress in regard to it.

Q. Did you grant that power to any of those under you?—A. That power never came up for discussion in any form that I know of, as such; it was one of those instances of discretion which was never, I think, distinctly discussed. The Indian Bureau has always been in the habit of making purchases, as I have understood it, when it was understood that the appropriation bill was prepared by the committee. They have made, if not direct contracts, they have made conditional contracts at different times, with the understanding that if the appropriation bill passed they could then call upon parties to act, in order to get them out speedily. That I remember having brought to my attention as having been the long-time practice among them, from the fact that when we began in March, 1869, there were arrangements already made for goods being purchased. I interfered and stopped some of these; I canceled contracts, and there was some trouble about it at the time, but it was then shown to me, and I think has been indisputably the fact, that, in order to meet the times of transportation on the river and to get goods out in time, there has been embarrassment constantly growing out of the fact of the lateness of the time of passing appropriations, and it has become the custom to make that kind of provisional arrangement that if the bill passed they would be required to furnish certain supplies; and if not, they would not. Now, that kind of discretion has been exercised in the Bureau. We endeavored to put an end to it; we endeavored to bring everything down to limits, and the formation of this board of commissioners was with a view to that—to get everything under that supervision and control so that there might be no possible question, and to get rid of these difficulties. And consequently, while I say that in a case of extreme necessity the President or the head of a Department can exercise a discretion, yet it should be done with great caution. The gentlemen of this committee will all remember that contracts of that kind were made by General Harney, and that there was great debate whether they should be paid or not. They were finally paid, on the ground that it was a matter of public necessity and the arrangement made in good faith.

By General CHIPMAN:

Q. You do not intend to say, in giving these opinions, that General Parker abused his power as an officer, or his discretionary authority, in making the provision he did, acting under the circumstances that he did, in 1870?—A. I do not express any opinion about it, because I do not know the facts. I have answered a hypothetical case put to me by Mr. Welsh. The fact is, I never learned anything about this contract specifically, until I learned it through this investigation.

Q. Did not you know there was an exigency upon the Indian Department as represented to you by the Commissioner?—A. There was a statement on his part of the necessity existing, which he was meeting in some form for the temporary needs of those Indians. But as to its extent or kind, I knew nothing whatever.

Q. That was left to his discretion?—A. It was, as I have stated. The fact was stated as such, and he was to act according to his best judgment. No specific case was brought up for my action.

By Mr. SARGENT:

Q. I understood you to say that a practice had grown up in the Department through a series of years, by which, in advance of the passage of the appropriation bill, advertisements would be issued, on even provisional contracts entered into, with the understanding that if the appropriation was not made, the contract should be void, and the articles not delivered or paid for. Do you know of any practice by which, in advance of the passage of the appropriation bill, it was agreed that the articles should be delivered or paid for on the receipts of the respective agents—a contract making no reference to the prospective passage of the appropriation bill, and in the entire absence of one?—A. No, sir. I do not know of any such case.

By General CHIPMAN:

Q. Do you say that the Indian Bureau has never made purchases without advertising; that the head of the Bureau has never exercised the discretion of making purchases to meet emergencies according to the view that he might take of them?—A. That is not what I have said.

Q. I do not understand you to say, do I, that the only form of contract which the Commissioner makes to meet these emergencies is a contract to be void in case an appropriation act is not passed?—A. We are now speaking of contracts made where there is no appropriation bill passed. Where there are appropriations made for trifling amounts, the agents have often been authorized to make specific purchases. As when an agent is not in communication with the outside world, that is an emergency. I have supposed the power existed and the office has exercised it. My familiarity with the office is not great enough to say how far they have gone. But I was speaking of large contracts for large amounts of supplies made without the usual forms.

Q. Would there be any difference in regard to the duty of the Commissioner to provide for the emergency in the case of the supply for a hundred Indians, or ten or fifteen

thousand; would not his action be the same, except proportionately large in one instance over the other? The quantity of supplies he would have to furnish under an emergency would not affect the question if he had to act, would it?—A. Of course it would only affect the caution with which he would proceed. Every man exercises more caution in great matters than in small ones, and persons often exercise a discretion in small matters that they might not in great ones. The question is simply what is best to do in the emergency.

Q. Then the Commissioner would have to determine that question for himself, or no one could in that matter?—A. Whoever the responsibility is upon must determine it for himself. In the larger matters of the Bureau we expect, of course, more consultation with the head of the Department or with the President than in little ones. If a matter should arise wherein the action of the Bureau might terminate in a war or not, although the responsibility might be with the Commissioner, yet we would expect a greater amount of caution and more consultation than in a less important measure.

Q. Did not the Commissioner consult with you in regard to the necessity of supplying these Indians along the Missouri River in June?—A. The Commissioner spoke, as I have stated, of his being under the necessity of making temporary arrangements for the Indians there; but I never knew anything with regard to any specific arrangement as to how it was to be done, or to what extent. The impression left upon my mind was that here was a temporary difficulty that he was contending with and trying to get along with until the appropriation bill was passed; but the specific means of meeting it was not presented to us.

By Mr. BECK:

Q. When such emergencies arose as required the action of the President to meet them, of which you have heretofore spoken, how did he usually meet them, by calling upon the Army or the Indian Department to meet them—for supplies, I mean?—A. Always, before the close of the last fiscal year, he had called upon the Army, because there had been a specific arrangement made with the Army that it should aid in supplying the Bureau. At this time, my impression is that General Parker's embarrassment arose out of the fact that the Commissary Department of the Army had notified him that they could no longer continue the arrangement. That was the basis of his trouble.

Q. Did the President, so far as you know, meet these difficulties through the Army?—A. Yes, sir. We had had no case before us in which there was any difficulty before. We had always called on the Army, and got the supplies from them. But if the Army were to be left out of the account, of course then the arrangement would have to be made upon another hypothesis, and that was the supposition, I understand, that existed—that the Army was to be left out of the case; that it declined to make the supplies.

By Mr. SARGENT:

Q. Was not the Commissary Department subject to the orders of the President?

A. Yes, sir; but when the President and Secretary of War had consulted, and the notice came from the Department that they must discontinue that arrangement at the end of the year, that *was* the President's action.

Q. But we are now speaking of an emergency where it required a special power coupled with an appeal to Congress.

A. Of course, in an extraordinary case, the President would be just as much at liberty to make an order in the one instance as in the other; and if he thought it was necessary for the Government service that the Army should make the supplies, he would issue such an order, undoubtedly.

EXHIBIT A.—*Executive Order.*

EXECUTIVE MANSION, *Washington, D. C., June* 3, 1869.

A commission of citizens having been appointed, under the authority of law, to coöperate with the administrative Departments in the management of Indian affairs—consisting of William Welsh, of Philadelphia; John V. Farwell, Chicago; George H. Stuart, Philadelphia; Robert Campbell, St. Louis; W. E. Dodge, New York; E. S. Tobey, Boston; Felix R. Brunot, Pittsburg; Nathan Bishop, New York; and Henry S. Lane, Indiana—the following regulations will, till further directions, control the action of said commission and of the Bureau of Indian Affairs in matters coming under their joint supervision:

1. The commission will make its own organization, and employ its own clerical assistants, keeping its "necessary expenses of transportation, subsistence, and clerk-hire, when actually engaged in said service," within the amount appropriated therefor by Congress.

2. The commission shall be furnished with full opportunity to inspect the records of the Indian Office, and to obtain full information as to the conduct of all parts of the affairs thereof.

3. They shall have full power to inspect, in person or by sub-committee, the various Indian superintendencies and agencies in the Indian country; to be present at payment of annuities, at consultations or councils with the Indians; and, when on the ground, to advise superintendent and agents in the performance of their duties.

4. They are authorized to be present, in person or by sub-committee, at purchases of goods for Indian purposes, and inspect said purchases, advising with the Commissioner of Indian Affairs in regard thereto.

5. Whenever they shall deem it necessary or advisable that instructions of superintendents or agents be changed or modified, they will communicate such advice, through the office of the Commissioner of Indian Affairs, to the Secretary of the Interior; and in like manner their advice as to changes in modes of purchasing goods, or conducting the affairs of the Indian Bureau proper. Complaints against superintendents or agents, or other officers, will, in the same manner, be forwarded to the Indian Bureau or Department of the Interior for action.

6. The commission will, at their board meetings, determine upon the recommendations to be made as to the plans of civilizing or dealing with the Indians, and submit the same for action in the manner above indicated; and all plans involving the expenditure of public money will be acted upon by the Executive or the Secretary of the Interior before expenditure is made under the same.

7. The usual modes of accounting with the Treasury cannot be changed; and all expenditures, therefore, must be subject to the approvals now required by law and by the regulations of the Treasury Department, and all vouchers must conform to the same laws and requirements, and pass through the ordinary channels.

8. All the officers of the Government connected with the Indian service are enjoined to afford every facility and opportunity to said commission and their sub-committees in the performance of their duties, and to give the most respectful heed to their advice within the limits of such officers' positive instructions from their superiors; to allow such commissioners full access to their records and accounts; and to coöperate with them in the most earnest manner, to the extent of their proper powers, in the general work of civilizing the Indians, protecting them in their legal rights, and stimulating them to become industrious citizens in permanent homes, instead of following a roving and savage life.

9. The commission will keep such records or minutes of their proceedings as may be necessary to afford evidence of their action, and will provide for the manner in which their communications with, and advice to, the Government shall be made and authenticated.

U. S. GRANT.

WASHINGTON, D. C., *February* 1, 1871.

CHARLES D. WOOLWORTH sworn and examined.

By Mr. CHIPMAN:

Question. Where do you reside?—Answer. At Sioux City, Iowa.

Q. How long have you resided there?—A. Three years.

Q. What is your occupation?—A. I am secretary of the Northwest Transportation Company.

Q. How long have you been engaged in transportation on the Missouri River?—A. I have been engaged with the present company three years. I was engaged two years before in transportation from St. Louis up to Montana.

Q. How extensively have you been engaged in this business?—A. The first year, at Sioux City, we employed eleven boats. Last year we employed about seven boats most of the time during the season; sometimes more, and sometimes not more than five.

Q. What is the nature of your business, Government and private also?—A. Our business last year has been almost entirely Government. The year before it was freights for Montana merchants.

Q. With what Departments have you had contracts?—A. With the Quartermaster, War, and Indian Departments.

Q. Did you enter into a contract with the Indian Department in September, 1870?—A. Yes, sir.

Q. When, where, and with whom did you arrange the terms of that contract?—A. It was in the month of August, in New York, with General Parker.

Q. Do you remember what time in August?—A. I cannot tell exactly. I think in the middle or along toward the latter part. I met him when he was buying annuity goods.

Q. Did you talk over the terms of the contract and arrange the freights with him at that time?—A. I gave General Parker my idea of what the rates would be, and I intended when I went to New York—when I saw him first—to try to close a contract then, supposing it was for the annuity goods, not knowing that it was a contract for as much freight, as I afterward ascertained. I then declined to close a contract with

him until I could go home. I was receiving telegrams from home with regard to the river, and cautioning me about making contracts for any amount of freight.

Q. In talking over the matter with him, were the suggestions you made in regard to freights and the rates as high as those that entered into the contract?—A. They were fully as high, and I think in some cases higher.

Q. What promise did you make in regard to forwarding freight that should reach Sioux City before the contract was finally executed?—A. After I declined to close the contract at New York at that time, General Parker told me that some annuity goods were there, about ready to ship, that he wanted to go right away. I told him I would go home, and send those goods forward if they arrived while I was there, at the rate I had stated in New York, or at whatever the contract was closed for.

Q. When did you finally execute the contract?—A. It was early in September. I intended or expected to either meet him when he came West or to send to Washington.

Q. Where was this contract executed?—A. The contract was not signed on his part until the latter part of September. I sent it to Chicago by the president of our company, Captain Lawrence, after I heard that General Parker was coming to Chicago, I think. I had an impression that he was coming to Sioux City, and held it there some time until I afterward heard that he was to be in Chicago.

Q. It was signed by you early in September, and sent on?—A. Yes, sir; I wrote the contract in the early part of September, intending to send it to him, but afterward found he was coming West, and so I retained it.

Q. It was executed by you in duplicate and sent on?—A. Yes, sir.

Q. Have you a copy of the original contract?—A. Yes, sir.

Q. Do you remember whether the blank date was filled up by yourself or left blank to be filled by the Commissioner?—A. It was left blank, and filled by him when he signed it. At least it was filled when it came back.

Q. Will you produce your copy?—A. I will. This is it.

[Mr. Chipman offered the retained copy of the contractor, showing that it is signed by E. S. Parker with dark ink, and the date filled in with the same kind of ink, and the body of the instrument written in violet ink.]

Q. Was your company interested in any Government contract for carrying freights this last summer?—A. Yes, sir.

Q. What one?—A. We own an assignment of a contract in the name of George K. Hazlett, for the transportation of Government supplies from Chicago to points on the Missouri River, on through bills of lading to points above Sioux City.

Q. Examine the provision of that contract, and state whether you would have been obliged under that to carry freight for the Indian Department, (those goods and supplies which your company carried,) and if not, why not?—A. This contract is only for goods shipped by the Quartermaster's Department from Chicago, on through bills of lading. It has nothing to do with this freight. That contract had nothing to do with this freight.

[Witness read the provisions of the contract referred to.]

Q. Were you interested in what is known as the Hiram K. Hazlett contract?—A. That was another contract. The Quartermaster's Department had two contracts, one from Chicago, and one from St. Louis. We were not directly interested in that contract of Hiram K. Hazlett.

Q. In what way were you connected with it?—A. We made an arrangement with Hiram K. Hazlett to carry freight for him under that contract, at the contract rates, less fifteen per cent. commission.

Q. Did you carry freights under that contract in that manner?—A. Yes, sir.

Q. Are you familiar with its terms?—A. Yes, sir.

[A letter from the Quartermaster General, dated January 31, 1871, addressed to the chairman of the committee, giving a list of distances from Sioux City to different points on the Missouri River, was offered in evidence, and is appended to this testimony, marked Exhibit A.]

Q. Under your contract with Commissioner Parker, to what date were you bound to carry freights?—A. It embraced freights up to the 1st of January, 1871.

Q. Was the quartermaster's contract with Hiram K. Hazlett more advantageous to the contractors than the one made by Commissioner Parker with you?—A. I consider it so.

Q. Why?—A. Under the quartermaster's contract large rates—full rates—were paid for way freight. There were soldiers, and the transportation of wagons, horses, and mules, and they would pay a much larger rate than common freight; and there were very often down-stream freights, by which the boats could double their receipts. The freight under that contract—the bulk of it—was shipped during the best months of navigation.

Q. How was it with Commissioner Parker's contract in that respect?—A. The freight under that contract was shipped late in the fall.

Q. And was liable to go to what month?—A. The expiration of the contract was the 1st of January. There were no down-stream freights under that contract; nothing but up-stream freights; no way freights included; nothing but up-stream freights.

Q. Under the Hiram K. Hazlett contract, do you remember any instances where you started on a trip with freight that would not be a paying one, and, if so, what was the result?—A. I remember one instance of sending the steamboat Bertha up the river with a less receipt than would pay her expenses to the point named. But under this contract, she might have troops to carry from one point to another, as well as supplies and stores, and bring troops down. And it was a frequent occurrence for boats going up to change supplies from one post to another. That is what those rates were provided for.

[Witness shown a tabular statement of the rates of freight under the H. K. Hazlett contract, which is appended to this testimony, marked Exhibit B.]

Q. Am I to understand from this tabular statement that the rates shown for way freights are the amounts paid for the distances as shown in the same table?—A. Yes, sir.

Q. Was or not this part of the contract favorable or otherwise to the contractor?—A. The way freights, so far as my knowledge has been, are always taken into account in making up the other rate to the principal points; that the way freights are much larger, and go to make up a better rate on the other freight; that it is an advantage on a contract; soldiers are a very large advantage on a contract.

Q. What is the advantage of having soldiers, and cattle, and things movable?—A. The advantage in having soldiers is that you can load a boat with about all the freight you want to put on her, putting the freight in the hold, and then putting two hundred troops aboard of her is no disadvantage at all. If you run on a bar the soldiers can get off and walk around, and they are of great assistance on the boat if they are under discipline, and the receipts from the transportation of soldiers are always large.

Q. In making bids for transportation with the Quartermaster's Department, have you heretofore had reference to representations made by Government officers that the bulk of freights would go up in the early months?—A. We did this year—for 1870.

Q. In 1870 that was taken into consideration?—A. Yes, sir. We lost before for that reason, and before we bid on these contracts we had an interview with General Rucker, and were assured that this year he would not burden us in that way; that the freight should be hurried off, and come in under those contracts, on the early months.

Q. How does that affect your rates, as shown in this Hazlett contract, for the late months; are they as high as they would be otherwise?—A. The estimate on that contract is made by adding the rates of each month together and dividing it by the number of months for which it is bid for, taking the average. When we bid, we were assured there would be little or no October freights; hence we did not put the rates high, because we were afraid of raising the average on account of competition.

Q. What am I to understand from you in regard to those October freights, with reference to their being put at a higher price?—A. I would say that a man bidding on that contract, understanding the business, if he had no assurance that he would have little or no October freights, he would make it higher.

Q. If he had a large bulk in October, what would be the result?—A. In ordinary seasons, he would lose a good deal of money. We had as good a rate as that before; but last year I do not think any money would have been lost under that contract, perhaps—that is, 1870.

Q. Did you ever make a contract with the Quartermaster's Department as late as September in any other year than 1870?—A. Yes, sir, we have had special contracts each year we have been there with the Quartermaster's Department.

Q. Did you make any contract in 1868 with reference to freights to Fort Rice?—A. We made a contract in 1868 with Captain Rodgers, quartermaster at Sioux City, for a late trip to Fort Rice. My impression is that the boat left about the 5th of Ootober.

Q. How near is that to Grand River?—A. Grand River is ten miles below Fort Rice. We got eight cents for that.

Q. Did you make a contract in 1869?—A. Yes, sir; with Captain James Gillis' quartermaster at Sioux City. We made that contract in September—I think about the middle of September—to Fort Buford. We got 8 cents for that.

Q. Where is Fort Buford?—A. It is above Berthold—250 miles above.

Q. Did you carry any private freights at that time?—A. Yes, sir.

Q. What freights did you get?—A. Ten cents.

Q. Was that contract let upon proposals?—A. It was.

Q. Do you remember any instances of starting boats as late as in August, 1869?—A. Yes, sir. We started two boats to Fort Benton in August.

Q. How loaded?—A. Loaded light with Government freight, under a contract we had with the Quartermaster General.

Q. How far did those boats go up?—A. To the mouth of Milk River.

Q. Where is that?—A. I think about four hundred miles above Fort Buford.

Q. What time did they reach there?—A. About the 1st of September.

Q. What was the result of that trip?—A. The water was so low that the boats could not go any further than the mouth of Milk River. There they put their freight ashore, and the captain divided the crews, and left part of them there with the freight, and sent the boats home.

Q. How were they at last delivered?—A. The captain sent a messenger to Fort Benton and got an ox train of a hundred wagons, and hauled the freight up to the fort from there.

Q. What was the result of that operation financially?—A. The company lost $20,000 on the two trips.

Q. Was there, in this Commissioner Parker contract of 1870, any bond issued by you?—A. Yes, sir.

Q. What are generally some of the risks of navigation on that river?—A. We consider that above Sioux City, during the good months, there is very little risk. During the later months boats are detained very seriously by winds.

Q. How do they operate?—A. We have had instances of boats lying at the bank three days, being unable to get out of a bend on account of the wind holding them there. This occurs early in the spring and late in the fall. During the summer there is no wind. We estimate for one-half more time on account of these winds. Then again the water gets very low. The water begins to go down about the 1st of September, so that boats drawing three feet will have trouble. With one of our boats one hundred tons of freight will put a boat three feet, easy.

Q. How about ice?—A. For a boat going as far as Forts Rice or Stevenson, the risk of being kept in the ice is very great. Three years ago there were five steamboats frozen in the ice. They were scattered from Fort Randall to Grand River.

Q. At what time?—A. Year before last they were caught there, I think, about the first of November, just according to their location.

Q. What amount of insurance do you have to pay on boats?—A. The rate is 25 per cent. risk on hulls. We insured ourselves last year.

Q. Did you lose a boat during the execution of the Parker contract?—A. Yes, sir.

Q. What was her value?—A. She was valued at $10,000, but cost more.

Q. How did you deliver what freight you saved?—A. We sent another boat to her. The crew saved about half her cargo—saved her deck cargo, put it ashore, and we sent up another boat, which delivered it.

Q. At what cost?—A. It cost us $1,000, I should estimate, over the receipts.

Q. What time did the river close in 1868-'69, practically?—A. At Sioux City it closed on the 17th November.

Q. Do you mean by that it was frozen over?—A. Yes, sir; ice stopped running in the river.

Q. At what time did navigation close there practically?—A. That depends upon what point you wanted to send to.

Q. Say Cheyenne, in 1868-'69?—A. I should say the 10th of October.

Q. You think it would not be safe, at ordinary seasons, to undertake to go to Cheyenne after the 10th or 15th of October?—A. We sent a boat that year to Fort Rice that got back; I think she left about the 5th of October. I should say from the 10th to the 15th of October, in ordinary seasons, navigation closes.

Q. How did 1870 compare with 1868-'69?—A. It was an entirely different season; we had a rise on the river the 1st of October. Such a thing was never known there before; we had a very open, late fall. There were thirty or forty days more navigation than the year before.

Q. What would have been the result in carrying out this Commissioner Parker contract if the ordinary season had happened instead of this favorable one, as it turned out to be?—A. If we had the freights get to us as late as we did this year, and had the same season we had in 1868-'69, we could not have delivered them.

Q. Could the Government have obliged the contractor to have taken this freight that you carried for Commissioner Parker, under the H. K. Hazlett contract that we have already referred to?—A. No, sir.

Q. Why not?—A. Because under that contract the contractor has ten days' notice, and the contract expired the 31st of October. There was no contract existing after then.

Q. Then you deduct ten days from the 31st for notice that the contractor was entitled to?—A. Yes, sir.

Q. If you were contracting to-day for freights up the Missouri River for the year 1871, and having the same amount of freight to carry under the Hazlett contract with the Quartermaster General, from St. Louis, and one similar to the one executed with Commissioner Parker, which would you regard as the most profitable, and which would you rather take?—A. I should like to enter into a contract like that of H. K. Hazlett's, but I would not enter into a contract like the one with Commissioner Parker to-day, for the same amount of freights, and take them the same season of the year.

Q. You would not enter into such a contract to-day?—A. No, sir. I refused to do it at New York until I was satisfied we would probably have a better season than the year before.

Q. I notice in one of the vouchers some of the freights were shipped prior to the execution of the contract, that is, prior to the 26th of September.—A. I have explained

that. I arranged with Commissioner Parker that I would send those freights from Sioux City immediately on their arrival.

Q. I notice in one of these vouchers also some freights for a small amount, shipped in April and May, 1870, that were paid for on vouchers, in connection with this contract. Will you explain about that freight?—A. I contracted for that freight.

Q. With whom?—A. With Major Clifford Culver, the Indian agent. He was at Sioux City, on his way to the Indian agency. He had no money to pay for freights, and I was either to collect from the Department the rate we had the year before, or, if we had a new contract, to put it in at that.

Q. Were the rates the year before more than you charged in this voucher?—A. Yes, sir. I made the rates for horses, mentioned in those items, from the Hiram K. Hazlett contract.

Q. There are in evidence certified drafts or Treasury warrants, issued in payment of these transportation services, payable to your order, indorsed by you to J. W. Bosler, and by him to Jay Cooke & Co. Will you explain that transaction, how Bosler came to have anything to do with it?—A. Mr. Bosler was at Sioux City superintending the shipment of his flour for the Indian Department, for which he had a contract. He found that to collect the pay for his flour he had to present the agent's receipts on the bills of lading. He wanted I should appoint some one in the East to whom I should send these bills of lading, and he could collect for the flour the same time I did the freight. I suggested that he should take the bills of lading on and collect them, and I would send him my receipted bills of lading, provided he would collect them for me without expense, and deposit the money. I gave him written authority to write my name across the drafts; and Bosler was to be there and collect his claim for flour, and at the some time facilitate the collection of my freight.

Q. He made the collection for you in that way?—A. Yes, sir.

Q. Had he any interest, direct or indirect, in this transportation contract?—A. Not at all.

Q. Had he any interest in these drafts that he collected for you?—A. No, sir. He asked me, the first draft he collected, to let the money lie to his credit, if I could, for twenty days, until he could get some money for his flour. I think he had the use of the money for fifteen or twenty days. I then telegraphed him that I must have the money, and he telegraphed me that he had deposited it in New York. I considered the use of the money was equivalent to the trouble he had in collecting and attending to my business.

Q. What is Bosler's standing in your community for business integrity and character?—A. I guess as good as anybody they could find. He has the reputation of being perfectly reliable, and a man of means.

Q. Had Commissioner Parker any pecuniary interest, direct or indirect, in your transportation contract with him?—A. He had none.

Q. Did any one have outside of your company?—A. Not outside of the stockholders of our company.

By Mr. SARGENT:

Q. You have examined this contract of George K. Hazlett?—A. Yes, sir.

Q. Have you an interest in it?—A. Yes, sir.

Q. How did you acquire an interest in it?—A. The contract was assigned to our company by Hazlett.

Q. For what consideration?—A. The sum of $1.

Q. Your company has carried out that contract?—A. Yes, sir; our company gave the bond for Hazlett, the stockholders of our company going on the bond.

Q. I suppose, in fact, Hazlett bid for your company?—A. Yes, sir.

Q. I find attached to your contract no such schedule as the one attached to the Hiram K. Hazlett contract.—A. We had no freight under that contract except that freight started from Chicago. We could not claim a pound of freight at Sioux City or above Sioux City, under that contract. The prices under this contract were as low, or even lower, than those under the Hiram K. Hazlett contract. On the average they are at least as low. On this contract the rates are from Chicago through. I mean to say that from Sioux City to the Yankton Agency, the prices under this contract are at least as low as from Sioux City under that contract of Hiram K. Hazlett's.

Q. What was the rate from Chicago to Sioux City by rail?—A. We paid 62½ cents.

Q. Then, taking off the difference, is not the average about the same for transportation to the different agencies under the two contracts?—A. Yes, sir; about the same.

Q. Under this contract there is no provision for those way freights you refer to?—A. No, sir.

Q. Then the criticism you make on the Hiram K. Hazlett contract does not apply to the George K. Hazlett contract?—A. No, sir; that contract does not have the advantages of the way freight.

Q. And yet you have the assignment of this contract, and the carrying it out?—A. Yes, sir.

Q. You say that Indian goods could not be shipped under the George K. Hazlett contract because they were required to be carried through on through bills of lading?—A. Yes, sir; that contract applies to freight on through bills of lading only.

Q. Could you not make a contract to carry them?—A. Yes; up to the time the contract expires.

Q. But there is no difficulty in the way, under the H. K. Hazlett contract, of carrying Indian goods if it was for the advantage of the Government to carry them for higher rates?—A. My explanation is, that in my answer before I said that these Indian goods could not be carried under that contract, because they were not ready at the time this contract expired.

Q. What Indian goods do you refer to?—A. Flour, principally.

Q. What month was it shipped in?—A. Shipped in the latter days of September, in October, and the first days of November.

Q. How about all the freight that was sent before you made any written contract, commencing in June and extending down to the 26th of September?—A. We shipped a lot of goods to Berthold, but nothing until in September.

Q. How much flour before the 26th?—A. I should think two or three cargoes.

Q. How much was shipped in November?—A. I could not tell positively.

Q. As much as there was in September?—A. Yes, sir.

Q. More?—A. I should think about the same.

Q. How much was shipped in December?—A. None.

Q. Who was the contractor to furnish that flour that was shipped in November, or other goods?—A. Mr. Bosler.

Q. Do you know of any reason why that flour could not have been sent up in August or September?—A. No, sir. We sent the flour as fast as it was furnished to us.

Q. How much did you send in October?—A. I think we sent 800 or 1,000 tons.

Q. Was the great proportion of it after the signing of the contract?—A. Yes, sir. I should think three-quarters of it.

Q. Was the most of that freight flour, and articles of that character?—A. Yes, sir; flour and bacon.

Q. Do you know of any reason why those goods could not have been earlier on the ground to be shipped when freights were reasonable?—A. I have no means of knowing. I do not know when they were bought.

By Mr. WELSH:

Q. Did the company authorize you to empower Mr. Bosler to sign in your name as secretary of that company?—A. The president of the company and myself consulted about it, and we both agreed to it.

Q. Are you not aware that Indian goods could have been shipped on either of those contracts?—A. Any Indian goods delivered to us at Chicago, I suppose, we should have been obliged to carry under that contract.

Q. Then what is your understanding of these contracts as to time? When Indian goods are delivered to you on the first day of September at Chicago, you date it from their receipt at Chicago; and when delivered to you the first day of September at Sioux City, you date it at Sioux City?—A. Yes, sir.

Q. Then the date is from the time these goods are delivered to you as being ready for shipment?—A. Yes, sir; but they have got to give us ten days' notice. They cannot come to us with goods without notice.

Q. But that ten days' notice could have been given ten days before the time of receiving the goods?—A. Yes, sir.

Q. How many offers did your company make in their own name, or their clerk's, or other people, for that Chicago contract?—A. They made two.

Q. Two only?—A. Yes, sir.

Q. One in their own name and the other in Hazlett's name?—A. Yes, sir.

Q. Do you know what the difference was between the offer in their own name and the offer in the name of Hazlett, who, I understand, was a clerk?—A. I do not know.

Q. What are called "straw bids?" Did you ever hear the term?—A. Yes; it is rather familiar.

Q. What does it mean exactly?—A. Well, I should say it means a bid a man don't intend to fill, in order to sell out.

Q. Did they not give named securities each time?—A. Yes, sir.

Q. In this bid that H. K. Hazlett gave, I find these names; will you tell me who they are? H. E. Cutting.—A. I do not know him.

Q. Do you know W. J. Koontz?—A. Yes, sir; he is a relative of Mr. Hazlett.

Q. Is he a clerk of his?—A. No; he is a steamboat man.

Q. C. M. Seaman; who is he?—A. I think he is a steamboat man in St. Louis.

Q. Joab Lawrence is your president?—A. Yes, sir.

Q. Barton Able; who is he?—A. He is a very extensive steamboat man in St. Louis, or has been in years before.

Q. When you were in New York, did you see De Witt Clinton Wheeler?—A. I did.

Q. Did he ever speak to you about this contract touching the transportation of Indian goods up the Missouri River?—A. I presume he did.

Q. Has Bosler an interest in his brother's house in Sioux City? Is he partner or capitalist?—A. I do not know any brother of his in Sioux City. He has a brother living at Lamars, near Sioux City. He is a stock-raiser out there.

Q. You do not know whether he had any interest?—A. I do not know anything about their matters.

Q. Had you any talk with General Parker, ever, about carrying Indian goods under these contracts?—A. No, sir.

Q. When you made a bargain with him for specific work, did you notify him that there was already a contract for carrying Indian goods?—A. No, sir.

Q. The rate you speak of, 62½ cents, did that cover dry goods from Chicago to Sioux City?—A. Our rate was a round rate, for rough goods and all. The contract was originally 75 cents, but was reduced to 62½ cents.

Q. Have you any notice here or there as to the time these goods were ready for shipment in Sioux City?—A. No, sir.

By Mr. CHIPMAN:

Q. State whether your answers as to the amounts of freights and time of shipment are from memory, and whether the vouchers will show the exact facts.—A. My statements are entirely from memory. I never have made any estimate with regard to them. I know that the bulk of our work was in October. We delivered a good deal of freight in November.

EXHIBIT A.

QUARTERMASTER GENERAL'S OFFICE,
Washington, D. C., January 31, 1871.

SIR: As requested by General Parker, Commissioner of Indian Affairs, per General N. P. Chipman, I respectfully submit herewith a list of distances from Sioux City to different posts on the Missouri River, used in the examination and settlement of officers' accounts at this office, viz:

	Miles.
Sioux City to Yankton agency	142
Fort Randall	246
Whetstone agency	271
Brulé agency	391
Crow Creek agency	402
Fort Sully	481
Cheyenne agency	546
Grand River agency	661
Fort Rice agency	771
Stevenson	935
Berthold	946
Buford	1,201

Very respectfully, your obedient servant,

M. C. MEIGS,
Quartermaster General, Brevet Major General U. S. Army.

Hon. A. A. SARGENT,
Chairman Sub-Committee of Appropriations,
House of Representatives, Washington, D. C.

EXHIBIT B.

October freights, per hundred pounds, under Hiram K. Hazlett's contract with the Quartermaster General, computed from contract for March 20 *to October* 31, 1870, *inclusive.*

Sioux City to Yankton agency	$2 25
Fort Randall	2 25
Whetstone agency	3 00
Lower Brulé agency	3 30
Crow Creek agency	3 75
Fort Sully	3 90
Cheyenne agency	4 80
Grand River agency	4 80
Fort Stevenson	6 00
Fort Buford	6 75

Fort Berthold is between Stevenson and Buford. Quartermaster General's contract had no rate to Fort Berthold. The rate would be governed by rate to next point above Berthold, which would be Buford.

Rate of freights, per hundred pounds, under contract of Northwestern Transportation Company with Commissioner Parker, dated September 26, 1870, for September, October, November, and December, 1870.

Sioux City to	Yankton agency	$2 25
	Whetstone agency	3 25
	Lower Brulé agency	4 25
	Crow Creek agency	4 25
	Cheyenne agency	5 25
	Grand River agency	6 25
	Fort Berthold	7 50

Transportation contract of March 25, 1868, from April 1 to October 1, 1868, between Northwestern Transportation Company and N. G. Taylor, Commissioner of Indian Affairs; rates per hundred pounds.

New York City to	Yankton Agency	$7 72
	Whetstone agency	7 72
	Brulé agency	7 72
	Crow Creek agency	7 72
	Cheyenne agency	8 72
	Grand River agency	8 72
	Berthold agency	10 72

The average railroad rates from New York to Sioux City were $2 60 per hundred pounds, which, deducted from this table, shows as below:

Sioux City to	Yankton agency	$5 12
	Whetstone agency	5 12
	Brulé agency	5 12
	Crow Creek agency	5 12
	Cheyenne agency	6 12
	Grand River agency	6 12
	Berthold agency	8 12

Yankton, Whetstone, Brulé, and Crow Creek agencies are between Sioux City and Fort Sully; Cheyenne and Grand River are between Forts Sully and Rice; Berthold is between Fort Union and Muscleshell.

Commissioner Parker's contract of May 13, 1869, is at same rates as contract of Commissioner Taylor for 1868.

Rates paid under contract with same company, September 20, 1870, for September, October, November, and December, 1870.

Sioux City to	Yankton agency	$2 25
	Whetstone agency	3 25
	Lower Brulé agency	4 25
	Crow Creek agency	4 25
	Cheyenne agency	5 25
	Grand River agency	6 25
	Berthold agency	7 50

Rates paid, per hundred pounds, for transportation of way freight under Hiram K. Hazlett's contract with the Quartermaster General, computed from contract for March 20 to October 31, 1870.

	March to July, inclusive.	September.	October.	Table of distances.	Table of distances from Sioux City to—	River distances.
				Miles.		*Miles.*
Sioux City to Yankton agency	$0 75	$1 50	$2 25	142	Yankton agency ...	142
Yankton to Randall	75	1 50	2 25	104	Fort Randall	246
Randall to Whetstone	95	1 90	2 85	25	Whetstone agency .	271
Whetstone to Brulé.....	1 00	2 10	3 00	120	Brulé agency..... ..	391

Stevenson to Buford	1 50	3 00	4 50	455	Fort Berthold.....	946
					Fort Buford	1,201

WASHINGTON, D. C., *Wednesday, February* 1, 1871.

WALTER A. BURLEIGH sworn and examined.

By the CHAIRMAN:

Question. Where do you reside?—Answer. I live at Bonhomme, Dakota Territory.

Q. What official position have you recently occupied?—A. I was a delegate from Dakota in the Thirty-ninth and Fortieth Congresses.

Q. What is your present occupation?—A. I am a farmer.

Q. Have you dealt in cattle with the Commissary or Indian Departments, on the Missouri River?—A. Yes, sir; somewhat.

Q. You had contracts with them to what extent, and when?—A. I had a contract with the Commissary Department in 1869, and I had a contract with Mr. S. M. Janney, last year. My contract, in 1869, was to furnish supplies for the Indians on the Missouri River, during the month of July, I think. And in 1870 it was to furnish supplies, for one year, for the Santee Sioux, and commenced on the 1st day of November.

Q. Have you bought any cattle in Texas, to be delivered in Dakota this year—1870?—A. Last January I went to New Orleans, and telegraphed from there to Texas, and had a gentleman meet me at New Orleans, and made an arrangement by which he was to drive me 3,500 head.

Q. Where were they to be delivered?—A. He was to deliver them on the Missouri River.

Q. At what point?—A. I think at any point below Fort Randall; not above Fort Randall, and I am not quite sure it was above Yankton.

Q. What was he to deliver them to you for, gross weight?—A. I was to advance him $2 45 per hundred pounds, gross, upon the cattle, and he was to have one-half of all that was made out of them over and above that; and I was to attend to the business in Dakota.

Q. What would that be equivalent to per pound—as a reasonable business proportion?—A. Do you mean net beef?

Q. I mean gross.—A. That depends upon what we sold them for.

Q. Well, state about the amount.—A. I cannot say; it depends wholly upon the price they brought.

Q. Did you make an offer to the Indian Department, in 1870, to furnish cattle at the different reservations on the Missouri River; if so, at what price, and at what time in 1870?—Q. Some time in March, 1870, I wrote a letter to Mr. Covode, who was my friend here, in which I proposed that if the Indian Department would make the negotiation with me in season to enable me to put up my houses and corrals, cut hay, &c., I would undertake to feed the Sioux Indians on the Missouri River, on beef, at four dollars per hundred pounds, live weight, or eight dollars per hundred pounds, dead weight. I sent the letter to Mr. Covode, and he took it to the Indian Office, received a reply from Acting Commissioner Cady, and transmitted it to me.

Q. Did you preserve that reply?—A. I think I have it.

Q. Have you that reply with you now?—A. No, sir.

Q. Did they accept your offer?—A. Mr. Cady wrote me that they were not in funds, and the money had not been appropriated, and the matter dropped there. I was not prepared to go into the credit business for the Government to the extent it would require, and I never looked after it. I got the letter in return; my letter was replied to some time in April.

By Mr. WELSH:

Q. Did you write to Commissioner Parker during the last summer making any offer?—A. No, sir; only the offer I spoke of; that was the only occasion on which I wrote. I never wrote after that.

Q. What do you consider a fair difference between delivering a herd of cattle entire, immediately on their receipt, and keeping them at your own risk and expense on the Missouri River for delivery at any time during eight months, including the winter season—that is, as a fair business transaction?—A. I cannot give an opinion on that. The cattle lose in winter and gain in summer. I never did anything of the kind. I never kept any cattle except at home when I was feeding the Sioux Indians.

Q. If there were proposals in two ways for the coming year—one for the cattle to be received immediately as they reached the banks of the Missouri; the other proposal for the contractor to keep them at your own risk and expense, delivering them weekly or monthly, as the case might be, what difference would you make in your bills between the two ways of furnishing them?—A. I do not know; I never figured it up. Of course, if they would take all the cattle off my hands at once I would rather they would do so; but, as I remarked, I never had any experience in keeping them up there, except at my own place, and there I am prepared for keeping them. I never had any experience beyond that.

Q. This beef that you delivered under a contract to the Santee Sioux, was it good or common beef?—A. It was good beef—Texas beef.

Q. That was at the rate of $7 22, net weight, which is $3 61 gross?—A. Yes, sir; that is what I took the contract for.

By Mr. CHIPMAN:

Q. To what extent did you furnish beef to the Santee Sioux?—A. About five thousand pounds a week; some weeks a little over, and some weeks not so much.

Q. Such as you were able to furnish from your own farm?—I butchered nearly all of those on my own farm. I killed the beef in the fall and froze it. I purchased my cattle, and when the cold weather come on I invariably killed them and froze the beef, and had no difficulty in keeping it through to the spring in that way.

Q. And you delivered it at $7 22 net?—A. Yes, sir; that was my contract.

Q. Where is the Santee agency?—A. It is about six miles by the road, above my house, on the opposite bank of the river; in a direct line I suppose it is about five miles from my house.

Q. Is it one of the lower agencies?—A. It is the lower agency, until you get down to the Omahas or Winnebagoes. It is a very little above the town of Bonhomme.

Q. Were there advantages to you in being able to deliver in this manner, butchering on your own farm, and delivering as you did, over having to purchase in open market?—A. I had the cattle on hand—a mixed herd—and did not want to keep them. I had my men employed by the year; and by butchering them I could save the hides and tallow. It cost me very little, for we butchered in a short time.

Q. Did you turn in cows, too, in that contract?—A. Yes, sir; cows, calves, yearlings, and steers—everything.

Q. You say your proposition made in Texas was not carried out?—A. No, sir.

Q. I notice in the papers here that you furnished the Santee agency flour also. At what rate was that?—A. I think it was $3 35 per sack.

Q. To what extent did you furnish flour?—A. I believe it took about twenty-six hundred sacks during the year.

Q. Such as you could get there in the neighborhood?—A. I bought a good deal of it in Yankton, out of the wagons, and some at the nearest mills in Dakota, and the balance I bought in Nebraska, below the agency.

Q. You spoke of having furnished the Commissary Department in 1869. At what rate was that?—A. I got five and a half for the beef, or eleven cents net. That contract I made with General Clark, of Chicago.

Q. Are you somewhat familiar with the flour market along the Missouri River?—A. I have bought a good deal there during the last ten years.

Q. What would be the effect upon the flour market if an immediate demand was made, (and it was publicly known, by advertising or otherwise,) say, for 20,000 or 30,000 sacks to be furnished at once?—A. The effect would be, in my judgment, to bring up the price of flour to the rate that you could get it from abroad, deducting the freight. When I took this contract of mine with General Clark, before going out myself I sent out parties to purchase the flour, and they had to go to Cedar Rapids and buy it, in consequence of its being impossible to obtain that quantity nearer home. Besides, the

capacity of the mills in that country is limited, so that a large quantity could not be furnished at once.

Q. How was it in August, 1870; could this result have been avoided then?—A. It is one of the tricks of the trade out there, and I suppose everywhere else. They probably would have put up the prices, so that it would cost the same as if it was bought at a large market, with the freight out; I always found it so; and I have bought a great deal of flour for the Indians.

Q. If you were then intending to purchase ten or twenty thousand sacks in that market, what course would you pursue if you wanted to get it cheapest?—A. I would buy it quietly, unless I expected to pay the Chicago or St. Louis price, less the freight.

Q. Are you familiar with the transportation business on the Missouri River?—A. I have freighted a good many goods.

Q. At what season of the year does navigation practically close, as high up as, say, Cheyenne, in ordinary seasons?—A. We have, in the first place, what is known as the June rise, caused by the snow melting on the mountains, which generally occurs, say, the 25th May, and the river continues to rise until the 1st of July. Sometimes it does not continue later than the 25th of June, if the snows are not heavy. It then commences receding by the last of July, and though the water then is not as low as later in the season, the channel is filled up with quicksands, and it is difficult navigation from that time until the time the channel cuts out. The navigation is limited then on account of the shallow condition of the water. Navigation closes there, for heavy transportation, with the month of September, perhaps August. But boats can run usually until ice commences to form. I should think seven out of the ten years I have been there, the river has frozen over from the 1st to 22d of November; once it closed up about the middle of November, and opened again in December. This last year we had an extraordinary season. We had a rise of three feet in the fall, a thing I had never known before. We had a mild fall, and the boats continued running very late, until December.

Q. A contract was made June 17, 1870, by the Indian Department for the supply of a large quantity of beef, requiring about 3,000 head, to be delivered from the middle of July to the 1st of September. At the time the contract was made, there was no appropriation. The beef was to be delivered at the Indian agencies on the Missouri River, extending as high up as Grand River. The contract price for the delivery was 6½ cents gross. State your idea with regard to whether or not that was an exorbitant price, or a fair and reasonable price. The money had not been appropriated to pay for them, and the contractor had to take the risk of the appropriation?—A. I do not know whether it is reasonable or not. I would not have delivered them at any price, and taken the chance of an appropriation.

Q. Do you know what cattle were worth along the line of the Pacific Railroad, at that time?—A. I do not know. If I had gone into Dakota Territory to purchase the cattle, I would have been compelled to buy northern cattle, and paid 5½ cents for them, but one half that number could not have been obtained there. South I could get them cheaper. Everything depends upon the advantage a man can take of the times and markets. In the month of March I could get all my arrangements ready, and would agree to feed these Indians at 4 cents per year, live weight, or 8 cents net weight. In that case, that is, if net weight, I should demand the hides and tallow, and prompt payment.

Q. But when you were called upon to make immediate purchases, and it was known that a large amount of cattle were needed, the prices would naturally advance?—A. Yes, sir; that would be the tendency, unless the thing was kept very secret. I would not take any reasonable price, however, and await an appropriation.

By the CHAIRMAN:

Q. Suppose, however, that the contract provided that the Government should pay on the receipt of the agent's certificate?—A. And also that the payment depended upon the regular Indian appropriation bill? I would not have taken it at all.

Q. Then answer my first question. Suppose it is a part of the written contract that the money shall be paid immediately on the receipt of the agent's certificate, what would be a fair price?—A. I would not take it then, if the money had not been appropriated.

Q. But supposing the money to have been paid on the receipt of the agent's certificate of the delivery of the cattle, as it was in fact?—A. What was the length of time given to purchase the cattle?

Q. The contract is dated the 17th of June, and the contractor was to have until the 1st of September to deliver the last of them. They were to be delivered in three installments; the first the 15th of July, one-third about August 1, and the residue on the 1st of September.—A. I do not think I would have delivered the first installment for less than 6½ cents, the second installment less, and the third installment still less.

Q. How much less would you have delivered the second installment for?—A. I think a cent a pound less.

Q. How much less the third installment?—A. I should think there would be half a cent more.

Q. So that the first installment would be 6½ cents, the second 5½, and the third 5 cents?—A. Yes, sir. I believe I would have taken the contract for that, with the assurance that the money was to be paid as soon as the cattle were delivered. I will state in connection with this Santee Sioux contract that I lost $6,000 on it. It was a little bit of experience I undertook to purchase and I am satisfied with it. The contract amounted to about $16,000 or $18,000.

Q. What was the occasion of that loss?—A. I took the contract too low, and I lost some cattle.

Q. By stampeding?—A. Not altogether, but because I took it too low.

By Mr. WELSH:

Q. What did those cattle cost you when you bought them?—A. I bought them in Southern Kansas; I bought two herds there by the lump. I never made any estimate in regard to them. They were calves, year olds, two-year olds, steers, cows, and everything of the kind.

Q. What was the price in Aberdeen then for cattle?—A. They were paying three or four cents there two years ago last summer.

Q. Do you know the price this last season in Aberdeen?—A. I was not there.

Q. Do you know what it was in either of the other cattle markets?—A. I do not, except from hearsay.

Q. So this purchase that you made at $2 45, deliverable on the Missouri River, was with the understanding that if you made nothing more, he (the owner) would get nothing but the $2 45?—A. Yes, sir; he was to share both the profit and loss.

Q. Are you familiar with the rates at which the Texas drovers have been delivering cattle on the Missouri River?—A. Nothing, except from hearsay.

Q. The drovers told you?—A. The persons who went up with the cattle told me what the cattle they drove up sold for.

Q. Were those cattle you sold at five and a half cents American cattle?—A. Some were American and some were Texas.

Q. Where were they delivered?—A. A portion at the Yankton agency, a portion at Cheyenne, and a portion at Grand River.

Q. How many flouring mills are there now from Sioux City up, including Sioux City and ten miles up, on both banks?—A. There are two at Sioux City, and I should say eight altogether.

Q. What is the capacity of those mills?—A. The most have two running burrs.

Q. How much can two running burrs run off in two hours?—A. Probably one hundred and fifty to two hundred sacks.

Q. Is the supply of wheat for these mills raised in the neighborhood?—A. Yes, sir; I believe so.

Q. Is the supply ample this year?—A. It is for ordinary purposes this year. I do not believe it is for a contract of this magnitude. I do not believe there is enough in that portion of Nebraska to supply a contract of that character.

Q. What is the price of wheat at Yankton?—A. I do not know. I bought some there at seventy-five cents per bushel just before I came away.

By Mr. SARGENT:

Q. If flour was to be bought here and there quietly, by the few hundred, say for two or three thousand sacks in amount, could the agent of the Government do that as well without employing a contractor?—A. I do not believe he could, for the very reason that the moment an agent of the Government goes out there, they mistrust something is up. If he went out there without being known at all, I have no doubt the flour could be picked up, but not that amount of it.

Q. Is it necessary that the agent of the Government, going there for that purpose, should advertise it, either by his conduct or in any other way, so as to defeat his object?—A. I should not suppose it was. Still, if a stranger should buy a large quantity of flour in that way, dealers would find it out very quick.

Q. It a contractor finds it to his advantage to employ a resident commission merchant to make such purchases, paying a commission therefor, could not the Government act through those same means with advantage?—A. I see no reason why it could not, if so disposed.

By Mr. WELSH:

Q. Do you know whether Omaha or Council Bluffs have, either of them, any flouring mills?—A. Yes, sir; Council Bluffs has. I do not know whether there is in Omaha or not. There are several below there.

Q. Do you know about the rates of flour there this last season on from July, August, and September?—A. I bought flour in July and August.

Q. Where?—A. At St. James, twelve or fifteen miles below Yankton.

Q. I mean at Council Bluffs?—A. No, sir; I do not know anything about that.
Q. You say there is a considerable flour market there?—A. Yes, sir.
Q. What is the effect on the Indians there of keeping up the constant supplies; what would be the effect if the supplies should fall short?—A. They would steal. If the question of starvation or stealing was put to them they would steal. I think that has been the cause of our Indian wars heretofore. I know when I was in charge of the Sioux Indians there for several years, that when the Indians got out of supplies they would go off on hostile expeditions, and I could not control them; but when they had their bellies full you could control them and they would be peaceful.

WASHINGTON, D. C., *February* 3, 1871.

WILLIAM NICHOLSON affirmed and examined.

By Mr. SARGENT:

Question. Where do you reside?—Answer. In North Carolina.
Q. What connection have you with the Indian service?—A. I have no connection as an agent of the Government, but as a general agent of the committee of the Society of Friends, attending to any matters that they may place in my charge.
Q. Did you in pursuance of that charge visit the Quapaw Indians at the time of the Williamson payment?—A. I did.
Q. State whether you were present at a speech made by General Blunt before the payment?—A. I was.
Q. State what was said in that speech, as near as you can remember?—A. I took no notes and was not paying sufficient attention to give any very accurate account of it. I did not take any particular notice of what he said. It was a general account of the great amount of work which he had bestowed in securing this appropriation to these Indians. He said, if I remember, that in the time of the war he was in charge of that section of the country, and that he had supplied in various ways their necessities; that by that means they became a good deal attached to him, so that after the war when they wished some one to present these claims they applied to him to prosecute them at the seat of Government, and secure an appropriation for them; that he did so; that he had been at a great amount of labor and expense; that he had spent thousands of money and probably might have to spend more to finally secure the whole amount; that they were to pay 33⅓ per cent. on the amount they received; that he was not to receive anything for his services unless he secured the appropriation.
Q. Whom did he make this speech to?—A. He spoke to the Indians in the presence of Commissioners Lang and Colyer, of Mr. Earle, of Massachusetts, and myself; and there were several other persons present whom I do not know.
Q. Did he make any appeal to the Indians?—A. He wished to know of the Indians whether they expected to do what they had promised—whether they expected him to have this 33⅓ per cent.
Q. Did he state how much money he had spent?—A. As far as my memory goes it was about $6,000, though he probably might have to spend $10,000 more—he did not know; he had a good many assistants engaged in the work, and he might have to spend $10,000 or more.
Q. Did he say he had to pay any of this money to members of Congress of either house, or that they had received any part of it?—A. I have no recollection of his specifying any individuals to whom he paid money. I do not remember anything about that.
Q. Did he convey the impression to your mind, from what he did say, that any of that money was to go to members of Congress, directly or indirectly?—A. I am not sure that I have any recollection of anything that he said about that, further than that I understood he paid it here in Washington, either to office-holders or claim-agents who were assisting him.
Q. Did you infer, from what he said, that he had paid it to any one in office here?—A. I do not remember that he made any assertion of that kind, and I should not infer that he meant that.
Q. Did he say anything about his having to buy and fight the matter through Congress?—A. He spoke of having trouble to get it through, and he may have used the expression that he had to "fight it through." I have no recollection of his having said that he had to buy it through Congress.
Q. Were you present at the payment the next day?—A. I was present at the payment the next day. I think I was not in when the payment commenced.
Q. Did Mr. Lang, or any one else, enter any protest against the payment of that money in the manner in which it was made?—A. I heard of no protest and knew of none.
Q. Did every one there seem to be satisfied with the mode of payment?—A. There was no objection made to the payment at all.
Q. Was any objection raised by anybody or dissatisfaction expressed, or complaints

made at General Blunt's taking so much money from the Indians?—A. Yes, there was. Superintendent Williamson and Commissioner Lang both made frequent allusion to that matter, and I suppose all of us made remarks of that kind. I do not remember any specific remarks. I know it was the general conversation.

Q. Did either of you suggest the impropriety of the money being deducted at that time?—A. Superintendent Hoag, I remember, made the remark that if he had the power he would only pay two-thirds of it, and send the other one-third back to the Department, and let General Blunt collect it there.

Q. Was that remark made to Mr. Williamson?—A. It was made in his presence, and Superintendent Hoag further remarked that he had nothing to do with it; that he was there only as a spectator.

Q. Was any person present to represent the Indian commission there?—A. Mr. Lang was there. No other member of the commission was there.

Q. He made no such remark?—A. He evidently disliked very much that General Blunt should receive 33⅓ per cent. He made no protest or remonstrance, or anything of that sort within my hearing. I knew of none.

Q. Did Mr. Williamson make any reply to this suggestion, that "one-third should be sent back to Washington?"—A. He replied to it that these were his instructions specifically, to pay the money to the Indians and to no one else, and that it would be a departure from his instructions to pay a part and not the whole; that if he paid any he must pay all; that there was no discretion allowed him in the matter.

Q. How long would it have taken for him to hear by telegraph from Washington and back again to the agency?—A. I suppose to Baxter, the nearest telegraph station, was six or eight miles from where the payment was made.

WASHINGTON, D. C., *February* 3, 1871.

JOSEPH A. WILLIAMSON recalled at his own request and examined.

By Mr. SARGENT:

Question. Have you any further explanation you desire to make to the committee, with reference to your payment to the Quapaws?—Answer. Nothing further except in reference to the bond, and also to the private instructions referred to by Mr. Lang, in which, I think, he unintentionally did injustice to Secretary Cox.

Q. Were the instructions you referred to verbal?—A. Yes, sir; from Secretary Cox.

Q. You may state any verbal instructions received by you from Secretary Cox at the time of your entering on that mission.—A. When I was ordered by him to go and make this payment, I detailed to him the difficulties surrounding a disbursing agent, and illustrated it by the Choctaw and Chickasaw payments which I had witnessed. He replied to me in these words: "I have conversed with Mr. Colyer upon the subject of these attorneys' claims. He understands the business perfectly. Mr. Colyer will be present at each payment to take charge of the Indian when you have put the money into his hand, and supervise his interest. So far as you are concerned, if the Indian throws his money into the Arkansas or makes any other disposition of it, you will not be held responsible. Mr. Colyer will not have anything to do with your duties, nor should you have anything to do with his duties. He will examine the vouchers at the agency. I shall talk wth him fully upon the subject, and if he applies either for bacon or flour you will take from General Blunt fifteen thousand dollars—ten thousand to cover a certain deficit, and five thousand to cover the necessary repairs on certain buildings. If these debts are honest the Indians ought to be advised to pay them, I think."

WASHINGTON, D. C., *February* 3, 1871.

ELY S. PARKER, Commissioner of Indian Affairs, recalled and examined.

By Mr. WELSH:

Question. What evidence is there of the earliest moment of the receipt of Boyd's bid in your office for the contract advertised for August 27, 1870, and made September 12 following?—Answer. The bids were opened there on the 12th, and the evidence to me is the chief clerk's indorsement.

Q. Did you not see it before that indorsement?—A. There was a bid brought in after 12 o'clock that day. I could not say that it was the same bid. I did not read it.

Q. Did this bid come by mail to your office?—A. That I cannot say to my knowledge. If the one that was brought to me and this are identical, it did not come by mail to the office. At 12 o'clock we sent over to the post office to see if there were any bids there, and we found there were none.

By Mr. SARGENT:

Q. The envelope covering this bid seems to have no stamp on, or cancellation of stamp; would that be evidence that it came personally, and not by mail?—A. No, sir; because mail matter comes free to that office.

By Mr. WELSH:

Q. Can you say of your own knowledge that this did not come by mail?—A. No, sir.

Q. Are you prepared to say of your own knowledge that this was never in your office until after 12 o'clock August 12?—A. I could not do it. The first time the bid came to my knowledge it was brought in by Mr. Cady, chief clerk. I directed him to note the time that it was brought in, and that it was too late.

Q. Do I understand you to swear that this bid was not in the possession of your office before 12 o'clock on that day?—A. I could not. The indorsement on this bid is, "Too late. Received August 12, 1870, at 2½ p. m."

By Mr. CHIPMAN:

Q. In whose handwriting is that indorsement?—A. In that of Mr. Cady, chief clerk.

Q. Is that August correct?—A. I should say not.

Q. What reason have you for thinking that it was not dated properly?—A. Because the bids under this letting would not be opened until September 12, and the letter was dated in September.

By Mr. WELSH:

Q. Have you the original telegram reducing Morrow's bid for beef and Bosler's for bacon? if so, please produce it.—A. I have here the original telegram, which I received September 12, 1870. It is as follows:

"OMAHA, NEBRASKA, *September* 11, 1870.

[Received September 12, 8.10 a. m.]

"Hon. E. S. PARKER, *Commissioner Indian Affairs:*

"J. A. Morrow reduces his bid for beef two cents per one hundred pounds, and J. W. Bosler his bid for bacon one-quarter of one per cent. per pound.

"J. W. BOSLER.
"J. A. MORROW."

Q. Can you tell me in whose handwriting the date "September 12" is on this telegram?—A. I suppose it is in the operator's handwriting.

Q. Do you know at what time this was received at your office of your own knowledge?—A. No, sir.

Q. As there was no security attached to this, why was it received as a bid?—A. I cannot tell you any more than that it was considered, I think, both by Secretary Cox and myself, to be a part of the bids already in possession of the office at that time.

WASHINGTON, D. C., *February* 3, 1871.

A. T. HUNTINGTON sworn and examined.

By Mr. SARGENT:

Question. What is your occupation?—Answer. Chief book-keeper for Jay Cooke & Co., New York.

By Mr. WELSH:

Q. Have you an abstract of the items in J. W. Bosler's accounnt since the end of May last?—A. I have and present it to the committee. I also have with me the checks.

Q. What entries in the book have you beyond these?—A. I have no entries which show any more upon the book than these checks show; the entries correspond with that statement.

[The statement referred to will be found in the appendix, page 187.]

WASHINGTON, D. C., *February* 3, 1871.

General M. C. MEIGS recalled and examined.

By Mr. SARGENT:

Question. Some testimony has been given tending to show that the contract with Hiram K. Hazlett, which you now hold in your hands, made by the Quartermaster's Department, is intended to provide for way freights as well as through freights, and that it provides the rates for the way freights as well as those for the through freights. Is that correct?—Answer. Yes, sir.

Q. Please look at the contract and state the rate provided for way freights between Yankton and Fort Randall.—A. For March, April, May, June, July, and August, 75 cents; for September, $1 50; for October the rates are 200 per cent. in advance of March, April, May, June, July, and August, which would make it $2 25.

Q. What are the distances?—A. The table shows, I think, that the distance from Brulés to Crow Creek is eleven miles.

Q. What are the rates for way freight?—A. One dollar for March, April, May, June, July, and August; $2 20 for September, and $3 for October.

Q. Is that rate of freight for these eleven miles the rate per hundred miles, or for the whole distance?—A. I think these are the rates for the whole distance.

Q. Is there much way freight?—A. Very little. I had probably better state generally that the points of shipment were mainly Chicago and St. Louis. The great amount of our shipments are for the purpose of supplying troops at the points of consumption. We send up our supplies for everything that is necessary; but in making these contracts we found it desirable to make some arrangement, in case a garrison is changed from one post to another, to provide for the means of supplying, then of moving them from one post to another. The steamer, which may be at St. Louis or Sioux City, will have to come all the way perhaps empty in order to take the cargo from Brulés to Crow Creek, these eleven miles; so that we must pay for these eleven miles the cost of sending the steamer from St. Louis to that point and back again. The way freights are of exceedingly small consequence in comparison with the whole contract, but they are taken into consideration in making up the calculation as to which is the lowest bid for the whole contract, and although we got these high prices for small distances, yet the freights sent are so inconsiderable that it is of very little consequence in comparison with the whole contract. If we should have wagons at one of these points, and could transport them cheaper by land than by ordering up a steamer from St. Louis, we should of course do that; but if the steamer has to be ordered up we must of course pay these prices, which are the prices lowest bid.

Q. And you say the items of way freight are insignificant in comparison with the great bulk of your freight?—A. Very insignificant in comparison with the great amount of freights from St. Louis and Chicago and these various points.

By Mr. CHIPMAN:

Q. I notice on page ten of your manuscript deposition given heretofore, you say: "I should like to say that, of course, the Quartermaster's Department did not undertake that transaction as a volunteer business. Whatever we did for the Indian Department was done by order of the Secretary of War, and as I understand in this case, at the request of the Interior Department and the Indian Bureau." Does that refer to your arrangements in 1869 for carrying freights?—A. I was speaking then generally of this question of transportation. I ascertained shortly after I gave that answer, in looking over the letters on the subject, that there were letters written in 1869 on this subject, referring to the two million dollars appropriation given to the President to keep peace with the Indians. That request by the Secretary of the Interior and Indian Bureau, so far as I know, was not repeated the next year, but went into our advertisements for proposals as a matter of routine.

Q. I call your attention to page eleven of your testimony, in which, to the question, "Whether the Commissioner of Indian Affairs knew he could avail himself of the benefits of your contract for carrying Indian goods," you reply that the Commissioner of Indian Affairs, as you understood, wrote a letter to the Secretary of the Interior, which was sent to the Secretary of War, requesting you to provide transportation for Indian goods; do you refer to the same correspondence of 1869?—A. To the same correspondence of 1869.

Q. It did not relate to the contract of 1870?—A. It was before that contract existed; but, as I said, having been requested to do that as a matter of routine, we continued in our advertisements for proposals to include the transportation of Indian goods, although I do not know that any request by the Interior Department of that description was again made.

Q. You do not know whether the Commissioner of Indian Affairs had any knowledge that you had so provided?—A. I do not know. We continued to do it as a matter of course.

By Mr. WELSH:

Q. I observed in the last letter you increased the number of pounds to be carried up to forty millions.—A. There were two contracts, and were for twenty million pounds each, making forty millions. You will find in the settlements that some Indian goods were transported.

WASHINGTON, D. C., *February* 3, 1871.

DE WITT CLINTON POOLE, captain United States Army, stationed at Fort Randall, Dakota Territory, sworn and examined.

By Mr. WELSH:

Question. How long were you Indian agent at Whetstone?—Answer. I was detailed in the month of May, 1869. I reported for duty in the month of May, 1869. I remained upon duty until the 18th of December, 1870.

Q. We have in the papers and before the committee an account of your receiving a

herd of cattle from the Commissary Department; do you know at about the date they were received?—A. About the last of June I received a lot from the Commissary Department.

Q. Do you know whether they were cattle that had been herded in that neighborhood or not?—A. They were cattle, as I understood, kept there by the Commissary Department, for the use of that Department.

Q. Did you see any contract or contracts for any cattle to be delivered at Whetstone at any time during the summer or autumn?—A. I saw, last fall, what purported to be a contract.

Q. With whom?—A. Mr. Hutchinson was the contractor.

Q. Do you remember for how many cattle?—A. I think for about sixteen hundred head, to the best of my recollection. This was in the latter part of 1870.

Q. What price was to be paid for them?—A. The price stated in that paper was $2 75 per hundred gross weight.

Q. How many cattle did he receive toward the end of June from the commissary?—A. About thirteen hundred head.

Q. Was it on the Bosler or Morrow contract to be delivered?—A. The Morrow.

Q. After receiving the thirteen hundred head from the commissary were you notified that others were coming?—A. I was.

Q. Did you express a willingness to receive them or a disinclination to receive them?—A. I expressed a disinclination to receive them.

Q. Upon what ground?—A. That I had cattle on hand enough for present wants.

Q. Was there an abundance of grass at that season?—A. No, sir, there was not. There had been a drought prevailing there, as I understood. I was not at the agency through the first part of the month of June, and I do not know at what time it commenced, but I know when I arrived there in July the drought was very great.

Q. What ground of objection did you make to having them delivered?—A. I wrote to the Department, through the proper channels, stating that I had cattle enough on hand, and that I asked for an order not to receive these cattle.

Q. Did they show you the contract as to the time these cattle were to be delivered?—A. I received notice afterward that they were to be received in July, August, and September. I had then enough cattle, as I have stated, and I said that I would not receive these without positive orders from the Department.

Q. Why?—A. I apprehended loss from stampeding, and I did not want the trouble and expense of taking care of them. It would require an extra force of herders. The herd would have to be separated. It was too large to keep together, and would involve double expense.

Q. Had he delivered only one-third according to contract, at that time, and one-third a month later, would that have done anything to relieve you of difficulty?—A. Yes; we should have been drawing upon the supply all the while for consumption.

Q. What was the effect then of having the cattle which, under the contract, were to be delivered in August and September delivered in July?—A. The effect was to increase the expense. I was obliged to employ an extra set of herders. They were herded at a stipulated price, and this herd had to be kept separate. It was impracticable to keep them together on account of the danger of stampeding, and then it was impossible to find grass for so large a number without a very large range.

Q. Did you send any notice to the Commissioner of Indian Affairs about the anxiety of the Indians to receive their annuity goods?—A. Yes, sir.

Q. What was the reply?—A. I received a reply from the Department that they would be there, I think it was, the 15th of September—a telegraph reply. I telegraphed at the instigation of one of the principal chiefs, Spotted Tail, who was very anxious about his goods, and asked me to do so.

By Mr. CHIPMAN:

Q. The matters about which you have been speaking have been embodied in official communications, have they not?—A. Most of them, except in regard to the annuity goods.

Q. In regard to the receipt of the cattle, was that made a matter of correspondence?—A. Yes, sir.

WASHINGTON, D. C., *February* 3, 1871.

General WILLIAM MEYERS recalled and examined.

By Mr. CHIPMAN:

Question. Have you any memoranda showing specifically the transportation contracts you made for way freights; if so, please state them.—Answer. I have no memoranda of anything of that sort since 1866.

Q. In a transporation contract for horses and mules, as well as officers and troops, would that make any difference in the rate per pound for transporting freight?—A. If it were known that any considerable number of troops and animals were to be trans-

ported, I should think it would have the effect of giving us more favorable rates for way-freights.

Q. Did you ever have occasion to contract as late as November?—A. No, sir.

Q. Would November freights be at larger freights than October freights; if so, how much larger?—A. It would be almost impossible to get anybody to undertake to contract as late as November to go any distance up the Missouri River.

Q. Why?—A. By reason of the low condition of the river, and the probability in going up any distance of being ice-bound and unable to get back.

Q. At what time does the navigation of the river close above Sioux City?—A. At various periods; usually from about the latter part of October to the middle of November.

Q. At what time would it be safe to ship goods up to any high point on the Missouri?—A. You could ship as high as Randall the whole month of October if the season was favorable.

Q. Do you know J. W. Bosler?—A. Yes, sir.

Q. How long have you known him?—A. Eight years.

Q. How well have you known him?—A. I have known him as a man of business at Sioux City, and as a Government contractor.

Q. Do you know enough about him to speak of his character as an honorable man, and of his integrity as a business man?—A. I never heard a word said against his character or against him as a man of integrity.

Q. How has he been regarded in your Department?—A. He has been regarded as a man who always fulfilled his contract.

WASHINGTON, D. C., *February* 3, 1871.

Major B. DUBARRY recalled and examined.

By Mr. CHIPMAN:

Question. Have you any memorandum showing the price paid by the commissary at posts along the Pacific Railroad, west of the Missouri River; if so please submit it to the committee.—Answer. I have and I now submit it.

Q. Have you compared the exhibit you present here with the official records?—A. Yes, sir.

Q. Is the memorandum you have an abstract from the records?—A. Yes, sir, from the records of the Commissary General of Subsistence. The prices are net except where they are marked "gross."

Q. Does the first column show the place where furnished?—A. Yes, sir.

Q. And the second the date of the contract, the third and fourth columns the date from which and to which period included in the contract, the fifth column the price net, except where indicated as gross?—A. Yes, sir.

Q. These contracts were let on advertisements for proposals?—A. Some of them.

Q. Does the exhibit explain that?—A. It does not. There is one dated May 22, 1869, at $5 75 gross, fifty head to be delivered at Randall. With the exception of this the contracts were bid on advertisement.

[The tabular statement referred to placed in evidence to be inserted in the appendix.]

By Mr. WELSH:

Q. State whether any of these were American cattle, or have you any knowledge on that subject?—A. I cannot say positively as to whether the contracts included only American cattle; but my impression is that the contracts of 1870 and 1871, for the Northern Missouri River, excluded all except American cattle. I will not be positive as to that.

Q. Do you know as to what restrictions there were as to the weight of cattle in this contract?—A. I cannot say positively. I believe they were to average a thousand pounds gross weight.

Q. Do you know the usual difference between delivering three or four thousand head of cattle at a time and delivering them in small quantities?—A. I cannot give the explicit difference. There would be considerable difference.

Q. Do you know whether at these posts a specific quantity is given so that the contractor can tell definitely what he will deliver, or have you a right to vary the quantities?—A. Some were for specific quantities, and some were such as might be required for specific purposes.

Q. How often was the contractor to deliver them under these contracts?—A. Some required four or five times a week; they were usually to be delivered in bulk, and I think were all to be delivered within a specified time.

Table referred to in testimony of Major Du Barry.

Where furnished.	Date of contract.	From—	To—	Price.	Remarks.
Omaha	Aug. 10, 1869	Sept. 1, 1869	Aug. 31, 1870	8.9	
	July 29, 1870	Sept. 1, 1870	Aug. 31, 1871	9.1	
Fort Kearney	June 17, 1869	Sept. 1, 1869	Aug. 31, 1870	10.0	
	June 21, 1870	Sept. 1, 1870	Aug. 31, 1871	11.0	
Fort McPherson	June 17, 1869	Sept. 1, 1869	Aug. 31, 1870	10.0	
	June 21, 1870	Sept. 1, 1870	Aug. 31, 1871	9.5	
North Platte	June 17, 1869	Sept. 1, 1869	Aug. 31, 1870	10.0	
	June 21, 1870	Sept. 1, 1870	Aug. 31, 1871	9.45	
Sidney Station	June 17, 1869	Sept. 1, 1869	Aug. 31, 1870	10.0	
	July 15, 1870	Sept. 1, 1870	Aug. 31, 1871	9.5	
Fort Sedgwick	June 17, 1869	Sept, 1, 1869	Aug. 31, 1870	10.0	
	July 18, 1870	Sept. 1, 1870	Aug. 31, 1871	11.5	
Fort D. A. Russell	June 17, 1869	Sept. 1, 1869	Aug. 31, 1870	10.0	
	June 21, 1870	Sept. 1, 1870	Aug. 31, 1871	9.5	
Fort Laramie	June 17, 1869	Sept. 1, 1869	Aug. 31, 1870	10.0	
	June 21, 1870	Sept. 1, 1870	Aug. 31, 1871	9.5	
Fort Fetterman	June 17, 1869	Sept. 1, 1869	Aug. 31, 1870	10.0	
	June 21, 1870	Sept. 1, 1870	Aug. 31, 1871	9.5	
Fort Randall	April 12, 1869	On or before	June 20, 1869	3.9 gr.	90 head; 50 additional by July 10, 1869.
	*May 22, 1869	On or before	June 10, 1869	5.75 gr.	50 head. Yankton and Ponca Indians.
	April 29, 1870	On or before	July 21, 1870	4.75 gr.	290 head.
Fort Sully	May 29, 1869	On or before	July 20, 1869	4.20 gr.	600 head.
	April 29, 1870	On or before	July 20, 1870	5.9 gr.	390 head.
	Aug. 22, 1870	On or before	Oct. 15, 1870	5.0 gr.	160 head.
Fort Stevenson	April 12, 1869	On or before	July 16, 1869	5.3 gr.	90 head; 100 additional by July 10, 1869.
	May 2, 1870	On or before	July 20, 1870	5.15 gr.	100 head.
Fort Buford	April 12, 1869	On or before	Aug. 1, 1869	5.85 gr.	150 head; 40 additional by August 10, 1869.
	May 2, 1870	On or before	Aug. 1, 1870	5.69 gr.	170 head.

* Purchased in open market.

The above prices are all net, except where marked gross.

May 29, 1869, by written contract, without advertisement, (to be delivered on or before July 1, 1869:)

Whetstone Creek ..... 225 head, at 5½ gross.
Big Cheyenne ..... 275 head, at 5½ gross.
Grand River ..... 325 head, at 5½ gross.

WASHINGTON, D. C., *February* 3, 1871.

JOHN FINN sworn and examined.

By Mr. SARGENT:

Question. State your residence and occupation.—Answer. I reside in St. Louis; I am at present engaged in pork-packing; I am also a cattle-broker.

Q. Do you know General Parker, Commissioner of Indian Affairs?—A. I do.

Q. Did you in June last have any conversation with General Parker in his office, with reference to putting in a bid to furnish cattle for Indian purposes?—A. I did.

Q. About what time was that conversation?—A. It was frequent in May, June, and July.

Q. You spoke to him frequently about it in May, June, and July?—A. Yes, sir; I do not know the dates.

Q. Did you make any proposition to him to furnish beef for these purposes?—A. I did.

Q. Did you have any conversations on that subject about the time of the letting of the Bosler contract in June?—A. I did.

Q. How near to the time of the letting of that contract?—A. The same day; I think the day before, and the very day.

Q. What did you propose to furnish him beef for?—A. I offered him Texas cattle at 4½ cents a pound, and American cattle at 6 or 6½ cents a pound, gross; I cannot say which.

Q. Did you make any further offer to him in that connection?—A. I did; I told him I had cattle at the Winnebago agency, and that if he did not consider them worth 4½ cents a pound, I would take less for them; that I wanted to sell them.

Q. Had you a contract at that time to furnish cattle to any of the agencies; and if so, for how much and to what tribes?—A. I supplied the Winnebago agency for seven cents net, or three and a half gross.

Q. Did you have cattle enough on hand to take a large contract on the Missouri River?—A. No; I could not fill a large contract with the cattle I had on hand, but I could fill any contract; I could get the cattle.

Q. What reply did Commissioner Parker make to this proposition to furnish cattle

at those rates?—A. He told me he had not any money appropriated by the Government to buy cattle; that if I would give him all the cattle I ever owned at half these rates, he could not take them, because he had no money appropriated for the purpose; that he could not let a contract.

Q. Was anything said about the condition of the Indians or the necessity of furnishing beef to them?—A. Yes; I told him I had heard from the agent at Whetstone and from other reservations that the Indians were in great need of stock, and asked him if he was not going to buy them. He told me he would not do it. I asked him what he was going to do in regard to supplying these Indians. He said the Indians would protect themselves the same as they did previously; that they could take to the plains and subsist the best they could.

Q. Did he refuse to accept your proposition?—A. He did.

Q. On what day was this particular conversation that you allude to with reference to the time of making the Bosler contract?—A. I could not swear to that; I think it was the 16th or 17th of June.

Q. With reference to the time of making the Bosler contract, was it on the day you heard the contract was made or the day before?—A. It was the same day. I cannot swear positively to that. I know from other parties that he made a contract that day. I never saw the contract; I understood that it had been made.

Q. How long after the contract was made did you hear of it?—A. I heard within two or three hours, that same afternoon.

Q. Did you have the facilities for executing such a contract, the herders, &c.?—A. I did.

Q. State to what extent you had such facilities at that time.—A. I refer to General Sherman, General Allen, chief quartermaster, and General Meyers for that.

Q. State what facilities you had in the way of herders, buildings, &c., for filling such a contract.—A. I had the means and the money. I could fill any contract the Government could give me at that time.

Q. Did you have men in your employ to do that business at that time?—A. I had; I had horses and cattle at the agency, and I was able at that time to fill any contract the Government would give.

Q. Was your contract for the Winnebagoes for a part of the year or the whole year?—A. For the whole year—twelve months.

Q. Would or would not the fact that the appropriation bill had not passed have made any difference in your willingness to take a contract at that time?—A. It would make this difference: I would supply the commissary department a dollar less than I would the Indian Bureau. I was willing to take a contract at that time at the price I bid, taking the risk and waiting for an appropriation. That is the reason I bid higher.

Q. What amount did you inform the Commissioner of Indian Affairs you would take the contract for?—A. For Texas cattle at 4½ cents a pound, and 6½ for American cattle. In fact, there were no American cattle in that country, and 4½ cents was the bid I made for Texas cattle.

Q. Were the cattle you had on hand as good as those furnished by Bosler?—A. I never saw his cattle.

Q. Were they as good as the average of Texas cattle?—A. Better, a good deal.

Q. Why?—A. Because they were there on the ground the year previous; they were not just driven from Texas; they were there that year, and they were better than ordinary Texas cattle.

Q. Who else was present at that conversation between you and Commissioner Parker?—A. Mr. Baldwin, from Council Bluffs, heard my conversation with General Parker.

Q. What was his other name?—A. I do not know.

Q. When you heard of the Bosler contract and its terms, how much less could you have taken that contract for? How much would you have given for that contract, which was for three and a half million pounds, gross, at 6½ cents a pound?—A. I never figured up on it, and I cannot tell you now. I offered Bosler here $75,000 to turn the contract over to me.

Q. When did you make that offer?—A. In Washington, about that date.

Q. Was any one present?—A. I think not. I made it through Mr. O'Connor, I think; told him.

Q. Who is Mr. O'Connor?—A. Harney's secretary.

Q. Where is he now?—A. In Washington. I told him—I do not know whether he recollects it or not—that I would give that if he would get it for me.

Q. Did you authorize Mr. O'Connor to make that proposition to Mr. Bosler?—A. No, not exactly that.

Q. Did you yourself propose that to Bosler?—A. No; I said I would give that for he contract.

[The chairman, Mr. Sargent, proposes that as this testimony does not show that witness authorized O'Connor to make this proposition to Bosler, and it does not appear whether O'Connor made it, it be stricken from the record; but it is retained at the request of the counsel of General Parker.]

Q. Do you remember whether or not you stated to General Parker you would wait for the money until the appropriation bills passed?—A. Yes.

Q. What did you tell him?—A. I told him if he would give me a contract I would agree to wait for the money until the appropriation was made, and that I would take the risk of Congress appropriating the money.

By Mr. WELSH:

Q. Have you been in the habit of supplying large contracts of cattle?—A. Yes.

Q. Do you remember the largest contract you ever made in any one year?—A. No. I have sold the Government of the United States more mules and horses than any man living. I sold it more than 170,000 head of horses and mules. I sold more live stock, in my opinion, than any man living.

Q. Have you sold oxen in large quantities to the Government?—A. No. I had a contract for the Department of the Platte for two years, for beef cattle. I supplied all their posts two years.

Q. If I made proposals in September for 7,000 Texas oxen, and asked for two bids—one the cattle to be received immediately at the various agencies on the Missouri River, and the other the cattle to be kept by the contractor and delivered as they were wanted through nine months, at his own risk—what difference would you make between these two contracts, and how much a pound?—A. From the 1st day of May to the 1st day of December, I would make a difference in that kind of contract of 2½ cents a pound. I would furnish for 3 cents a pound in March, April, May, June, July, August, September, October, and November sooner than I would during the other months in the year for 5½ cents a pound. I would make that difference.

Q. Are you familiar with the price of cattle at Abilene, Kansas, during the last season?—A. Yes, sir; good cattle were worth 2½ to 3 cents a pound.

Q. By good cattle what do you mean?—A. I mean that cattle weighing a thousand pounds were worth 2½ or 3 cents.

Q. The ordinary run of cattle, such as are usually driven to the Missouri River, cattle averaging 900 or 925 pounds, would be worth how much?—A. From 2 to 2½ cents, the common grade of cattle.

Q. Do you know what drivers charge, when you buy at Abilene, for delivering them on the Missouri?—A. I do not.

Q. When you have been supplying there have you driven yourself, or bought the cattle deliverable?—A. We have always driven them ourselves.

Q. What would be the cost per pound of driving from Abilene to Whetstone, say?—A. In making a contract I would make at least half a dollar a hundred difference. They could be driven for 20 or 25 cents; but I would not contract and run the risk for less than 50 cents.

Q. In wintering cattle what do you consider a fair difference between having them delivered the 1st of October or the middle of November?—A. It would be about the same thing. The middle of October and the middle of November the weather is about the same, and I would not make any difference on account of that thirty days; but between November and March I would make at least 2½ cents difference.

Q. If you were to winter cattle under contract, state whether you would pay more if they were delivered the 1st of October than you would to deliver them during the winter as they were wanted?—A. I make 2½ cents difference between the 1st of May and the 1st of December. I would sooner take them from May to November at 3 cents than during the winter months at 5½, for the reason that the country is barren, and you cannot get forage through the winter. Then the loss is much less. In the summer they are not subject to stampeding; in the winter they are all the time.

By Mr. CHIPMAN:

Q. Did you communicate the proposition you made to General Parker in writing?—A. I did.

Q. And sent it to the Department?—A. Yes.

Q. Was that the time you had this talk with him?—A. Yes.

Q. That letter contained your proposition?—A. Yes.

Q. Have you the answer to it?—A. No, sir; the letter was sent back to me.

Q. That letter embraces your proposition?—A. No; I had other propositions previous to that, but not in writing.

Q. How many cattle had you at that time?—A. I cannot state; I had a good many.

Q. How many?—A. I suppose I had three or four hundred head altogether.

Q. What kind of cattle?—A. The common run of cattle.

Q. What do you mean by "common run?"—A. Texas cattle, some cows and some steers.

Q. What did you say you got for your Winnebago contract?—A. About 7 cents net or 3½ cents gross.

Q. How many herders had you?—A. I had about eight or ten.

Q. How many wagons had you?—A. Two.

Q. How many horses and mules?—A. A good many.
Q. Where were your ten herders?—A. They were out there in the Smoky Hill country.
Q. What were they doing there?—A. Herding cattle.
Q. Did you have a contract in 1868 or 1869 to furnish beef for the Government to the Harney Peace Commission?—A. I did.
Q. What price did you have then?—A. He gave me a contract at $7 90 a hundred gross in the winter.
Q. How many months did you have the contract?—A. Two or three months, I think.
Q. You furnished beef only in the winter?—A. That is all; I took a contract in February, and furnished under it in March, April, and May.
Q. Where did you furnish the beef?—A. At Whetstone, Grand River agency, and along the country up there.
Q. Was the price you got, $7 90 gross, a reasonable price at that time?—A. At that season of the year it was. I had to buy stall-fed cattle, and I had no chance to get them short of Iowa or Missouri. They were all stall-fed cattle; I could not get any grass-fed cattle at that season of the year.
Q. Were there any Texas cattle among them?—A. Yes; some that were wintered there; but they were stall-fed. I paid as high as $6 a hundred weight for some cattle I furnished to this commission.
Q. You say you furnished none prior to February?—A. No; not under that specific contract.
Q. Did you furnish the Government any beef for which you got your pay in November, 1868?—A. Yes.
Q. What was the price then?—A. That was a contract made with General Sherman at Fort Laramie.
Q. At what price did you furnish under it?—A. I had a contract for the whole department at thirteen cents a pound. General Sherman, General Augur, General Harney, and General Terry were all on the commission at that time. They asked me if I would furnish them for the same price I furnished under the Government contract. I told them that if they would pay the money I would give them cattle the same as I did Government, at thirteen cents a pound. General Sherman said: "We cannot give you money; we will give you vouchers at fourteen cents a pound, and you may wait until the Government makes the appropriation."
Q. Was that gross or net?—A. Net.
Q. And you were getting thirteen from the Commissary Department?—A. Yes; and they gave me fourteen cents with the understanding that I was to wait for the money, and I did so.
Q. Did you furnish flour at any time?—A. Yes.
Q. What did you get for the flour?—A. I think I got $17 a barrel, as near as I can recollect. I only had a small contract.
Q. Did you regard the price of beef for the Winnebagoes as fair and reasonable?—A. Yes.
Q. Was there any profit in that contract?—A. Yes.
Q. How much?—A. I cannot tell how much; I made some money on it.
Q. Did you buy any of the cattle you sent under the Winnebago contract from C. E. and D. F. Hedges?—A. I never did.
Q. Were there any bought for that purpose of these parties?—A. Not to my knowledge.
Q. Were you out there at the time?—A. I was.
Q. Did you stay the whole time while the contract was being filled?—A. I did not; I was there three or four times during the whole year.
Q. What year was that?—A. The last year.

By Mr. WELSH:

Q. Do you know J. E. Boyd, of Missouri?—A. Yes.
Q. Is he a responsible man?—A. He is.
Q. Is he in the cattle business?—A. He was.
Q. Do you know John W. Gilman and N. C. Nettleton?—A. I know John Gilman very well.
Q. Is he a responsible man?—A. He is.
Q. Nettleton you do not know?—A. No.

By Mr. CHIPMAN:

Q. State whether you feel unfriendly or not towards General Parker?—A. No, sir.
Q. Have you never expressed any unfriendly feelings toward him?—A. I did on one occasion last year. I thought he might as well have let me have the contract at four and a half cents as Bosler at six and a half. I thought I could fill a contract as well as Bosler. That is the only time I expressed anything in that way towards General Parker to my knowledge.

By Mr. CHIPMAN:

Q. How did the prices of 1867, 1868, and 1869 compare with those of 1870?—A. There was no difference in that country.

Q. How in the general market?—A. It was about the same.
Q. Did you furnish cattle under contract in 1869 anywhere west of Missouri?—A. Yes.
Q. At what points?—A. At Fort Harker, Fort Wallace, and Fort Hays.
Q. What did you get?—A. I think it was $9 96 net.

By Mr. WELSH:

Q. Were these American cattle or Texas cattle?—A. I supplied a good many American cattle and some Texas.
